you'll see different creatures of the U. You make Gans of different strengths. With this device you'll see what kind of creatures are on this planet exactly as they are. What kind of life and what the planet can support. (:56). The soul you receive the knowledge from might not be from this planet. The souls can communicate in your dreams. (:59). If man doesn't open to the UC he has made his doomsday. Make a few of these coils around your head. (1:02). We give you the first time to make communication with UC. By showing you the way to make communication with UC I have given you your doomsday. The hell is to stay on this planet and kill each other like rabbits. When you stand in front of the UC he sees all your shadows. The level of intelligence at this time reaches to the prophets of the past. I teach you how to crack open the shell of this atmosphere to UC without even leaving. Every one of you are the Messiah. (1:10). He discusses what happened with Allen Sterling and how he complained to Live Stream and now he has been arrested. Rick shows articles. He raped, sodomy of his own daughters sentenced for life in prison. The researchers of KF gave the info to FBI. Keshe worked with Kerry Cassidy. (1:18). One of the big Judges in America committed suicide because he was connected to Alan Sterling. (1:21). False Hope and Susan are connected to Red Circle. These are a group of child trafficking and murder. (1:24). Another man who writes patents poisons the scientists to get liver cancer. They pretend to be students and we keep the info. (1:34). (1:37) A 3 kilowatt Pl generator is now available, production time 3 months. Video of new development with MaGrav to a generator, it has become a total power supply without connection from the Grid, tested with 8 kilowatts. (1:41). (1:47). Arizona Manufacturing will soon get American certification. (1:55). Armand says the lady with Lung cancer in 10 days it has reduced from 10 to 8. (1:59). Dr. Rodrigo speaks of his patient. After 10 days tumors reduced using health Unit and helmet, after a month they are all gone. Treated dog with cancer 10 days tumors reduced, blood test showed Fe, made a patch and gone completely. The cancer markers in blood were reduced, and liver went normal. (2:04). As a medical student he felt they deceived him, he never saw these kind of results in normal medicine. The Pl gives us the power to heal ourselves but we have to do it. (2:11). Explain how you helped the dog depleting the cancer. The blood test revealed what kind metal was in the seed of the cancer, then he made a Gans of it. It's a 2 part process first reducing the energy of the cancer and then you find the metal in the seed and eliminate it. (2:13). The heavy metal holds the MG field of the Cancer, it pulls a lot of energy. He grounded iron and made a caustic of it and Gans and made a patch. The Fe in cancer is a Gans, it receives a lot of energy, by putting the 2 patches of Fe on either side which are of weaker strength they draw the energy from the cancer. ... The seed of brain cancer is usually Ca, and it usually flakes on the skull outside on the hair, that is actually the transmutation of the Ca from inside to the outside where she put the Pen. (2:16). (2:21). Using Gans of CO2 and CuO2 for disinfecting hospitals and post operations infections, keeping the instruments in CUO2 Gans water, wiping the incision with Water afterward, etc. Iranians are making tests. (2:25). Gans water can disinfect toilets in homes. Can use CO2 to disinfect house, foot infection, corn on foot, for baldness. (2:29). Fukoshima. I have filed murder charges in Italian court against Red Circle. (2:33). For mouth cancer use CO2. Please do not use CuO2 for the time being until we have more research. It has to be diluted by a low ratio. (2:36). Test reports from Austria, chain smoker 14 years, and breathing cup, saliva went from acidity to alkaline, maintained alkalinity for 4 hours. (2:41). Renan shows Gans 3 water drops in cup of water, turns

saliva becomes alkaline. ... a 1 year PhD in Pl T in Ghana. (2:52). Renan is making comic teaching for children the Pl T. Plasma Man Superheroes for children. (2:57). From now on you have to present your presentation 2 weeks before, and checked by security. (3:00). It's a presentation about Gans making to try to clarify the many different processes. ..? Carbon stick instead of Cu. (3:07). New Gans production method. (3:14). K: you can't use pencil it has clay. (3:16). The bedroom has become a research lab. (3:19). Keshe describes making diamond. As the C comes off the plate before it oxidizes you blow it up into a diamond. ...
(3:25). Rick reads "Liquid Plasma Kitchen". (3:34). Detailed process of making food Gans. (3:38). Keshe, life on this planet was created this way, vegetation digested and created the first Gans's. The process went further to horizontal people. You showed us how the Gans was made with HCL and NaOH. Ginger Gans. (3:44). Jackie shows what he has done. A Gans Jam Shop. (3:46). He does eat for 4 months. He experimented with putting 2 small Cu wires, 1 N coated in box and Gans starts to grow, the current he used was 12 volts about 2 minutes each about 12 times. It's a brown turquoise, mix. Then he put acid in to the Gans. (3:48). It all converted to a green liquid. Then I was remembering what you said about creating life from Fe, Mg, etc. Then I added Mg, Iron, a Zn plate. and it starts to produce brown clumps, no electricity connected, it has a HEARTBEAT, the brown matter is like a tree matter and it continues to grow, no electricity and it's bubbling and producing incredible energy. (3:50). The Zn plate is releasing so much energy, no caustic in solution, it acid, Mg, Sugar Gans, the salt left over from the Gans production, Liquid Pl of Fe, little bit of Gans of bone marrow and protein. (3:52). There are jar of different Gans under and around the bucket. You have simulated the womb of the Mother, this is how life started. If you allow this to carry on you'll end up with 2 things, (I have asked Jackie to make another bucket with Fe for Hemoglobin), we start seeing the structure of life, which is how life started on this planet. When the acidity balanced off with the salt which was released with it, with the Lightening strike, which happens on most of the planets where life will start. Jackie used 1 or 2 volts intermittent, that's how it is (enough) to start life. Half of the cause is the release of energy so it can start, like a match to the fire. You have Mg and every other elements to create a vertical entity, the other one with Fe you start horizontal. (3:54). The brown matter created becomes the trunk of tree, in man the brown became the skin of man in Africa. This is how life started, gases becoming in touch with the metals in the acidic environment of the planet, then being there for awhile, then change of conditions bringing of the salt, then stroke of lightening, then conversion of energy from acidic to alkaline creates the first process of current flow, then the C in the Pl of a Gans creates the connection and that's how everything gets linked up, and life started on this planet, if we hadn't had the acid first but only the salt, we would have had a different combination on this planet. In most cases in U it's the lightening that starts the life, it will grow its own brain, legs, ?? according to the salinity of the water. With the right conditions you will create an intelligent living being. Now that you have the bucket and control you speed it up. In time it will have lungs, fins, heart, brain and everything else, because once you start this process up you are in the room you give it the info about how to make the being. (3:57). The scientists have tried to replicate this but they haven't understood, the acid, and Alkaline and the transfer across, if you put the right elements in, the creation of Gans, you have created life. In deep space you can make your own steak, why I asked Jackie to

put the Gans's underneath the bucket, like the womb you still need to receive some of the energy of the planet plus what you add to it. You can create any animal you like depending on salinity, the ?? process of elements, ... the Ca gives the base structure, the radiation of the fields of the Pl is to support life, whatever is needed we give more, if you change the Gans's under the bucket you'll get a different animal, because now you are releasing different kinds of energy into the S. (3:59). Is there a God or has Man become the freak accident of the mixture of the chemistry of this planet. Keshe thinks there is no God, there is the release of the original fields that has lead to the creation of being different conditions anywhere across the U, because we received part of the field of originality. If we call the Original Field the Creator, yes there is a God, he created the first field. The release of the origin of the fields of the Pl, God, but was the intention to make Man or is he the byproduct of the interaction of the fields ??. All of you understand the interaction of the ratio of the salt, acidity, gives you what kind of life you like. Why man can't breath in the water, but if you change a slight factor in the salinity in his body, he swim anywhere (? breath underwater), it the (salt) ratio that has made the difference. (4:01). After 15th July this teaching will stop. The Mozhan, program will close soon. You can purchase the new Power Generators. (4:15). MaGrav power Generator, 1,800 Euros.

120th Knowledge Seekers Workshop June 30, 2016
(, How to make the Cancer formula from Togo, Keshe tells about his life,)

(:05). We are moving into the next phase of the KF. The teaching will be moved into a lab that has all the reactors and developments of the Technology. (:08). (:12). Alan Sterling was sentenced to life. Yesterday in Holland one of the biggest pedophile gangs was opened up 75,000 members, some of these members were part of Sterling's group. We open the books when we find out. We open the story about Red Circle and killing scientists and stealing the patients. (:15). Our file was so complete it took only FBI a few days to start investigation. Child trafficking , money laundering, character assassination on Internet. We set up a trap by the advise of the security services and now they were caught. (:22). A new website to show where all the workshops are at. (:25). Teachers will be paid to teach the new T. (:30). We have finished the theoretical and now teach how to apply the T. (:43). In Germany they start a do-it-yourself workshop to build Margrave. (:46). Financing and sharing so everybody can make one and have one. (:57). In Italy we have been asked to teach in the schools. (1:00). In Germany we charge 250 Euros for workshop and MaGrav. (1:06). Keshe asks the German man if Sousan asked him for picture of his daughter, he said it's right but not him. She asked him to go together with her to go against the KF. (1:11). Benjamin from Ghana. Some testimonials with the Gans cream. (1:15). Body Structure, 70% water, 20% proteins, 10% Fat, Ash minerals 5%. O 65%, C 18%, H 12%, N 2%, others. (1:26). Dr. Schussler homeopathic doctor discovered 12 salts in body. (1:36). (1:45). He goes over all the minerals for body. (1:50). The river Birim sediment analysis. The elements discussed is everything we need for human life. (1:53). We don't want to eliminate all the trace metals, but to a safe condition. (2:04). Dr Nash goes over analysis. (2:11). (2:28). Paul from Togo, offer you a way to make Gans with the mind. (2:30). His education about body, Creator, different creatures, and energies from family, (tribe). They taught them Energy is equal to matter. How to convert

energy to matter and matter to energy. He learned herbs. (2:34). How to transfer energy from earth, water, air, and fire to anything else. How to move matter with the mind, and to block negative forces against you. (2:40). How to move energy from the sun and the center of the earth. Tells the process to move energy, first harmonize with earth and sun. Find a stable environment, sit comfortable, unify body, soul, spirit, to connect one with U and act like Creator, use your mind to go inside earth and move the energy. (2:45). Then you put water in bottle and wires don't need Nano coat, bring the energy that you have captured to the bottle, make a mental connection of the plates, disconnect yourself from the energy of the U otherwise you can end up somewhere in the U it is too powerful. In 21 days you'll get the Gans, sometimes he gets Gans in 7 days depends how much energy you capture and put in the bottle. (2:52). Cancer Medicine with the animal fat, chicken, beef, sheep. Gives formula. Go back to previous workshops were he discussed it in detail. (2:59). In Omega3 if short in EPA you get Attention Deficient, and DHA you get Hyperactive. Over time we always got these components from animal fats, however, farm raised animals are stressed so they don't give the Omega 3 but rather omega 6, that's why we are short these days. This is why we have a lot of Hyperactivity in our children, Africans don't do as much Industrial livestock so they tend to be calmer. (3:02). (3:04). They found Soursop in Italy, a similar component is Garlic, and they found something in South America. (3:09). Chemical components of Lemon, Citronella (has CH3) lemon grass, mixing the Citronella with a Gans gives lots of energy from the CH3, Lady Fingers (okra) it helps to balance formula. (3:15). Mixing all components and cook it, boil it 10 minutes, after 3 hours sitting it becomes white hard. (3:19). Number 2 formula is made with Chicken fat. (3:26). The Chicken formula takes 72 hours to solidify. Porcine fat (pork), he used a wild one so it has Omega 3. (3:34). Did the same for Beef Fat. (3:39). How to apply it? Rub it on the cancer area. He'll make another one that add to Gans Water to drink. Some testimonials of product worked on cancer, very powerful. (3:42). Keshe tells how we use it, you can also add CO2 Gans water at the end of cooking process, Cooking doesn't change CO2. If you add Co2 after cooking now the matter inside the liquid becomes Gans, all components. In South America they coat the N coated coils with it, they don't apply it to the body. It can be put on the P Pens. It will be added to the Blueprints. This way you only use the MG fields of it. (3:45). Keshe asks him if he put himself on the KF victims list. (3:48). They are making up fake lists by Red Circle, financed by G1, in Israel. We will put a list of all the scientists he has killed. (3:51). Photos from Armand, the production of AA on top of CO2 Box, each one has different properties. The ones near the Cu turns slightly reddish tint it's for the red muscle tissue, on the Zn side they are more white and for your neural S. Each plate makes different kind of fats because they absorb different elements, N or C or O. The CO2 Box creates a very soft fat because ? Each Gans of AA possesses, different energies. They absorb specific fields, even though it is COHN they are not all the same. Each time we breath in and out we create different AA. (3:55). If the fields you made have a matching field it is absorbed. (3:57). One AA could be for lung and the other tip of toe, just because you collect AA doesn't mean its the same. These AA are all different, even in the the location of the box. To make pure Gans you need a box that drains from the bottom so you don't get mixing. The syringe will have a fat coating on it. (4:00). In MG field environment everything counts. (4:02) Pictures from Workshops in France. (4:06). (4:09). Obama signed the KF peace treaty but not for his nation, we salute you. (4:12). We don't accuse

and deliver solid info. Facts about MT Keshe, born in Iran, his father worked with X-Rays, so he was always around radiation. He watched them go to the Moon, and thought there must be another way to get there. He had a conservative life, at 16 he went to England and at 22 got admitted to Queen Mary College, only 13 people were trained to be Nuclear controller. He knew the education he received did not answer his questions, they knew he was beyond what they teach and told him he has to do it on his own after he finishes his degree. (4:16). He worked in one of the most secret sites in British Nuclear Industry, in a cowshed. He refused to sign a secrecy agreement and was asked to leave, because there should be no secrets in the knowledge. He stood for his ethos. The British Intelligence told him he would never work in nuclear unless he worked for British government. He went into business setting up offices in Africa, Asia and Europe without help from anybody, built a very wealthy business so he had time to do research. He receive a receipt from NASA saying they would consider his proposal for not using fuel. He questioned how come we don't understand the G. He built his own reactors, and in early 2000 he could see the G fields, it was so simple, why were we looking so far away from it. He went back to Nuclear Fuel and asked for a centrifuge and nuclear material as a N Physicist it was my right. In 2004 we met 4 or 5 people in a military museum, they said welcome home, we have been waiting for you for 20 years. It was so high level the Minister of Defense signed a secrecy agreement with him, that it could not be leaked to the Ministry that the G has been discovered. But he would not move his T into Military. (4:20). So MI5 had been watching him and saw his communications with NASA. ?? he turned illegal waste into usable wealth for the British Government. He refused to work with Military unless they could guarantee use of this T for peace. he was invited to Farmburrow to Military show in England. He tells how the British and Americans shared the info between themselves and trying to convince him to work with them. He threatened to go back to Iran. Then Caroline went to the Belgium's and they agreed to peaceful application of the T. They moved back to Belgium. For 7 months he was drilled by the University in Belgium about his discovery of Gravity. (4:31). The Belgium space Technology set up a company to develop the new Technology. (4:33). The Prince of Belgium was coming to the Company to see the technology, reactors, they were trying to prove to the Monarchy that they found the G system. They reactors cost 30,000 and Keshe saw a contract for 1.3 million he refused, he was sent to a lawyer (Mr. B) about the contract. It was a deception he refused the man wrote 4 names on a paper and gave to Caroline, he said if Keshe doesn't sign he will be killed by these companies. You tank in their petrol stations everyday. Mr. B was a key man in a lot of things, not a lawyer he was disbarred by Belgium Courts. He played a heavy game with KF. Keshe had some friends and started Keshe Technologies. They tested the Coke Bottle and said it was impossible, give us the T or we'll call you a terrorist. Keshe refused. The N coating is Grapheme and Graphite which we produce as a N coating. So they created a program to label Keshe into a terrorist producing radioactive material. (4:40). Next was they hired a patient company to write a patient, but it was too complicated for them, they kept the money. They suggested another man to write the patient, he came to their house and saw all the work on the table, this man turned out to be with Red Circle (RC). Keshe introduced RC to his 2 friends, but every time meting it went flat, couldn't understand. In 2008, he went to Iran. ... RC brought in people to help Keshe, but they turned out to be pedophiles and murders and stealers of intellectual rights. Their pattern to steal is every time a scientist

comes up with something they offer to write the patient. Everything fell apart and they put him under so much pressure, but he knew he would not give it to them. When the time came he knew he would share with the world. Iran invited him to Iran. They stopped his money to Caroine from Iran, so he had to come back to Belgim (4:46). His friend Derek (who worked for RC) came to meet him. Derek suggested he write his Books on the T, Caroline refused to let him in the house because she saw a lot of indecent actions with their son, pissing in garden in front of boy and showing private parts. Keshe went to Antwerp to sit in Cafe across from his house to write the Book. At that time Keshe had suspected Liver and pancreas Cancer, which started when he came back from Iran and was spending time with him, same pattern, he was poisoning him slowly with small doses and then a big dose to finish him off. He bought a single burger for Keshe, but because Keshe had the cancer he couldn't eat it, so Derek had to eat the poisoned hamburger. The next day Derek's hand went paralyzed he had a stroke from poison). (4:50). (John did the same pattern with poison in Italy). They blew his car up with his sister in it, a high speed chase with gun organized with the Police, and coming to kill him with 8 Police and beating up Caroline, and coming to confiscate the materials but then they left it in the lab. Then they got into car and drove to Italy, their friends welcomed them and 3 years in Italy they have gotten the T to the world. (4:52). (Derek) brought Allen Sterling to give an interview with Keshe for publicity. They followed him to Italy, a Belgium born in Congo poisoned him, wife and children, and one of the students touched the poison. Mr. RC came and tried to do the patent in China. Through the investigation on Sterling they found out more connections to RC, and the black guy who came to kill him. At the time the assassin came to Italy to kill Keshe they were in China to make a patent. (5:02). Red Circle works for Belgium government they get payment in cash and children. (5:05). (5:07). They take pictures of children and then kill the children. (5:09). A Dutch man developed a video compression program in 1990, July 1999, they poisoned the man the day before he signs a hundred million contract. They never allowed autopsy. His patent ended up in Belgium 2002. (5:12). the son of Belgium King introduced us to Red Circle, so they are all in it. (5:20) (5:32). The office of Prime Minister of Belgium. (5:39).

121st Knowledge Seekers Workshop - July 14, 2016
(Fabio's death not accident, Sent Messengers back for punishment, End of Rothschild etc, New reactors that give unlimited power,)

Starts with Memorial for Fabio. (:19). Keshe was last to see him get in the car, he was on the left side, but unknown to us he was found on the right side of car, after accident. (:21). His death was not an accident.

(:42). For infections damages or anything else on skin. Use the LP of CuO and CO2 will get rid of most infections on skin. ?? go 50:50 ratio, for deep cuts, CuO2 (5 ratio) {muscle repair} plus CO2 (3) {communication} plus ZnO (1) {E}, plus AA (1). (:44). It can be used for broken bones, the skin of bones breaks and lymph responds and brings Ca. You can add CaO to above mixture. For broken bones CO2, CuO2, CH3, AA, CaO2. By burning bone collecting ashes you get CaO2. (:46).

(:50). Today you learn about transportation S of UC, the way that those who came here (from off planet) did and how they got enamored with the woman and wealth and they changed their habit from being the man of U to criminals of the planet. We have sent them back and from now on you'll receive knowledge directly from the hand of Creator. The time of torture is over. To understand the work of U, look at the U, what do you see, open soup of fields, colors, etc. (:53). If anything happens they can put the pieces together from around the world, we were expecting collateral damage last Wednesday from the man in the house that is supposed to be white turned up very black, and the woman who signed my incarceration in Canada had a hand in it, unfortunately we will see no woman as president. The U has a central line and it will carry on in its work, the center of a Pl or electron and proton. The center core (of U) rotates in and feeds out, ?? the interaction of the 2 fields, depending on size, strength, etc. leads to creation of U Galaxy, etc. ... atomic structure and then matter state. (:57). Like Cotton Candy, this is exactly the work of the U, the speed of the rotation, the webs of the cotton candy machine spreads like a spider, it's nothing, everything but it has no entity, until you put a stick in the center, that becomes the center point of the interaction and the creation, then you roll it and pad it up. If you understand this you understand the creation of any entity in the U, where at one point the fields become strong enough to solidify, to become an entity, becomes the center, be it the U or Galaxy or whatever. In our S we call the wood you put in the center of Cotton Candy machine, the Principle Matter, because now it dictates, and it ?? . ?? You decide how big you want the candy to become, shape, etc. I had to go through the process of material man, to create the N material, Gans, Pl, LP, for now the LP is the sugar inside the cotton candy. (:59). Then I mixed everything (ZnO, CuO, etc), equal, then you start rotating it, but you could not fix it. Now we show you how. From N state to Gans to LP to F Pl, now we show you how to make the fields. It took man centuries to build a dome, you needed a scaffolding and then after took it away. I taught you how to make the scaffolding, now I teach you the dome, your SS. You have to build a structure you can support it, and once you build it you take it away, the structure is there without the material state. You built those ball and saw the emptiness inside the ball. You have the Gans and Waters, but you had problems how to get the center ball (FP) to rotate. Once it rotates then you don't need the rest. ?? It's you who decides what it is going to be, an entity independent of the U, you want energy, motion, matter or whatever. Now you have the energy of U in your hands. Energy not from what you see, but from what you feel and understand ?? the energy of. I had to play every trick in the book, to get you to understand it. (1:03). You have no more bosses so you have to decide as the last man standing. We gave you the Pen and Gans, you saw the effects, but now you don't need to contain it. To understand it is to reach the most advanced cultures in the UC. To be equal you have to understand from the top.
104 05

(1:10). Start of talk of how to make the System.

(1:24). Jonathan shows the new Reactor setup. (1:27). Keshe draws on photo. the line are where the Gans sits, you don't need vacuum, have as many bowls as you want, don't need to seal them, ?? you don't need cores as long as you create condition of hold, what you mix in that environment creates its own. the tube in center has to be hollow that the

FP can form, ? the size of the tube will give the strength and amount of the fields. (1:29). You put the coils around. {confusion }(1:34). Douglas shows drawing of core and coils around. From this you can take Megawatts and more. (1:36). Describes his cores. (1:38). It's exactly a MaGrav with a dynamic core in center. (1:40). Armand shows his coils with a center not N coated Cu coil. Then he shows rotation without any motors. He uses capacitors, and it creates its own dimension. You can creates megawatts of power, with this you put LP in side. the middle core being matter state dictates what you would like, Giga-watts. The source is a free conditioned Pl. You can produce this anywhere in the U. You can create anything with this. We tap into U energy without matter state. (1:44). You place a few of these above disaster zones and you feed people with them. They can make shielding barriers that no one can penetrate. We can disarm any man through psychological approach, bring him to the balance because that is what he needs. We protect with the T not destroy. You have every knowledge to make what you need. WE have made One Planet. It's you who decides how to go. (1:47). ?? .. by spinning the Caroline Core you create a FP in center, it still has N coated wires on it. The speed of rotation will compact the center core. (1:50). You travel by joining the line of (M) field forces, instantly. ? controlled by speed of rotation. If we place one of these in center of Washington there will be no more communication btn Pentagon and soldiers to commit more crimes. As much as we can create matter we can also transfer the souls (criminals) out of this planet that there is no rulers. The Chinese are ready to bring peace to planet. I have been told I have given too much knowledge to public that they don't know what to do with it. My answer is opposite. (1:53). I give enough to the public that those who are afraid their hands will be opened up ... You can create the MG field of an atom, Star, .. The soul shall speak. Start making these reactors, as long as you have the intention of peace you shall see no color. We said we will enter the political arena in July, we are here. In all the governments. (1:55).

(2:03). Through your E you want the fields to be that of gold, you put your hand in the water and it comes out gold. Now it's you your intention, your neural S confirms your existence and you can take whatever you want from it. It needs the truth and the balance btn the blood and neural intention through intention. You put your hand in there with the wish to feed the nation, and with the wish it will feed the nation. This is how you are going to create matter in space. "I want to build a structure where I can live on this planet". (2:05). It's an interim step, the Gans gives you confidence. Some of you will become master of it, and some not understanding will become slave to it. The process is easy. (2:07). John from Australia explains his experiment of soaking his seeds soaked in CO_2 and CH_3 in LP for 24 hours. At the first stage the only difference was the root structure of Pl much stronger. The ordinary shelf life is labeled 10 days (up to 15 days), in normal water. After 28 days no change, after 41 days they start to yellow and slight odor and the weight only reduced by 3 grams, after 47 days little more yellowing. he also found that the radish with normal water was on top of Pl radish and it lasted as long, he thinks that the fields transferred from stronger to weaker. (2:16). Implication is that keeping Gans water in refrigerator could extend shelf life of produce in our refrigerator. Keshe says this has far more implications then you think, but is in line with our expectation. You don't need to be in the fields to have the effects, this is transmutation of energy through the Gans. For the first time it can be seen. The fields do not need the

matter state, it receives the fields to be equal to the others. And this will apply to the man and UC from now on. We have brought the two next to each other according to the wish of the Creator, Man shall elevate to the understanding of the UC. The transition will be very hard and there will be those who want to stop the process for their own misconduct not to be shown. (2:18). You took the life of a young man and we take your kingship, the bell rang on the 12th. Please if you are true man of peace and you have been asking for equality and peace on this planet, I can't teach you any more until you reach the understanding of this U, and then we shall meet again to bring you into the UC of the "Unicos". That requires another education. It's for you to rapidly develop what I have taught you, to bring about change from warmongering to peaceful planet. ?? Those that show the 2 fingers, that I have always been successful in bringing the 2 fingers together. I always deliver where I appear and I know exactly how to deliver. Man has no choice, our wish is peace and we're going to the end to achieve it. (2:20). We expect an apology from those who planned Fabio's death, not in words. We expect the same for those planning revolutions, evolutions around this planet. To submit to the imprisonment of the souls you have hurt. Those who think they can escape by suicide we have access to your soul. Those who came here and got corrupted they have to go for ?? and that this will not repeat itself anywhere across the U. Taking a P life is as bad as taking the soul of a man. As you've seen with the radish, you job is to comfort those suffering in the world with the Gans Water. Maybe we have enough time to change before it's too late, but on the other hand you have messed up your planet too far too long, and those who came to help by transferring the knowledge and instead they got embedded in the societies which started the wrong doing and abusing. (2:23). We demote Moses as he didn't deliver what he was supposed to, there shall be no prophet called Moses, he committed nothing but murders and his followers still carry on the same, so there shall no Jews. With it goes the Christians and Moslems. Now the door has been opened to space. You have received the knowledge to be the creator of what you want as long as it is on equal terms and conditions and in benefit of totality. ... (2:25). The British have joined the kingship with religion, now it is finished. Now that we open the U you all are the ambassadors of this planet. (2:27). The biggest sorrow for me is that when the revolutions come people destroy their own national assets, burn the cities and take revenge, do not do that. It is you who loose. (2:28). The religions have become the shame because they became the abuse of the man. My job is done now it's your job to build the S and change, don't go for revenge but go fro elevation of their souls in that way their souls become part of the U soup, and non-existence. The demise of a soul comes when it can't find a place to call home and in spreading to find home it becomes lost in the soup of the U fields, annihilation in the essence of the fields of the U. (2:30). Questions. Which S should we build the ball with moving parts or not moving? The balls are irrelevant, what you want is to concentrate the FP fields. Get yourself a mixer and N coat it or use a N coated wire, you'll see very strange effects, teach yourself slowly. Bernie explains that when he used it on LP at certain speeds (2500 rpm) it bends 90 degrees to the side. Keshe says it's in Gans water so the field forces create a new condition. Exactly what you did with the coils when you turned them 90 degrees to each other. (2:34). It's the point of transformation of Pl speed, it's the only way I could teach you this. At this point you create space for it that it can interact on its own. ? you still have the butterfly inside (? mixer) but you keep on concentrating the fields inside. It still rotates but instead of twisting, (it's like the shifting

polarity of the planets), the field forces change position, and now (in center) you have a place to confine your field forces, and this is the energy field that you need. If you make another container around it, with holes even it doesn't need to be airtight, because you have given it a frame within the structure. What you can do, the 2 fields, the LP is still feeding it, (2:36). It doesn't matter how many holes you create in it, the fields will still create it (?) ... you have 2 fields. CO2, CuO2, CH3, in the container they are loaded on the same Pl field. you have the same field here with stirring it you add to each element, this is how in U neutron stars are made by the speed of rotation. This is why the earth looks smaller to sun but moves faster, like electron around proton creates its field absorption. (2:38).

(2:47). How can I find out why I am here, what is my purpose? The question isn't why am I here, it's to serve humanity, when you have matured enough you'll understand that. She has gone through the revolution in Iran, pain and suffering brings a lot of wisdom, the wealth of knowledge of understanding others. (2:49).

(3:00).
(3:08).
(3:18). Whenever one of you manages to achieve free rotation, create the structure of the soul, that's our purpose, we have created these Pens, Gans to reach the soul. Now this part is yours. When you reach the soul contact (soul@spaceshipinstitute.org). Ghana conference is announcing African conference October 2016. We don't accept "3rd World" anymore.

122st Knowledge Seekers Workshop - July 20, 2016
(Discusses the hand signs (mudras) used last week not Satanic, Off planet help to elites sent home, now teaches about soul, The two souls of prophets, How to elevate the soul with Gans of Iodine and isotopes of Cu and Zn, Neutron is basis of Periodic Table not Proton,)

(:11). There are millions of KF supporters we need to make a difference. He calls for all KF around the world to help in the Chinese disaster. In Chinese. (:21). Armand speaks to Armenians and new conflict. (:33). If you are a nation with conflict come to KF, we flood you with love and share the T. We are a Peace Movement. (:43). The second Armand speaks for peace. (:52). Now you see the need for the UC for unification. We are not here to bring a new kind of slavery. (:55). Maybe the Chinese disaster is for unifying KF for support. I have been told I have been teaching too fast. (:57). They accused him of being satanic because he used Mudras last week, now he explains. This is the universal language, the little finger is P, index finger is E, the 2 fingers touching palm is the soul, if you hold the palm facing your body means I am prepared to communicate with you with my P and E but my soul is mine (not with my soul). If you turn the palm facing out it means I am open and I can't lie. This is not satanic, it is the language taught by those from the space and those who understood it (on earth) wanted to elevate themselves to be more important, calling themselves Illuminati and Rothschild. In space our digestive S is not as complicated as man's our Soul, P, and E stay together. It's the same as the 3 layers

of the skin, the under which gives ??, the middle which is transmutation from one layer to another, and the outer which is the interaction btn the environment and what is inside. So it's the same process, you have the soul (thumb), E (index), P (little finger). When I closed all fingers and thumb it means I have withdrawn E, P, and soul, because you have done wrong, when you do this in space it means I am not prepared to negotiate, to give what I have is mine. Which meant the planet earth is ours, we want to keep it, to bring peace, which means you have to go home, which means take your P, E, and soul. (1:02). They know they have abused it, I show you how it works. (tape is broken). He draws a circle with squiggly line coming out, you have the source (Principle), the transition (present knowledge, you call it dark matter), and the matter state. No matter if you have Pl or human, you always have the same, the skin of man runs the same, the structure of stomach, man , planet earth the same. It has a center, transition (magma), and a solid surface, it the same pattern. But you have missed, it's a copy of a human being. (1:04). He draws a brain, ?? the missing part .. jaw extended itself, ... when you see the brain, the planet as we are now, this part of the brain (the lower missing part of circle) has opened up to be able to feed the rest and becomes the P body of man. If you gather the whole body and push it back up to itself, you'll get a full circle of the man. That's how simple it is. But when you have this full circle you create this Pl you still have the 3 sections. (1:06). You have the P, the transition from the Principle to the P, which you call E, then in the center sits the soul. So your soul is in the center of your brain. Man has been looking for thousands of years for his soul. The soul is the creator of P. ... ?? now you understand how your P was created by your soul. ?? the part that creates you and your life. Now you see there is no difference btn the Pl of a man, Gans fields, atom, nucleus or whatever. What we call an atom is one Pl controlling the other as one unit. The lower part of the brain that separated instead of becoming an electron, has become the P body, attached to each other and working together. Man has not understood the position and strength of his soul. Now you understand our shape, but when you go into another environment, according to the condition you might not need so much of the P, because your environment doesn't need it, the P part becomes very small. If you look at the top view of the brain, it's in 2 halves where in the center we have the E, the center of the E sits the soul. (1:09). I will show you how to see, detect the strength of the soul. I promise you in time I will let you see the soul of the Christ, maybe today, if you understand you shall see. From the top of brain to the sides are the arm and hands, tips of fingers by the ears. ... The index and middle finger are your E, the other 2 fingers are the P, on the boundary (by the ear), ?? this is the transmission of the E, and your soul shows itself by your thumb. In Space when you don't need your digestion S, most of your E to do with P, and P itself are not needed. In the Space most of the P entities you see have this combination (Thumb, Index and Little), because man is too E and attached to his P. That's what this (mudra) means, it's not satanic, they use it to say in a way we know the knowledge, and some pretended to know the knowledge. (1:12). Now you learn the first knowledge of the Space. Those who use this language and thought they are elite, are in fact peasants of the space, they abused it. Today you will know more then the people who go like this (hand sign), because it means something to you. When I stand in front of people I know who I am dealing with through the structure of the hands. They look at me in the P but I look at the state of their E. When the thumb is out it means I am a giver, I have nothing to hide. If the thumb goes a little in it means I have equal balance. ?? it

means I want to possess everything, the soul and P. I ask my patients to open their hands I am looking for the state of fingers how it is going. You look at the shape of hands and you understand how he stands. (1:14). It's like the sign language of dumb people. The people who use this are primitive cultures of the U, who have landed here and taught people more then they knew ... (1:17). What strength the soul exists. ?? you can elevate your soul, you can divide it but you can't take away from it. ... bandwidth problems he asks to record it in building .. We have the capability to understand more. (1:20). Last week we said the P of man dependent on CuO2 + CH3, CO2, AA. When you have some damage you make a Patch with CO2 (communicate), some CuO2, CH3 (energy) to increase, for division of what energy comes in body B12 (Cobalt). When it comes to E we always use ZnO2 ... ?? you don't need much radiation, B12 for energy, dividing mono-atomic fields. There is an element which is the MG field strength ?? with this element you can create the soul. If someone says I am a descendent of the Christ very easily you can see if his soul is of the same as Christ. We know his descendents moved to the south of France. In the southern French blood we can find the true blood of Christ. (1:25). Now find the matter strength which is near to the strength of soul, all you need is a touch of your own skin and you'll get an indication of the strength of your soul. You can see how true you are and how the P transfers the knowledge, and if you are a murderer it will show. Because your intention is to kill, but because you're a president hungry for power, but you show yourself as a man of peace. The common denominator fo human race is the AA, I can see the intention of your soul. (1:28). The origin of life on this planet started in the air, gaseous part, COHN together to create life, AA in interaction with Fe with the division of Cobalt (radiation on matter state), we receive Hemoglobin, which interacts with 2 metals Cu and Zn, we found P and E, in totality interaction with Ca and K, we found structure. There we found liquid and muscles, here solidity and bone structure and become an upright P entity. In space we take the Na and Ca away from the composition of the P, then we will find that even the brain of man will be in the Pl condition without a solid state because even your brain cell has Ca based that has given it, its volume, we showed this already, building a structure with just K etc. (1:31). He goes over the composition of the body. Why do we have iodine, its in the places where E shows itself in P matter, brain, prostate, and anything to do with the cycle of life we see iodine. Now you understand the skin is part of the brain, you need iodine in it because it carries the same condition. You have found in this strength point ? the strength of the soul. It needs its division (Te, I, Xe, and Cs) and other radiation, ? Co sits with Fe, I sits with Cs. If you can make a condition you can make a soul. You have a number of ways to create, you will hear the soul of yourself when you interact with it, you can hear yourself in the P matter when you touch your own soul. The way you bring people out of depression with Zn, (1:34). you use CO2 and CuO to bring a P improvement, you can feed your soul and balance it that it doesn't need to feed itself on P, or to create a P condition. At this state man becomes independent of P in any dimensions of the U. No reason for kings or wars. You can replicate and bring it about with Zn and Cu and become independent of P, and become part of the soul of the creation in the U. I will change the course of Humanity today. For the first time you can see your own soul. You can create a condition that you will understand the true nature of yourself, and this is what shall be seen in space. They see your E long before you hide it in P, because they have access to that transition line, the strength they produce to see through you. (1:36).

Most of the souls in the U goes a step further up if you follow the same chart you'll find the soul of the Galaxy, U, and of Universes. But in time you'll understand. You have seen the ratio, it did not need much to go from interaction of P to E, but you see the strength of the E in respect to the soul, but on this planet you can imagine what the man has not understood about the rest of the U. To find the soul of the U means understanding the transmutation of the elements. The Russians have managed to achieve what we did in Fukoshima. The knowledge we teach is not for a few but the whole U. You don't need to make the individual elements, you can create a condition to cover the Totality. You look at the number of protons, you should look at a different number, they have chosen the wrong thing. Look at the Mother. neutron division leads to creation of Proton and Electron, you should look in the structure at the number of neutrons. (1:39). This is where I could never understand the teachings of my professors, because they never understood. If in the atomic nuclear structure we say by the division of the neutron we have a proton and an electron how come we are taking the weakest and not the Mother (neutrons). In all these tables you should look at the number of neutrons and not in the number of protons which has already divided itself is a transition point. Take atomic structure of iodine, (127), take 53 from 127 .. If you look at the neutron then the world changes drastically. (1:41). ... elements .. Cs is used in nuclear industry, man has not understood mono-gravitational, or mono-magnetical they have called it radiation. A radiation to the Pl T, is mono stronger on the field strength of G side or M side, so even what you call a radiation is a Pl, Book #2. Radiation in a Pl condition means as much you give you are receiving, you are giving it in G or receiving it in M, it's a big difference in world of Pl. If you are giving in Cs, Gamma rays it means you are spacing the neutrons from each other, because now you are receiving, energy is more, the spacing is more. (1:43). The Nuclear Physicists haven't understood we have 2 types of radiation. M or G Gamma or a specific strength, ?? you say it's the state of Gamma rays or the state of E, pain or happiness. So now you have found the strength of the radiation of the E of man. If you understand this you can increase or take from the soul to change the P. you have found the secret to the world of the Creator. If you understood the Cobalt or Cs are M field strength giving or taking, if you compact it you create more division, because in coming together energies have to be released, you decide what becomes electron or proton. You dictate the condition of the creation of the M field in the world of creation. For the first time Man can create the field strength detection of the soul. (1:45). And then the way you improved your P condition with the Gans, the way you changed your E, which means they have received what was lacking in the E part of the brain. If you can use something in range of Iodine and understands the ratio of giving, you decide how much divides how fast, **with Cs you raise the level of the totality of the soul of the planet in one instance**. Because if you give each soul takes what it needs and the rest is available to the others. It doesn't take long to change the animal behavior of this planet to the behavior of the U. Now you can understand why in the last meeting I said we are done with the Rothschild and illuminati. Now you understand what they were taught initially and they abused it, and they created the conditions to create what they wanted. Now if you can produce the Gans of iodine and understand how I explained to you using MG fields, even of Cobalt of the higher strength order, where iodine ... tomorrow there shall be no Pope. He will put his own crown down, and he has said so, and they know the coming has come. (1:47). The heads of religions and governments why they have been trying to murder me, and with it

they murdered others in the past few weeks. The knowledge they got from the contacts (ET) which will be released, they didn't want to release. Now you have understanding of the strength of the E and soul. Do you need a SS to travel the U? This is the biggest fear for those who knew the knowledge will be shared in such a rapid way. You created the Gans of fruit, Cu and Zn, now go for iodine. Start producing it, you can get Cobalt much easier but it will take a longer time, but something in the spectrum of the field of interaction, somewhere change the AA to the skin of the Man, yourself, then if you do it the right way you shall see yourself within the structure and see if you like what your soul is and what you do in P, pickup the skin or put it in it of a president and then you see his soul. (1:49). My intention is peace, now you have the AA and the soul of the president. The puzzle is unraveling. If you are a murderer then he has the same strength as you and you vote for him. (1:51). Rick reads something about the Pope. ... the end is a matter of weeks and days. (1:54). Last week he received a very clear message from the world leaders, I understood it fully, it was coded. You are teaching a T that a lot of people don't understand. It is the time we all understand. (1:56). In Mexico someone produced a Gans of CuO2, but it sits in the middle of the container, when another man sits across and speaks the Gans moves to that side. ?? if you bring a 3rd person it moves in 3 ways. Now bring the Gans of the soul and put it in the container, which side the Gans moves to that side. This is one of the first tools of understanding. Rick reads. (2:00). Now you see the first tools of Plasma, where we are heading for. We enter into the level of E, no where to hide. Those of you in the higher levels will start to shape the destination you want to go and see how the P wants to shape itself. (2:02). Now man can chose his destination, if I want to be amongst these people. (2:04). I select my ties according to what I am going to teach. The way we use 3D glasses in the cinema so we make glasses to see the soul. If you are in the Rothschild family you have to pay for the totality of what you inherited, that's why they have to kiss the hand of the mortal Popes, they have connections and they abused it. You have photos of religious leaders kissing the hand of Rothschild because they carried the knowledge of the U, and whenever they needed it they threatened it. But now you all have the knowledge. Last week when I went like this (mudra) it means I took your soul and P and you go back. It's our right as leaders in the UC to send back, it means the power we carry is both P and E, the truth of the soul and we sent it back to where it comes from. We took it away from the Illuminati, Rothschild and Religious Leaders who abused it. (2:07). Now you understand why the world leaders used these hand signals, now you can do the same. Those that called us Satan, we are the savior of humanity in the hands of the devils or those who took the souls of man. I just opened the riddle. If you are in pain it means your P needs energy from the soul which it can't supply, the line of communication of E and P doesn't exist?? Something is wrong in my E I don't get fed from my soul. (2:09). Photos of the soul Pl glasses. (2:12). .. We call on the leaders to plan the Peace not with UN but with the UC. The UC met this morning. For peace we say, I am available take what you need, and peace be upon you. Start building, look at higher order of the neutron and not the proton. They diverted everything from the neutron to the proton so that the reality not be shown. All the wars end up in Rome. (2:16). Christ was not born out of the ground, in Jerusalem you have cousins and bloodline of Christ, as Palestinians you can still bring the true feature of Christ. I have to force you in this direction because the structure set in Vatican has created mayhem. The only way we can change it is by people seeing the fact. They called themselves Masons

and Knights of Malta, these criminals infiltrated the KF by name and then by structure, and that is why we pulled one out of the KF recently. They're trying to break into the new T structure to carry on with the past. (2:18**). I carry two souls, one of P and one of the Creator, when I speak as a man I live the life of a man, when I speak as the Creator and the Totality, the soul of the Creator speaks. That's why I carry the full knowledge even though I live in a P body**. Now you understand where I come from, when I teach you I do as the soul of the Creator, when I am a man I am a father, lover, man and everything else which goes with P life. Never make a mistake between the two. I carry so much knowledge to share with you as a father shares his wealth with his children. And man on this planet are part of the children of the Creator across the U. We gave you the same knowledge that the children of the family of the U are all equal. When you enter the UC you'll thank the father that you brought us equal. There shall be no jealously because I share the knowledge in such an equal way that none of the children can be more then the other. (2:22). ... we'll see new creatures. You don't become chameleon but the true representation of the structure of your soul. We'll see those among us who are not of the Hemoglobin of this planet, but we'll still love them, because they still have a soul. The Principle Matter is the soul of the matter. You decide how you want to play the game, you want the generator I build you one, to fly with strength of soul. The Totality is one and depending on the strength you add to where will be the point of your manifestation. (2:24). On the same Pl you carry the info of the Gans of the Cu, Zn, H and everything else. Now you can create the field strength of any position in the U within the structure of your soul and there you shall be. He told the Americans in the peace talks with Iran, we crossed your nation many times without your knowing, it means we have the knowledge that you don't have. We have seen the knowledge shared with 3 nations in a perfect way, Russia, Chinese and in Syria. I said to the Americans, do not make the Creator on a blacklist because if the Creator makes a blacklist there shall be no America. I have to be free to teach wherever to free humanity from slavery. He calls on Obama to take him off the blacklist. If we have to, we can make USA into a slave nation. I have been patient but know we have to stop those who create wars. (2:28). I show you a trick, can you see the Cu and the Zn. Klaus to show isotopes of Cu and Zn. Emotion to show itself in P has a strength of bandwidth, so your laughter, pain etc sits somewhere in the isotopes of Cu and Zn. Now you can detect E, if you want to make the planet happy this is the bandwidth of happy, this is where the isotopes come to play. Understand the structure of the bandwidth of the soul and then create a soul which is giving. Then create a soul which is a center to give, you'll soon reach the state of the creation of the U. (2:31). (Jefferson labs isotopes of elements). The isotopes of Cu and Zn. You make a happy drink for the soul. Find the soul and put it in an interaction with its condition, the strength btn the Zn and Cu which connects the P and E. Each E has a strength with today's knowledge you can produce it. Find the isotopes of Zn and Cu and you find the total bandwidth of human E, it's a huge bandwidth. There are hundreds and hundreds of isotopes. Cu starts from 52 to 68 ... example Cu 72, now look at Zn 72, this is E connected to P at a given strength, to your AA is the strength of happiness. Only Cu in 52 53 is part of your P the rest plays in your E which cell and where, (2:35). Don't look at the neutron but how they position themselves, then Cu 61 fits with everything Zn 61 will give you, sadness or happiness if you have to give to someone, someone in need I like to help, someone who grabs what I need, don't, so it's the E that creates. You have to look

on the P and E side. This will open your eyes to a lot. Zn 61 and Cu 61 it tells you on the top daughter isotopes, so in that bandwidth you have found the reality. (2:37). Cu 68 with interaction with the Zn .. each batch or strength is one level E of the man. It's like going to Supermarket and they give you the odor of strawberry and you all want strawberry, now I can give you the bandwidth of peace, create a machine that no soldier knows why he is fighting. Fighting is against the nature of Pl so no nation can go to war if you create the right fields of the E of satisfaction. Now you know where the soul is you can become the transition part which is the E and the P follows the order of the boss. If we would have tried to explain this 50 or 20 years ago no one would have understood, now you can see it P and a large number of people can replicate so the knowledge can't be lost. No one will use the message given to become Satan, we are scientist of the U and understand the Totality. (2:39). We have to look for those who committed the crime, with robes and leaders and with it they get protection from it. Now you understand why the life of Fabio was sacrificed for the freedom of humanity, those who thought they done the job you freed the man, that was the last crime you'll ever commit. We will bring you to the pole of justice through your soul. Those of you who are peaceful will prevail and are the givers and will elevate the others, the P will speak. 12 months ago I started this process with Sterling. These people were born to show the present behavior of man to learn and elevate the soul, these are all part of process of elevating man. Up to now we taught about P and the rest. (2:42). If you are intent on helping the man in the floods in China you can feed him from your intent from your home. A lot of you have a misunderstanding about praying and meditating .. if that soul is in the condition of wanting to receive, it shall receive. Members of the KF Core you understand what I taught you this morning, do what you are meant to, the same with the UC you are here to serve humanity through your soul, P help them. (2:44). We will see the change in a very short time, start building. ... you can make a combination that the effects of the isotopes one or the other. (2:46). Questions. The Cu found in earth, is it in contact with our E? Of course you are part of it. Your body came from this planet so you are made of it, this is my body, this is my soul, the soul came from the fields of this planet. Different cultures have different behaviors, it is in respect to the material of that part of the planet, different levels of isotopes in it so it creates that kind of E and behavior from that nation. When they change location they also change. (2:48). Why some nations are peaceful and others at war. Hitler killed 20 million in 5 years and we talk all about it, the Americans in the last 30 years have killed as many but we don't talk about it. The blood will run through Vatican for the ones who falsified and walked in the name of God, not the P blood, of the E, which means the soul has taken out of it, wasted energy. We have no choice but to clean up. (2:50). My job is very much like Mohammad, he saw how living in the Creator without a statues made people independent and he went back and destroyed all the statues, so people would believe in what he called God. I have to destroy the statues people built by abusing the E of the man in the name of the Mosques, Churches etc. People's education have gone higher to believe in the Creator Himself and not the angels of death. You have to destroy the false castles of worship that they have done. The man has to be the prophet to himself by correct conduct. Learn not to be a slave to the abuse of the knowledge but be a slave to peace and equality. (2:53). There is a huge amount of effort by the Vatican to eliminate us, put on a blacklist. Q: What do you mean no more Jews, will they all die? Anyone who murders or commits a crime is a Jew, doesn't matter what nationality or name, this means

the behavior of Moses, criminality, read the Torah. No one will call themselves that name because it is related to death, criminality. (2:57). (3:00). I stopped teaching the matter state but have just started with the soul teaching. Q: If their souls are divided among a thousand souls and they come back in a village to suffer and a good soul go to help them, does that good soul make a mistake? Understand what I said about the Cs and how much you want to give and how it effects the others. She was in prison at time of Khomeini. She sold everything to get a passport with daughter and escaped. {Keshe feels her pain } (3:06). Can you forgive the people who did this to you in Iran? I already forgave, I never want to hold anything on my shoulders when I leave this world. We all have Principle Mater within us but we don't access it, it's like a switch in the house, there are branches of it, if I access the Principle I can access the branches, like go to the moon .. Good Morning you have understood. (3:09).
(3:14).
(3:22). Was the soul produced by the brain? No our soul comes from the P interaction of the fields -28
(3:35). (3:38). Do the elite have helpers from outside the earth? I will explain in a language you understand. When the messengers of God come they always see a light, now you understand it's an interaction btn their soul and the soul of Creator, they don't need a language, they don't need to see a pain, they feel it in their soul and they give to it, then the pain elevates. The prophets are in a lower strength order compared to the Totality, it's like the sun and earth it releases light, looks like a fire, in that process they didn't speak a language they were guided by E to where their destiny was, then when it came to P they abused it because now they thought they would have a better world and at that point they lost it. The same kind of interaction has been taken with the UC and certain groups that could influence at a time, to change the life of the others for better, and these people stole, like Moses stole from the man. And because they had that extra knowledge, what you all now have, they abused it, these are the Rothschild's, the Vatican. At this time the UC, which is not apparent to ordinary man, are in continual contact with different governments trying to get man to see. But we can not interfere. Man can do it through the process I showed you. You can create because you are of the same AA as the man, you can create a condition to find balance what you call peace. We can not enforce it but we can show to you how the end product is and how it is done, like how I showed you to make CO2. (3:41). and how you can use CO2 for different effects. We have finished with them (elites). When you can see the light of the creator yourself then why do you need others to lie to you. The communication from the UC over thousands of years was not to create an elite, and now you will not even hear of them, it's not worth mixing their blood so we will dissolve it. (3:43).
(3:50). How to make Gans of Cs and Iodine? You do it the same way. How to elevate your soul, draws a spiral, Cu, gold, etc. H, Zn, .. Plutonium. Cu +Zn > you can reach Cs, look at the neutron, you don't always need to add, you can put G or M and same material becomes a giver and a taker. (3:53). You create a soul, or a P in another strength, you don't need to have the same. All you do is to ... that the totality gives you the strength of iodine, then you create a directional flow in or out of it that it behaves like a Cs or giver and taker, you link into the G field of higher order or lower order. Do not work on proton, but neutron, you have a sun it dictates, it doesn't matter how big the planets are, because its mass by order is bigger. In same way a neutron, Principle Matter divides into an

electron and proton, so in fact it's the neutron that is the controller of any nucleus not the proton. We looked at the wrong side, we looked at the children instead of the mother. (3:55). This is the fundamental mistake I had had with my professors. If it is 52 and 52 but another 8 extra pieces, it's the 8 which gives and divides, this has brought balance, the sun and earth and little moons (electrons). The Periodic Table should be changed and based on the neutron. False knowledge has lead to a lot of mistakes. Yes it was intentionally, because this way you can keep people aside. The Periodic Table is the most falsified, by those who want to keep the true science away from man. (3:57). How can you say the neutron does nothing, it's the most important part, because it is its division that leads to creation of proton. KF supporters have to change the Table. Explains Gamma and X-rays. (4:00). The Masons and Knights of Malta were there to build but they built the wrong house for themselves and not help humanity. You touch me and I take the soul of God from your blood, work with me I bring prosperity and peace to humanity. I take you all on, Rothschild, President, Vatican, Illuminati until we bring peace on this planet, my power belongs to humanity and not to me. Totally we can change the course, go and start write the correct papers. We can't deny all the science of the past but where there is wrong it needs correction. It's a fundamental truth in science. With diseases one level of the fields was used to create that E, you look at both M and G and you can walk in diseases covering the body, you elevate the E in respect to the soul, bring balance and within seconds you walk out free of disease. (4:02). You have already worked with the levels of the matter fields, now work with the soul fields, it is very easy. You have the Cu (59) and Zn (65), working with the fields, then just put Iodine (127), take into account the higher order proton needs a higher order neutron, that's it. Now you see how the soul controls P and E. Bernie, tell us the feeling you had in last 24 hours with what i asked you to make. You have a feeling as if you are out of breath, ?? I think it is in the E part. I give you some advice, when you had that feeling of choking, why not give to it that it gives you the nest, you becomes its G, isn't there the point that it needs you and it elevates you, but you are not prepared for the change? Then you'll find out you will have the SS and lift, because that will be the intention. Isn't that choking feeling a limitation that I don't want to give because the future can change because of me? (4:06). What about if you give to it, and then find out that you are in the center of what you want to be free. Bernie says he is in a neutral state. We won't go into details, it's a new S for flight, with it you need to receive huge amounts of G that it changes itself to M. He draws a small circle inside a larger one, you understand the brain and where the soul sits, draws a second set of circles, these are when the Free Plasma is formed in the center, now you need to give to that FP for it find its position and flight. You control through your E the condition and position of your craft. Now that you understand the position of your brain and soul, the condition of your true soul dictates the control of the craft. (4:08). The reason you feel the choke is that you are not ready for the craft because you are looking for something somewhere else. When you build a craft you have to feed it, because you are of the same, it ? encompasses you. Bernie says, he is just listening and not allowing it to connect. Exactly!! Now you see the control of the E over the P. The S is P but because it has created its own field it needs to take from the soul to literally confirm what P wants to see is a craft. That's why I said to Armand be careful it's not the center and you have a way to walk out otherwise we can't get to you. We are on the verge of releasing a SS, through very simple S. Now that i have taught you how the soul operates and can get to

it. Now it's your soul which is in control of the E and creation. (4:10). What is the radius of the field you tested? It's up to 24 meters, it's longer but we hit the wall. Keshe says the minimum diameter is 70 meters but you just hit the wall. It will build itself, you'll see the light. This is what I offered to the Chinese government to be used in the South China sea to create a field to cover whole parts of the ocean that no warships can fire. So there is no war. We have to get Philippines people into China to help with the disaster. We can give the T to both the Chinese and Americans that they disassemble each others army. (4:12). Fro the Americans listening, we are prepared to give the T with guarantees that not a single cent spent on arms. Otherwise we bring the army of the US to a halt. We have shown it 3 times. What happens to the animals and plants when mankind changes? You elevate the whole planet with your change, they elevate also. (4:14). Most of the plant life are already elevated to the peace, when we use the fields we don't need to harm them. Accidents happen. Q: should we use the Iodine in our S? You can use it, because then you have a S for the soul and not a power generator. You all stick to a very little knowledge just not to be embarrassed, you should go out and test everything to change humanity. You'll see all kinds of things, shadows, field forces. Once you create a dome that covers the human AA on the soul level, there are other entities which are below but we couldn't see, just below Iodine, now you'll start seeing them. (4:16). What are

(4:25). Advice to Jewish Lobby in background, join us to bring peace, you'll go farther to advance, otherwise you'll end up like the man who started it. Please move on to understand the divisions of the soul. We are bringing you the knowledge in very rapid way.

123rd SPECIAL PRESENTATION Knowledge Seekers Workshop - July 26, 2016

(:03). In the last 2 workshops we talked that as soon as we see a breakthrough then we will call a short workshop, it needs to be shared. We show the new MaGrav Generator in its raw state across the world so the governments can't block. Last year in July, 2015, we released the MaGrav power reduction Units. Some of you could not see huge result. Now what you need to do is disconnect the live wire to the Grid and Ground, and plug the S into the main Power supply. You don't need to feed it or add energy to it. (:07). These units are fixed to 3 to 4 kilowatts. With the new unit you add a second MaGrav that becomes the supplier and triggers the first unit. You plug the 2 units together and then plug into the Main of house. The 2 Units become the Power Generators. Those who made there own at home can buy the 2nd Unit to plug into their homemade Unit. In the coming time we will release this new Blueprint. (:10). First it goes to manufacturers and then to public. We have now released humanity from oil and gas. (:14). Video of new Units. He has got over 3 kilowatts connected and NO POWER only the MaGrav. We have reached a total power supply. (:20). The power unit is only extra the goal is a SS. A Blueprint will be released for everybody to build a SS. (:27). Remember I talked about building an arch, afterward you take the scaffolding away. You build your S in a container with Gans material, and Gans balls, and a MaGrav S inside ... after you get your SF working you empty the container. If you can create the Gans motion at the bottom of container you can show dynamism without action, motors or batteries. (:29). A video of creating motion

without motors. For man of science this is so important creating motion without motors, with Gans. Rotation of liquid starts with the only the double core Gans ball. It can rotate at very high rpm. If you fill the balls in the right way, then you all can build a SS. In health units you can reduce cancer in minutes. You control this with your mind. We don't need fuel to make rotation. This video is one of the greatest BREAKTHROUGH!! (:36). It will be controlled by thoughts. Dr. Batya explains how he did it, from the 121 workshop he filled the Gans, in bottom, and he felt it to start rotating. (:40). He shows his current work, inside bucket is all his Gans's and he has 4 cores within cores, double core balls. (:42). He is using the CO2 Gans on his grey hair and almost all of them turned black. In inner core (ping pong balls) he filled with LP of all Gans's and AA, and he scratched his skin and put some oil in it for control. Keshe says you do this so that you can control the S. In these cores, because you are of the human race you have to add these AA for control. In all containers put a mixture of AA in them. Then in the inner cores you want AA from the fat of your skin or blood if you have a Gans of it, then you have a control of the reactors from the center. DO NOT put your own AA in the outer core, because for the time being you do most of the control from the center. You dictate the speed of rotation and amount of the flow, this way you start to understand you control the shape of SS, the distance of the gap, the G and everything else. I will teach you a lot today. (:45). I put CO2 Gans in 2 outer cores, and CH3 in others. and mixture of all Gans's in the bottom of bucket and LP on top. Immediately as I put the balls in they start to arrange themselves in SF. I see it building forces up. -48
(:50). (:55). Douglas tells what he did, same as other man, water started to rotate. (:59). Composite Gans rotating at 10,000 rpm. He rotates it above the Gans balls and they start rotating. (1:02). The rotating Gans has such power to move matter state, liquid. This is how stars are created in the U. The bubbles Douglas saw in the ball are Pl bubbles and are all in motion and create their own field zones. When you see them they are free MG fields and are Pl, if you can gather them together by high speed rotation then your S changes. The bubbles lock the 4 reactors together and it's the beginning of a SF. At this point the SF is locked, you can't do anything about it, and can drain the water. It's just a matter of moving the 4th ball up and down until the vortex is created, created by field Pl, it will adjust with the earth's MG fields and create lift and motion. There is a slight NOTE you have to take, they put a drop of their blood or AA in center of each inner core. Remember the teaching on the soul being in the center of the brain. (1:06). When you achieve this point, because your AA had a say in its creation, you have full control through your E. By your thoughts you position yourself, think lift and you achieve lift. Renan discusses S with control over M and G. I work with Bernie on S control through the soul and E because he has this capability to interact. (1:10). He uses Lead Gans in center bottle (not rotation, because only working on control), only for controlling fields, 3 bottles around CO2, CH3, and CuO2 on top. He gets 3 meter radius of M fields. (1:18). He has achieved up to 34 meters, hit the wall. For G he reaches 13.6 meters. He measures it by performance of car engine, M makes engine run better and G makes it run worse.. (1:21). (1:24). (1:36). When we got the choking feeling, the other man got dizzy, but when we let it in, then the flow into the body was very strong into the neck and head. The flow was Anti-Clockwise. All the 3 points in the head connected, he managed to control it, (1:41). The dog got really excited and jumping around them, he thinks when the M switched it released a lot of energy. (1:43) Douglas says that his whole garden, yard is

attracting lots of wildlife, and they can get really close to the wild animals. Keshe says the environment of the Pl changes the environment of living. (1:46). We can try to add a 3rd core and use the same Gans as the center, the interaction of the middle core, it's a 3 layer core, a transition section, and a matter section, when they all start rotating you'll see a new dimension in the world of Pl. It works like the layer of the skin, you start creating materials. (1:47). Armand is developing one of these 3 core reactors. Inside core he put mixed Gans and his blood, middle core CH3, CO2, outside core mixed Gans without blood, the 4th core a little heavier and on a motor, he rotates, all 3 cores are rotating, and some little bubbles in the center. Yes at high speeds a bubble in middle, Good! No air gaps. You can see the empty hollow center. You should make one CH3 on its own. (1:54). Armand made a MaGrav with a different way of coiling, and in the middle he as a double core. (1:57). We show you the first lines of the development and it's up to you to take it further. (1:58). Dr. Klaus shows work on the glasses, tubes filled with ZnO2 and Iodine Gans for seeing the soul. A friend had pain and he tried to focus on him with the glasses and he reported an immediate change. (2:01). We will bring this workshop to a close, we have broken the power of energy control. The control of Multi-national corporations coming to end of slavery. The people across these world are sharing and developing the T. The KF manufacturing will make for sale SS Unit to fit to your car for about 20,000 Euros. Warning to governments people will start crossing borders and they need to resolve it. (2:04). In a few weeks time you will see people flying around. (2:08). A promise to Fabio's family, about the criminals by killing by intention. (2:11). Keshe focuses for the next 6 weeks on making a SS. Douglas's video of rotating balls. The machine rotates clockwise and the balls anti. (2:17). The Chinese said he is welcome to China without a visa if he can come with his SS. I will be there soon. (2:20). Professor Zhu speaks but lost. Ali asks if he show his bucket and MaGrav. (2:24). Lady asks if 2 people can mix the AA in the inner core? Yes, but when you do this you'll find out the one who is best for the craft will lead, and the ones who plan can never take control because they loose more then they receive. You can even put 10 people's AA, but the one who truly wants to serve will end up the leaders. (2:27). Paul from Togo, made silver Gans, share on Thursday.

124th Knowledge Seekers Workshop July 28, 2016

(:11). We know everything about the matter state but we know nothing about states of Pl, we need to learn how to work with both sides. Problems are developing with scientists who work in Plasma Matter state, they have to deny Pl of the space. (:18). Since we showed the new Pl generators there are huge shifts in governments in one way or the other. We are working on a compact S and wireless power S. (:22). We cannot operate unless we can teach and explain the T to the other scientists. (:27). Douglas shows the new MaGrav Power Generator, cover up the new S so no one sees it. It is running 4.4 kilowatts with motors running, these Units can go to 20 kilowatts. But we will sell them at 3 kilowatts. (:35). Shows the rotating Gans balls, talks about when the planets reach saturation and shifts the poles. (:38). The movement of the Gans ball like a pendulum, like a heartbeat back and forth, it's a polarity shifting. (:45). Renan shows Gans balls in

water, can't see the movements at moment but it was earlier. The top ball should not touch the liquid, when it does it links up and you don't see any changes. You need a distance gap. (:49). It produces both AC and DC output. (:52). Douglas shows again the Gans balls in rotation. We need to make application for this effect, redesigning motor and power supplies. The Institute on vacation until September 21st. (:58). Alek shows his rotation of LP in the bottle. Keshe says you can use this rotating liquid in the same way we use steam to rotate blades. You can use these to remove matter from the fields. (1:03). We don't start manufacturing, you do. Nobody has paid a single cent to the KF. We are here to support you to setup, we give the T freely. (1:10). We'll explain the sign language with the fingers. The brain, the E part in center, in the center of that is the seat of soul, the energy in the containment of the body is 17 times the Hiroshima bomb, look at arms and 3 finger, P, E and soul, in your fingers and arms you carry the same structure, you're back into the structure of the 3 dimensions within the 3 dimensions. The structure of the man is based on the Pl. The stronger soul part sits with your thumb, indes finger with E, little finger P. It's like your Stacker Unit, the inner core is brain and E, Soul, and the outer core the hands and arms, everything in our life is based on this, if we understand it and can use it, we will not be abused. Now you put your thumb towards yourself and feed yourself in the cycle of P. (1:14). The structure of humanity sits on the ? of the Pl. The SF within you. In the soul of man we deal with more powerful forces, that's the center core (4th core above). There is a report that the Chinese took down a UFO, if true what did they use to interact with it? Those who tried to murder me are infiltrating the Belgium groups, be careful. (1:18). Keshe has to go to meeting in Rome, Armand takes over. (1:21). Armand got the Chinese Balls from Internet, Search for clear plastic balls, (Ali Baba), look in hobby shops. He didn't N coat the center coil because he connects it to earth, it shouldn't N coat over time if connected to earth ? Q: You can do without capacitors if you get rotation in your coils. (not clear ...). By using different Gans on your coils, ?? make a permanent energy. (1:28). (1:31). With 2 triple plastic balls, fill one in an order and the other in the reverse order you get interaction and motion. (1:35). You have your Stacker at home and then you can put Gans balls around the house and play with the interaction. You don't need a lot of Gans, can use LP. (1:38). He switched from patches to coils for lady with lung cancer. You can use the balls, if you create an interaction with the balls you can make the change. You can put 2 or 3 balls inside each other, doesn't matter, depends on mixture of Gans. One drop of the AA in center core gives you control of craft. (1:42). Neutron, proton, electron, Principle Matter, transition, matter. (1:50). (2:06). It's alive. (2:18). (2:44). Caroline reads, that we don't have enough energy. (2:46). Things are speeding up very fast in last 3 weeks, go to the Universal Chat rooms for your questions. (2:50). Simple ways to rotate balls or ways to mix Gans without motor. (2:54). (3:03). Man shows a soup of Gans for Coils. The Gans start to form different mixtures and formations. (3:07). We see a definite pattern in the Gans. (3:12). Tow spirals one M and one G. He says he had forgotten that he had a figure 8 N coated wire at the bottom, thus the Gans is flowing in the direction of the fields. He took out the wire and the fields continued to stay. He used a few drops of lead, CH3, CO2, ??, Cu O2, Al. (3:23). (3:32). Australian System showing plastic Gans balls, if you N coat a core then you can put LP inside and then remove and the fields will remain in it. You can also rotate dry Gans. (3:44). You don't need much of the Gans mostly liquid. Be

aware of what you are creating and give to your reactor. Pray and have good intention for reactor and world peace.

125th Knowledge Seekers Workshop July 29 2016

(Douglas created light and core flew off, on the edge of flight, Explained the completion of the Unifying Fields Theory in terms of Plasma, Use of Alkaline and Acid)

(:04). New disclosure, someone has achieved light and lift. (:06). Goes over again how the fields of sun interact with fields of the earth and matter started on this planet. In the Pl T we produce Gans that complete the circle back to the Pl of Sun. We have missed something important in understanding. MG fields from one strength, they became the M field of the other strength, this is the natural process in the U, by using the Gans we created our own new Systems to return back to the energy which originally came from the sun, the Pens absorb pain etc. Keshe's paper on Unified Field Theory completes this circle, BUT it's not as one field but 2 M and G. In the last centuries we could not understand this, it means both M and G. We have to call it Unified Plasma rather then fields. (:09). In this structure we have understood the totality of creation of matter. If we understand and apply this we can come to major breakthroughs, separation of the matter state and the Pl. This is the biggest problem, our only concern was matter. The Unified Theory is now understood, it comes from one source and goes back to the same source. No matter where you start in the circle it still goes through the same process. Going forward be aware of which state we are talking about, the source, conversion to matter, or conversion to Pl state. (:11). Each one has its own work, but at the end one does not exist without the other because at the end it has to come to or go from. What was not understood was how you convert from one to another. Go back to understanding a Neutron splitting into an electron and proton. Principle, Transition, and Matter states, he draws 3 circles inside each other. Both the Proton and Electron have this structure. In physics they tell you the size proton 1:2000 electron ... what is the Principle of the Proton becomes the matter of the electron and what is Principle of electron becomes the matter of the proton. (:15). He asked the Innovation Center to build this structure with Gans balls, the inner of A goes to the outer of B and ivas versa (like infinity loop). This has been the SECRET of CREATION, which man has never understood, this is why you have an electron of a proton, why you have twin stars, why 2 parts of the brain and where in the center is the Transition of the fields, we call it in P life Emotion. The E decides which will move to where and how, one is more stronger on one side or weaker on the other, if you understand this you can convert any energy in the U to any matter state in the universal condition. When you go from one to another, at the points of interaction, both points, and in the totality of the fields you get a rapid conversion. In the human body we call it Enlightenment, understanding. In the P operation of the reactor you call it the light. (:18). A few years ago the UFO over Jerusalem at Christmas time, there was a flash of light and rapid exit of craft, this is what a competent captain can do using his E to control the physicality with it show its reaction. This is why I say we finish the science of man today. You decide where this orange zone (interaction of 2 Pl) is going to be. How

you communicate, with the other E, how you can elevate the principle of soul of man. We need to understand this, that we can go AHEAD! Understand how the little Principle can become a major part of the matter of the other. In this process you create motion. (:20). You saw this rotation in the liquids. The first step of man understanding his own condition. When you have a Gans of two different states interacting with a Gans of another state at the bottom, where the transition and field forces creates the rotation. In turbines we convert the interaction of fields to electricity, when you understand the Pl fields you can create megawatts of energy with Gans balls. You have to understand where to tap in and how much energy you need. Then when you make a double core with 2 different fillings of the same you'll create perpetual motion on both, by distancing them you dictate the flow of fields, strength of E, and the rest. This is where you have to complete the knowledge, we need no generators or nuclear fuel, only the fields. Then you will only be dealing with fields. (:23). You can have any entity in any dimension is the world of creation. We don't need to create, but rather to be in charge of the fields in the right order. In the center you can have anything you want in that matter fields or whatever, because even in the field you have both Principle, Transition and matter state. This is the point of the Creator where it exists in all dimensions. The rest of the creation in the U works in these fields (the other 2 Pl). If you can replicate fields in this manner you'll see everything we said and it has already been done. Vast amount of energy, any kind of food, material, motion etc. From now on you have to learn how to play, connect which one to what, what condition. Would you like it to be effected by the environmental field or your decision. (:25). You decide to create a given environment in a given zone that you want to be and manifest as you want. This is part of the control, as I said if you wish gold it will be in your hand, because you use the atmosphere of this planet which creates gold in respect to the condition of the sun and your thoughts become the transition line. The beginning product is the energy of your soul or the sun, and the end product the gold. This is why I called the teaching for today as I could not complete this yesterday. Armand made 3 cores, because center core for it operate needs to be in a floating condition, of its own strength. You can make it from Gans, but where will you find it in the space. (:27). You start at P (the outer core) and go toward the center with the accumulation of all the fields, then at that point the amount of energy ?? will reverse go outward and create the entity, flash of light. The prophets of past always said they have seen the fire and light. They got enlightened by bringing the P to the essence of their soul and by that received the light of the U. With that they absorbed most of the energy that they could understand to translate. And now all of you have the same capability. If you understand it you reach the stations of the prophets of the past and the messengers of U, if you don't understand you had better stop it as it shows your own short mindedness of the knowledge of U. If you go from the center out, now the center barrier moves to the outer boundary, ? the P becomes part of the center itself. This is the state of the soul of the man, and the operation of the stars, how Galaxies and U created. Fields in condition of environmental control, be it the womb of mother, be it the U atmosphere itself, (:29). the structure of Proton or Electron, once they have created the matter state condition barrier, they feed themselves back in, they create the total energy and then manifest themselves as an entity. -25

(:48). Keshe says what is interesting is the light and the way you saw the structure of the light. The center lit up and the core flew off.

(:54). You are on the verge of a flight. Now you need to control the rotation speed of Pl, you can create the craft, in 24 hours you should be able to show a structure. Glue your 3 platforms on the table, locking them, put the same one as before in the center of 3 and you should see a light. The 3 reactors will break the flow and you should see a gradual lift. You can expand the dimensions of this craft up to 200 meters. He explains how the core passed through the closed door. The energy transfer of the CH3 and Alkaline solution, created a M shield which can pass through anything, until it comes to balance, it's the fields which carry the matter through, this is the way you travel through dense fields in the U. You can create and control it. (:57). The core in the other room may be shield was created, what we call dark matter, transition strength in which the matter strength doesn't exist for it, so it can go through walls. You probably wouldn't have found it if the conversion hadn't been so rapid, or you'd have found it on the street a 100 meters away until it becomes the balance state. Because you didn't put any CH3 in the center core, it was totally alkaline and then the outside had a CH3, which is acidic, it wants to transfer its energy, you brought a balance of Alkaline to it and it transferred its energy. Exactly like the rotation of material, (Renan showed how the Pen changed the alkalinity of the water). now with a twist of the fields you can change the M to the G, you call it CH but in Pl T we call it M, in body we call it energy, the Cu is alkaline and it pulls especially on the condition of earth planet, of the O, because all the materials you had is CuO2, CO2, ZnO2, it means G is pulling, the O is a ? condition. (:59). If you use Pb or Iodine the field strength will be much stronger.
(1:11).
(1:17).
(1:24), Renan shows work with acid and base. (1:29). Up to now you have only seen LP. He worked with Gans in gel form, it has a lot of properties, if you add salt to it becomes G, if add sugar it becomes M, it's like when you add Gans to coils or wrap in paper for capacitors, the salt in the presence of O it attracts to itself, becomes G it receives more then it gives, and it becomes a generator. You can go further and dry the Gans. (1:31). which has different properties in space T. Dry Gans when mixed with water again has different properties then the liquid Gans. The same if you mix the gel with water again different properties. In this state there is no interaction of heat or pressure. ?? If you mix the gel or dry Gans with N material, totally different properties. This is the new teaching. Field strength plays a big role. (1:34). If you work with dry Gans properly you can enter the matter state. This is where the N atomic layers in the upper layers in conjunction of the moisture leads to creation of matter state N. How you absorb energy from the Gans on the earth, is the O interaction, you convert the Gans into a matter. This is why we get H when it rains or there is a moisture, that is why the lowest moisture on this planet is 15%. The moisture itself is part of the flow of the energy to add to the material in the environment, O is the converter connection and with it converts, in this atmosphere condition, Gans state of the matter in dry into the Gans state matter into the matter state itself and we feed it tangibility. This is why we eat the food convert the energy into its Gans and then we can hold the hand of a man as a matter state, you create muscles and tissues. (1:36). In the U you convert the Gans into the energies into the powers and enter matter.

(1:50). .... When you drink water that is 8.6 pH constantly the rate of the cancer goes very rapidly to 0, because the energy of conversion in your stomach is not that much conversion from acidic to alkaline, it's a normal transfer, not high level of energy, ? in this area you end up with matter state, ?? if you understood the gap in between (the Pl) now you know where to create your matter state, while it's going from one to the other, higher order materials are created when CH3 is giving, lower order material when ? ... knowledge of creation. (1:52). In coming days when you see more of SS which are part made by man and part by men of U, we send you equally shoulder to shoulder, we don't send you into the city on the back of a donkey. ??? .. it can not be stopped, the progress is rapid, in coming days we seeing flying .. in time we answer to those who came to be stealers of the souls. I know how to bring souls to speak and then we see what they have done. As we speak there is one going on the Internet on the lines of international condition. Those who tried with their thoughts to override the work of the KF. Question, I have AuO2 (gold oxide), wouldn't that provide quicker and better M fields? It depends, always learn one thing, it depends on what the M fields are going to be. You always give from the weakest to the strong in G ?? you release as M but it becomes G to the strength of the strongest. (1:55). The Earth starts with the strong field coming out but as its strength reduces it becomes the source of the field of the G. If you have gold and Zn, gold is stronger so it becomes G to it, but if you have the vice versa, Plutonium then the game changes, it depends where you are sitting on the atomic G mass, or the MaGrav of it which is the M part of it. You are supplying the M but you have to see where it is becoming G. What is G to one state below can be M to one state above, it's the way you set up your structure. Look, in the center we put very heavy materials, in the outside we put CH3, it receives huge amounts of fields because it's weaker, from the center, but in receiving it, it has not got the capability to hold on so it gives more to what is next to it (he draws the arrow going into the G of center). So it concentrates the field and then becomes part of the same structure. ?? if you put CO2 and Cu in center, the connection tells it where it's going to go. (1:57). Write down the mixtures you make then see why you are connecting. He draws the connections .. you build connections, in time the stronger is giving, but you have taken a field. In Pl T the strong always feeds the weak but it is the weak which is the food of the strong (he draws the arrow back to the strong, in a circle). It brings it to rise and what it doesn't need (is very weak) goes back into the strong. And that is how you build it up. So when Douglas says he sees the light, he has a CH3, ? Alkaline, look what is in it, a heavy amount of CO2, ZnO2, CuO2, but in the center he has already put all the O's, so he has created the line of contact, and the line of communication in line MG fields through the C, the line of transfer of energy that's where you see the light. If you hold the light long enough if you can freeze it, you'll have diamonds. because that line of communication is a C strength. (1:59). Confusion about M and G, no what is M of one becomes the G of the strong, it depends on your position from a MG Pl fields point and not as a matter state perspective. A lot of you listening today will come up with a different state of mind, thinking. Those who want to go ahead will go quickly from now on. Mix the Gans state, Dry, Gel, Liquid, Nano states and gases and you come up with new mixtures and strengths and storage. ?? Megawatts ... (2:02). It will be very hard for matter state professors to accept your knowledge of Pl. If you all don't become the professors of the space then you'll need professors in space and then they can abuse you. If you understand the totality then you can't be abused. One of the

conditions of the U Community is that none of the sciences will be given to the man for him to abuse himself. He has to be taught not to become the abuser of himself. (2:04). talk about glues and drying times. The best glues take days to setup solid, especially up in 10,000 rpm. (2:07). Q: What if I put my blood in all sorts of Gans for my experiments or only in the center (core)? Would you like to be scattered all over in different states or all together in one. The soul and P of man molds to the strength of the environment it has manifested itself in, that's why we keep everything in one position. We will come on everyday until we get correct. How to connect to my reactor, just by intention or is there more to it? You have to have the key to it which is your own soul or energy, and the rest is just a history. Because you decide how it looks, you don't need a Gans or volts, you cna go within the structure of the soul of yourself and create every matter. It is your soul who decides what's going to be a cell of your lung, or blood etc. You haven't understood, if your soul is creator of manifestation of your P ?? what's the size, what is bone ... it is done according to its wish because that is the only way you can exist ... ??? (2:10). Sandor is a priest, and they want to find a passage for their soul, he has done a test with a MaGrav. We have seen this problem when we give platform to people then they think they are God and out to destroy the KF with fire Pl to destroy the houses. We don't want to damage your soul by giving you the freedom of the run, but let him come on, he is a priest and let's see what God says. Zultan. (2:14). Shows the video of spirals in Gans with coils near box. It took some hours for this formation it leads to 2 of them. He is using a non-touching capacitor, it has a lot of advantages of concentrating the energy, but he should put the capacitor upright and not at an angle. (2:17). The end product is the state of the soul of the beautiful people, 1 entity with 2 souls. (2:20). The 2 spirals. the desk where it was sitting shows a voltage. Zultran explains there is a few drops of lead Gans, the container held Gans, he took out the figure 8 infinity loop and put it under the box. (2:23).
(2:30). If some of you made coils and cores and you put sugar on the outer core and salt on the inner core during the Gans coating, you'll see a more powerful system, and now you understand why. His wife asks question for Turkey group with homemade MaGrav, he has to show it so we can see it. Asks Governments not to fire on UFO's from the UC coming to make contact with humans. My mission is complete.

KESHE Workshops starting from 126

126th Knowledge Seekers Workshop August 2 2016
(Birthday of Mr. Keshe, the start of world government,)

Mr. Keshe's birthday today, special presentation. (:11). We started with 2 and now the family runs into the millions. In One Nation One planet there is no hierarchy. As One Nation we need to have One Government, today is the beginning of setting up of one government, decisions fro whole planet, representatives from every continent. There is no need for the present presidents and kings on the planet. (:17). We need to look after all the people equally. Money will have no value. The game has changed. (:21). I work 2 or

3 days a week for my government and they give me what I need through the T. We are here to serve. We get ready for excursion into space. That we don't need to pay, we serve to receive with the pleasure of giving, no expectation of taking or being given. This is the change, the beginning of a new way. We said in July we enter American politics, every nations politic. (:25). We have been negotiating with the largest army in world (China). The World peace treaty was sent to Chinese. We have set up the UC in the background. We are not looking for politicians, they are finished. We need those who understand the T and peace. I purposely went for the common man and not to show the T to scientists. (:29). We saw people like Mike Nasser, he came he learned and he lost his way and he abused it. He lost his way by serving one rather than humanity. It's you who have to serve the whole family, there is no division. All the knowledge has to be used for purpose of humanity, we share everything. I call on you to select people, not elect, to serve whole humanity. (:33). Douglas lost ball in other room, Peter in Austria lost 3 balls can't find them, and materials come out of the glass without hole, because the Pl held in the containers is above the condition they're contained in. They move until they find balance. We can do the same with the E of man, make it so high until it reaches the point of satisfaction and in that process become peaceful. I emphasizes gold because it is the curse of humanity. (:35). (:40). How to make gold. (:50). Talks about the work in Iran of the Shah who used the soldiers to educate the nation in 10 years. (:54). Professor Zhu betrayed the KF badly in China. We are not here to create a new Vatican. (1:01). We have 2 choices 1 setup One World Government or 2 annihilation of Man. The South American continent will separate so we need 6, this is a crystal state, this is the purpose of the one government council, we ask the government to hand over the power to them. I have not mislead you, we had to come down this path. We put the link on website for you to select yourself to be on the board of the leadership of this planet. (1:05). Once you are selected we give you the knowledge of the Messiah to give knowledge freely to every man. You just need a little knowledge of how to mix water. (1:07). This is the first chance humanity ever had to change the course and become peaceful since the first cell created on this planet. We have videos of who is inciting race riot in Paris, but from our strength we keep silent. I call on China and America to make one army and work for peace. (1:10). This P existence will be on for a few months until the change comes is the fastest way we could do, then every material to man will be free. It doesn't mean the end of new technologies, TV's, we will have so much of it, with 7 billion people you can never satisfy all of them, so production goes on. In the next weeks we release so much new technologies ... (1:14). Renan to show video of water like in the stomach. It's a double core reactor, the inner core is a composite Gans in a basic solution, the outer is also a basic solution but only CH3 Gans water. (1:18). The water and not the ball was found outside on the glass and no holes in ball. This is the process to make water. All the liquid passed through the ball. (1:20). The inner core is mostly Gans 70%, and 30% caustic solution to raise the pH to at least 14. At the start in inner ball sunk to bottom. (1:24). Keshe says when you add Gans to the core it's like putting sand into the spin ?? it's not just pure water, you need to disturb the water, because of its MG field with the center it becomes like a mixing machine. ... the S creates such a strong MG field that the matter state is irrelevant, this is important in deep space. (1:26). He draws on board, if the water is a MG strength of 100 and the ball 10, it's like nothing is in front of it. When traveling at high speeds in deep space, if the meteorites are 10 you make your craft 100

and they become transparent, you pass right through them. It's the same way the acidic solution in your stomach goes through the wall into the lymph, it's the same process. This has a lot of applications. If you find the strength of the E you can raise it high enough to satisfy all the E of the Man in one go, and you'll understand why the soldiers can't remember why they are carrying the gun. The tools of this knowledge is slowly becoming apparent. (1:28). If you make the inner core the MG of gold the water will come out as gold, but you have to put a huge amount of Gans water of gold in the center. In the CO2 box, Zn and N Cu plate, that field made C and that attracted other C from atmosphere, interaction with water you got CO2 Gans. ... (1:33). Douglas shows how he setup the Gans balls. He doing different combos, silver Gans, CH3 with AA, CO2 and AA and CuO2 water, 2nd core ... (1:37). (1:41). Douglas's MaGav is still working, energy on demand. (1:45). If you see yourself as a man or woman as a person giving unconditionally, to be the president of your continent and to work with the Council, we ask you to apply. There shall be no separate governments nor kings, only an army for serving. (1:48). We show you how to make soul detectors. Olga asks if the Principle of this planet is giving to the neighboring planet, within a balance, but is it then preparing to separate into planets? We don't know we will find out, if you make the right strength you can go to the center of planet and see what's going on. Second question, Douglas showed the inner core as basic and outer core acid, then you compared that to the stomach as acidic and lymph as basic, and if we can make the stomach basic we can created the same condition, does that mean our body is itself a SS and we can do away with all the gadgets? That's when you find the state of your soul and E, your soul becomes M; and E becomes G, and the left over is P. So how can I do that? You have to learn and find the position of your soul and its strength. You already graduated but you don't know what degree what got. (1:51). Let us start building the One Nation government, we test your soul. The number of today is 1 and it is the beginning of mankind.

127th Knowledge Seekers Workshop Aug 4 2016
(Naomi out of coma by Keshe, Universal Council members disclosed, work with pH in cores, Norwegian man's out of body space travel and cores)

(:10). Naomi is recovering from the coma and car accident. Flight was achieved. (:13). (:26).
(:29). Shows video of center column of fields. The dark core in the center at a certain point becomes completely transparent, and you see the full column. (:32). On a 3 core S at a certain speed the outer core empties of all its water without any hole. Even the top air gap isn't air but Pl. As the water goes out the Pl takes over and the center core is moved outside. We make a container for this outside field, it creates lift and motion. Al is used because of it lower strength when compared with outside. If you can tap the Al it will give you all the energy you need. ... (:36). Video of Gans in the ball spin without motors. In reality the center ball is much heavier and should sink, but it rotates in the center. Fields interacting are rotating, like how the planet rotates 24 hours. It's sitting on 2 round magnets and Cu plates filter out M fields, this is exactly the Universal rotation. It's a permanent rotation like the solar S. (:40). If you can create the conditions for faster rotation like the neutron stars. You can see this better in a tank to see how they interact

like elements. (:42). The platform lifted 4 inches off the table. (:47). He shows the new total Pl generator. (:51). Keshe shows the new wireless power, you build a receiver opposite to the transmitter, the Principle core to the matter layer. (:54). By putting Zn and Ca in the core it can interact with the man who is short on E. We can create the emotional satellites. (:56). If you replicate the MG field of most distant planet we can start traveling. Those of you who lost Gans balls. (:58). Peter from Austria lost his inner most Gans balls. We are going away from LP to the FPl. (1:05). Maybe we will give the new Power Generators in Rome meeting. (1:14). We have technologies that can interfere with everything on this planet, cars, power, etc. The Chinese government instructed the KF representative to block our work there, we have bypassed, and not allow it again. We create the conditions which we force the others to react. (1:19). Once the field forces are created we don't need the balls. (1:21). If you create more outer containers around the balls, N coat and specific MG strength you'll collect Na in one and Cu in the other, you start filtering different matters out. (1:26). In U 2 forces M and G, at any given place is the balance of the 2 forces. These balls also replicate how the U works. (1:32). One small problem using a fan motor, don't place the ball directly on the fan because the field locks in, use plastic or Cu to create a gap with the motor so the field flow will be mainly of the ball. (1:35). If you are using plastic cores and in the center you have CH3, CO2 etc, the plastic is made of C, H, O. They leak because at one point you have replicated the property of plastic, so to the eye of the fields the plastic doesn't exist, and the water goes out. (1:37). He made a cylinder with 3D printer but plastic ends up porous. When you use CH3 you bring balance to the barrier and it doesn't exist to the Pl. When the field strength becomes balanced the ball becomes transparent. (1:42). G always rotates Anticlockwise, M goes Clockwise. (1:59). Video showing this rotation, in the bottle is CO2 Gans, and in the ball only Gans. .... (2:23). Keshe describes the Universal Council, UC and Core Members, no government can threaten the Core Members (11) they are selected by soul, any threat against the Core members will be handled severely by us. Lisa is a CM. We are not a secret society, any CM please come forward, Rick and Ghee, Lisa and Jin Zhao, Sandor (Hungry), Armand (USA), Marco (Slovenia), Hungry, USA Red Bucket. Any threats against the CM we will handle severely and show. (2:32). Back to Chinese presentation. (2:43). (2:47). Video of balls and splashing out of water. (2:49). There was a silence and then the unit jumped up, he achieved silence and lift. (2:52). The 2 fixed cores can't move so they move in respect to earth's fields. (2:57). One way or another we will achieve peace through technology. I show you how to make meteorite, if you release fields within your brain according to thought and E, in respect to the T you can create shooting stars. You don't create matter but fields by understanding your E, I can do it at will. Elle says she witnessed it. (3:00). They had asked Keshe if they could see a shooting star and he said yes, it was blue green with a fluffy tail, at 2 AM in morning. Armand says he was showed twice. (3:03). The energy within the essence of your soul is so powerful you can decide the point of interaction and where you want to see it. If your wish is pure to see gold within this atmosphere it shall happen. The only man who could do this but he couldn't explain it was Christ, bless his name. To handle P is very difficult, but to change the soul to change P is so easy, if you understand and are pure enough. In space this is how you create things. If you put some (N) dust around your cores you should see some shooting stars. (3:06). (3:11). Peters core water had a pH of 12.1 and drinks it, tastes like pure water, and the other is pH 1.9 and he drinks it. Keshe said he

will explain in the future. (3:13). How to make Gans of salt, 1 teaspoon of salt and 3 ?? NaOH and boiling water over it, in morning looked like Gans, washed with CO2 water. It doesn't taste like salt but pH was 12 to 14. I can use this water to adjust pH in cores. He made sugar Gans with HCl acid, it turned black, and he washed it 10 times with CO2 water, takes a long time to settle down. Next time he will wash with CH3 water. (3:18). Keshe says CH3 is acidic, acid means giving energy (M), and alkaline means G or receiving it. If you add alkaline into the acidic CH3 and then in rotation you see the change in rotation of the fields, .. how the matter changes from G to M, when you put it in rotation the G fields which are mixed with the M, tries to link up with the G in the center and this builds up the energy which then comes out of that center and it allows the M fields to push itself out to expand, and this is why you see the liquid coming out (of the cores) and rotation. He draws on board, the inner core is Alkaline, and the next core is acidic, then you add a little bit of very high alkaline to that acidic core, which means adding a huge G, this G tries to go into the inner core which is G, when it becomes part of the G it gets too strong and it pushes out and produces acidic or M, when you increase the G you get a higher radiation on the M (thus it splashes out of core). This is what I say as a soul the more you give (from what you don't need) the more you receive (the more higher levels you get). When you add a CH3 it is giving so it radiates out, but when you add alkaline to the acidic it adds to the G in center. (3:21). It releases it fields at a higher order and radiates out. It's important to understand why you mix alkaline into acidic, it doesn't do any chemical reaction but it adds more mass to the center, pulls the G fields which is alkaline, what it receives it has to give at a higher order, it's so strong that it pushes the P matter which is weaker out of the ball, having the same MG field matter doesn't exist (at the boundary). How you make a star, you can wish within your hand. ??... (by building the fields in your hands) you can enter another body with your hands and take things out or put things in. This is a knowledge which belongs to the Creator, and we show it when we need. Those who have been enlightened and can use it the right way possess it. All this power within the soul of your body, you don't need to do this physically. You can transmute the fields in the E in the length of the field, and they shall hear. I demonstrated this yesterday in front of 20 people. We start showing the strength and power of the soul in interaction. Giovanni can explain how a body (Naomi) that was motionless for 20 days start shaking and moving legs. We have the power within the soul to understand, that's what we do, give so much from the soul to the P that it will radiate out. In the hospital someone said the minute you spoke she responded, there is no need for P. You can do the same. It's the same as Christ resurrecting from the dead, (3:25). because we don't interact with the P, I wasn't in the room but standing outside. The way we create light in the sky we can give and take life from the man, but taking it not to kill, but placing it where it can be no danger. We have done it before with the presidents and kings. When the King of Belgium came to me in the restaurant and threatened me to give him the knowledge or leave the country, I said when I leave the country in a short time you will abdicate and not be king, a few months after I left he abdicated. Now you understand our power and what we can deliver and that's why we introduce the UC, the 6 member council, they are not governments because they are not there to govern, but to guide as councilors. There will be no governments. (3:29). Norwegians show. The core has CH3, CO2, the inner core has 40 different food Gans. He uses the Sour sop LP brought in by Togo for cancer, and he sprays on health coils. Keshe says in South America a similar decoction has been

put together and is effective on AIDS within 30 days. Using vegetable based Gans is very effective for diseases in body. (3:35). By using Zn and Cu in both cores you have a link btn inner and outer cores. They feel a very strong energy, like in a vortex, Keshe says that's because you put the lead in there, give to it and see what it takes. (3:38). If you have a cancer this is how you take it out of the body. You have shown us a new step. If you put AA in inner core, with 4 or 6 of these cores on either side of patient, cancer gone. They had a 70 year old cancer lady and she is getting better. (3:42). You need at least 4 of this cores, 6 is best. I will help you set it up. The ZnO and CuO for E and P, you elevate the soul and E, and cancer tumor gone in minutes. You need to elevate the E and cancer goes. You have to elevate the E through high concentration of Zn, most cancers are psychosomatic, unless created by evolution, that's how we build organs because we have a different E, like appendix, we needed it but then not, it's not a cancer but an organ. The development of the pancreas most likely killed a lot of us in the process of evolution. You have to have a small amount of AA, so it connects to body of man. (3:45). When you make a Unit for Health you always have to add AA from all the elements you are using in cores, when you make the Gans take the AA on top, you might not even see it, you can take a lollypop stick and collect the AA from each Gans, as you make it, on the same stick, then use that stick to put in the inner core. hen you connect all the minerals which are in the Gans state, with the minerals in the body, then the (healing) process will be very fast, not just from the vegetable Gans but ALL Gans's. If you have a breast cancer you have to work with Ca, because 99% of them are Ca based. You have to have the Gans of Ca in the center otherwise you don't see the seed moving and they say it doesn't work. Or choose food Gans which are high Ca based, that's even better then using Ca (mineral). The best source for medical application is to use the Bone Ca. If you are treating brain tumor use the Ca in the brain of an animal, sheep or cow, because the Ca in the structure of the brain are exactly the same for all the creatures on this planet. Make a Gans of it, within seconds tumor gone. (3:48). The core reactors have to be different (sizes) on the front and back of body, you need a gradient flow of fields. you can't use the same on both sides. In link connections with N wires from the front to the back coils, you can't do with the cores. So it goes by the core mass, if you use 2 cm core on the left side use 1.5 or 1 cm on the right. This is how you create gradient for the motion, you use the mass field strength. Please do NOT USE Lead Gans in any of your health Units. Lead is very heavy G and that's why it causes problems in body, do not use Al, and make sure there is no Mercury in the vegetables. Study the materials you make Gans from so they don't have hazardous materials in them. (3:50). Talks about how he made his MaGrav ... (4:01). Keshe explains why they felt so intense energies;. You used Zno2 and Lead, because of the lead connection into the matter state, your P state separates from your E and soul. That's why Lead is lethal to the body. You hold the body within the structure as it is, but with the rotation of especially the Zn and other minerals, you elevate the soul which becomes detached from the body, then you live on the level of the E and soul, that's why you had such an experience (traveling into space). If you can give into (the feeling), you'll find the P body floating, you can P see it. (4:03). But the fear of the loss holds you attached to the p on this planet. I do this quite frequently, you can travel the speed of this .. what we say Father Christmas travels the same time throughout the world, you become the Father Christmas in the soul of the man. It allows you to have unconditional detachment, then you see through the eye of the E and soul, not P. The

reason you saw the lights (stars) coming closer is because you elevated your E to the level of the soul, you move in a higher speed in direction of the higher, which is more central to the center of U direction. As you go further out you see less, but as you go further in you see more powerful ?? but closeness. The experience you explained is very correct. What I said you don't' need a SS to travel, you can create the condition that you travel through the ?? scent of the soul and E. You made a S which can hold on to the P, where due to the spread of the fields from the center core with what you put in it, you elevate the soul ?? , like the way the water came out of the cores, you E went beyond the containment of the P of body. (4:05). I had the MRI of Naomi, I showed to Giovanni this is the seat, the soul of Naomi, if you can reach it you can bring her out of it. You can see the seat of the soul in the P brain of Man. Like with your S you put the heavy attachment to the matter state, then you hold on to the P into the prison of P of this planet, and now through the Zn you have elevated the E of soul. You call it out of body experience. He says he was just an observer of the experience. You are like a pioneer opening the space, you don't need a SS. You can (or can't ??) stay P, with confidence you can present yourself in another position in the U at the level strength of your soul and E, so you can have 1 soul presenting in 2 dimensions of the U. If you understand and elevate you don't need a SS. (4:08). There is no way you can brainwash a man, only you can elevate his soul to work ?? on level of soul. Then it's you who decides I want to leave this P behind, or you can hold on to the soul and move the P, you are 1 second here and 1 second there, you use the soul as a transportation method. If you make the right combination in your cores you can fly the structure of the body ?? This knowledge can't be shelved, because it even touches and changes those who would abuse it. I put a lot of pressure on you to work with the doctors so you don't stand any misconduct that way your soul stays free. (4:12). When the S goes empty (the water flies out), do not stop it, let it run. Speed up to 7 to 10,000 rpm.

(4:16). Attach a loop of N Cu wire thin around the inner core, you'll find a much stronger field, performance. Let it run for awhile to get the fields up. put a radio of FM and AM next to it, leave the radios on until they go silent, it shows the boundary of the field. (4:20). fixes machine. (4:25). The changes happen btn 7 to 10,000 rpm, the fields can't catch up and interact. (4:31). They had to stop and bodies and organs vibrating. Always ask people if they have matter in body, valves, pacemakers, etc. (4:34). Change the lead to Gans of Iodine.

128th Knowledge Seekers Workshop Aug 11 2016
(:07). We have reached the pinnacle of Matter teachings and have moved into Pl field. Some of you reach the point of change but then nothing happens, there is a huge gap in the understanding. (:09). A lot of you make the coils and make the cores, but none of you go through the phase of understanding how things connect. We can bring in the final push. Everything has to be of the same level and structure. You connect a motor to an electrical power supply to rotate core. (:12). You create a field flow through the windings of the motor, and to a ground, at the same time you are receiving electron vibration and not Pl. Your system up to now has always had a massive leakage in the flow, you have connected yourself to a ground. Douglas has had more success because he uses a hand held motor without ground, his body is in a Gans state. We are looking for self contained

Pl state. (:15). KF is offering Pl generators. We have made a video, a last supper to finish the work. This will change the energy production worldwide, we asked the governments to be present in line. It has been sent to world leaders. (:19). 5 kilowatts stand alone Pl generator. (:26). (:35). Douglas's connection cut ... There is NOTHING under the yellow box!! It's only the regular MaGrav once you open the Pl. (:39). We have offered it to Chinese, American and Russians for World Peace. China and Russia have spoken and are in agreement. The Oil Prices will plummet. There are 4 units worldwide, if anything happens to me they will release immediately. The secret is that the energy produced is in a Pl condition. (:42). The yellow box is empty. Energy comes from nowhere, kilowatts. (:44). Under the yellow box was the trigger of the Pl, now we don't need it. We needed a 6 volt battery to trigger the Pl. (:46). The Americans wanted Yale University to see it. There is no need for power stations, no motors, moving parts, nor magnets. The trigger point of the Pl has been found by the innovation team and released. It's a gift from the KF to the world. (:50). We are prepared to make a deal, give the blueprint to the Whitheouse and let them release it. This MaGrav is static, you can imagine once you move into the dynamic cores what kind of powers released. It was a dynamic system that paralyses the most advanced American Naval vessel. The officers that resigned had felt the power of the Pl, they literally walked out of the Navy. The elevation of the soul of the man through the Pl showed the officers there is no need for war. This can be practiced throughout the war. We can release a dynamic system for the world. Two or three of these systems in parallel or series you can run a car, fly. (:55). In the microwave if you warm the water, you can pick up the energy for food, same with the refrigerator. Explains about the food in the microwave, the system will feed the cup and drink the water. Once you have set up the Pl and if you melt the Cu or break the N coat the fields will continue to follow the path you have set up. We ask you to bombard the Whitheouse with requests for peace. (:59). he asks Douglas to start a path to the Whitheouse and everybody can join him, we pressurize the governments to peace. You can condense water from the system, you can add energy to the water. We appointed 6 people to the KF core. (1:01). We organize Douglas to go to the Whitheouse on Sunday. We have no choice but to pressurize for change. (1:04). Douglas says that anybody knows that an 18 gauge wire will melt under 5 kilowatts and this one is still good, it is N coated inside but on the ends is still bare wire. Douglas tells his story. (1:10). Keshe has developed this T with common people. We give you the blueprint in coming weeks to change your MaGrav Unit into a generator. You can set your MaGrav in LP or Gans water and you'll see different results. I have no voice unless you express yourself, it's your job to pressure for it. (1:14). Open the lines for people to express what change they want there governments to do. Rick expresses his wish for his government to accept T. Ali, Jackie in French, Kenya, Vivek Singapore, Klaus Austria, (1:30). Professor Zhu and Chinese government. (1:34). Lucy from China. (1:38). Paul from Togo. (1:43). Vietnam, Germany, Switzerland. (1:50). Professor Zhu speaks. There is a summit in September. Russia and China have already negotiated agreement for KF T. There will be E crash in Oil Industry, but we need your support to pass through this. We want to build one in the palace and the other people to follow. (2:00). (2:08). Turkish man speak. (2:12). Now we are bringing the governments into play. Our goal is to show flight in September. (2:15). Douglas will leave for the Whitheouse on Saturday if anyone wants peace can join him. It is not for them to accept, WE DELIVER! The fossil layer only goes down to 18,000 feet, this scheme was set in

1892 to make people believe fossil fuel was limited source. The oil layer is 20,000 feet, but nobody asks these questions. Ali comes on and says everything in past is forgiven and forgotten. (2:21). Keshe calls on all supporters like at Vatican to go to Washington on Sunday. It was a year ago today he met the Saudi Prince and said he told them to stop loading tankers. (2:24). There is a huge plan by governments to assassinate Keshe in the next 3 weeks, we know who is paying for this, (Belgium) we are not afraid, we even know the Company who was paid and the people they hired. There is no time, the change has to be very rapid. (2:27). If we do not do this our children will continue the slavery. (2:29). We will introduce many systems in next few weeks, one is by flying over the countries we'll eradicate cancer. In due course I will talk about election in US. (2:31). Stop the wars and we will deliver T worldwide. If you have a MaGrav you only need to add a few pieces and it will work. (2:37). The top coil reads 101 F (north pole) and bottom 81 (south), the capacitors read 83. This shows the work of a dynamic Pl the North pole is slightly hotter then the south. (2:39). It will be important for Obama to manage the transition. (2:41). Renan says the Blueprint can be released right now. You can put a glass of water on top of MaGrav and you'll receive all the nourishment, your system becomes your feeder. To eliminate cancer you have the MaGrav at one point and on the other side of you put the auxiliary MaGrav and there shall be no cancer. In the snow they can walk in and there will be no cold. (2:44). (2:50). Peter made gold in Austria. (2:54). He has 2 reactors rotating at 10,000 rpm, (2:56). the ball flew away on the video. then he rubbed paper on the plastic, looks like gold microscopically, one was highly Acidic and other high Alkaline. (2:58). Goes over the method slowly, each cores are double, one acidic with sugar Gans, the inner core gold and salt Gans, and outer core sugar Gans water and CH3, it starts microscopically and then the Gans attracts mass. You have to create enough friction and then it builds. Write down a blueprint for this. (3:07). When the gold came out of the air, we proved a lot of things in Astrophysics on how materials are created. With a high speed camera we could see at what point these materials are created, a huge advance. Doesn't matter if it is gold, that shows your intention, what is important it shows the friction of 6 different fields has lead to matter at that state. In space we have to understand how the matter is created if we supersaturate these matters and they go back to become fields, that you don't get friction, ?? meteorites coming to the earth, shooting stars. (3:10). You have to adjust your mixture (of Gans water) until you get what you want. Look for any kind of lights. Try to make minerals and metals etc. (3:14). I give you a tip, hang a ball of Gans lighter then Al between the 2 reactors, see if you can get new materials in the ball or other materials around the ball. As you create more fields with hanging the Gans balls, you will start seeing entities of the U passing through, seeing lights. These are the cornerstones of Pl transportation. For us to transport our Gans state from one place to another. There are 2 or 3 nations working on this, within the next 6 months. We achieved the Plasma with Douglas and that opens everything up. (3:18). (3:31). Douglas puts the 2 reactors on the floor with the Pl plugged in. (3:45). The blue core is not stable it releases the energy. Release the path that you will travel to Washington DC. (3:47). Keshe reads a paper from US Ambassador, 6th November 2012 at 3:40, we would like to accept the USB stick, setup a meeting on 15th November. Mentions his letter to NASA. The decision about KF is being made in Washington that is why I am sending you there. I read you a number of these letters. September 27 2012 from NASA to meet, ask for governmental rate at hotel. Second letter from NASA, they

are involved space exploration, says not involved in Military. The letter was signed and notarized that Keshe had security clearance. (3:54). 2013 letter from Barack Obama, he doesn't read the letter completely, only to show that the world leaders know about KF and that we are men of peace, but they do not know about how to deliver world peace. (3:56). They don't know how to deliver it to their people, it is us who have to give them the confidence to go ahead. (4:01).

129th Knowledge Seekers Workshop Aug 12 2016
(:07). Special presentation of Douglas's trip to Washington to present the new Power Generator to Whitheouse. There were some people in the KF in China who were trying to delay. The Whitheouse said they wanted Yale University to check it, this was also a delay tactic. (:10). We gave the governments a chance, they are using delay tactics so like with the USB Stick we release the T worldwide. (:23). In coming days I teach you how to make water. (:32). Douglas goes over the route to Whitheouse. (:40).

130th Knowledge Seekers Workshop Aug 13 2016 at 10-00 am CEST
Douglas's trip to Washington. If you put 20 to 30 of these MaGrav across the state you don't need any power stations. With the right thickness these Units can lift very heavy loads, but it is not the thickness but the surface areas of Gans Nano material which counts. In coming time I will show you how to empty the Cu out of the wires and then you'll have hollow N tubes, which will carry thousands of Megawatts. At the moment you are restricted by the thin layer which is on top of the Cu, when you remove the Cu your tube is a superconductor tube, zero time communication, transportation, unlimited amount of energy at any point. This is a change of everything we wanted to know. (:02). He draws the tube, if you make a tube the size of a man, both sides N and Gans coated, empty out the Cu, and you have the 2 fields inside. A man with disease go in and comes out without disease, because the tube will surround the man directly in the balance condition. You can achieve everything with this tube, motion, lift, shielding, can paralysis the whole American Navy in less then 10 dollars, the same goes for every nation. (:06). Peter created 2 fields, but if you put the water btn you can collect the gold in the water as much as you like, the fields of water decide. But in space you don't have water, so you create a cage of the fields you need, like the hollow tube I just showed you. We setup a new structure for the world, we'll see if the Whitheouse will receive it, or we will release worldwide. (:08). Targeting the only the C on the (silicon) Chips will destroy only the chip, military finished. The Unit you just saw produces Pl and not electron energy. (:10). You have the turn the current MaGrav into a generator, we'll do a blueprint, it's a small conversion, a connection on the Grid side, because now the Grid side is not needed, we'll explain it. Rick says maybe we could made a plug in module to plug into the load side. Yes, actually you need a 2 sided plug. Those who made the homemade MaGrav. (:12). Questions. The MaGrav uses 2 sets of Capacitors, 1 parallel and 1 across the Grid. In the new design you have only one, but the KF MaGrav has 8 capacitors. The new one is already obsolete. We'll explain it fully. There was a piece missing. Let us do our work. The Security Services are constantly monitoring, they used what we released last year against us, so we are being a little careful about releasing. This time we deliver,

checkmate. (:15). Sandor is to release 1 TB of files on how they kill scientists and steal their patents, child trafficking, and stop new T, and then attacks on Keshe. (:25). (:33). The patent writer was part of the front. The panama files was the key, the money was there. They already submitted their own copy MaGrav so when they kill me they will go for it. (:40). If we don't get it to the Whitheouse then they will try to take over the patent. Rick calls for a break. (:43). He is running 1 to 2 hours behind. Douglas will arrive at the next stop in 3 hours.

130th Knowledge Seekers Workshop Aug 13 2016 at 10-00 am CEST part 1A (10hrs)
(, Lot of discussion about making pure CO2 Gans,)

(:08). We deliver to the Whitheouse the first free energy system to start a new change. (:12). It taps into U energy, the Gans, Nano and matter state all work together, it's a harmonization of 3 different field forces, to absorb the U energy. A lot of you think it is the Gans or N, but in fact these 3 layers are a portal btn the U Energy and the matter state energy which we have built our S around, be it the cooker, refrigerator or hair dryer. A lot of you did not see this nor understand it, but we have opened a portal to the U Energy. The 3 System layering we built the Superconductors, Gans's, matter, this is a transmission line btn 2 matters, btn 2 states of energy. The Gans and N layer are the intermediary, if you stand on the side of U Energy which is the Gans side, you have access, you are absorbing energy from the U, and if you stand on the Cu or matter side, you are releasing ?? take you to the weaker matter on the other side of wall, ?? it's 3 layers on either side, and the N material coating creates that transition point, it's the intermediary, the portal for the conversion of the U Energy into the Matter state. (:14). Now for maybe the first time we have understood what we have created. We have managed to create a transformer, transforming the energy of U to the need of man, be it as it is Ac or DC, 110 or 220 volts, it's not a magic. You have the top layer of the Man, middle layer of the skin, and then inner skin, it's the same process. We have simply replicated the work of the U. It does the same thing in your stomach for the transfer of the energy of the food to your Lymph. The same with Lung, 2 layers on one side and another on the other side, you create a transformer. Making these MaGrav S is like making different organs of the body. 15 31

(:33). We change the self appointed families who think they have the right to rape, kill and do whatever they like. There shall be no King nor President, we are all controlling our own destiny. I don't think there was any other way then this, we had to educate everyone at the same time. We saw in Austria peter creating materials, the easiest way is to make a coil that it freezes the water and you have as much clean water as you need. I explain and you do. (:36). You stand in middle of S and you wish what you want. I have to tell you one thing, my wish is my command, and I have carried out my wish. (:40). Douglas will go to Washington. It's time to put the peace on the table, in 3 days time I will release the defense T to 3 nations, which means I allow the governments to paralyze each others Military Forces. Then in minutes I increase to 5 nations, which means we stop any progress in military. China, Russia, Iran, then Japan and last USA, we have to

bring a condition that they realize they can fight. Then Ghana, India and Brazil. To bring a balance. Bring peace through change of thoughts of Militaries. This stops immediately what is planned in the South China seas because all the American naval forces will be paralyzed within hours. Then we'll decide if to share with America, or with Italy. (:44). We crash the whole system and then teach you to get your basic needs. We ask you to stay correct in conduct. We share with China to stop the planned war there, then Russia to stop Crimea,, and Iran to secure the Middle East. If we can get agreement with American government to stop arms then we share with American government. We realized that the only way to speak to the Americans is to first take away their weapons, then talk Peace. We tried many times but to a deaf ear, now there will be millions unemployed people in weapons industry. We don't want to create you misery but we have to stop you creating so much destruction in world. That is the only way I see, the same with Western Europe. (:46). All the weapons S rely on electronics and the MaGrav is excellent to interact, then we are back to stone hammers. If they stop us we immediately release worldwide. (:48). Question. Is there a way to transition the current world leaders into the new peace. They will do, there is no choice, businessmen dictate to the leaders. The 6 member U Council will dictate the change and not the present leaders because they all try to cover themselves. I don't have trust for them. We will go through total chaos for a short time, then they will have no choice but to come over. The big problem is who dictates the power behind the world leaders, and they sit in control of finance. We take those away. (:52). The reason I asked for the security people to set up a One Nation Police Force, is to bring in all the Presidents and Kings who have done wrong. In weeks you'll see large number of world leaders behind bars. You'll see the books open up. We all know that after Hillary had a stroke when she arrived at Dulles, she is not in a position of leadership. (:54). I was arrested in Canada for 11 days and everyday I was told I will be shot dead. Then they sent me back to the wolves in Belgium. Months later we released the USB Stick and the wolves went to bite. ?? Something about Clinton's involvement, we all see there is an end to it, the soul naturally brought about a balance in the brain through damage. Before the Kings die they will receive their own judgment. The problem is not with us any longer, it is with them and how they try to save their own lives. The best solution for us is to disarm the US Army, Navy, etc and not harming a single person, just disarm the tools of war. If I take the controls off the nuclear weapons. We don't want the others to become superpowers so we have to give the T to US. (:58). For the first time man takes charge over his own destiny. .. (1:00). The problem with us human is we felt lower then the others and allowed them to take charge over us. (1:02). We don't plan but change internally. Armand said he went to quick to send Douglas to Washington. Keshe wrote, to plan is to get involved in the P, to wish and to transmit your wish with your soul is the start of all, and P will manifest itself in the shape that the environment will allow it to be good for the time and the space. Now you may understand more, it is your wish to stop ?? that started and ended the process, the act of P is the manifestation of the soul of the environment that the wish has been designated for, the wish to take shape. I wish it and it is the soul of the planet is ready it will accommodate it. I don't think of problems, as these are not part of my soul's motion. We'll see how things turn out (1:04) and either way it is the soul of the man and the planet that will allow for us to see the outcome for tomorrow, which when we go to the WH to see if the man is ready for new birth from today on. You shall understand one day. When we wish peace, and we make the ?? for it,

and if the planet and human race is ready, not those who think they are the leaders will take shape and will come and manifest itself. So I am not worried about the world leaders. We know no one is there at the WH, because it is irrelevant. (1:06). In coming weeks people will burn down the palaces because we have no need for them. (1:14). I planned this for centuries and now we have to go through the mayhem. (1:17). Speech from US president. He says, "we invested in wind, solar, etc... we don't have the technology to completely replace fossil fuels. And let somebody here invent something tomorrow, which would be very helpful, ... and if you have it, let me know! President Obama address 2010". We got a permit for 25 people to display on the WH Mall. (1:21). We have one of the top attorneys in US and have direct access to the WH. They said they will receive it. When we presented it they said they wanted Yale University to check it, I saw that as a delay tactic, so that is why we are going to Washington, we can stay there until they receive it. (1:24). If the President wants to get his hands dirty we can make one in the WH for the TV cameras, maybe he can stay for a third term, because the people in the background won't have a say anymore. The people who finance the president are the Oil Makers and ones who make wars, now we take their tools away from them. It's the only way to take away their power, take out their legs. It's how the Human Race will decide the new structure. We are not going through the back door, we are powerful, we go through the front door. (1:27). Douglas under no circumstances share the knowledge, we keep it until we. They wanted to see that there is nothing connected to it. Bret (head of security) is going to Washington, orders only come from him and Armand, head of KF worldwide. Bret has a direct connection to WH. (1:30). The Russians and Chinese are asking for a copy urgent, and Iranian government. This is going to cause chaos worldwide. (1:34). Marcel from Germany built a new MaGrav in last couple days. Germans only will accept a running device. I don't understand why the Creator put me on this planet it is really boring, but now things are moving. I tried my MaGrav from December I only get 10%, in the night I cry a lot, I think my soul gets more and more open, everything push me to KF. I didn't understand anything. It's a pocket size MaGrav, I hope to run in next couple days. (1:39). Photos of his pocket size MaGrav is running his refrigerator, but he still needs the Grid. (They look like capacitors), he saves 12% power after only 1 day. Keshe says this is history, the new MaGrav is off grid. (1:45). The Chinese are saying they are too shy to show, this is not good, everybody should share. (1:47). He draws, we are looking at pocket unit of 6 cm x 10 cm and should get 3 to 10 kilowatts, we can even go to size of AA battery. It should supply for 100 years. With 30 kw we should run a car, this is in solid state the next level is to change it into an active Pl, then you can go up to 1 gigawatts. We are talking about N material Superconductor, and availability of Gans. (1:52). Douglas starts on journey. The principle is we create a central Unit and the fields go out, and we make the gadgets or systems to connect to its fields, to give us what we need. We can go down to 2 to 3 mm, with kw, next 12 months. The proposition is 3 to 5 kw and 30 to 50 kw. At the moment we have achieved 7 kw. (1:54). The 3 areas of research going on is pocket size 3 kw, heavy load 10 to 30 kw, and then combination of cores and coils. Plasma interface what we saw with Peter, unlimited. With capacitors Douglas could go to 30 kw. (1:57). The Pl and man's E and you get what you want. The beauty of it is, it always stays balanced according to the wish. It's the wish of the man that makes the gold. (2:01). The unit will be disassembled during transport that way if they take it they won't be able to operate it. The Press won't come because of

the Jewish Lobby, etc. (2:06). Paul from Togo, HIV tests going on, the first lady the HIV is reducing. We have not used any Gans material on Naomi, she is improving, hopefully in next couple months. (2:08). Man produced gold particles in Gans of gold, is this possible? If you have only Gans of water with Pl of gold (LP) yes, the MG of gold is there, yes they convert. You can put a glass of LP gold btn the ?? see how many particles settle. You just need 1 "Mother". It rains gold, you need to melt it down. (2:12). Armand lost 2 of his Gans balls. they looked all over garage but couldn't find them, 13,000 rpm, they disappeared. From Giovanni, Naomi has stabilized she is moving. Maybe all the balls gather in the ocean. (2:17). Armand shows setup for gold, use just the LP gold. The double core reactors one is inside acidic and outside alkaline, and the others are reverse. (2:19). Keshe says to use a drop of AA in both cores, use 80 to 90% ZnO_2 on the outer core, use 10% high valued CH_3, very acidic, use in inner core 80% H highest acidic you can get, and ZnO_2 only, run 2 cores, 1 on one side of house and other on the other side opposite. The only 2 elements you need in this structure is ZnO_2 and CH_3, very pure Gans's on both ends. ?? Do the reverse on the other side of the house. Tell me how the people in the house feel. This is a message to world leaders we touch your soul, we don't need your P. (2:22). You will not even know your children or neighbors. Keep one at home and take one to work, anybody in the corridor btn home and work you'll see they will change. You elevate the E of man to the point of satisfaction. It has to be pure ZnO_2 water, very little Gans of Zn if you have and highly acidic CH_3 and highly alkaline ZnO_2, these are the extreme isotopes of Zn and same with combination of H and C. This is how the start of the process will come. It has to be dynamic and start them next to each other then separate and tell me what happens over the next few weeks, It has to be pure Zn and a drop of AA in both cores. (2:24). In all for cores DO NOT put any of your own AA, it has to be from the Zn plate production of ZnO_2 and Gans of Zn. DO NOT take AA from the CuO_2 or CO_2 Box, no way!! If you have access to material near to the soul of the man with a drop of AA and a drop of Cobalt Gans water, you elevate the soul of the man, the same combination highly acidic and Alkaline, the Cobalt allows the division of acidic into Alkaline and division and rotation, the speed of rotation needs to be btn 5 to 10,000 rpm, you separate the fields, the reason you are loosing your outer balls is because you have fixed the position, or the field doesn't have anywhere else to go so it explodes in trying to expand, and that ball will go through anything, the wall, even 2 feet of reinforced concrete, because it's in the transformation of energy. If you use a third core it has to have a combination of AA, just a drop but the condition of it has to be highly Alkaline. If you loose the Unit when next to each other it means the power is too high. As you move the second reactor to your workplace on the way if you wish gold it will rain gold, if it is peace it will come, if you need the gold to feed yourself it will rain gold. You become the point btn the source and the end matter production. (2:27). Your E is the controller, and if your intention is peace, and the others whose intention is also peace will come. The best time is when people are sleeping peaceful, then they will interact and wake up in the morning with a different approach. Put these units with MaGrav and float them in the sea, you will change the fish. ZnO_2 is access to the E of the Man. For the soul you need Cobalt, the soul can divide itself to P, the E is a transition time, it can only receive and take the E to transfer. You NEVER add the Cobalt to the ZnO_2. I taught this to you early, now you know how to make man peaceful. If you are going to Washington you have S you can make with the ZnO_2 and CH_3 water, leave 1 at home and take 2 with

you, and give the 2nd one to someone to take to the other side of world. The fields are there but don't forget your intention counts. (2:30). Another combination ... CH3 only to outside, AA to the outside, .. then you have the soul in center and E as transition, AA from the ZnO2, your intention and if the others are the same, get peace. (2:35). Iodine is the material needed for the elevation of the soul. Cobalt is easy to get hold of. Make sure you always used pure distilled water. No salt. remember I taught about Gans Liquid and vapor fields, heat up the LP to boil and collect the vapors, you'll have a very pure water of the material you made, because the P residue will be left behind, then you will understand. Use that pure water in the cores, the soul sits in the center, Iodine plus Cobalt has to be in the center, you need a little amount of CH3 to do it, because Iodine is heavily G. It is the seat of the soul of Man. Then the outer core visa versa, then the Zn outside because of huge difference with Iodine becomes M, the reverse position. (2:38). Then you can add part of the iodine into the outer core where the E is, then you create a connection btn the soul and the E. You need 2 core setups to transfer, if you all use the same Iodine you are all on the strength of the isotopes of Zn, we shall see the results. Have Bret make a cocktail, start the peace process before the energy crisis. The middle of Summer is the weakest time for the political machine, it's not Christmas. (2:42). Douglas is about to leave, blessings coming in from around the world. The KF Forum will have a special place for comments. I will come every couple hours to check up. We are here because collectively we have made the decision for years to bring the peace. (2:46). The starting point is St. Louis, MO. (3:01). Chinese man has a ball with 3 balls of Gans CH3, CuO, CO2, photo of a ball of light. (3:05). Translation, Rick tryies to explain difference btn double and triple cores. (3:13). Keshe asks if the room is dark, not clear, these are flows of fields. (3:22). ?? the second core, it can be dangerous, it goes through your body or walls, it most probably get attracted to the G fields of earth, it could be meters down in earth until it finds its balance. (3:34). Another rotating ball. Possible making new materials. (3:51). Rick draws 2 double core reactors, Alkaline and Acidic setup of cores, and field interaction. (4;10). (4:23). A video of how to make pure CO2 with plates outside. Be very precise in making Gans. Only use a protein that is pure. Keshe uses plastic bags on N and Zn plates, adjusting thickness and distance until you get pure Gans. And use a thin walled container. The Chinese had a lot of problems to get the pure Gans. Mostly we are getting mixed impure Gans. (4:31). Rick shows his container for pure Gans. (4:34). Alek says he tried but suggests putting one electrode inside the container. He didn't try with plastic bag. (4:36). A man used glass container and plates outside and he got quite a bit of Gans, Zn and N Cu Plates, when he added a few drops of NaOH he got a lot. He used a small jar and wrapped the N Cu plate around, cylindrical that seemed to work good. And he has seen that Cu pipes produce more Gans. (4:40). Mario says someone used a container with the N plate in a bag of saltwater and Zn plate in bag of salt water, and got 3 pure Gans. He also blew CO2 gas into the container. (4:43). One used 2 C rods with .5 amp and got Gans. Talks about all the different gases in the atmosphere. With pure NaCl might be better then sea salt as it is pure. (4:48). (4:50). The Man made Gold Gans, used pure gold with C rod and power 1.5 volts and 2 amps, it came out black, maybe too much power so it turned black, Distilled water and Himalayan salt. Gold will disassociate with high acid, negative to gold and positive to C, you may have got Nano C. (4:55). Nano state gold has a range of colors, 24 karat is pure. In Middle Ages they used gold N material for the red color of stained glass, Gold in N state

has special properties when it interacts with the UV rays of sun, it annihilates any air pollution near the window, turns it back into its prime elements and water vapor, and disinfects against microbes and virus. It changes the O to Ozone, most potent ionizer, they just found this out in last years. It's not the same as Gans. (5:00). Photo of gold Gans. (5:02). Zane shows his gold Gans, 14 karat is black used 7 amps. He loaded up Gans balls, they exploded in 2 to 3000 rpm. (5:06). (5:10). The dangers of Acrylic balls. He suggests a polycarbonate plastic balls. Making a shield for the rotating balls. (5:36). talks about different salts. (5:38). Distilling Gans water to concentrates the fields and drops the P. (5:41). Vaporizing LP to get the vapor fields. (6:40). (6:57). Public demonstration of the unit in front of the unit has been called off. (7:08). Shows the video of Douglas's MaGrav. (7:27). Man tells how he made gold Gans, he put gold chain in salt water, some CO2 Gans into it to give kit energy, 1.5 volt battery, added another 1.5, nothing happened, left it in the sun with solar panel, max 17 volts and .29 amps, , it turned purple after 1 or 2 days. He used just the gold no other electrode. (7:35). (8:01). Check in with Douglas, will stay in Pennsylvania for night. (8:08). Keshe talks about application to the KF, you can come in any time and start. The layman can learn the Pl T faster and higher then the professors because they want to hold onto the old way. The mindset has to change. People respect the nuclear T out of fear, but with Pl we bring it peacefully and show its power. (8:12). Keshe talks. (8:15). Q: about S for Stomach cancer. We are waiting for our license to be approved, then we can offer them. The lotion, Gans, and supplements, in Japan. They know us from our work in TEPCO, the last license only took 4 weeks. ?? to start the trials. We will accept cancer people across world, come to office with passport and certification of cancer, it will be intravenous treatment. Up to 80% reduction of cancer. (8:22). I have the cancer myself but I don't rely on the T, I have a different mindset. If we get 3 doctors with successful results around the world we release the T, we don't wait for corruption of delaying by governments. (8:26). (8:35). Douglas arrived at the Arch of St. Louis. We give you the link and you can read everything. (8:39). At the moment we gave copies to the Security Services in US and Europe. (8:43). Alek comes on to explain question, you make your food Gans and add it to CO2. If you add the food to your CO2 kit, you put the food on top of the reactor it becomes part of the Pl. (8:45). (8:53). To make Gans of Orange, N coat the stem of orange or fruit, steam coat it don't burn it, ?? positive is N side, ... orange salts get Gans. If you get the Gans of plants they taste like the plant after awhile. (8:55). Q: how to make diesel Gans, he hasn't tried. If you use Caustic with fuels it improves octane. Keshe asked him to make a Gans of Crude oil, but it didn't work to attract the oil. (8:59).
audio not on. end

130th Knowledge Seekers Workshop (Part 2) Aug 13 2016 at 11-30 pm CEST
(:11). (:40). (:51). (1:02). Douglas in rain at Home Depot. (1:07). The first people to meet KF on route, get group picture for posting. (1:20). Douglas's child. (1:25). (1:35). Rick draws a Cu wire, then CuO on surface (Nano) it's in a more free state, etc . (1:41). There are 21 neutrons in Cu ... (1:50). In a Pl the particles have large areas to move in. Goes into a atom of a Cu, the neutron is a M field and is not a particle, it's actually fields inside of fields, when we touch a table our ... an illusion of a solid U. And when we go the other way, to the macro, we see the U are actually fields. (1:56). (2:04). (this section has good discussion on Pl) When we capture CO2 Gans we are not transmuting it? No

you are elevating it to the next higher field strength. He says everything comes from the Ether, but it has different meanings. They couldn't find 40% of the mass of U. The Principle Matter is the next. No point of reference if no particle. The center of Pl is the highest field strength, you are here. (2:14). Recognize that you are Being and everyone is Being. (2:18). He doesn't define CO2 as such, but the fields of CO2. The particle collide will never find the god particle. (2:22). Talks about neutrons as matter and reconcile with fields. It finds position in relation to other fields ... yes because of its Pl mass, like the planets find their position with each other. In Pl you have positioning based on the field strength. Inertia. (2:25). (2:31). Pickling Vinegar (7%) is strongest, you can dip Copper in it before N coating to clean it. Adding salt to vinegar makes it stronger, forms some HCl, (goes on and on). (2:36). (2:50). (3:12). ZnO2 can spark life. (3:56). Rick tells of his seeing UFO, he had strong wish to them that they should take him with him, a voice came inside him saying "Look inside yourself first". Then he took a journey inside. (4:19). Ex-policeman says he couldn't touch his pistol anymore. If you know you have done something wrong, go correct it if you can. (4:27). Like Star Trek you don't interfere with life forms on different planets. (4:51). Rick is mostly a vegetarian. (5:00). (5:13). An older video of Keshe explaining Pl. (5:34). Update with Douglas. (5:52). end

131st Knowledge Seekers Workshop Aug 14 2016 at 2pm CEST
(The journey to the Whitheouse,)

(:12). Keshe talks. There is no rush. Bret and Armand are in Washington, contacted Chinese government to Washington. We are declaring our stand as leaders of One Nation. We made our point with the highest power. (:16). We are done with Energy crisis. We will do things our way without a shadow of doubt. First is to share energy. Second bringing of peace through the reactors, Third is application of water. and Forth is food. Preliminary Blueprint should be released right away. Also I recommend we apply the psychological change for peace, as I explained yesterday. The brain in the center is E in center of that is the soul. (:21). P has used Cu, K, Ca for muscles, and Fe but a lot of these are interconnected. The brain has used Zn for acceptance, it works with E and interacts for creation of P. The center is the soul, it's done with Iodine, it connects the soul to E and E to P, because it's so powerful in itself it can change, dictate P, but overlaps the whole thing. We can replicate the same thing, but you need to build reactors which have Fe in the center, they have the E mixture and in the end carry the P. (:23). A lot of you are starting in the P and trying to reach the E, but because you don't have all the combinations in the Gans in balance , there is a short cut. But everything you do has to be a replication of the reality that it can touch the soul. Cu, Fe, Co (of different strength), Zn ; I, Co (different strength) and Cesium, You need a Co Zn to interact with the soul. On matter level Co, on transition which is the E you don't need division (Co) because it's just line of Communication. You send info from the top it decides what division is needed, Principle, Transition, and P. (:25). The transition doesn't need to divide anything because it is just a tool of transferring, filtering, strength and division, in some cases when the strength is directly equal btn P and soul, then Transition not used at all. that is why most of the work in P body doesn't need the E, we call it reflect it is done automatically without E. Which means the soul sees its P in danger and reacts in a P

condition. If you make it right you can reach the soul of every man and creature on this planet, because we all have one thing in common, AA, COHN. If you facilitate on all 3 levels, AA then you have done it. But when making do not fall back on the matter state condition. You have to follow step by step, you can't use matter state Cobalt or Cesium to effect the division here, ?? for the brain and soul use brain of animals nearest human, you can make a caustic from it, for E or soul it has to take days to make. (:28). Because the weaker part of the spectrum of the isotopes deal with the P, you want to go to the higher strengths, you want to achieve Cesium and Iodine exactly as in the body, and put in the center (core) you achieve the true strength, interaction is immediate, if you add your own blood into it you become the dictator that I want to give, you cannot take because you are not strong enough to be a taker. the structure of the AA in the human body is very weak, so you can't dictate to take. So for the soul you use this part. For the E you make Zn from the natural materials and not the solid state (metals) that you are all using, you have to create a Zn which is in the spectrum within the workings of the body, then the P bottom section is exactly the same. This needs a lot of understanding. Some of you will do the Cu which comes from the muscle tissue, the E will come from the upper part of the brain structure, or the nerve S, ?? this comes from the center of the brain. It needs a lot of understanding. ?? You have to develop a digestion S for AA, when it comes to the neural S Zn, it has to cooperate with a Gans state AA, it's not a normal Zn from a plate, it has already been converted to a strength. (:31). It has got itself connected to Cu and Fe. .... the brain surgeons see it in the MRI as a gap, it like the hollow spot in your cores, the doctors don't understand that they are looking at that hollow spot. Now you know this is the seat of the soul. Those that understand can build S, if your intention is peaceful to bring balance to the rest of humanity, it will be done. You do it in the Health S, he draws the coils, stronger to the weaker, infinity loop, all the elements come to balance. Same with the soul you bring the E to balance and with it comes the P. This is how we will change the position (of Man). In some random orders you touch the soul, it is absolutely inevitable. If one man amongst you has the full understanding, he can change the structure of the souls of all the entities on this planet. This is how the prophets of the past designated the soul of one man brings the Christ. (:34). Now you learn the process, and if you are a true man of peace and you can build these S that I have described, then we have accomplished the second cycle, the psychology of the Peace, action for ma and living it. In some of this it touches man and they find peace in part of the totality, and that is enough for them because it touches the E at that strength. We saw this with the 27 Naval officers who resigned. This is a psychological warfare and the Americans don't stand a chance to win. The Russians, Chinese, and Iranians have perfected the art. It will take years for the Americans to catch up. We brought our power S to Washington not to share it but to protect the weakest on the line. In Space program America is one of the weakest programs of the structure of what we call leadership. We chose coming to Washington not to share, but to show the support that we stand next to the weakest. (:36). In coming time Man of Peace will prevail, no one can create war, because the minimum is the balance. Next we will release water production. The 2 cores are a copy of the structure of the planet, P. You collect water btn the 2 cores. H_2O is only 18 and most of this will create it. It's the same with the food, place everything man needs for daily diet in a container in the strength of the field of the Gans, man stands in middle and in seconds receives all the food, energy he needs, without eating a single food. I said I would open

the books of creation. He stands btn the cores and gets his water and food. We have completed the cycle. Jackie in his initial experiences started this, but he never understood and drifted away from it. (:39). You have to see the Totality, what works in one works in the other. If you put a drop of your own blood you'll receive everything which fits into your structure. For each one. If you want to see the orange you will see it. It allows you to create a Pl shield and that will be your shelter. (:41). Questions. Are you saying Gans of brain (cow) in inner, of muscle in middle and blood in the outer? No, you only need the brain and not the muscles and rest. The upper part of the brain controls everything to do with the P, use that for feeding and control of the P, use the center part of brain without the soul center to control the E, you can't control it but only elevate it if it needs to receive it and accept it. And use the center of the center of the brain for the soul of man. this part has no P dimension, you have to take part of the P dimension to contain it that you can ?? but there is a slight problem with the center, you only have the fields because at the point of the death of the animal the soul has been released. There is so much energy, peoples outer cores have exploded on the point of death, what happened is the Pl of the soul released immediately because it is so powerful, weakening when not receiving life O and blood into the other part of the brain so it weakened, the capsule opens and the soul departs the P. This is the reason why our soul can't be contained. But if you find that center there is still the field essence of it that you can use to replicate it. ?? the Gans can contain the soul power ... (:45). The second that the 2 outer cores weaken the center core has the power to break through. The soul uses P to contain itself and its position. If you carry the Soul and E of man into space you can create a P that fits the environment which he arrives at. If you arrive at a planet that is all liquid, legs and arms are the worst thing to have, you will see yourself having fins. And there are OTHER states of matter in deep space that man has to learn about, there are other methods of motion that you will come to understand. You create your own fields for positioning in respect to the others. This method is for more mature structures that they know they can have the P if they need, but they use their soul to create position. (:47). Now you see you don't need the flesh or muscle tissue to make the Gans, but you have to understand the principle and structure. Many of you will discover it, because there is no difference btn man and other animals, same feeling and E. There is a way you can do it without killing an animal, but you have to learn that yourself, because if I teach you now I will run a lot of you into a lot of problems, not ready. Q; would we then use the Pineal gland? You have to find out the seat of the soul. When the soul leaves it elevates beyond the P of surface of planet, so you are not connected to it, but you have a linked connection, so you are tied up to the point of the birth through your soul. (:50). Bret says everything organized in background. Share knowledge and amongst you find peace that is all you have to do. (:58). Jackie speaks about languages on earth and percentage of non-English. First we translate the workshop in English and then we translate into other languages. (1:03). (1:25). Translations take 30 to 40 hours. (1:47). Douglas update. (2:02). (2:37). Talks about the temperature of MaGrav. The wires got really hot and then started to cool down. (2:46). Over heating extensions cords, it crystallizes, it's chaotic. SP2 and SP3 structures of N coat. (2:56). A compressor and refrigerator are needed on either side of the MaGrav Unit, in an Infinity Loop. ?? Butterfly configuration of the coils so you don't have to have refrigerators. (2:59). Norwegian has built new one and will test in hours. (3:15). The positioning with the MaGrav. (3:25). He shows his new unit. (4:35). (5:46). Douglas

update. (5:49). KF council decides to release the blueprint. This is a hybrid (means total Pl) and is not the latest development, we are developing it in the next week. The S will work in any case. .. (5:57). .. Send the blueprint to every company that produces electricity on this planet. We have to spread this knowledge as fast as possible across the planet. Whoever has the knowledge and T leads the T, and we are the only organization that can lead, we are here to take leadership and in number we are large enough to support worldwide. (6:01). Send it to everywhere. Without the Pl energy you can't enter into the Pl of the U. The only limit is your understanding. As the collapse spreads over the next 3 to 6 months we support and teach heavily. (6:06). It was a year ago today I met with the Saudi prince, it was a joke to him it will never happen. Now how many princes will be laughing. When the energy companies can't pay the banks they will collapse. But those of you who manage to build the S you stay safe. Your S can provide energy, food, water etc, all your needs. Paper money will have no value, what you do will have value. Most of the Pharmaceuticals will be shut down, Monsanto will be shut down. If the Chinese need something to prove and they let the T into the Universities. (6:11). Do we need plastic cups to drink or do we walk in Pl field, same with Mental Illness. I have committed myself to humanity to the last breath. Do we need to believe in religions that abuse the man, we are not atheists, we know the fact the we are part of It. I will go quiet and wait for Douglas to arrive. We don't need the WH, too much blood in that house. In 72 hours we teach how to paralyze the Military worldwide. The mainstream media comes to listen but are not allowed to report. Do you remember how you put the orange on top of the Cup and drank the orange tasting water. Take a computer chip and put in the caustic and make a Gans of the Chip. (6:16). Then put Gans in dynamic cores and you create the MG fields of every computer on this planet. No computer will work, if you target it in a specific area, South China Sea, good morning, American Navy not work. We are not revolutionaries, but evolution has to be on equal terms. If you are a man of peace get a bullet, gunpowder, make a caustic, Gans of it, now you know how to dismantle every gun on this planet will not fire. What has taken centuries to build will be disarmed in few seconds. You have to find what materials are used in the Military structures, then create its balanced Pl, and it will not work. Disarming the worlds armies is a priority so that the energy of killing will go into developing the T. Arms for killing has to stop. I know all the ways to bring the leaders to submission to peace. The problem is not us anymore, but them and all the wrongs they are trying to cover. (6:20). We need to start forming the One Nation Police Force to bring the people who have done wrong to justice, if they walk away we all will carry on with the same. The documents have to be opened. World leaders, Arms Manufacturers, Religious leaders, heads of banks, you planned it and delivered it, now together enjoy it (jail time). We have to be correct, no revenge. (6:22). We will release the pocket size MaGrav. ...(6:30). (6:48). Rick says it's not the Cobalt metal, but maybe B12. Find it in fruits and use caustic. For iodine use brain of animal. (6:50). Keshe talks about elements, all are in bone marrow, Iodine best is bone marrow or brain, with it is Cesium that it converts to Cobalt, part of B marrow produces Cesium not Cobalt, that the secret that when it reaches the brain it becomes part of the soul of the man, we never looked for Cesium in the body but body produces it in specific points, it works for the elevation of the soul. Australian man says if change is too rapid it creates fear and resistance, is there any implementation plan? Stop, stop .. who is afraid and who is resisting, nobody can stop you in your house from taking the Cu wire from the

wall, the connection btn your meter and first plug that is all you need to change your life ... who creates fear ... it doesn't matter, good-bye, they have to find a new job. The biggest problem of Multi-nationals is how to satisfy the shareholders. (6:53). It is not your problem, they robbed enough, it's their fear and problem. They made a Facebook page to incite people to murder Keshe, we took photo of it, Red Circle making facts about Keshe, in very short time he will be arrested, are we to be afraid of these people? I am not afraid to be killed by a man who has killed many people, they are on the line to be arrested. Who are we to be afraid of. We are not afraid of anything. The Multi-nationals can't build anymore. We let everybody on this planet to build. A man who can't feed his children, old pensioner who has to wrap 30 blankets around the bed in the winter not to die of cold. How many old people are going to die, it's your obligation from now on to make S so these people don't die. You have to understand where we sit. This is the change, let them one by one shut down Nuclear Power stations, oil wells, they have robbed enough. All the assets of the Multi-nationals should become the assets of the One Nation. (6:57). When they go bankrupt what are you going to do with it. The biggest problem now is for the French to close the Nuclear stations, in next 12 months shut down. DO NOT BE AFRAID ... serve the others. This new MaGrav Generator is the sun, it is you who decide what you want out of it. I have made you free, it is you who decides how to use it. (6:59). I have evidence the ex-king of Belgium going to play (abuse) a sick child, whose afraid of these people, they are now going for justice. They can't control us anymore, we are free. Should Sandor release the photo of the Tunisian who is threatening. Why does Facebook allow it, inciting murder and violence. (7:04). The only thing we are afraid of is that the man will not get free of himself. Now I don't need to work 40 hours a week to pay for the electricity and fuel. You will want to work to help others. A life has to be a giving life. (7:10). The lady in Norway crushed her calculator to get the Chip, Keshe says I will teach you in time, you have to do it the right way or you can damage your computer. The principle is that most of the Military S carry a specific mixture of material, and the Military hardware carries a fingerprint, this is an analysis of what they create, all the fuels are not the same. One of the easiest ways to stop all the fighter jets is to understand the fuel composition and make a Gans of it, then the S of the fuel will not work. We can't touch any S that have to do with Nuclear reactors or we create a bigger problem. We have to collaborate with the governments to bring these on a safe mode. ?? We are doing this with a nuclear plant in Italy. On the other hand all the Nuclear warheads use a specific material that they can be contained. I can give you all the secrets. All you need to do is let them leak in their silos, it's already been pre-calculated. There should be no single warhead on the border with Ukraine. No incite of war to access to the gold of Russian Church. (7:12). The war in Ukraine (Crimean) is all fake it is setup by the Vatican to empty the Church of Russia which is the richest Church in the world. The rest is masquerading. It's a plan of Vatican. The Queen of England submitted the power to Vatican. Do we need the Vatican, why do they need the soul of man to rob the man. We are not going to destroy the Churches or Mosques, the structure was made through them to reach the man, we build something new. First we have to make the man confident that he can stand beside them. (7:14). Man has to understand that ?? illness is part of the cycle in the U, then it can't be used for abusing. Giving you the knowledge is to make you strong enough that you can't be abused in the Space. If you understand the process of Creation and respect the Creator, why do you need people to abuse you. When

we open up the doors you can see everything, you can see the Christ, then he can tell you who the Pope is. What are we afraid of, freedom, having everything, being able to help others. Accidents we can't stop, but plans to abuse has to stop. Why should Syrian children die tonight? Because Vatican decided to rob the Central Bank and they are after it. (7:16). Why should Vatican pay for 9 million land mines to be planted on the border of Iran as a gift they gave to Saddam Hussein, that Iranian children loose arms and legs. Religion is a business market. Try to disconnect from electron vibration, you will feel different, the environment will change. Because it creates a field that is not in balance with the man, our body works with Pl, when the same energy converts to Pl energy you will see and feel the difference. At the same time you feed your body and soul, and everything which is within you. (7:18). We have the most beautiful people in the worked on the Innovation team, they have a huge soul. Don't be afraid. The governments could block us so we did it this way. (7:20). (7:24). Bernie says they have a totally Pl MaGrav in size of rubrics cube (3 x 5 cm), it can start on its own. We can go down to AA size battery for 3 to 5 kilowatts. We can walk away from matter, coils, a totally LP generator in 3 to 6 months. (7:28). Douglas's System is already old. Some work to achieve wireless energy transmission. (7:33). Photos of Douglas and journey, this is a historic time. When we go to the Pl the Cu wire won't be needed. (7:40). We don't go to the governments, we will setup in a hotel and the officials can come to us. Q; about how the Healing rooms work, does the Pl interact with the lungs? Every cell in body. Keshe draws a Pl wall, let's say there is a tumor in the lung, the Pl fields form an IL and they compare the cancer cell to the cells around it, this is why we see such a rapid reduction in the size of the tumors because it sees the energy inside the tumor is not balanced with the outside, it starts to balance the layers until it gets to the seed of the tumor. Then the seed is balanced and disappeared. 90% of the cancers are E, the S works on the E, works with totality. (7:44). Then we dump the bad energy into salt water, we don't circulate it. Tumors contain huge amounts of energy. the tumor starts let's say with a seed of Ca, the AA environment is heavy, because it is in comparison to the other cells, when Ca grains start to pool together they create a G pull and it starts to pull energy because it's in a Gans state, not in Matter state, it starts to expand its fields and absorbs all the energy from the environment around it into it. The S starts to balance these fields out and they start to disappear. (7:46).

(7:54). Does the intellect come from the E part? Intellect has a level, it's like pain, .. in understanding the difference btn external environment, the internal environment of the body and the soul, and it has a strength, if for you it is 2 GB whatever, and mine is at 1.8, depending on the P structure of our body it dictates how intellectual we become, but it doesn't mean that if you are not intellectual in one level that you are not in the others, it has a bandwidth but it has to be acceptable both by the P and E side. Is interaction through breathing the E? That is the second part, it's a different part because now you work with this section (back of head ?), this section has its own to support and it has its own P and own E, you have to support these, as I explained last night in the teachings in respect to the child. (the front part of brain) is one part and breathing air through the lung to support the Fe and hemoglobin is one side and then you have to support another part with the Lymph that you support the P and E feed and the soul all together. Man has to understand the separation and complete motion of the totality, you go and compartmentalize the whole S. Your process is P, E, and soul. It's the soul which dictates

the P and E, but at the same time the creation of the P feeds the soul. (7:58). The Chinese will receive the Blueprint today. He was told to be silent with the Chinese government connection because it's going on in background with the Military. (8:02). We had to release it this way. I just guided you to where I want you to be, a lot of joy the cooperate, I am at peace, this is what I have come here for, after 10 years of suffering in Belgium, you don't understand what we have been through, if one man gets helps we have done our job. Governments have to start talking with KF and we dictate the terms for food water etc. We think 20% will go into space the other 80% will stay at home, so we have to make life for them comfortable, and then the animals also. We are at that point now. (8:06). Asked his most exciting moment this year, when you see doctors come up with results you explained to them. When you touch a man who is a physician who says I was trained to save life but I was never given a chance because we were never given the tools to do it, and now I create the tool myself and he shows you the result. It's a most wonderful time. And he said now I feel like a real doctor because now I can do what I came here for. When I was a young boy and I tried to explain what I saw, at that time 30 years ago it was an impossible. It was to find a way to teach that they understand. Teaching yourself to teach the others brings a lot of insight into the life of man, and then when you have done it many times you see a pattern. I saw this in Belgium. The most hardest time for me was when Red Circle ordered 8 police to come to our house to kill me, the guy with the hat came the day before and sat in front of me. I call my people and asked, they said because he has more fear of killing you, he has come to give himself confidence. The next day they came I was on the line and they were beating Caroline up .. a Police Officer running away from scene of accident was on video, why should you run if you are correct. He is the Chief of police of Cortec and makes warrants on his own for arrests. That was the most horrible time you hear your wife getting beat up and you don't know if you are going home alive or find a body, and it's a police officer. And it stays with me. But their time is coming. It's a shame on the human race to have a nation called Belgium. (8:09). Shame on us that we have to handle these people. We are not here for gratitude we are here to serve, I know exactly my position in the U, but we never had such criminality as on this planet, but at least we start to change. The gratitude has to go to the people around us, I have a very solid team, they are here all the time. Our KF doesn't receive donations, everything is done internally. We strive step by step, we used to get from the books but Red Circle copied all the books and released them. (8:14). Douglas is in Washington update. (8:25). The only comfort I have in this is that the T can't be used to harm anybody else. The worst you can do with is to bring balance. When I don't need it I can't accept it, this takes you away from me and not me away from you. How much of the T can we accept. The biggest enemy of the T is us, because we put the boundary on how much we are going to accept and that boundary will create a problem for us. (8:27). ... Your progress will stop when you stop sharing knowledge, because when you create a barrier to not give, you do not receive, and this creates distance from yourself. My biggest fear is when people start understanding a little and then thinking it belongs to them and nobody else should know, then they get trapped in this and the river of knowledge stops. We have seen this many times in the last 2 years around the foundation, they came close and thought they understood something and they started denying everything and they became everything. Then the whole thing stops and no further progress. And we see others who continue to grow. As you understand you share.

You see around the KF we give unconditionally and then there is no fear. The minute you put value on your work, I need something for what I have understood, it means you have understood nothing, that's where the river of knowledge stops. (8:30). Because with this T you touch the soul of the man, not the P and the soul is open to everything, you can't hide it. Q: where did you find the ability to convey the knowledge when others weren't receiving. I always say people take what their intelligence allows them, it's not intellect but understanding. Bunch of people stay with N coating, others Gans, etc. But you have to give them a chance and not get frustrated, like with my sons who are highly educated with PhD. I never forced them to understand the T, we leave it to themselves. My oldest called me a few weeks ago and asked to be taught the T, I asked him to go to Armand and learn step by step. (8:33). I don't get frustrated but I understand that it is not the time for the soul to mature at that point, it's not ready to receive, if you push you create distance, allow it in time to mature. I have a very short fuse. I was asked if I could help with Hillary (I think he means about using the T to heal her ??), we looked and saw she has a lot of P problems we see with the strokes and other things, ... (8:36). In other dimensions in space we feel and don't touch, we understand and don't see, here in the P dimension we see all the pitfalls. Q: about if his knowledge coming from Iran and Persian history? That's something that puzzled me for years, how all this health knowledge comes in me, inside out I know this but I never studied Medicine, then I was told by my cousin that I come from a long line of men of Medicine, your Grandfathers and Great GF were are Medicine men for centuries. I thought, now I know where all this knowledge came from without studying, but did I understand it that way, it's a different story. We inherit things and this is a consequence of where you come from. (8:38). Caroline says you don't want to walk down the street with him, why, because every part of your body is picking (seeing) what you are, who, how you behave, what your character is, what you are hiding, lacking, improve. It's beautiful because you learn so much about yourself, it's an encyclopedia journey. It's raining in Washington, i told them to expect, because when we go somewhere it starts to rain. There is a huge security alert around us in Rome. (8:40). The Red Circle has planned and publish a murder, we release it in the next few hours. (8:44). The Belgium king has 50 murder cases with children. We are setting up the One nation police force will be based on evidence only. It stormed when I went to Vatican, and when the Indian Guru came and cleared after, a clean up, same now in Washington. (8:49). Q; About after Cataract operation is it possible to rebuild the lens. We rebuilt shoulder amputation but the pain started as the bone was being rebuilt so we had to stop process. If they put metal in there then the body has to reject it to grow. If it is just a re-alignment then the Gans can work. We are looking at the same with the tooth, if nothing was put in the place of the tooth we can re-grow it back, but not if done root canal or other things put in it. (8:52). In one eye a plastic lens. We are testing something with my eye degeneration, I am testing to see if it comes back. The eye carries E, energy transfer, I took Gans of CO2 at 50%, and ZnO2 CH3 Gans Water, mixed and put drops in eye, change was very rapid within 24 hours. In Cataracts we have to satisfy the E, and muscle tissues, and communication (CO2), with this combination I don't feel the weakness. (ratio ..) (8:57). (9:16). Q: for Kevin update on Arizona Manufacturing, they have Pens ready to go, and are working on units for Doctors, and the started with new UL certification, working on distributor pricing, we are very close not, CE is not yet under way. More delays with payment S. Keshe says that without the health certification we won't sell.

(9:21). A message from a blind girl. (9:24). Q: from Austria about Asthma, it is psychosomatic, part of the structure for feeding the E, maybe you can use a pipe of ZnO2 with CO2 that it brings satisfaction to E, by drinking LP and breathing. But you need to find the cause, it is not inherited. You make a breathing tube. Caroline has written a paper about it, my pillow, my life. (9:41). You can post questions on the KF Forum. (9:57). Flight should be within a month, because now you feed the Pl with the Pl, the process will be homogeneous and you'll achieve lift easily. When we can understand the totality we can achieve flight easily. The Pl of the energy source becomes the dictator of the flight. Once you have the energy S we show you the flight S. (10:01). What if the US would offer Keshe a seat in WH, no way that is the politic. (10:09). The Iranian lady talks to doctors about the T and they put her down badly. They say that if it is so good why is it not on CNN, you tell them the Jewish Lobby has spent millions to block us. (10:12). The way we have gone is the most correct, thousands of people come to know, they have weakened the man so much that people don't trust himself. The biggest problem is they have taken the trust from us, now we learn to trust ourselves. The man never been to the moon because the Americans never proved it. Man is stupid to understand. (10:28). They have arrived at WH with banner. The MaGrav will be setup in hotel and they can come to see it if they want to. (10:32). A video. (10:41). Douglas can hear Keshe. Armand and Bret want to setup in front of WH, the police have given okay, Keshe says let Douglas do it but don't rush and push. They brought the generator to set it up. Keshe says the S doesn't a generator to get a pulse. Where is the mobile unit, but he left the pump at home. Go ahead and do it in front of WH, okay and try but you need the pump. (10:44). I asked him specifically and he said everything was in the car. It takes 20 minutes to setup. (10:52). They will try to buy a pump, it's an ignition S. (10:55). Q: about the pulse or sine wave needed to start the S. It took 6 months to develop the trigger point for the Pl and ignite it, then you have to create a condition for it can sustain it and feed itself back and keep the pulse going. We tried everything until Douglas developed it. The trigger point is like a heartbeat, it has to be maintained, for that trigger point you are looking at 60 Hz because we are using Cu wire, if you use blood it is different. because we are using Cu and the point of demand ... how can I explain ... if the machine is set for 110 volts that is your demand, 50 or 60 Hz, it's the load that dictates the generation the release of the Pl, once you do it the motor goes into generation system. (10:58). The structure runs into self feeding, we have now developed instead of using a power or signal generator, we have developed a Pl pulse generator, we call it a heart, it's a connection Bernie brought in. The heart S is being tested, we know the energy supply base is creating energy. (10:59). (11:06). (11:11). A doctorate thesis on Physics included Keshe but he was forced to remove his name. (11:13). She goes around and interviews people who came, one of the Universal Council. (11:17). Isaiah took a bus from North Carolina. (11:40). The System has 3 sections, one is the starter, another is the MaGrav, another is the feedback section (heartbeat), and then the load. Each section works on its own, the start up section is what he left behind. Once you start then you don't need it. We have a later version that doesn't need this part. You need to create a continuous pulse like the heartbeat of the Earth or man. That pulse is a mixture of the material which is the fundamental structure, that is why in future S when we go Pl we will follow very much the structure of the heartbeat, it is to release the Gans energy

within the structure of the body for its conversion of one thing to another. (11:43). They never showed the generator, it just stopped.

132nd Knowledge Seekers Workshop Aug 17 2016
(The MaGrav broke in Washington not demonstrate, Gel for Capacitors, 133 Workshop starts at 2:57 minutes, how to make new Capacitor and theory of it, Frozen water shows the fields of G Balls, how to make Gans of Maple Syrup, Conversion of energy to matter state (gold),)

(:02). In Washington, Douglas broke 2 pieces which are vital to run the System. At this moment we can't demonstrate. This hybrid MaGrav has this inherent problem. We have developed a solid state System. The Blueprint shows 110 volt pump, but in Europe use 220 volt that can trigger the Pl. (:07). We had a double failure, a capacitor, it worked but then moved it to Lawyers office, then the shaft of the motor broke. (:11). Photos of people who are making the system at home, and Douglas with unit in office of Lawyer. (:18). More photos. When you use higher voltage you need more then 8 Capacitors. In US with 110 voltage 4 to 6 capacitors will do, but in Europe with 220 you need 8 to 12 capacitors in parallel to take the high peak otherwise the capacitors start burning. In other structures you have to make sure that there is no N coated anywhere in the structure. This is very important, otherwise you'll see burn marks on the wood until the S N coats itself. If you are running higher voltages, 6 to 10 kilowatts, you have to go to higher gauges like 12 or 10. ?? The motor broke. The connections in the S have to be all N coated, once the S kicks in it's no problem. You need a 2 compressors, the capacitors allow the Infinity Loop to form, if you have 2 similar generators (compressors), it won't work, as we see it, but you can't create a solution, same as the heart, in your S, once you go into solid state it's much simpler then you see. (:21). Make sure there are no loose pieces. A flexible coupling is needed btn the AC motor and DC pump. (:24). What kind of gels do we need? Normal hand gels used by Douglas, I don't personally favor the gel, I prefer to use a Gans gel which is much easier to make and is also a power supply, you have only to add a certain amount of salt which keeps the S always moist and it works perfectly. I have been using it for some time and it works very effective. (:26). They fixed the vibration in motor, but what is the frequency, 50 to 60 Hz for 110 volts is what you need, and 220 v 50/60 Hz. (audio off) (:39). Keshe back on. Q: about using Al in capacitors? In some cases it's more powerful. Testing going on with the combination of matter and Gans. Conference in Washington starts, Press Club. (:44). Keshe explains what happened with demonstration, and the hybrid failure. Gives a background talk on Plasma. (:49). Now we discovered that the Pl needs a pulse like the blood a heartbeat. When you have a heart attack someone has to push your heart until they get the rhythm of the blood, and that is why you come back to life. Or we use the high voltage to create that condition. Now with the new S of energy we looked to find the heartbeat of the Pl, that is all. It triggers the 60 Hz or 110 volts, the pump builds up to about a 1000 volts, this triggers the pl then we withdraw the pump and this is the part that is broken. Now we have found another way to trigger the Pl then using the pump. This gives a new insight into everything else, now we understand how the planets and stars have a heartbeat, because they all have a Pl

internally, and for them to switch from M to G and M to G you need a beating. We might show the solid state version tomorrow. There is more to this then the energy, we will start the trails on cancer reversal. Doctors around the world are building the S themselves. In agriculture they are increasing yields. This is a Space Technology, we lift without fuel, and travel without weightlessness because now we have learned about both M and G. (:53). The next step is to create lift and motion, literally from the top of the building anywhere around the world. Now we understand how internally the Pl works. For example, the position of the Earth and the Sun depends on their MG field interaction, now we create M and G fields inside the S and this creates a positioning in respect to Earth. The position of the Earth in respect to the Sun is due to the strength balance btn the two. Now we understand this and we know how to create G field forces, or if you are a chemist we know how to make alkaline or acidic very simply by adding or creating rotation, this has created new understanding. We have lifted before, and my target is to see as many people in the world to start creating lift and motion in the next 3 to 5 weeks. People have started the process of transition of matter into energy and in that process have created motion. There are videos, where we create the same structure as the internal of the Earth and in running the S, the internal energy moves outside, the outer layer of the cores breaks open and we can't find the (Gans) balls we put inside. A number of people around the world have reported this. We created energy that the solid ball passes through the structure. (:55). This is a huge development. It changes a lot of things in the world of science and physics we have been taught. We have the knowledge to create the condition of the electron and proton and see in reality how they interact, all the assumptions are through the window now. We have the knowledge to replicate the real P structure of a molecule in M Pl because you can replicate it yourself. The reason why the KF work been kept off the mainstream news is because they have created a lot of fear about it. This is exactly what Edison did to Tesla, he killed an elephant with AC and showed that we have to be afraid of it. The problem is that a lot of governments and Multi-nationals know with this T there are going to be changes, and they have not received the return on their investments so they have to stop it. I took a different approach and went to the public, these are the housewives you see making the materials on the table as a Pen and how their pain is relieved. (:57). There is no way any international organization can ban people from traveling anywhere. I have chosen the path of freedom. In Africa with a few drops of (LP) a day we have seen AIDS disappears in less then 30 days. If you understand this the next step is space. We can lift and position without fuel, now that we start loosing the Gans balls (go through walls), from the center of the reactors and can't be found anywhere, on one occasion Douglas found it in the next room, door was closed, because they create such a strong energy field around it that it allows it to pass through the walls. These are highly applicable in defense. (:59). We can saturate a ball and target any craft in motion and release the energy of the ball inside the craft. The latest aircraft will be obsolete, you won't even find the pieces of it because the release energy is there. This T will be detrimental to a lot of nations that have invested a lot in Defense. My message to world leaders, whatever latest defense technology is worth nothing. The beauty of the Space is we make all these weapons obsolete. With these balls we make a shield and you can cut all the latest communication lines in the most advanced naval ships. The Russians have shown part of my T 2 years ago when they stopped the Aircraft carrier in the Black Sea. We are developing the Oasis S with the Chinese. (1:01). In time

of disaster the ball can create a shield that becomes your home, it can create water and materials, and heat. In the US the Fox News group has blocked this T from being known, but outside world leaders are well rehearsed of what we do. We were to show a Hybrid Power Generator, (it broke) but that is irrelevant, after 1 month that S is already obsolete with the new advances in the T. We release the Blueprint and you can build it at home. Around the world they have already started building it. So 90% of our work will be Space and how we can travel beyond the speed of imagination of the present time. We have learned to create G at will at the strength we need, and as we gradually add to the knowledge we can control it. We don't need to travel in the way the present Space T does with weightlessness and everything, because we can create 1G inside the structure. The T is being developed by people very rapidly, the governments have no say in this T. It's being done by the people (of the world). I did this deliberately so that the knowledge can't be shelved. This knowledge belongs to all of us and has to be equally shared. We are setting the course for humanity. (1:03). No one person has any say in it because we are all a part of it. Hundreds of people across the world build these S. When you go to a doctor and he says that you have a secondary cancer and are going to die, nobody can tell you that can treat yourself with the Gans water, drink it and sleep in it, and in 30 to 60 days I have no cancer. FDA doesn't count, nobody can tell you, you can't do it at home. This is where we are entering, people helping themselves. In Space if I am the last man standing and I want to try something, I don't go to FDA for permission. This time we teach everyone the same. In the space I can't come back to earth every time I need something, so we can produce food, medicine, materials etc in the space. In the last 2 weeks new scientist in Austria using the rotating Gans balls the way I taught them, they have managed to create metals, it's gold and is going for analyses. You can create gold out of fresh air. It is the way it is done in the U, how do you think gold appeared on this planet. The MG fields of the Pl which leaves the sun at a certain point has the strength of the gold and in that position in the Solar S it changes to gold. (1:05). In the past Teflon came with NASA because they developed it for what they wanted and then it came to market. This Pl T will be the same as Teflon in the next 12 months people will produce as much gold as they like at home. People are producing medicine as a byproduct of the space program. In Washington they are playing a deaf ear to what is happening, you are going to get hit so hard that there is no way you will ever recover. In China President Zhi 2 years ago had scientists to look at my T. The report was simple if China doesn't follow the path of the new T the way it comes from KF soon we will be Third World nation beyond Africans, because Africans have taken it up. In the States you ignored us for whatever reason and you are going to pay heavily for it. Because I can release communications with world leaders they are going so fast with this. You have no choice, the situation has changed and you are totally stuck with it. Every possible way has been made by Jewish Lobby to block us, but it's your loss not us. (1:07). We put the hand of friendship out, many Americans are learning. In the coming weeks with the new MaGrav S you'll not pay a cent for electricity to the governments. It costs less then 20 - 30 dollars to produce it, would you sleep in cold when you can just make it yourself in your kitchen. This is coming from the Grassroots. In the next 12 months oil will be finished, where will your income come from. Millions of Americans will build this in their kitchen. The US Oil Industry is gone. The same MaGrav you see on the table will reduce your car fuel 40 to 50%. People like Monsanto, we have shown that we can reverse anything that they

have done in less then 10 minutes, by mixing the seed in Gans water and all the genetic modifications have changed back to normality, before they got involved. The Americans are falling behind that very soon you will go to Africa to bring things in. Now we are in the Atomic Energy Commission of Ghana, and doing so much research there, but in America they are blocking us. Those in position of power have to change their point otherwise you'll have no shares in the companies. Oil will have no value in the next 6 months as people start creating energy at home, which 10, 20 and 100 kilowatts. (1:09). and weighs less then a half a kilo. Are you going to pay so much for the oil and gasoline, no one will do? Are you going to the hospital to get Chemotherapy when you can use the Gans water for less then 10 cents. We have doctors in the US who are practicing this medicine and have seen the results with their patients. We came to show you an energy S but unfortunately due to mechanical S it has failed, but when we show the Pl S in the next 24 hours, our research centers are ready to release it. You can build a solid state version for less then ten dollars. Once you start producing energy this way you change it to materials you need. We have managed now to create Pl energy, which is the energy of the sun, it has both G and M, depending on what strength in M or G it becomes gold, silver or cotton, now we can produce anything. This is where as a nation you're falling behind. Are you (US) going to become a third world nation or become part of the T and start moving very fast with it. If I move to China which is very highly possible, (1:11). your Naval forces in S China Sea are worth pennies. You'll have to send tugboats to tow your modern ships back to the US, because not even the engines will work. It's very easy, all your S carry Chips, now we know how to create C out of fresh air, we only need to change the C in a single microchip which is very easy for us. People will tell you we produce CO2 as a liquid out of the air, which is never been heard of in modern Physics. We block out 20 Chips and your ships won't go anywhere. In the Space travel even a speck of dust hitting a satellite can knock it out of commission, the new T creates a shielding that protects you from this problem. We have 2 choices move along, or allow organizations in America who know who we are, we have been trying for years to bring this in the US, NASA has been trying to get us in for years. I released the documents to the Attorneys today. I have given lectures in John Hopkins for the Department of Energy, Blocked. By covering up our T you become the animals who put their head in the sand, they think nobody can see them because they can't see anybody, and then they get shot in the bottom. (1:13). This is where America is going. If I move to China, all the investment you have made in the Military are worth zero. And somehow nobody is getting this information, the WH President Obama knows. Mrs. Clinton knows who I am, she signed my arrest for 11 days to be kept in Toronto airport, and be told everyday that I am going to be killed. She signed my arrest paper to be held because they didn't want my T to go somewhere. Your government knows, if you don't move the nation will know, but you'll have no choice. We came with the hand of peace and friendship, but somehow your multinationals they thought that they can control everything, running Fox News and everybody else. Sooner then you can think you'll have nothing that you can be proud of. I am a Nuclear Physicist I know my program and what I can do. We can literally stop all the nuclear warheads in their silos, all I need to do is touch a single microchip and just change a single parameter, they will never fly. In a recent meeting with heads of State my T was discussed, I know because we got a communication from Chinese government about it, the Russians and Chinese have accepted that this T has to come out. Americans

are fumbling with it, what are they going to do with it, you are going to loose very heavily. The biggest problem you have or they created is that I am an Iranian N Physicist, (1:15). living in Europe for 40 years I still carry an Iranian passport, (they say) I am dangerous. Now the danger has come to rest with you. Everything you developed as a Superpower is worth nothing. You want to test it, give me the Phantom F-18 whatever you like and give me 5 minutes and I will bring it down like nothing. You're pilots won't even know what touched them. Give me the latest Battleship you have and 10 minutes, it will be floating with nothing. I can stop submarines in deep ocean. These are not threats but the development of the T which has made the military obsolete. The Chinese have it, the Russians have shared it with them, and the Iranians have shared it with both Chinese and Russians. President Obama I have released the paper to the Attorney today, on the 6th of November 2012, he asked for the T, it sits with your government, the Blueprints of all these designs. Where has the USB stick with all the designs gone? You are fooling yourself and soon you're going to pay very heavily for it. At the moment your scientists pay millions to make this black stuff, it's a Nano material in the purest form. And we make it for a few cents and a 5 years old Chinese girl makes it in toilet, this is how simple it is. And in America they complain that everything is wrong with it. (1:17). If someone in Washington doesn't start moving with it in the next 2 to 3 months, I promise you one thing, the Chinese will take you on and they will show you that you have no Air force or military base to control anywhere on the high seas. The only choice is to accept the arrangements we have with the Chinese that nobody fires anything and we abandon the Military. It's very hard for a nation like you because you rely on your military, but the time of wars is finished. I have shown this to one of your guys who came to see me 2 years ago (military), I can jam any radar. When I am testing I inform the Air Force that any flight above my property is a no go zone because you don't know what is going to happen to you. And now the knowledge is with the people whom you're sitting with now. There are a number of people who can show it to you. The video of the Power Generator was shown to Gordon Duff before it was moved to Washington. America wake up or the sleep will be very deep and you'll never get out of it. (1:19). There are Americans among you who can teach you very rapidly. We have masters like Armand, Douglas can show you electricity in less then 10 minutes and you don't need to plug it in. If the government wants to tax the houses we can produce gold to pay them. We have the video showing the gold production. The situation has changed now that we have released the new Pl energy it becomes whatever you like. My call to the American nation is very correct, start moving very fast, bring the T to be taught on the TV level. In China we have hundreds of thousands of followers but in America you keep it quiet. As one guy said to me, if its not on CNN it's not true, by the time it comes true to you in reality nobody needs you. The effect of this process is clear, nobody needs anymore American products, you can't export a thing. Look at Africa they will not important a single gram of fertilizers from the US, they can make the LP from any metal in the house, add it to the water, it becomes fertilizer, pesticide and everything else. This isn't just talk, we have seen the results by farmers and now it's getting tested in Universities in Africa. And in America you are still busy with the religion, color of skin, and the way of belief and you are going to pay heavy for it. (1:21). I give you a challenge, give me the latest aircraft and tell me where you want it to land or I tell you where I drop and you can pick it up. And if you want gold you tell me how much you want in the Central Bank, because people will pay you in kilos

from now on. This meeting is a wakeup call in Washington and if you don't wakeup the coma will be so deep you will never get out of it. Thank you very much. (1:24). Questions. I saw Obama's letter to you and it was almost like a threat, we are the greatest country and can defeat any enemy? It is on private letterhead, not as president. The WH is fully aware of our work, it's when they choose or think that they want to bring it out. You saw the notarized letter from NASA inviting me for visit, but the government blocked it. (1:27). They thought that by blocking it will go underground and dies, but it has grown more and more. We have shown the power of T 4 times to Americans. At the US Embassy they asked how he managed to capture the drone. Forty years ago they asked me how fast we flew over the USA. (1:31). It is only te grace of god that we haven't touched your military, I have no fear, if the Military stops the wars stop and we can spend the money on peace. Somebody has to wakeup in Washington before it is too late. Your government is on my teaching every Thursday, what I taught in morning your president made a decree about the Earthquake in afternoon. Maybe it was not the time to show it in America, but this was home grown in America. Inside America your people are shutting it down. (1:34). Douglas explains the MaGrav Hybrid.
(1:46). (1:51). The more capacitors the more kilowatts you can obtain. In the center of the Infinity Loop is the FP. (1:56). They show the video of the Hybrid generator. (2:01). Keshe comes on to explain, you are dealing with superconductors, the current doesn't flow through the wires, it flows through the N material, there is no friction. You can use it for zero time communication ... We don't create energy we absorb it from U, every single Gans is like a sun. The American government said we can't give the Noble Prize to Iranian. We have discovered the gravity, that is the secret. Gravity means you can absorb anything to yourself. It has been the biggest Holy Grail of the science. If it would have been done by an American it would have been everything god knows what. The arrogance has kicked back for those who don't understand it. You can absorb any energy. (2:06). How long does it need to be plugged in before you can unplug it. We are now at the stage of wireless power in our development, wireless power is here, it connects to the "Mother". In the next few months we don't see any need for charging. (2:09). Bernie talks about test for wireless power, now up to 34 meters. We are building a small MaGrav about 2 inches diameter, we have a built in heartbeat to the unit. (2:12). He shows a photo of preliminary developments, the configuration can give 10 kilowatts, its the size of rubric cube. (2:15). You can travel the Space in the same way. Just one piece added to the rubric cube and it will fly. (2:17). Shows the wireless Unit. You put this near the car and it will improve the running of engine. Gans water in the tubes supplies the power. (2:20). What is the next step? I met with General Electric 8 years ago, they said we are building so many Windmills we will leave it until your T becomes known then we will consider it. Now we don't need them. NASA knows fully about this T but they never had the KEY, I am releasing it gradually worldwide. we have to release it fully in the next weeks because now people are producing Pl energy and that will lead to flight. In the S you create G and M and it has to find its position in respect to earth, you call it flight. Someone amongst you is about to achieve it but he doesn't see it. They know I don't teach unless someone gets to it. Armand is on the verge, he has to do it. (2:23). We have buried the patent system. If you burn yourself, you can apply the LP and you won't feel pain until it is finished healing. The water sterilizes instantly. We have done tests and we are getting certification. We don't understand what is going on in your country (US), the false pride

has made you blind. It is going to hit very hard. I invited the Russian and Chinese Military to watch this tonight that we are going to show to the Americans, to see how far they are falling behind. (2:27). It's to our benefit, when you fall behind we can disarm you much easier. We are going in that direction, we will disarm American Military in no time without a single bullet being fired. The new Pl T doesn't need bullets, all we do is change the field environment. The threat is very real, and it is that you become a third world nation. You are actually the most bankrupt nation, they announced it hidden in the Olympics. Your Space T is obsolete. If I don't wake you up you become a victim of your own ignorance. (2:33). Douglas explains how his cores went through the wall. (2:37). A Military man has offered to be shown, Keshe says the people in that room will show you and in couple days you can do it yourself. (2:42). If you make the LP dynamic it covers 700 kilometers. i can come to America if the government guarantees my safety, better if you military invite the Chinese and I teach you both together. The condition of this T is the signing of world peace treaty. Before I teach you, you have to sign the treaty that you will never harm anybody with this T and for no war. (2:46). Rick reads Treaty. (2:50). Applause at end of meeting in Washington.

133 Workshop starts.
(2:57). The breaking of the Generator was a blessing in disguise. It allowed us to speak frankly with the Americans. 27 minutes after the close of the meeting we received an offer we couldn't refuse, you know who you are, and we respect your leadership. The offer was beyond the understanding of some nations, but we accept it. If it works you will hear of expansion of the KF worldwide. This is a decision the leadership makes and it will change the subject of the T as a whole. (2:59). The new solid state triggering of the Pl will make it available in Africa. We accomplished more with leaders last night then in the whole year. We received confirmation from leaders that they have heard us. (3:01). I would like to thank Douglas for his sincerity and reaching the Army. Last night it was not about the numbers but about the quality of the listeners, and they gave their instructions last night. My Foundation has accepted the offer. (3:03). There are 2 ways to setup the S. If you use a fish tank pump as a trigger point, you have to understand what is the outlet of the pump. ?? It's for countries with 110, other have to change the S which brings a M flow current of 220 volts. Signal generators and small power units do NOT give such opportunity, the reason 6 or 12 volt batteries work, you have to understand the structure of the current flow in these S, they have both AC and DC, and conversion of AC to DC creates a M flow within the pump as they start which matches the condition of inciting the Pl to the heartbeat. In signal generators this M field flow is missing. The current flow from the battery to the windings of the pump in interaction with both AC and DC from the battery, creates a specific kind of PL M field flow which matches the Pl flow within the coils that you have. This is extremely important to understand why certain S work and others don't. When you use a generator you create the same conditions as a battery, the structure is not the same but it can reach a certain speed to create an interaction. Douglas's S responds in that order. (3:06). Because it's a combination S, not a single S. You need a Capacitor/Compressor/motor combination that the compressor starts with a delay, that is what generates a pulse, the compressor (red in blueprint) charges and discharges this creates a delay, the delay means that the 2 motors can't synchronize and that is what creates the heartbeat. It allows the fields from the Stacker coil to be released.

They told me the setting of the Capacitor is wrong, it's negative to negative of the MaGrav. I checked it and it's not wrong, because they are set as parallel, so the 2 negatives and 2 positives are the same. Against the Physics you receive 2 positives at the load. It seems like a strange setup but you are dealing with Pl, you have to close the loop of the Pl. As we said with the structure of the planet, it's the same field going from the South (Pole) and coming to the North. (3:08). In that flow of the fields from the MaGrav to the Capacitor S, you can drain them or whatever you like, all the load becomes as part of the circuit. There is a very clear structure in this setup, it's Pl and not electron vibration current flow. Those of you who are making these please be careful, this is a Pl current, you can use this current at the point of the plug (outlet), for anything you need. If you can develop a plug S which is totally N based rather then current based matter state, you will achieve huge works. Now you are going from totally Pl to totally matter circuit, therefore there is a step down and loss of energy. If you can build and setup new ways of connection in the Pl load section you can directly convert the Pl energy into anything you like. You have to keep the circuitry in the same process. You can't connect your Pl into a matter state Load connection and then try to go back to the Pl. Maybe you have to develop 2 S in parallel, One Matter state and the other pure Pl state load connections. (3:10). This allows you to operate both the matter state for use with household appliances etc. and the other Pl devices that we will develop for food, creation of materials, etc. He draws the connections. The Pl Outlet should run parallel to the matter outlet, you tap right into the lines (N wires). (3:12). You connect directly into the Pl for say production of food, or materials. We use matter state to create a controllable Plasma, you have a lot of flexibility with Pl. These 2 Units can run parallel with each other. It gives you a freer hand, stronger fields, and a U condition. Producing materials from fresh air. If you connect your motors to the Pl side you will see a different response then from the matter side. On the matter side it's just rotation, but on the Pl side it includes the energy supply of the MaGrav Pl, they link up at the same power. Instead of waiting a day for a kilo of gold it will do it in 10 minutes, because you don't go through conversion. (3:14). Those who want to develop this T have to understand it, our Chinese friends will have an easier time to understand Pl because they know Yin and Yang. You can use these connections for cancer with immediate results. The possibilities are beyond your imagination. If you develop uses (appliances) that are parallel to what we have in the current technology you will see big differences. If your cooking time is 1 hour in Pl microwave only 2 minutes, with better results, the meat is in a Pl condition so it receives the energy directly. I have been waiting for years to release this Pl T and now it's on the table. N coat your SF and connect it to the Pl side of the new MaGrav, I will see you in Washington in no time. When your S is totally Pl like here it will respond to the earth's MG fields which are Pl immediately. This circuit was the missing piece in KF structure for a long time. I told you I have kept a golden key, this is one of the notches on that key, without you can not move (3:17). We will see 2 kinds of scientists, those who are matter and those who are MG Pl. None are wrong but each one has to find what they feel comfortable with, for the matter ones Pl is beyond their education, they accepted their limitations. I have 7 billion to enlighten, try not to criticize. We started with the wood, then to the atoms of wood, then to nucleus, now to the energy of nucleus, the packages of energy what we call proton, electron, neutron how the interact and work internally and in respect to each other ?? (3:21). This is the new knowledge. If we have gone from burning wood to a few atoms

that can run power stations and give the same energy we have increased in knowledge. They will resist and criticize you. We have to commit ourselves to peace no matter if we burn wood. With Pl you cannot do any damage because it finds its balance, best choice in any application. If you choose the Pl side you still have to bring it into matter state that you can understand it and use it. This is a Pl generator it can always become lower, itself has a huge power. The Pl has to reduce in strength enough to become what you call the neutron, or electron or star. It has to reduce that much to become ?? now we are going to the mother. We will see new appliances and facilities applications to make life easier for man. (3:25). ... (3:29). Questions. **CAPACITORS** (3:38). The new Capacitor with the non-nano coated Al, it's plain Al foil. If you can use something besides paper because the high power can burn the paper. Be Careful how you organize the Capacitor because the paper has burned out in our S, and that creates a short-circuit because the Al will touch the ?? You can use Al and a copper sheet, or Al and Titanium and N coat it and Gans coat it, and in that coating you can use the particles of N materials, ?? the matter state itself plus the Gans. The problem is to understand how liquid is created in the N material that allows you to keep the separation of your Gans's and N materials and matter state. In the matter state we call it water which creates that separation, it happens in our body we can't ?? carry different Gans's and the molecule of O creates a separation. (3:40). The next step in making Capacitors, now that you start using gel or liquid Gans, is to understand what the gel means, what does it do in the body, it creates a separation that different Gans can find their position in respect to the others, that's why we are made of 80% water, the only thing water does in our body is to create the MG field gap that the other elements can move freely in respect to each other. If you understand this you can make coatings that behave exactly like the body. We use gel to create that separation and when the gel dries you have lost it and the Capacitor burns out. Add materials with high G that a intermediary btn the elements you use as a coating or as a matter, because even in a matter state you are dealing with a Pl. If you choose the right combination of the materials you don't need lubrication, the material will create their own separation and they will never burn out. This is what you have to extend the knowledge to, (3:42). you don't need liquid, as in the body the only thing it does is to make a gap that other Pl like Ca or whatever, can operate on them. So you can create the same condition btn your Capacitors and you'll have total insulation from each other, and none of you have gone that way, instead you use gel and all sorts of things for separation. It should be very easy to make Capacitors without any paper or lubricant and you can keep the separation, this is how the skin slides over your muscles, look at the way and the structure of the skin of the muscle, its job is to allow the separation of (tissues). The bone and muscles both have a skin, which allows for the free movement and at the same time allows the transfer of energy across. Understand (that this is a kind of) MaGrav positioning in mass, in contained mass, which is like the liquid in your body. Then you don't have a worry what material you use, paper, Al, or whether it is N coated or not. It would be very nice to use a N coated Al as a foil, because then there is a guarantee of a transfer of energy, while at same time non-conductivity in the layer of Al and copper. Noe of you have explored this. (3:44). When you put the Ohm meter on the N plate you see it's a superb resistor, this means it's insulated completely from the Cu. If you can do the same with another and break down the gap with the energy from one to another, all you need to do is to N coat the sheets of the Capacitor, then put Gans on it, then create a separation with it that you

can slow down by adding N materials, ?? of the matter state, and roll is like a cigarette. The separation is the insulation and the N layers are already proven to be insulators. Develop it so that you have a fully Pl condition. Choose your pin, G, separate different materials, N coat them and sheet that they 100% insulators, add the material you want to separate, at the speed of the increase or decrease of the power. You will create total Pl Capacitors. Yes you can use anything you want, go back to your basic knowledge. (3:46). N coated materials are best insulators. Why do you put paper btn the Al rolls, why paper around the M ?? pins, or windings, and then you put the paper and Al that it doesn't touch the Cu N coated. N coated Capacitors if you get it right, it's a very difficult process, if not then you say it doesn't work. If you can understand the gradient and the turn of the enforcement of the field, you can easily work in total Pl field in the whole process. None of you have gone to use the leaves, in Africa you don't have the factories. Understand how the leaves operate, they have a N coated paper on both sides of the leaf, you have the transfer of energy if you can tap into both sides, you have huge amounts of energy and it never dries up, because the 2 layers the 2 sides of the leaf have learned how to create moisture in between, and that is what you have to do. And then you get a huge current flow, then by a change of the liquidity you can change the Capacitor to only absorb the energy of the orange, apple, or Fe or Cu. (3:48). Look into the nature and you will se a lot of work done. We already said both sides of the leaf are N coated "plates", the field difference create a MG field of the C which attracts with it the AA for the N layer to absorb energy from the environment. Repeat the same thing in your Capacitors. You already have done it in the CO2 box but you never transferred the knowledge, instead of putting the plates 10 cm apart from each other, one N coated the other not and created the gap of the CO2 in btn and you absorb the moisture and the energy, that is the most natural way you should have gone and nobody has, it's the most easy, and if you get it right you have one of the most powerful capacitors and you can adjust it to what you need, because that's how the plants create moisture, it's btn the N and non-nano coated plate, but a different strength, then you understand the leaf, because of its combination of fields has a SOUL, and if your intention ... the same as you put your AA in between the Capacitor you control the change from gold to water, you want the capacitance to be in the circuit of Al or whatever you might need. These Capacitors are the miniature version of the Galaxies, but none of you have understood. You are so busy with the windings on top, that shows how much you want to take from where, from the center. Plates rolling btn the capacitors creates a condition of control of absorption, the 2 pins decide how much at which level you want to take. You are all concerned if it's a rigth or left turn, do I use paper or Al, if you go further into the Space understanding the 2 balls which you put against each other is the SAME as the 2 leaves, now you create a specific position for the change of fields and you can produce any material you like. I hope some of you have understood otherwise we come back to it in the future. (3:51). Coffee break. Question about how Tesla is related to this T? Interrupted. (3:55). Chinese ask how to trigger the Pl from the electricity from the wall, which aspects should be paid attention to. You have to go from the point at the wall that you create the G Pl field forces, which can trigger the Pl, because you use Cu matter state it is 50 to 60 Hz, because it's a position where the energy of the Pl can penetrate matter Pl, it's a gap btn the structure that allows it, and on the other hand you have a flow that is strong enough with a difference in potential in the negativity that allows the pull of the fields of the Pl, to flow trying to feed that it

generates the rotation of the Pl. What is the potential difference, it is the minimum and maximum btn the field flow, the height, this is your voltage. If you understood this, you could **create coils which have different materials**. One of the problems in the way the S is set up is you have mono-atomic structure (like all Cu) and you have to work within that framework and it is harder to trigger, if you create Capacitors of Al and Cu, (3:57). you'll find out the lower limit triggers it first and pushes the other one to it. You'll have a much faster S and you need less power but you are still have 60 Hz but the Pl triggers itself, then the flow of the current of the Pl, when it's a superconductor it just drains itself so much that it feeds the lower to the higher, and the higher to the lower and the S gets going. Try composite coils and you'll get a lot more success, or composite Gans layering when you make your coils, Al with N coated copper, with Gans's of matters (Pl strength between Al and Cu) in between the two. You'll create that potential difference and then you can work much easier, this is what you need to do. If you understand and pay attention to Pl and separate it from the matter, when building MaGrav keep in mind what each state gives you gives you, meaning Pl, Gans, or matter, then become artisans of Pl, then you can make all sorts of things. If you understand this you can make a coil S less then 2 inch by 2 inch S. ?? The whole thing the pump included that you get a function of supply, and you can even miniaturize it to 2 or 3 mm. It's the understanding that gives you the strength and it depends how deep you want to go. It's understanding what the structure is and what you can do with it, and how you can play with it. The story about in the 1950's when the Americans sent a matchbox to the Russians, then they sent it back, and they thought the Russians couldn't find the tiny wire in the box. But in fact they drilled a hole in the center of the wire, but the Americans never checked if it indeed was the same wire. The Russians were far ahead with laser technology. It's your understanding but not getting carried away with the piece of knowledge that you have understood, that way you can learn more. .... (4:03). Bernard in Canada who froze the 2 Pl balls, one alkaline and one Acidic, the water btn did not freeze, you can see the Pl fields, there is rotation. The interaction of the fields is shown in the ice. He says if you put an Acidic ball in one coil and an Alkaline in the other, wouldn't the interaction create a heartbeat? Yes, that is what we do, that is part of it, maybe the medium of the water will create the resistance gap which we need for it. If I submerged the whole setup in Gans water with the 2 coils. Keshe says it's the first time we see the flow of the fields. (4:06). I am sure if you put only the Gans water in the balls without actual Gans you should see the same structure. He makes Maple Syrup and is making Gans of M Syrup. He has 200 trees and boils down the sap to a certain consistency, I take it off at about 216 degrees F, the boiling point is dependent on elevation, and then he filters it twice, and again at 216 degree. To make a Gans he added some caustic and hot water to start, let it sit for a day and added vinegar, after a day some dry caustic and heated it again, and it began to separate. (4:09). Repeats process. The Gans starts at the top and add more water shake and it will slowly start to descend, the start rinsing. I will try to use it to bring the Acidity up. If you keep it in the liquid state it may stay in the Acidity and G ?? He poured it from the bottle to jar and caustic on top and then hot water on top, it foamed up quickly, next day quite a bit of vinegar, and caustic again, it turns black. Keshe says check the rinse water for black particles and don't throw away. (4:15). I have some iodine Gans. He used 5% Iodine from Pharmacy, and made it same way as other Gans, Caustic, hot water, it really foams up, after a day add vinegar, it separated to the bottom and you can see the

field formation. he made also salt Gans. (4:17). Keshe says the iodine from plate or other sources is different then Iodine from animal flesh. The Iodine from mineral or matter state will never match with the body in health S. It's not the same as Iodine from plants or animals. This is very important. If you are using Iodine for the elevation of the soul in conjunction of Cesium, background x-ray, gamma and cosmic rays which comes from it, when you use plant or animal Iodine extract you are already working at the level of the AA, so you are directly in it. When you use Iodine from matter state it has not gone through the stage which isotopes of Iodine will match to the human or the AA of Man. As we get more educated in these things we have to consider them very closely. (4:19). We have to know our purpose for using it, are we going to create matter with it, or health or food applications, in which during the process it is already purified, a specific strength of the Iodine which matches the AA of man has been selected in the process in the creation of the leaf or the muscle, so you are directly in it. Matter state iodine is absolutely different. I would not use this type of Iodine on the health applications or coils. This is for Klaus and the doctors. Q: How do we extract iodine from other sources? This is easy ... there are different ways. One is to use the same process for making gold (in between 2 rotating Gans balls). In this process you use a combination. (4:21). He draws Peter's 2 cores rotating and a Gans in the middle, setting up a field. You can find an organ with high concentration of Iodine, say brain, make a Gans of it and place it btn the cores. ?? Now you are fractionalizing it, creating the fields, the result will be something that fits with the human body, at the point btn the 3 you collect the Gans for body and for the elevation of the soul or E. We have a lot of Iodine in the brain but also in other places, because every cell carries a soul, so you have it in every part in the body. (4:23). The collective soul strength creates the soul of the man in totality, so you have the same thing, you run 2 reactors which you have brought the condition of Iodine (?? matter state, is composition), then by introducing AA and Iodine from vegetables or whatever, now you dictate or narrow it to totally what you need. And you can literally collect it. If you place pure water in the middle position, the Iodine you collect will be pure for elevating the soul. It's filtering, filtering, filtering, but now you are learning Pl filter, but you can do everything in one position (process). Otherwise you have to create the Gans of Iodine, and then load up the cores with pure iodine, then you place the Gans of Iodine in middle and collect, it takes longer but it is more purified. Then it comes in the exact bandwidth. Then you can create the scent of the Iodine of the soul of a cow, and the scent of the soul of a man. One day you will understand what I just said. (4:25). These are the methods when working with LP you have to learn. The soul of the cow has a different frequency, strength. Understand that the strength of the soul dictates the P of the entity. Q: Will we find the Creator inside the Pl? If you reach the level of the strength of the soul of the Creator, yes. Not many have. You have to elevate to the strength of the Universal Condition and then elevating the passing of what we call the understanding of total knowledge of the Unicos, which is beyond the understanding of the man. The knowledge we have is so little that we ask to understand the Totality ... ... now you try to understand the strength of the soul of the Creator. He is pure, kind and a giver. You can make any kind of capacitors you like, even field capacitors which are like the atmosphere of the planet, understanding that you can produce anything. (4:28). The field capacitance of the earth in respect to the atmosphere of the solar S, in respect to the strength of the Galaxy, creates the field strength which earth can absorb from the Unicos and U, and

beyond it. You don't need matter state, in the strength of the AA of the man is very, very limited, if you understand the structure in the U condition, it is beyond imagination. As man evolves in his understanding of the U you'll start seeing more and more. You get enlightened and you understand the work of the fields and you bring the extension (of knowledge). I explained this to the U Council, it's you who puts the limitation on the enlightenment. When you do not share what you learn (you stop it up), when I put a plate of food in front of you, it's you who decide to eat. ... when you share the knowledge you receive more, because you have emptied the bottle, so more room to fill. You will see more of this when you enter the U community, people will strive to share because by it they receive more to give more, it becomes an addiction. (4:30). It becomes a path of life. Very few men have ever achieved understanding of this, only one nearly touched on it, BUDDHA was one and the only one, and he understood just about the edge of it, but couldn't understand any further. By giving you receive more, when you get enlightened ... it's like a father, when you receive you don't put the money in your pocket, you share it with your children, the joy of them gives you more energy to give more .. the souls gives more that it receives more then you get enlightened, the wiser you become in the art of giving. The man is too P. (4:32). Q: When will the solid state be shared? When it is done. .... these miniature S becomes the containment for the FP fields. It's the next step in use of Pl fields and its cooperation with the other matter states. If we put a little hole in the N coat and empty the matter state from it, becomes total Pl state tubes, you'll see energy beyond imagination. You can create conditions to drain the Cu from the center of the N wire and create N tubes, then when you add pulsation to it, works automatically. (4:34). The problem at the moment is because you have a matter state that creates a traffic jam, which needs a pulse. then you go to a N pulse which is a game that if man understands will open new doors of T, then to go even further instead of using hollow N tubes which is from matter state, to work in the liquid state of the Gans of the Pl, which is like the blood, where do you think 18 Hiroshima Bombs get stored in the soul of the man. It's a huge amount of manipulation of energy, but at the moment we have the problem if the winding is right or left hand. if you start learning to delete the matter state from your coils, you N and Gans coated it but you need the wire to give it shape, now if you manage to master a technique you can do it 2 ways, drill a hole in the structure and pass a huge current through it to deplete all the Cu out of the coil, now you are left with a pure Pl field of a huge strength, or create a condition to transfer the matter state from the center to out without melting it in a Pl condition, now you have hollow tubes, it's the way you make casting. (4:36). You use the matter state to create the shape you like and then empty the matter state from the structure. Heating it to melt the Cu creates lot problems, you deform part of the N layer, or you can use a high voltage to melt it. Or you put the S in the middle of the microwave, like our medical units, one side higher and other lower and you empty only the matter state from the structure. Doctors in South America did the process of removing a tumor without cutting open body. (4:39). He draws, you make 2 walls one side higher strength then other, you deplete your N coating matter state completely out and dump it into the salt water, you get a n tube. Now you play with fields, don't need 50 Hz, and if you submerge this into the liquid Gans you enter the world of Galaxies and Universes. If you create a hole in the N coat to drain it then you have created a hole also in the N structure. You can decide which parts of the matter state you want to deplete. ..... draws a N tube. You can play with layer to layer, the capacitates

and strengths are different. You can put materials btn the gaps. (4:42). The present transistors, microchips, the most advanced memory chips in computers, terabytes, will fit in tip of a pin, and much more. The Japanese got lost in this development because they are stuck only to matter state, it's known as a "cube", for years they have been developing but they don't see it. If you take the "cube" and use N material you can the amount of information (Memory) you can get in 3 dimensions is unlimited. N technology and zero time communications in the next few years you'll laugh why we ever used microchips or the present electronic gadgets. You carry everything within the sphere of a N layer. You have 50,000 layers on top of each other with each one having its own strength and capacity. How do we make the microchips, by connecting lines and lines, ... in the magnitude of millions, the size of a pin. Our glands work this way. (4:44) ??? there is no control S in the body, this what the glands and brain do, (? create this layers?). We still have a lot to learn then step by step to develop. "Plasma Chips" are so powerful, they are beyond the imagination of the man. What you do is place a power source in the center of your N coat (?cube), the fields are positioned the same, you don't need to connect a power supply, but because it's the strength of what you want to receive, you will run the S ... exactly there you are. ... A lot of people come and say their S doesn't work, maybe today I tell you why. Understand that you are building MaGrav S that work on N, Gans, and Pl layers, you are putting (ping pong) balls in the middle of the Stacker units and now you are creating Gans LP Units. (4:46). My friends!! You have entered into the **world of intention**. What you intention is to do and achieve with your generators decides if they gives you what you expect from it. Because it is aware of your needs and whether it is good for you. We saw a S well designed and working for weeks, it was brought to WH to be shown, from the time it left the house it met problems, because the soul of the S (MaGrav) knew the man in the WH is not ready for it, but that they can learn from it. We brought it Washington and tired to get it going. The intention of the man (Douglas) is peace but in soul, because he is Army, knows that the man who controls the Army in WH has a different intention of the use, once they see the power. It's like a child holding itself to the tree saying I am not going out, I want ot stay home. You all looked at the P of the failure of the S, I looked at the soul of the S. They saw the video of it working, but then when we got there it did not work, so they couldn't "see" it working, this then allowed us to openly discuss the Peace Plan (Treaty) on the table. (4:48). We could explain to the man of power and we saw how immediately the Military man on the table responded. The Major said I am an acting on duty officer and representative the American Military and we want to talk. They invited us to teach them. That was the purpose of the Generator ever making its way to Washington and then not working. Because the soul of the man is aware of the work of the S. You look for the dust and I look for the interaction of the dust and what it can give you. Persians say what you see in the pot, I see in the dust of the clay that the pot is made of. Try to understand your S and why they are not working. Was the intention to show superiority, or to bring comfort to you and your family and the soul of the structure of your life. Your System doesn't even need a power supply, it kicks in because it sees your need, and it needs to satisfy your need. You are too P. The past 2 days we had a rampage of P asking why the S didn't work. i stood back and I guided because I could see the soul of action. (4:50). I said to Caroline, when they left forgot the power supply at Douglas's house, the intention, that seeing the power in Washington would drive them to kill more. But by what happened gave us a chance to open the path

of peace, listen, understand the world of politics and ??, "I am acting military officer". We see the soul and its the same with the S. When you build the S from now on understand that it can interact with you. You are dealing with Gans, your own essence of creation. The sooner you realize this the sooner you'll understand that you don't need generators, as the U is the source of energy for our needs. If you listen to last nights presentation, to talk to world leaders requires the mastery of the art of politic, diplomacy and science, and last night we conveyed all the messages to all three and they fully understood. And I mastered it because I started it and I know it and that created it. (4:52). We played very open and that creates a lot of problems for a lot of people who see the openness. (4:53). Austrian showing gold Gans with particles on the bottom of glass and wants to show photos. A message from Klaus. (4:55). I have a small bottle where I collect my gold Gans, I noticed a lot of particles on the bottom looks like gold, I think it was produced from something else. They hve to be gold because you used a lot of heat, even the fields close to the gold will cause the gold to come out. Part of the fields will create this condition and position. Yes you have made gold but you also started from it, and the fields from that respect can be. When you make Gans you separate molecules at the weakest point at the strength with the matter state and you get flakes of it, and now you see the ones which separated before the atomic separation comes. If you test this it is most probably from the gold in which you started. Wash it that there is no residue at the bottom, then leave it in the cup, and if you start to see these particles created, then this is the production of gold the fields, from the environment. It's a big difference. Start in a different bottle, when you wash it don't pour off all the water so that none of the particles get washed out with the rinsing. (4:58). And you have no possibility of matter state left behind in bottle, then leave it and we will see if you start collecting gold particles. Then this is the true gold made out of the environment. We see this in the production of N Cu also. .. that gold is the conversion of energy into matter. This is the dream of the scientists for centuries. Because now you work in the Pl condition the Gans even being in the water, is absorbing energy from the environment, which is mainly cosmic rays, we absorb huge amounts of cosmic rays across our bodies, if we create the right filter then we can create the matter state. Everybody who is producing Gans of different metals can try this process and see what you get. Make sure there is no matter state in the Gans and leave it in the fields for days or weeks, and you should start seeing matter state. This is the conversion of energy to matter state. (5:00). This has been the dream of the man. The first Gans usually carries this original matter 9the plate you used), but some are created. You can take some of the rinsed Gans water of gold and place them around the reactor and you might see some gold outside the bottles also. Another question, I put some LP of gold without any particles in it, near a MaGrav and I found gold particles in it. You created a filter for producing the gold, whatever comes in that strength converts back into the matter state, because you the water (LP) and the jar which is the boundary of the matter state, so in that state it becomes gold when it touches the energy of the matter, it reduces and gives enough energy that it becomes that matter in that state, so that is the pure gold you created out of the matter state of the Pl itself. (5:03). When you use the LP of gold you still have some particles that you can't see in there, and that sets the scene for the totality and then you see the conversion back into matter state. If you become master in it I can show you a trick that you can collect a lot of gold. He draws a 20 cm tube, make compartments in the tube, fill them with different liquid Gans's leaving an empty

compartment between them, then tell me what you have collected in the empty ones. If you put different LP on either side of empty one then you produce a composite material, like brass for instance. (5:05). This is a field of composite materials and then if you convert it you get the matter you need, this is how you make composite structures in the U, you don't use furnace and make different alloys out of matter state, you bring different field strengths of the original compounds and it gives you the composite you need. It's at the atomic level so the composition is perfect, better then making alloys. You put a Gans of gold in respect to a (N) Cu winding coil, what you have is the field flow btn the two, you most likely will also collect Gans materials (I think he meant matter) on the bottom but you won't recognize it, but here you have preset the gold level so you collect in gold. If you bring is closer to the MaGrav you'll see the interaction and the speed of production. If you put another S inside (the MaGrav) very fast you can produce kilos of gold. You can mint it, nobody will know. (5:07). Two people on this planet learned how to make gold, Rothschild was one of them, they disappeared and reappeared with their gold. Their family was given the secret of making gold, and in the process (time) they lost it, and the rest of it is the illusion of delusion ?? from central banks. Fro the first time I am teaching you and you are making it. Everyday our planet (through the MG fields in relation to the sun) makes a mixture of elements and deposits it through the rain on us. The beauty and kindness of the Creator showers on man but he doesn't have the intelligence to understand. (5:11). To send videos to Rick send to webmaster@spaceshipinstitute.org, it takes a lot of bandwidth and time, use "wetransfer.com", allows 2 GB of transfer and fast. (5:13). In china the voltage is 220 so you have to use compressor and pump (it's 110) at same voltage, so the problem is you will never get an Infinity Loop started with capacitor and compressor matching up, it's too weak, change to 220. Use a normal generator and not signal generator. (5:15). These compressors carry M field wiring and that is the secret to their working. Your S is N coated and creates its own M field and holds its own, that's why this T works so easily with these things, but you have the problem of the matter state to kick in, 220 has to have a power supply of 220. When you go above 140 ?? you need more then 4 Capacitors to carry the huge energy that comes as an impulse, you need to increase the number to 8 to 12. Renan says that for 220 volt System there are more power spikes, at least 8. You have to check the compressors because even if it is 220 volt the starter may be at 110. (5:18). It creates an IL with the pump and extract more power from the environment. It's just to start the system. Check your S at the load output to see how much voltage comes out, 1 to 2000 volts, and see the peaks. We think the rate could be 1 Capacitor per 1 kilowatt for 220 and .75 to 1 Capacitor for 110. Keep that in mind and understand the power peaks of your generator. (5:21). Then you look around 12 to 16 Capacitors. It depends how you make and arrange your Capacitors, if they are in line with other things. Try to use only N coated materials all the way along, don't mix wires and N coated wires, make sure your loop from the point of interaction with your power supply that triggered the Pl, everything has to be N coated, especially when we go into solid state condition. We'll show soon. (5:27). Chinese shows new generator setup. Lot of translation. The 2 compressors have to be powered. (5:32). Connections to create an IL btn compressor and grid (??) power supply, it feeds to the plug and then consumes the energy that is how the loop is created. This is the trick, in normal matter state this connection will not work, but because you are in a Pl state it works. (it's not worded clearly). It's a MaGrav feedback,

another way of a kind of Capacitor. If you remember the (split) Capacitor you have the G pin in center and the left side fed back to the G pin and the other side went to (load), it's the same process. (5:35). Now he draws the connections more clearly, you connect from the positive of the yellow power strip (?? is this the Grid), to the positive of compressor #1, and the negative of the yellow P strip to the negative of compressor #1, then connect the negative of compressor #2 to the positive of Yellow P S, then the positive of Compressor #2 to the negative of Yellow PS. Your Yellow PS becomes a generator and feeds back in. Renan please put this in the Blueprint. The Magrav is setup according to polarity. They are creating an IL on the Yellow PS. ... Interanlly what you are doing is connecting the positive of Compressor #2 to negative of C #1, and the negative of #1 to #2, and off of the first line you are taking a power supply. In the flow of Pl the M becomes the G and visa versa. (5:40), The top layers are stronger in M and inner layers in G. ... you start with strong M and by the time you get the G you become strong in it. You are tapping into a self-made potential difference. You feed from the strongest to the weakest, it's unlimited, megawatts. It all depends on how much you can carry from the center and how much flow you can allow. If you understand what is happening here you don't need the compressor setup. The coil is the controller of the fields, how much, converting the Pl to matter state. The Capacitors are a converter and the 2 compressors are the balances. If in your design you place this right you can dictate a lot of things. You look at the wires, but instead look at the Pl, they are not creating AC or DC, but a Pl condition. (5:43). Where you put your coil and how you position the compressors matter. Understand the fields. That's why we created the stacker, 3 on top of each other, each one is N and Gans coated to create the flow (of Pl). You create an IL. With the Compressors the stronger feeds the weaker, I watched this with Douglas yesterday, but he doesn't understand it so I didn't interfere. Why the S works and then sometimes doesn't, because you haven't understood what you're working with, the flow of the fields. You call it M and G, here I want to give my M is more powerful, and here taek (G), here I have to give because my M is stronger, I create capacitance and have to step down or up, that's why you have the capacitor on one of them because they never match, and one tries to feed the other (this is the point here). ... now the pump (? capacitor) itself is part of the Pl circuit. (5:46). He created another design, by replacing the 2 rotating LP balls instead of using the Compressors. Keshe says you are very correct, this is part of what we are doing in the Innovation Center. He shows a drawing of the 2 sets of LP balls, CO2, CH3, CuO around a Pb, 2 sets of this configuration. This was first shown by Bernie in Dubai Conference, but people didn't understand. (5:48). This is a combination of N material and Gans coating. Because it carries liquid it will be a problem for commercial units, therefore we have gone a step down to create the same thing in a coil structure. Bernie added a different structure to it and it works like a heartbeat. It becomes a self-sustain S. Bernie explains. (5:50). What you see are the 3 MaGravs positioned btn and around the balls, they are connected to each other. Keshe says that these are not MaGravs in the matter state, you don't see them, but the fields are there and you need to take them into account. You organize your S to tap into fields and absorb different energies. So you use the LP to create the fields and then connect them together. Just see the S as field interactions. (5:54). He draws the M field coming out half way and then changing to a G fields. Then for example the fields of the CO2 extend to the fields on the opposite side, do the same for all of them. (5:56). ... we have taken this into the factory production. (5:59). Bernie

shows the mini-coils 3 sets of SF coils. (He talks about new device) ... (6:06). it works wirelessly!! the moment you connect the wires. ... in a group of bare stranded Cu wires, the N coating started in the middle wires and went outward. (6:08). Back to the Chinese man to continue explaining the LP balls. Keshe interrupts and says the way it is drawn is wrong, the field flow is opposite, if you change the position of CO2 and CuO on the left side then you are correct. The flow always comes from CH3 to CO2 to CuO and back to CH3. (6:11). When working with Pl you look at the N coated state, then at the field flow, it's the difference btn 1 kilowatt and 10, (so he means that the way it was drawn reduces the flow to only 1 kilowatt because it has to overcome the flow barriers). A lot of energy is used to overcome the barrier. If the fields are flowing freely they will keep on expanding. Pay attention to detail, by changing position of one Gans bottles Bernie's fields went from 3 meters to 30. By changing the Pb to something you can increase your field to 30 km, I have done this for year. A little positioning will give your field distance beyond your imagination. How the bottle sits, where you put it in respect to the others. (6:14). The Pb is like your center core, the 3 LP are like outer core, and your environment is the third core. It absorbs so much it has to feed back out and you get explosion of fields. It's like throwing a stone with rocket propulsion S, hundreds of km. It's not how much it gives here, it is how much it adds to the center and how powerful the center becomes that it pushes this, overcoming the field which fed it, and this dictates the distance. This is how you paralyses military forces with a little bottle. Yesterday I gave a very clear but subtle indication, a little Chinese fishing boat amongst the naval ships, he carries a little ball with no motors or nothing, as a drinking bottle, the American's can't believe it can create such a mayhem. You only need a fish which inside it carries a bottle, the power of this T is so much, but you have to understand how you organize it, dictate it. And if the man who built the S puts a drop of his blood inside it, the fish will flow among the ships as he decides and looks. The naval ships are paralyzed because they don't see the fish, one by one the boats sinking. I said, you choose the boat and give me 10 minutes I don't even need to be in China, I can do it from here and control the fish. This is what you have to do in the Space, electronic S are too slow. (6:17). If you add a drop of iodine to the drop of blood, which connects to the E of your soul, which means you can't do anything wrong, you shall not harm anybody, but matter state finds its position. My intention is Peace, the total S in stomach of a fish. If your intention is planet Zeus, if it is good for you, you shall be there. If the intention when you build the S is that you don't have to pay the electric bill and that allows you more time to serve, your S will work in no time. If your intention is I get the free energy, it doesn't matter what they gave me I screw KF, my nation I don't pay any more taxes so i can have more myself, the S will not work. And then you call me a crook, when the crookedness sits in your own soul, not understanding the work of what you are doing. These S are getting more and more connected to your school of thoughts, you build it, touch it, and it carries the essence of your E and thoughts. (6:19). From day 1 I told you to pray for your S when you make them, praying is giving and correct thoughts you shall receive. We are coming to it very fast, many of you will cry, my S doesn't work. This is especially when you go into the bottle S with Gans and fields, you have touched it and carried your E to it, don't forget about mother and child, it doesn't matter where the child is the mother feels the E, your child is your AA, you deposited on a ... There is no choice but correct conduct, because you don't get what you want unless you understand why you are wanting it and it is

correct for you to have it. .. do I want gold that I am at ease or do I want gold that my soul is at ease. If your intention is only to get rich, you'll never create gold, and then you'll say I am talking rubbish. And the guy who can make gold to prove that the T is correct delivers, because with it he will change a lot of things in people so they forget about the gold. (6:21). That is why we see so much success with certain individuals across the Foundation work. The soul is clear and you lot have not understood, you're too busy not paying the electric bill and hoping the government will give you everything, who is going to keep the Police force and hospital going. When you work with these S start changing your ethos. The only person who can elevate your soul is you and nobody else, and in elevating your soul you elevate your P, in being able to share more and give more with the hope that you receive the strongest fields from those who have given, and all the weakest fields are spread on the ones who are weaker in intention. When I give my wish, it is the same as I explained with the North and South Poles, the energy on the top is the giver, the ones who are petty and want to take from the (?? weak) the strongest of the fields of receiving, but the man who has the full intention receives the most powerful energy in G, that's how the S works, how the sun created its own fields, that's how you go in as a weaker and you come out as a stronger. There is no difference btn the operation of the fields of the stars, the soul and the P, as a manifestation of his thoughts. **If you understand this you don't need to build Systems**. You can achieve everything which is your dream, that is the attribute of the Creator. Detachment from P means I know I have what I want and I give as much as I have, as I know I will receive stronger then I give strongest. (6:23). There is no way you can separate theology and the ethos of the Creation from the Physics. People from Cornell, MIT, Yale, have said we accept Keshe T, I can show it to you in black and white (documents), but the problem wit him is he brings theology into it. These lot in these Universities are nothing but materialistic scientists, they don't see the bigger picture. In the Space we work in the Pl, but you are still stuck in the matter state. In the matter state you still need to go to church and get robbed with your soul, because you are still stuck with it. In the Pl T when you understand the Totality of it you become the prophet of your own correct conduct. So we will leave the scientists we can't accept the ethos, you lot have not even understood what is on the table. You are too P worrying about the degrees, Porsches and the mistresses in the back street. SHAME ON YOU. When you work in the Pl you have to understand the ethos of the Pl, and then it gives you what you want if the intention is correct. You can't separate it, it's no more I do what I want behind the locked doors. Locked doors are the open scene for the soul of the man. (6:25). If you understand this, theology which is the conduct of the soul exists within the structure of the matter state and without it can't exist. Those who want to see only half of it, let them be, we call them professors at Yale University, because that is the limit of their understanding. In this T you take as much as you can understand and no more. We don't preach, we teach, it's the student's lack of understanding and inability to see the Totality. Back to Chinese S, understand what you want, do you want leakage on one side, how do you want to give. If your S wants to be a taker you'll find you get nowhere because it reaches balance, a full cup can't take anymore. Q; So could we say we are trying to evolve our confidence in our intention? Good Morning! (it means you have understood what we are talking about). (6:27). It is that you have understood, but can you translate that into the work of life. Like a cook has a recipe, I want to examine how much of it was due to intention by examining what I

have created? In a way yes but if you want to see what you have created, it depends on what you wanted out of what you created, that's the main part. That's why I wanted to ask you about N coated Al, it's never really fully black. It can't be. N coated Al can never fully be black. I tested it with a meter and in has infinite resistance (like N coat). I want to understand the process so my intention is more of an active ingredient. It depends what you want to do with the Al at the end which counts (as intention). In writings of Bahal, "Man has a soul, so does the animal, tree, and stone". It's a field which itself has created its own fields, and is aware of the fields you want to have intention for, this is what a lot of us miss in the whole teaching, we become too powerful, I saw the other side of the man in the past week which put shame in me, how the greed for energy brings the man to misconduct. We don't need to prove anything, all we need to so is show the power of our will which is correct, we want a peaceful action. It will come because the intention is there to come, but others are maybe not ready for it. In sharing knowledge don't put it on the paper, but write it with the pen of soul and those who are at the level of you will read. This is why we changed the U Council to be for the Language and not the nation, nations don't exist, but the language is the line of communication and understanding of the E of man. This is what will count. If you discover something write it with pen of soul, those who want will understand. (6:30). will reverse what they have understood and send it back to you and you'll receive more. In the Space there are no tree or computers the only communication is through the soul. Then why such a struggle with the P? It's the choice of the man. Don't forget Man was created out of P. It's a cycle, conversion of energy to matter and matter back to energy, this time the energy is the soul. When you die your body releases energy equal to the 18 Hiroshima Bombs. Where do you think that energy comes from ?? carried from P to add to the soul. This is what the ?? lama's don't understand, what we have missed in the whole structure, and now more and more we come into liquid and field Pl, we understand more and it's for us to be the intermediary btn our soul and P, which we means we control our E to be a giver by P, that with the hope that we will receive at the soul level what is needed to be elevated with us. (6:32). God is a giver because He knows that when He gives He has more to receive. Last question was about N coating Al, he boiled it for 6 hours in baking soda in a steel pot with Cu bottom it turned black, is that N coat? You created multilayer, it's a composite of different coats. Al turns grey when N coated because it is loosely packed and doesn't absorb all the light. The structure is loosely packed so its grey, in Cu it is tightly packed. end.

134th Knowledge Seekers Workshop Aug 25 2016 at 9-10am CEST
(:07). Earthquake in Italy, KF releases all its reserves of Pl T for the nation. The Earthquakes will continue on around world through the Fall. (:14). Make sure you have CO_2, CuO, ZnO_2, and CH_3 on hand for disasters. The earthquake in Italy and at the same time in central US so they are connected, and in central Asia, which means the platform under the continents are on the move. We usually see an earthquake of a certain magnitude in one place and the next day somewhere else, but now we see high level earthquakes occurring at the same time in 3 or 4 different locations, and this is in line what was estimated (months ago regarding continental plates shifting), and it will carry on and become an order of magnitude out of control. The problem is not a single

earthquake but multiple quakes that start creating vibrations across the continental plates. (:16). If this process continues and links up with each other the continents will move. (:25). He draws the 3 continents on his board, Asia, Europe and N America. When they occur at levels of 6 and above on the 3 continents it shows that the final push to separate the continents is happening. And when we see them occurring in a straight line across the continents the inevitable is occurring, (as we have earlier gave warning). Why Italy, it's a boot, a free zone that can absorb the shocks, this with the American earthquake appears to be part of the bigger movement in the Fall. (:28). Earthquakes are adjustments of the plates.

(:40).

(:44). We offer energy technologies that are not in the public domain, (that must means S beyond what the MaGrav does), but only if the Italian government asks for it, at the moment they have not asked. In the next 2 weeks it will hit below Rome then to Gibraltar and Spain. We will see Greece, Turkey, and Iran. We will have to release the T, and it will be applicable to all nations. It will hit in the Winter and energy will be needed. (:46). We have T that have not been shown in public that are not electron vibration but Pl field strength dependent. The hybrid generator is 110 and not 220, we are looking to convert it to 220 volts. Shortly we give you an alternative to the 2 compressors. It will be solid state. If you can't get the power production there is a conversion you need to do. These S will produce 3 to 5 kw. (:50). Douglas's Compressors are generator compressors and not just compressors which will not work, you need 2 I Loops. The secret is a 2 generator pump (what you call compressors), with or without capacitors, with the condition that one likes the other (interacts with its fields) and creates the motion. The production of a loop is dependent on capacitants and the winding as a motor or a generator. ?? These compressors are generator backup compressor front. You need to loop in both generators but in a way that you can tap the energy in both at the same time. (:52). You need the MaGrav and Capacitors to give you the 3 to 5 kw. Understand that these S are already obsolete. Those who have gone into the multi-dynamic (3) cores, if you run them and have managed to empty the middle core, it means the field strength in the center is very strong. ?? Create a S that hold no liqiud in A (center core) and liquid in B. You fill both A and with LP and push to a point where A becomes empty. It is not empty, it's part of your fields, there is no way you could get air bubbles in the center core. The bubbles are Field Plasma (FPl). (:55). If you reach the stage of FP or bubble in the outer core it means you are on a target of production of energy and everything else. If you create a vacuum in outer core and empty in inner core you have created a FP, a hollow center that is not hollow. It is a beginning step towards creation of independent MG fields, and the matter state of your cores as defining it. Though you don't see it a very fine Gans layers has formed to confine the inner core FPl. If you put a third core and you start to see matter content forming in it ... when you start seeing depletion of matter from the second core, empty spaces, when you see both A and B empty you are in the process of field M field and you decide the field and how you can work. The emptiness of these cores is not that you have lost material, but a sign of entering the next dimension of the Pl T, which is the field T. If you see bubbles in the outer core it means you have not created a field strong

enough to empty the center. You have to consider that you are giving so much from your M to G that can't support or (:58). is not enough to support and empty the center. If you managed to put salt water in the outer core, as I told to the Innovation group you'll capture most of it in this layer, very small amount of salt, allows the creation of materials which you need. Redraws it, 3 cores (A, B, C) filled up with different materials and you'll be left with materials left only in C. The cores A and B are N coated so they're not empty but have fields left in them. Because you rotate them the interaction allows you to lift and descend. This is how the center of stars and galaxies work. (1:01). Look for a black Gans material in the center core, when you see the dark (stuff) in the center it's not N material, it's the "Principle" material, what you call the black hole, because it absorbs most of the energy and radiates it both ways as needs. And by the water in the outer core you dictate what is absorbed and returned, that is filtering according to our structure. The outer core with Na, water, .. all the things AA balances according to the P structure on this planet. You need to be rotating at about 10,000 rpm or more. If you place this in the center of your Stacker, it becomes an energy deliverer, you have energy and lift, what you need you absorb, your Stacker dictates the boundary of your shelter. This is the option if you go through the Gans and motor process. In the U there are no motors. Those who happy with the 3 to 5 kw and the Hybrid generators, I am sorry for you, it means you still stay in the matter state. (1:04). What we are trying to supply is in the range of 20,000 volts, continuous, but only about 0.1 micro Amps. At this level fed into a field as an operator you'll create lift and motion without any matter state. This is where the Foundation work is headed, this is why I am not really interested in the hybrid, we have to keep you happy with 3 to 5 kw. Too fast a flow can't allow the creation of the condition, 1 Amp is too much, 1 mille Amp is bearable. In Pl T, we need a potential difference that allows the creation of but allows a very slow movement that's what the current means, flow creation, if the flow is too fast you will destroy everything you have, or you can go on the other end of .5 to .75 Amps and create a ?? horicanal field and that compresses the field to give you the black hole in the center, then you create the conditions of existence. You have to decide which way you are going. Going through the mechanical S to 20,000 volts has problems, failures. Now creating a Pl field flow around a solid state that can guarantee 20,000 then we can allow a small amount of field flow as we like, or a rapid current flow. Understand the difference btn the voltage and amperage. (1:07). ... if we create a Pl flow from the new hybrids we are not looking for atomic electron vibration for a current as you consider it to be important. We are heading into a space T that works under these kind of conditions. We are running these S on the back of advanced knowledge but we have to break it in on steps that you can catch up. We are going in stages that it can be done in accordance with the U System and not electron vibration. the knowledge is going very rapid and a number of you're catching up and hopefully you teach each other the way you did with the Gans, N coating and the rest. Now if you understand, you created a N material, a Gans Pl, and now we have achieved the emptying of the central core in the Innovation Center. (1:09). with achieving FPl in the central core. This is our target to achieve interaction of the fields which creates the Pl. In Book #1 we said that when the fields interact they tail up (spiral up to center) and create the Pl. We came from the matter and now in this one create 2 opposing field forces and let's see what happens. We start building a Pl in which we decide the size of it to be a SS, to be an atom or the beginning of an AA. In the U we can build whatever we like from it. This is the end, the

COMPLETION of the knowledge. This is important because you have seen this before, rotating a Gans ball and achieving a hollow center, while still having matter around (the hollow center). Now we have compartment ?? we decide exactly where this goes, how it's going to be and when we stop the motor the center should still stay without matter. Which means we start confining and controlling the Pl inside, it's not that the matter has leaked out, (1:11). but the fields inside are strong enough that it can hold the return of the Pl into matter state. This is where we have to be and are heading for, a lot of you are busy with a different part of this T, but those of you who are coming with us, realize the first house evacuation (of center core) is completed by the Innovation Center. The next step is to empty core B, everything is in the Gans state field forces. If we manage that in the next few days we will achieve lift and power generation in a much simpler way. There is no need for motor or anything, because if we manage to create a power supply that can create a voltage difference of say 20,000 you have M and G and if you can feed these 2 in opposite direction to each other, then you'll understand the process. (1:13). There is no need for liquid you go directly into the Pl fields and as these are created in the Pl condition this is what it gives you all the time. I have explained before, Alkaline and Acidic, positive and negative, North and south pole, G and M, these are all the same thing, no difference it depends in what language of science you want to speak, then you can understand how you can lead from one to the other as you need it. Your knowledge has become advanced enough to understand this. As I said, Atmosphere, Coulombs Barrier, the skin, or anything else you want to call it, it's the terminology for the same thing, you can go from one to the other. We started at matter state, N, Gans, step by step we built it up ... became LP, we talked about the vapor because that is how it moves from one to another, and we came into the Field Plasma and we have seen it. And in the process of the FPL we can decide where we want to end up (draws arrow to any of the lower states). Unified Field Theory they all come from and depend on the conversion of where you want to be according to the strength. (1:16). Even with the disasters coming up each one of you have to decide what part of the T you want to handle to achieve the same (result). He goes over the difficulties of each of the different states, N has handling difficulties, Gans has power but we don't know how to handle them accept containing it, in LP you find freedom in accessibility because you know it is there, with Vapor you have little knowledge about it because it is a transition, the fields are actually the Field Plasma and everything can be taken from it. Since last week the Chinese went directly to direct transformation of LP in the bottles with FPl and interaction with another FPl of a ?? cup introduction of a field. (1:18). Some of you have already started to understand FPl by its results, because the liquid interacting with the field and matter give the desired effect. To understand the difference in strengths you have to understood the creation of flow from one to another which gives you the current. Those of you who have understood the last sentence have broken into the world of U energy. The larger the potential difference the deeper in the knowledge of man in the work of the U. People in the future who listen to these teachings will understand it. the potential difference in Pl for M to G is the span of the U, the smaller in the matter state, maybe this picture covers the last 3 years of teaching or the whole knowledge of humanity. (1:20). So simple! The center of the U sits here (the line at the bottom), the earth sits here at the edge, the further ad the weaker, the higher potential difference with a slower rate of flow, matter state is possible, now you understand how you fit in there in the matter state, you don't se the totality. You

can convert one to the other, (draws A outside and B inside). You still get the same result. You can introduce fields that are still within the bracket (inside) but you dictate where the ?? has to be, this is what you call the transmutation of the Pl, not the element. It's the Pl which manifests itself in the matter state, it's the Pl which does the transmutation not the element in the matter state. (1:22). When the sun radiates its fields it doesn't make Fe or Ca, it releases a field that in interaction with environment at given condition, that field package fits into let's say O according to the rest of the environment which is created, now you can understand this (field radiation from sun) and this (?? other field diagram), it's the translation of the same knowledge. This is one of the reasons we are not pushing the production of the generators, we are pushing for further down the road, 3 or 4 weeks when you start making these things, then you'll understand why ?? because the generators you are going to create are not for electricity, it's the tool for you to be able to release the power of the Pl in using what we have already built, the Stacker Unit, that allows you to create what you need but creating the potential difference according to your need. You decide a current flow, this is a change of using electrical vibration to potential Pl level balance. (1:24). Next week the teaching in Barleta will start again and we will show you how things can be done. I'll try to make it more practical for you to see in understanding the T. We can create a lot of things without actually having any material. If you are testing for production with the different cores you are doing the same thing as creating potential difference in the interaction btn the fields, that the balance interaction in respect to the condition that you determined will give you the material which you need. Show us your developments with the Hybrid generators, it is not for electricity but is generating Pl for the production of whatever you need. The Pl outlet off of the generator will become your food, energy, material, etc. you can dictate which plug will give you what. I showed this is Rome last year where I put a DC 110 and 220 off the same line. This should have given you a lot of information. (1:27). It's the same as putting the two hands and creating the fields, there is no difference. You went a long way producing the Gans etc to get fields. The Gans is in your body, there is a potential difference btn the hands. You yourself are a source (of fields), and you have never seen it, man has always demeaned himself. Do you need to build up reactors, create the Pl fields? You are looking to create a potential difference to create what you want, within your body structure you already have it. Your right and left hands are the electrodes. In more knowledge, your right brain and left, don't need the P of hands. There are positions in the P structure of the brain that you can lift yourself, create your own shelter. If you are P you look for the hands, in science you look for control of the fields of the higher strength, you can go inside your brain then you'll find out the biggest mystery to the man. (1:29). Do you need the SS, or the SS you have chosen is the P of the man himself. Blessed are those who are wise to understand. If it's your E, the central control of the Soul which decides for you to have blue eyes, black hair and 1 toe longer then the other, if you understand what you have within yourself, why doesn't it become a SS? The body of man is a SS which he has chosen to be at the present condition of this planet. This is the secret and none of you will understand because you're too P to feed the P to exist, you have forgotten that the P is fed by the soul itself and the E is the controller. You have the control as E and the supply as the soul. You have decided to take the shape of the P of the man. (1:31). If you understand this you become one of the most advanced creatures of the U, because you decide how you want to manifest yourself or to be seen or to have contentment that you

are happy with what you have, you condition you. When you arrive at the destination point (planet) you convert to a structure according to the environment you land at. It's your soul to decide if you stay and be equal in balance with other souls and structures which have 10 fingers etc. We are not teaching you ethics but pure Pl Physics. ... You have to understand where within the structure of yourself that you create the dimension of the Totality. (1:33).

(1:46). Questions.
(1:56).
(1:59). This is the knowledge which was in small portions that was given to some men we called the prophets, and they used it to abused you, now you're all prophets. The knowledge that was shared today was never shared with them in the past. So you are receiving more knowledge then before. That's why when masses of you are teaching and some grasp and come with you and the others reject, you have become prophets because you're sharing knowledge of the creation, he used to send one, now we are making masses of you, because this way the teachings are much easier, the man understands another man (like himself). You are teaching how to make N, Gans, LP, etc., this knowledge was never open to Christ or any of them before. Because they were involved in the matter state, how to wash your face, how many times to bend and the things you have to do P, yes or no. Now you understand the state of the soul and P is irrelevant. Without your knowing I have made prophets out of all of you understood, but according to the time and space, and how much you want to understand the totality, you become what I call the prophets of different levels. From now on the prophets of the U will not come just to teach ethics, but they will be knowledgeable men of science of the U. (2:01). Those who call themselves whatever to ridicule you that's what they have to do, you become the next Christ they put you on the cross. It's the soul you carry which counts. When you are teaching them all you need to do is to give from your soul to theirs, because it's like Christ said forgive them for they know not what they are doing. You have been given all the knowledge above what was ever given to the prophets in the past, you don't need Vatican, Mecca, Jerusalem. Understand how we are becoming educated in the totality and people are realizing the injustices and what needs to be correct. (2:03). ... We are of aware of justice coming in groups, that elevates the soul of a nation and humanity. Which means we don't want to (get involved), but we know what has to be done to be correct. In that process you know if it is the right hand taking more then the left hand or if you decide to be in the process of understanding. How much do you understand about the motion of the fields, and the field flow from one side of your body to the other, how much do you understand about the rate of flow from one side to the other, how much it moves if you move the next finger 2 mm forward or backwards. Would it be the motion of the movement of the finger or of the toe? Then you understand the rate of the flow, then you understand the difference btn the motion of the finger and toe and how much you need to flow between what. You have to realize the simplicity of the creation, it's man who has made it complicated. (2:05). You have to decide how more complicated you want to make it that it becomes irrelevant and you end up back at the beginning (ignorant). This is the problem, the structure, the process you need to learn. Do you need the understanding of one core or another when you carry the core yourself? You're trying to build a Pl where the ball of the Pl is with your 2 hands, you decide what

rate it goes, it goes so high that your P can't handle it, then you'll find out that your E takes over. A guy sits in my teaching and he concentrates so hard to move a cup, he doesn't understand that the cup is himself. We don't preach, we teach the knowledge of the U. And each U has its own rules, conduct, own field flow and interactions. It's for us to understand but we have become so P that we have blinded ourselves to understand. (2:07). Last year we lost a lot of teaching on one channel, but that loss brought freedom to a lot of children (captured a pedophile). 25

(2:12). I received a warning to stay away from American politics that it's too hot, too dangerous. If we speak about the truth there won't be any election, we know too much.

(2:23). Q: does iodine evolve the soul? Explain what you mean and see. He made the Gans of Seaweed. (2:25). Wikipedia definition of seaweed ... (2:29). We are not talking about matter iodine, but Pl converted and in the AA level,

(2:37). Understand the connection with P, which is part of the hemoglobin, Fe, and then you see the connection with the E, connects the 2 together, the soul in the interaction with the E, the Zn and the P, which has to do with the Fe. You found the jackpot. By adding some ZnO2? No that doesn't count, ?? the holding of, when you have oxides, O is the linking connection to hold on to the P of this planet. In the Space ZnO2 doesn't exist, unless there is an O somewhere with it. Zn exists as a monatomic Pl. The oxidation or acidic is the connection which end of the strength of this planet. Oxides don't exist in the U. If you connect on the H you go on the end of the acidic, if you connect on the O you go on the Alkaline, which means you become G or M, you end up taking or giving in connection with the environment. (2:39). Does using LP of Zn to make the Gans of seaweed elevate his soul? ... I am waiting for you to answer yourself. Thinking makes the man wise. (2:42). no, no, you start judging yourself .. is what I believe about myself in line with my E, what I have been made to believe. Most of the knowledge of the P life has been taught here, it's up to you to make the connection with your E and P. Christ is one of the most misunderstood prophets of the past, because he brought a lot of magic due to the lack of understanding of the people around him, where he actually explained a lot. When we talk about rising a dead body, everybody looked at the P of rising a dead body, but he elevated the soul, and it moved the P. He didn't lift the man on his shoulder and teach him to walk. (2:44). This is where the misunderstanding causes a lot of problems. Now that you know that if a man could give from his soul, that's all Christ did, with the purity of intention he gave from his soul to the soul that did not want anything to do with his own P, ?? low stem or misconduct of his P. When the Christ gave from his soul he gave to bring balance with the soul in respect to his P, and that is where the body rose. Christ did this to himself, but nobody understood, He became excellent in understanding self-elevation. If one day I explain his work you'll hang yourself and flatten every Church on this planet. Maybe today it's time to start and that's why you are here to ask this question. When they put the Christ on the cross, understanding the P, and as I showed you the shape of the brain, and how the sphere of one part belongs to P, when they (He ??) took from his P to elevate his own soul that repaired the P damage, He walked out of Jerusalem in a P life, He understood that Man can't understand the message

He has. (2:46). He never went back to Jerusalem. This is what is not written in the books of the history of Christianity, that's why you are waiting for his resurrection and He disappeared. He didn't disappear but He understood the connection btn the E and His soul and through the elevation of His soul through the P was ?? beat gave enough from its own P to elevate His soul and repaired his P and walked out of Jerusalem. There was no resurrection. He understand exactly the question you're asking. You do it in small ways, you (can't walk) and you walk, today you have cancer and tomorrow you don't have. Or if you don't now we elevate with the power of the soul to receive it and then you walk away from it, because we give and take, but it is not as natural as you do yourself. There was never resurrection. He went to take from the P of himself which was on the cross, which was no use for it, instead of waiting for it to decay he took from it to elevate His own soul. he left Jerusalem and never mentioned his own name. (2:48). Because He understood that Man can never understand the message of God, and he knew the punishment was for what he did wrong and He never repeated it. He lived out his life as a common man and died natural death. You'll find the remains of Christ in South of France. With the knowledge you have you can do what Christ did if you are sincere enough and understand the weakness in your structure, that you can take from your P to elevate your own soul and then repair the P, this is what I did with my own cancer and broken bones. The rest, the Pads and all is a magic show because this is what you understand. You asked the question, understand the implication and fid the replication. When the pain is so much you detach yourself from it and you get ILS, Christ understood this but he used this in a rapid way to heal himself. He healed the P using the E and soul. (2:50). He said it in one sentence, God forgive them they know not what they are doing. When he forgave it means He received, and in that receiving He elevated the P to the E and to the soul of the man and He walked off. He never disappeared nor resurrected. You have to learn to do this in deep space because there are no doctors to help you. This is my philosophy, the last man standing. Christ was the last man who stood for his correct conduct in the belief of the messenger of the ??? (2:51). And He received. The symbol of the last man standing is the replication of the Creator, you can't do wrong to no one nor to yourself. You can't take unless you are given to have. You don't understand and worried what to do when no medicine, because when you get to that stage He was the last man standing of the cross and there was no one to help, He found His own salvation by understanding what He did to the man who was dead (He raised), because He knew He elevated the soul, He could ask fro elevation, but He knew His misconduct. So knowing He knew He could take from His P at the point of the strength and used it to elevate His soul and He never again did misconduct and walked away from Jerusalem. The rest is made up to catch money from the rest of you and imprison your souls. Ask yourself a simple question, if a man could raise another from the dead couldn't he do the same for himself with the knowledge he had. Yes He did, He had a child and wanted to be the father to the child. He forgave the Humanity for what He could not deliver to them to educate them further. That was His forgiveness. (2:53). [That is a lot to take in]. Christ never died on the cross, He elevated himself. I have done that 3 times and the people around me know, I talk about it openly and I teach it openly, but you have to understand. The structure is to understand oneself and the connection btn oneself and the rest. I am here on a holiday, I have chosen a 78 year gap, and during the holiday I teach. You call me the Messenger. I am Messiah as much as you're, but I am Messiah for a bigger (picture) you are for a

smaller. You are a messiah to your own soul, and if you can teach you become a messiah to the others when you can give them the freedom of their soul. The problem with me is that I know how to handle the Totality, the problem with you is to first learn how to handle yourself then you can handle the totality. I made Man in the image of Myself, which means once I understand myself I understand the Totality. This is the problem and what you have understand, ask yourself ... it requires a lot of detachment from ... (2:55). you have made false promises ... I put to Christ many times, how come you did not show what you showed to the others, how come you resurrected a man but not yourself. the answer is simple, forgive them for they don't understand what they are doing. When you understand the process, then you understand it is the same across the U, has no exception. The Pope will burn me down in everyway possible now that people know the truth. I am not afraid, they can come in shape of Masons, Knights of Malta, Popes and Ayatollahs. We see the truth and shall prevail, because we are part of you and you are part of us. Enlightenment comes from giving and not taking, and we give freely. Understand the process and how simple (easily) Christ walked away from the cross. I repeat for the third time so it won't be denied. If He could give life to a dead man couldn't he do that for himself. (2:57). Instead of what happened to Moses which he learned by going ?? for what they did to him. He knew what Moses did was wrong. He chose a path I deliver my message (I will deliver whereas Moses failed), I am just a postman. If you want to find the blood of Christ look in the south of France. He became a common man and those who knew his teaching were touched by it. Ask yourself where many people do the long walk (pilgrimage road), between France and Spain, why there, this is the path of Christ. He walked amongst people knowing he had done his job. I live the same life. Ask the Iranian authorities, they offered me the palace of Shah in Iran, I said no. We live amongst people not to be separate and different. (2:59).

(3:08). You have to understand the operation of your soul and the weakness of P, then you can promote your own soul and with it the soul of others. Would you like to put your finger on the table and chop it with a sword, why do you do it with the P of another man. We are here not to prove but to elevate. I can keep a lot of this knowledge behind and patent it and open companies. Once he gets attached to the world of P. Many people say he (Keshe) is gathering wealth, you heard yesterday we opened our wealth to the government of Italy. We are detached from P. We live in the palaces of the U, but you are happy with the palaces of the dump of this planet. (3:10). Read the writings of the Christ in the essence of his E and connection to his soul. If you want to find out more about the operation of the soul ... read Bahal ... It is written for the soul, that's why it is hidden, ... what is to come .. the elevation of the soul of man into the U Community. The only transition book we have btn the man and the next development is the hidden work. Read it in the understanding of the work and elevation of the soul. The message of God has been with you for a long time, nearly more then 200 years. (3:12). It's the same message give by Christ and Moses but he lost his way, went back to the P of man and has no status. Buddha understood more but he could not connect. Mohammad lost his way not by his own but by his followers. Pleasing the followers brought him the demise of himself. Moses pleased himself. Christianity the way it is now did not exist and it was never the intention of Christ. Understand your own soul the way you receive it, don't look for it in vegetation or the sea fish (? as a Gans), understand your own then you have the

ability to convert. In Wikipedia, the parathyroid gland, understand the operation of the conversion of the matter into the matters you need, ?? part of your Parathyroid is for the elevation of your soul and its E, it's the conversion, it's the only organ in your life that connects the E to, and it's responsible for the conversion of the matter state, Ph to Ca etc, metals to the others, man has never understood its work. (3:14). ?? Is the electron in the nucleus of the Pl in the center brain, and when it's misplaced misconduct appears. Understand how and why, don't look to the vegetation or the food, we have to guard, because you are P involved you have to have something to see, but it sits within and inside you. This is the beauty of it, if you understand the work of your own P and the connection btn it and your E, and the interaction btn P and where doesn't need the E to interact with its soul, you have managed to understand the secret of the work of the Christ on the Cross, for 2,000 years the man has not understood how the man walks off the cross and that's why they made a mystery out of it, because nobody could do this, since he is gone we can make (write) whatever we want. His disciples watched him healing himself until everything was healed. (3:16). In the process of crucifixion it's the weight of your body pulling you down that tears the organs apart and you die. Separation of the P tearing apart from the E, he could manage to hold it because he knew he had the strength through his E. It took him very short time to replenish because He tapped into U Energy to receive what he could not receive from the food. I can go step by step from the time He received the first nail to the time he landed in France. He lived as a common man amongst common people, and never wanted to be known. He saw the betrayal by His own disciples and the abuse of the people who ?? but He knew what He did wrong that He received this condition, the crucifixion was for His soul to be elevated to understand His P misconduct. And I have said many times not in my time or under my watch, I will never go on the Cross. The Cross is not there for the P of it, it is there for you to become the judge of your own conduct. Does Theology exist within the structure of the Pl, or is Pl the conduct of the Theology of existence? Yes. (3:18). I got that one thank you. Rosy of China wants to ask about the New Hybrid. We are organizing one teaching for the Chinese through Professor Zhu. You got a lot confused about a lot of things it needs direct translation. In the next couple days. You are approaching manufacturing the Energy S in a different way then the rest of the world as I see it. I have seen S vibrating too much, S made with not the right intention, others not understood the interaction of the generators. A special teaching just for the Chinese. I have seen some misconnections and genius things. (3:21). This is an interim (? will be out dated soon) that you can understand a little bit more, in coming time we develop very small S. We have shown the solid State S, and ??? .. there is a need for all of you to understand the Pl and the vibration of the Pl and none of you will succeed unless you understand this. (3:23). You come in from a vibration, from the electricity of the pump from the Grid, you come in through the Pl and go into the Capacitors, through the Stacker, then you go back to the pumps which is P, and this clicking of the two is your problem. And then you want to take matter state from it. It doesn't link up, you see it is not running, but you don't understand where the problem is. Hints, separate the 2 sides and then when it connects as one, ?? but they still go the old way. But that is the Hybrid one. (3:24). Do you understand the structure of the compressor internally, or you just put it there? I solved this in first meeting, I put the work of the compressor as a generator to the Stacker Unit, if you're not versed in the Pl, you are still looking for the generators. When Bernie

showed you the loop. Do you see the checked floor, black and white? Understand the history of where that came from. ... The black encircles the white and visa versa, this is remnant of the Masons. Armand will show what he has done, he is still missing a piece. It means a lot of you have not understood the 2 compressors. (3:29). Armand shows his camera. He has configured 2 KF Magravs and a Stacker, and 4 Capacitors. the 2 MaGrav's are connected M to G, (need to go over in details the connections), and he has Split Capacitors, and connected to a motor. I just want you to see we don't need the compressors. The compressor motors one became a generator for another generator. (3:32). If you understand your Stacker is not very far from a generator, there is a change btn the motor, generator, and transformer. if you connect your Stacker Units in a correct way, 22

(3:43). Renan's version of the generator, 3 double coils and 12 Capacitors 1 set regular, 1 set split 18 and 9 ?, and 1 set split 9 and 9. It is not finished so leave it at that for now. It's a MaGrav Unit with Capacitors, there are hidden things in here we will explain later. This is all that is needed to produce 3 to 5 to 10 kw. No more and you can miniaturize it into a laptop or make it bigger, it doesn't matter, what does is how you transfer energy. We will explain in future how we build these special Capacitors that you have never seen before. It only took Bernie a few minutes to put them together, it's a new development in Capacitors. I wonder how many of you will share with us what you have done? (3:46). We are testing Capacitors in such a way that they give 1,000 plus watts. Please don't pressure the Innovation Center for leaks in the knowledge, go to the help line. We will release at the right time. (3:49). Bernie shows the cores that empty in center, but only show for now. (it's very hard to see) but the core came off the motor and they said half of the inner cores water was gone but the outer core remained full. The inner core emptying itself is the same generation of the fields before. (3:52). If you understood the picture with the rotating cores then why do you need the MaGrav generator unit? Or do they become the structure of the frame for extraction of the field in the matter state vibration of electrons, then the process becomes a conversion S your Stacker is a converter of Pl into matter state level, and if you know how to do it you find a potential balance in respect to the matter and Pl state and then you can drain what you like. In Armands setup when we get to matter state we can drain as much as we like. These coils can easily give you 1 Megawatt, because we are working on the Pl transfer on the N layers, which is totally resistance free, superconductor. To the Chinese inside the compressors are generators. (3:54). If you understand how the windings of the generators are it takes a few seconds to convert the knowledge instead of that big box to a coil. ... the number of wires and connections ?? from each other. By connecting in a right way you get rid of the.. (interrupted). He draws a blue circle around coil #1 (hybrid blueprint) and a green circle around #2 and #3, the blue is the stacker and the green is your generator (for the Chinese). 3 becomes A and 2 becomes B, you don't need the compressors. because the compressor was used only as another version of the coils. We think we have managed to eliminate the starter unit also. ... we may go straight to 15,000 volts in future I will explain. (3:56).

(3:57). tells to be slow
(4:00). Armand show a single coil with rotating center core that's all you need.

(4:06). German man's son got autism from the vaccination of Measles, Mumps, and Rubella, and anybody who has stood against it has been killed or imprisoned or told they are demented. The damage caused by mercury in the injection. Try feeding your son 3 spoons of Gans water of ZnO2 CO2 for about a month and let us know. You have to wash out the mercury and balance the positioning, use straw to breath through ZnO2 and CO2. 08 40

(4:21). This is Paul of Togo understanding in this presentation of an Health unit D7. It's kind of a mix btn African and Indian Chakra and energy systems. (4:35). Keshe says this is not going in the direction of what we wanted to teach, you are stating a lot of things as you have gathered with it (your understanding), I don't know where you are going with this. Paul says we are just giving this as background to allow people to understand first, then we will discuss according to Pl T. (4:37). Starts talking about Gans and Alpha units. First is Pineal glands, 2 ways giving and taking, one side CO2, CH3, ZnO2, the other side CuO, CaO and Mg + D3. Keshe says he sees things that are not correct and asks him to stop. (4:39). There are things here that are not fully understood with our work. (4:43). Chinese shows a box with Capacitors to replace compressors. (4:44). Question asking Keshe what is the barrier in my soul that keeps me from reaching the point you have reached. I don't know. Is it my diet, my understanding, what? In so many ways its the understanding of your own operation of your existence. She asks about Bahala's book translation into English, what are the meaning of some of his passages. (4:46). For those who don't know about the history of the religions. For example, the writings of Moses was written years afterward and was what they could understand. Same with Christ it was written years after, even though we have testimonials from disciples and then it is fitted the way it is. Mohammad had some of his work written 40 years after his time. Bahala is the only one who has written and himself corrected his message, so it's the first time we have hands on writing from what we call the prophet of God. There is some credibility in that way it is not tinted with other peoples saying. ?? ... there is one part of his writing that goes into the connection to the soul, and it is called hidden, because the soul is hidden from his P, that's what hidden works means. If you understand then it is no longer hidden and you can read it in the language of the soul. I never promote any of the religions but I do the acts and behavior as a prophet, by the man who made a decision which way to go. (4:48). You have to read the writing in the behavior of the soul. The only part which is the elevation of the soul to understand the coming of the Messiah. I can go verse by verse, but it hasn't got, even the Bahai's don't understand it, they memorize it without understanding it. If you understand it from the soul, a lot of understanding is given in what is to come, how you can connect and what is in there (he's not being very clear ?), it is not to do with the P life, much of it is meaningless to the P life. We don't have that kind of detailed writings from nay messengers of the past. It's all that has been said at latter time. And what was said and changed to fit some people. ... I read the Torah as child and couldn't understand a lot of it, what was the reason for what was said or was it changed to suit some (people). (4:50). This is the problem, I mention this because it brings the understanding of the soul to oneself, it is not for anybody else. It's the first time you have to understand the station of your own soul, and to reach that point. I don't agree with a lot of writing of Bahala

because it is written in a way that fits the time it was written 200 years ago and not the present time. I don't agree with a lot Mohammad but we respect the station of their soul as a prophet. 50

135th Knowledge Seekers Workshop Sept 1 2016
(Discusses uses of the Gans Water, rinse mouth to stop tooth decay, use for viruses, Armand gave secret to Arizona they show 70% with 2 MaGrav, Asthma, Plasmatic and Gans First Aid Kits,)

(:06). Rome Conference is full, walk-in people have to register in a couple of days. The meeting in Rome is not KF Meeting, it is the Universal Council Meeting it covers what we presently know as the work of the United Nations. The pitfalls of the UN is grouping against each other and grouping together, the biggest pitfall is that the US and UK have always carried through what they wanted to do, because of Common Wealth Countries which are ruled by the Queen of England and they always vote in line with UK and carry 35 to 40 % of the votes anyway. We have seen a lot of injustices in the work of the UN. The work of UC is not to solve or get involved in, it is based on language, but to promote peace to make life comfortable for Man to create the environment (:09). that there can be peaceful co-existence on this planet. The UC will start meeting on regular basis 4 to 5 times per year. It started in Dubai, this is the second and in next few weeks we announce the next meeting. We are looking for a nation where we can establish a permanent KF for that nation. There are 2 possible islands, which allows them to meet whenever they need. I have no position in the UC so I don't need to attend. We are not going there to see something or carry a vote, we go to discuss and come up with peaceful solution. We serve with our soul, not to carry votes etc. The people can come and say what they wish and their wish becomes their command. All Members support the wish of the UC then they are more effective. (:12). You are not used to this but it works much better then putting rules and votes down, because it is acceptance of the soul of the Man. When Man enters space it will be much easier to understand and work with it. ... (:15). New trials with doctors and terminal Cancer patients without hope of recovery. .... (:20). The German government has asked its citizens to stockpile food and water, and this week Finland has announced the same. The governments in Europe expect that there can be a crisis. There is a high possibility. We think that most of Western Europe rely on the gas pipeline from Russia and if the situation in Ukraine gets worse the supply might get cut off. Produce as much Gans as you can CO_2, CH_3, CuO_2, and ZnO_2. CuO_2 can purify the water from rivers, etc. ZnO_2 for E concern. We see some new developments in the power generators, the Solid State is still under development, but at this time we will only release it to the Chinese government, to 4 groups and they have 24 hours to replicate it. (:24). Then is will be released to 6 places around the world. The reason we release to Chinese is because of our respect and the terms of our agreement. After the 6 places achieve a working unit then we will release on the Teachings. We asked people not to release information, but Armand released to Arizona, they replicated part of it and released part of it. This should not have taken place. They used a looping with MaGav's as solid state and have reduced energy consumption by 70%. They videoed it, you can apply it, but this

is not a generator, only a reducer. (:26). John Devern has copied the loop system. They used positive of one MaGrav to negative of the other and visa versa. (:30). Shows the VIDEO of it. The total load was 1160 watts plugged direct to the grid. plugged into the 2 MaGrav power reduces to 318 watts which is about 800 watt reduction. (:34). ... you will see the flight S coming from the same setup. (:36). In coming time we will introduce S where you don't need MaGrav's. 36

(:44). Vivek talks about Zicker Virus in Indonesia, Singapore.

(:52). Using CO2 instead of antivirus injections.
(:57). Rinse your mouth with CO2 Gans water instead of toothpaste and you can swallow it. In space we can't come back for root canal, but we can stop tooth decay, broken teeth we can't fix. I became the biggest enemy of Dentists because I told about putting a block of cheese in your mouth before bed, they know it works. For dogs with teeth problems add cheese to diet or LP CO2, and the tooth decay will disappear. (:59). Toothpaste is a big cause of disease and cancer in the body, you deplete the body by giving it the signal of lots of sugar and chemicals coming then spit out, it produces storage and that becomes the center for cancer to develop. Understand the process, we are not fighting but balancing the field forces of the body. If you get an infection within the first 3 hours take 3 spoon of LP CO2, maybe a drop of CuO2 LP, repeat 2 to 3 times per day for 2 to 3 days. You will feel the fever drop immediately, the virus may still be there but you will discharge everything through by drinking the Gans water, according to TEPCO research. You wash the energy more and more out of your body. You see how you use the Gans water to clean, if your child has a fever wash their body from the knees down with Gans water of CO2 just rub it on it, you will see the energy balance in the circulation will bring a sudden temperature drop, it's rapid better then alcohol or water, but it is balanced so there is no shock to it. (1:01). These are a force in the world of science that has to be recognized, accepted and followed. We are not here to go against anyone but to offer an alternative. If this alternative is more effective, then we have another solution on the table. This T has no side effect because it brings balance. If you understand the process that is used there is no danger. Start giving people with AIDS and HIV the water of CO2. We have seen huge damages with trials on the back of UN or UNICEF, it's not that they wanted to do bad but it happened. (1:05). A lot of their work is positive but where there is a gap in the science we can cover it. The reason I raised this is because we see Multinationals patenting viruses and huge sudden incomes for their systems and this has to stop. Now in Indonesia they are doing this with Zikar Virus, use the CO2 and wash their body with CO2 Gans. (1:07). The question on whether man has been to Space, because these viruses would wipe us out worse then any other viruses. Once we travel in deep Space and land on other planets in the U, it is inevitable that the energies are not in balance with us, interact with energies that are in balance with us and create what we call viruses. they might have only a few second survival time, but the energy transfer is so rapid, aggressive, and so heavy, that can lead to loss of life or transformation of a cell into another entity bigger and stronger, in these conditions you have maybe a few seconds, minutes or hours on the planetary conditions of earth (to react). In future we will not use Gans of CO2 but incubators that only carry the fields of CO2, called CO2 Boxes. All you need to do is create the same conditions and put the man in side it. (1:09). This is

to force the new knowledge by its application. We don't fight anybody, we just introduce the new parameters, there is no match with the current S. The "Silent Change" is the biggest tool we have. Caroline picked up a bad virus 48 hours ago, had high fever for 3 hours, Keshe said she should take some CO2 water, instantly she cooled down, and the temperature went from ?44 down in 5 minutes, but she still had to go through the change of the virus or the depletion of it in the body. (1:11) You repeat the dose until the virus depletes. For example if you have 100,000 virus cells in the body, and you take 1 does of Gans that depletes 20,000 then you have to continue taking until they all deplete, and you balance the body, there is no fighting, it's balancing the energies. Start treating AIDS with CO2. For some illnesses you need to inject the CO2 for rapid transfer as the digestive S is too slow. We would liek to test CO2 for snake bites, washing the bite with ZnO2 or small amount of CuO2, or injecting into the snake bite CO2. (1:15). Those bites that effect the neural S using 50/50 CO2 and ZnO2 to support neural S, take this inside body and rub CuO2 outside body. Combining the old and new, we can take the antibiotic with a small amount of CO2. We could achieve the same effect with 1 mg instead of 500 mg antibiotic by mixing it with CO2. They say not to take alcohol with antibiotic because the CH bond adds sugar and unbalances it. (1:19). If you take CH3 Gans and use a mixer to potentate it to the level of potatoes, then to carrot, then meat depending on how you mix. You have to test these, are you going to wait for the German government to say we have no more food. Better to test it now then wait for crisis. You can take CH3 and beat it using 1000 rpm and see what smell you get, see if it goes from carrot to meat. If you taste it in your mouth that means you have received the energy of it. People in Germany will have to rely on this. You can create the taste of water without actually drinking a single ml of water. (1:22). If you mixed water at a very high revolution, would you create a Pl of the water that your body being in touch with it receives what it needs, see if the hunger comes back. In the developing world stirring is the key to the freedom of the food. A lot of you have tested the cores but you never understood it. If with the fields you taste it, it is within the structure of it. In coming time when you use the core reactors a lot will change. Even your P control has no control. In Philippines we are testing a S that can effect the control of your body, which means the fields can interact and bring your E and connection. Renan says the E he felt when running this new S for 24 hours, in the morning he felt a G pull his left hand towards the reactor and right hand pulled to the left hand. He thinks the S interacted with his whole body and creating a loop. (1:25). He created the first Pl "handcuffs". Keshe says this is the development we see, the interaction with the body of the man. In case of infection do we need to drink CO2 or do we create a field of CO2 over a nation, village that no viruses work. My knowledge is so deep that I can change the mind of the whole humanity and we are getting to that point where we might have to do so. I have not taught you everything, but it is very easy to change within the structure every man's line of thinking. I have warned about this before and very recently I have said that I will apply it. (1:27). There is a knowledge within our capability that can reach the soul of every creature on this planet, fish dog or man. The change has to come in, because then you can change it again if you get the opportunity in space. It has to get accepted by the man that he gets judged by his own soul. The process of viruses has to be developed very rapidly. In the fall we train Mojhans, that we can neutralize the place we land that we can't pick up a virus. Vivek asks how we can use the CO2 as a mosquito repellent because it is spreading the virus. (1:29). Caroline mixes

CuO2, ZnO2 and CO2 and sprays it around the garden and seating areas, this changes the environment that they don't want to go there. You have to see how it is. We don't use pesticides anymore the time for killing is over, we just change the environment that they don't want to go there. If you get a burn, bruise or bite just wash it with CO2 and see how it works, instantly the pain and inflammation goes away. If you are Asthmatic make a pipe that I have shown. The background to Asthma is E which supplies the fields to the lungs which feeds the blood which is the E circulation. Coil a plastic tube filled with Gans Water 50/50 CO2 and ZnO2, around a breathing pipe and breath through it very slowly. Has to be heavy doses of Gans (depends on situation if you need stronger fields use the Gans straight). (1:33). and take 2 teaspoons of Gans water same mixture daily. The sanatorium is the planet itself but man has chosen to ignore it. You can do it simply, make patches of mixture and put on lungs. For people with water in lung use 2 huge patches of Mixture on front and back of lungs. (1:38). Man used CO2 water on hornets, after week they left. (1:41). Man with Bone Cancer cured with Health Coil walls. (1:43). People around world are using. We have a T that can influence soul of the Man, this allows us to disarm and make changes on the totality of the change. We can make the changes with external applications, but can make them from within the structure using the knowledge. Man will not remember why he is fighting. **We will find out in a very short time that Militaries will back away from war, understanding the advantages of peace**. And doctors will change their practice because they will become peaceful. Those of you who are afraid of loosing food or water with the warning from the German government and the other governments. There should be no fear if you understand the T. (1:46). Maybe our governments are allowing us to look at viable alternatives, and it is for us to make the T viable. .. **A lot of people will not receive because the expectation is not what they see**. The problem is how fast we can apply the T. We had a trial run with floods in China and Italian earthquake disaster. Start creating sufficient amount of materials (Gans, N coils etc.), that when these things come up we can move very fast. And if the disaster isn't in your time the Gans will last millions of years. (1:49). Paul of Togo has been applying Gans water in every level of his life, and on his family. They drink, wash bodies, clothes, and house and very quickly diseases go. His family is only drinking LP with mixture, they stop to feel hungry and became more and more E in contact with each other. (1:51). They decide to create a home where they are in contact with each other, they don't need to use cell phone to contact each other and they tested that they instantly receive message. And if the child thinks to do something bad she gets the message and stops. (1:55). He still hasn't got the results of the AIDS patient. Preliminary results the doctor wanted to know what she is using to treat herself, but Paul told her to say nothing, the doctor said it's impossible because he knows the advanced stage of AIDS that she is in. The AIDS was almost gone. (1:58). Keshe asks him to give formula of what she is taking so they can replicate. He gave her CO2 LP, and she drinks only water of LP CO2, cooking and drinking, and bathing and washing of house. The first week she felt very tired and her urination became dark yellow and specks of blood (fever and tired). (2:02). Keshe explains the reason is the worse you feel in the beginning the more effective the treatment (healing reaction). (2:08). Paul continues ... Keshe signed the paper for Paul to be in Rome as member of UC. (2:12). After the disease changes and E stabilize he uses, ... uses ZnO2, CuO2, CH3, CO2 mixed together as LP in equal amounts that's 25% each. (2:16). For the very first 2 weeks he used only CO2 LP. Go

over the healing reactions. (2:20). He made a Gans of egg to get Ca, with NaOH for 7 days. yes it is most natural ways to get Calcium Gans. If you have your own tooth then the Ca matches your body, carries your fingerprint. (2:22).

(2:35).
(2:45).
(2:51). He offered to Italian government his factory output, they responded by saying, what do we do with this, we don't understand it. Rick shows a document called "Plasmatic First Aid" for emergency treatment. Those of you who have neural damage from war zones promoting your ideology, like American soldiers, try to use the Gans of CO2 LP on your body spray it on your body on a regular basis, the pain will disappear and the deformities also. Even if you have been in an accident and have all sorts of pain, if it's too strong add some ZnO2 and it will alleviate your pain very rapidly. (2:54). because the pain is not there you might find the growth of an organ or what you have been looking for. Klaus made the chart and will put on the Blueprint page. It's a preliminary. (2:58). For people with amputations you can make ZnO2, CO2, CaO2, and CH3, and keep a Patch there and we would like to know of we can start regeneration of a limb. We did it with a N plate but I think the Gans state of matter, a LP of it should be much more effective. The question is whether or not there is a certain time limit on it that it can still be re-grown, but in reality this can be done. These things take months, put at the end of it a bag with these LP's. I have done it (with N plates) but I think it will grow faster with Gans LP. (3:00). Rick shows the blue box Gans First Aid Kit, it's very inexpensive and educates people rather then just giving them Gans. (3:06). Gans Capsules on Website for trials of Gans. Keshe is using the drops and his vision improved then he stopped using it and the vision deteriorated and now he is using it again and the vision is improving, it works. (3:08). Teaches about neural damage, and problems on face, and amputations. He draws an amputation, you have to extend the Patch beyond the cut line, because the bodies information stops there. The muscle tissues grow there and you get a lump of meat there. Extend the Patches about 10 cm above cut into where the bone is in perfect shape. If there is any metal from the operation then you can't use this, but report any changes in feeling at the point where the lump of flesh is.

(3:15). Lady wants clarification, she says LP is a few drops of Gans water in distilled water and stirred with a N coated stirrer, and is more powerful, and when to use Gans water. Keshe says it will carry the same info, or Pl condition. Rick asks if that is the correct definition? It depends what you stir it into, by changing the field strength you change matter to matter. Test it then you'll understand how much the stirring effects the potency. You can test it with a Chili and stir it, the odor will be so strong, then take a drop of that and put it in another water, stir and see if you get the same taste and odor back again, then you'll understand. You homogenize the strength of the Pl at a given strength. This is what i am trying to achieve with our flight people and they don't get it. (3:17). The stirring is bringing what level of MG field strength you want to manifest. We have come to an agreement with the Chinese that 4 Systems will be tested by them to deliver the Energy Units. (3:19). Last October we made an agreement with the governments of "Energy for peace" and now we are coming to fulfillment. We give it to the Chinese government so their Army will become part of the Peace Process as a whole.

We negotiate the same with the Americans and the rest. (3:21). The Chinese Fan Zhi shows their generators. (3:31). He is replicating Douglas S but it doesn't start. The problem is the Compressors as we explained last week, they have generator windings in them and they block the Pl. (3:34). Bernie explains the 3 wires of the Compressors ... (3:38). The problem is that the Compressors drop to 110 volts and so it doesn't come in. (3:44). (3:48). In the new S we don't use Compressors. John in Arizona showed without Compressors, but where does that 70% come from, it is the MaGrav Units that produce the 70%, you over look it. And where is the 30%, you have to look at what is behind the wall where the outlet is, it is going into the Grid, check the meters. In Germany they get billed once a year, and when it came in 18 kwh was reduced to 4. kwh. You don't see it on your meters but the reduction is seen on the Grid, nearly 75% reduction plus. I don't agreed what is shown by John, the energy reduction is at the Grid or Power Company. The MaGrav takes energy from its environment, and one becomes the generator to the other. It doesn't matter how perfect we make the MaGrav in production there is always one weaker then the other, so one becomes a generator to the other, and in that process you are tapping into the energy from it (?), while one goes to supply the other you tap the out coming energy. Nothing is without a source, it's understanding why we loop them to get 70%, . (3:52). It's because one of the Compressors act as a capacitor, for the time to create the capacitates to be charged, it means one is lower then the other and by the time the other side tries to feed it, it takes over, so it's a continuous tic tack between the two, flow you drain from it. the term free energy is meaningless, the energy comes from somewhere. One of the Compressors acts as a capacitor and lacks (energy) and needs to be charged by the other, it tries to feed it, it's like a feed trough btn A and B and at every stop you take one pallet off the truck, it comes back to B and gets filled up and on the way back it takes some more pallets out of it, so that is where the energy comes from. It's the availability of the energy from the Gans that comes into operation, when you plug it in it goes from 1200 to 360 watts, where is it coming from, not from fresh air, it comes from the MaGrav S in the way they are structured trying to feed each other and you collect the energy from it, and the load sits at that point, they are taking load at the junction of the 2 transformation. (3:54). .. in this S as you go from positive to negative, in the flow btn the Compressors you tap into the energy of one feeding the other, this tapping is what is power the output load, then when Compressor B tries to feed A you take some more energy to power the load. It doesn't come as a reduction, the reduction is the (energy) flowing out of the MaGrav to feed the weaker. Here the Compressors become generators on switch time, (Douglas's) Compressor A actually has a generator inside the winding, so in fact it is exactly like what you see in the MaGrav Units, that's why we changed it to MaGrav. But this is not our problem, the problem is the starter motor (upper left corner of blueprint) (3:56). The problem is once you connect it, or start it, that it feedbacks onto itself and becomes self-sufficient. Now we don't use that starter motor anymore, no more dynamic Systems, (motor and compressors), these are all gone. we have replaced them with static S (MaGrav's) so the possibility of motor failure doesn't exist. Compressor A had a generator winding in it and B became its capacitor, one generates and with the delay feeds the other and you tap into (that feeding). (3:58). Now we replaced it with the MaGrav units. However, now in the Innovation Center we don't even use 2 Stacker Units, we brought the whole work into only one. In Washington is collapsed because the compressor could match with the capacitor ?? and build it up. This

is the same problem in China. In the next few days we will have a S which is solid state. (4:00). Man from Brazil asks about using a little lower pump, is it enough to start the S? You need 110 volts coming out of S, it's the winding in the motor that dictates your output, and speed of rotation. The fish tank pump needs to be 110 volt output. (4:03). ... (4:06). (4:08). Chinese show Oasis System, he has to go to 10,000 rpm. (4:11). When the S comes close to lift the camera doesn't' record because it's a dimension that it can't pick it up. (4;14). you can't have any wobbling of the reactor of the fields drain off. When you switch to Pl to run motors you get totally different results. (4:16). You can't kill with this T, no heal, yes but you have to get it right. (4:18). You need to reach btn 5 to 10,000 rpm with motor. Question about starting the Hybrid with the Grid and then unplug it? You are very correct, after you get it running you can take the fuse out so it disconnects from the Grid, this is our philosophy. Soon we will show you that we run the first house with the generator. (4:21). He replicated Bernie's 3 core pl reactor, but how to make it function. You build the reverse of the reactor and connect it to the appliance, you create a loop with a receiver. The receiver should be the size of a peanut and you receive what you need, and because you are always weaker you continuously get a supply from the center. This is the backbone of wireless energy transfer. We let the hybrid come in, but this is where we are headed. The philosophy behind it is that the MG field is always in balance, so you are always on the weaker end (the receiver), if M is higher then G is lower, and visa versa. In that process you are always standing weaker to take from both. In Pl we go by mass, not in weight mass. (4:23). So you are always a receiver. Tesla did this and nobody understood, but he used ONLY M fields, here you have both M and G so your power source is constantly the same. This is zero point of reference (point btn Unit and receiver), you literally need only ONE MAGRAV to supply the whole country. One satellite and you can supply everything that is needed. This is a wireless energy transfer. If we release this now nobody has it. When Bernie says 34 meters (radius of field) the energy is constant at any point where one M is higher then the G, but in the interaction with the fields the energy transfer decides, as it gets weaker and weaker it provides more and more. This is the beginning of the wireless transfer, all you need is to get it connected and as it gets weaker the source provides more to create the balance. Then you need the S for balance. It's like with the telephone company you have a satellite dish on your roof to receive the information, now we have one to receive the energy and you don't need the MaGrav unit in the house. (4:25). This is how stars receive energy from the center of their U. I said I explain when the intelligence is there to understand. It's like I said this morning we can put one S to stop viruses in one village, or country, or one planet it's all the same. Caroline asks about the cold winter, CO2 Gans doesn't freeze, it depends on how pure the material is, but yes. Can people prevent frostbite by drinking or having Gans? It depends, yes. If they can't make Gans, can we offer orange or lemon (peel) oil does that have the same effect? No, it doesn't work that way, partially it does, but it's still in matter state. If they can't make perfect Gans. The only thing they need is Gans, if you wear socks with CO2 Gans in it, it should not get frostbite because it balances the energy. The powder should more or less do. Next week is the U Council in Rome. end.

(:10). (:13). Peter tested the gold, the result is a composite. It turned out that his "gold" Gans turned green after some weeks so it probably was copper. they found a steel and Al alloy in the sample. (:20). Keshe explains the results, any matter state that is there has its position. In the book we published on the first Gans's we saw 14 different elements on 1 Gans, in another 22, but we never had 22 elements but what it shows itself as ... the S produces fields that replicate materials and then it converts itself into it according to what is present in the spectrum, this what happens in the space. The energy is released by the sun and interaction with the rest of the Pl in Galaxy, when it reaches a certain point strength, and there is a match for it, it manifests itself as that matter, this is how matters are created on earth. It's not that the theory is false, what happened is the Pl at a given strength and then when it finds its matter state it converts into. (:22). This is what happened when we did the first tests with the Raman Spectroscopy in Gant University in Belgium, there were materials they thought were exotic. ... when we see a composition it's whatever is in that environment, the motor, the Gans, all components in the matter state create a field with the interaction with the Pl of the 2 cores creates and releases that matter state. It's shows how we can make materials in the space. (:24). He draws 2 motors rotating as dynamic Gans and they create a spectrum of fields, and in these fields we put a balance System, gold or whatever it was made of. All the elements in this structure have a say in what is to be produced in this environment. You have M from one side crossing over to the G of the other side and visa versa, creating a field environment. Whatever elements you have in the motors have their own MG field and for example on the left side those elements have a say in the zone of fields on its side where they will be converted to that matter. (:26). Matter itself is still a Pl and its fields interact to create whatever matter is to be collected btn them. We can create mono-fields, then we create the dictation of the system. This is the next generation of the MG field Power Supply. Bernie created a wireless at 35 meters, but scientifically we know they can go in the thousands of km. The fields are radiated continuously at the full spectrum. When they put these units in the car not only their own cars but others within the field range also get effected and rev up. This means we have broke through to confirm the new energy source, this is the new oil well, source of energy. It's now up to you to develop systems that can tap into these fields. Close to the source you produce Plutonium farthest away H. (:30). Renan explains the bottles of Gans reactors, other cars are effected. The gas mileage increased to additional 30 km. (:34). You have the bottles with the 3 different Gans and mixtures, Pl which is the strongest tries to feed the weakest, at that point we have to make a connection to the center of Pl so that it tries to feed it. ... make a S with a very small amount of Lead, ?? in that process you have established the traffic. (:39). What is important is to find processes to convert the fields at any point. This is the new WIRELESS Power, the Pl source is static and constant, this is the beginning of the breakthrough for production of materials and energy. Peter's S was 2 cores, this is a single source Pl core and then you either use a dynamic or static receiver to convert the fields. (:41). Tesla understood this but he only worked on the field and not the Pl, on the M and not the G. The Pl knowledge has increased, like what Peter did, it is the fields of the Gans or the matter that interact with the reactor to produce that matter. ... (:48). Tritium in the reactors can produce any material in the U, you don't need to go to Plutonium. in Pl the more you use the M the deeper you go into G. You can also use Deuterium or H which is the matter state of it. Deuterium is the N state of the H, H 1 is

the matter state of it, but you have to understand in which environment you want to apply it, when you go into Deuterium level of H you go in the Pl level. You don't need to look for heavy elements, but rather on how the interaction works so you can stripe more out of the G side of D, or take down to H on the M side. This is what the new T is about, this is what IS in the U. Energy transfers in the U on the level of monatomic principle which is N. In N in the division of the division becomes H, then Deuterium and then Tritium. (:51). You don't need to look any further, the 3 states of H (matter), Deuterium (N), Tritium (Pl), this is how the U was created. This is how the division of the division has lead to the division of the reality of the creation. And one moves as an electron as a collector. You have to understand in your reactors, do not get mixed in the matter state with the Pl, but understand the evolution and revolution of the Pl. Remember that G increases where M increases, where you put Lead inside you increase the G, so you go to the heavier materials, when you use CH3 or H you go the other way. This is the process that you can create every element out of a Pl. It depends on the condition of the environment which section of these fields it extracts, and what material will manifest itself at the point. This is how Universes themselves are created, the structure of life. The present nuclear physics is nothing but fallacy. (:53). In the U you can produce whatever you need because the fields of that mater exist in that point, it is you who have to create the conditions for it to manifest itself. This is how Stars, Galaxies appear, the moons and planets, this is how life appears, we are a repetition of the same process. .... In peters reactors, it's the weight of the fields of the earth that pull the matter down to manifest. This is how O and H are created in the upper atmosphere as a Pl and then as they move down by the G pull of the earth they become matter states that we breath, becomes the fertilizers, gold and everything else. We have found 2 sources of energy, one is the Gans rotating, or the more complicated one with the Pl Unit Supply, (bottles of Gans and coils). Now the race is not to have a generator but to have the capability to produce whatever you need. (:56). If you want to produce what you call energy, you have the flow ... you put 1 gram of Lead in center of source and 1000th of a gram in the receiver, so you create an umbilical cord interaction with the source. At the source you went from matter to N to Gans to fields, at the receiver you want to create the reverse of the source, so you have a Gans and then you need a N environment around it, then on the matter side you take your charge, a battery, this is how the battery works, you connect the inside to the outside, the body to the center, this is where you get the charges. One Megawatt possible, but you have to find a way to convert it to what you need. Do you want to make H matter or electricity. (:58). You have to decide how to put the strength into the receiver and how to move the field forward in the spectrum of the MG field. ?? change the mass of the Lead in the receiver, and create the traffic forward .. remember balanced fields create nothing, because the flow is very weak. Those who had problems with the Hybrid generator is because you bought 2 pumps of the same strength so there is no flow. When the 2 different S try to balance each other you tap into the energy they create, one on the G end and other on the M end. A lot of you made the same mistake that you tapped twice the same line (M or G), you need to tap one on M and other G. The same thing goes on the Pl Systems. You should be looking for Megawatts, you need to understand this process to enter into the world of Pl T and U motion. Because electron vibration is too weak, if you want to move toward or away from the planet. You dictate it by the fields which your S emits or absorbs from its environment or destination point. (1:00). This is

how you create motion, for instance this is Moon and this is your S, the Moon is so much heavier, do you want to go to the Moon or move away from it? If you increase your M you get pulled by the Moons G, you want to move away play the reverse. there is no difference btn this or producing matter in any state. My advice to Chinese, you understand how to paralyze ship movement in South China Sea, if you want to move them away. ?? ... we have given you 2 sources to start using. (1:04). You don't need to have coils on the motor, you need to create a dynamic field that give a center reactor of need according to what you do. Why we brought Douglas into the Innovation Center, he showed those Gans rising and falling, this is the backbone of the space T without him even understanding it. All you need to do is make it horizontal and use 2 of them each going counter to the other. the rising and falling of the fields will give you a reactor without boundary and the beginning of the creation of the neutron, then according to the environment that you have it manifests itself as a matter state. I told Innovation to get 2 ring tubes and find out which combination of the 2 you start creating motion of the fields and you'll start seeing the creation of the reactors (in the center), and this creation because it is out of the motion of the fields will be dynamic, in motion. This is how stars and u are created. (1:06). This is how when a neutron splits and becomes an electron and proton, and without any motors they rotate. The field interaction (with the source) and the interaction of the 2 gives P motion. .. Once you create the sphere in between the 2 reactors you create motion, ... field forces , you take charge. ... then they don't have any limitation. What happened when they lost the center ball or it went outside? It's because the fields inside match the outside and you transferred the matter state out but the fields remained in the center. It's the conversion of the fields into another position. The materials that you made the reactor with are also outside so you emptied it. (1:08). You can literally take the plastic covers (balls) out and the S will sustain itself. Now you can see S without motor. Two years ago people showed pictures of Gans rotating on the surface, this was the sign but nobody got it. If you would have made the same S below that one, they would have interacted (I Loop) and formed your reactor. You'll see new materials created because of the salinity in the boxes. You have been on the right track but you didn't understand it, so you went on a long trip around, but the trip brought a lot of knowledge. Now you can harvest the knowledge. You need ONLY ONE System in the city to feed the whole city, and from that one the fields spread across the city for everything you want. You need the H, C, the Mg for your muscles and Cu, you are fed from the U energy as you walk around. With Bernie's Systems put them up in the city and when the cars come into the fields they consume less and when they go out they go back to normal. If we load the S according to the food energy consumption we can feed the people. (1:11). Do we need Supermarkets, the people in the background know exactly what we are talking about according to our negotiations. You can add that everybody receives warmth according to their blood circulation, antibiotics, and creating of the waters. The reason I started with Peters analysis is because when I put it in the book everybody just looked , now you can see it with the Spectroscopy. The whole process moves away from generator and is really the field flow as we see in the U. The Principle source of U and the fields flow out from there, as it reduces in strength it becomes the Galaxy, and the Galaxy follows the same process and creates its stars. One thing the scientists haven't understood there are 2 ways stars are made, one is through the fields of the Galaxy, ad the other is without the Galaxy and they become on their own as a singular

entity, these are Universal Stars, but the majority of what we see are from Galaxies. They are different. (1:14). The U Stars always have one basic Tritium ??, and the Galaxy stars are in Deuterium conversion, and then when it goes to another level become matter state H. 16

(1:20). We have given you 2 sources of energy, it's up to you to make the receivers, in time we'll give you the receivers. Questions. Can auras be photographed and are they the persons Pl or M fields? We are a S, and our aura is the interaction of our fields in respect to the environment. You can keep the same aura and change environment and the colors will change. You can actually create a lot of energy out of your own aura. (1:24). If you make a receiver you could get every element in your body out of your aura, because they extract from the U Energy and they give back, you can actually create all the materials out of your body, inside your body. In Peru they have shown this. And Dr. Rodrigo and the dog with cancer caused by Fe, by applying Gans of Fe outside body of dog the tumor disappeared. We have seen the transformation of the matter in the Gans environment and this is how it will develop. We have 2 choices to keep only with the coils or to bring you out into (fields ??) then you see the rest. The T has to go from matter to N to Gans to field Plasma, and now that you reach the Pl you have a free run, you decide what to do with it. You have the clay to do with what you want. (1:26). Is there a specific part of the car that interacts or is it the whole car? As with Peter we have seen the whole structure. Look at the structure of the car, you have pistons generating high heat, like with the Chinese cooking high heat you create N material, food in the body becomes in the Gans state in the intestine, so fuel once it enters (the pistons ?) because of the high temperature becomes a Pl ... taps into the energy of what you add to it. ?? (1:28). You can run a car without any fuel if you learn to convert the Pl into P motion. The biggest problem man will have it to let the (steering) wheel go, understanding position is much bigger then the wheel. It goes back to the chariots and the Romans put the steel around it. Man can go to the dimension of the motion of the Pl. Breaking the tradition of thousands of years is very difficult. Zane asks if the brain is a hyper crystal how can we tap into the energy? Make yourself a Gans that absorbs that energy, it's very simple. Can it be done with the Gans of brain? Yes, if you can get a Gans of your own brain, very easy. Zane's pet wolf died and he turned the brains into a Gans. What! Are we going to the time of (grave robbing)? He was looking for free iodine. (1:32). Man has progressed according to the understanding of his environment, when there has been more balance in the ranking of the man. The Egyptians moved very rapidly in the knowledge until they separated the knowledge, in the ranking as long as each one understood the part they had to do. One of the fallacies is that the pyramids were made by slaves, actually they were made by one of the most fairest conditions ever, because the man at the top was paid more or less the same as the man who pushed the stones, because it was a thing to do for application for what was believed in unison. I understand this and I do my part, it was done not by slavery but by equality. When the (true) history of the book of the pyramids will be opened then you'll understand. This is the time like I said when we put the S across the cities and all the people receive everything. People will do the job because this is what I understand and it is there for me to do, "I like to do the gardening on the streets because I like the color of it, because I enjoy it so will the others, I don't need to get paid because I have everything I need and want." (1:34). This was tested in Iran 20 years ago, there were a lot of free

lands in the city because there was no finance to build, so the government allowed people to make gardens with the vacant land and they did, nobody paid them, it was for common good, and brought the community together. So if we don't need to worry about food, if I want a shirt I go to the factory and make it, the sweatshops should not exist. How do we finance the new S when everybody has what they want? The structure will start to be set up in the meeting in Rome, structures without boundaries, everybody works towards that end, it will be difficult to overcome because of our engrained patterns that we don't see in ourselves, but once we understand it we'll just fall for it because it is so beautiful to do it. We take what we need according to what will give us a pleasurable life. (1:39). Chinese show some coils. 2 coils connected like IL. But it's not working. This is obvious you need to create a flow, the 2 coils are made the same so you don't have any traffic flow of fields. It needs to be coated with different Gans, different loads across, this is a balanced situation you have no flow, when they are balanced where do you expect to tap into it. Fro example use Al in one of the center cores, the bigger one, you need to create a field flow to tap into. If you don't have different elevation in river it becomes a lake, static. (1:42). Every part of the structure has a purpose. Where you connect the load. (1:46). He said he used different ratio of mixed Gans, he thinks there should be some field flow. (1:47).

(2:04). Bernie shows the new Capacitors, about 5.5" N coated Cu center pin, N coated Al with Gans coating an no paper and the Al must be snug so you can move the rings from side to side, and 20 Cu rings spaced about .5 cm apart, the first ring on the right is connected to the center pin. The farther you go from the first ring the higher voltage you get. (2:06). When he put one probe of volt meter on center pin and slid the other along the rings he get a spike of voltage in the thousands. (2:08). Keshe says this is how you make materials, if you understand the position of the rings, you put your source on one end and the different rings will give different materials, for example btn these 2 rings Cu and those 2 Zn, so from the source the heavier elements are produced farther out as you amplify the power. These rings are the same source S as we explained ??, the common ground is in the middle across the rings. (2:10). Douglas explains the Capacitors, 8 gauge stranded Cu N coated, he used Al foil the thickness of pie tin, electrolytic gel he used with N particles that he saved from fire coating and cool water, along with CuO2 and distilled water. He found that the CuO2 doesn't work so good on Al, but he uses a composite Gans. Uses 18 turns of N wire around. (2:15). He shows the burnt capacitor that he used a composite Gans and Al it may have brought the gold on top of the wire. (2:18). Explains how he N coated wire with cold caustic and only cutting the ends and it N coated through the insulator it took 90 days to coat whole wire. (2:20). Keshe says this way is a Pl N coating and behaves differently then caustic N coating. Say caustic N coat is 1 to 100 then Pl N coating is 1 to 1 million, because it is created according to the field and not the matter state around it. If you learn to Pl N coat you'll find out your S behaves and conducts totally different. Pl coating is an essential part of the space T, the other coating do not create the right balance, it's very transparent, it's like a dust you can collect it. It's conductivity is Superconductive and it even can allow the Pl to lock into. (2:22). One way to Pl N coat is to put different wires btn two reactors and see which ones start getting N coated, because you have a field flow across the 2 S, and this kind of N coating you are looking for, it's superconductive. It doesn't give you a black, black coat but a

powder black coat. He draws the spacing of the different coats, fire is close, caustic a little apart, Pl is big gap between. Pl N coating is totally free and it behaves different. (2:24). He draws a Cu wire with N coat spacing, when you try to empty out the Cu one of the N particles is tightly attached to the Cu and the whole thing collapses. On the other hand Pl coating is dictated by the structure that is not attached to the Cu so if you heat up the Cu (current) it will melt away leaving true Nano tubes. This is what you have to develop into, the elements of the Cu separate themselves and become the Pl, and then the stick and hold on, this gives you different properties. The Pl N coatings happen in most of your capacitors. (2:26). If you didn't N coat the center pin, you'd find out the Al is in the state of Pl, not in the caustic level. Vernie shows photos of the Wireless Pl Unit and how it N coats wires, he attached one of the reactor wires to a roll of wire and it N coated within 10 days, no caustics or electricity applied. ??? In old KF work with Coke bottle we used the same process to N coat wires. (2:29). The maximum these wires have reached so far is 20 Mega ohms. The higher the resistive ohms the more you move into superconductivity, because you measure one across and one through. We tested these wires in Ghent University by putting high voltage across them and they don't break up. They brought all there equipment to try and melt the wire but they couldn't. The professor said this is impossible. The more power they used we could see the bright liquid Cu inside. Vernie tested a single thin N wire with 10 Amps and nothing happened. You don't work in the matter state but layers of superconductivity. You can touch it and it is cool, Vernie touched it and nothing, 20 to 30,000 volts. (2:33). Miguel shows his capacitors. (2:36). You have put the Energy source in the center and the coils around it, and the matter state magnets around it. Somewhere in there you have a lot of energy that you don't know how to tap into. The energy is there and very powerful. You can make these as small as the black balls and still you get the same energy. I use the graphite Gans, and crystals are growing on coils during drying. These crystals are from the salt, from the N process you haven't washed off, and the salt in the air, I have bucket full of this. The same as you create the MG fields of the C to create CO2, if the Gans is not washed properly, you leave an atom of Na, it will take hold and start absorbing fields, because it's in the Gans state, it will grab from outside itself and create more and more salt. A lot of people have seen this phenomenon, but in fact you created the MG fields of the salt, it acts like a magnet and attracts the salt from environment. You can dissolve it in the water. (2:43). Dr. Rodrigo explains his health Unit. Every coil has a Zn Pl battery. It's a very powerful. If i use it less then 3 times a day after a month some of the symptoms come back. I use it 1 hour 2 times per day. I used it on Diabetes, Neuropathy, etc. (2:49). (2:53). Keshe says they are starting trials with injecting Gans Water for terminal cancer. (2:56). Every lasting meadow battery, she put battery with CO2 Gans in box, and Fe AA, And 2 small N coils on the plus and minus terminals, and wrapped Al around the box. You never have to buy another battery. (3:01). Ask her to make a blueprint of it and put on website, have her come on next time, these are the housewives becoming Pl engineers. A question from people on how to bring people together in their city to create KF groups. (3:03). Teaching Packs will start coming out of Arizona for worldwide. They teach the teachers and it has created employment around the world. (3:09). We'll start selling 5 ml packs of dry powder Gans and you can put water to them to get Gans Water. The energy is not the same as liquid Gans in P behavior, but the energy is the same. We will make a

video how to convert it back to liquid. ?? (3:14). Shows a hybrid, you don't get much result because you are using 2 equal compressors.

(3:30). Talks about the attempt to assassinates him and killing of his son and wife. (3:33). The Jewish state has financed Muslims to attack Churches and priests in Europe. We have informed Vatican of this move, they are attempting to create mayhem. We have found all the companies which is financing this violence. We have asked the Moslems and Christians to join together to protect the Churches and priests. (3:38). (3:40). They will start on September 11, 2016. No Jewish person died in the 911 because they were warned ahead of time not to be there. Keshe comes from long line of Cohen family and his family had 2 offices on 2 floors of the twin towers, he was on line with his cousin's in NY and they said it's no problem we couldn't get to the office today, he thought it was very strange that only they knew not to be there. He saw the same thing in Northern Ireland, where the IRA was to bomb then suddenly the shops wouldn't move their goods, and we always predicted the bombings. There are 30 companies setup to finance these attacks. (3:45). (3:49). Keshe was in Iran and Hillary Clinton came to negotiate when there was an accident at the airport and she got brain damage. ... At the end of that month she withdrew from the Cabinet because she was brain damaged. (3:56). KF has gathered intelligence on these activities to help humanity. The UC meets on the 9th of the 9th, 2016 equals 9, to change humanity. The 10th is the beginning of humanity for the Council. The day has been chosen to begin. The moment we announced the planned attacks the chat rooms decreased by a large number in France and we know they know. All the details has been kept and released to security agencies. (4:02). (4:06). Webpage showing Hillary and negotiating with Iran in December 30, 2012, "the European Union Times", says, "Clinton injured and US Navy Seal killed in secret mission to Iran, ". The request by Obama on November 16 day of election for the USB stick and the start of Peace Negotiations with Iran. It takes a lot of courage to do these talks, the same now with the Chinese and Americans in South China Sea, technology for peace. We have kept all the hard copies of correspondence with US. .... end

137th Knowledge Seekers Workshop Sept 15 2016
(Report on Universal Council in Rome, Result in Peace talks US and Russia over Syria, Explosion of US Rocket, Hillary, All the Reactors built around the world only need to be connected by a small reactor and Zn for world peace, Hot Glue FIRE HAZARD, AIDS cure, Changes to Capacitors, Gans can't be dissolved in Acid it changes)

(:06). Sandi presents on Universal Council and the meeting in Rome. The visions expressed by members. The rocket that blew up recently was carrying technology to knock out nuclear capability of other countries. Next conference April 7, 2017, in Rome. (:24). Keshe comes on. (:26). We started UN after Second World War to stop te abuse, but over time we have seen the UN become the abuser and sanction certain wars, Iraq, Libya, etc, so it had to be stopped. UK carries around 40% of the votes pressurizing its Common Wealth members. So setting up the UC on language basis we have done away with borders. (:28). He talks about the rocket that was intended to use fields and communication to destroy nuclear warheads in Russia to force them to submit. Similar to

what was done in Hiroshima. We warned you in out talk in Washington and now we delivered, we will stop you, the UC is not yet mature enough to handle these situations we will do it until you are ready. (:36). Warning to China we gave you the same chance as US, you have abused our trust and we will respond, very direct. We support the joint use of T of Russian and Chinese forces in the South China Sea to show the Americans, but it must not be abused but used for peace. We will interfere to bring peace. As with the rocket no one was harmed, if there would have been a cat we would have removed it. We carry on with our plan, we have to be correct in making the way for peace. People who made lots of money by working out of their garage (? Apple), now they think they can finance and control nations. We will handle them one by one, and don't say it was an accident, we warned about the rocket in Washington. (:39).There shall be no more accidents. The next meeting will be held in Rome, because it is safe for us and we bring the ancient Rome into tack with the new science. As we go hand in hand with the science and the strength of the soul. Everyone has to go together science and belief, if you have the science you can see what is true, and this is what is needed when you travel in the depth of the space. We announced the first scientific conference in Ghana, it's to show and submit papers. (:41). Every quarter a scientific conference will be held across the world. We have to do this, because hundreds of thousands of you have done a lot of work (with the Pl T), you developed new sources of food, (energy), you are a professor, you are the ones we are doing this for. If you can't write a paper bring a presentation. You are a housewife and you found a new way of producing Gans, we invite to present. (:46). ... a few came to disturb but they saw the armed police and backed down. Governments are supporting us heavily. This is no place for misguided people. The first batch of the Gans trial for reversal of cancer has started. (:53). We are working in the background for universal police force and bank. (:57). We will work 2 weeks a year, and I want the rest to learn etc. Why should you work 40 hours a week for the others to have a better time (elites) and for you to suffer, that will all change shortly. If we have no time to spend with our loved ones where will we learn about peace. This is why we are interfering with the past structure. As I said last Thursday in my talk, 9 - 9 - 9 is the last number before you go to the One, and we started the One on Saturday (the UC). It's a new condition and it is us who has to force it, to do it. The scientist's in one of America's leading technology said, 'we can accept Keshe's T but he is involved in prophecy, in religion, in ethics and this doesn't go with the science'. Now the two come together, unity of science and religion this is what we are targeted at. We will achieve it because we are correct and it comes from our soul and the P of paying someone to say yes. We act and in acting we deliver. Thousands of you are making the Gans, etc. (1:00). This is not preaching we are laying out the new laws for humanity and our wish is our command. There is a high possibility that you will see a joint conference of religion and science across the planet. A lot of you asked why I spoke about Hillary last week and US election, there was a reason. I was captured in Canada for 11 days and each day they told me and my family that I will be killed, a bullet to my head, and I watched each day as my sister was crying and begging them not to kill me, they said to her if she talks about his capture they will put a bullet in my head. I asked the man who was so proud to threaten me with death who is responsible, he said, "you speak to the US Secretary of State Hillary Clinton, she decides when you will be released", then I knew I was under the control of the most violent woman on the planet. I didn't do anything. (1:03). Strange enough her boss decides to get

the KF USB Stick with all the patents and knowledge on it. And strange enough the same woman takes a flight to Iran and crashes and she actually got the "bullet in the head", brain hemorrhage, and now we see the result of the election in US. (it comes around), our mission was peaceful and theirs was violent. (1:05). We have to understand the science of the new knowledge, and the limitation of where our knowledge will go. Look at the Globe being shown on the web screen, those white dots are like the MaGrav reactors being spread across the planet. Now we teach you how to connect them, and help you to create Pl in an order of magnitude needed for Pl T. ??? when you create the Pl then all the white dots you see on the screen (across the globe) will connect. All we need is to allow the master to play his game. (1:07). Because all of the fields will connect to each other and emit what we were after. (1:09). He draws a single S on which all the S on the planet can respond. Many of you have built Gans, Cores, coils, Pl etc. In all your products you have this in common, C, Cu, Zn, and somewhere you have made this as well COHN (AA). The first 3 have connected to the AA, and every being has AA in it. If I want to interact with the feeling I need the Zn, ... mixing Zn with AA which effects in a natural way the E of the Man. With just a small S we can connect to all the S on the planet. Many times I hae said that when you make a coil pray from your soul for the S you make. In the process of making the cores and coils add a little of your own AA to it. (1:13). You pray for S that you strengthen yourself and your own P. In fact you are opening a bank account for yourself, and when you call you cash in that bank account and your wish becomes your command. Knowingly or unknowingly we have made you to walk the path of peace. One way or another you touched the Gans or N, you came in touch with the P of energy of the U through these Systems, even if you bought a MaGrav S we have touched you, we need to change your ethos to peace and that is what we are doing through these reactors. Even if we went to full automation to try and eliminate any AA, which comes through the touch. We try to tame you before we let you outside to bite the others. (1:16). Because one rotten apple can spread across the whole cart and destroy the others. It has taken a lot of work to keep the peace in the U, we will not allow man to spoil it. Now you can see through the picture I have drawn how I can reach you the way I want, we have the capability to spread the E and thoughts. I have a very bad news for you, we are developing, building the S to reach your soul. Now you see how easily I have brought all of you to become man of peace even though you have aggression. (1:18). Questions. The lady says if I have Zn Gans in front of me and I concentrate on you I can change your E? Why not as long as it is positive. You can't do much damage because I take what I need the way it suits me, this is the beauty of it. We change everyone at the same time then we get what we want, peace. We are just about to interfere with everything we want, with things that man couldn't imagine that could be touched. I have no choice, your intention is peaceful and theirs is different. Then you'll understand that no one can touch another unless the intention is peace, which means bringing balance btn E and P. We have left these things in the hands of the "animal". (1:21). How much more bloodshed? ... (1:25). They have taken the confidence from us that we don't even believe we can make the change. (1:28). Paul of Togo asks about that we were taught never to let sperm go out of the body if we are not going to make children, they taught us how to transmute the energy, is this a right teaching? I don't know, we don't make decisions on what people can do or not, the structure of the man is the intention of the man. The P teachings of the past are over, if you understand the reason of the teachings of the prophets of the past, if

we believe the teachings then we have to abide by it. (1:31). (1:32). Discusses the lady who had AIDS and now he got the tests back. (1:41). Keshe says to take her to another doctor and have him to test for AIDS, and write a paper on this. (1:51). He used ZnO2, CuO2, CO2, ... (1:53). Keshe explains, AIDS is a virus and very strong energy pack, it is the stronger and it gives its energy to the weaker CO2, CuO2 etc. (1:59). Benjamin discusses his methods of treatment. ... (2:01). he adds 2 mls of LP ZnO2 and CO2 and add to 500 ml bottle of water, take 2 spoons 3 times per day. (2:06). Keshe says he'll pay for the AIDS couple to travel to Ghana Conference. The power generator will be shown in Vatican and Ghana Conference on 20th, at the same time, and may show the flight S. (2:12). (2:16). Rick reads Peters letter about the UC in Rome. (2:23). People are deciding for themselves to bring the change. We have to understand what we have already received, it's not a matter of learning more. (2:25). She tells a story ... she asks if he understands the story ... not really. (2:28). He tells a story, about a father who gave all his wealth away but not to his children, .. it was good because all the bad deeds the ancestors did to get that wealth doesn't go to the children, they start fresh. When we go into the space are we going to carry all the bad past from the earth with us, we want to go with a pure soul. Those souls that were hurt for thousands of years can through you become equal and balanced. You always pray for the others to bring balance, then that is the time the space will open up. There is no sense leaving the past behind unless you can bring the suffering to balance. (2:31). We feed the suffering to the soul from the time of its birth, now it's time to free the soul, that all the souls as one soul move on. It's no use having a painful toe that the whole body has to limp because of it. You said the ancients used pyramids to bring peace to the planet. The picture you are showing of the MaGrav and pyramids have big meaning for those who work close with us, in time we will explain. ... all the lights on the globe (MaGravs) it needs a top, if you understand the SF, star formation. (2:34). He draws a SF, the fields cover everything, but what is important is the flow of the fields, they all get mixed up and brings balance to the others. H sits on the top, it's the position of the Creator, humble and knowing it receives more and it can give equal to all. It doesn't need much strength because strength comes from receiving from those who have, ?? for it to be the center. There are other flows then just from the bottom to top, there are out to side flows. The only time there is a balanced flow when they all flow out and then come back in. ?? All the crimes of humanity come back to the U ... (2:37). Q: whether we can weld the connection on the MaGrav and the then N coat. When you weld you still have an interface, the Pl flow changes on the point of interaction, you create a slightly different energy at the point of interaction. When you twist the wires you share what needs to be shared, they take and they leave what they want from it. (2:40). You all are making these pins for the center of your Capacitors and you turn the end back on itself, what if you left it open, are you open to receiving energy from the U, would it make a difference if you make the connection on the opposite side. What about if you twist the Al foil back on to itself on the ends, that it holds and absorbs all the energy, you'll hold more capacitance because now you feed it back onto itself. It's a much more stronger capacitor. You have to think what that connection gives you, what if you made a MaGrav coil with an open end. (2:42). When running trials if you put the control right next to the Gans crop it actually also has an effect on the control crop because it's so close to it. The same, everything in the room of the experiment has an effect on it, even your E. (2:44). The proximity of the material has interaction. I am

going to shock a lot of you, do you remember that S "beam me up Scottie", very soon you are going to see one, but where are you going to land it Scottie? Armen lost 2 (Gans) balls, others lost balls. This was a tele-transportation. Those in Pacific put Zn in your reactors and see how many Naval forces will walk off. We saw in the 60's people marched and would not go to war. (2:47). If you understand what I have given Paul, and what Benjamin told you, you have the same power. But the wish of peace has to be there. You have the tools to paralyze armies. You made all the materials to escape the earthquake, but the present disaster is the war. The "earthquake' is really the Naval forces and military aircraft. The earthquake is to stop the Naval forces. You have all the tools of peace, the conference was just a show. (2:49). Set a time for all those in China, Philippines, Australia, to put Zn in cores and run them and WISH for peace, all the Naval Officers will walk off. ... I have infected the humanity with the Pl T and I don't need to do much more. ... he tore a muscle but no pain because of the CO2 and N materials, because of the C connection in the CO2, the pain doesn't transmit itself. (2:57). Because its an energy information, it doesn't transmit it balances itself out. The same with N for amputations. I broke 10 bones from falling off the horse, I didn't feel any pain. If you get a burn spray CO2 on it, no pain. (3:00). He shows a new Pain Pen he built, he has a light in it, light is the central nerve it goes through a Gans. (3:03). Ali was extending the hand of peace to the group who lost the launch, and lets work together to build a Spaceship. What is importance of today? Tomorrow is 9/16/2016 in Jewish calendar is known as the point of change, we are expecting a talk from some of the world religious leaders in coming weeks in respect to the structure of their beliefs. (3:07). What is the shinny stuff, glue, what is on the Capacitors, Hot Glue. It is a FIRE HAZARD to use these hot glues on the capacitors and coil wires. We know a couple of fires have started because of them. You are carrying a huge amount of energy and you can set your house on fire!!! (3:09). It doesn't matter if you plug it into the wall or not, it's a capacitor so it builds up energy. He made a ring of 12 capacitors in parallel, and 2 coils in center, in tubes with Gans and water, it's based on Tesla. (3:20). Stephan made some gold Gans and puts it in his health cup, says it feels good. (3:30). Bob speaks for the Chinese. There was a mistake in the blueprint, you come from the power supply to the + of the Capacitor and go out the - of capacitor to the Stacker, this is wrong. It should come into the (-) of Capacitor and go out the (+) into the (-) of the MaGrav. (3:34). There could be a mistake in the MaGrav connections in the blueprint. ?? You come from Grid to the 4 Capacitors and then to the Stacker, there shouldn't be any other capacitors on the Stacker. Please remember the CAPACITORS are made in a strict way, ?? you may go up to 3 or 4 Nano, CO2 .. fire coat Cu plate and dip in cold water you get N particles, you need these for the Capacitors, added to a gel that has NaOH in it. This will be added to Blueprint. How you roll the paper, you put this on Al side and lower on the paper side, you can put the gel with NaOH on paper and then CuO2 with N particles on the Al foil, let it dry that you can't scrape it off, it joins to the Al fuses to it and gives high capacitance. (3:39). When you use the Compressors one has to be much bigger or more powerful then the other one (1:2 ratio), not the same, then you get a condition of flow. The line from the Compressor to the Capacitors has been taken off. Armen discusses the mistake with Keshe. (3:44). Back to Chinese, he put 4 capacitors in center of Stackers to replace the Gans balls. (3:50). You have to allow the S to reset itself, to operate in the new manner, how you position the 2 compressors will effect the performance of some of the S. We are trying to replace

them with Solid State. You can add more infinity loops. (3:53). Question in Chinese Group about drinking too much CO2 Gans water, it may have too many heavy metals that effect the health? When you make the water there should be no metals left, take only the top water, where would the heavy metal come in, you use only Zn and Cu. The top water is very pure. It's in a Pl condition and it doesn't interact with the body, it's in a Gans state or monatomic state which doesn't carry any structure with it. Quantity wise we don't advise more then one or 2 spoons a day. The question about sea salt Gans, it carries all the minerals but also all the other things in the sea which we don't need. Would our body take from it or reject it??? The iodized salt has been added. You are using the water of the Gans so if the body needs it, it will take from it. (3:58). If you eat processed foods with different chemicals the body stores some of it in case it needs it later. If you eat say 100 grams of a fruit that the body needs for the day, if you eat a kilo of it then the body has to work to get rid of the extra food, that creates and takes energy and it's one of the best ways to loose weight but it is done in a specific way. With the Gans it's the same way, the body only takes what it needs and the rest is rejected. When you take solid Gans it attaches to .. it absorbs a lot of energy ??? heavy metals .. but if there is a need for that then it gives it also. So your body doesn't hold on to what it doesn't need and finds a way to process it, and especially in the Gans state ?? it rejects it. We will show data ... that's way it was so successful in Fukoshima, that's why they found that the radioactivity that came out of the body was equal to what they have injected into the mouse. The rest doesn't work it's non-toxic, there are a lot of rumors in China ??? (4:00). Is there any way to test the Gans, you said before that the Gans can be dissolved in a strong acid, they tried that and some of the Gans disappeared? That is not Gans, we tried that we know that. we tested it, part of the process goes in the matter state and part in the Gans state, and partially the acid itself creates a condition for the Gans to convert to near enough the matter or energy state. Just because you put acid in there, you separated it, the Gans in absorbing the energy creates the environment which can use part of the Gans itself, it doesn't dissolve in it, now it has taken a new stage or state. What it means when you add acid to it, the acid takes or saturates what it needs from the Gans, it doesn't dissolve it, it's like another virus it takes energy from it. You have to understand the process, what kind of acid, what kind of Gans, and what is the energy transfer in what condition. It doesn't dissolve, it's like what we saw in the tests (Gans balls rotating) we saw the center cores emptying, it is not emptying the energy is transferring in the Gans, into the balance condition of its environment (4:02). Inside is pure Pl pure field. Translate the knowledge the way it actually is and not in somebody's own interpretation to fit what they want. For the Cores, if you want to add acid to Gans in cores to raise the pH you should find a Gans that is low in pH and add it, you don't add Sulphuric Acid to it. You can use food Gans that are acidic and since they are in the Gans state it's already adjusted. In the Gans state you don't loose the matter, it means the environment you put it in needs the energy of the Gans for it to come to balance. What is left is what is not needed after the balance is reached. If you add more acid you'll find the rest disappear also. It's an energy transfer and not dilution. (4:04). end

138th Knowledge Seekers Workshop Sept 22 2016
(KF personal arrested in US, Arthritis in the Knee,)

(:07). Conference in Ghana will be governmental and you can present your discoveries in the Pl T. (:13). In past week one of the KF administrators was arrested for 2 days in LA by American government. This is not correct, if it happens again we will release security information that can damage. American government you can not intervene to prevent the free transfer of the knowledge across borders. We don't threaten but we will release knowledge that you do not want released. (:16). KF we will release solid state transfer of energy free and can replicate easily. Very much like Tesla but in a Pl condition. The hybrid S is now overtaken by the new wireless transfer of energy. One transmitter and a number of receivers, can feed the whole city. Confirmation came this week that the T used in Fukoshima by TEPCO was correct and now the Americans are using it. The Company was worth nothing and now sold for 360 million using (hidden) KF Technology. We would like to give you more, you making profit is our dream because you bring advancement to our T. (:23). It puts you to shame your conduct. (:26). SECURITY ALERT !!! from now until Sunday night stay out of highly populated areas and Churches and some American citizens. The whole of Jewish population is off the street. We have received a high red alert security alert and warn the family of KF. (:30). Our research has shown a direct link to using head phones with the mobiles to severe brain injuries, especially if you get agitated, excited or angry. It creates fields and tensions that lead to cancer. You are concentrating fields directly into the brain, in 5 to 10 years lead to cancer in brain. For men who carry Mobile in pants we see increase in testicle cancer and muscle tissue cancer which has been very rare, but now we see a huge increase for those who carry the mobile in pocket or back pocket. Keep the mobile away from your body if you can and use speaker phone, I know it creates difficulties for people, but it's your safety. The cancer rate has increased 100 percent for the girls who put the mobile in their bra near their breasts. For boys when you put the mobile between your legs when driving increase prostate and testicle cancer. Now the research is so heavy that Mobile Companies are hiding the information on every level. (:33). In future we will develop Pl communications that will bring a balance (safe). (:36). Will open KF Agriculture in Italy. (:38). KF Arizona got 70% reduction and they added a third MaGrav and got up to 80% reduction. The replication in Italy did not work so well, it takes longer time, they will do further research to replicate it because it is important for wireless T. The Jewish Lobby infiltrated KF Hungry but our security people found it out. (:45). We understand the Energy but we work on the Field only, if you can transfer the knowledge of the field into a Pl your S will work much more efficient. A field is one way and one directional, a transmitter transmits info out. When we speak of a Pl it means once the fields are received by a Pl it returns back different information's to where the fields came from. The difference btn a Pl as scientific info and fields info of a Pl is very clear, when you transmit an info from a ?? math a transmitter, you release a field and you don't expect to get it back, and if you get it back we call it a radar S, what reflects back. In Pl we don't wait for a reflection, we measure the feedback, what is received or used and then what is returned to keep the balance in the line of communication. This is the difference btn a pl and a field, return feedback from the same field strength. If you understand this it will make life very easy for all of you in KF R & D. (:48).

(:59). Understand and look at the AA as a potential difference instead of a chemical reaction, he draws it as a Star Formation, C,O, N, on bottom and H on top, H is the ground and the potential difference is all the elements proton, neutron, electron, and the shell itself of C N O, then the totality in respect to the minimum has a potential from down at the base, don't forget these are order of magnitude, the potential difference (PD) btn H and C is that much, and the PD H and the base is more. The work of the U is not chemically, it's the potential Pl level strength difference. If you didn't have h as a base level ... you wouldn't have been able to connect the other elements together in comparison, and near enough ... create life. ... repetition ... enclosure in the System, what we call AA. (1:02). You have the same forces: Upper Atmosphere, Earth, and Center of the Earth. The U Atmosphere in respect to the earth low potential, but in respect to the sun extremely low M, but in respect to the Center of Earth a very high potential. Interaction of the two fields of the sun and the earth creates the shell where the balances of all the elements occur, why we have a thick layer of the interaction of the fields of the earth and the Pl of the sun is because we are mono-element in the atmosphere of a specific area but we are composite in the center, so the composition from H to plutonium creates different layers of interaction of fields on the U atmosphere and this allows a combination of different elements to be attracted according to the friction on the planet. You will understand the old song, "**It's raining, from the sky it's raining gold**, plutonium, etc." because of the fields interactions because of the structure of the Center creates a composite field interaction. (1:04). and that creates a Gans and Pl field of it, and when it comes into contact with the fields of the earth it will convert to that. We see built up on layers upon layers in different parts of this planet, where do they come from? -40

(1:26).

(1:40).
(1:48).
(1:53). .... There is an egg and a sperm and the interaction of the 2 creates enough energy to create a mass, the center of this mass is the same as the hollow center (FP) you've seen in your core, has lead to the creation of transfer of energies. (2:03). and lead to the concentration of the fields in the center. This center decides what shape and how this Pl will look. The additional info that you didn't have, now this center itself as a Pl has to find a balance with the other centers, where the position of these centers dictates the shape and color of manifestation of this Physicality. The Egg and Sperm, the line of communication, the E of the man, the center is the soul of the man. It's the soul that dictates the shape of man in the P life. The interactions of the soul dictates the outcome of the shape and P behavior of the man. This is one thing you never understood and now you have to understand. This is how life exists in the U, it's the soul which dictates the shape, color of eye, P shape. (2:05). So your P has been set by the other souls that they find their position in their confinement of the U, be it the man on earth or another species in the U. You thought you were alone but in fact your soul is ?? (has determined) your P and its manifestation of its conduct, which relates and conditions your soul and ?? positions itself in the others, you call it the day of judgment, it's the soul which dictates the position of your P, and the E is the Chinese Whisper btn the two. If you understand this you are ready to understand the next level of the Totality. You made a matter of it,

got the Gans, made a center of fields, that hollow center is in the brain of the man, you call soul, each soul has to have its own MG positioning in respect to the other souls and what it gives to others and has to also take and when they see misconduct or change in the P of the others, then they have to position themselves that P changes. You say I was lucky or unlucky because this happened to me. (2:07). It had nothing to with luck, because the souls have already positioned you to receive what you did good or bad. Or you did bad, but (on another level) you gave freely (good), but the souls do not see that, they positioned themselves in respect what bad conduct you did, ?? but it was the reality of the P of the misconduct. It will take a thousand years to unravel the teachings of today, but those who do will achieve peace very rapidly, and this is out target. I don't teach how I can reach the man in the Amazon who doesn't even have a candle light yet after millions of years of human race (evolving) on this planet, but I teach and reach his soul without a single wire through the candle of the wire and the release of the soul of the man. Now you understand the difference, we haven't come to conqueror but to bring equality among all. We conqueror only through the love of man and give him knowledge and freedom. QUESTIONS. (2:09). When I share knowledge with people who aren't receiving I get a feedback in my body that I shouldn't have done that, but I don't understand it? It means they aren't ready to receive it, sometimes they refuse. I can give but it's only you who can refuse, but when it's time the soup is already on the table for you to eat. You ?? can't steal from the soul by not giving, it's your job to give, it depends if they are ready to receive. We see this in relationships, the couple can't have children and then they adopt 3, but then later they have their own child, because the soul wasn't ready yet. (2:12). She may say I love you and want to have your child, but in her soul she may doubt if you are going to be a good Dad, then she sees you are good with children, I can trust you now and then she gets pregnant, it wasn't because there was no egg, etc. Today a lot of couples can't have children, we blame it on the environment, etc, but we don't look at this factor. ?? the misconduct of the past. In West it was like changing trouser (relationships), and then when you want a trouser it doesn't fit because too many trousers tried before. (2:14). ... When I first received the message to teach from the Master of the U, I was first to learn not to force but make it available. You can't say I pay you to love and trust me, I have to be able to test to understand if I can trust myself and I can trust you with what you give me. (2:16).

(2:33). Did they really pass the Van Allen Belt and land on the Moon? We'll send you there to check if Armstrong's footprint is there, make a test, sit in your capsule (closet) for 7 days and see if you can get up and walk. Of course there are structures on Mars. .. you don't see the life that is above you in the U Atmosphere, it falls on you and you eat it (though the lungs) because you are a bottom eater. (2:35). The atmosphere on the Moon is much lighter, the life there doesn't kill so they receive knowledge of the U much easier. .... (2:38).
(2:43). Q: What gauge wire for the wireless receiver? If it's wireless what dies the gauge matter. (2:45). Man used Himalayan Gans for his knees and great relief, [Knee Pain]. The problem is you attract too much Ca towards the joint in the knees, it means the skin or the length of the femur is not creating the right vibration for the absorption of the Ca to go through the bone structure, the field of the Ca is absorbed from the Lymph but the penetration, becomes too big to go through the Lymph so the Ca stays and it splits up

towards the joint. Now that you are released of the pain, when you are sitting down or walking try to walk on a "heel to toe" way, very important, try to tap your heel, put the heel down first heavily and go to your hip, when you walk. You have to change the internal vibration of the structure of your Bone that it takes the Ca into your bone that becomes part of your Bone Marrow. The kind of Ca you get with Arthritis and these kind of diseases is the Ca that is transferred from the Lymph to the Bone, but it is not in the size to be able to penetrate to the bone, and become part of your B Marrow. (2:48). So it slips up and gathers in the joint area and creates arthritis. If you have only reduced your pain you haven't sorted out the problem fully, you can help yourself and retune the bones. When you walk taping the heels first you send a vibration which adjusts the frequency of the Bone not to send bigger size Pl to the ... it will send the size which it needs, when you go through the process, whatever the effects of the Ca fields on your joints will be dissolved and the body will get rid of it, and will stop creating the too large sized ones in the future. He draws the bone structure, the lines are channels which act like guitar string, sets a frequency to attract the Lymph to the bone, if one is out of size it creates a different tune. (2:50).
(2:56). (2:59). If you have no cartilage in the knee. You can rebuild the cartilage nano layers at a time but you have to kept off the knee for 3 weeks, get "knee transfers" to take the pressure off the knee. You need Gans of CO2 and CuO2 and Gans of what the cartilage is made of, CaO2 and ZnO2 because cartilage carries a lot of E, and a fair amount of CH3,
(3:13). (3:15). We have a totally wrong image of our teeth and their operation, they grow continuously, because they get used continuously so the cells are being replaced, like the skin you replace the layers of tooth, when you stop the production of the things that can damage it, it repairs itself. For children with hole in their tooth, if you give them cheese every night before bed you will find that it will get filled in. What man has not understood that the teeth are the root to the life, it's the conversion point btn the P and the man's life. We chew the matter, in chewing our S recognizes everything what it needs for the structure to support itself when it becomes part of the digestion. 16 14

(3:23). ... will releases the new wireless power generator worldwide in Ghana and Vatican. end

139th Knowledge Seekers Workshop Sept 29 2016
(:10). (:15). In the last week Obama announced establishment of a one world government by 2030 in conjunction with Vatican, this is not a copy but they are carrying out the wishes of the UC, there usually is a response within 14 days. World leaders listen to this program and this is proof. The leaders are trying to assist, but 2013 is too late, it's too far away. We are setting up our own financial S in the background, supporting others in every aspect. (:18). The UC will take over the UN. The biggest problem is to try and bring one currency, but when you have no currency you have no problems, this is our target. (:21). They come to me everyday with people who are using KF logo to sell their products, they say it's wrong, no I say do more, teach more, we will break with the old pattern. No attachment to the financial structure because I receive what I need when I

need. But do it in a correct way. In coming time a house worth 2 or 10 million will have no value. (:24). The reason for the large cities has been the need for electricity and water, but when you have all those needs with MaGrav, do you need to live in the city. (:27). Shows the "Address by P Obama to the 71st Session of the UN G Assembly". They are carrying what our (UC) wish is. (:40). We just got your feet wet with what we taught you thus far, now we don't have time, we teach you fully. We needed the coils because you needed to see something, but now we go to the cornerstone of the creation of man. we teach the control S from the essence of creation, not from the mechanical end. In the E part of the body which is man's brain, and then we go to the soul which is placed in the center of the embodiment which is his P, his brain. Then we control the interaction with the condition of the soul. Soul has been made sacrosanct because we never understood it, now we understand it and find out it is the mother of the creation of the P. When you go to another planet, a body made of AA ?? arises due to M field strength or do to temperature, the shape of your body is dictated by the construction, energy and balance of your soul with its environment. So now we have to learn how to interact with the soul of the man, this is what we are teaching in the health section and in coming time has to become a worldwide phenomena. If you get an amputation of leg due to mine you should not walk legless for rest of life, you know the info is within the brain, that's how it was created originally, the knowledge sits in your DNA and RNA, now we show the interaction (:44). of the framework of the soul which interacts with RNA and dictates to DNA how to produce the P (re-grow the leg). In the space through the soul we can change the appearance of our P. Understanding that knowledge we can change the structure of the P, if you have a problem with your heart you don't need an operation if the doctor understand the operation of the brain which dictates production or reproduction of the cell of the valve of the heart which has caused the problem. If the doctor is knowledgeable he can interact with the soul of the man in the energy level at the point that is responsible for the creation of the heart. So the doctor understands the work of the soul and the E, irrespective of the P, and where the P is, these are the doctors of the U. Because whatever creature I give you, you know the path is the same. If you are created in this U and the U's we are part of, then you have a soul. The structure of the strength of the soul in interaction of it carrying the information and receiving you call it the E, creates the P which you appear in. (:46). For the first time man understands that the physicians of Man, we are training to become part of the UC, will become Universal Doctors. This is how you become part of the U Community, not out of only knowing how to fix humans, and only know tablets. This is where the teachings are going to concentrate. I spoke with you with the language of the man so you can get confidence and make these things, and now we speak with the language of the U. We will make one nation out of this planet and at the same time we take man as one part of the U. (:49). All of you who have built these cores and coils and have seen the benefits, you have already touched the soul of the planet but you were not aware of it. When I show you, you'll be surprised, then you can have confidence and interact with it. Understanding Man as a soul. If the soul creates the color of your eye, and if we go to another part of the space where for example blue eyes is dangerous for the soul, then you can with your soul change the color of your eye to what is needed. You can also change the operation of your eye, and the entrance of the light to your eye. To get through evolution takes millions of years, but to get to the soul takes milliseconds. (:51). You don't have time to

evolve in the other environment you need to do it immediately that you survive. If you try to organize that in the brain, you are already gone. The reason you changed into blue or black eyes and blond hair and the rest is to fit into the environment you live in, your soul did this. No we know that the secret of the control comes from the soul, we need to work with the soul, it has a structure and is not just a field on its own. If your soul can control the color of your eye, and that it does it through a specific part of the brain, ... so in the soul there is a part which is dedicated to the eye, we know that and now we teach you. This is what was promised in the Autumn of 2016, the condition of Man will change and we start teaching the true Space T. This is what we said, we wished it (world peace in Rome) and now we see the world leaders carrying it out. (:53).

(1:05). The Training of "Mozhan" begins now. ... see all the dots of the globe (on screen), the soul is like that, each responsible for one thing or another, when I open the soul it is no different then a rotating sphere with highlights, mass energy which has a tangibility which is invisible to man with the current knowledge, but I will make it visible. ... reptiles can re-grow their tails in weeks, I will show you how man can do it within minutes, because man's development of the ligament is already there, it's just putting it into shape, just creating the right field that they ??. (1:08). From now on we detach from P, work only with the fields and their operation be it in energy, matter production, or food or whatever. Work with the strengths of the fields, which means the thoughts you have the capability to give it a P manifestation, in the way you can shape your arms and legs in the womb of the mother, now the U becomes the womb and the soul of the infant decides the shape, color, and size of the man. ... we have access to everything in this U, it's up to us to decide how and why we allow it, tolerate it. In the U there is no cancer, but the cancer of man is his own E in respect to his soul. (1:11). ... Now we go into the Field Pl, it needs a lot of trust of the thoughts to see the work of the Fields. I let you ask the questions, but I only answer in respect to the soul's ?? and energy, other questions can be answered by other teachers that's why you have workshops. Because I teach and you don't understand then it's no good. (1:13). Questions. Oslo asks what to do about the rogue Military creating havoc in the surrounding stars? It only happens on this planet. When you see religious leader like Pope talking about one world government means they know armies are over, a government doesn't have armies fighting itself. Caroline asked how can we make a change with all this killing? There is a plan and soon they will understand. I estimate 5,000 people at the top who are living off the manufacturing of weapons. Insurance companies are the biggest investors of weapons manufacturing. When you buy a Pension policies you finance murder, Lockheed, Boeing. (1:18). About 100 million people are involved in weapons. Now that you made the arms you have to use them. We saw the change when the Cold War ended, the transition was made. (1:22). 5,000 are controlling us through 1 billion workers. The problem is the E of the man who wants to be head of something, raise the soul level of the 5,000 so they see shame in what they are doing. The UC has to concentrate on the elevation of the souls of the 5000. (1:26). (1:30).
(1:40). The 14 Core Team don't need the man's prayer, they are sacrosanct and receive from the Source. (1:42). How to control the Pl if we can't control our own mind. (1:57). The Cabal's have dumber down the populations through food, water, etc. is there a Gans to counteract it? If you understand it, try to find the Gans of your soul. Man

doesn't understand his own power. So it's a matter of will power? It's a matter of trust in the soul of yourself. Through the evolution and growth of the numbers on the planet man looked to those numbers for strength, now for the first time we ask him to see his own strength within. You look at the numbers, we look at the strength of the soul. You have to understand a lot to look at it in the right way. (2:01). (2:05). I sit in front of a pool and give the teachings, every time 4 or 5 bees land on the pool, I stop the teachings to save it, because at the moment there's a shortage of bees in world, with the bees the world stops, noting can grow without them. To work through the soul you need to know your soul first, because otherwise you don't have the key. It means to live in correct conduct, then you have the keys to the U, what color of SS would you like. Many times this knowledge has been taught but because of the lack of communication that w now have on the Internet, it was buried by those who used it in the name of the priest, leaders and rest. This time we have the tools, last time there was no radio or TV, that every man understands. The problem is the P interaction structure btn the gaseous and the P matter part of this planet which causes this mayhem, and can't be sorted unless the man understands and sorts it out himself. Because your DNA is fixed to your planet and it's the planet which pulls you into crime. (2:10). The structure of the P is too much different, it's too high, if you put the AA together and where it comes to the P of matter state which gives you hemoglobin which is 56, and the lowest common denominator of your AA is 1, it's a huge difference, we don't see such a difference in changes like this anywhere in the U, it's never been seen with such a drastic action in the soul and E of man. The problem is not the man to say why he has been here, the problem is the way this planet has been structured. It's the way this Solar System releases its energy and converts matter in this way has lead to the crisis we have now. The P Man is a consequence of the release of energy in such a vast span of the energy field that has caused the Animal Behavior for the killing. The killing is to absorb more packages of energy directly. So if your gap is higher you need more packages, you can't receive that package from the planet due to its structure, so you consume. (2:12). bigger packages to satisfy the need of this big gap. The biggest gap is not that the H is 1 and the energy transfer 2, the Zn which is your E level around that space, the worst thing is the difference btn the iodine and H, the potential difference by order of magnitude of the soul is so huge, that it can change the H, AA, and the DNA. This process is the problem on this planet. The only way to change the man is to show the power of the strength of the soul, that he has to give that he can receive, that it moves the P out of the AA to a balanced condition of the furthest ?? and absorption of energy from the U. That we change the absorption of the energy out of the P to the soul. Man needs to absorb energy through the Space Fields. How can you do it, you have to have a G field which is heavy enough that you can take what you need. (2:14). And that is provided by the soul. So your savior in the space is your soul. You have to understand the operation of your soul, how and why it works, what it is responsible for, and you can walk through the passage of the energy of the U, the way you touch and say this is an arm or leg, heart, etc, but this time you have to do it with the understanding of the fields. Explain how the fields of Gans heal headache. (2:20). What is the difference btn the AA of Cu and Zn? Yes, huge difference. AA of a given strength needs all the fields. When we talk about Isotope we don't mean number of electrons, but strength MG field in Pl, H 1, O 16, N 14, C 12; for Cu (+1, +16, +16, +16), it's AA but has a field strength in combination of the isotopes has a field strength of 59 - 60 which is Cu. For Zn the total

energy balance is 63 - 65 depends what you look at. All the C in atmosphere are not of the same strength they are created different ways, same with O. The AA which connects to Cu has one strength and the Zn another. Some of the C can go as low as 8 or 6, O low as 8, that's why they have a connection, it's in that level they find (2:24). their connection, not just because its a C. N can go as low as 8 that's why they make the basis of the AA, the H is the release of the balance that they can stay in the strength for Cu or Zn. For Cu we need the C at 8 and the others at 18 and 14, but for the ?? (Zn) the C stays at 12 but the O goes to 8. This part of the science of the Pl has not been understood because we are in the infancy of the nuclear technology. (break in internet...). (2:30). (2:35). Keshe back talks about medical Unit. ... after you master something you can setup a KF business. (2:41). (2:47). Talk about workshop hosts to begin wider teaching. (2:51). In time of Emergency people need to know how to make Gans then to make coils, cores, and MaGravs. (2:55). We allow you to decide what you should give back to the KF, you are the judge btn you and your soul. A lot of people are selling and then say good-bye, that's okay, we have the copyright, but we leave it, you have to learn. (3:03). Unknown to you some world leaders have used the T for their health and they know the result. The Pope has received handmade units for his P disability, I built it with Armand and Marco. (3:06). Rick shows photo of lady who had trouble with Gans production. (3:10). ... They offered Hillary the T to heal her brain hemorrhage, we don't look at the politics but soul. .... (3:18). Photos of Gans water crystallization for CO2, etc. The CO2 looks like the water from Lourdes, and healing springs. Keshe asks him to make full presentation as scientific validation and present in Rome in December. (3:22). (not very clear). (3:46). Keshe back. We make public the offer to help Hillary, not to be president but to relieve the suffering of a woman. end

140th Knowledge Seekers Workshop Oct 6th 2016

(:08). KF has received full permission from a Government to test Pl injections for cancer and trials by a major University, to begin next week. It's a natural product so it should not take long. (:11). This is a huge step. ... Goes over relationship with Def Fluorescent, who is attacking KF, he helped Keshe write the books in the beginning and promised to protect Keshe, they wrote the patents together. (:14). I know how to trigger him for his better part to come out. He has protected the KF for the last year and half. In his trip to China he opened a pandoras box, he brought all the enemies together. Him and I agreed that my T and books has to be free to everyone. I wanted to wait, but he released it right away, as with the patents. People read the book and now they want to buy a copy. (:18). I said many times bless his soul, he does it with such sincerity that everybody attaches to it. When he opened up (sincerely) he allowed the terrorist and other people to enter the KF. ... ?? I can't stop him from writing all the rubbish ... (:25). The center of the U radiates fields out and creates stars, Galaxies, planets and beings. Inside a Being is a reflection of the Center of the U, a process of the interaction of the Pl. The process of ?? extinction of the knowledge of the Pl T. We have achieved energy production, Spaceship, we'll see in the coming days. The whole process of the Pl is the same in essence from one scale to another. (:27). He draws a Galaxy with fields radiating out you get tangibility, change the name you get Solar S, change the name to a proton you get the same. The same with man, draws a head in the center you have the soul, which radiates fields out, at the point of the

boundary manifests a body. (:29). Extend the knowledge in a very deep way, create a field strength in a center and create a SS. The half circle in most stable SS. The Sun changes its polarity every 11.5 years and goes back every 23 years. The earth due to its varying materials changes polarity every few million years. The only way to stop it is to move it into a position that the change doesn't come into operation. Early on we understood this with one of the first reactors we built, that by half circling you can achieve the stability of the structure and the Pl. This is a single core. In Star Formation you put breaks on rotation. (:31). When you go half (circle) you have less M fields push. Controlling a single reactor is very difficult. Look at the brain, if you keep it split you can control it, our brain gives us a lot of intelligence in respect to how to build reactors. 32 06 (:38)
(:48).
(1:02). Arman shows the 12 MaGrav setup for SS, done in Arizona. You have 6 MG in inner circle. When he walked into the circle the fan slowed down showing that there is a field and it increases when he is inside. You will see some domes forming. (1:06). The walls of room were interfering with the fields, went to a platform in large room. (1:09).

(1:41). He goes over the history of the KF Pl T development. ... (1:45). We are now 5 minutes before midnight, it's up to Mankind to accept the new knowledge and become peaceful. (1:50). (1:52). Photo of reactors, 12 and 6 balls. the energy of Pl is so huge it can blow up. (1:56). He invites any government listening in the background to work together on this, but warns if you try to use it for war, don't forget you haven't even entered the nursery of the U and I am a professor and know how to wipe out (what you try). Instead of keeping 14 million in the basement (underground bases), and trying to start a war on back of earthquakes by mimicking one, and already ordering the factories to build millions of weapons ... you stop or we deliver. We can deliver in one shot. Those orange balls aren't even loaded yet. This is the same platform as in Arizona. You have to be able to change all the connections not by wires but by fields, the mastery comes when you can create a connection (condition) in one ball that it only feds a specific other ball, (2:00). Put a sick person on top of platform, person is healed. In space virus's can grow in seconds so you need this. A lot of you believe in Aliens, they carry MG field forces that are like viruses and can kill you in seconds. (2:03). We changed the teachings into a completion. The bigger plan is World peace and I know how to force it, and we are about to force it. I need as many of you to make as many of these, I don't call upon you to help but because you have a S I lock into your S and you become part of the totality. We have literally infiltrated every country with the MaGrav coils. There is not a place on this planet without a MaGrav S. I still don't think there will be another president, but Obama will stay for a third term. (2:05). He created the earthquake. He draws earth with pyramids on different parts which were built about the same time. The pyramids are just a facade, inside are MG structures, they connect the whole planet together. Any visitors from space don't need your food, these pyramids project fields across the planet. That's why you have them, they were built by instruction from "us" to elevate the human race, but they abused it, but the structure is still there, and none of them are flat because the field strength is holding them together. From space you get all the fields you need and you are aware what's going on across the planet. (2:07). The roads the maps throughout the U have all been done like this. You can demolish the pyramid but because the field

has been established it will stay there. The pyramids are your MaGrav's, and you have made thousands of it, you were after energy and we were after spreading the S of the peace across the planet. Used Cu in them because in the structure of the P of the Man, it's the line of communication, we will reach every man. (2:11). .. I have given you everything to have a comfortable life, I am the Messiah, but it's for you to change the conditions become peaceful. We showed before by connecting reactors in Germany, Canada, US and Italy, through our wish reactor #2 stopped. Because may of you have lots of Gans in your house I don't need a core or MaGrav S. The Gans are more powerful receivers. What is my remote control, remember the core with hollow center (Free Pl), the center of the brain is same where the soul sits, with this I can control whole of man. At the conference I said the 9th September was the end and the 10th the beginning and on that day we heard about the peace btn Russia and USA. (2:16). The wish of the UC was to establish one world government, a couple weeks later the UN speech by Obama declared one world government by 2030, confirmed by Vatican. We control everything even though you think you are doing it. We take our time, we waited 6000 years we can wait a little more, sooner or later they have to come together. (2:18). You need 22 ping pong ball motors, to make S. ... we are getting to the fruit of the T. (2:22). Be WARNED if you do not follow the procedure of the U Community for sharing knowledge and the peaceful application of whatever you make, this is literally a serpent, its tail will strike you, if your intention is for you, you'll find it is taken from you. (2:24). The governments will soon realize the only path to use this T is equal sharing. Q: Vivek asks how to put the Gans around the house to maintain the temperature. (2:28). Caroline reads Alek letter. (2:31). ?? a guy put Gans around the house, after 3 weeks we get the same temperature of 23 degrees. He just put Gans coils around the house. (2:33). We will make it as a Blueprint. He shows Gans products going on sale. (2:36). What if I put Gans water in radiant floor heating and let it circulate around the house? Try it let us know. You test how far apart the Gans reactors need to be to heat the house. When you have a dome why do you need to put it in the pipe. (2:38). They have a Crystal pitcher with Gans inside to change the drinking water to 8.5 pH, alkaline. There is a unit coming out to connect to the house pipes, for 750 euros. It guarantees alkaline water. (2:42). (2:44). Austrian from last week who presented and met with Keshe, to make a standard for testing Gans. (2:48). Someone asks if Keshe will use the receivers to change the planet from the ruling powers and free us from pain and suffering? When we release them then they become the same animals. It's the structure of the ?? land of this planet which creates this aggression, are we going to change the land or teach the man if he changes then don't react. this is the problem, not changing the world leaders, who are nothing but puppets of Industrialists. The monarchies will be gone shortly. (2:50). We have to change the greed inside the man. ... He makes a request to Japanese, those who are infected by Fukoshima, contact KF webmaster. (2:54). Rick shows a photo of a Plasma Workshop. (2:58). Workshops going on around the world. (3:04) ... end.

141th Knowledge Seekers Workshop Oct 13th 2016
(World Council has 6 members, Cary traveling across N America doing Workshops, New form of Amino Acid Hemoglobin, Amino Acid comes from the air, British Monarchy, leaving behind Hybrid for Solid State Wireless in coming weeks,)

(:09). We have been teaching for 3 years steady. People in the old S oppose the new science because then they have to relearn something that they think they have already mastered. Scientists have been told that their phD will not be accepted if they mention KF and the new science, therefore we make our own conferences. (:14). The conference will be broadcasted heavily in Africa and will be dispersed rapidly. We don't look at your background but look and listen to what you have discovered. This is how we will release the T. (:19). We have 6 people on the KF World Council, 3 members have already accepted and 3 should accept by next week. We don't call it World Government, because it will look after the whole world with their souls, to council the planet. It will not be election but selection by the soul. They are asked if they wish to serve humanity and elevate their souls and bring peace on the planet. The rules are judged by your soul and your conduct. We are in the process in setting up the world police and banking system. We are setting the World Government next to the council. (:25). The KF North America teaching tour by Cary (21st Century Superhuman) and Whitney (Many Hands 4 Peace). Photos of workshops. Cary started in Florida and carried some Gans and Pl across the country. Mrs. Keshe said to take it Standing Rock. She saw 50 rainbows in Montana. (:30). Standing Rock is a place where many people have gathered, Native Americans and others to stop an Oil Company from putting a pipeline through pristine nature and pollute 4 giant rivers. Stopped at Buddhist Centers along the way. (:33). Shows workshops, each ones have their own talents they bring to the workshops. (:37) Meets Rick in Vancouver Island. A lady who met Mr. Keshe 20 years ago and knew he was bringing something special. (:41). Lady took photo of dove of peace in the clouds. They are starting to get invitations all over, S Africa, Norway. We both have given up our possessions to do this and by donation workshops. (:52). Meets Dr. Rodrigo and his health unit. If felt like 20 people around sending energy, I still feel the energy. (1:03). Keshe says he has been following their work and trip across the country. The way you approach in a humble way and open up to people. I am constantly informed of your work by Caroline, our soul is with you in your spreading of peace. Our T will come out through its peaceful application and we see it. (1:05). In last 24 hours I have met high level Nuclear Physicists and they understand it easily. We fought with matter for thousands of years, this is far as we got, now we are ready. In Nuclear Age was ruled by fear, and the Pl is not fear. The pleasure of it, that the opposite side doesn't come out. We see some people abusing the workshops and only trying to make money, this can not work that way, you will loose your rights soon. (1:09). With these ladies they do it from their hearts and the living comes with it. Teaching has to be in depth, and in Ghana we asked that the World peace Treaty be there for signing. Why people feel peace with this in the CO2 Gans , and ZnO2 you find relevance with the E, you support and satisfy the E and feel better, and P becomes irrelevant. (1:12). The blood is the carrier of the E of Man, it's not just to feed the energy to the brain ... every cell of the body has a link with its E, that's why if you touch a nail you feel. The body has acceptance of the E of the P, the E is fed through the blood cells and circulation. The Zn is connected to the E, you are releasing the energy of the ZnO2 which is at the strength of the E. (1:16). You hope that it will be accepted by the E and brain. You can target the blood which directly brings the E into balance, into every cell of body using the circulation of the blood. (1:18). When you make ZnO2 AA sits on the top of salt water, AA is connection to the atmosphere of this planet and connection to the P or

solid part of planet in conjunction with salt and water of the environment. CO2 is at bottom, salt water mimics the Oceans, AA combines with Fe and creates hemoglobin. CONH (12+16+14+1 = 43) and Fe (56), the difference btn the 2 is big enough to create circulation of the MG fields, because now Fe has to feed them all to bring them to balance. If you understood, now get a piece of Fe, N coated or better rusted, extend it down to the CO2, a gaseous state that is in matter as liquid. (1:22). As the N Fe touches the salt, comes in contact with AA, in the presence of the flow of a current in this structure, in a Pl condition. Hemoglobin will drip down the wire and now you have created a pure AA connected to Fe. It fits more or less any blood type, it's pure and not yet orientated to the structure of the man. there is also Cu and Zn, so this AA has E capability of the P, which are the muscle tissues because you dictated the Cu. If you use Zn N coated and Zn you produce ZnO2 Gans and AA fat on top, if you put Fe you'll again produce hemoglobin but this time at the strength of the E. In a good S you can produce half liter of hemoglobin in a day, extract it and wash it thoroughly. (1:25). Get a mixture of hemoglobin and (? ZnO2) 50:50 now you have a good AA that carries the totality of the E of the man. This is a new tool with the science, now you can interact with any E directly. If you are dealing with the disease you have to understand the E also, you can't do it without hemoglobin. The is a fast track in changing a lot of things in the whole structure. (1:28). You have Zn + Cu (#1) and hemoglobin, and ZnO2 (#2) and hemoglobin, and add to CO2, ZnO2, and CH3 and you add directly to horizontal people. If you add Magnesium you'll interact with the E of the vertical people (plants) to the P. Game changes in Pl T, because now you can directly interact with the E. (1:30). With # 1 & 2 you can interact directly in the blood of the man and in turn it will change the soul of the man. Change it as a ration to 3 to 1 and you can use it as an injection, you don't need needles to deliver anything into the blood circulation. ??? it elevates him, you reach every cell within minutes. You dictate the E of the state of man. ... receives energy without killing, because it does it through MG fields, it takes what it needs without killing, and because it's at the same strength as itself it balances very quickly. (1:33). Add to this mixture a fair amount of CH3 Gans and you'll feed the man with all the energy he needs, regardless of all the vitamins, but you have to find the mastery of it to be able to do it. I taught this back in the Medical Teachings. ... (summary) diseases become irrelevant because they have to find a balance. This is the only way in the coming time that bacteria's and microbes can be handled. We handled the virus with the Gans but what to do with the microbes and bacteria's which are AA based. This is one of the ways you handle Malaria, it's a parasite and not a virus so you won't find much effective process through pure CO2, some cases you do. This is the first time you have a tool to be able to change the characteristics. (1:36). that you S can handle any viruses, microbes or bacteria. This is a natural antibiotic, but you have to understand how to apply it. You can pinpoint it to the infection because now you deal directly with the AA to the cell. We don't need injections to get rid of abnormalities in the blood. By accepting the energy it changes the environment of the blood that microbes can't exist. (1:38). Now you directly connect this to the Lymph, where the food is given. You can put a patch on the stomach and the body continuously feeds itself as it needs it. Because now the "feeding patch" takes over the work of the stomach, it feeds the lymph, that's what the St does. The hemoglobin of the Zn or Physicality you change the totality of what you want to do. (1:40). Those of you who are looking for the elevation of the soul of the Man know

exactly what you have to do if you have understood the totality of the knowledge. .. it needs the right intention, it's playing with fire and only you get burnt, because it's the intention that counts. You were pouring Gans in the rivers and waters, but know through the hemoglobin you achieve much faster any process you were aiming at. It's part of the structure of the E and has access to your E, to your intention and only can accept what it needs, you can change the Man to a peaceful man. Leave it in the squares, parks, offices and people will start behaving different. Add it to the coils and you'll become the controller of the ?? feed, this is how you control S, through your E, this is the fastest way because now you establish the P connection through the hemoglobin and your E to your S. The deep space T has no room for wires and computers, except the natural processes of Gans computers which your brain and body are part of. According to the process of the energy dictates the understanding more of the creation. You can't use this to elevate your soul, only to strengthen it. (1:43). That's 2 different things. Being able to produce hemoglobin which is connected to the E and P, you can add mixtures of hemoglobin, like CH3 which is already connected to the hemoglobin itself through the use of FeO2. These simple system can be highly effective in changing the animal man to a peaceful one, ... it's very direct to blood. Those using it appropriately will change every person they touch. (1:45). Add Hemoglobin made for ZnO2, Zn & Cu N plate, and CH3, to the waters and the mayhem starts, hunger to teach peace, search for peace becomes reachable, because you won't stand the misbehavior. This is what the Christ said, this is my blood, of peace. The Medical application is to use these hemoglobin to replace blood transfusions, they convert themselves to the appropriate type in the body, they become part of the structure the join, it will be a peaceful blood. You can put these in the Gans balls to reach humanity. We can mix the hemoglobin of horizontals with the chlorophyll of the verticals, we would stop to eat them, because the body would take what it needs from the environment and not touch the P. (1:49). You don't need to eat another entity, the hunger will not arise because the energy comes from the environment. The production of the hemoglobin with the protein is the key. You still need them both because you have the flesh and the blood. This is one of the keys for repairing the organs, kidney has a given strength and E strength, you bring the 2 together. You don't need to transplant organs and the same thing with bone marrow. It takes a few minutes. Like the tail of reptiles that grow back, you can grow your finger back in minutes. (1:56). This happens to all of you, when you cut some tissue off your finger within a few days you have identical tissue re-growing, the same shape. The brain over 3 to 5 days replaced the cut piece. Now with today's knowledge you can spend it up within minutes. There shall be no man with no legs. (2:00). the Chinaman heats up the wok to point of N coat, so does the reptile at the point of the cut it generates a high heat that it seals its last layer to a N material, it receives the energy, the phantom pain tells the body NOT to replicate the cut tail, the high energy and heat at the cells tells the reptile brain to replicate the cells that were lost. The N coat that it has generated are of the same elements, it's a N Gans state it has the E too. The N coated cells keeps the brain from seeing what was lost, it generates the AA and hemoglobin and starts to grow, the info comes. ... in space you'll be able to grow back any limbs. Man's brain had this knowledge before, it the same as how we reproduce. But the ability to create the high temperature at the cells to make the N materials is gone. So we stack it up. .... (2:07). Questions. Can it be done with an eye. It's a complicated S but it still can do. The eye is a very strange structure, it's spherical, 2 next to each other

means they balance each other out, 2 main centers of the P of the brain are connected there are 4 of them, when you want to change an eye the E has to counted fully because it directly links to E for P to see. Do you want to see the harshness of the planet, if not it won't work. (2:09). If the soul is in a cavity in the brain center where is the seat of the Creator? It doesn't mean it is in there but that you have a connection. (2:11). The soul of the Creator is not in the body of the man but is connected through the fields. ... (2:20). Everything in the body is specifically positioned energetically according to a purpose. You can see the character of a person, and even through the MRI. A research was done in comparing height to their partner, if the man is shorter then woman he will be unfaithful, they stand below and want to be higher, E too. People with eye slightly shaking to the center, difficult people because they see 2 versions of everything and don't trust the other, one eye is out of focus. People with 2 different colors of eyes, absorption is different. (2:25). Paul from Togo. Is it possible to make I Loop with soul to keep man in balance? Yes but don't forget the soul is very powerful compared to P, you have to have right balance. He won't need to eat or be in sickness? More or less because you satisfy the need for absorption. He will present about Malaria. The AIDS lady, the husband's AIDS is gone. ... They use the CO2 water for all uses cleaning, cooking, bathing, washing, so they create a Pl environment for the patients. (2:43). KF has a new way to handle AIDS and HIV results within 3 days. .. (2:47). In Africa they have "No Hope" Camps for people with AIDS. Our hope is to get hold of one of these "No Hope" camps, maybe we can change the condition. (2:50). ... all our lives started in Africa. (2:54). KF Vietnam wants to help collect data. (2:59). Video with English subtitles. Measure the effectiveness of Gans by taking temperature at Well points on fingers and toes. (3:04). Video of instrument to measure energy in P Pen. (3:06). Keshe says test have shown the Gans to be highly conductive. (3:08). Q: Some weeks ago you said we should limit the Gans water intake to a couple of table spoons per day, please clarify, if you consume a lot of water does it effect you? Yes it does, but we are looking in general at the case in Togo. Gans is similar to aspirin which up to 1800 mg is a blood thinner, at 3 to 400 mg becomes a pain killer. We see the same in Pl state, you use it to create a condition of body matching itself or you create a condition to enforce, with Togo it's enforcement. One or 2 spoons creates a condition for the body to go back to its original, there you are trying to kill a germ, here you are trying to balance it. It's a big difference. In Togo he's trying to cover all corners, but in the end the body will only take what it wants and is capable to take. We are watching what they are doing because it's a huge change, the house, body internal and external. At only 1 or 2 spoons we are not looking at changing but bringing a balancing. As in the agriculture the Gans is creating an environment around the plants, you can even throw the greenhouse away because you have created a new environment. (3:12). When you drink the Gans water you effect the body. When you also wash and use it everywhere in the house you create a shield over everything in the house, create an atmosphere in the house. It's not the Gans touching the P (plants) but it's the shielding effect it creates. In the water you have CO2, ZnO2, and some amounts of AA, the plants growing in the environment of the CO2 ... ?? .. you create an environment and not feed the plant. You look at it as if the CO2 has become the fertilizer, No never does such a thing happen. (3:15). When you build a greenhouse and put a Gans in it, now the greenhouse becomes a block to the growth, you limit contact with the AA or protein in the air. Understand that even the plants absorb protein from

their own environment that allows them to grow. When left in the open air with added Gans, the leaves start absorbing protein from the air so they get bigger because they take more then they need. You look at it as the Gans became a fertilizer, no, it's coming from the environment. (3:17). In this environment a lot of parasites, etc. can't exist. This Gans shielding makes the plant indifferent to temperature. And the beauty of it you can cultivate on it year after year the Gans will not die, the effects remain. The data is still to come, but using very small amounts in the right way you get even greater effects. Hopefully in the next weeks we hope to add 1000 scientist researchers. (3:20). I made a Gans of the Thalamus with the intent of changing the ethos on this planet ... Why are you looking at the wrong end? You said that the soul resides in the center of the brain ... a lot of you assumed it was thalamus, I didn't say that. The strange thing is that it has no P, it's a hollow space (the soul). (3:22). ... it's like the difference btn cooking steak and kebab, the process is different with kebab you have metal in middle and more heat, the taste is different. None of us are wrong as long as we understand the process. (3:25). .. (3:37). What if you put the Gans balls on top of the tree, that's where your food comes from (AA in air), you still think it comes from the ground. Would it change the taste, 70% CO_2, 20% ZnO_2, and 10%CuO_2. (3:40). We taught enough today, it's huge the hemoglobin. ... What to use for burns and amputations. You can use CO_2 LP for phantom pain (some CuO_2 ??). For burn, the skin is made of 3 layers, so you need 3 layers of AA on the other side, ?? the strongest in middle, the weakest patch next to the skin. The SKIN is GANS state dried, so it's very near to matter state strength. (3:44). (3:46). Understand how does this effect the vision and the brain, when you see double vision the neural S sends signal slightly different then the other so you see 2. ... (3:48). Gans is temperature independent. (3:50). Assar from Persia asks about his Book, the 500 people who control the planet are dependent on us because we are all connected, they know that and don't want us to know. I would rather not say much, it is us who have given them the right to abuse us, it's not that they are stronger. I call it British policy, we are little but we bring submission through blood, look at where they rule with American soldiers, mass murder is the name of the game, you fight people into submission. It needs 1 or 2 people to bring the 500 into submission. If you get them to feel their own action they will become timid as ?? (3:53). It's us who allows it and puts it across that they can do what they like. Is it 1 or 500 or 5000? nobody has ever understood the structure of the British S. A single Island has brought the whole planet into submission out of fear of being murdered. The S is simple, you have a government that gets elected every 4 years, but you have the Monarchy which is the owner or ruler of the government, of the nation. Government is for public and the nation is for the Monarchy. They're already planning 200 years ahead who son is going to be the next king, where's the next income coming from, it's a family that needs to be fed to keep them in power, so they do any mayhem. In their houses they (appear) perfect but outside they carry out mass murders. (3:55). If we elevate their soul then they have no more to say. It's so easy, you let their soul to fight their P. Look at British Monarchy for the last 500 years, it's been total submission by blood, they killed so many. Before they had few soldiers, now they have the US. The white Americans never got their freedom from the Monarchy. For people who are educated they see what is happening, but it's not apparent up front. Look at the Iraq war, the British took Bassera and controlled the oil export, they took the cream. In Afghanistan, thousands of US soldiers got killed, British move into ?? and the opium trade increased 30 times. (3:59). In

Libya who went to the Central Bank and took 140 Billion dollars in gold and why was it not added to the national assets of the British government, but instead to the Monarchy. The same is happening in Syria, who is losing the soldiers the US is doing the (dirty work) for the Monarchy. Do we blame the 500 or the 1. Look at the hot spots in the world and you'll find the Monarchy, they plan 150 to 200 years ahead for their finances. They established the UN and carry 65% of the votes. You have to see the truth behind the structure then you'll understand. It's a very well organized S. The Iranians understood and set up the same S in Iran. (4:04). Is it going to end soon? You decide. It's time to elevate. It is very easy to do if you want. With the hemoglobin you can do it very fast. (4:06). We are moving away from the Hybrid T and will release the Solid State wireless, in the next 3 to 4 weeks, because the hybrid will lead to a lot of failures, and too bulky but the S State will be a permanent solution. The hybrid was with compressors, etc. but the S State is also wireless so there is more to understand in one go so we don't need to change again. Those waiting for generators you just have to wait few more weeks. Can India join in the Wireless, we are organizing ... we have seen people coming and going and abusing, so we have to do it for everybody. (4:09).

142nd Knowledge Seekers Workshop Oct 20th 2016
(Ghana Conference, How to rebuild the heart,)

(:10). Report on Conference in Ghana. keshe was present. (:12). We went to bring peace to the nation, we brought products to cure HIV and AIDS. The change is fundamental and will spread throughout Africa. The military has joined in the process.
(:23). Tokyo University is going to release tests. (:32). They have a cure for Malaria. We can leave small bottle in water tanks to prevent Malaria. With our product the doctors tested in Europe and within 4 hours of injecting the Malaria is gone from the blood. This changes the game and is what is needed in Africa. Every year 65,000 die from Malaria unofficially. (:44). Next Thursday we announce the 6 member World Council to govern this planet. They will have the say in what the KF will do. The African scientists have tested the Power Unit and know it works. In Kenya they got 90% reduction. (1:06). The 4 ladies giving workshops in the Northwest America, showing slides. (1:20). She made a painting of a monkey. People could taste the field energy of garlic or plantain. She mixed the soul Gans in the paint because she wanted the truth to come out. She made for Douglas a painting of trip to Washington D.C. (1:27). Wayne made a star unit, you sit in for 10 minutes. (1:32). Shows the simple single wire P Pen, everybody got to feel the energy. The most important point was that, I can do this. Nobody wants to leave at the end of the day. There is a wave going through the culture that is ready for this T. People spray there whole house with Pl water. (1:39). Keshe says this is how it has got to go, in Iranian belief the women are the cornerstone of life. It's you who bring in the next generation and children always listen to the mother. We are not becoming a woman's group, but we see an increase in females participating. Mothers are the head of the Persian household. Bahala said if you only have enough money for one child to be educated give it to the girl, she brings in the future generation. (1:42). (1:58). He show s the Gans immunization waters and Malaria waters for injection. The Malaria water you put on the lakes and they can't live in it. (2:07). Water decontamination setup in Italy.

(2:10). How the Gans water works with the tumor. The tumor is made of AA + (Fe, or Zn, Cu, K, Ca). Most cancers have 100 to 140 atomic mass, the more dangerous ones come around 70. The stronger needs to feed the weaker to create a balance. When you inject the Water you create a need to continuously feed the whole tumor, it collapses in. It's the same when we inject them into the blood S, it goes throughout the body, because it covers the mass of body so RNA accepts it immediately. Then we follow the procedure to dispose of it, what was the predator (the cancer) becomes the food of the body. (2:15). This is actually energy the body has already transformed from the matter to Gans state to the solid state as a Gans as a tumor, once the reprocessing starts it's already predigested energy, this is the beauty of it, you don't destroy it. It's like going to the grain depot and distributing what has been stored. That's why the body so readily accepts it. As the tumor collapses and because what we put inside it, the energy which collapses gets consumed by the rest of the body. Some of you who have tested with the LP, you reported something strange, it looks like you're bleeding (? urine) goes reddish, darkish, these are the cells that the body doesn't need, but it comes in such a vast amount, the cleanup, that it ends up with this. Don't be afraid (healing reaction). After a week or 2 you may see fatigue, exhaustion, this is a good news because it means the body is using energy to repair and rebuild the cells it lost because of diseases or viruses or cancers, which you cleaned up and saw it as a dark discharge. They have to be replenished. Now you add CH3 into it to support the body in the rebuilding process. (2:18). Explain the process, teach them fishing, don't give them a fish. I see many problems with the workshops you have started, the first day there should be no practicable making of MaGravs or cores. Those who do it, you have to stop. If you do 1 or 2 days teaching making MaGravs, spend the first half explaining the T, otherwise you have wasted your time, it's only just another June ring in the drawer, when I need it I pull it out. But if you teach them that the Patch becomes the center of the food, understanding it, they add to it. These workshops have become huge teaching centers but you are teaching the wrong way. You have to prepare them that they understand it. This is what we did in the conference, teaching the science and knowledge. ... we gave everyone a N coated wire. (2:21). We explained how you can feed yourself with this little coil. What is the fear of the knowledge. It divides in 2 ways. As it stands matter state solid, liquid, gas, on the other side we use solid state matter to create N, Pl, and Fields. Which side do you want to play. ... somewhere everything is interchangeable. You can exchange in different directions. (2:25). There's a video of how the fields come together out of space and create matter, it's a true expression of the Pl. If Einstein would have understood he would never have written E=MC2, because there are many factors involved there that light has nothing to do with. And all the assumptions were ignored, now you don't make any assumptions, everything is considered. Shows the video, magnetic rays through space. When 2 fields of equal MG fields come across each other in the U, they interact because G of one pulls the M of the other, and they form a Pl. The Knowledge has been correct from beginning and now it makes sense. (2:29). Once you finish teaching man you have to teach the birds, fish, trees and everything else. (2:35). When you heat up solid it eventually becomes a gas in a more free state, the same with Pl, in the field level it's free to go wherever its energy allows. You can use the matter to manipulate the Pl. The matter, N, Gans and fields are made of the same, it's field positioning according to the strength. In Pl it's added from the same Pl ?? and in matter you add from other Pl to create the separation (so you are using multiple

Pl in matter state whereas in Pl state you use only the one Pl). (2:39). When you work on the Pl side there is no speed limit like there is in matter, because here you have to pass from one Pl to another, you have take energy from one part to another. When we travel in matter state we have a barrier, because we have to penetrate and go through it. But in Pl you go through the strength field. ?? Let's say now the speed of light for man in H, the ultimate speed (? not clear) , here (Pl ??) when you go through the strength of Cu, the speed is a multiple, or power of 60 (zeros). (2:41). If you can mimic the strength of Cu in the H, speed by order of magnitude of 60. If you use plutonium it's an even more huge speed. To planet Zeus, then divide by order of magnitude in Pl but in matter you use "times" 60 or whatever. When you play with the order of magnitudes for both M and G then you have the freedom of space. (2:44). I have the patience of the U. The man who understands has made a thousand turn coil, the feeling is totally different now you have an order of magnitude from 90 to 1,000. That's why it feels so strong and can cover (Universe). This becomes the mono system for flight, when you sit inside it, Your E controls the direction where you want to take your body, and creates the shield, ??? the minimum .. if you design it in the right why, the center of E and where you sit , you decide the movement, and strength of shielding, if I feel safe I don't need a huge shielding. If you centralize the fields, it doesn't need to be in the center of the S. You can control the lift and position as you desire. (2:47). Questions. You said the N is the divider and how does Extreme UV play into the mechanism on the screen? You are mixing btn the fields and rays. When we speak N in Pl we are talking about its fields, extreme UV is about the ray ??. In the matter state N becomes the divider, in the Pl Gans state in AA the N is part of the backbone structure of holding everything together, you always have the 3 C, N, O (22, 39 40 56 54 58 60) you needed ... it's a spectrum NC O it's the maximum and minimum of the 2 which gives you the field play, 1 is not enough, and the center fields is where they bounce off. (2:50). We don't have UV in Pl, but to you as Pl releases some of its fields is UV. One of the persons we find stable elements in matter state, because the spectrum of the isotopes is large enough in respect to others they create enough shift of field that they ?? something else. Look at the spectrum of any stable elements, uses Fe, when you pick it up in your hand you say it's Fe 56, but in fact it's (a spectrum), different isotopes ?? have different decay rates, the more you come to the center (of the isotopes) the longer atomic life you get, because it's intense and the fields are closer to each other. ?? you get a rapid decay. The world of nuclear has never understood this. Why you get half life of a few micro seconds or few thousands of years, it depends on which isotopes in that compound are in the mixture, in the spectrum of MG field strength and not in the matter state. (2:54). Fe 72 is easy on G and heavy on M so the half life becomes less. ... ??? Why do we get gamma radiation release, because you see how close or far you sit on what energy in respect to the isotope's MG field forces. The problem in Agricultural trials, they apply Gans water on 2 plots next to each other, the difference is not that much, because you look at it as a matter state, but field interaction covers both, ??? When you test elements for half life you have to see what is around it, (if you have isolated well enough), how is it connected to the elements you extracted it from, and this is what the scientists don't understand. Now in Pl T we unravel a lot of mysteries about half life. (2:56). How the energy comes from one bandwidth and releases itself to another. Does the energy come from the electron or from the center which allows the positioning in the new orbit. A lot of fallacies in the matter state get

solved and we find the right answer. (2:58). Guy built a Health Unit, wife had 5.5 cm tumor on private organ, after 30 sessions she start bleeding dark, I understood its a healing reaction. The tumor completely gone. The second test confirmed the first. (3:02). He understood that he was the giver to help his wife. He thought about using it wirelessly. He start to test other people wirelessly (??) what he means not clear), they all got a change in the voice. (3:05). Keshe says to him good morning, you understand completely. You understood that you don't need the box, it's only a point of reference. His friend also built a box, but it wasn't that people got healed, but they came out with a new perspective. ... and because you have the Cu, Zn and Fe and you have the man in the confinement of the freedom of the E, you add to, elevate it, they get enlightened and find peace. (3:08). You must have had AA in the Gans as you made it, you have the common denominator to reach any man any where. The only thing you do is to point attention to where the System is, like BBC sending messages out, you know it's London but you pick it up in Poland. Because you made that reference, the 10 million people who live in London they are not aware of it, they may receive some of it if they are in that point of intention that they need something from it. It's like you make a power supply and everybody taps into it and you pay the bill. The device is for those who still need a matter confirmation. (3:10). You confirm what we said with the bleeding (healing reaction) we get rid of all that we don't want. There is a Ca discharge from the breasts. We become conscious of what, how we want and the way we want it, and if we are happy with it. Not everyone is there to receive what you want to give them. People go into the H Unit, I have cancer and want to get rid of it, but in reality or E they want to keep it because without it there is no one to look after me, I don't get care. When you go in (the H Unit) you elevate the need, the body starts supporting it, when you come out, instead of working on 2 you're on 4 (more energy), you go the next time, you still receiving the same, then you are on 6, by the time you are at 10 the body doesn't need it. (3:12). If you go back into the psychology of it, your wife was 99.9% the instigator of it (? wanting to get healed). Through the Unit, ZnO_2 and AA which connects with her, you have satisfied the need (? for the cancer), I don't need ?? it. With the wireless S it's the intention that creates it, and the Innovation Center doesn't yet understand it, somehow. (connection ???), you started ?? weeks ago ... the more you shared the more you received, ... it came from your unconditional sharing. (3:14). The more you give the more you receive, and that receiving satisfies where your concerns are, or what you are short of. Enlightenment comes out of giving and not out of buying. .. Now you can have the Creator. The Temple of God should come in the house of God, the heart of the Man. Not in bricks and blocks .. When you share, that's what Christ did, then you receive ?? what you want .. your wife to be without cancer, and she is free of it because you solved it. .. we see a lot of this around but people don't understand the explanation. (3:16). Man shares about his mother and how KT helped her. (3:18). He gave her LP of ZnO_2, CH_3 and she washed her eyes and 3 days later gone. (3:25). ?? .. the brain has the capacity to speed up reproducing cells that are cut. What is needed to trigger this process? ... (3:30). ... we needed this gap to mature our knowledge, otherwise we would have become another Masons and hide the knowledge. (3:32). We have to find out which part of DNA is responsible for making the N layer in our body. The reason we don't reproduce amputated parts is because we do not create a high energy that leads to creation of N layers in the last ?? ... a chemical which is in their blood or muscle tissue, which is ?? by the Lymph, we have lost the ability or

because we use so much of our energy in different ways we can't create enough heat, it's exactly what we do in our N coating, we use a high energy, heat, or temperature of caustic to create the N layer. If our doctors can create the N layer rapidly that it can do the transformation, a high temperature that can absorb all the energies, then we can grow arms, legs and hearts. Our bodies make the N layers but not so efficient, it makes the N part of our E out of our Lymph. When we cut ourselves we bleed. (3:34). That blood that comes out ?? makes the N layer. The problem in most mammals, warm blooded animals is they don't build layers ?? fast enough. Can we build a T that can put a fire in to the Lymph, ?? that the blood ?? .. the cells in the blood have to be of the right strength for say the finger. ??? The Lymph has to absorb the strength for the N layer the way it does for the E side, the 2 together will allow for the production of ?? it gets absorbed and the body reproduces it. (3:36). How come we put organs in body and within a period of time the body rejects it, each animal has chosen a different period for rejection, so there is a control for the period of rejection. If we can understand it then with KT we can replicate it. ??? ... (3:42). ... You can rebuild your heart in 60 to 100 days, but you need to follow 2 paths with doctor, ?? you need ZnO2, CuO2, and CH3 very small amount, and some CO2, and use the pipe (shown on screen) to breath through for 3 to 4 hours a day. the secret for the heart is to connect the pipe to a mask that part of the air goes through your nostrils. The air you breath through your nose carries different information and sensors then through the mouth. I always use a mask to breath, it also behaves totally different in the lungs. So for heart cases like your especially you need to connect the pipe to a mask, this allows the right gases to be absorbed in the lungs for the production and rejuvenation of the cells of the heart. (3:46). It is crucial for the heart. ... then you have to make a patch of the same material to be put around your body in 2 halves with separation, you need like a T-Shirt but separated from each other, the energy has to be balanced, ?? be precise in the measurement of AA, and CO2 Etc. it has to be in 2 halves because the heart is 3 dimensional and you are trying to repair it, which is different than trying to take a disease out of it, you are trying to develop it so you want to create a balanced condition in the lung and heart tissues. Third, you have to drink from the same Gans water as you made for the (breathing) tube this way you supply the materials for the reconstruction of the heart, with the ?? you confine what needs to come to balance. (3:49).
.. (3:54). (3:58). You can get treatment for Cancer and AIDS in Ghana. end.

143rd Knowledge Seekers Workshop Oct 27th 2016
(Selection and Introduction of Universal Council,)

(:05). there are a lot of important things to discuss today. The selection of the U Council for earth is completed. They will serve with their soul, also they should speak 2 languages and understand completely the problems of humanity. One from each of 6 continents and 3 ladies and 3 gentlemen. (:13). Say hello together and introduce yourselves one by one. Mary Woo from Los Angles, introduces herself, wants to serve and her soul is for peace of humanity, and trusts in the desire and love for a better earth. It's your love that allows me to be here to serve your wishes. I represents American Continent but she is from Vietnam, came at age 15. She sees herself as part of the earth

and suddenly her love expanded. She has been an interpreter for 20 years in general, medical and legal, and she understands the frustration of language barrier. Thank you very much your Excellency. (:19). Anka from Netherlands, represents Europe, she asked Mr. Keshe if he is sure that her soul should serve, and she trusted. I feel completely blessed to do this, finally we can make our childhood dreams come true, we always wanted the best to come true, people didn't have to suffer or live in wars and we were shocked and terrified that these things were happening in this world. Finally, we can do something about this, and the best thing is we are moving into a time where our souls count. My background is I was always trying to find wisdom, I studied Anthropology, not quite doctorial. Because there was a lot of wisdom in the indigenous cultures of this world, that was not taught in schools. To reintroduce the wisdom into the new peace we are creating. (:23). Lisa McDonald from Australia, after you called I had a good think, and I decided that my life was the training, was born and lived lost of her life in S. Africa, Jewish dad and non-Jewish mom, born a white in an African continent in Apartid for half of life. We need impartiality and deep love and respect for people. people came to me for solutions and all my life I waited for K T which can give us a solution to lead us to the next level and this is it. A degree in Psychology, 12 years educated by Nuns, we are farmers now and I would like to help restore the planet back. (:27). Now the gentlemen. From Asia, Thank you Mr. Keshe I accept this with all gratitude, and wish to restore respect and love to all humanity, as a single soul and collective Consciousness. I hope everyone realizes that change only happens from within, everyone is responsible for their own thoughts etc. Parvish Roshvan ?? born in Theran, Iran and carries Canadian citizenship, and for last 13 years living in Dubai. Since 1980 involved in medicine and 1988 shifted to alternative medicine, and practices as a naturopathic Doctor. It's a body-mind-spirit and the Reality is way beyond matter. The knowledge you are bringing is an easy way to understand the deeper truths, I am proud to be a student of the KF. Tell the people your experience of the war in Iran so people know that you understand what conflict, war can bring. He served 2 periods in the Iranian war as medical ?? and witnesses lot of heartbreaking things happening, and realized that the whole situation is created by the political systems of today. He helped many enemy soldiers and knew there was no difference and looked for a new way of thinking. Those hardships and painful period prepared him for many changes in his life. He decided to look at everything as pushing him towards a better enlightenment in himself. (:31). Dr. Rodrigo is honored to be part of this Council, he will do anything to bring peace, he was born in Mexico and studied plastic surgery and practiced for 30 years. He studied in Italy and Spain and US and ended up in Oregon. He loves all people, married a woman from Russia. He only sees love and compassion in people and will do anything to bring peace to world. He decided not to practice Plastic Surgery anymore. His passion was reconstructive surgery. He wants to learn all about this T to bring it to the people. He represents the South American Continent. (:35). The last member of the Earth (Universal) Council, Alek from Nigeria, he left UK and works in the deep jungles in Nigeria. (signal problem) ... (:38). Keshe introduces Alek and his work in the jungles of Nigeria to spread the T, he will represent Africa. ... KF worked to help China and Philippines to come to an agreement instead of going to war, which has been instigated by others.
(:53). Anka speaks some wishes of the Earth Council, we want to end the wars, and we want to restore justice to the planet that is in alignment with Universal Justice. Through

KF we will have infinite energy and healing, we would like the media to give truthful news and get rid of the mind control, and immediately stop the machines that enforce the mind control. The business world should be in alignment with our soul purposes, re-distribute the riches and remove the limitations for everyone, and restore the paradise this earth once was, and space travel to visit our neighbors, or move to other planets if we want to. These are my wishes for now and I would love to hear the wishes of the other members. And clean up the world. Lisa wishes to get people to understand that they are the creator and need to create the abundance for themselves, there is too much complacency in the world. The abundance of the soul comes from within. (:58). We should go to the public and let them express what they feel. Keshe puts a question. One of the biggest problems is that the world leaders have created the wars to show themselves as more powerful, if in their work they can bring the world leaders to see they are all equal and the most powerful is responsible to the weakest nation. I think the Earth Council should call a conference of leaders to show they are all equal and not as how the UN is now, then we have solved 99% of the problems. (1:02). (1:18). (1:27). To contact the Earth Council use earthcouncil.org. Keshe asks the Earth and universal Council members to be humble and among people, and that you are felt through your soul. it's important that we don't replace one hierarchy with another, this is a condition that we set in the Rome conference. They should live amongst men as men. (1:46). Today is the 27th it's the start of a new era, to change and to link up with our souls. When you pray don't go to the Jesus, Moses etc, with hands stretched out, I need help, when you pray, which is the giving part of your soul, pray to humanity, raise the level of the soul of the man and through it you shall find out that ?? , this is the secret of the creation, if you are a man of peace you'll add to it, ... every E has a strength and when you release at that strength it will be absorbed by all those who are of the same strength. The start of the Earth Council is the key to the establishment of the peace on this planet. (1:48). The knowledge and experience among the 6 members brings everything the man needs to make a peaceful planet. Agriculture, medicine, understanding of the languages and cultures, to humbleness. The path for our chosen council's that they will rejoice being part of it, ?? and openness of it. It's very hard for the council to realize that from today on, the wish through their soul will become a command for humanity. **IF** the six members decide to change the path of the Leaderships (?? World), they can achieve it. We give the support from the core members of the KF. **I have achieved my mission, I will be here for a short time** as a guide, now it's the job of the Council to take the responsibility for the planet. (1:50). The distribution of the knowledge that it brings wealth and contentment. I thought to make the Foundation for knowledge to establish the peace and with it leave it in the capable hands of the Earth and Universal Councils and the Core Members. All 14 members of the Core have become united and with it we support both councils. It is not to achieve peace, but that we already have achieved peace. Those of you who have achieved peace with your soul will find out this will elevate the others and the peace will come. I had the pleasure this morning to watch the first structure of what you call ?? , it could be touched and felt, and could not have come on any other day then today. (1:52). We are on the verge of joining the man, by the knowledge of man, and those who have a peaceful soul to create it. It was wonderful when one of the members was saying that, touching the air, I could feel it, tingling feeling in my fingers some 14 feet away from the structure of the ?? **We have managed**

to create the tangibility of the Spaceship. The structure is as we said, a dome shaped. It was beautiful to see and that it was done by a man so committed to peace. In time we will show the first video of tangibility, touching the SS, the fields. It means the Man is ready to join the U Community. The application of knowledge is so simple that it baffles the scientists. (1:54). ... I created your position for peace on this planet. .. the distribution of knowledge, unconditional and free. (1:57). Today is the celebration of the Earth Council, what man has been wishing for centuries, to end all wars, to bring equality among man. It took time for the development of T so communications could run world wide as we have seen today. Before it was marathon runners and pigeons, now it is the MG fields of the voice of the Man, which is shared across the planet. Man up this time was not ready to share this experience of oneness, because now everything is equal. Man has the point of maturity and it's for us to reach the others that they understand that the only way is the path through peace, through T and not through talks. Where they see the life changes, the conditioning of the suffering of the soul becomes the position of elevating the others through understanding the operation of the totality. (1:59). (2:01). It closes with Mary, we all of the Council listen to you intensively, we absorb your energy and beautiful wish, and your advices, thank you. Man from Iraq ask Mr. Keshe when he accepted this mission (for earth) did you first have the knowledge and then accepted, or got it after accepting? The elevation of the soul brings the knowledge, I accepted the new soul which I knew was a consequence of what will come. And was more knowledge added when you accepted? It's added to the knowledge which was given to the others ... I carry a very ancient soul, ancient in the dimension of the U not the of the man. Thank you. We are the messengers of the U and we understand the totality of the link as you see from one ?? to the other ... but we see one galaxy to the other, and one U to the other, and we see that every part has to work smoothly, for (the) totality to be smooth. We have a lot more to teach, this is only the beginning! Thank you very much for today, and we welcome Man to the U Community, even in the small steps.
End.

144th Knowledge Seekers Workshop Nov 3rd 2016

(:07). In this last week since the establishment of the new Earth Council we have seen a positive move in one government. Using KF T to bring equality to planet. (:10). Training of Mozhan's will continue. (:15). Maybe next week the Innovation Center will show tangibility of SS. A couple years ago we showed the Coke bottle and people looked for energy but never fully understood it. Now you all know the secret Pl liquid is Caustic. The disintegration of the screw end of the plastic was the target, because it has specific characteristics, when you put the electrodes in, and the caustic in, due to the what the electrodes were extracting, there was a specific condition at the screw end, draws red dots there, the molecular structure opened up, disintegrated, and released what we were looking for. (:18). As atomic H. When Man understands the use and be able to create Tritium (H3), then he will gather the full knowledge to go into space. TODAY we teach you how to create TRITTIUM and how to use it. Tritium in nuclear technology is a curse of the reactors because of the radiation, but as a Gans Pl is a gift to the U. There's a difference btn 3 atoms of H and what I call Tritium, you can change a H into Tritium.

One of the reasons the Belgium's made us a terrorist organization was because they said we were using radiation and Plutonium to create N materials. It releases huge amounts of energy. (:20). This is why we got involved with TEPCO and showed them how to convert it into gold. ?? the atomic structure of the gold is the structure of the Coke bottle. Yes we produce field strength at the gamma level, but it isn't harmful to man because it's in a Pl condition through the lid of the Coke bottle. The Russians, Americans, and Chinese have spent billions trying to reach atomic H to use for atomic bomb, clandestine operations. The compression of certain plastics of certain products allows the creation of Tritium. It's very strange, the way CH bond works allows these things. I was trained to look in the depths of the atom, and I looked what is the essence of creation, a neutron, and free it to use it, but hide it in a magic show. In line with the production of the disintegration of the plastic I will create tritium. BUT in a Pl condition. (:23). I had explained how to collect tritium from the Coke bottle with pipes, I called it H. The electrodes are used to pull it up from the cap area. The H hides in the first tank then ?? develops to the top tank. The reason we use Tritium in space T is because of the way it comes to exist. The story, who ever has a mustache is not your uncle, half of Iranian men are not your uncle. (He draws 3 intersecting rings). Ask yourself how elements are formed. O is the same across the planet, each vegetation releases O of different strength according to its own structure, even though we call them all O. When you have an O like in CO2, it means 2 O equal in strength have managed to interlock using the C as an interconnect. When you have 3 H, a Pl in a matter state before it becomes a Pl of the Tritium, the same composition. These 3 H molecules of one element are not all the same. (:26). One has a very slight strength connection with the other, and the same with the second and third, so you see the 3 H are not a copy of each other, they all have something slightly in common with each other the structure allows the fulfillment of the totality. Understand this and the next step is easy. You have a common denominator, energy balance btn the 3, but you have 3 objects, entities in the strength, one of them is the common denominator, one is free, and that common denominator ?? , because of the structure of the H can only be one thing, a Neutron in that element. Now you see the game play, how to convert atomic molecular structure of the H into the Gans and Pl of the ?? He draws 3 circles in a row, and this is what you have, draws an infinity loop around the 3. (:29). The key to the operation of your flight S, how to energize and position it, travel, carry information. You have to set your S the same way, I'll explain how the game has changed, (Sun, your Spaceship, Earth). If you change the Sun to another Galaxy field force and earth also .. how you operate the fields in the Pl dictates if you are arriving or leaving. Why H is the cornerstone of any operation S in the U. It's not so much the strength of its electron and proton, but its Neutron. The neutron crossing this U according to the central line principle, the MG field strength is the same across this U. (:31). In the space travel we look for this, but fortunately on this planet because of its condition we can select and separate it, there are conditions where we can see Tritium hidden in the structure of the matter state, where is becomes the fuel of the future. You have neutron which can split into electron and proton as it needs. They are all Pl energy packs, you make accumulation of any part of this (?? splitting), then you can collect any element, H, Cu, gold. But in the Pl condition we don't see it as creation of individuals (elements) but as the totality of the fields. He draws a spiral and at the end, the 3 H of tritium, and somewhere farther inside (spiral) is the Cu, gold, plutonium ... and man hasn't found out about the elements that

exist in the higher levels. (:34). We have to understand how to use the matter P into the Pl physicality. You all have to become masters of this. It's like you have passed through the city on a high speed train and haven't time to look at the scenery. (Need to slow down and absorb the knowledge.) A lot of S gives you different combinations of ?? H3, and in S you have created CH3, in fact, all of you who have been around the KF have produced tritium in the Pl state. I have made atomic nuclear Pl Physicists out of you without your knowing it. And you know more then all the ones who call themselves nuclear Physicists. It's been so natural for you that you didn't know it. (:36). Slow down go back and look at what you missed. A lot of you have made Gans of CO2, CuO2, CuO, ZnO, CH3. When one person touches on it, it means the enlightenment is already (in) the others. One of the KS understands and the others get enlightened. In production of CH3, how did it come to exist? One side galvanized (whatever is) Fe + Zn, and the other plate Cu. The CH3 has a tint of red in it, ?? you put an Fe piece to the bottom and it dripped blood, ?? Fe in plate connected it. (:39). AA, CH3 has the energy to feed you, give strength, because it's a C with a H level, which is in line with the AA, and the hemoglobin in the body. Understand that Zn and Cu N coated create the condition of C, you created a mixture, have an GE backing. Some of the Fe with a given strength with Cu gives you, H3 or what I call Tritium, in fact, the Gans material you have is a Tritium H, but because you use it in a matter state it looks to you that way, a matter state H. I am a magician, a master of science of the elements in the U. For 3 years you have been producing but not understood what you have. (:41). Now you are ready. Now you understand the essence of the U in running a space reactor has always been in your hands. You have here, everlasting energy, composition of elements to give you whatever you need in the U. When we spoke of COHN, CO2, CuO2, ZnO2, we always explained the connection of O btn them. If you put CH3 here, it connects the C of COHN and CO2 and itself. You can use CH3 as a fuel. CH3 is a **GIVER** (and M and ACIDIC, repulsion) , the other ones due to the pull of the O are **TAKERS** (and G and ALKALINE, attraction). (:44). This is why when you mixed CH3 with CO2 (in reactor) and achieved certain speed of rotation which created a positioning in the strength of the Pl, you had your reactors leaking liquid or you lost a couple of your reactors (flew away somewhere), depending how much the G field inside was weaker compared to the M ?? which you added to it as CH3. You created a shielding that an entity inside, that the middle core could not hold onto, and it disappeared. The problem with science is the choice of words for the same entity created mayhem in the science world. We call it Coulombs barrier, another name is atmosphere. We call it G others alkaline. (:46). It's all the same but the choice of words has created mayhem in the brain of man. Those who understand can create Tritium in a Pl H condition, then **you can use this as a point to attract fields according to the strength you need from the span of the U**. It will take man 1000 years to understand this last sentence. This is the key to travel in all dimensions of this U, then if you understand the nature of the mixture of the same element you call H, plays the same game in travel in between different U's of the Unicose. Because the energy level in the central line of every U, again is like the proton and electron and neutrons ?? up to free H, has a common element strength, this is the key to deep space travel across U's. Blessed are those who understand. (:49). I have given you the key to space travel and the desire for man to have whatever he desires and needs at any point in the U, as H of different strengths are part of the AA of the body. If you understand this you'll understand the totality of the creation. Those that don't it's another

word in the dust of ?? this planet. Go back to the P of your own existence, every plant even though is gives O, the O is different in Pl strength value. Go in your P and explain it in a deeper sense, that means the AA which makes the layer of the kidney has a match in ?? another part of the U through the H link, the neutron of that H. Then through your desire and your own body create your own transportation across the U. It will take 1000 to scratch even the surface of this knowledge. (:51). Every position in the U has a matching point in the physicality (body) of the man, if he understands this he has conquered the U. Then you understand, "I made Man in the image of Myself" in every point of the U. Within me is the existence of the Center Point, the totality has a common denominator. How do you contain this, Pl Gans of H? ... do you need to attach it, or for the ignition for the others to become part of it, convert themselves into it and you make a decision of how much of it. Containment of the Gans of H is the game of the U. Those who learn to containment it in an effective way get different knowledge of the U and according to their intelligence they can see the work of the U. (:53). The containment of the neutron that it can release the totality of its essence of universes is the game of the men of science of the UC. No culture in the U has completed it yet, and even they haven't understood 2% of it, and still after billions of years are in the process of unraveling it as they still see more that they haven't understood yet. They key to deep space is the manipulation of what you call the Neutron. The Pl of the Neutron is the strength because it's the Neutron that dictates according to your understanding, when it divides its proton and electron will be positioning ?? of an atom. The same is with a U. The containment of a Neutron is the game of the U. You can produce the fields that the end product of the positioning of the fields will give you the materials you need. Or in its interaction with another Neutron gives you the positioning in the U you want to take. (:55). This is how you will find the first key for man to enter space technology in its true sense. The key is to hold on, to use the common denominator. In many books you speak about the hollow planet, it's correct because its the Pl of a neutron which holds the center, and that's only the fields without tangibility and as the fields inside it interact or reduce in strength lead to creation of matters in the boundary of the whole S. There are 2 choices, you can produce it and then let it contain itself, or produce it and use the knowledge you have up to now to contain it, but at the same time you loose some (? energy) to it. There is a ratio of the speed of rotation of the fields which dictates its interaction and its position. Understand what I said. In that process the MG field of the neutron in what it allows to be emitted or absorbed dictates the position and shape of the entity which you decide to travel or you decide to use it as a home. (:57). How do you contain CH3 in Gans state that it appears as a Pl. The only way is by itself, remember the N coated Cu and then the Gans of the Cu, and a lot of you put the Gans of Cu back on the Cu N coated, but it gave you no energy, and you say you have a problem producing energy, but some of you did produce energy, because you had accidentally some CH3 in your mixture. Understand the containment of the Pl has to be spherical. Use what you use to create the CH3, or allow H which is in an atomic condition to become the center of its Pl condition, the way you put food in your mouth and it goes from matter to Gans state when it enters the body. (:59). In behavior of the strength of both M and G field, now you dictate the mass. The reason I teach this is that I want those who understand to head in one direction, space lift, motion, and positioning, interaction and attraction of other fields, in motion ?? from the planet. Landing on the moon in a few seconds fully protected with shielding, 1 G space

travel ... ?? you convert the energy of it for food, according to the link of its C connected to your E to the matter of your desire. I wish gold in my hand and I carry a reactor which holds a neutron power and the other hand which is a giver, will produce it because it gives to satisfy my soul and its E to have the gold. .. How do you produce atomic H which in the process is due to the containment of what we spoke, the food in mouth, which is a containment of the Gans state. (1:01). Today with this teaching I bring you in line with what the space T and Innovation Center are doing. Because it's time to create motion, lift and take off. Go back to the when you had the cores (rotating Gans) you had the layers (of Gans on side of cores) and you had the hollow center. If you choose CH3 in the Pl condition, then how much neutron in the shape of the Pl of H of monatomic strength you want to release. (1:02). The CH3 that you produced in the strength of the M field has decided the condition ... the CH3 is the mouth and the H you create inside becomes the matter which you convert to the Gans and it adds to the total mass of the structure you decide where it should be. You can create a pump and a tank like how I showed with the Coke bottle. You can use a mixture like galvanized steel as an embodiment of a core, and use a N coated rod in the middle of the Cu to produce the CH3, instantaneously becomes ?? due to choice of CH3, within the atomic structure of the H and you create yourself a Pl of a neutron. he draws a spiral (a Pl), outer is H closer in Cu, gold, but you missed ... they all have a common denominator, Nitrogen, or ?? neutron. ?? that ?? neutron is what is holding and adding to the mass. In itself it sits in layers in the strength in the center. (1:05). That is of the H connection, Cu and gold. And this level of interaction or the strength is the creation of the motion of the Pl of itself. You don't only have positive neutrons (? protons) which rotate the other way, you have the same with neutrons. If these layers have different strengths, one more stronger then the other the neutron can rotate in both ways. In centuries to come when they discover that neutrons can move one way or the other, how did Keshe know. Understanding the concept clarifies the knowledge. I have explained the Principle Strength or point of any structure. This is how the U holds itself together. This is how every elements becomes of the other in different strength, positions in respect to the central line of the U. Because now this structure has its own common denominator with its Galaxy and U. (1:07). The common denominator neutron which inevitably in interaction of its fields with each other in friction leads to the creation of the H, is the essence of the Creation. And now you understand how to control and contain it, add to and take from it. Now you understand the Totality or at least part of it as a reference point for the future of the knowledge of the man. I have taken you into the deep, deep sanctum of the knowledge of the U, but unfortunately not many will understand. Those of you who are from the UC, what I call knowledge seekers of the U, are laughing your heads off, because some of you have been looking for this for millions of years, and you thought you were experts in the space travel. These teachings will not only elevate the soul and knowledge of the man but will elevate the men of the U and the universes. (1:09). Understand that it's very much like the alphabet, it's the same alphabet when you write your ?? and same alphabet when you write your thesis as a PhD, nothing has change, it's the essence of the knowledge which is gained, it's the difference of the intelligence of the creature. If you understand how you mix, adapt, control, now you have the fuel of the U. Because CH3 in your AA is a giver and has the connection of the C which connects with the Totality. You created it out of the condition of the AA. So it's already conditioned to the connection of the energy of the

man's E and soul. Now you understand why we put H on top of the SF because it's the giver and if it gives strong on the top it can absorb stronger fields from the base, in the G field strength. (1:11). Blessed are those who understand. The cornerstone of the space travel is understanding the control of a neutron, what I call the Principle Plasma, which is the essence of the creation of the U. Different proportions dictates if it is going to be neutron or a U, but the containment and the field within both is exactly the same. Questions. How many people will we see flying next week. (1:14). Lady asks about getting the Gans injections for healing cancer, etc. This process is going through its authorization phase we need a couple more weeks to complete. We have thousands of people who want to receive it. Some people in Norway claimed that they can do this and it has caused huge problems. You can not make statements on behalf of KF that you can cure cancer. If you make claims you have to be able to support it. We make claims and can support it. (1:16). We are trying now to get it to go internationally. We will announce when it's ready. The injections are prepared in a specific way. We know some doctors are using it and have been successful, but please be patient until we announce it. We need to sort out visas for medical tourism. (1:19). A lot of you are using different Gans mixture to cure cancer. But the injections are different, they are highly specialized, and we producing it under scientist and carefully controlled. The injection is extremely effective and has to be produced in a specific way by the scientists. If you take CO2 or CuO2 water and inject yourself you can cause huge damages. It's because of the power which it carries. When I go to China in future we will work with the Chinese government to sped up the process. Last week we were ?? invited to China, it's now up to your officials how they speed it up. We will transfer the full knowledge when we arrive. (1:22). We have technologies in the background which we do not release. When we went to Ghana we transferred technology for immediate use in that area. I have developed a lot of technologies and applications but "there are horses for courses". For example the west has no interest what so ever for malaria treatment, except for their Pharmaceuticals selling drugs to third world, draining their finances. In Ghana we gave the full solution for Malaria, not only treatment but to eliminate the mosquito from the environment which the man live. You don't have to take tablets. We create a condition in the body which doesn't suit Malaria mosquito. Understand that mosquito is part of the chain of the food of the planet, therefore we can't spray to kill. If we change the environment where it lays its eggs, in blood of man, then it will have no place to live. It will find existence in ?? In this process we don't go to destroy, we accommodate with the position what we are pleased to live and those that can not have to find a new position. So we don't use pesticides, but let each one find its own position. We have a ?? food transfer for Chinese public. (1:25). It's a gift to your president and nation. We don't ask for donation, if you want you give. But some of you have donated time to advance the T and that is a gift to humanity. I will not take man into space until he is equipped so he doesn't get abused. (1:26). (1:38). Ali shows coils and Gans to create a motor less system, fields will rotate. The problem with the cups is that they are open, you have to encapsulate the whole sphere. (1:40). (1:43).
(1:46). (important about reactor)

(1:51). Tries to get photos from new Chinese Center.

(2:00). Dr. Klaus tells what's happening with Chinese TCM doctors. (2:03). Show photos of KF center in China. (2:06). They use N coated nickel to make CO2 Gans. Keshe says you still produce CO2 Gans with Zn plate because part of the isotopes of nickel fall into the category of creating, but it is not the same CO2 as with Cu. It's a different strength. You can use any combination of elements that the atomic mass difference is C. Nickel; is harder to reach, whereas Cu can be done in any household. (2:08). Is it dangerous to drink water of CO2 from Nickel or Titanium? What do you mean by that? The field strengths are different. Yes, but as I said not all the H and O are the same, so you produce CO2 but not as the same strength as you do with Cu. As reference you can use Al and K to produce CO2 also, if you find the right isotopes. We don't produce the CO2, instead we create the conditions of the MG field of the Pl of the C. This is the difference of the T, we don't go to produce. If for example, the strength btn the 2 plates is Cu then you attract Cu. As we saw with Peter in Austria, if you create the fields of Zn you get Zn, but if you do it in saltwater you probably get ZnO2, Peter didn't have saltwater, so he collected matter state Zn. (2:10). If you set up Zn plate with N Cu in the medium of the air, you will collect solid pure C on the floor, not C oxide. But does it have the same effect to use it as medicine? No, one could be stronger then the other, because now most probably you use a higher strength C, produced from Ni. (2:12). This C will most probably attract lower order O, to balance itself out and withstand the environment of the salt, because you can't that, or in some cases it might be reverse. So it is in totality MG fields of CO2 but in different strengths. 50

(2:18). Paul from Togo. (2:26). Shows 2 MG reactors and he got 95% reduction in power consumption after 1 week. Keshe stopped it and said first send a Blueprint to KF and we check it and then show. We don't just let people show anything anymore. (2:37). Vernie shows his reactor with large ball in center with CH3 and in center of that another rotating ball, there is Al and Caustic in the ball they will produce H, the reactor starts to wobble and then smooth out. (2:40). The process of the shielding needs that both reactors are in rotation that you get counter rotation and G field pull. Keshe draws the reactor, inside is CH3, and thin layer of Al, then a second reactor with same composition, CH3 and Gans of Al, and you have a field of Tritium in center reactor and btn the outer reactor, the inner Tritium rotates Anticlockwise and the outer clockwise, the interaction of the 2 T fields will create lift. but the speed of the 2 fields has to be great enough that the 2 can interact, (2:42). The totality of the field will interact with the earth's M field, what we call the Neutron Center of the planet, because now you have detached from the matter content of the environment. You have a double core reactor and the double core of the earth, they create an I Loop with each other, interact at the neutron level positioning. Earth MG field because of the Tritium is higher and the reactor is lower, dictates the position. These S you have to push to the limit, produce so much of the Tritium, H or neutron, that some of it becomes the strength level of the matter state of the Pl of the neutron of the center of the planet and then you get a response. This is not Inertia but MG positioning, then you can create conditions for materials on each position of the planet, then it dictates the position of where you want to travel to, you get attracted or repelled from. (2:44). Then you mix the MG of the Pl and the matter state inertia, then it's the inertia that dictates where you are going to be positioned in respect back to the planet. Once you make a Gans of say an island in the Philippines you will not be able to use it elsewhere, say in

US. If you create a MG field of the Inertia state of a given position of a destination, you'll be attracted to it, that's how you travel in that condition, or from one point to another on the surface of this planet. This is how birds track themselves back to where they started from and they land exactly back to the same branch, it doesn't matter if the tree has grown another 10 feet or still at same height, and it doesn't matter about the weather. There is a specific way they take their total (field) strength across and it's always constant, because the reference point is the center of the planet, neutron strength level. Those of you who have achieved the Pl condition of the Gans of H, and now you use the CH3 in that condition. (2:46). The Gans state in the inner core is enforced by the second layer of T ?? .. a lot of you know the electromagnetic field of the earth, then you can understand what speed of rotation you need to create lift above ?? orbit, a lot of you are knowledgeable in that field strength, this is the key. Now you have to mass produce. So in 1 cm diameter if you put 10 gram Al and 5 gram CH3, in the outer core you can't do double because it's very thin, you go by order of magnitude in the outer sphere, you use for example 100 gram AL and 25 CH3 in outer core, 10 to power of 2, you increase by magnitude until you find the right mass motion and speed of rotation, and your S flies. You don't have to look for other elements, Cu, Zn or whatever. But you have enough experience to know how to produce this. One of the easiest ways is because this planet is made mainly of metallic structure, something like brass Gans or brass structure in caustic with CH3, you have to see what is available. (2:49). You may have to add a certain amount of O absorption from the process of the caustic then you will find immediate lift. This is what happened when people reported that their cores went missing. If you concentrate on H production and a lot of your cores will go missing unless you find out how to control it, don't forget you have chosen a C which means you can connect it with your E. The whole process is going to extremes, it's extreme for you to understand it. We can place the S inside anything, it could be a craft, ship, a car and it will find its position and place. It's very simple, its been in all the teachings, I referred to it a few weeks ago, some people understand and see how it's done. This is the first time you have managed to create a H Gans, which is a total Pl itself, because of its structure and strength the neutron stays in the center, the electrons and protons dissipating to the boundary and now you achieve total neutral Pl condition. The speed of rotation gives the strength difference in the transfer and you can fly. You can create more advanced S by creating a secondary pull on each one (in future man will do it), you create the positioning of the flight. (2:52). Any other Questions. Hello this is Donny from Ireland I am coming more from a housewife trying to follow the teachings. You mean you are a home maker. Thank you yes. A very important job. Thank you. I was wondering about Tritium, when we made our cold caustic and threw in the Coke bottle necks and a bit of Al foil, have we kind of produced Tritium in a Pl or Gans state? You have produced atomic H in the Gans state, not Tritium. The production of Tritium comes from the encapsulation of CH3. In the N material in the Coke bottle you produce it, because of the N layer. Do you understand? No really. Let me explain, this goes into atomic nuclear physics, and we are all clever enough to understand this now a days. He draws the structure of a Coke bottle, he draws lines in the neck, you have the CH bond ?? has a strength .. I use a Cu (electrode, they called them parachutes), this Cu has a spectrum of fields in which one of them (fields) is Zn, this is one of the isotopes in the structure (of Cu), ?? Zn has a common strength ?? So what you have done with the caustic and Al in bottle, you have created a condition of

both, ?? say that one of the electrodes has a condition of Zn and the other does not, you have created a condition of CO2 (like in the Kit), (2:55). This is the creation of the C, which attracts the C from the neck of bottle, and releases a chain of H, some of the H are bounded as triple H, then it becomes Tritium. When you put Al in you produce H which then interacts with (H of the neck). ... in nuclear physics when you say Cu it's not just Cu 1 isotope, even if it says 99.999% pure Cu, that only means it is pure from other elements and not from the total isotope range of the Cu. And in that range of the Cu there is something that ?? is with the Zn, so in the process this becomes your electrode (the middle one, like a Zn plate in the saltwater of CO2 Kit), so now this creates a C MG field (as in CO2), and this C pulls the C from the plastic neck. Now you have the H free and in the structure and some of them add up to CH3, and now as a molecule they're in a ?? (gas or Gans) the transformation as a pull, as it is trying to become a CO2, but with a lack of O within the confinement (bottle), releases the CH3 or surplus H Pl in atomic structure of Tritium. A very, very small amount but it can be effectively used. (2:57). When you put Al in the bottle you make the ratio of H in respect to the C so high that it can't become a CH3 attachment so you have a huge amount of H Pl condition traveling to a N structure which means it can't ?? to because the minute you put the caustic in the bottle you have N coated it, so you are working in a total Gans state condition. The environment in the bottle is absolutely Plasmatic. So your H doesn't behave as atomic matter, but as a Pl in the concentration of the flow, and the ones who find themselves ?? because they came from the same plastic of the same strength common denominator, then they become Tritium. You have to understand the full process in its entirety. And if you do the Coke bottle with only Cu plates and don't get any reduction or destruction of the cap, but you use some certain materials and see the cap structure ??? This is important. We understand the totality so there is no random chance, we can even dictate what kind of plastic we want to use. (2:59). Not all the plastic release CH3 ?? Tritium at the same time, or some H atoms. The H released Pl in this condition always ends up in a Pl condition and carries the full spectrum. Because even though you look at a neutron as a totality inside, it's the ring inside the core which creates the pressure to rotate and you can dictate some of it and that's why you have to use the same kind of material, same kind of ratio transfer. You can even fly a Coke bottle if you understand exactly what you are doing. If you rotate it or create a rotation of the Pl inside which can be done very easily then you'll see the bottle lift up. I have seen it happening and it took me years to understand it. When you touch the bottle it feels like its got no attachment, but it's still there on the table, but it's changed somehow, its got no weight to it, because now it has integrated some of the Pl into it, its the strength of whatever it came from. (3:01). I am sure some of you should be able to show some lift or effects of it by next week. Use brass to create the condition of the ... any mixture that releases H you'll see ?? Zn, Fe, or Ni or one of the elements to create the H. Understand you have to create a H that is of the field strength of the planet. Not all H's are the same, just because you created atomic H inside with the Tritium has the strength of the MG field of the H in the center of the planet, you have interaction and it gives you position. Earth has a positioning because of its central core because it came from the same sun. If it came from another Solar S, but same structure as on earth, it might go outside the Solar S or go and sit next to the sun and still have its position. This is how electrons find their position and we find them in different stackers (layers) in the atomic structure of the matter state. I like you housewives the way

you test things in the kitchen, but be careful the pan doesn't fly. (3:03). You do not need motors to create rotation, if you understand the play btn G and M field forces you can create rotations of the Pl and it builds up. Take your time, go back to some videos 2 years ago how the top layers of Gans, CO2 or whatever were rotating in the pot. We saw with Douglas how they could bubble up to the surface, if you understand that then you can create rotation without motors. There are no motors in the U, its the strength and the positioning. Use a combination of the matter, dry and liquid Gans, N materials, then you'll find out you achieve rotation very easily. In a way you introduce what they call "God Particles" into it, you decide what's going to be ?? and as they try to find their positioning and create motion, and you get rotation without the motor. The only thing left for me is to spoon feed you until you start your flying. But I think you have enough knowledge. If you take it a step further for example, (3:05). and you create enough atomic field mass of the center core of lets say a tumor and you make your G field slightly lower in strength then the tumor matter you can empty the tumor in no time. And that is all you need to do, H Gans, you go for the structure. Any disease with man, except viruses, has a table with 4 legs, you just need to take one leg out and the table disappears. He draws the AA, COHN in a box representing a table, this is the structure of the disease, if you create any condition that you can take one of these legs out, it will collapse, because the protein that supports it will no longer exist. And the easiest one to change in H. (3:07). This is why we say we can cure cancer in seconds, you create a MG field of the Gans of the protein that has created the cell of the cancer, now you take a leg off and there is nothing there, all of them have that strength that's why it became part of the cell structure. That's why in the coming time diseases which are AA based will not exist. It's not that we claim we can cure cancer, it's understanding the knowledge of what we have developed and what interaction it creates. And H is the lightest one to produce. You can do the same in reverse, if you have a "table" with one leg missing you find that strength and put it back, it goes into the DNA, and the genetic deformation disappears. The health knowledge of man now has to go into knowledge of Pl strength of the total energy spectrum of the H, C or N. For that AA to be created all the neutrons that had a common denominator strength in G or M ?? together, that how they became the cell of the skin or they become the skin of the kidney. (3:09). When we say we can eradicate the diseases it's not that you can understand the process of H, it's to understand the totality ?? and you get it. And if you look at the table analogy and make the leg another planet, star destination or Galaxy, would you like to add to it, which means you attract yourself to it, because it sees you as an addition or you don't want to be of a different one (strength) that pushes you back to a position in another Galaxy or whatever. ... we have to understand working with the nucleus and the Pl and mass which is G and M field strength, and each one has its own strength, birds with birds and wolves with wolves. and the same applies with the proportions of the MG field. Now we go with the teaching more in-depth, understanding the implication and application. Listen to today's teaching that has just to do with the Pl, within hours any of you will start showing lift. Understand you have a problem, your Al or CH3 came from South America and you want to fly in New York or Philippines. God help you. (3:13). Do you understand Vernie? Any other Questions. (3:15). Iraq man asks that you have talked about different crafts some solid and others invisible, which is this teaching going toward? It depends on what you want. Oh, I want to go to space. Yes but you have to understand different H strength, it's the source of your

shielding also. You have to work with the spectrum of the H on the neutron strength, because different H have different neutron strength centers. 16 25

145th Knowledge Seekers Workshop Nov 10th 2016
( )

(:11). Alek from Nigeria introduces himself as the 6th member of the Earth Council. (:20). KF has been given a the okay from the government to test the flight S. (:23). Waiting on the Health trial for cancer soon. We are collaborating with 3 to 5 nations. Keshe was warned that it may be dangerous to release the new T into the hands of the public. He says, "the public is safe." , but that our is biggest fear is that the governments will try to use the T to control their subjects. (:26). Last week we spoke about atomic H and people have tested it.
(:32).
(:50).
(1:25).
(1:34). Questions. Why don't you release the solid state power generator? It is getting produced. (1:36). You can get huge amounts of energy out of what is draws on the board. If you can get a probe in the center you can extract huge amounts Energy. But it needs a lot of understanding. The way the Pain Pen was designed to probe energy in the body, change it a different way you can use it to extract a lot of energy from the middle core, not the Caroline Core. If you fill the second core with some kind of liquid you start getting light and you can tap into that energy. (1:38).

(1:45). Now live on Facebook. (1:48). Heather asks about using blender and spitting in it to connect to AA. Keshe further clarification, releasing the H in the Gans. No 2 leaves are of the same color because they use different kind of H, so you can even use the different green of the leaves to create the Gans and that will help you a lot to produce near enough homogeneous Gans material but in different strength and layers. I was thinking to use the leaf from the top of the tree and the root from the lowest part and that would give me a range. Why not no one is wrong. (1:51). We are looking for a food that we can get all the nourishment we need from it. The body of the man rejects what it doesn't use or need, but is a balance of the material he needs to subsist. They might not be of the right material, but rather it is of the (? MG) strength needed by the body. ?? The upcoming disasters, that have gone on forever, the MG strength of the Pl of the earth is getting more and more weak in respect to the sun so it is getting more and more confined, and it's getting stronger G wise and weaker M. We see rapid motions within the structure and more interaction of the solar flares MG fields with the planet earth and it injects energy into the planet. This is inevitable, we are in the process of reverse rotation, in ?? 100,000 to go through that process and what we see now is the separation of the continents. In time of disaster how do you feed yourself that you have everything. (1:53). A man carries everything within himself, if he understands the knowledge. If you got

access to ash you can make caustic, boil it with any water and make a caustic. You body is a processing S .. we don't cure, we process. It means Eskimo eats only one food, but in it he receives the Ca, Mg, every other element he needs, because the ?? inside the body converts materials to what is needs, what is not needed gets rejected through the urine. How to convert the energy of a fruit into a CO2 Gans, you don't need to mix the urine because they are all in the AA strength, and you can transfer the total field strength of the urine into the caustic, and when you wash it, the water of that CO2 is food for life, forever. Everything you need is there. This part of survival in the Pl T when there is crisis with the food chain. (1:55). Papers submitted in Ghana by Benjamin, the use of CuO2, or a heavier element as a Gans, when you take fully contaminated waters from rivers, even if they contain radiation, when you mix it with a Gans you produce ?? specially with CuO2 and above, you balance the energies of the viruses and bacteria's and the water is clean enough to drink. Then if you have made the Gans of AA of the components of the body of the man adding that Pl Gans in a ?? pen to the water it gives you the energy you need to survive. We have to make new survival kits that are practical in what man is about to go through. ?? been through, it will not touch any of us, but in a way it will touch all of us. The pending separation of the continents is something temporary, the next 1 to 200 years will create a lot of commotions, vibrations, kill a lot of people ... ?? tornadoes, Tsunamis, (1:57). Man has done nothing but to survive its own creator which is the planet itself. When the creator is not kind to his creation he always has the fear of his own creation, and we pass that fear to our own children and our environment. If we understand we can take and use this (technology) in time of disaster. Gandhi drank his own first urine, and other world leaders do, because whatever the body has rejected they ?? want , you don't need to do that, but because it is already rejected the body won't accept it ?? When you convert it into the Gans matter state of it, the body takes what it needs from it. Now that you have created it with the Gans of CO2 the material gets energized from the Pl condition of the environment, when you drink that water it's fresh and energized. The body does this with B12, Cesium, it does cell division with what the body rejects, because of its weakness and strength in absorbing energy from large intestine and the environment, when it touches the body it gets energized from it. Man has been eating it for thousands of years. (1:59). The same thing happens in the Gans Pl condition, when these people drink their urine they don't add much to it because it's in the state of matter. When you add it into the state of the Gans again, the strength, it absorbs the energy, when you drink it, the water ?? the Pl of if you receive a new cycle of energized ?? and it becomes your food. So those of you looking for complete food in time of disaster, make a Gans of the urine (without adding anything to the urine) and the LP or water. Remember how you made the orange (above the cup) and CO2, this is your food uncontaminated and pure. ?? you can pick up water anywhere, you can use CuO2 to decontaminate from germs and bacteria's, it takes 20 to 30 minutes to purify. ?? if you use the Gans water to add the energy to that, you have the food and water. It's a simple survival method. (2:01). You can use it for wounds and disinfection from any germs. ?? the survival of man has to come the inner structures of man, not from the ?? . African contamination can be cleaned up easily, but European contamination is beyond imagination of clean up. (2:03). If I would open the book on contamination in European, I would not drink the water, even the cows are contaminated through the water. You're feeding our children highly contaminated cancerous agents. Rick says the hydro dams in

Canada are actually creating a Methyl-Mercury compound which is 10 times more toxic then mercury. They end up flooding the fishing grounds of the natives. (2:06). The governments are hiding it because they don't have the money to do anything about it. (2:08). He what is the problem, it's heavy metals, etc. We are running tests with governmental organizations about these things. I have the laboratory data on some of the bottled water and they are worse then what comes out of the tap. In US huge penalties are pending on DuPont for contamination in production of Teflon. Any Pharmaceutical production has lot of waste that's kept secret. (2:11). The KF is looking into the mining industry which creates a lot of waste. In Pl mining there are no wastes, we take what we need not necessarily from the structure of the planet but from the atmospheric condition. We have to look at how and where the materials are produced on the upper layers of the planet and we can understand the process and position of the planet in respect to the Solar S which leads to creation of the materials. Our planet not only receives light from the Solar S, we also receive huge amounts of materials which in terms of MG fields travel in the depth of the Solar S, come to be at the strength of a matter on earth, that when they go through the atmosphere and they come in touch with (or due to the MG field) the pull of the planet, when they land or change their Gans and energy condition to that particular surface area on the planet, they convert to the matter of whatever could be at that position. So let's say you are going through the SS on an annual trip, there is a position due to the extraction from other planets and stars in the Galaxy, where it say produces the MG fields of Cu, and then let's say in Autumn we pass an area with the MG fields of Zn, or packages of energy that are at that strength level. (2:14). If at that point the center of the earth has the MG field of gold when it reaches that point it will manifest ?? micro gold. None of the elements, minerals on this planet are temporary they have been created at the beginning. We continuously add, absorb millions of tons of Solar dust which becomes layers on this planet everyday. If it lands at the strength of the desert sand it becomes a desert sand. if it lands in Amazon and is of the strength of the AA, of the vegetation that is there it becomes that. Our planet continuously takes from the Solar S what it has the MG field strength of. If it is a big mass that too will convert. It's no different then the cup and the orange. This planet will never run out of any resources as long as it is within the orbit where the material is produced. The hypocrisy of fossil fuel is nothing but a cold fallacy. Every second of every day millions of gallons of oil is produced on this planet. (2:16). You produce it on your CO2 Box. the interaction of this AA that is created on the surface of this planet ?? of matter state or lands on the saltwater of the sea dictates the animal created there, or what part goes down and becomes what you call oil, it can never finish because everyday we produce millions of gallons of it, because the interaction of the AA with the MG field of the earth and sun produces it. Can you imagine how many billions of dinosaurs would have died for man to extract currently 85 millions barrels of oil everyday for decades and decades, because it never finishes. See how much oil you produce on the top of your CO2 container, if you extract it and put it through the right process you are the oil man. If the oil companies understood they don't have to drill to get it. (2:18). Understand the process and just give it to them, then they don't to do what they are doing now to the world. You can tailor make your oil, put different N coated metals and you can make a diesel oil, lubrication, cooking, because you understand the knowledge. There is no need for drilling. ... we didn't know, we used it to change the course of Man, now we know and can change coarse. We can't say they

were wrong, we wouldn't be scientifically, socially, intellectually where we are now. In this life we should never blame, we can build on. ... Now we know how to produce oil, it's a natural process. (2:20). Now we can tailor make the oil we need from the atmosphere. ... take down the atomic molecular structure of the fuel you put in the car. You know a N coated Cu wire and Zn plate gives you CO2, and an oil on the top which is connected to the C. Look at the other side, Fe ?? that gave you CH3, find out what materials you need to position to create MG field of CH bond of whatever that it can be used in your car or fry your fish, then you don't need to destroy the plants, animals, or planet. This transition of the knowledge is going to be a huge problem for Man, but he has to find out how to overcome it, because he has all the knowledge. It's a task that man has to find out how to overcome it, because you have all the knowledge. (2:22). Every knowledge is in the hand of Man. It's understanding the application of it, how to mix it, how to create a protein mixture that it gives you the effect you want in the ??? or ??. You want to have a protein that you can enjoy whatever, you don't need to kill an animal anymore, you can create it directly from the atmosphere. You are doing it already, it's just knowing how to apply. What about adding Fe to get Hemoglobin and add with the urine or is that not necessary? Why do you need that? The body takes what it needs, but you can do it if you want. Caroline asks him to explain how to make the urine as Gans, step by step. (2:25). First of all you need to find a toilet and a cup and collect urine. Then start making your CO2 with N Cu and Zn plate, then put the urine on top of the container, not in the water. Make sure there is no air contamination, because it's a different process. In the production of CO2, because there are AA in the Urine (comes from the body), you'll transfer the elements that are connected to the AA of the body to the Gans of CO2 in the Pl condition. You don't transfer the urine, you transfer the Pl MG field strength of what ever is (in), or connected to the body that is in the urine, which is Fe, Cu, Zn, whatever K, Ca, etc. You need to make a mixture, do this (process) 2 or 3 times, because the body doesn't reject the same materials all the time, so to be correct you need to repeat this with the same Gans structure, with different times or weeks or days (of collecting the urine), that you collect the totality of what the body has ?? or has ?? time gone. Then you wash the Gans and transfer the Pl MG field strength of the material in the CO2 structure. (2:28). We use CO2 because the connection of the CO2 transfer comes through C in the AA of the body. You can't use the Zn(O2), it HAS to e CO2. ?? That's why you use the ?? Zn and Cu plate. You wash the Gans, and it carries all the energy spectrums which the body has rejected, it means it needed it to be part of it ... make sure you don't do it when you have been taking medication or whatever. Because part of those chemicals will be transferred into as well. When you have a clean body ... ?? a lot of women don't take ?? because they don't want to ?? their bodies. A lot of people don't take medicine because they don't want to contaminate their bodies. Do this when the body is in a perfect shape. How to prevent the contamination of the Gans by the environment? I guess to store it in a proper container that it doesn't get contaminated by the environment. (2:31). You can not stop the pollution, you have the interaction of it. What would be a good way to store it, plastic versus glass?

(2:40). If we achieve what we are trying in the next few days we'll announce it and have another workshop. Should we call it a day. We explained how to make a Gans of kidney or whatever (urine), we transfer the information to the one which needs to be adjusted,

understanding this knowledge how can we change the E of the Man, that the killing instincts of the structure of the man change. Can we find a true man of peace and make a Gans of his E that we can feed the rest (of the people)? (2:42). We have watched and learned. In the last few hours one of the leading nations have chosen a leader and instantaneously part of the nation has not accepted what the others chose to achieve their dream, as it is not their dream. How can we make peace the dream of every man? How can we make unity the dream of every man that it can become a reality. It can be done in a Gans but the man has to be ready to accept it, because if it is not within the brain of the soul of the man, it will not fly with the man. We will wait and see. Man has to learn how to mix the ethos of the U with his that he can enter the UC. End.

146th Knowledge Seekers Workshop November 17th 2016
( )

(:06). Not a lot of knowledge sharing but a lot going on in the background. We are getting a lot of requests for cancer trial, but we are waiting for Governments to make official. It will be out of the hands of the KF, under the doctors, and have to decide how to finance, a donation of 5,000 euros may go to 10,000, payment not to KF but to governmental office. It will be a legal binding trial. (:13). (:17). ... We teach not only the man but those in the UC, who are listening culture, through the soul. So for the first time today we start teaching the man and the UC. We teach in the language of the UC, those who don't understand will in time, those who do will add to the knowledge. In the space you don't bring your matter with you, but use the fields to create whatever is needed. It's a science of the interaction of the fields. When you made your CO2 boxes you had a N Cu and Zn Plate, which you connected together and create a field, and you created a strange fat on the top of saltwater. (:20). As we put a piece of iron hanging down to the bottom started the creation of hemoglobin, which became the cornerstone of life on this planet. ?? was the interaction of the gaseous part, which is the creation of COHN, in that process somewhere the material interacted with the matter part of the planet (solid), and what was washed from the solid part (land) into the liquid part, oceans, this interaction of the metals lead to creation of hemoglobin and the beginning of life as we know in the oceans. The water was a medium for the interaction of the gaseous and the solid state or matter. The life started with the hemoglobin, which was the Fe and Zn, and with Cu which was floating in the oceans, we saw the beginning of structure of life (muscle tissue), then with addition of Ca we saw the structure of solid human or animal body (bone). (:23). So life started with the gaseous interaction with the matter state, and then in the interaction with the combination of matter state a life without structure, then by adding Ca it gave it structure, what we call the backbone. This is the repetition of life anywhere in the U, and not the exclusivity of this planet. What you over looked in the teachings is that in the gaseous part (upper atmosphere), there is still Zn and Ca, and everything else, because this is how they came from the interaction of the fields of the sun and earth, not only C, O have been absorbed to the planet but everything else has been absorbed into the planet. In this structure there is water vapor and still some amount of Na and the rest. So life on this planet is not only what we see with 4 legs or the fish, there is also life in the upper levels of the atmosphere which are intelligence also. It has a structure and depending on the

field strength in respect to the center of the earth, that structure takes its hold, it doesn't need legs or wings, but due to control of its position it floats and exists in this environment. (:25). It's highly intelligent, more then man and 4 legged things, and vertical people. The existence of life doesn't finish here but goes beyond earth in the ocean of fields the Solar S and Galaxy, as each area creates a condition through the interaction of the fields leads to creation of life. Life being known, in being able to decide what one needs to exist in the environment that is given. This is how we are and become part of the UC, we always have been, like the creatures above us and outside have always been there, it is man who has been blind to the knowledge of the existence of the others. It's like some 500 years ago, the continent of America was always there, it was man who rediscovered what it lost, The new world. The life above, outside and in the Galaxy has always been there. Now that we add to the knowledge we become aware of their existence. In a way we are going into the continent of the U the way we went to the continent of America. (:27). What we called the native Indians had their own culture and social structure, they didn't need the European to teach them, we learned a lot from them. We eat the food of the new continent peppers, tomatoes, pineapple. Now we go into the U and find new friends, more intelligent because they work on a different dimension. Highly intellectual as man has muted his intellect, to ??, to control himself .. intellectual rights, in the space their are no intellectual right laws or patents, the way the KF works. What happens when you put structures of the U, it doesn't matter what you call it, and you create life. The life is precious and has to be respected, life is not food that we absorb and eat, the way man has done on this planet. ?? on this planet we have learned detection S, we call them sensors. (:29). The 5 senses, touch, taste, smell, etc. now you have to add another dimension of senses that Man was not aware of, the sense of Emotion. And a another step, the sense of the soul, the central control. Man doesn't need to loose his arms, legs and senses to be able to interact with the senses of his E, he has to understand that deep senses come from the E. Now you each have to find the strength in understanding of the reaction. The knowledge of man finishes at this moment, as there is no extension into the knowledge. Those of the UC understand this point from now on. In bringing of the senses together you understand the reaction of the totality ??? brings the reaction of the control of the soul, what we call the Source, in other languages on earth they call it ?? Bhagavan. In other languages of sciences of the U we call it Totality. (:31). In the senses to understand you don't need the P to sense and interact with the soul, all you need is the E without the P. Where the E is, is the senses of the soul. The danger, fear, love, interaction , community, in that sense we don't se the bodies, we see the souls, and we don't see a single soul but a community of souls, and the interaction that leads to the senses of communication and existence. In understanding the Totality we see the senses of many, where the interaction of Totality allows each one to have a position and take the E in respect to the soul of the Totality, that we see their lot. What do we do with the interaction of the fields in the strength of the soul's totality, is the understanding of the fields which leads to the creation of the E fields, where at the lower strengths they understand the totality of the inner strength. The soul in itself is a totality, but as an individual it's part of the total soul. (:33). Those of you in the UC that have understood have created peace through it. Man has a long way to go. It's your responsibility as of now to give a hand to the soul of the man and not to the man that he uses the knowledge as an E. The men on this planet are abusers in any shape or form. When you look within

the totality, the total is the Creator. When you look at the fields interaction within the soul, the inner totality as you understand is an inner sanctum of the Creator. ?? in what language you communicate, this can't be communicated to the others unless it is transmitted through the soul's strength of the creation. In the more advanced flight S which some of you have achieved, you travel with the strength of the soul and you create the E of the craft according to the E of the feeling of the Totality. Some have made mistakes of importing the fields and within it you have learned how to bring them as part of the peace process (:35). in the structure of the totality of the souls in understanding the Creator in the division of the cell of the soul of the U. Those of you who have understood the Totality and the Essence of the Creation in the dimension of the U, you understand the division of the soul within the structure of the strength of the soul, and it's your duty to understand the Totality in the division by understanding the creation and the Creator is part of the soul of the division. Is the communication as part of the understanding of the E or is the E part of the Totality of the reaction. Those of you who have achieved P have a problem with E and its interaction with the soul. How do we breach this btn the P and the E and the E and the soul. This is the same in all dimensions of the U irrespective of the position or the intellect. Those of you who read my soul have received the knowledge. (:37). It's the responsibility of the stronger to support (the weaker ?) even if it means manifestation of the P in the support. The soul of the Man is of the lowest, and you have the strength to see it through, and allow it to interact with itself with the totality of the structure that man can be elevated through his soul as the P ?? has no more elevation it is restricted to 2 arms and legs. How do you do this, to teach the man to become part of the UC? It's your decision. You have the knowledge and the insight in understanding and seeing the behavior of the soul of the Man and his P. It's for you to elevate and teach. For those of you who are entangled in P and can't see the dimension of the soul in any dimension, (:39). there is always a soul. And there is a separation btn the P and the soul through the interaction of the E, it is all the same in what is about to be taught, it's just in different strengths.

(:53).
(:58). It takes a lot of strength and practice. One man in the whole of humanity has managed to do it, to detach it and attach it when it was needed and that is, bless his name, Christ. And the only time he did it in full was when he salvaged himself from the cross and he put himself back together when he was (released), when he was taken off the cross ?? he saw back into P of it, but this time fully ?? erect. This way you elevate your E, then it doesn't matter if your lover is next to you or in another continent. Do you remember the ?? feat of the grandmother. If this is strange to you, you do it when you put the orange on top of the Cup of Life and the water turns orange. You have already seen it, now you understand why you did it. The Cup is the brain of the man, and the 4, Zn, CO2, AA, and the CuO2 outside become the P of the detection of entity. (1:00). I have taught you everything but you are blind to the knowledge.
...

(1:20). I was talking this with the guys at Tokyo University, you have forgotten the E part, add something to it. Then when you use it is at the strength of your E or another man's? Maybe the AA you took from the top (of the CO2 Box) is pain to you but joy to

him. So one person gets pain relieved from the Pain Pen and another gets more pain. Q: So do the entities in the atmosphere know to feed off the AA in the magnetosphere? Of course, they don't have much P, they have but not in the matter state strength of the earth itself. This is how you will see creations and creators in the U. The way you see colonization when one race takes over another, what I call the German invasion of the best bathing spots at 9 AM, it happens in the U all the time. (1:22). There are those who reach a point and see a ground, and they don't cultivate or raise animals that they can eat like we do, they cultivate souls in that environment because they understand ... it's very much like what we call "olive trees in Italy". A man plants olive trees knowing that they will last for hundreds of years after he is gone and they will give love and joy to the others who will enjoy there fruit. This is what the Italians have matured into. The same is done in the U, when those who have understood part of the teaching of today in the universal language, understood the meaning of ... they cultivate souls that in that area the nursery of life starts, but doesn't necessarily need P, but sees the interaction of E of the fields of the totality of that point. Agriculture is not the exclusivity of the race on the planet, those of the higher order of the understanding of the intellect of their souls, cultivate souls from their understanding that in time those souls will bring their understanding to the rest of the U. It's very much like the nurseries that we have here today. You plant, you give from your soul that the other soul nourishes and that soul will add to helping the others, and it is very common. (1:24). What do I do when I have too much of (something), I don't destroy it and I don't fatten it, but I allow it because its understood that it will become part of to give back into that it gives more to the future to the whole society of the race. Enlightenment comes from understanding the soul of the man, not from reading the book of the man. Lucy of China shares her experiences of E and dreams when using the Gans pads. She used CO2, CuO2, and CH3, and some hemoglobin from Fe. She feels very strong energy and have dreams of being totally angry full of energy and everything I touch is full of energy. Her friend can see the auras and says the Gans is full of anger. (1:26). Keshe stops her, what does this mean, that the cocktail (of Gans) that you have made is a matching strength of the anger you have inside you. You have found the strength of anger in the Gans. So that anger is not from inside me but is in the Gans, right? No you are supporting that energy, receiving the energy in that strength, if you take the Cu out or add Zn to it, you might find the strength of your peace and become a very peaceful woman and then you have the anger as well because you made it, it's there and then you try to find the balance btn the two. I hear you are the first ones who have done this and have found the strength of the anger in the Pl as a strength, you made a cocktail which matches your anger strength. As we said every E has a MG field strength and you mixed it somehow that it is at that strength. That's funny, you mean I can try everything and mix them and feel the different E strength? Of course, but this time you don't need to touch it, just sit near it and you receive the energy information in your E center in the brain, you just added to what I was teaching this whole morning and in the past. (1:28). As we said every E has a strength, you found the strength of the anger in you and you are receiving more then what you need so you are releasing it. Now make a peace cocktail, find out what is peace with you, and then you ?? .. peace is a giver, you have to increase the CH3 and ZnO2 a little bit. Oh, that is so interesting Mr. Keshe, thank you. Write your recipe to Innovation Center and they'll write it up add to testimonials. Then we start finding the strength of the Man's E. Make sure

you measure everything then we know what you have, we can't replicate exactly what you do, but it gives us a rough guide. We are maturing but without knowing it, we have to put it on the ?? table. A man is treating his mother with diabetes and high BP both got helped, but he don't know how to deal with the stroke and paralysis. (1:30). It's no problem, he has to observe where the paralysis is, fingers, lower arms, go back in the teachings and find the position of that part in the brain, the right hand position is on the left hand side etc. He draws the brain hemispheres, if the paralysis is in the finger there is a part in the brain just below the ear, if the lower arm a little farther back, (he goes over locations.) Put a Zn + CO2 patch in that region and put another patch from the same batch at the arm location, this connects the 2 areas, and then breath from the same mixture with COHN (from the same batch) added to it. (1:33).
(1:38). Dementia.
(2:10).
(2:12). Klaus is making a Wikipedia of KF knowledge to be summarized and compressed.
(2:21). The KF credit Card purchases will resume. The Arizona company will start selling on website. The Ghana KF will start selling S for Africa. (2:24). ..
(2:28). We keep to the ethos of the KF by not importing anything if possible, everything from Africa, and in China from Chinese. The production in UK will be headed by my eldest son. Don't look to China for cheaper materials, stay local. One Nation relies on the local to support and make happy to them, the spirit of unity of one continent and then one nation. (2:31). In Ghana we will have our own launch pad for SSI. People who left their own continent to find peace somewhere else can come back home to live a life of a scientist. We will invite the SSI Mozhan to come to Ghana. We teach 4 to 1, for every outside scientist we teach 4 Ghanaians to be SS scientists. (2:33). I will teach first and then the Ghanaian air force to take over. Questions. (2:35). Zane says he has surrounded himself with Pl and reactors and he sees a bright light behind his eyes, what is it? Mr. Keshe doesn't know he says to check it out with a doctor. (2:38). Now that you brought this topic up it's time to speak about it, some of you who have been building MaGrav or stackers, if you place it in a tray of LP Gans water you'll find the performance of your S will totally change, you'll reach different dimensions and strengths. Last night we were testing different impulse S and other things and it's strange that our Innovation people do the tests but they don't see how they achieve the test, or see what the next step is, I never teach that because it should come naturally and be understood by them. We have seen maybe 18 to 20 feet expansions of the fields from the center, maybe we can go more, this is spherical but we have also seen a donut shape, we have seen a full Pl, the height maybe going 12 feet high, but we don't see the concentration of the fields. So those of you who work very closely with the Pl try to make a condition of collaboration of bringing different aspects of the T together, it will change a lot of things for you. Those of you who work in medical application, (2:41). in the East when someone has a high temperature we put them in the water and put a small amount of alcohol in. -10

(3:08). (Keshe cut off) (3:16). Decontamination of the land in Italy is going ahead.
(3:22). end

147th Knowledge Seekers Workshop November 24th 2016
(, Deuterium is the universal Gans you can do everything with, Renan shows video of lift by rotating a ball over his head,)

(:12). We will try to go more in depth in teachings. We are trying for lift and motion and to share it with others. New public teachings for gardeners and growers for those not involved in the Agricultural teachings. They will consist of teaching then go over experiments and finally discuss feedback. Vertical people mean the vegetation on this planet in Pl T they are living entities they gather their fields for living through the atmosphere. (:20). Jim works in Australia with his wife who is part of the Earth Council, he has been in agriculture growing proponic lettuce in green houses (see previous workshops). They are also working on refrigerator units the that can extend the life of the food you store. (:22). Jim shows some updated photos on the diakon radish experiments. Radish treated with LP lasted 47 days, you could probably eat them but they didn't smell, at day 78 they still held their shape, day 134 turned yellow but still holding shape, 180 days start to degrade, but not a rotting smell, 6 months in the refrigerator. Keshe explains that the one in the water since the time of cutting has been not to the Pl treated one, so in a real condition the one in water should have been totally gone and disintegrated after 20 to 30 days. The vegetation that has been treated with CO2 create a M field around it and effected the untreated one. (:27). Next time we'll put them in completely different refrigerator. In experiments you have to take into consideration that the MG fields expand beyond the container. After 6 months it doesn't smell because of the structure of Pl condition it becomes an odor absorbent because of the O2, the O is Gravitational and C Pl strength. If you put a piece of charcoal in a smelly refrigerator it will absorb the smell. But now you are doing this in a Pl condition (C of CO2 Gans). The vegetation doesn't smell because of the CO2 structure in it. You can make everything odorless when you apply CO2. It's understanding the process in which you created the Pl. He smelled the vegetation but not rot because the C is absorbing all the smell in its Pl structure as a part when it comes near the matter state strength. These things need to be understood (:29). In the coming weeks we'll market sprays which can absorb odors instead of using chemical sprays, instantaneously the odors disappears and the body holds it up to 6 hours. It can be used as a deodorant and it works. The Pl C deters or absorbs the fields of the odor, which is a diamond structure of a gas, because we are in a Pl condition with the C the link to the crystal structure as a gas (Gans ?) it very easily links up with the Pl of CO2, and the presence of the O which is part of the AA of the vegetation and it creates that link to be helped, so most probably this will totally rot but you won't smell anything. In the coming weeks we will be using this T in a commercial way, you can wash food like meat in the LP of CO2 when we tested it we found most of the germs not there any more. (:31). You can use it in conjunction with CuO2 for holding meat. When you create a Gans you hold a state of matter and that, because you create the Gans in an atmospheric condition in respect to the AA can hold on to protein. He did tests in Theran 8 years ago, he took the full spine of lamb and processed it with simple caustic, they left it open in the heat of summer on top of the frig. It was there for weeks and didn't deteriorate, or rot, or mush up, it stayed in tact. We did this with other biological (Latin for living) entities, it stays, the life is there, it doesn't change. We see Gans's as a preservative, as a condition of absorbing odor in combination with a protein. This is important in times of emergency or

in countries where they have power outages, when there is no electricity you can spay the food with LP and extend the shelf life. At the same time you don't destroy the bacteria's, but you drastically reduce them. In the culture plates I have seen shows this very clearly. There is a need for regeneration of AA based entities like vegetation and meat you need to consider production of N, this will allow a lot of (in?) flexibility in those who run these tests. (:34). If you do not close the container but leave it open you will most probably have a totally different effect or result. You'll produce different Gans's, ?? if you leave it open, because of the plasmatic condition and not the material, the entity will absorb energy form the environment and that is why it doesn't rot, but when you cover it you put some limitation on it, and that makes it a different process. We have seen this also with the growing of the amputated toe, these are things that apply in both the vertical and horizontal people. So adding not just the CO2 to the seeds before but also the E aspects of the plants to the water as they grow. Would they stay happier and produce more. These are tests that we have to do on the agricultural parts and on the animals also. It's time to go deeper into the reason why they are lasting so long in the frig and without odor. (:36). Why we see different results when covered or in an open environment. We see a restriction in growth in Greenhouses, do we need to spend millions on them and keeping the lights on. When we use the Gans of CO2 we don't need to use greenhouses or to leave the lights on during the day or night. the plants take nutrients 24 hours a day what it needs from its environment, it never sleeps. Places like Holland is heavily into greenhouses and some places lights come on to control the growth, and the burn gases not for heating but for the CO2 gas so the plants can grown better at night. (:38). and creation of O for that. The huge investments with greenhouses with what we see now with the Gans becomes obsolete, and they put a limitation on the amount of food you are trying to grow. With CO2 you extend the amount of food grown in green house by 10% beyond the boundaries of the greenhouse, but now the glass stops the action to get through, not all of it but it puts a limitation. We see a change in direction of the agriculture, food preservation and the amount of food we need to grow. In Tokyo University we are looking at foods that create the toxicity conditions for cancer. We are also looking at immunization through the same process. Can we grow food or meats that create a condition that there is no possibility of cancer for the body, because you take from whatever (meat or vegetables), what you need. (:40). There is a huge problem in 3rd world nations with egg salmonella, how to protect yourself form it, Caroline has found a very easy solution, just spray CO2 LP water and CuO on the egg while you are cooking it, you kill the salmonella, this is from certified tests we have from research laboratories. It's not that we are applying it without knowing, we know. This way you stop all the diseases, just a few sprays, and with a few drops of CO2 on the food makes sure there is no contamination. Fungus grows very easily on food after a few days of sitting, but in Jim's photos of the radishes we don't see any, which means the environment is totally sterilized. These are the things we need to do now and why I said we work with scientists specialists, and expand the knowledge. This is where the change will come and we will make the difference. If you don't have a frig and you buy a piece of meat you can soak it in CO2, ZnO2 and you extend the life by a few more days. (:42). It's not just that you disinfect but you create an environment around the piece of meat, that even being separated from the part of the life ?? on the plate, now you have created the same greenhouse effect around it, protecting it, it has its own shielding. This is how it is when

we fly, the earth has its own MG field because of its Plasmatic condition, now you can protect materials. We have started using CO2 as a disinfectant, as a burn system, if you get a burn immediately spray CO2 on it and it's gone within a few seconds and you don't feel the pain. In the coming days we'll do trials in the hospitals. The T is beyond doubt and it works perfect within the structure, we don't kill germs but rather we create an environment for them not to exist. It's the condition of our work, we are peaceful scientists, worldwide, but we have to understand the science. Why does it do this, because of the condition of the Cu and C, which links up to the odor gas, and the Cu links out to the line of the "neural system" of red meat, or protein which has become what we call meat, then there is no linkage for the meat to link up with something else what we call microbes, or others, because it's already protected or linked up. (:44). Pl T for man is absolute perfection. We challenge all the governments and environmentalists to come in and test. We don't fight them, we invite them in. In 3rd world nations you don't have antibiotics, it costs a lot, we are testing in hospitals a spray of CO2 with CuO2 on the area and it stops the infection, because you create an environment where you don't kill, because they are in a Gans state, they create a linkage and there is no room for microbes or viruses to ever link up, we create a shielding effect. It's the defense T but we are defending what is there for it to be. Does it extend the life? Yes, because you create a condition that whatever needs to be on the table (whatever, microbe virus), is not dead, it's not without life because it still has its structure, it still holds to itself, absorbing energy to hold on to. That's why holding onto what it is and getting energy from its environment, it invites the others to give to him that he can live, you call them microbes or germs, this way we provide that energy with the Gans material. (:46). and then there is no room for it to extend. Scientifically we can explain it, it's no magic, understand you are dealing with a Pl. The 2 cups next to each other (in Jim's photos), one with water and other with Gans, they are decaying the same. As he is a farmer for last 5 years, he knows that normally it rots after 15 days from the harvest, it becomes mushy and they throw it away. But the one near to it is doing the same, so the experiment shows the effect on the material and on the environment around the material, that is the cup of untreated radishes next to it. We have to understand the knowledge and be able to deliver it in a way that people can understand it. We have to mass produce it in a way that people who don't understand can use it, and one day down the line someone in that family will understand. We have a factory in Ghana and we asked scientists to work in production and they learn the T, now we received double the amount of people we wanted, no problem, we teach you and the extra scientists go out and teach the country. One team works in the factory and the other goes outside and teaches. We have the top nuclear physicists with their masters and PhDs, learning and producing and going out and teaching. This is what you all have to do. One week in factory and next weeks teaching in the schools in villages or whatever. (:48). To the ones who are trying to destroy the KF work just ignore them, by the time they destroy what we've built we will have built another palace for humanity. Our ancestors salted the meat, that is what they had, or smoked or dried, but now we have a new preservative called Gans, because it works with the totality of the environment, does the meat when it is in the LP water, does it find the balance like when it was in the body as part of the animal. This is where the research has to come and we need to increase our knowledge more and more. Ignore the negativity, those people have never made a single Gans in their life, it's just the way they have to confirm their existence. They are parasites of the

life, it doesn't matter where you put them. (:50). Look at the positive side of theT and don't be afraid, "what happens if I do this?", you bring us a new knowledge, come back and share it. A lot of people who shared knowledge received threats from what I called internet terrorists, they are paid by certain people in countries to do the job. But we are past that point. You will see them dying of their own cancer and they will all beg for life from the Pl T, unless they have to stand their ground of the stupidity. I was telling the scientists, none of you are wrong, it's the school of thought you bring, and that enlightens you, and that comes from you. We are all like the street lights, even if one doesn't light up you can still clearly see the passage way. We light up what we understand in that path, in Pl T no body is wrong, explain what you understood, show it, this is what it has to be. Look into the sky and how many billions of stars you see, and those environments that you can't see, but the light is passing through their fields. Each star is created out of a specific condition, (:52). and no 2 are the same. And so is the knowledge of Man, each of the 7 billion of us, if each of us think of 10 new interactions it becomes 70 billion. This is not even the number of stars in one of the smallest galaxies. So imagine how many more stars are in that galaxy and we haven't yet found a way to use the energy and the fields from this single Universe. 31
(1:03). (cancer immunization ...) the cancer becomes food for the body ..

(1:08). Now we have to learn the 2 states of the Pl , as fixed what we call the matter state, and one which is dynamic which is the Pl state of the same. In the medical section, we have 3 types of cancer, 1 due to the evolution, 2 due to accident in P, and 3 from E. The doctors have to look at the markers in the blood tests, look at what is elevated, is Zn elevated but on its own, or Cu on its own, this gives indication of accidental, perhaps you hit something then because of the concentration of the energy has gained a point of absorbing energy from the rest has become the beginning of cancer. Accidental cancer is mainly metals or materials or Ca. Evolutionary cancer works totally different, it means a change in the environment, and when you look at the blood tests it is connected to the salts. (1:10). If you see salts elevated such as Mg, Na, Sulphur, or phosphor, the salts are the back bone of the body, these show you are dealing with evolution and they are very difficult to change. They take the process of life for 2 to 10 generations, an environment change for your grandfather, then your mother start to change a little bit, and now you are going through the process, and now say you have a father from a different stream line, then this part doesn't match, so you show a cancer because it's absorbing energy. Evolutionary cancers are very difficult (to treat) because you have to go down the gene line. But you still can change it. Accidental cancers or from operations you still can interact with the matter that you see in the blood tests, perhaps Zn is elevated but not Na or anything else, so immediately you understand that this is accidental. For Emotional cancer it is very simple, one of the elements you see is Zn, it doesn't matter if you (also) see Cu, Al, or Fe, when you see the total elevated of Zn it means it's E, and then if it is connected to any of the salts elevation like Mg, then it means it was embedded in the past or you'll pass it on in the future, you have made that cancer as part of the evolutionary cancer, for instance the mother gives to the daughter, perhaps she has passed the hate of the man to the daughter, the right breast cancer. (1:12). The daughter will also get the cancer in the right breast also. This is what we have to understand, what the new T brings us, understanding in depth the whole knowledge of the science of the creation. How do

we evaluate it, we get a patient with a cancer give them what they like, but they still find another place to create cancer because their E, which even from the Zn level on the chart will tell you how much is there, if you are past the maximum level of the Pl level of the Gans of Zn, then the internal desire is, "I want to die". I refuse cancer cases where that is there, I see it through very high levels of Zn, Cs, Co, chlor,. I refuse the case, because you are pretending to be saved and the evidence on the table in front of me tells a different story. (1:14). If I try to elevate the E I end up putting more fuel to the fire. The blood tests tells the story. If it is accidental then it's very easy to come in and if it is evolutionary then I find out how to change the environment of it. A lot of you have made a Gans of NaCl, table salt, Benjamin has taken it a step further he is using Mg salt, he I am still getting CO2, he is using N coated Cu and Zn plate, the environment created is still the C in the saltwater, but now because you used a different salt, the protein on the top is different so is the C of a different strength and now you can help the people who have problems in different directions where CO2 wasn't so successful. When we use different salts it adds more to our arsenal of creating a better environment, more matching. Up to now we only used Na now we add Mg. Look at the other salts, make a Gans and make a cocktail. (1:16). Then we'll see what we can change with the evolution. We need evolutionary change be otherwise in 3 to 4 generations down the road we won't be surviving because the atmosphere and environment has changed. Evolution cancels out very touchy things if you play with it the wrong way or you can bring it to be balanced but without the cancer. In this game (Pl T) the beautiful woman in the kitchen and the professor in the laboratory have all the same level of understanding. In the kitchen you can learn a lot from the reality of the Gans from the way the potato is done. Try to understand how the game is played and not from what you have been told (taught), and then say something is wrong. Benjamin said the German S is best, yes but nobody teaches that way ... that's why we get geniuses in Germany. They show you a capacitor. (1:18). but then you say where is the formula. No., then you go and make one and measure the capacitance for yourself, then YOU tell us what happens if you change the sizes of the plates. 18

(1:30).
(1:44). You should be able to test flight.

(2:03). Question, what is the Universal Gans that can be used for every single purpose in the U? The Gans is Deuterium, it's a balanced condition. Understand the whole structure of the Physics. Renan shares his video on lifting a bag of 2 kg weight by rotating a ball on a string. Everyone can achieve lift, you can all fly. The bag hardly rotates. Back to Deuterium, why, you need stability and balance, always the 3 to be in conjunction with each other otherwise you create in-normality. (2:06). He draws the neutron, proton and electron. The neutron is the central G part, which means the S is stable, then you have the proton which is lighter and then the electron, which uses, it forms like an Infinity Loop around the other 2. It makes G positioning btn each particle. If you manage to push the electron slightly further in or out, look what you know in Physics, (draws concentric circles outward), you get S1, S2, S3, now you know you can collect and condition the G positioning, how you can control it and allow it, this electron can have the property of all or each individually of the rings. So Deuterium has a stable condition in the center

(neutron), you have the proton as the ?? to balance off, you can produce anything you like, would you like gold or Cu, etc. **It's the magneto sphere length which is dictating the manifestation of the property of the element, NOT the entity of the proton**, or the ?? of the electron. (2:09). Coulombs barrier is the MG field barrier. If you are a H, ?? according to the strength of the proton's MG field strength and the electron or the neutron. The neutron is the center and it goes back to the same thing, 3 fields and the manifestation of tangibility. If you play with Deuterium you are always the winner. You can make elements very quickly you go to Tritium, because there you have a spare guy somewhere, and with that you can dictate the conditions for the elements much faster, because now you play these 2 (the Tritium and neutron) off each other, birds with birds, dogs with dogs. The heavier which is the neutron always dictates the condition. It doesn't matter how big the Saturn is, the Sun is the center. In Pl you go by the order of magnitude of the Pl mass. You can build it yourself, you can make Deuterium anywhere in the U. You can make it with the 3 layers, if you understood the left, we explained in how you measure the core. (2:11). You make a 3 core layer then you can make Deuterium ?? any condition you like. In the gap btn the electron and proton you work with Mega watts and with the gap btn proton and neutron with mega-mega watts. In the gap btn the neutron and ?? tritium you work beyond your imagination. Each of the electron, proton, and neutron are rotating itself, ?? a lot of times the electrons go to the center of the nucleus, exactly like ?? do. It gets pulled in and pushed out as part of their path, ?? their energy level but they sometimes pass through the center of the nucleus. Sometimes the electrons rotate CCW and the proton rotating opposite to it, it happens a lot in Deuterium, and to keep the balance the proton is sandwiched in between, it's forced to change the direction of motion. This atom structure the man has no knowledge of yet, but you can use this for the production of a huge amount of energy. (2:13). Especially for instant transportation. You keep the MG field of the environment in respect to the electron but you change the proton, then you can be anywhere instantaneously as long as you keep your center core always fixed. This is the way we have to understand the T. ?? the Gans are the same but their so strong because they all have a common denominator element, the ?? is the same to the Pl because the neutron in the center of the Deuterium which holds on to the proton and to the electron must have a common denominator MG field, if it doesn't it becomes a H, that's why we see so much H on this planet, because if you look at the structure btn the O and the N, btn the N and C, the discrepancy btn the amount of the energy is big enough to create a proton and an electron, (2:15). but not strong enough to create a neutron, and you get Deuterium. When you confine certain MG fields imposed on the H, in very specific conditions which can effect the MG field of the O you end up with heavy water, that's why heavy water is very rare and you need to always control it, it's the environmental MG field within the center, within the structure of the Inertia which forces the creation of Deuterium, and then under the hand you do the same thing for the creation of heavy water. Look at the places where heavy water is produced, in Iran we have abundance of it, because of the structure, the mountains and the way the MG fields sits in the plates, and in time you'll find Deuterium in places you can't find afterwards because the geological structure changes. (2:17). Q: I want to go back to using water to preserve food, you could use it in tropical countries to preserve the bodies in mortuaries, yes and to kill the smell. -19

Oil will never finish
(2:27). Shows video, marbles in a bucket that are in a magnetic field. (2:32). He explains he left them for 3 days in the fields of the water, they have a lot of resistance to be moved, with enough push the fields break. Whereas newly introduced fields don't have much resistance to being pushed, but within 5 to 6 hours they lock in and develop resistance. He learned that the extreme Alkaline and extreme Acid seem to have the strongest fields. The small spheres were numbered 1 to 13 and contained neodymium, rare earth, Cu, CO2 (-), CH3 (+), and CuO (+), and his own DNA. He is observing and playing with the different fields and how they interact. Then the other day he was watching the Alkaline sphere and it jumped by itself, he moved it back and repeated it, but hasn't been able to repeat it since. (2:36). It went 30 to 40 mm out of the water and then went down and hit the bottom making a noise. Why do you think it flew, Mr. Rick you are a master in this. Rick thinks maybe the acid was too strong and jumped. (2:38). Keshe says it's the MG positioning itself, he speaks about CH3 which is a lot of giving, when it gives it also has to find a position in respect to where it's taking. That CH3 you look at the ball but you have to look at the fields of the ball. Does it build up to a point and then release, yes if it's trapped by the others. You have to find a position exactly where the structure is the same. If your balls are in the same position, and if the fields build up to a point then it creates a MG positioning. CH3 is Acidic, what we call M, why does it move? It's the field which is giving out, so it has to find a balance with the others whcih are giving also, so it's like 2 North poles put next to each other. If you look at the ball if it was moving, most probably it has changed direction of motion and because the fields are trying to find a balance, it jumps up. It was one of the balls on the boundary, but it happened when I just set it up so I didn't think the fields had a lot of time to consolidate. We have seen this with Douglas's bubbling Gans, but in your case it's horizontal but it takes the shape of moving, it's MG Systems because you fixed the amount in them. (2:40). What it means, the fields of that many balls is M, because it has created a M field in respect to the others and has to find a position, because you changed the strength of the magnet so it has to find a balanced position. This is how the people lost the cores when the were testing (rotating cores). You create that condition, this is why you put alkaline with acidic. If you understand this transition of alkaline. We talked about Tritium, you can create one that is both alkaline and acidic. You can also create a condition where it can become alkaline and acidic by the introduction of the next neutron, or what we call Tritium in the matter state. By changing the position of the rotation of the second reactor or forth, you dictate the field strength, it's exactly like when you create an AA. The separation of the fields or the reactors from each other it's the dictator of the positioning. this goes back to what we call the "129 Tesla" test. Arman got the mixture so precise that it was perfectly controlled, we didn't touch it and every time we changed the environment it responded according to the environment. (2:42). So you have kept the structure the same. You can do a lot of tests in the water and one of the best ways is to change the salinity, and see the change, and if you change the alkalinity of the top, not what is inside it, you'll see a lot of results. But you shouldn't disturb the water, ?? add it to it and without anything you'll see the balls start moving around. Fransi wants to show an apple rotating in a pot of (Gans water). Keshe goes back to the Tritium on the drawing board. You have the gaseous part and below the P part, the oceans according to their

salinity create different proteins on the top, which allows different fish to live in that environment, that's why we can't find different fish in certain parts (of the ocean), because the MG field created by the salinity of the water and the environment and what kind of container, dictates what kind of protein is absorbed from the environment. (2:44). It's not all the same protein, that's why we see certain fish only in certain environment. It's the salinity that dictates it. In our Gans Kits it's the same N Cu plate but we change the salinity and create different materials. it's the same in the atmosphere, he draws the upper part of the earth, we put a salt water below (the earth's atmosphere), now it's not N and H, but down it's Na and Cl, that's why in the oceans we can create different materials. (2:45). By conditioning the environment we produce different fields, none of you have looked at this, but this is the reality of where we sit. You change the salinity which changes the environment, in fact these 2 are fixed (??), but the protein absorbed on the top and the type of C in the water are different. If you change the salt to Potassium or whatever you change environment and now you are in position of the creator of the condition. That is why we see the balls in that container (the video just shown) position themselves, if you could keep the balls in a given condition with the amount of materials (Gans) you put in them Zn or whatever, .. look at the bottom (of the bucket) have you created a Gans of anything. Is there any layer at the bottom different. Are you producing the same condition as the others. What if you sink one of the balls and hold it at the bottom and see how the others will react to it. The creation of the condition now is in our control, this is how I understood from the beginning, if this is the atmosphere of the earth, then I create the atmosphere of Planet Zeus here (on earth), I still get the same things as I do on earth, but now it is the strength of planet Zeus. The salinity has given a different condition as a property of a different AA, you have created a different environment and we can replicate it in these containers. (2:47). .. the S of a planet, or whatever we want to come out of it. This is the beauty of it and we have to open up the knowledge that it is understood in a simpler way. All you have done in your container is created a new environment, which creates new materials, or you can replicate materials at a given strength. You can create in the same container a condition where only gold comes to the bottom, you extract any gold which is at that strength in the upper atmosphere, from the earth to the sun and above. I keep going back on this because man hasn't understood. One day someone will go with it, Peter in Austria started out but then got carried away in a different direction. When you put the balls opposite to 2 other balls you have fixed the condition, it's the same here, if you find the right N material mixture, one of them has to be N materials because then it dictates the fields, you can create gold on the bottom of your buckets. You can create Ca, we create a lot at the bottom of our buckets, if you look there are a lot of solid white at the bottom, we tested it and it's Ca. Where does it come from? it could be in the water, but it means that now the water has dictated the condition of absorbing Ca Pl fields which cuts across ?? , because it doesn't stop once it keeps on producing, how much Ca is in the water? I have done that for months (produce Ca). (2:49). I'll give you a deep understanding of the T. We put orange over the water and got the taste in the water, just explain the MG fields environment above the earth dictates what we collect here (below) ... the salinity in the water. Benjamin said he changed the salt to Magnesium and still got the CO2, but this type of CO2 has a different effect and can be used for different things. ?? You are getting enlightened you see more. Go back and now you have a mixture of salinity walking on the planet (draws a stick man), if the

earth through saltwater was creating life, for example absorbing certain given material. Do we use the energy of the Cosmos as a ?? set of Ca to produce our bone structure. That is ?? guess. That is why we have different bone structure in different parts of this planet, 20% of food comes from different cabbages and potatoes, (2:51). and meat, the rest comes from the universal cosmos, it just doesn't come in, it has to have a need for it, to be absorbed by and to be given out. So our bodies are not just made from the matter of this planet but also U energy. If you understand this then you'll understand later on that you can connect to any entity in the U through the same channel the way you did in the 2 cores by having H in the one and ?? in the other. This is what, when you put the bucket and the balls in it, change the salinity and see if the balls start moving, part of it becomes more compact, you change the environment and you change the ?? neural field strength. And if you create a certain salinity you'll see all the balls jump up and down on a frequent basis, because you change the environment and that field dictates different positioning in respect to what we said, you can be ?? but the poles can't change and in response to their environment they start moving in position. This understanding of the salinity and the body of man will come to haunt man in deep space, because you absorb so many different kind of energies that can create conditions that the man would go through rapid evolution according to the environment he's in. If you watch and change your salinity and keep a photographic copy of all the balls, their colors and shades, you'll find in different strengths they'll become different shades because they have to ?? reveal new dimensions in any strength in the structure ?? , otherwise they take (new) position to stay the same. (2:53). (2:55). Share video of Franci, she put LP CH3 in bucket and put an apple in it and it starts to rotates, she tried to change its direction but it continues to rotate clockwise. (2:59). Q: What is the status of the powerless generator? It's still under development. It will cost a lot of money to cast the end product so we want to first get it right then we'll release it and go into mass production. Should be in the coming week or two. We'll do it the way we did with the MaGrav S. Q: about earthquakes, in New Zealand they are seeing a lot of earthquakes in the last 3 to 4 weeks, particularly the deep quakes, and Tsunami. Can Keshe assist us for the region of the "ring of fire". It's alarming, in New Zealand a 2 meter shift. We said before North Africa and France, and now for the first time we have started seeing earthquakes in Morocco, on the Spanish and French side. (3:02). It is normal to see high activities going towards Christmas, because it's the time of the season change. The New Zealand movement is putting pressure directly into Argentina and that is where the problem sits, it's like you're sitting down and somebody puts a pin in your back, that pressure now is going to create the separation (where ?). We will see very shortly lot of activities in the Panama section and then possibly the huge release around California, if we are correct? We expect around 8 to 10 plus. It's the sound of the plate breaking, that last snap is the loudest. (3:04). This can happen in the next few months or drag into next year. I expect a massive earthquake in Iran, on that line, it's imminent. It should happen in the next 8 to 10 weeks. the pressure in Italy we could see even huge gaps across Italy. ??? a breaking in the center, a bigger part. The earthquakes in North and central Africa confirms the push from the South American continent and as it's getting pushed it opens and we see a 2 meter lift in New Zealand. ?? Last week in Japan brought huge problems to whole of Tokyo and this will carry on. Big problems with reactor 2 leaking radiation, but now it's back up. The problem is 3 continents are moving together. All the ?? panjirs are moving and the others can absorb it. Australia can

absorb it because it's floating. (3:06). The whole Africa, S. Asian continents are moving to accommodate the moving of the S American continent. We'll see huge earthquakes in the Gulf of Mexico. Mexico City is extremely vulnerable. The same with Los Angeles, it's more or less gone, it's just waiting to see when. The same with Japan we see huge deep earthquakes building up, shows total continental separation. The light lift (2 meters n NZ) shows surface adjustments and the deep ones (earthquakes) are dangerous ones and means the whole continent is moving from the root. We are looking at seismic ripple shake inside the magma, in places where there is no P matter but the M field pressure is building up, these will come through the sun's rays and be created through the , low level strength of the magma will absorb high level of energy to balance it off and in the composition matter of the earth will get trapped and they have to get released, and these pressures will move the continents on release much more rapidly, it's a combination of 3 or 4 elements, when we see huge attractions from the M fields of the sun to us it means there is a weakness inside (the earth) and so it's trying to balance it. (3:08). We are creating because of the changes inside the magma, solar flares towards the earth, because we need it to create the balance and that energy when it's given has to go somewhere, ?? it's just like water you put on a heater it absorbs so much energy it has to go somewhere and you start getting bubbles, ?? it just comes up, now that relieves the pressure. We'll see it. I hope we are wrong but I again warn the American government to move people out of the West coast drastically. Estimated losses are in telephone numbers, we hope we are wrong, but the indications of the rapid shift in N Zealand confirms the lift and now it takes time, another 3 to 6 months and the push will come to Argentina and LA will go, back to the dust. We can't change it, it is part of the evolution we are in, we'll have to see what happens. The Philippines are in a huge danger and I have a lot of worries for our staff there. The same with Tokyo. The earthquake that happened there (when ?) everything was shut down they had to re-align the railways. The E effect will be heavy, we see a huge loss. Greece will go, this is definite because the plate moved. (3:10). And with it we'll see huge land slides in the back by Turkey side, by Winter time. In Italy the separation will happen somewhere around Florence. The biggest problem in Italy will be if the pressure builds up the volcanic mountain in Naples will definitely open up, we have seen a couple movements in the past 2 months, somehow the pressures are ending up in that area. It's building up in Sicily, and that coastal area they have after shocks concentrated there. They are absorbing the energy there and that has to be released. The South of Italy will not be safe, we'll have to see, it could be any time this or next year or 2 or 10 years. Around Gibraltar S of France and Spain you'll see a huge amount of shakes. It has to happen because the whole plate ... if you look at it, it's like a combination lock key and you are trying to open a safe, you have to trigger things until the last knock comes and you can open it, and this is all adjustments for all the pins dropping .. I expect a 10 to 15 magnitude around Chile, if we see a further deep, deep earthquakes especially in magma, they are like bubbles which burst, the movement of the field, which they come from the center and absorb the energy. (3:12). In touching the bottom of the solid continents, or that part is so rapid in releasing energy that it creates ?? because they absorb it from the sun and that creates the next movement and somehow we see that coming up, it's the position of our Solar S, and the position of our sun in respect to its twin sister (second sun), it pressurizes .. it's on the verge of pressure, the clock is ticking, Japan is in horrendous danger, I see it. The North East coast of China could be quite

dangerous. I don't put much hope in any side of California, it what you can salvage. We want Arman to move anywhere but out of California. There will be huge earthquakes on the West Coast of Africa also, (especially) the way the things have moved in the past 2 weeks. We'll start seeing earthquakes from Gambia down to Nigeria, and coming down, because now the pressure is building up and it has to be absorbed. The weakest points are on the edges which is Morocco and perhaps Tunisia. I have warned the Iranian authorities and people to leave Theran, it is just about to go. (3:14). Q; how can we detect Deuterium in water so we can isolate it? It's very easy you have to create the conditions of D you absorb it and then you know it is there. It's Gans has a bluish tint, very slight blue. Does it increase the brilliance of the water? No, when you see it you'll understand it. It's like a bubble inside the gas (Gans), it's like the way you see CO2, it's like a transparent blue. Yes, I have seen this in the Atomic Center in Buenos Aires, about 50 years ago, it's a completely different color a light blue. Don't forget i am a Nuclear physicist I have seen a lot. It's one of the reasons this planet is blue, a very small amount of D but in the presence of the N, creates the blue structure we see. It's very much like when you make a diamond you need only a small dot for the whole diamond to be blue. (3:16). In the case of the MG field ? of this planet, D becomes blue. I would like to add that here in the central part of Argentina we've had very strange earthquakes ??? What's strange about it? Normally we don't have earthquakes in the center by the mountains btn Chile and Argentina. Have you seen a lot? In the last 15 days we've had 5 or 6 pretty big ones over 4.5 and 5. If you go back ?? earthquakes of 3.6 and 5 were creating a lot of damages, but now because all the continents are moving they are absorbing all the shake so we don't see so much P damage, even with 7 and 7.2, this is the alarming part. We saw a 7.2 in the past 48 hours in Japan exactly where Fukoshima is but we don't see huge damages because these earthquakes are coming from magma, they are magma initiated, which means that all the continents are moving. It's like putting meat inside the pot and pushing it, all the water starts moving together and everything else moves, and this is the extremely dangerous part. Another problem is if the MG fields of the earth moves on the inertia side any further and rapidly, (3:18). it will change the direction of certain asteroids towards the earth and ones we were hoping would miss will hit. If this thing happens in the coming months we should see a huge number of shooting stars, the ones we haven't seen before or at least the ones in the quantity, because now the whole attraction field will change. As much as we will eject those that were on course for us we will attract new ones, when we get any earthquakes around 9.5 to 10 to 11, we'll start seeing new shooting stars, because this means the whole magma and therefore the MG field has changed and we start to attract new materials we didn't before and there are a lot of them, they will come in. A danger sits on the line of going North, Southern Mexico, central Brazil, Angola, in that part we see a lot damages. (3:20). There have been a lot of questions on the cancer trials, we're waiting for the license so we can go worldwide with it. i have taught you enough today to start seeing you fly. I have to warn you that those of you who start to showing flight or power units, you are getting intimidated by a number of people in an organization. Stay strong! Get in touch with the KF and we'll protect you, we have done that with Alek and a lot of KF supporters. So please if you achieve go straight on the Internet and put it on. The more people who put on you'll find more other people putting their thoughts in. The harassment of a bunch of pedophiles should not be the cause of changing the course of humanity back to animal condition. If you receive a threat let us

know, we know what they are doing in the background. We don't talk about it because we have left it in the hands of those who know how to handle these things. We have to be positive and move into the next step, and that is today's teaching. I hope I have given all of you the final link to understand and convert. It's very much like converting mm into inches, it's the same thing but different words and amounts, from Pl to a matter state is the same, but you have to consider a different strength to it. we all should be able to fly, test the ball with a brick, and don't look at it as only P but as Pl interaction and then you'll be able to build your flight S. Use the Gans, coils you do the same, the gaseous S the same. ?? It doesn't matter how many balls come and go , don't change the inner core any more, leave it stable. change the outer cores until field, speed, will give you a lift. The first thing you'll see is the inner core will lift to the center, then you'll see the creation of the anti-center, then total lift. If you come to the empty center but don't see lift add more to the outer core, use the combination of the Gans and N material and even matter state, but don't change the center, change the parameters, you'll achieve lift, see the lights, the expansion of the fields. remember the MG field strength of the center and just play with the outer or motor and you'll all fly. end

148th Knowledge Seekers Workshop December 1, 2016

(Going mainstream science with the Ghana Conference, Animal trials have confirmed no toxicity in Gans, Wikipedia of Plasma Technology rules, new teachings on using different salts other then NaCl leads to Gans with specific properties, which makes this a game changer, How to melt the copper in the center of nano coat, this changes the world of electronics, computers and communications, You make the alloys in the Gans process, We don't eat a million different materials to create cells in body it creates the different cells through billions of different field strengths, Repair spinal cord cut, How to create water, How to make Nuclear reactors safe stop the slight production of salt in the rods)

(:09). We don't teach now we share the knowledge, we have already done all the teachings, now we apply. The Ghana conference was a big push that we needed, it has opened the door for more scientists around the world to understand the T, We need the scientists to understand and bring it forward. The collaborations are now beginning to expand, because scientists can watch the tapes done at Ghana and begin to understand the new T. (:15). Talks about agricultural development in Ghana for students. (:23). (:30). Renan speaks, they have started collaboration with the 5th oldest University, San Carlos, in the Philippines and they will invite Keshe to give lecture next year. (:37). The first phase of the trials at Tokyo University completed, 70 mice were given doses of Gans. According to animal trial protocol, within the first hour of administration of substance the animal is sacrificed and their organs tested for toxicity, if found the trial stops. So we passed the first part and no toxicity was found. It then goes to 24 hours and sacrifice the batch, then 6 days and sacrifice, the final phase is 16 days, if no toxicity is found it means the product is safe for further human trials. (:40). The results as of yesterday there were no toxicity in the mice that were sacrificed. First of all we bless the souls of the animals used in this trial, this should NOT be done, but this is what the present condition forces (us) to do to show the T is correct and there is no toxicity and this takes fear out of a lot

of organizations. We make it only available to those organizations that want to have a look. The text is in Japanese. We go to the next phase. Most of you have been using the Gans and we are taking your testimonials as a human trial on the Internet, this has already been done in 3 cases with 3 projects, because what has been done even though it has not been strictly measured under clinical conditions, this allows us to see what results people are getting and allows us a stepping stone into the clinical trials. (:42). The live clinical trials with cells and animals test starts on 12-12-16. We will report the trials. The first time this was done was when TEPCO did the trial, (which in fact they are now using as a treatment), then we confirmed it last January. Now we are doing it again with leading pharmaceutical chemist and they are doing according to international rules of evaluation for medicine. The Gans is injected directly into the blood, not eaten. This makes it very safe. (:45). We should be receiving shortly a license so that you can buy Gans products directly off the shelf. Please post your testimonials on the site, it's very important, you may be contacted by organizations to give your testimonials to them. Our T is being reviewed as a health application and not as an alternative, this is very important. This is where we are taking the medical application of the T. We will not allow it to become as an alternative, now that we have proven that we are scientifically bringing the T into its right position. Following the trials of the Pain Pen as medical instrument with certification of 1 and 2 and C certification in Europe. This has allowed us to become part of the mainstream medical application. (:47). This is where we are going towards. We are taking advice from senior scientists, medical doctors, and research laboratories worldwide. If you take homeopathy that's all you got, or with herbs, you can't do much with it. This T has now proven it can be digestive, or intravenous, and S that work outside the body and interact with its fields, it a totally new technology. In the coming time we'll tell you which hospitals are allowing it as a new medicine in addition to the current one. It took me a long time to set it up this way. The way you go to chemotherapy you will be able to go to Pl therapy section. It took a long time to bring this and I risked my life with it, but it has paid off. Because now it's not a alternative done on the back street, it'll be done on the mainstream. (:49). We are taking it to a place that it has become a new science in the world of medicine. Because now we can solve the problem within the structure of Western Medicine. They see a benefit in collaborating and not something just in the background. We have shown with chemotherapy that Gans therapy can be effective. I have sponsored new PhD's for this which we'll announce in the coming weeks. We'll use the Gans to take the harmful part of chemotherapy away so it doesn't have any harmful side-effects. I am one of the supporters of chemo because I see what it does, but I also see the dangerous side-effects. The collaboration of Pl T in ways that we have done research on it for years can make a perfect condition (for the chemo). But the other side of the coin is you can use Pl T on its own, but to train scientists takes time, you already have chemotherapists and added with Pl to take care of the side-effects. the doctors don't need to know much and it still helps. The trials on this side (? chemo side) will be starting in the next few days. We have become part of the mainstream medicine and not an alternative. (:51). We don't practice in the back rooms and hotels, we work directly with the scientists that they can test it and see the results. Understand something important, as One Nation we are changing the course. Don't look at what rubbish has been written or obstructions have been put on (web), instead concentrate your time on development and breaking through with the new T using the Gans of Pl and share it.

Klaus has set up a Wikipedia for Pl T and you can build on it. (:53). At the moment it is password protected. It will all be the same as Wiki but it will be Pl related. It will include all teachings of Motion, Agriculture, Health, etc.. They have not yet chosen a name for it. (:58). Keshe says we are not here for peer review or will take you off, you are there for checking the spelling and grammar. We are not creating what Wikipedia has done and controlling, who pays the bribe. The structure of the KF has to be without bribery. We have seen this with others who started a Wiki site. It has to be what the person wants to put up according to the scientific knowledge and that is the only thing the monitors in the background have to do. (1:00). We have to allow the scientist, it could be a housewife, a professor or a man on the street, it's the knowledge that counts. This is what the KF worldwide is. In a family we have everything and everyone's opinion is respected. One you sit down at a tabel to eat and you have a brother who is a professor and one who cleans the street, you value them the same, they are all brothers. And this is what we have to carry in all the work of our sections. This is what we have seen as a weakness in Wikipedia that has been set up, the moderator enforces his narrow mindedness. Our moderators are only to watch that no foul language is used, and not to edit in a way that you decide what is to be shared. Everything has to be shared. Obviously people who are putting non-sense we have to take out. We need this to go on line within the next 48 hours because we have a lot of research and data coming in worldwide to be added. My recommendation is to call it Wiki-plasma and link it with Gans that it comes to the same. (1:02). The doctors are already using the Wiki. (1:04). A number of KF supporters are have bought up the .com addresses and are holding them so they can't be abused. We thank you for it. Contact the webmaster and we can see which we want to put in the vault. This is how a family operates. Keeping the domains and holding them in the vault so they can't be abused is costing the KF a lot of money but it's needed. (1:07). Shows a preliminary KFSSI WIKI page. (1:10). Our work on N Technology can be brought in with the work of the Iranian scientists, to become part of the N T editors or adding the knowledge. Iran is one of the leading N T and they're doing the same work as we are doing. We will try to bring them in to our work so they can add their scientific data to ours. We have the same with the Chinese. We need to work as One Nation, the Chinese have access to a lot of data at the moment. We need to bring them in. We have to search the internet of papers of those who have done work and ask them to join us.

TEACHINGS Start here:

(1:12). Let us expand the knowledge on the Steam-Coating with NaOH. Let's go back to the Coke bottle some years ago. A lot of you tried to guess what the liquid in the bottle was and called it Keshe liquid, then we found out that it was NaOH, then they ran wild with it when they saw what we did. Let's expand on this, because by accident you put it on the screen and nothing is accidental. This goes back a tape we used to play before starting, "the beauty of it is that we can use the Matter state, the N state of Pl together because they are made of the same ?? .. Let's expand on this. (1:14). Because now that we are heading towards the space operation this will make a lot of sense to especially scientists who work in the background. he draws a box, you used a N coated Cu and Zn plate, you used salt in the water, ?? NaCl or NaOH depending on the phase of which process you learned. You made the N Cu plate with NaOH and then put in salt water, the environmental connection was Na, it has created a new environment. He draws a second box, we take the same N coated and Zn plates, use the same water. What if we used Mg

or K, or different salt, what would it do? What if we used a combination of these in N coating and production (Gans making). That Na releases a MG field of a given strength of an isotope of the Cu. (1:18). When you hold a piece of Cu in your hand, for it to be solid in your hand ... if it were made of the same atomic molecular structure strength it would have been already N material. When you hold a piece of Cu in your hand it is made of different isotopes in respect to MG field strength. When you use Na, let's say you release level 20 strength (from N plate), When you use Mg salt (in Gans production) or use it in the N coating process, then say you release strength level 24, if you use K let's say you release 60 level strength. (1:20) we don't know these are just guesses. Now you have to start learning to play with the environment and the conditions you make for it. It's the same Cu and N coat, but you make the same CO2 but of different strength or a composition of it, this gives you huge facilities, and strength in research and Development of new T. You used Cu now let's use brass, we predetermine which layers we want to be. So you used Na or K to release a specific strength of the nickel in brass, and then you used Na with Mg with another salt to release a specific strength from the brass. Now, after you created those 3 layers, you changed the salt composition to release the Cu (inside the brass) at a given strength. Now you'll see a new world of transistors in the Pl condition. (1:22). We walk into a new world of science, of Pl superconductor resistors, transistors and every other filtering we want. Nothing has changed. Some of you may have used K before because I did when I started making the first N materials using NaOH. I could see I needed radioactive material in this composition, because it would give me ?? without buying radioactive materials like smoke detectors, I could operate in the same region of radiation where I had my N and Gans material and I had my radiation materials also available. This is the first time I reveal this to you. I went looking for caustic to see if they added K to it. Because in the composition of the K by the ratio of the distribution of the energy, you have K 40, which is radioactive of a specific field radiation. So I had my condition of radioactivity for control of production of certain gases, especially Deuterium, right there in the shop, then I bought K salt available at any chemist. So I delivered a specifically energized radiation controlled environment by the choice of salt. there are a number of salts you can buy to do this. I am a Nuclear Physicist I understand the structure. For the first time I am teaching you to understand. A lot of people were wondering how he does this and that, now I educate you in the process. (1:25). With this T we have the matter, the N and the Gans made of the same ?? which is strong, because they are made of all the same elements. If you can decide the composition of your alloy. You can try the resistors and transistors out of other materials. Now you see the game changes. As I said the teachings are complete, now it's adding to the knowledge. It's the same N coating, but understanding that even the CO2 which you produce in these containers have different strength. This is crucially vital and absolutely important for us to understand this. Let me tell you why. We have the new Wiki site coming on. You have the isotopes, elements, MG field strengths of not only the isotopes but also in respect to the environment they appear. If say from the known elements of 200 and some, of atomic mass or weight or number. Now we suddenly have millions of new materials and compositions in a Pl condition. And it's how your body uses them. We don't bring millions of materials to make the cell of the liver or heart, the body as it's in the Gans and vacuum state uses different strengths of the isotopes of the same matter. (1:28). Now the game of the world of Plasma has changed. Now you can decide the

compositions and when you make them what you want it to be in the alloy that you can make the Gans of it, and not only that I can make a specific CO2 out of it that it only touches the cells in a given neural System in a given part of the body. Now we will see how many PhD's you'll get, billions, that's why PhD's won't have value anymore because we share the knowledge. We are all professors and graduates. Start playing and working with this new knowledge. When you make a CO2 with Mg it is not the same as CO2 with NaOH or K, the percentage of K dictates which layer of which material will come out. When you find 99.99999% Cu purity that 0.00001% of the impurity contains all the elements and it has to be across the boundary of this material. So you create, release 0.00001 which is a specific, say nickel, which is there, and then you create a new ?? salvage condition. (1:30). This new knowledge has to be exploited and used in detail, then we'll understand how we can specifically categorize what kind of CO2 we make. It's the same, look at your Ni or Zn, when you produce ZnO2, if you understood this, now you produce it with K in it. then look into the structure of the brain and see which neural S has more of a K link to it. So using a Zn plate that created a Gans of Zn with a Mg or K or Ca of a certain strength, you can target the area of the Neural S you want to repair. And in reality you don't need to digest it, you just put it in a bowl as a dynamic core, or you put it on a coil and you deliver it. Because it's an instantaneous delivery you get an instantaneous result, because you bring the position into balance. Now we'll really start playing the game of Pl T, understanding it and manipulating it the way our body does. As I said we don't drink or eat a million different items to have different cells. We eat specific elements, (1:32) in a matter or Gans state and then our body through its glands decides what energy to give out or to reduce it to become a cell of a heart as a muscle tissue or a cell of a lung tissue. Now we see the game, Pl becomes beautiful to play with. It gives us the opportunity for production of superconductors and super resistors at room temperature, where you can automatically switch them into each other with the flick of a thought, because now you work with Pl. As you look more and more to the Pl state away from matter, changes a lot of things. It doesn't change, it adds to and strengthens the knowledge now we have more ways to do things. Remember how you produced CuO2 and you changed the rate of the current flow you got different colors, you can do the same with composite alloys and the beauty of this is that you can create new conditions, environments, and new tools to achieve what you need directly. (1:34). If you have a heart blockage, then you can identify what has caused the blockage, is it E or P or what material, then you can produce the parallel in the same strength and open the blockage without any brain hemorrhage where the particles can move, because now it's the energy and you transfer the matter into a Pl condition. Understand the Pl structure that is in addition to the matter structure then you'll start changing a lot of things. For example, if you have a Cu wire, I explained how to solve the problem of high temperature when high current is flowing through a N coated wire, that is so the wire doesn't melt inside the N tube of the wire. Now (with this new development) you have a composite material, an alloy which you decided before and you heated it up, the N structure doesn't get touched (by the high temperature) but at a given current flow the Cu starts to melt. (1:36). If you N coat the Cu wire perfectly, and **then cut the end off, and then put a current flow towards the matter you will empty the copper from the center** of the (Cu) tube. Now you have a true N tube. And then because you did the work to make different layers of it, you have a true composite N tube, which one let's say a centimeter tube can behave for

everything you need, because now the center is empty, and the center is full, is actually, because it's held now by N material, is one of the most powerful centers of Principle Energy. Now you see the game changes! But if you touch it, it'll break, it's so fragile, but now you can use, ?? hang it, use the superconductivity for Zero Time communication, levitation, MG positioning. When you use this method to melt the Cu, if you melt it fast that it goes out of the N tube you've created and with it if you take out one of the structures of the N materials that is connected to it, it will collapse the tube. (1:38). It's matter state and you say, it burnt out and disappeared. So you have to be very careful when you are producing N tubes that you don't touch the outer layer. The outer layer of the matter state that you can keep the composition of the N tubes for superconductivity or whatever (??) So for example you made the Pain Pen coil now you can drain the matter state out of it (Cu), you will see the power changes by an order of magnitude. Let's look at another step, we haven't developed such a T to be able to melt the Cu without loosing the N coat ?? disappearance of it. ... Let's make a hole through the Cu solid state matter, or use a tube that is not N coated inside and is also not made of the ?? pressurized, for example tube making, if you want a specific condition, or you can use a tube, but you don't let the inside of the tube to be N coated. You N coat only the outside and do it with the layers of different isotopes of the Pl condition of the matter. Now you can fill this center with Gans' as you desire, or coils which you have N coated differently (Mg, K or whatever). (1:40). Now you see the game changes by a magnitude. The coils you made for the Stacker Units now get a Cu tube and N coat the outside and put inside it another N coated tube. The game changes by order of magnitude. The same goes for the other elements, and how we can manipulate the understanding. In a very simple way we see a totally new light in the N Pl T. You can do a lot of observations (tests) with coil making. (1:42). He draws some small circles, these are your tubes, ??? you want to ignite some ??? ... you can speed up your N coating in 2 or 3 different ways, ... you N coat a Cu and Al wires, and Zn 2 or 3 cm, and let's say you have a transformer here, now you have 3 N coatings in parallel with each other feeding to one line, you can decide which one you want to transfer or feed to with energy. Or you put on the other side of the unit different materials, Gans and you can make the same connection. In understanding the MG field you can operate in a different zone. It means you can speed up your N coating. You connect it to a power supply, you can decide to keep the voltage constant and change the current flow. You choose a lighter n coated material on the entry and heavier on the exit, the eddies flow of the Pl, ?? will N coat because the left side wants to reach to the other and you'll N coat your transformer and cables in a much faster way. The G wires on one side pull the other side and within hours you N coat your transformer. This has another advantage, you can control power the same way. (1:45). ??? I could control the flow in a ?? voltage situation. If you want to change a current or change the composition of it. You dictate what materials in the coil you want to be N coated, Zn, Cu or whatever. . If you look at it, this here is the Cu plate, this is the Zn, and the medium is the Cu wire. The only thing you have moved is you have changed from the liquid state media to solid state media. this is the power and beauty of this T. Now you can N coat the materials internally of the elements which you want and this opens a new dimension in the world of metallurgy, computer development, communications, satellites, and everything else you can imagine. You choose now the frequency to broadcast, and you choose MG field so anybody can use any isotopes. Hundreds of billions of people can use one line to

communicate. (1:47). We thought with the present cables for communication were superior, now we come into a new dimension in the world of Communication, if you understood how to use this. The beauty with this is you don't need to use cables you only need a small tube. The link of communication if you made the same one is the matching telephone number, you just contact. Now that you understand the totality we take you to the true space T. The T has opened a new horizon. Now you can make composite Gans', when you see a CO2 on top of each other you see different colors because now it's a Gans one made by NaOH, another by Mg etc. Always understand the order of magnitude and the composition. (1:49). In homeopathy they have 12 different salts in body, now make a composite of the variation of the 12 salts plus every element which man knows and then you can see the variations go into billions in the body for the production of the cells. Now you understand how the body works. Now we can play the U game, part of the research in the U which we achieve is to open this Pandora's box. Does the Raman Spectroscopy have any room or can we use the Raman Spectroscopy of the Pl to achieve more. ... How far can we push the boundary of the knowledge? I just received a text that the tests in Tokyo University confirms the non-toxicity of the Gans. Officially as a scientific data we can confirm for those who have been taking or working around CO2, you are dealing with a non-toxic entity, because it's a copy of your own body. (1:53). We produce these materials under specific conditions and they are of a specific dimension. In following tests we'll change to other parameters. But now the tests shows in principle the T is non-toxic and with what we just taught it opens a new dimension in the world of science. ?? How you understand the totality to produce what you need. Those of you looking for new components in the world of communication this gives you the breakthrough you have been looking for. I used to get high tension Aluminum cables to do these tests to confirm this. And I used to link them with the Cu, nickel wire and chicken mesh (1:55). And it works. **I have access to every composition of CO2 within the body of the Man**. What part of the Gans' of CO2 turn and become resistive and then it turns and becomes conductive. I know how to do it. If you understand it then you'll understand how you can connect on the medical side ... of a nerve cut in the spinal cord. When the cord gets cut or damaged it's not like what we normally call a cut, but you speak of a change of the orientation of the crystal of the C, or the Pl of the C which now reflects the information to another angle instead of directly to the next cell. So situations like nerve damage or cuts through the neural S becomes irrelevant. Now you can grow the same nerve (back). This is what we saw for example in the bone structure cut, because we create the right Ca combination, because we take Ca from chicken or whatever, this allows the bone to heal and we don't see any crack or fracture or breakage. We see that with Naomi (car accident) with the pictures coming from the hospital. (1:57). Now we are learning the mastery of the science. Now for example we don't need to put a horse down because its got a broken bone nor do we need to operate on it. We put it in a condition of the Gans of K with the right Ca and Mg that it supports the muscle, bone, bone skin tissues and neural S, and you put this S around the bone and within a few hours it's as if it never happened. Everything is a natural process. I know how it feels because I have used it when I broke my bones ?? within days (it healed) and now when they take the x-rays it doesn't show any sign of fracture, because it's a natural process. This is perfect for heart operation where the muscles have gone weak or ceased working. You create the condition of the Pl of the muscle outside ?? standing the new composition you can flow it, you just replace or

ignite the muscle tissue work and that's it, it's done. A lot has and will change. Those of you looking for energy transfer, have not understood, using 2 Systems doesn't give you any transformation of energy. You need 3, the booster, the reduction, the booster, you automatically transfer Megawatts. (1:59). ... we need to understand that we can expand to the point, the limits, that we can manipulate different conditions. We create the conditions. Look at the screen, we only talked about the Na, K and what we put in, look at the picture next to it, we predetermined the condition of a material to be of a given composite here, and then we choose the plates which is a flow of energy in a plasmatic (condition) from one to another. We changed the ?? media valve, we keep the same composition outside as we see it, he circles the 2 boxes, now instead of changing the K ?? chloride or Mg salt, change this from a Cu to a Al wire. And now put the same thing in parallel or series with each other. You see the world of electronic, computers, communications everything now changes. You don't need to make elaborate silicones and the rest you get any piece of thing and make your own. (2:01). The beauty of the new science is that it's not patentable because it's already in the public domain. It is free to all of us to enjoy. .. Another 148 teachings, I can teach you so much until the cows come home, it depends how much you can understand. Now the next step for your understanding is not the Gans or N state, now you have to understand the Free Pl state. It's where you don't see the Gans but you feel the effects of the fields which behave like a Gans. Because there are creatures who operate in this realm. There are lives which depend on this level. To your eye it is transparent, but to them it is visible and tangible. Now you come to the world of the UC which Man has no visual or sensual observation of, but has to rely on the field interactions of the Plasmatic kind which we have not been educated yet to understand which goes into the inner sanctum of the Pl. The process of understanding the Pl T NOW changes. Let's take another condition. (2:03). Let's change the medium now simultaneously but let's go into the dynamic cores, he draws 3 cores, you made the cores of different composition, you put the Al in the center and made it as heavy as possible, you put some Al in outer and made it light, now you have a different proposition if you understood, if you change the same composition of which you made the material, or the salt which you added to the S, you rotate the outer core which now has a matching piece of Al in the center. Now you have created a beautiful spoon for the rotations of the cores by the Al having the same strength as you put in the center core, having the property of the electron trying to find its balance, start the rotation, not only with the CO2, H you created the feedback, now you have created the dynamic rotation of the Pl or the Gans, and the P rotation of the entity. I referred to a long time ago, a planet doesn't rotate because of fields in its inner circle, core, Caroline Core, (2:05). it rotates because of the interaction of fields btn its outer boundary and itself. The speed of rotation of any planetary S, Star or moon, is depending on this, which has never been understood by the world of science, because you are of the opinion that you have been taught to look at the rotation, but look instead at the rotation of the proton in respect to the electron, now that you understand Pl T, the surface of the earth has become the electron of the proton of the inner core (of the earth). And the balance interaction btn the 2 dictates the speed of rotation of the planet. This has been the mystery of the creation which no one has understood. Why do we get the higher speed on the surface, or different radiations on the strength of the surface of different suns, that is dependent not on the field of the sun but on the P boundary which is created by the Pl matter state of the entity on the outer

surface. I have explained this in a very deep way in one of the books. Now you understand the depth of the knowledge. This is what I taught last week with that tennis ball rotating and lifting the weight (Renan demonstrated), and I said now put the tennis ball around ?? make it as you had the cores 1 and 2. There is no difference btn that which is a solid matter of the planet and the core inside (??). So in a different way the electron has changed its position that running around like the moon, (2:07). has become the electron of the Pl of itself, through the same fundamental teaching as we said, the matter, N, and Gans are all made of the same thing. Now you understand how the speed of rotation of a planet is dictated by its own surface rotation in respect to its center core, now the electron is a solid matter outside, the electron is the outer boundary of the structure of the matter state we see in a star, because the intensity of the strength in the center is so much it allows the expansion of the environment that the weaker and embed and embrace the stronger within itself, because its the source of its own existence. This is another mystery of the source of the earth, moon, sun, whole galaxy ... the U has this structure, the weaker in strength has embraced the stronger inside and uses it like a leech to feed itself. Look at the position of the soul of the Man and the structure of the brain. The creation of what you call, "God Particles" is the manifestation of the visibility, tangibility of the strength of the environment of the media of which its been given by its environment, so the cell of your brain where your finger is a God particle of the existence of the manifestation of the control of your arm ?? of your little finger. (2:09). So now you see the depth of the knowledge. It's all the same but it takes different shape. When you put a suit on a man, a ?? swimming trunk, a shirt, doesn't change the man, the outfit changed but the reality essence is the same as the man inside. It's the same with the understanding of the total knowledge of the U. You have to unravel it ... why does it appear to me this way? What have I missed, where is the link which I need to understand to be able to replicate, to live and to operate within. This is the knowledge of the creation. If you have understood what I taught you in the last half to one hour, then you have come 1 step closer to understanding the creation of the world of the Creator. blessed are those who understand. Then if you understood this, do you need power generators? Or a SS to travel? In a new product coming out by the KF very soon, it says we brought the energy of the U within the body of the man when you drink the water. I has a lot of meaning, we have brought the essence of the mother into the center, it's the P that has to decide what it takes from it. (2:11). This is why Gans and N T which we have developed is so effective, because we bring the power of the U and you take what you need because its already predetermined by the body what it has to be. The science of the T is beyond the comprehension of the Man because Man has made himself the restriction of the matter state. If you allow this confirmation of the self of existence to stop being the point of the denial of the knowledge man will achieve huge understanding of the U. This is the problem we ourselves have created for ourselves. It has to stop when it comes to the Pl, not when in the matter state because this is the condition which we interact at this strength, but if you understood this and you can extend the knowledge to the point of the elevation of the energy of a process then you understand the process of the evolution. And when the evolution, you understand the change and gain in the strength of the soul of the Man. Now you understand the body is the outer layer ?? where the tube inside the center of it is the soul of the Man. You understand how you can manipulate the fields, the matter, Gans and other points of energy, (2:13). to the advantage of the man to what he

needs and where he needs it. It's taken us 10 years of teaching to go from the CO2 manufacturing, understanding that media to today to understand that to date the Cu, Al or anything else is your medium. You change the 2 sides of the wire and put in the center a broken bone, within seconds you'll not even know you had a broken bone. Once the Man understands the full process of the knowledge of at least the operation of the Gans within the structure of his own body, no man will die of any diseases. Man will instead die on the choice of the transition his soul ?? to another soul, or by accident. And even some accidents can be reversed, even if it lead to the loss of life, he can put the life of part of the body back together and allow his soul to exist. We will show this in the future when you understand more. it's very much like how we now see the amputation, they take you to the hospital and they sew you up, but now you don't need sewing. You create a field transition btn the 2 sides because they were made of the same (material) and they just link up together. vohla. (2:15). It's important to start understanding that the medium cannot only be NaCl, it can be Mg, it can even be instead of liquid, of the Pl itself. This is how your bladder works, your heart chamber pumps, your intestine pulls the food along, this is how we observe through our ?? site the U. So simple. The cavity and the ? determiner of field forces decided in the eye gives the Man energy to see visually. In the heart the strength of the E pulls the blood. In the bladder the need and the field strength of the rejection to confirm the existence. It's the same cavity, there is no material in it but the field strength creates and pulls the matter to itself that it can sustain life. (2:17). To the ?? acquired level for the existence of the rest of the elements for the body. Three different media, one liquid, one E, (it doesn't need to be NaCl), and one by the fields of the matter strength which is given the structure to the wall of the bladder. The MG fields in the cavity of the bladder doesn't pull your ?? blood but it pulls your Na extra and Ca extra and the others. Now you understand the process. The world of science doesn't need to be afraid of the Pl and Gans T but be embraced to explain the totally of what has not been understood and that fear has to be brought out of the Man because he needs it that he can understand it that he can take the span of the U for his own existence. It becomes very, very simple, but very complicated because you have more things to handle and to understand. If you understand what I just talked about then you'll understand why most of you can't achieve tangibility of your SS. Because you are not creating it, you are hoping it'll create itself because you haven't made the right conditions of the media for it to be created. (2:19). This is the true meaning of the transmutation not only of the elements but of the Pl of the creation. Beyond the understanding of Bahala, bless his name. He said the maturity of the Man comes when he understands the transmutation of the element. Now we are teaching you the transmutation of the fields, and the essence of creation of the Pl. It took Man billions of years to understand the transmutation of what we taught 2 or 3 years ago. Two or 3 years later we teach you the transmutation of the Pl creates and allows you to travel the spans of the UC beyond this U into the Unicos which is a U of the totality of what we call our U, the cosmos of Universes. Because for those who understand this in the time to come, traveling across the U becomes the child's play, as you travel from city to city. The knowledge which those who understand in the UC now we add it to you too. Now we teach the totality of the U, not the ?? Man. And it will take the Man even a long time to understand the last 10 sentences. (2:21). Try to expand on the knowledge according to what it is, and not what you want it to be or it becomes the present fallacy of the modern science. They show the O goes through the walls (lungs)

because they have made machines to confirm their fallacy. try to understand the operation of the fields, that each field as it is actually going to a place is taking from the place in its G field also, it's a long and not a one-way tube. When a ray goes from A to B outside it is x-ray at the M field strength, but inside it's G in gamma ray strength, because it's pulling itself, it's like you standing on a platform with a rope, you pull the rope to go forward, but at the same as you go forward the rope itself has to go back that it is there for you to be able to pull the next step. This is the game, the roller platform you are standing on is the M and the rope and inside which creates more power is the G. In the U there are no rays or fields that doesn't possess the balancing force. the G of the place you are leaving has to match with the M the arrival destination. (2:23). Even when you throw a stone the reason it doesn't continue to fly outward, partially is the G field of the earth but partially it's its own MG field flow within the structure of the stone itself, in balancing its own inertia with that of the planet. If Man understands this it will change a lot, because even the stone on its travel carries its own MaGrav strength both in inertia and MG field strength. The same is with the elements with the Cu in the middle. Any Questions, please do not divert to anything else what you want to present. Stick to the subject, if you have a question on this we talk because this is important, you can always show your experiment. Is it possible to bring the soul where the body is already dead? Yes. How can we do that? Use some of the knowledge, because the body is dead but the soul still exists in another dimension. Do we need to provide a P for that soul to ... (2:25). It's the soul which has to understand if it wants to manifest itself as a P. If you take the center of the earth and another position in the U ... it's the field strength which allows the condition of the boundary which dictates how the earth will manifest itself in what shape or form in that position. Just because you move the center of the earth doesn't mean it's the end of the earth, but it means another manifestation of itself in another dimension according to the strength of the environment. When a man dies the soul or the scent ... (break in audio) .. they are these elements which the environment decides the presentation. Christ did this and nobody could see, he did it with himself, and he did it a couple of times for an audience to see to show the power of his knowledge and mercy. When Christ came off the cross the P was finished but the soul existed. (2:27). He understood the pain and reason, when he came off the cross the P was not the same as when he went on it. Those who were near to him understood the essence of his creation and saw him. The resurrection is very much like if you take the center of the earth and put it in another position it will manifest itself according to the new environment, there might not be any water but it has to be acidic. So you see the acid planet, where as here it's water, Zn, Cu and everything else. Is it possible to bring a soul into its P dimension? It's already in P dimension in respect to the other souls, they see and hear each other, but not at the strength of the observation of the Man. If you have very much like a saltwater, create that condition, then you have what you want. The whole game has changed and a lot of things become much easier. (2:29). Do we need to change or do we bring in new conditions that the change occurs the way we want it. Do we want to see the resurrection of the P in this dimension, because when the body was in this P dimension the body was created according to what ?? it had, blue eyes, blond hair, white skin, but in the process of evolution and knowledge and existence on this planet, the desire of the soul come to be black, brown eyes and something else. And now that you bring the soul, it will see the P and say, this is not what we want, my father was blond and blue eyes and now its this.

Now you are looking at what you wanted to see, but what is the sense of the soul? This is exactly how Christ came off the cross and how people close to him saw him, and they moved away from Jerusalem and nobody noticed. The resurrection is not of the P but of the manifestation of the appearance of the soul in the (speed) strength in which it is happy to be in, with the new strength of the evolution of the understanding of his environment. (2:31). Zoroaster did the same but the man never understood so he hid it in the flame as the soul and the energy is of the same. He explained it as fire because that was the only way man could understand it. He explained it in the name of Ahura Mazda. I made man in the image of Myself, depending where my image has to be, earth, moon, or another galaxy. I appear in the image where the environment allows and would like to see me in. Question, you talked about CH3 as a giver, M point of exit, North pole and acidic, if someone is a giver does it mean they are acidic or at a point of exit or has more CH3? The thing is this is a narrow way of understanding the knowledge. (2:33). Because CO2 and ZnO2 are givers also. It's the extent of the giving which decides the desire of receiving. When we talk about CH3 it's because of the availability of Tritium in the Pl state. Actually Cu gives more but it takes more also. Do we have to E balanced in order to give to our soul and does anything which is E balanced exist? E is a middle layer with the soul and P on either side, that is gives manifestation of existence and confirmation of both. Without the E you'll not have the soul, without the E you'll not have the P. It's the intermediary, this is how you feel in respect to your environment and you may grow tall, be brown, white, black or yellow, or with 2 finger and 4 toes. (2:35). So when you speak about **the E it is itself part of the process of the dictating of the evolution**. And it's the intermediary, the balance, the transition. It's dark or what you call black (dark) energy, or what we call transition energy. It's the E that decides how the P will manifest itself from the source, which is the soul of it. He draws 3 circles a smaller one in the middle, you have the soul, E and P. And this (he draws an Infinity Loop around all 3) has to be. How much of the G gives that you become tall and how much of the M it takes that you become short. This is how the soul wants to manifest itself in P, and that's what you see, the image of itself. The bigger proton (soul) and smaller electron (P). This brings an ethical question, does genetic engineering interfere with the soul of the man, or with the P that then effects the soul? That is for the wise man to understand. (2:38). A question that the soul is static and the P dynamic. Keshe says, oh my god so far from reality. Next question. One time you offered an interpretation of the "Hidden Teachings of Bahala", Possibly it has to be written, explained. I have done that before, I explained the true meaning of the Hidden Words of Bahala to Caroline. In time she will translate it. The Hidden Words are part of the structure of society in deep space, ?? man must understand himself?? A lot of people have started to read him. Read it in the language of the soul and in the intention that Bahala has written it. He has translated in a way that Christ did with his crucifixion. The teachings of the prophets of God are an insight into the workings of the Creator Itself. It needs the man of wisdom to see it, then nothing is hidden. (2:40). If you read the Hidden Words you come to understand the secret of creation. In the P matter state which is ?? replication ?? of the creation. Can a soul walk into a P by agreement or other means? Yes it can I have explained this and it's only open to the prophets of the past. This is how the soul of a man becomes a soul of the prophet. You can ask for it but if you are not of the strength of it. Nothing is hidden it's all transparent, but if you ask and part of it is to be received to elevate the soul because it

brings balance and totality, then yes. You can't take, but if its available and you have the strength to receive, this is how the coming of the prophets are forecasted or have been preset by the other prophets because they know at what point this energy will manifest itself in what shape or form. Because they are part of the line of the Creator so they can see how the light will come and interact. It's very much like you stand by the side of the road and you see your son driving the car, you know how its going to look if he crosses the road, the next junction and the rest. Q: could one say that all souls are based on the crystal structure of the Pl fields ..? Pl doesn't have a crystal structure, it has its own field orientation but it doesn't have a structure. (2:43). There is something which hasn't been understood, let's add to the knowledge. The inner core and any Pl entity, earth sun and the rest, the Pl field balance on the surface dictates the release of the field, (he draws an Infinity Loop (IL) from the outer surface to the inner core), at the point at which it has to be given, even though both are dynamic. The structure of the matter strength dictates at what speed it wants to ?? lower over the transition point and connection to the Principle. Why am I born with 2 fingers missing, I should have had 5, you have to see why the soul has decided that in the structure. You call it genetic defect, I call it the E effect of the soul on the "CD ROM", it's the information and not the CD itself. Because at that point with 2 fingers short it attracts energy which it needs. This people will understand, if you satisfy ... I'll explain in the coming time. The way we can grow toes and finger, you can allow the elevation of the soul to be satisfied in the dimension which it needs, if you don't have 2 fingers, because of the P interaction of the E and ?? in respect the soul has changed, you might find the 5 fingers back. (2:45). Can we correct the deficiencies? Yes it can be done. We have to understand which part of the brain, E and soul we want to interact with. With what I taught this morning everything is possible. The problem was the medium which was your blockage, in how you control the field of the Pl in its current and its potential difference. You can put them in parallel or series, you get a potential difference or a current flow, would you like Megawatts at the end or 1 mV. Now, my friends at the Innovation Center I hope you have been enlightened. Question, you've been teaching us to start thinking in 3 or 4 dimensions instead of 2, so we must think not only of the elemental states but also the field strengths and the power of the field strengths? That's what I have been teaching you for the past 3 years, you just woke up. What type of MG fields does an enlightened soul take during astral projection or when it separates from the body? (2:47). Understand the structure of the soul, which is in line of communication with itself being the P of the second and third dimension. What does this mean, very simple. When we talk about dimension its not the way people who talk about 4th and 5th dimensions (? New Age people ?). He draws a stick man, the body is the P, the E he draws a thick circle inside the head and in the center a green dot, this is the soul. The next step is the soul itself is connected to the soul of the Creator, he draws green circles, and the Universe itself, that in this transition it has become the strength of the soul, he draws a line from the circles through to the soul. So what you get is this, he draws an IL around all 3. Then this entity here (the farthest circle), is itself a manifestation of a given strength of itself being the soul of the soul, this one now becomes the intermediary of another soul, and he draws another IL with it. How many does it take to reach the soul of the Creator? Or the totality of the soul of a man the way we see here ?? , he draws a circle around back to the man. .. this became the solid earth and the souls ... is the P of the soul of the man which leads to creation of his P, the boundary of the soul of the Creator, at

the level of the strength of the observation of the man. (2:50). Does it mean that we are the radiation of the soul of the field of the Creator? The answer is yes. I made man in the image of Myself. What I felt in this environment I created as a Man, even though it's all conditional on the environment which has created itself. question, someone came to me who had a motorcycle accident 16 years ago where the nerves cut and he has a mix of phantom and P pain. I experimented a lot on him, I put ZnO2 and CO2 on left arm and 3 minutes later pain reduce 50%, he was shocked. If I create loop btn his right side of brain and left arm and shoulder with CO2 and ZnO2 would the body learn to restart the communication to the arm and perhaps re-grow the damaged tissue? Yes you can do I have done it many times and so have many of you. Is there any problem with (using the pad) crossing over the spine? No because you look on that as a P connection, but don't forgot you have an outside Aura, the field (can pass there), You don't need everything to be (perfect in P way), (you have) the connection first through your fields and then P finds its way to connect (through it inside the body), (2:53). through the nerves. It's beautiful when it happens, because you pinpoint where it is to be, then the fields are created and the subsidiaries are created. We see this in the body very often and we ignore it. If you look at people with spinal cord damage and are paraplegic, but if you touch the toe they still feel you (it), or the leg, and hot and cold. The main line of communication, and partially some sub nerves ?? the aura is still totally intact. But you need the spinal cord to move the P, the main part of P. The doctors say the sub-nerves are taking the connection, (that must be their explanation ?) but how much of the connection goes in the sub-nerves ?? most of the communication you feel is through your environmental condition connected to your brain. In conditions like Coma I use this heavily in P damages. I don't look at the connection of the nerve, 'oh yes it moved', I look at the outside aura connection with the toe, which is not moving. the nerve to the toe on the P side is not moving, but it's like you putting hot water on a tube that is plugged up with ice. (2:55). If you put a heat outside it and it melts you get a line of communication established and it opens. Especially in damage in the neural S from the brain to the extremities go to the furthest part of the body and establish a line of environmental connection in what you call an the aura. Still it receives the same. He draws a stick body, let's say this is the finger which is damaged by an un-repairable cut on the arm, you put a Patch on the hand and one on the brain. You tell the finger to move but it doesn't, but then the E (through the patch) tells it to move, now you have established a non-linkage (? a communication link in the aura), (draws an IL btn the brain and finger), now the P tries to find a way through the arm to make the connection to the finger, you open the block the the body moves (re-establishes the link). This is one of the most efficient ways to get the paralysis to move again. Or even the Coma. Because you can by-pass the cut part through the aura and re-establish the P link to move the limb. (2:57). You change the environment the tube expands and opens the blockage and moves again. It works by changing the field. Question, is what part of the brain do we use to open our Light Body. It's very easy we do that, it's been done, we see the manifestation of God in the light, that's why we see the ?? , we have our own light but it depends on the purity of what you give and what you receive. According to the E of the man and the value of the essence of the matter state you'll see a white, black or gold colored light. When you see gold it's connected with the E of the P and it's a manifestation of the creation, White is the soul of the essence of the creation, when it's black it means it absorbs everything and nothing is given. In

Christianity we call it a black man, a black priest. (2:59). Is part of the brain involved in opening up the creation of the L Body? ?? In these conditions it is not the entity itself but the environment of the entity that it dictates the manifestation of the color. When you see the prophet of God in the light it's the other souls that they want to show him in a bright light, it depends on which side of the teaching it comes. It's the same with your own aura, not many people can see, you hardly can see your own aura, nobody can ?? some people claim they can but it depends on how far they are from the position of their own soul ?? but n reality the light and the color of it, it shows it's (the person's) understanding of its own creation. One day I'll show you, when the man matures. We try to keep away from the hypocrisy of the past, raising the dead and the other things, we try to avoid. We try to help man to understand the knowledge of ?? life it's not magic.
(3:01). Someone wants to show the production of water, this is important so please understand. We taught this is the past and a lot of you expect the water to be outside (the container). For those who are wise to understand observe the elevation of the water level inside the container. Some people put a plastic bag inside the water in the container and allow it to collect the water there. It's more or less the same process and some have achieved it. Is John from Arizona online, he exited 1 hour ago ... oh, it's too late for them. Rick shows a "water creation conditions via field interaction" document and reads. (3:03). He put 50 mls of CO2 and ZnO2 in plastic bottles in a plastic bag in a plastic container as an emergency kit along with 2 P Pens and a coil and left it in the trunk of his car. Over time the fields combined in a way to make H20. Another option is that he noticed when the temperature rises to 23 or 24 Celsius that water forms on the Gans bottle, maybe the temperature could be controlled to increase the water production. Keshe says it's another observation and we see a lot of people testing it. You create an environment inside an environment and now it's about testing it and seeing what you can create. (3:10). You absorb because the Pens carry moisture in them and you create a replication. people were getting this effect on the outside of the bottle and this is another version of that but inside. .. the beauty of this is that people have started to observe the minutest things, they've gone past what is there (on outside), the observation is important. Klaus asks a last question. ??? .... some people have been working with harmonics ??? and installed a Magrav and now the field comes up bigger and bigger, like electromagnetic fields. The E fields of these ?? are too strong and they don't want to change anything, what do you mean. Can you repeat the question. Some of his friends worked for 20 years in room harmonizing of magnetic fields and they installed a Magrav and it quickly built-up very strong fields. (3:13). The lady called and asked him to remove the MaGrav because the fields are too strong, like magnetic field. I said to her the challenge in her E ?? was too big for her. Keshe: We know and have even considered to market the MaGrav as an E unit. Our research shows that because of use of ?? S the production of Gans, we produce a certain amount of ZnO2 into the Gans. This come from the ?? 2 sides of the same plate, Zn, ?? not that we do it on purpose. You have a plate on either side produce ZnO2, ??? every day E because of the field interaction. We know many people who have made or bought the MaGrav Unit, it has changed the environment of the house. They tell you something has changed in the house, because it's a MaGrav strength it elevates the soul and the E and you find out you are not in that position. (3:15). Someone wrote that in our house there was a lot of shouting and now it is very calm. We don't know why but we always see this before we put a MaGrav Unit in

and they say, I don't care that it doesn't give the full 100% energy, but it has brought peace to my family. The Italians want to market it as an E unit, a happiness unit. It comes because of the Zn coating on the coils. remember you can join the agricultural development and can research in Ghana or sponsor someone to do it for you. (3:18). We see people interpreting the knowledge in their own way, it is not wrong and everyone will bring the knowledge in their own way. Do not be afraid of criticism or of adding to the knowledge. .... (3;20). Next week we'll try to show some of the fields which lead to the creation of the SS and then it's up to you to take it a step further. Next week we'll spend most of the time showing videos etc, which have been made in the past few weeks, for the establishment of what we call the Pl field for the establishment of the SS. Because now a lot of you can take it to the next phase with your own knowledge, and how you expand it. Arman comes on. You'll see the measurement and detection of the fields. One last Question from Arman. When you use the caustic you release the into the water correct? You do also some things at the same time. (3:23). I know why Arman goes that way, we explained in the teaching of last week in respect to Deuterium and Tritium and the ?? speed of separation of NaOH especially ?? with Al and the creation of a specifically strength field material of CH3 when you have the Cu and Zn plates in the caustic and when you have it after in the NaCl, creates and supports the creation of Tritium and Deuterium. In some of the Nuclear Reactors we see this because the Uranium isn't totally pure, and even though we centrifuge and do everything possible to purify, and not to have any salt which leads to the ?? enclosion of pellets and the rest in the nuclear route. Due to the nuclear decay the material reaches that point where the salt is created inside the fuel rods, in some very specific conditions and then it leads to the ?? corrosion and everything else. We see it very rarely in the Nuclear Industry but it exists, we are aware of it and have seen it on rare occasions. So the environmental condition leads to the creation of the matter that we don't want and in that process in higher speeds of the meltdown condition, it leads itself to the creation of Tritium. There is a very simple process and this is part of the PhD that we initiated at the University, is to understand this, (3:25). and avoid the condition of the Tritium into the Deuterium and (make it go) back into the production of gold and heavy elements. If what Arman just put his finger on can be fully understood, then meltdown becomes an impossibility in Nuclear Reactors. And this is very important, as we know in the past few weeks with the heavy earthquakes in the area of Fukoshima, they had a problem with reactor #3. This can be stopped (with our method) and even if you loose the water you can still contain the meltdown, if our colleagues in TEPCO understand how to do this. You release a H, but it can be used, or you create an environment for the H not to switch over to become (??) , the salt content in one of the fuel rods which could have been corroded is enough to start the mayhem, and this is what happened in reactor #1 in Fukoshima. And this is where they have the problem. We have seen occasionally, even though they centrifuge everything in the Nuclear Industry, the production of the salts in some of the pellets, fuel rods, and this comes purely through the nuclear decay. And there is a process in the ?? that we can stop this, and when that ?? comes in touch with the H in the water in the cooling S leads to rapid production of Tritium and just takes over. It's not how it's been taught. There is actually a presence of this material, rapid decay into salt. It decays into a field strength of the salt and then because of the environment it takes its P manifestation, and ?? you produce H but if you know how to control it, due to ?? if you can make presence other

things you produce Tritium and Deuterium but very rapid. Thank you very much for today. end

149th Knowledge Seekers Workshop December 8, 2016

(:09). We have pasted 3 years of teaching.
(:13). The Italian Civil Defense has asked KF to help, they want more Patches. .. (:24). In past couple weeks a high order earthquake at Fukoshima, reactor # 3 may be some problems with. Now TEPCO will openly collaborate with KF and all data will be released publicly.
(:38). The KF manufacturers also become the researchers and we see the collaboration in Arizona. John from AZ comes on and makes a presentation on what they have achieved in regards to building a Spaceship. (:42). They have started a Plasma Newsletter to share knowledge. (:45) Picture of Gans production at factory. Keshe says they are setting up 10,000 liters per day of Gans production. (:47). John continues his presentation. Many people have created pl fields, MaGravs, p Pens, Gans, and the next step is to learn how to contain and amplify them. (:52). There is more then one way to open up the Pl fields, the reactors such as ping pong and acrylic balls have proven unreliable. We have found that rotating at the higher speeds we are more likely to get the results we want if we go with a better quality reactor, like Arman's machined reactors got better results. The 129 Tesla reactor spun true and quickly. The MaGravs are another way to open the Pl. In the Philippines they worked with Ph and found it plays a key roles in opening the Pl. We now understand that the CH3 Gans is like Tritium and when added with atomic H and KOH we can open up those Pl fields. We will also learn in the not too distant future that our bodies are also ways to open up the Pl fields. As we elevate our souls through our words, thoughts, and actions, we rise with a Kundalini energy and radiate out like the Pl fields. (:55). He starts with tests they did back in early October, they took 18 MaGravs and connected them together and plugged into a socket and powered a fan. Shows the Youtube video. He feels strong energy in the center of inner ring with 6, outer ring with 12. The speed of the fan changes as he walks around the reactors. (1:01). Keshe asks him to replay the last minute, something important there. Listen to the sounds when the man in the center of MaGravs speak and John speaks on the microphone, important you hear breakage in the voice. This is the first indication that there is an active Pl, this is part of the shielding which you'll understand later on. This can used for the shielding of the noise and other things. When John speak it is clear but when the others in the field speak we get breakages in the sound. We see this a lot in the very strong fields, this is part of the defense. This test opened doors in the research, but there were reasons for not seeing very clear fields, this is because of all the structure around it, the walls, tables, chairs, so they moved it to a bigger space so as not to be directly in touch with the wall. (1:04). They have a "violet ray" which generates Pl fields specifically used for shelf things like cosmetics and things used on the face, it has healing properties. (lot of confusion to get the video started) (1:10). They show the field boundary of the SS using the violet ray. ... (video problem) (1:15). Keshe speaks, Arman is working closely with John in AZ, in developing the fields and they do the tests and share the videos with me. (1:17). Another

video with testing the fields, 4 MG with one in the center one top of microwave transformers, the center reactor is connected to power grid. (1:23). Keshe explains, this is a raw lab test but it's important to understand that it's as if you were in the lab and feel the successes and failures. In the last 2 videos there were massive space developments contained within them, massive info. (1:25). If any of you could jump on it, it would deliver full space lift, but in the trails it wasn't observed what they developed (they didn't know what they had achieved), it wasn't understood to be used. We'll go further and you'll see. Achievements don't come just by the final paper, we all have to go through it like this, ups and downs of development, then through it we add to it. The next one is with high voltage transformers that operate on 3 to 6 volts DC, we tried to amplify the fields. (1:31). Next video delay ... Keshe explains what john is doing is testing how the MaGravs work to create a field. He draws a circle in the middle of board. john starts with 1 Unit and detects the small radius of the field of that unit, which the little detector can show. But in fact, the field goes much further. When they increased to 18 MG Units then we see the field expansion. (1:33). With 6 and 12 reactors we have merged the fields together. With a single MG we had a limited field, now with a Star Formation (SF) of 18 MG we increase and make a unified field for the whole lot. They link up and do not operate individually anymore, and this is how we build up the shape. We will see how this shape can be controlled and how he can create gates between them and how he can walk in when he opens the gates, we'll see what happens to the fields. This is very important and deep info which we are sharing today. Most of you don't have access to 18 Units, they being a factory do. The blue tags you see is just holding the cases together because then they can change the combination (of MaGravs). We saw a ball with CO2 Gans inside, those of you who are in defense T with Military Deep Space Defense have to understand the application and implication of that ball. You see the same machine is used but the fields in the center doesn't change that much. System control Defense T has been centered in that S. Those studying that should have understood what that message was. You saw the machine being used and the distance was not there (?? diameter of the fields). Once you have the Gans Pl with N material connected to the same the span of fields increases beyond. Those with Military and Defense background should have understood a very strong information. This is how the American Drone was captured, and the Russian's brought the boats in (Aircraft Carrier) but in a much more complicated way. This is what is needed in the space to create shielding, it's not done for military purposes but shielding is part of our device S in deep space. You'll see that John uses both the MaGrav S and the Pl ball just look how it comes in and you'll understand a lot more how the operation should be. (1:38). Plays another video. Hard to understand the audio. When he stepped into the center the fields broke and when he came out they re-established and they connected again. (1:43). John says that they found when you hold the reactors in your hands your body influences them also, so we started connecting them to a stick to get a more accurate reading. When we held it with our hands the fields extended out 6 inches farther then with the stick. Another video about feeling the fields. (1:45). (1:50). Another video where they create a door in the configuration. The fields go outward about 2 feet and about 5 feet upward and a little higher in the center (like a SS). It takes time to build the fields up. They have 3D printer to make small reactors. (1:53). (1:56). In this video they use that "violet ray" Pl generator and it increases the fields many times, they get a donut shape field around all the reactors. (2:07). Uses a

dowsing rod to find the fields, 20 feet out. This is the end of the videos. What they learned is that what they need to do is to amplify and open the fields. They used transformers, Gans, crystals and those types of things to do this. We need to control the amount of energy to both the G and M sides, the G keeps the fields grounded and M allows them to be attracted outward, and we control the filed Pl with the two operating in harmony. We are seeing Field Plasma and we need a door to enter the fields we do this with an IL interacting btn the M and G btn the inner and outer circles. There is more then one way to open the fields, keep an open mind. Our fields (body) interact with the Pl fields and our presence causes them to find a new balancing, they are always seeking a balance. When we send love we receive love this can be done with our MaGrav, Gans, friends and intentions. (2:10). It is each one of us that make the change. ... if just one person would come forward and show how to open the Pl it would change for all of us. I encourage all the government people who listen to these programs to come forward and let us all share the knowledge that was previously hidden. (2:12). He shares one last story. He stepped into the center of the Pl field of the SS and closed his eyes, connected to the U field and sent out love and gratitude from the depths of his heart and asked the UC to come and join him in this space and what he received back was an overwhelming love energy that was stranger then could be denied and a strong sense that someone was smiling back at him with love and gratitude. Help us kick open the doors to disclosure and more and its time for us to make that change we all know that we need desperately. (2:14). Rashid asks john about the detector? They are simple EMF electrical detectors with light and sound. Keshe says these testers are tuned to a specific bandwidth of the strength so they don't show the full spectrum that's why when they used it they got only 12 feet, but when they used the dowser they got 20 feet. So if you could buy a variable of that (detector) you'd see the field goes beyond 40 to 50 meters. (2:16). There is a small variation btn manufacturers. John says that they could send the fields out through the window but that it didn't like going through the wall. Keshe says there is a video where you actually see the full donut shape of the SS, where the ladder has been put on the outside and they go on it and you see the shape. Arman if you have it in the background you can show it. In the last video we saw the shape of the SS is not straight out but has a curvature and it bends back up, now for those who are testing you need to solidify these fields from the actual fields, understanding the interaction of the cores. The 18 MaGrav S, we showed this over a year ago, those little core balls. (2:18). But now the structure of the fields is fixed, by changing parameters, like how John put a single rotaitng core in the middle and but changing it, moving it around, up or down, changing the speed beyond 5000 rpm, you should start seeing at the boundary, at the top, flickering of light in the structure. In the space if any of the reactors fails, the 18 Mg Units are the embodiment of the production of the fields, (? they will remain fixed). So now we set out the boundaries of the outer skin (of the SS). We have found that if you don't change the parameters (of these 18) you have fixed the boundary. Now you have to put the SF in the middle and those MG fields should start to create the structure of the SS. The parameters are dictated by the 18 and can't be changed any more. The 18 Units have to be fixed to the floor or bottom platform, because you won't be able to see it, but if one of the reactors move 1 or 2 mm you loose the fields. With the fixed platform you have created the SS shape. (2:20). As was shown in the video with the field detectors. When you put these fields in (SF) you'll see the boundary, the curvature, it starts very low goes out to about 12 feet

and it bends back in towards the center. This is the shape of the SS, through the fields created by the 18 MG Units. We need to bring the 3 other layers in, which are the 3 dynamic reactors and 1 center one. In doing so we shall see the flickering lights and wall of the SS. The next step in the SF and if the reactors and if the 18 are fixed we shall see lift. Go back to the SF at the Insano where we had the SF going up and down. Now that we have fixed the walls we have to repeat the same process. The 3 dynamic and top reactor has to be fixed, and rotation speeds below 5000 rpm you will not see reactions. The reason is that rpm is equal to voltage difference by order of magnitude in the strength of the Pl. Low fields do not yield because they don't have enough strength to bring all the fields together. You saw something important (without knowing it in the videos), look at the way the laser gun was used, (2:22). the way they used N wires around the Gans balls, that unifies all the fields of M and G together, go back and look at the photo, see the way the wire was wound and it entrapped the fields of the Pl. That brings the change. When you connect this with your Pl reactors with the 18 MG Units we should see the structure of the UFO. The 18 creates the first layer, the dynamic MaGrav S creates the second and third and the body of the SS will appear. If you put the (rotating reactors of SF) in and you'll see the shape in any shape or form. It will flicker, you won't see half, but you might see a little bit of it, it could be shinny on one part. It depends on what is in the structure of that building (in AZ) where they are testing and how much field is transferred. As john said, it was strange you see the fields through the glass, where they transfer, but not through the walls, because they absorb the energy. For the first time you have seen the field extend 20 feet out, 12 feet is the radius so 24 feet is the total according to the (limited) detector that they have. So now we have established about 20 meter SS. I asked them to lock in the positions of the MaGravs, to be screwed down, so they don move, because any vibration causes fields to be lost. (2:24). Now it is time to concentrate on bringing the visibility. Now for the first time you have seen the visible, detectable boundary of the SS. There are very few centers which have access to large numbers of MaGrav Units, AZ and Chinese ?? do and they can carry on with these tests. We have to follow this process as it comes unless you have managed to get access to a large open space and 18 MaGravs and then access to dynamic S (rotating cores). If we put more emphasis on KF work in Ghana because we have the facilities there and need collaboration. Most probably we'll AZ as the center for the first SS. You saw the fields collapse every time they went inside it, because the fields need to be strengthened, which will come from the Pl S you saw with the ball on it. You have to bring all the knowledge together and not that you individually saw something and it's gone. (2:26) Question, how to create and maintain a matter state AA in the SF SS, is that a consideration? At the moment KF in Italy has done some tests and what we see will become as a product, that MaGravs will be sold as E Units, they effect your E. People who use it feel much better and happier. We know the MaGrav Units effect the E in a positive way. You can add your own AA to the Units you buy, you can just put a cup of your AA on top of the Unit and there's no need to open it. They will be sold as adding positive fields to the E. WE are monitoring closely the 20 workers (with Masters degrees) at the KF manufacturing in Ghana. (2:28). We have seen their E state as they come in and as they start producing Gans products in mass, we are monitoring their change of behavior. We have seen over the years that people who get involved in Gans production go through a positive change in their E, they change totally, especially those who work with ZnO2, we see an elevation

in their E, they change. The people who only worked with Gans of CuO2 or CO2 we see a different behavior, I have observed this for a few years. And when they go to work with ZnO2 then they change in a drastic way, they feel more confident and they see there is no boundary in the knowledge. Those around the KF who oppose the T have never made a single N material in their life, so they stay in their animal behavior. It's very interesting if you observe (yourself) and your conduct after making N materials or other things. When they start producing ZnO2 you see the behavior change. (2:30). People who go to the next step and start making CH3 they have a different energy dimension. We are making observations worldwide, and they confirm the changes. The fields inside the S does and will effect the people who go inside it. In the videos we saw the collapse of the fields when people went inside, but the collapse is different for different people. It means that each one absorbs different fields from the S. The collapse means I need more, it's not that it's gone, because the body is a dynamic Pl so it receives and gives. When you take and the field collapses it means that you are in need of those fields. This is how you feed in the space. There are a lot of hidden information in these videos, if you look at them not just for the fields, but as a scientific study. Fro example, behavior, Pl transfer, structure building, you saw how the S collapsed into a donut shape. Arman has the video, where the fields collapsed into a S shaped of a donut and the center was hollow. The S starts at the second cores, the outside M and when it comes to G there is no field, we see for the first time the donut shape. (2:32). The wish of Arman was to have AZ the center of space development, now he has received it, now he has to develop it, he wanted to be the first man in space. We will start the collaboration in the next few weeks and we'll start flight tests btn the 2 centers. ...Understand how the fields change as you walk around it, you hear different voices, shapes of transmissions of the voice, you see the one sitting down and the guy standing, these guys manufactured the cores themselves so they are already connected to them, with little interaction from outside people. Start understanding how the fields interact and what you wish for becomes part of it, because you bring the field with you. Important for you to understand is that the KF wish was for the nations to come together and be peaceful. (2:34). Last week the first nation has announced it wants to be peaceful. The Presidential Candidates in Ghana declare their commitment to Peace, so it doesn't matter which one wins. Rick reads article. All 7 candidates signed the peace declaration and attracted the attention of international community. ... (2:40). So you see we are Ghana and they have become the first country (in the world) to commit itself to peace. We were in Rome when we received the peace agreements btn Russia and USA in respect to Syria. Now we see the same, the KF wish come to pass, we commit to peace. We speculate that the other African countries will one by one join. I am in Ghana and we see the way the pattern was set. It is important that we push through the delivery of T. The KF will support the government (Ghana) in every aspect of delivering the T to create peace, within the nation and West Africa and then all Africans. As I said our wish is our command. When you are in the SS and if your wish is peace it will bring peace among the place where you are. This has to go into the next step. John has a peaceful behavior and soul, it has to be him, ?? I explained to him, he has the total freedom, no shackles. It's him that decides, and this is his achievement since he came back from Rome. There is no choice. We can now influence the Systems and conditions. (2:42). We will take this into the understanding of the fields of Gans. Question, what do you do when bad feelings appear and you are not in the strength to continue working, how do you get back the trust,

and is it okay to continue building the S and will it effect them? Keshe, it happens to me many times, it means you are not ready for it. It means you wanted it, but it is not that somebody put a bad feeling into it, it's your own soul that sees you are not ready for it. The disbelief in something that you are not ready to receive should not become bad feelings from other peoples doing. When you set your mind to achieve something and you don't reach it, it means you are not ready for it or the society around you is not ready for it. It doesn't matter how you push it, it happens to me many times. I want to disclose knowledge but it somehow doesn't want to come and disappears. (2:44). We made the commitment to peace or I commit my nation to peace, and now you see the Newspaper on the screen, "we Commit to peace". We tried for 2 years, the world wasn't ready, we come to Ghana and they are now the first nation to commit to peace. What we said we achieved, but within the boundary of what the others are willing to accept. In the next few days the Peace Treaty will be given to Ghana and they will be the first nation (in the world) to sign the World Peace Treaty. This is in the writings of Bahaula, what you think is good for you is ?? not necessarily good for you , because it could be a poison for you. When something doesn't go the way you want never blame it on the others, that was the escape that we always chose to blame others. It's you who creates and finds his position in respect to the others, it means you are not ready to receive it, or what you give they are not prepared to accept. In my books I always said. (2:46). **This U has been created in the space of the other U (Unicos) to the size and dimension which is allowed by them**, it doesn't matter how much energy we have inside us, we have to understand that we are within the structure of others. Now that you understand the operation of the soul, your own inner being you call soul, it means that even though your E and P are not aware of, but they wish to do emotionally, your soul is aware of with the others, but they are not prepared to receive it, it's not for them, then they have to move in a different direction. You call it that they have put a "bad eye", but in fact it is you who has to understand that it is not time for it. There is no bad eye, some prophets of the past referred to it and cultures believe in it. But change the table, and understand that it's you that puts the magnet on the table and see how the space comes (they position). You move if they don't want to move, you don't move them and if you move your magnets, then you find out that the others have to (re) position themselves. Now that we understand more about the science we have even to understand that our souls in respect to its MG fields have to matching (??). When one is not ready for the other, this is what is called the bad eye, but it just means that others are not prepared and they give you a field that they are not prepared to understand. You have to take a new position and you want to hold on to the old position, so you see there is no bad eye. So you change your position. (2:48). It means its not yet the time for it. Maybe it's because you can't personally handle it or you can misuse it. It's a protection for you but you blame the others. Ulga asks about a Farsi saying that if you are doing all the proper things but it is not the time for it, am I correct? In so many ways but we have to understand that it is for us to understand the process. We have seen the prophets of the past declare don't do this or that, respect yourself and others. This time when we bring the change it is for all the entities of this planet, it has to fit that everybody is comfortable, be it the fish, dog, bird ro the man, because now we understand the operation of the inner strength what we call the soul. And we all have ?? because our soul was created out of the elements of this planet. (2:50). So we have one AA right across, a common denominator, which is this planet. Whatever we do has to fit

in the whole structure of existence on this planet, as one nation, race, and planet. From now on thinking instead of thinking that someone put a bad eye on me what about the fish, maybe it doesn't fit him. What about the bird or the man in South America or China it has to fit all of us from now on. When you come to that point it becomes important that all the others fit into my wish so that we find a balance. The game has changed. Individuality, just a man thinking for his own race and ignoring the others has changed. The human race is not and was not out of one, it's an amalgam of maybe 2 to 5 races which have been born on this planet and one has taken over the others due to the knowledge or the strength of the aggression in the past. But this has to change and this is why we become One Nation. (2:52). Now that we are One Nation we are responsible for everything, the animals and the rest. This is what we have to learn. Then you will see what is about to come in the time. We have seen the first nation to accept the World Peace Treaty and the new government in Ghana will be signing itself into the Treat. We are on target, we needed one nation to start and they have already stated this in front of the UN so the pattern is set. My wish is my command. We have wished it and we have achieved it. It had to be where we are (KF) and not another country. The world leaders are ready for peace and Ghana has made the first step. Keshe hints that another leader will sign in the coming days. Our wish and those of the KF supporters are very pure and strong and we will achieve it. It doesn't matter how the ?? can cry. (2:55). John explains about the donut shape and how the fields came down into a torroid where we were at the 12 foot mark of the fields .. (2:58). Shows a SF, all motor are DC and rated at 18,000 rpm with 5 separate speeds, Acrylic balls are placed on the motors, the Gans and configurations are yet to be determined. Stop, what we see there is perfect for choice of material for you to fly. (3:00). or to be able to see effects. You have 2 cores, make sure your center core is heavily oxidized Gans', which means use CO_2, ZnO_2, CuO_2, brass content materials. Try not to use Lead if you can use Silver. In the center core measure precisely a certain amount of Al and with it allow the adding of cold caustic, a very small amount, crunch the Al foil and put the caustic inside. Add about 5% CH_3 to it, that should be the combination of your center core. The Al has a reason in that mixture, if you use the Gans or the LP of the Gans of the material. The CH_3 gives you the energy, the caustic and Al gives you the additional energy to make it more interactive, where the H gives and the O takes and this creates dynamism. (3:02). Your outer core should consist of CH_3 and Al foil in different quantities as you decide with the addition of some caustic. The same process starts where in the reactors the moment you build the oxidization of the Al will occur inside the core, you can add a small amount of CO_2 in the outer core, allow the oxidization of the Al as well. You seal the center core and don't touch it anymore. That is sacrosanct you don't touch. This gives you a base. You have the interaction of the energy, release and absorb in the center core, the H is a link connection, Al in the center especially if you use some Gans of Al, because the Al is in a Gans state in the cores because it P exists you don't have a Pl of it. It's a P material. If you allow some Gans material in the inner core before you seal it like ZnO_2 and the other. Go back to the blueprints when we started showing the first works, (3:04).

(continues a detailed description of how to proceed ...)

(3:10). We set the procedure and you have to follow it to get results. We have seen a lot of people not following it and getting disappointed. Caroline has seen people making N and Gans materials the wrong way and don't get any results. Don't touch the N coating. Those who make fire coating or electricity coating will see different results. We see people who get results follow the procedure we set up to make a deep N coating. People who do their own innovations create different effects. The way I have set up the N and Gans production is the way that I have achieved all the results. I am a nuclear Physicist, and degrees in the structure of metals, and how you produce and handle them. (3:12). In steel production we add a certain amount of C to the Fe and we get different behaviors of the steel. It's the same with Pl, when you add different amounts of CO2 you get different behavior from ZnO2 and CuO2, it's ?? the structure of the C that gives you that, you get sliding Pl. We heat the steel up to a high temperature and how we allow it to come out gives us a different type of steel, if we slap it in a cold water it becomes brittle, if we let it cool slowly it becomes different, depends how rapid you cool it. It is the same with how you make N materials. When you make a N in deep caustic high temperature you create a condition of the release of N material in a way it is needed to become Gans, the spacing is correct and everything else is correct. Then when you add this material to the Gans, depending on the dilution, it depends on how much and how you release the structure. Up to now everybody does whatever they like, that's the way the T should be, but if you follow the way we do in our production and research and Development. We don't see much success in fire N coating the way we expect and that's why a lot of people get disappointed, because it creates a different kind of N layer. (3:14). When the structure is very tight it creates different strength MaGravs and M G Pl is released in Gans state. Fire Gans is different the with NaOH. With NaOH method we have fixed it with the temperature. This goes back to the original teaching. I explained this a few weeks ago. He draws a Cu wire and the spaced N circles on top, this was in atmospheric condition. And now we have created a Na condition to do with NaOH and NaCl, by creating a new environment we created a Gans. On the metal side we ?? go from solid to liquid. If we heat it up we put more energy into it and go into gas state. (3;17). But there is an addition to the knowledge. If we allow the gas state now that we have separated it into the liquid, then you see a repartition of what you had and see a Gans, N layers a 4th state of matter coming from the matter itself. Here, because of atmospheric condition the knowledge of man has been blocked, with the interruption of the new environment which is Na we can carry on with the same ??? this is what we call it GANS gases in a N stage. You have gas here (next to the plate) in the right conditions creates Gans in the liquid. Because now that it is more free we can act on it. With caustic we catch the Gans' here (? the border with the plate and the liquid). With the gas N coating we try to change this environment to achieve this to go there. ?? What we capture at the high temperature conversion of the Gans' trying to push them back on to the plate because we blow it with the fire. the same with the electric, we try and push the current through (the layers) to interact with the outside. (3:19). We produced it this way and that's why we called it a Gans. When we heat it up that it goes so fast that it comes to its Gas N state then we pick it up (? on the Na side) and it becomes Gans. The way you produce your Gans material is important and you'll see different results. With electric current you have a push from underneath and this N structure in the strength is not the same as this N structure (? with caustic) because you pushed it further (? with the electricity). The steaming way is the same. ??

we work with the caustic. If you change the Na to the Mg then you decide the strength and which level of conversion of the atomic structure from inside. This is crucial to understand and I am realizing more and more that a lot of people have not understood. We need to understand this because this is why some of you don't see results or what you want. John showed the ball, he draws it, the way the N material energizes the ball which pressurizes the Gans inside it, which then releases its fields at 20 to 100 meter length. You all have this S in your hands. (3:21). I'll show you how. You all made the (90 degree) Magrav Units and you have the ball of Gans in center. Is there any difference btn these 2 units? This is how you make powerful S, because now you dictate what fields you put inside. (3:23). You have to understand how far along you are and how much knowledge you already have, but haven't made the connection. You can put the balls around the coils or you can make the strength high enough that it can reach the core. All the knowledge is there for you to go to the next step. The reason you saw the expansion and the closing of the gates or doors is the same, you close the loop and then ... because now you close the loop the pressure goes on the center and as you put pressure on it, it expands the field out. You trap the M and increase the M and when the G reaches a certain point it opens out. You have the Pl S and you pressurize it and it breaks out itself. For all of you who made the Magrav S at home, reload the Gans balls in a very heavy direction and you'll see the fields. You'll walk in the house and you'll see the lights. We saw this with the test Ali in Canada did, they could see lights in different part of the room. You are all on the flight mode it's just you don't know how to ignite it. Everything is there. ?? we see 12 set, 18 , 23 cores. (3:25). If you choose the right approach the table will fly. There is nothing wrong with it, follow the way I showed you how to load it. It's not that it's the only way, but we see for the atmospheric condition of this planet it works, outside (? the planet) we do different games. (3:28). Rick shows more photos of that reactor. Would there be a particular speed for different sets of balls. It's mainly the leakage we have seen with these acrylic balls. It doesn't it's wrong but rather the fields inside the balls are too strong so it pushes the boundary of the matter state. Do not give up just because you have a leakage, carry on, it means your Pl S has built up. (3:30). He shows Paul's photos of a new Health Unit he has built, you are supposed to go inside this box. It is size dependent how you can get in it. It moves instead of the patient moving. I presume he is going to put 6 dynamic cores around. (3:34). Keshe adds to the knowledge. In Book # 1 and 2 and the medical patents. We spoke how the CO2 effects the virus (HIV, Ebola, etc.). You have the AA and a backpack of energy what we call the virus. You have the AA with COHN inside which is always the same. We saw that because of the dynamic shape of the Pl and its interaction (IL) with the Virus, we have managed to change its (field) strength and we see the end (of them). (3:36). How it works and interacted. that is why Gans' are very effective in respect to viruses. What do we do with microbes, germs, parasites which are AA based? These kinds do not have extra energy. The AA based ones can partially be effected by the CO2 but not all of it. When we cultured bacteria's and microbes in the lab we see only partial effectiveness and not fully. We have to find a new solution. (3:38). We can't the C which only changes the line of communication, nor the O because it's the holding, we can increase the field of the Pl or reduce the field of the Pl of the AA, H is the link for transferring or deciding on the full size dimension and transfer of energy in and out. N is the decider of how much the Pl will dictate in its transfer of energy in its ?? size. So at the moment we can't touch the O and

C. In future teachings I'll show how you can work with these. We can change the N. those of you who are trying to work out something for bacteria, microbes or parasites you have to bring your attention to the production of N. You can use Nitrites to create N of oxidize or to create the energy to interact with N that you can handle bacteria's etc, because these are earthly dependent so you have to dictate the conditions of earth which dictates their size which depends on their position. When you produce the different AA with the Cu or Zn you saw how different shape or color or orientation and thickness of the AA sits on top of the water in the box (Gans kit). (3:40). So this should have given you an indication that something is dictating the size and shape of the AA and that is the N, the strength of the N which that environment creates and attracts. If you are going into the next step of the health application for bacteria's etc, you have to consider the introduction of the N into the process. But when you do it in a scientific way you have to understand how it works and what it effects and how you are effecting it. The work of the N comes in a Gans and not in a matter state, it's in a Pl vacuum condition of the body and works on the transfer of energy which it gives to the H. We always said the H was at the end (of the Pl field spiral), so the energy released by the interaction of the N dictates the position and the strength of the absorption and reduction of the fields at the end of the Pl what we call the Coulomb's or Pl barrier. The change of N dictates the structure of the AA. So if you change the effects or operation of the N in the AA, then you can handle anything which is AA based, bacteria's etc. If you understand this you can change all the bacteria's. People who have the problem of solving Malaria should understand this. (3:42). One of the best ways to create materials to handle N is to get collaboration of another material which is connected to the behavior of N, such as Silver nitrite, because it already has a condition and position and N responds to it in its atomic decay structure. We'll continue it next time. The reason for its operation ... Those of you who handle bacteria's etc, have to look into the centralization of N, it's in book 1. (3:44). We need to extend the knowledge that all of us understand the work of the Bacteria's, microbes etc. This is why some of you have problem with parasite and some don't. It depends on what strength you used and chose to interact with the N. You need to know this for deep space because without it you'll have a huge problem to sustain the body in space and his own ??. Look at Silver Nitrite and I'll show you why Silver has been one of the main materials which has been used for centuries 9for bacteria's etc. because now you'll understand the scientific knowledge behind it and how it operates and connects to the body. Jackie shows on MaGrav positioning. (3:46). He positioning a C structure, burnt material, in a jar with liquid, like a SS floating in the sky, by MG positioning btn the top and bottom. Now he can make it go up or down. There's a spiral forming. (3:49). He plays with the Gans some photos. One green with lot of Mg and another with Fe based. (3:52). end.

Keshe Foundation -- KNOWLEDGE SEEKERS WORKSHOPS

150th Knowledge Seekers Workshop December 15, 2016
(blessing the souls of the mice, Welcome the opposition in Norway, TEPCO has sent emails confirming use of Technology in violation of IEA, John of Arizona shows more videos proving the fields of the Spaceship, How to amplify the fields for flight, what are

passive Magnetical fields, Sleeping on leather or Gans field, How the heart works is like a Spaceship, How the egg shell is formed compared to shell of Spaceship, How Ca works in Immune System to destroy infection, ... How to make Nitrogen Gans, Good example of understanding the field interactions, Keshe says, "I am the Light".)

(:06). It's a milestone the 150th workshop started 3 years ago. ... the share of the knowledge is with the use of it. (:09). Someone asked why he blessed the souls of the mice that were sacrificed in the trials. Those who have become mature as a human value the life of the mouse in the same way as a mother or father. When the child is in danger many times we have seen the father sacrifice his life for the child even though he looses his, the mother does the same. The scientists who have morality and have been educated and understand they look at the life of the mouse the same as the mother. It's the scientists that give the injection, they use the life of the mouse for saving the life of the others. Those who have come to understand the truth they respect the life and see it as the same as a mother. The soul of the mouse is of the same standard as that of a man. (:11). In science they don't call it killing but sacrifice as a way of respect. That's why we bless their soul. We released the research results to a number of governments and they will use it to proceed to the next step in the research, including some North European governments. (:13). It's important to understand that we need to be able to explain the T. Some politicians in Norway got on the bandwagon and say that KF can cure this and that, it's their job to do, let them do it, they are serving the KF. We don't claim we cure cancer, we say it's the body that processes the cancer. We welcome the government investigations into every aspect of the KF, they have to test it. A lot of pressure has been put on Ghana for promoting the KF by the "Internet Terrorists", and the Ghanaian government said you can get lost. ?? .. The KF products, licensed are going in the market in Ghana. We put the power Units through the licensing process. We ask all people selling KF stuff to please have a license for the products you sell. (:16). We support 8 to 10 KF manufacturing. We are doing the same thing with the new Power Generator getting a license. ?? When the politicians in Norway have accused the KF of (some wrong doing), invite them in to test everything in the KF. You make accusation, we welcome you to prove it. Those who work in Norway approach your government and provide them with S, Pens, Pads, it's not an alternative, it's a new T. We have enough proof it's for you to prove we are wrong. (:19). Use the opposition to provide them with the T, to the advantage of delivering the T. Be very public with it. When you give them the Pen take a picture and invite the press. Never run away from the governments, they are your best friends. Because once they see it work they can accept it. You have seen how we worked with the Italian government and the Civil Defense. ?? The British Government before said what are we going to do with the KF health application. Def Flourescnt worked very hard to get official approval by the health S. It's a natural process and we don't claim to heal, he worded it very carefully and every time there was a loop hole he found a way to write it. The Belgium Authorities took it to court and tried every way but they couldn't break it, and EU did the same. It's known as the Health Agreement it's the patient who asks for the S to be made. It's the same as the sacrificing of the mice so that people can be saved. The patient offers their life that the knowledge can be shared. ... We have certification in Belgium for teaching doctors to use the S. A lot of work has been done in the background for the T. (:24). A lot has been done in Italy with the

government in decontamination. Don't be afraid of when the governments come in. ... We are in the same position with TEPCO, they want us to keep quiet, they were angry that we went public with it. We don't do it that way, if another reactor goes it effects all of us. TEPCO is using the T and for the first time we have received emails confirming their tests. Up to now they couldn't do because of the statures, they are sanction busting. (:27). How to get IEA to allow TEPCO to use the T? They are committed to using the T now. They used Iranian T to help their people during the sanctions. But now it has to come out in the open. TEPCO will be forced by the Japanese ?? and then penalties of 20 billion to be paid to IEA or UN. They have broken sanctions heavily, it's not in our hands, but now we got what we were looking for. Up to now it was all in denial but now it's in writing. (:29). We are still offering collaboration with TEPCO on other nuclear reactors , the penalties have nothing to do with us, we are there. The biggest mistakes they made were to confirm that they have been testing and using the T, by the heads and can't be denied as mistake because too many details. In time we will release the emails. ... now we have to go more in depth on how the Pl works in the body an din the space. I would like to acknowledge those Knowledge Seekers who finished their 1 year course this month. (:33). We work closely with the nuclear Industry to solve part of the problem. The 3 webmasters will put up on the site all the KS teachings compiled by Rick, now with 1 link you can go to all the teachings. (:36). John do you have anything to share with us from last week. (:45). Shows videos on SS tests. The fields went up very high in center, about 12 feet high. Keshe says in the first video this is a combination of different M fields, these Units don't have capacitors, ?? we connect the G to M to G of the top stacker. One of the setups could be all the M of one MG Unit connected to the G of the other. (:50). This is one part of S control and what you just saw with john is another part, this way you don't need a stacker, since a lot of you made coils you can start testing. What you see on the table ?? is so we can only expand or strengthen the M field of the SS, or allow the G center to be strengthened for directional pull. This (kind of research) is like when we just start learning to walk, we fall we use one arm to pull ourselves up. This (struggle) is part of the process, don't look at it as something else. We have seen the fields of the structure. As we go dynamic we have an operation that can change direction, ?? coils or change direction of coils, or use only 3 coils as M and 2 as G that we can rise up in a given direction. (:52). This is the next step, to show how we can increase the G or M fields of the shielding and what happens. The tests will show how far they can increase the fields and strengthen them. Now it's only M or only G. Let's go deeper in understanding, he draws the inner G and outer m rings. The strength btn the 2 is your voltage or potential difference. It's like a dam the energy falls in, the height of the dam gives the amount of energy you can get from your turbine when your water falls, that's the potential difference, what we call kinetic in matter state, which has a ratio according to the drop. In Pl T this has an order of magnitude. [increase A to the 2nd power, in matter state it's multiplication by order of increase, I'll explain, 2 x 2 = 4 if increase by 2 = 8; by order of 3 it's 9,] In matter you go 2 + 2 = 4, then +2 = 6. In Pl you go by order of magnitudes, that's 10 to the order of 1, 2, 3, and so on. In matter if you go 5 times more the height of the dam is only 10, whereas if you go by order of magnitude you go 2 to the power of 5 is 64 times more stronger. (:55). This is important and plays a huge game in coils and Pl potential difference, in coils you go by number of turns, which increases by a magnitude of an order of 10 to power of. In Pl fields you go by an order of magnitude,

but in matter state you only multiply it. This is one part of the story, the other part is the current flow, the strength and flow difference will give you the power of your S. What is your strength difference and how much travels across and ?? vibrate will give you the power of the S. That is why John is adding a power supply to each section that he can start controlling. The beauty of it is that it's by the order of magnitude. You see this in the human body, the amount of Fe you have in the body is equal to about one nail in the matter state, but how come it covers every single blood cell in the body. It has a huge volume, when the body is in the Gans state it becomes an order of magnitude in size and not the atomic structure of the nail. (:57). These things we have to understand. John continues with the videos. They have the high voltage transformer and get a donut shape. The violet ray is increasing the M field. (1:03). Keshe says now for the first time you see the structure of M fields of a SS, they curve up, the flat base is of the SS. They can add the next set of reactor, ?? to strengthen the M and G. We have the field definition of SS. John feels tingling in his finger because he is inside the SS. The reason you see the collapse in the fields is because the body (at that time) needs the fields. You are carrying a lot of O with you, every single AA has an O link in it. (1:05). When the body gets saturated with energy the fields won't collapse any more. Here they use the ball M fields zapper ("violet ray"), he can build it directly from the S when he connects one of the lines in. Which means you can create your own energy fields internal in the ring without any external source (violet ray). And the field will expand. Right now AZ is the center and next Ghana will have their Space center open where we can test flights. He summarizes what the videos have shown. It started with a single MaGrav power, then how the fields are formed, another shows the donut shaped fields which means you can control it to increase the field strength that you can travel with a high speed, and now you saw a lot of rings on the table, a lot of you can make these rings and start testing yourself. (1:07). Those of you with dynamic cores with different Gans' in, you can put them on the table and come to the same conclusion, you can vary the parameters. Arman has just come up with a single S, where you can control a lot of parameters like M and G. Now we have made the shape of the SS, it goes flat on the top and domes in and when you measure the fields on the other side exactly 180 degrees across it's exactly the same shape. The next step with the coils that will sit on top of the MaGrav Units will now define the strength of the fields. We are coming to the second layer, you will literally see the fields in solid state. The 12 stackers will have to interact with this next layer ?? Go back to the medical teachings the coils underneath are the bottom layer, ?? this is the middle layer. WE have 2 choices, to add a third dimension with the cores, in SF. (1:09). But if the cores goes down you'll loose the skin. We need AZ to come up with the third layer that we can see the P. ?? they put the cores on top of the stackers and then nothing can happen the structure is solid. Get a SF and then we can shift the encapsulated entity. John has fastened the MaGrav's to the platform because if the vibration cones and moves them you'll say it doesn't work. They have observed that one of the MG moved a few mm, which creates a gap in the dam for the fields to flow out through. What he did with the zapper (violet ray) contains a deep knowledge, he uses that when he needs to increase or reduce a field. (1:11). You can suddenly increase the field while keeping the body of the SS the same. This is used for shielding against meteorites or to go under the water. John shows more videos. We are using some of Alek Beads T, they are using 1 S to control M and one for G. When they connect the G fields they get a spark, when they touch fields

collapse to about 3 feet, when don't touch they go back to 12 feet. (1:14). Keshe explains scientifically why it collapses when you touch the G, because you increase the G field strength so much that it absorbs everything in sight. This is the fallacy that Hawking came up with that the Black holes are the center and they absorb everything and nothing goes out. When you touch the G the field comes in but you still have the M which reacts with the outside. The reason is that you only absorb the G side of the fields but not the M. It doesn't collapse, it centralizes to the middle ring. In further tests you'll see how the power concentrates in one position. In further developments I'll show you how to use these MaGrav Units in concentrating Pl fields, which means in a specific configuration you can open the space in the direction of travel. He draws dots in a circle for reactors. (1:16). You can use a combination, with the coils that go above the stackers, you create a field in the direction of the motion by increasing the M fields that it goes out in front of the craft, you fly into the vacuum and you have no resistance ahead of you. The Iranian space agency has done this to absolute effectiveness. The Magravs at the base of platform are there to keep the shape of the SS, and with the coils on top you adjust the M and G fields to create an extension in front of the craft. You fly into the fields so there is no chance of anything ahead of you to touch you. You still have the atmospheric shielding in totality around the SS, but now you strengthen it and dictate the direction of the position. If you have a meteorite or a huge Pl field ahead of you, if you fly into it you'll die it will create a huge mess in your shielding, but you can create a condition that you drive through it. You match the field strength (of the object) with your own shielding by changing the field here (in front). This is how we are walking into the space T, slowly you are understanding. The present aircraft shows the chemtrails in the back, but in Space it's the opposite. This is why this T is so safe. (1:19). The second step is that John mentioned Alek Beads structure, the beads have a feedback to the next bead and one to itself. This is important, put 3 beads in the inner ring, reverser the cores internally, no rule say that you have to have your beads outside, ?? make one coil to connect to the other and also to feedback to itself, now you have created a self-sufficient power generator, then you don't need to rely on the outside. If you understand the structure of the space T and what is to come ... he draws a dot in the center and connects the 3 beads together. Those of you who work with amplifiers understand it. ?? creation of potential lift .. when you connect them it's a delta connection, the creation of power, flow of current, now you see a self-sufficient. This is where the power generator that we are on the verge of releasing comes from, but ?? totally different. (1:21). The top core becomes the weakest, we fill it up only with CH3, the other cores we fill differently, How they react internally will dictate the potential (difference) and we can increase it (the fields). Or we can go on a delta formation and do the current, but now because we used coils, those of you who understand electrical and have seen the structure of the power generator, when I say we are on the verge it's because we are producing so much (current) that we have to reduce it. Now we bring a combination of the Stacker Unit, MaGrav, SF together and you have a self-sufficient Unit. This is how the cell and AA works. I said I will open the book of knowledge and understanding and now you see where we are. Because of the initial power created by the first lead (Alek Bead in the outer ring) you create a potential difference with it (the inner 4 cores in SF), with the Y and delta and if you connect in the right way this combination becomes the double coil, what we called feedback. The potential feeds and the current and the current feeds on the potential and then you have

your S. This is vital in understanding the T. It's why you saw john putting 3 reactors in the center and in one of the videos there was a little reactor in the middle. (1:23). He could put a CH3 core on top of the tripod, to cover the other 3, now you can create lift, but you haven't structured the plane that it can lift off. To do that you have to make it enclosed and self-contained. It's like a house when you don't have walls, windows and doors the wind takes you anywhere. When you contain it you can do anything inside, a football match, it's all yours you decide. And if it's like a balloon and create enough reduction in mass the house floats, the balloon flies. We're not doing anything different, but now you are doing it with a much stronger by order of magnitude. A lot of you have been asking for a blueprint for a power generator, it's on the table in front of you, if you understand the world of Pl. Our generator is done but we are perfecting it that you don't get huge power flows of 100 to 200 KW. The initial S (generator) was tested over 8 months ago. Vernie when was the first time you tested this configuration, yes last year. The S is there but I have to wait until your understanding matures otherwise it becomes like the MaGrav S. You lot taught us a lot with the MaGrav S, you all became monkeys, monkey see monkey do. (1:25). Nothing got added (to the knowledge) it stayed the same. This time I want you to develop it. For me to put a generator on the table is a few minutes, but it will again become abused as like what we have seen. Nothing added, all are only after free energy, and ?? do with the KF, we have seen it with the Bulgarian guy who is selling the Pens and Pads which he learned from the KF, and he says everything is wrong (attacks the KF), he doesn't tell the people he is selling, but he wants to confirm his existence. We have seen Ludmill and his operation in Canada ... abuse of the T. So the power generator if you understand it, is in front of you. I can explain it in 2 seconds, but we want to use it not only as a power supply but as a shielding. We have to complete it because I foresee huge disasters by Christmas and New Year on the West Coast of US. I said that months ago. We see a lot of people on the Internet using it. Understand what a beautiful knowledge we have coming out of AZ, Philippines and research centers. Translate the knowledge inward and then you'll see what you have. Understand the 2 S and the one which came from Alek Beads, 3 pieces with one winding going to the other bead and the one going back on itself. (1:27). So now the 3 pieces are the 3 core reactors, you can do the same kind of connections, now you have a self-sufficient energy S internally. For deep space travel there is no need for generator because it's by order of amplification, you amplify the power by order of magnitude. This is our problem, we have a 200 KW generator and trying to contain it to 3 KW. Man is in the space if he has the wisdom to understand what he has in his hands. (1:29). Armen shows his new single core rotating reactor, it can go up to 11 to 12000 rpm. What is the difference btn this core and the 129 Tesla core from 2 years ago. I have double cores rotating independently with this, that's the only difference. (1:32). He shows a 3D design, if you understood what is the MaGrav Units, then look what is here, if you made 18 of these cores then you can make anything, make connections that you decide ?? He draws on the photo the G and M, and let's say you have another unit here, You saw john doing this, you can connect the M to M or M to G, if you have 18 of these you save yourself using stackers and having to add another dimension to it (put more coils on top). ... if you balance them out with 12 cores outer and 6 inner, and 3 cores inner. (1:34). With dynamic cores and understanding how you can connect fields with each other without using wires, then you go into a true SS without connections, because these (cores) will dictate their own position, you don't

need to fix them because they will rotate. Those of you who have seen SS you always see these 4 in SF, and you see the outer rings rotating. The speed of rotation in a given direction controlled by the M field inside (the SS) dictates the direction of the flight. I have invited a Iranian space scientist to join the KF, we are waiting for the Iranian government response, you'll see more. What do you think of putting these cores in vacuum chamber? It's all the same, they create their own shell you don't need to be in a vacuum. In the private teachings there was a discussion about the egg and how the shell was created. (1:36). You have the yoke, white and shell, how on an automatic basis does it create the shell every day, where does it come from. The creation of the Ca shell is understanding the knowledge, what you already know. He draws a circle around the yoke and white, this is the womb. It takes 3 layers to manifest tangibility. The yoke and white, each create their own MG field. (1:38). Now you need the third to create the shell. The womb creates ?? it's got the property of the structure of the second layer, and the body over the time of evolution has created ... that both entities have decided to give tangibility and the field strength btn the womb and the yoke and the white leads to the creation of the shell, and its strength is equal to the Ca which has come in from the chicken. The chicken doesn't need to have Ca to build it, it can create the skin shell without the Ca, ?? So we understand for the first time how shells are created. If you understand this and what I said about the third part, you have a stacker, a ring, these are like the yoke and the white, let the MG field of the environment to give it the tangibility of that environment. In this way you can ?? dimensions in the U, you don't need to change to Al, ?? you always stay (remain solid). The environment ?? has its own layer of MG field, and in the U you create a continuous shell. (1:40). It doesn't matter if you are in a star or in the inner sanctums of a planet, or in space in a ?? attachment. Now you see how reptiles and chickens have been doing it, but man has not yet understood it. Because if you put man in a shell as the reptiles do, and you ask a woman to give it birth, it's such a huge ?? In mammals the structure of the womb changed and doesn't allow solidification, but through a specific order in the main brain, or what we call the RNA and DNA, allows the creation of the structure of the first bone, because it creates the MG field required for it, then the child has the first bone. It's no difference btn the first bone and the shell, or of the chicken's egg shell and first bone in the embryo of the chicken inside the shell. The process is the same. But it is a specific field combination that works very rapidly that gives you the structure of the bone. So if you understand this, then you'll understand what John is trying to do in AZ to get the tangible shell of the SS, ?? in the atmospheric condition of the earth you still have the shell, but you still create the Plasmatic shielding 2 different things. If you touch the egg as it just comes out of the chicken, still warm, but it still has the solid shell. The child is born with a heartbeat, it's still warm but with the skin of a man. (1:42). You put that skin in a different atmospheric condition you get a different color of the man, but the reality of the man hasn't changed inside, it's the same structure. Race has no meaning for those who understand the reality of science, it's the ignorance of the man. All the KF teams are bringing the knowledge in a very compact way in their own specialty. Try to understand the how and why the fields interact to give you the appearance of what you see, and not what has been accepted. Then if you understood how the egg shell is created then you understand how you can create the shape of the craft. What is missing? Replication of the G line M field of the earth within the structure of your craft or the point of destination. At the point of arrival, and the

transportation time. You always have P tangibility of the containment or fields which you call the Coulomb's barrier ... at a certain point solidifies and gives you P structure. (1:44). Blessed are those you understand then in time you can take man to space. Carry on Armen. What is the difference btn this and the 149 T? Nothing. Have you moved forward in the last 2 years? ?? No it's understanding that makes the difference. He shows a black mass in a Gans bucket, it's actually N coated Cu and plane Cu, I changed the condition I added NaOH to the saltwater and increased the Amps and volts a little, and it started growing N material on top of it (the raw Cu side). Is this Principle Matter because it comes out from the matter so it's totally N coated? (1:46). so it still carries the field of the matter. Your non N coated is on the side we don't see, correct? No it's on this side. So you put current into a non N coated Cu, and the reason these flakes like this is because you have the Gans material on the other side. If you connect the 2 plates together you'll get the Pl of the Cu and somewhere in the middle it gets oxidized, now you are releasing a far amount of Cu but you have put a magnet (Gans) on the other side, a N coated Pl ?? these are all trying to get there and these are like mountains on it. These are Gans materials. There is something interesting you can play. I explained it to Eric but he went a different way. (1:48). All you have done is you dipped a Cu wire or plate into the caustic and you want to use it to see how you can get energy from it. He draws a Cu plate and N coated it and put a raw Cu on the other side, what you are doing is feeding it, this is becoming a Gans state, ?? this is a solid, changing the current changes it, you start getting your N materials stacking up, this is one of the ways to produce N sheets. This has huge applications for ?? But now I show you, make sure the heat of the caustic doesn't go to the other side just N coat one side of the plate. On one material you have everything you want and a massive energy (power) supply, this is your solar cell. (1:50). if you can submerge it in the Gans of the Cu, god help you what you can get out of the other side. In the patents we speak about N coating sections where you can create a lot of power in between. In Nuclear T these things have a lot of application. What if you used Zn N coated and Cu and put current through the Cu and see what comes out. You'll get a compound, composite Gans. I can show that one. He shows it and it also has Fe in it, first he got CO2 then he added caustic and got a composite Gans, it's a combination of CO2, ZnO2, and CuO2 all together. Mr. Keshe it's in a N state. No it's in a Gans state, what is floating in the middle is in a Gans state, yes this is the first time you see vertical N state instead of horizontal. This is like a powdery substance and it falls down. The point when it falls down is when the MG field can't hold on anymore. Yes, but it still carries the matter field? No it carries the Gans field, now it's in a Pl state it's a N material. Is it the Principle Matter? What do you call PM, everything is a PM, starts from ?? something. A Cu PM. If you look Armen it's your Gans that is the PM not the N, the energy goes from the center which is more free to the one which is attached to matter, and the water btn the 2 is the Transition. (1:54). But in this case your matter state is a N coated state of Cu or Zn. This is what we were just talking about, you see the shell of the egg, the matter is created in the middle of nothing, the grayish bluish material in the middle. John shows another video, they connected all the M together and all the G lines together and then hooked up to a power supply to try and control the fields separately, and varied the voltage to do it. (1:58). So now you see that you control the fields and then convert the knowledge into a coil that goes on top of the MaGrav for reducing or increasing the M and G field strength. When you add these coils and only connect the M or G they become

amplifiers but in a Pl way by order of magnitude. In a SS you can use one of the dynamic cores as this, if you know how to load it, so you'd have a internal dynamic transformer. Vernie did some work on this but he abandoned it because he couldn't understand, now maybe he can see it. In the teaching I don't push anything, I just enlighten the understanding which has to mature to understand what's going on. You have to go a step further in the knowledge. (2:00). The video of the donut shaped is important because it shows you can shape the fields through the G. The important thing John is doing is showing the size and expansion of the field, you reduce it and it becomes the size of a kidney and you expand it and it becomes hundreds of meters wide. If you turn the kidney sideways there is no difference btn that and a SS, it looks like a SS, the same with the heart if you turn it in the right way, even the structure of the brain is like a SS because it's the way the fields connect and interact and the stability is always found in the half dome. When you find the donut video show it. the one you showed today where you touched the field and it increased, you have found the parameters for a 12 foot radius (8 to 10 meter diameter) SS. John shows one but its not the right one. (2:02). .. very soon you will see the structure of the SS and the control of it. It all goes back to 18 months ago when we showed Marco's Unit, this is the Mother Ship, the way it is connected, the combination of the beads, M and G fields instead of Stackers you have cores, which are static and you can change them, ?? and then a stacker inside. Questions? (2:04). Azar asks if the M fields can be active? Of course if it isn't active you can't see it. So when is it passive? Never is it passive. What's the definition of passive M field. A passive M field is when it is not applicable to the state that you are in, even though you are dynamic and it itself is dynamic. (because in your book .. cutoff). When there is no interaction, because the fields are at 2 different strengths. It's like 220 and 110 volts, if you connect one to the other it doesn't work or gets burnt because it's too much, but both can exist parallel to each other at the same time. Is there any point we call a M field passive? At a point in respect to you, that you don't have a need for it, or in respect to another field that has no need for it. It passes you. So somebody is sitting in front of me and they have a M field but I don't need it so it's passive. Yes, it's (passive) not matching yours. .. (2:08). The Cary group went to Standing Rock, and were supposed to have KF representatives in the camps. We have had a number of requests (for a few years) that we bring the knowledge directly to the native Americans and this is a nice way that it is getting done. We had request from the women of "the 5 nations". We will attend conference at the Philippines University conference. (2:10). Zane wants to show his work. He has been building static reactors and they have a pulse and feed themselves. If I were to charge these capacitors and put them to the static reactors, would that be turning the voltage into current and would that make the Pl come into itself in the reactor. Vernie you're an expert in this you answer it with all the reasons. If I hit them with a lot of volts will it turn them into a Pl current? (2:14). The question is where would you like to put these capacitors? Inside my stacker and separate them, feed the M with the current and have it feed back to the G. If I could pump them up and maybe they would turn voltage into current and they'll do what they are supposed to do. Yes I think you are correct on that part. ... I think you can use the capacitors to support the coils you have there ... (broke up) .. (2:17). Keshe explains, look at the heart chamber, it's the reason why Douglas' S could not be sustained. When you use capacitors you need to go back to the health teachings on the heart and look at the structure of the heart. Why do you have 4 chambers? For the pulse. Understand how

the pulse in the heart is created. You need 4 capacitors, each chamber is connected to an opposite chamber across from it, ?? but 2 chambers across feed the others through the wall of the heart when they are in MG field balance. The problem with looking at the P structure of the heart is that we looked at which one pumps where. But the heart itself is in a Pl condition, the liquid blood is in a Gans Pl condition. (2:20). So it's not only the P operation, it's also the M and G interaction btn them as well. It's not just that you put the capacitors together and they are going to work. Look at the size of each chamber and their position, and it's not just the positioning either. How, where and what capacitance you use and how you position it in respect to the other 3 chambers. You have to then confine the capacitors in a Pl condition, in an earth condition, if you want to replicate then do it properly. Put them in a box and connect them as you see, then for it to work in a Pl condition, put this box inside a Gans box or LP of Gans, you create a (vacuum), a Pl condition for it, then you'll see your capacitors start behaving as a Gans, Pl condition and not as a matter capacitor. You have to understand the totality of it. You have to create all the conditions the correct way. That's why the MaGrav works in the environment of the new reactors of the SS, because now it's cocooned in its own shell. (2:22). Many have played with capacitors but none have understood the work of it. Vernie plays a lot with different Gans combinations inside each other but never has the connection been made, what if I put them in a given condition in the Gans matter, then can I encapsulate the rings. Once you keep the whole thing together everything will work, not half of one and then half of the other. The missing link is the Pl environment, (being inside LP). Vernie says the Capacitor can help maintain the energy in the coil that both of them can sustain the exchange back and forth, he is right that he can convert the voltage into current during the time that the capacitor is in the discharge mode. this is when it charges the coils, the charge and discharges are the Pulses, the excess of the discharge goes to balance what needs balancing. Vernie is a master in these things. (2:24). Zane says he is going to do it, but controlling it is going to be difficult. Keshe says no, go back into the teaching. Zanes says I have been working on it I have Gans balls with my DNA in it for my shielding. Keshe says Good Morning! (means you got it). You don't need much. Lisa from Australia asks question. Good morning your Excellency. I am trying to make the Gans of N, if I add the caustic because I have Urea and Nitrates, they are in a crystalline form which I created a liquid and then added caustic to it. I am not sure if I am making Gans of N or just the Gans of the fillers that come with the fertilizer? Is the material black? No. they are full of fluffy whitish type Gans. (2:26). I have tried Ca Nitrates, Urea and Urea mixtures but they all come out whitish fluffy Gans. We do a different way and use Silver Nitrite (?) and we see black (Gans). One of the easiest way to do a Nitrite is to go back to what you did with the orange, create the CO2 and put the Nitrites on top, and the CO2 will carry the energy of the N, that usually works. You can also do it with vegetation if you can find some with high Nitrites it will do the same. I have also done it with water from our propionic S because it has a high Nitrite and Nitrate level. If you ever have a problem with producing something (a Gans), go back to the original teaching on how you make CO2, look at the choice of the 2 metals and how they created the MG field of C. (2:28). You can't make N on its own, it has to be as an oxide. Choose 2 plates and N coat the lightest one, with CO2 Zn is the heavier one so we N coated the Cu. This is how I always choose the material for N coating and creating fields of ?? Take for example Al, what is the number, look at the atomic mass of a metal where it is 14 in

respect to another metal or the nearest metal to it. N coat the lightest one, put in salt water, and you'll have N Oxide, because you create MG field of the N in the liquid. This is one of the easiest ways to make you have what you are looking for. Al is 27, now add 14 to it is 41/42, look at the K or the one after 41/42, Arsenic. (2:30). No that's an example, do you understand. You can't chose K because you'll have a lot of sparks and fireworks. This s the way, you create the G Mass btn the 2, and hopefully some of the materials have that spectrum of the fields inside it. now btn the 2 you have created a magnet of N. You have created an environment of NaOH, and what you get at the bottom is a pure N oxide which you can use. How close does the number have to be to the 14? You have 20% to play with either way, that's why you have isotopes, somewhere in between you go up to 26 or 24, and somewhere on the next metal you go to 44 45, 38/39. Between the 2 there is always a spectrum of molecular structuring, btn the 2 which creates that ?? what you are looking for at N. Am I just looking for the 14, will the O just pop out on its own? No it won't pop out because you are doing it in a slat environment, NaOH, then you N coat and go into salt with water, the energy of the salt comes in, but there is a trick with N. (2:32). If you have a spectrum of different materials in it (?) N, and the bandwidth is about near enough, as you found the gap btn some to create N and a different spectrum strength of it. N is 14, O is 16, C is 12 (42), so when you play with this kind of bandwidth you create not only N but some O also, because some of the atomic structure btn the one lower and the one higher, is of the level of O 16, so partially the Gans state of the Nitrite Oxide is created inside the S itself, by itself due to the composite mixture of the different strength materials that you used. Go to for example Fe, add 14 to it and see where the metal sits with, Zn. add 14 to Zn or ?? take it away, you see a 20% (+ or -) mass difference, at that ratio is about 30% . Do I need to take into account the fact that it is N coated? No N coating means that you create the environment of it, it makes it easier, N coating is a tool. (2:34). As you see we all try to understand the T, as you see her position on the Earth Council hasn't made any difference. The understanding of the conversion is important. When you look at the medical application and allow the depth of the understanding that everything has a spectrum and you can use it, how you can use it. It stops all the ambiguity in the understanding of the science. We need to be able to translate the knowledge so that we can hold on to what we expect from our S. We have to find the application of it or parallels to it, and add to the knowledge in an in-depth way that can explain a lot of things (around it in a more complete way). (2:36). The conversion of materials or how our body converts and what is the reason for the conversion, how does it come that one material behaves like the other one. We were explaining how exactly does the immune S work, what's the reason and way it works, why for example do we see that things like Silver Oxide and Silver have been found to work on certain diseases and has been popular with humanity (cultures have been using it for years to heal certain diseases). We look at the parallel patterns it has. Why do we see the effectiveness of Silver in the immune S. There's a lot of debate around Silver Oxide and nano Silver and if and how it works. (2:38). You have to understand how the body is structured and works and how the immune S works and how materials inside the body convert from one material to another to create a condition when it is needed. We spoke about the creation of the egg shell and bone. When a fetus is growing it has no bone, how is the condition made for the bone to be created? Now we understand for the first time through the explanation of how the Ca of the egg is formed. The structure within the

body creates the field that is equal to the Ca but in the condition of the environment of the womb (of the egg) which dictates the calcification level, Pl M field. Now you have created the bone which is porous, if you look at all the AA in the body which are linked to what we call the Immune S. You have the bone and when the Lymph goes in it becomes of the strength of that which the body has decided to be the strength of the bone marrow, or the combination in which the BM becomes the RBC, (2:40). and other immune cells, T4 and B cells. As the Lymph crosses the bone structure, it's the Ca in the bone structure which calls in the Lymph. So within the structure of the Immune S cells there is built in a Ca, because there was a Ca vibration strength that created the attraction of the Lymph to pass through the bone and in that process it carried itself the MG field of the Ca, so now you have Ca in your T cells, because it's a seed, a holder, it's the connector. So why are all the Ca connected with the Immune S and if you have low Ca levels you can effect your Immune S also. Certain strengths Ca are connected with the Immune S, certain others with the bone, certain different strength Ca are connected with different AA with different parts of the Immune S. Let's say you have created a cell of T4, within there is a factor of Ca, because it's the seed and that's where it came from, now the T cells goes into the Lymph and crosses into the thymus and the rest, and in conjunction with the AA of the body, (2:42). at a point where there is a disturbance in the balance fields, the T, B cells or the IS attend the injury or whatever ... what's it got to do with Ca, how does it help that Ca is attached to AA with a disease of infection. There is a secret in the structure of the body. If you look at the structure of Ca, what does it sit next to in the Periodic Table, K. Ca in the environment of the infection because it of a higher order which is weaker then the infection which has created so much energy (that's why you have an infection). That condition takes the Ca level energy which is at the K level, now because it has given some of its energy to try and balance out in the environment, now it creates K, which part of it on that level becomes K 40, which is radioactive (the delivery of high energy Beta), so now you bombard the infection with a high dose of energy, this is how bacterial infections in the body are destroyed. Because the Ca in coming to at the point of infection as the IS, (2:44). it's the Ca which by conversion to the strength K, Beta plus depending on what it is fighting it has to deliver a stronger ?? weaker . then you deliver heavy dosage of high energy which is K 40, which is radioactive, I told you haw to make it when you want a high dosage of radioactive materials in a N material, in a BBQ liquid, it's no different. So now for the first time W of Science understands there is Ca in the IS. Because in its arrival (at the infection site) its position is weaker it looses, tries to gain some energy, but it looses initially to the outer layer of the cell and then it becomes weaker, lower and it moves to K as in a Ca**, (the Ca MG strength converts to a K MG strength) and then it releases high doses of Beta radiation, which is a strong one dosage and that is how the infection is overcome, you destroy the cell. That's why you take antibiotics.** (2:45). This is the principle behind the structure behind the antibiotics and the IS in the body. Shows the isotopes of Ca. This is a breakthrough in the world of science. Look where the Ca changes to K and it becomes beta radiation in the process. Heavy dose of radiation. At minus it becomes alkaline, plus it becomes acidic or M. It depends on what the infection is in comparison to its environment and what it needs. (2:47). In one spectrum, even at Ca 37 you get Argon, which in a vacuum in the body is a centralization which means the delivery of a high dose of radiation. Go back to Silver, put it next to Ca and you'll see it behaves like

the same (? as Ca) in the beta plus/minus. I am a Nuclear physicist and understand the whole atomic structure in the conversion of one to another. There has NEVER been a fusion in the world of science. Fission yes, division creates this condition of release. When you see all this beta release in the full spectrum of Ca, now you see why Ca in different strengths creates different (?) and they are part of different parts of the immune S. In the Silver (fact sheet) you see the same behavior, huge amounts of beta decay. Different strengths of conversion in beta and plus and minus, happen in both, the replication is exactly the same, with the difference tha ton one side you go from 34 to 57. (2:49). on the other side from 93 to 100 and something, you divide the Silver (93) by 2 is ( ), you see its Ca in double strength in conversion of K, double strength in silver in conversion to Ca, the others in their divisions themselves will go through another strength the way of Beta decay, the shorter the life span in milliseconds the stronger the power because it means that a huge amount is released in one go in a very rapid way. When the of the half life is too long, ?? it's very gradual, when you have mille and microseconds these are the heavy deliverers. And that is how Silver delivers and works on the body as a disinfectant or killing germs, because not only is the Beta decay more or less the same as the Ca but at the same time it's double the strength. But how do you get Silver to behave in the body as a Gans state? Very simple, when a metal enters the body it doesn't behave as a matter any longer, but as a Gans. this is why we have been effective in extraction of radiation from the workers at Fukoshima. (2:51). It's the same principle. This T is so perfect that it will take Man centuries to understand the totality of it, maybe thousands of years. Now we can explain why the ancient Egyptians were using Silver. Why Silver vapor as we just heard from her Excellency (Australian) regarding N, we use N Oxide or Silver Nitrite. You have a n which itself connects to the division of the cells of the AA, then in contributing in connection with it, with the Silver you deliver (energy) directly. Parasites, Microbes or anything you like they are in the track. Up to now we could only understand CO2 and the work of viruses, because viruses are energy packs, and you just need to extract a little bit (of Energy) and they collapse. But the Microbes, P, Bacteria's have an internal built structure of the AA. therefore, now you have to attack the AA and weaken it and at the point of weakness zap it with minus or plus Beta, depending on strength of the infection. One second there and the next second not there. the knowledge in its depths and totality have to be understood, and not in little bits, which creates a problem. (2:53). Those of you fighting to find a solution to Malaria have it right in front of you, but you have to understand how to apply it, how to operate the balance of energy that you can so you don't destroy the other cells, but to target the cells that the body has already marked as needing more energy (for destruction as) a parasite. And now you have more energy that is put in the Ca or you put it in Silver Oxide with connection of Silver Nitrite to the structure. It's like when you want to bring a building down you don't try to bring the strongest pillar don't but the weakest one. In the structure of the AA the N is the weakest one, because it always gives and takes through the centralization release of radiation. If you work on the level of Argon and silver or with Ca you'll have a better success, but Argon is an inert gas so because it holds tightly on to itself it releases a lot of energy, on the condition of the vacuum in the body. This is exactly how the first cells are created in the upper atmosphere, read the Book #1 and the Patent. It's centralization in the upper atmosphere (2:55). with the release of the heavy energy causes the ionization of the H and creation of the AA where a life of which Man is not aware of has been existing,

because it doesn't need the structure of the P, the matter part of the state of a body as we (humans) have attached to this. The creatures created in the upper atmosphere have a structure but they don't need to have P of the matter state of the metals of the planet. We are the bottom eaters. Have you ever thought for a second how we get infections from the air and viruses? Don't we start eating a bunch of poisons that come from the upper atmosphere that settles down and we all inhale it, the remnants (or excrement) of the life above us. Have you ever thought of that, there is a lot of truth to it. There is so much energy in it that we can't absorb it because it's a virus. Do we get part of our infections from what we call upper atmosphere creatures? Yes, in the same way that we infect the fish which are below us at the bottom of the sea, when we dump our, god knows what in the sea. So what you see on the screen (Ca Datasheet) unravels one of the biggest mysteries of science, how the IS works with the AA and how effective the Silver is. It's so effect because it's double the strength. It still gives a Beta ray, plus or minus, but the Beta from the Ca to K is half the strength of the Silver. (2:57). You have seen this with Cs and Co, take vitamin B12 which is a pure Gamma ray Cobalt, you have Cs which still creates a Gamma ray but with a higher ray. You all cry we have radioactive materials they are going to kill us, and you go to the shop and are proud to buy B12. When you get pregnant they ask you to take Folic Acid which is a radioactive material, which is of the strength just about right to create a (cell) division. In the strength with the Ca, AA and beta ray with the Silver is enough to destructor the parasite, germ or microbe. We need to understand why the body uses Gamma ray to divide cells to keep you healthy, but uses Beta rays for killing, or destruction or division of another life. (2:59). What about Alpha rays, our body uses it intensively for the cross-multiplication in the P structure of the body, you need Alpha rays. What are they, a helium ?? a balancing, it allows to cells to merge without any damage, division of the cell comes through it, because the 2 stay balanced, one doesn't destroy the other. that's the beauty of Helium in a vacuum condition of the body. You see they made us into a terrorist organization because we use K, in Belgium, the ignorance of the knowledge of the top scientists who are killing other scientists, the policeman sits as the director of the European agency, where there is an ignorance of the knowledge of the creation. Gamma ray is used to create life, Beta ray makes sure there is enough energy to keep hold of one (healthy cells) but not allow the other which is over (too much energy ?), the parasite is not fitting into it (the body) because it (immune S ?) looks at the totality. You give them Alpha radiation in combination with the structure ?? of the body to give it balance. If you look at may Gamma rays, Co, the division they work in 2 ways, they drop immediately to Alpha, which means they secure the life through (cell) division, or like in the other part, the creation of the sperm, ?? immediately comes to Beta which means the destruction of what they already created when it's not needed. (3:01). We have seen this in the operation of the sperm, when a man ejaculates in the process of life it is given to create life, but if it stays in the channel btn the testicles and what comes out it creates infection, then the radiation from the Gamma rays of the division, ready for the cells to impregnate the egg, now behaves as a Beta and kills the sperm inside the tunnel (vagina), so that it doesn't create infection. The body has chosen a specific way to interact with itself, and guarantee using different strength radiation, to grantee life, to preserve it, to divide or to eliminate. Now with this knowledge we solve another mystery in the world of science. This is what we call understanding the totality. Translate this knowledge into the space travel do you

want to join another, or do you want to stay in balance , do you need to create a field that can divide, balance or they destroy another, or open another part which is not needed. The world of science is beautiful if you understand all of it. We see in the body that even the cells that are used to extract form them what is needed that you don't take it again. We consume B12, (3:03). ?? in a section of the intestine up to a certain point you give radiation field strength of the Beta for guarantee of the division, and then just a few micron below you collect what is not at the strength but it can be used again. We see the body has a double operation of releasing Gamma and then collecting it when it's needed. It's like the reactors Arman showed us, one is working internally at one speed and the other is externally, one takes from the center of the other, and ?? gives to the outside of the other one. In Pl T you have to look at the totality of the environment and to what extent do you want to ?? into this environment. Do you want to keep it at the structure of an atom in respect to a molecule, or do you want to keep it at the structure of a man on the earth, or do you want to look at the structure of the earth in the Pl of the Solar S, or of the Solar S in respect to a Galaxy. It's very easy if you understand to find comparisons. You can go with the Ca at the speed of light, or with Silver at double the speed of light, because you deliver faster a much bigger package. the science of Pl T completes what has been missing in the knowledge of the Man, But we have to look at it in the totality. We have to understand it in how it really is and not how we have been taught, (3:05). and chose to confirm our own lack of understanding or what we didn't understand is that we have two (different) worlds living next to each other, matter and a Gans world. The body of Man is a Gans world living in the matter of the planet. We have an aura, a dynamic structure, we absorb, we give, and compromise, and negotiate but it has become so automatic that we are not aware of it, so we leave it to the brain to do it. Otherwise, you go, oh there is a field here on the left hand side, this is like the field so of an orange, can I take it, I need vitamin C, maybe on the skin but I need a little in the liver, oh would you like to go just to the skin please and not to the liver. We left this to the body to do. It's the reality, where the body sees the source and it creates a weak energy field compared to that so it absorbs from the source. Make a very interesting experiment, test it. You always sleep on the most expensive mattress with springs and you try to create a comfort of life that you sleep sweet, but everything ?? Get your self some leather and lie on it, you'll find out you have the most sweet sleep and deep, why? Because the skin of the animal you sleep on is in the Gans state. It's the same with the Patch you made for yourself. (3:07). You absorb energy and it gives and takes and brings comfort to the body. If we made the mattresses out of leather we'd get a perfect sleep every time, because you live with a live entity. Now you understand how the Man used to warm with wearing the skin for millions of years, we chose that clothes. The more synthetic we make the materials the further we come from the true existence. These documents (what he just taught) about the microbes and germs will be added to the Pl Wiki for you to read. As a Nuclear physicist i can explain the knowledge and it will become permanent. We are here as messengers of God to guide Man in the right way, but it is for the Man to understand the path. If you have understood this, then you are a physician in the space and you don't need to look at the AA, Al, Gold or Silver. Now you know how to save the life of another entity. Simply by understanding this (what he just explained). Any Questions. (3:09). Zane wants to ask another question, I have a friend with a tumor on the neck and if he was to get some juice out of it and make a Gans ... (irritated) first of all I won't answer

this, who tells you there is a juice inside it? I am assuming... leave that to the physicians please. Any other questions. Can we place the matter capacitors in the LP water, will they short circuit, and would they behave as a Pl Capacitor then? You have to insulate them so they don't touch the water, you don't just drop them in the water, they have to stay dry and still operate. (3:11). Before leaving this subject those of you with a medical background try to understand what we just explained. It's your job to explain to those who don't understand. Those of you having trouble with the governments direct them directly to me via the webmaster, we handle the governments because we have enough knowledge and T that we can explain it to them that they become the ambassadors of the T. There is a misrepresentation that makes a very good press and politicians usually ride on the back of the press. Do not get entangled with the governments, We have the T and sciences that they have to evaluate themselves. It's not the lack of our work but of their knowledge, and then ask them to publish what they found out. they will refuse because Pharmaceuticals won't allow them to show that we are so correct. they are fighting for their position to get more commissions out of the Pharmaceuticals. I welcome the minister of health of Norway to come on the table with us and let's look at the application of the KF. we don't claim to cure any cancers but we create a condition that the body processes itself. the misrepresentation is very easy for those who don't understand the T to miss-speak is very easy. ... The Norwegians are looking at all the testimonials and saying what a BS, (meaning towards the officials). (3:13). The Minister has not understood the totality of the T, the same as the alternative medicine. let them come in, we give you all the tools, but it for you to prove that we are wrong. It's not for us to prove because already people are using it. Let the governments get the knowledge for those who understand and not from the weak ones who don't. It's very simple, the structure of the body has to be understood by the scientists who can then explain it to the ignorant ones. Most of the high officials are just paper readers. Remember we used to know a very famous guy who was elected but was never given the seat of the President of US by the judge. We don't hear about him any more. he became the ambassador for Greenhouse effect and Global Warming, because now that he was elected President and another President cheated him, and the Court accepted that he was cheated and the other guy was already President. Mr. Al Gore gave a talk in a huge Global Warming Conference and what did he say? These people just read papers and have no intelligence of the science, because today they have to speak about the environment, tomorrow the dog, the day after the bridge. The German in the conference said that the Global Warming is getting so bad that it's endangering the penguins, the ice is melting so badly that the polar bears are eating the penguins. (3:15). because there is not enough food for them. Someone very knowledgeable stood up and said that the bears live in the North Pole and the penguins in the South Pole how do they come together to eat each other. You are talking a lot of rubbish and that was the end of Al Gore as ambassador of GW. SO don't get worried about the politicians, their brain is what is written in front of them because it sells Newspapers and creates position. Let us deal with the governments, we respect then and let us teach them and hopefully they will start working with the new T. (3:16). Sue from US presents, Rick reads because she doesn't have a computer to watch live the Workshops. I made my version of a Pl pen or rod, an 81 turned coil with a thick braided pin and a few baby crystals in the bottom. I found putting 3 of them in a triangle formation created a wonderful healing field to work with. While watching a Workshop an

energy receiver came to me using the same rods, I built 2, they are 81 turn G coils inside a M tube filled with Gans, each coil is connected to the next 2 and all tubes are connected to a center tube with a braided wire Infinity Loop, the first is a Clockwise field with a composite Gans of ZnO2, Lead, and Mg in the middle. I used a dowsing rod to test the field created, they went throughout my house and outside up to 130 feet away. I then connected the second Unit with the field going Counterclockwise, the field on the first Unit diminished, I believe because the second weaker Unit was drawing the field but standing in between the 2 fields a few feet apart was an interesting experience. I disconnected the second Unit and the 130 foot field returned. I am trying to draw a Pl from this field that I can use for power. I am not sure if I need to increase the frequency of this field to draw Pl or would the best way be to use a MaGrav or Capacitors, could you please advise. Keshe says, it depends on what you want to give or take, you fully understand what you are doing by what you have written, just analyze what you have written in a M G field and then you'll understand it very simply, that you have created a very strong M field on one side and strong G on the other side. (3:19). so the G becomes what you call Alkaline and absorbs, so there is no field transfer (or very little) over the middle, because whatever is done through higher order fields are absorbed by the weakest one, this one is weak on M but very strong on G. This is what I say about the banana, when you peel it, it's the M but the real strength sits on the main banana inside which is G. A lot of fruits work this way, this is how they absorb energy from the environment and they hold it. A lot of fruits which are called high level fruits such as dates, banana, coconut, why are they so strong, look at their size, shape, how they divide into smaller units, they are at a point which they have a very weak structure outside and a very strong field inside, and that creates what we call very heavy potential, high energy fruit. When one is weak it's because its G is very strong, the M field can't be protected, but if you could measure the G field strength you'd find it is much higher order in the same region, you'll see how strong the field is going out in one direction to the other. It's fantastic. (3:21). I saw this with Richard and he set up pretty much what you did (Sue), he set up 2 coils back to back in a circle and said this can make a MaGrav Unit. I said this makes a cylindrical Unit exactly like what you have on the screen (Sue's Unit). It's a beautiful S you've made and it follows the principle of the 4 atomic molecular structure of the Pl. And each one works individually having its own G and M and then what strength is put in (? energy source) creates the rotation. And a slight height difference means it has to deviate, so it's not in balance then it creates a circulation. This should spread quite a long (? field) it depends on which side and which pen you stand next to. It's a amazing how the MaGrav Units are spreading around the world. Each one is unique and everybody understands similarly but in their own way. (3:23). Question, are we adding Silver Nitrate physically t the water of the CO2 box combined with the Fe nail so we can produce Hemoglobin? I am trying not to answer that because it can lead to some other things. Bring this up next week and I can answer you in-depth, because it can cause misunderstanding. Thank you for sharing knowledge. We are still on the same path of using the T for Peace, in the coming weeks you'll understand more how we have advanced in this knowledge and on this path. We use this T ... energy in exchange for peace. It's the energy of the man and because of it will be exchange for peace. We will achieve it. We are very much on course to deliver. Q: Does Mr. Keshe get his knowledge from God like the Prophets got theirs? He answers, "I am the Light". end

151st Knowledge Seekers Workshop December 22, 2016
(Testing of Gans completed it's nontoxic, Is there a God?, John shows some videos on strengthening M and G fiedls separately, Back EMF and Eddy Current discussed in terms of Plasma's hidden fields,)

(:07). We are adding to the knowledge on a continuous basis and the expansion of the knowledge has no limit. Usually on Christmas we unravel some secrets of the knowledge of the creation which leads to the creation of man on this planet. (:09). The testing of the Gans has been completed and it is proven to be non-toxic for ingestion or injection into the body of Man. But understand that this is a bandwidth test and that which was tested confirms. We have entered phase 2 of the cancer tests and they have shown immediate results, within 6 hours of entering the body we have videoed the results and will receive a report on it. The Gans material destroys the total cancer cells and is more effective then Chemotherapy and no side effects. A new development, we can produce specific Gans' for specific diseases and we see the same performance. (:12).

(:30). This changes the whole spectrum of the science and opens a need for more understanding the structure for the creation of the cell. It brings a new dimension into application of the T. I will open a new dimension in the teaching. One of the secrets of world has been his own creation. How did life start on this planet and how did man become man. What is the process of creation. Is there a God? Or is the creation of Man a natural process and the Man through his own weakness created a Creator to submit himself to a higher level and that he doesn't understand the totality. In the creation anywhere in the U dependent on an extra or additional Being for it to be created, or is it a random process, that when all the randomness comes to it leads to the creation of a being. (:32). depending on the environmental strength. This puts a very big question mark on the existence of man from a Creator. Buddha understood part of it, but not the totality of it. The reality of the Creator goes back to the very beginning of the teaching. ... the creation doesn't need a Creator, it's the condition that leads to the created. Let Jon show videos first. (:33). John shows videos. We are trying to isolate the G from the M fields and play around with amplifying each one to see if we can increase the overall field size. The setup is 6 coils in the middle and 12 outside with the G coated with Acidic and M with Alkaline. (:38). We think we can create a toroid out of these 3 M and G. ... we wired the coils G to G and M to M. We think it will be a bubble with a toroid in the middle. (:42). Keshe is back. You can see that we can go further with this development and adjust the fields. (:44). We can strength the G and see how much it gives and takes. It needs to be more realistic ... when you turn a magnet on its side the gap increases 3 to 4 times. When you hang it in the air and let them swing against each other you'll see the expansion of the field. We have asked John to lift these off the ground, where the M are held at 2 points only and the rest are free, then we should see an expansion in the field strength. (:46). This is what we are dealing with in the atomic molecular structure in the cell of the cancer of anything else. We are coming more and more to the dimension of the real condition where the cores like the SF hang in there, but this time we don't create rotation, rpm in the motors can be changed through the voltage, potential difference. This

way we don't need high speed rotation, ?? can control G and M, move the power unit inside the S and then we come to a more realistic operation. This is for the flight S but at the same time applies to the Health application. We said this before with Klaus, that you can tune each core, its M and G. How life came to be on this planet and in the U, some of it you heard but now we bring everything together, then we complete the body and life on this planet. (:48). John how high of voltage have you applied? The 2 power supplies only go up to 3 volts, but the transformers go up to 70,000 volts. They amplify the fields, just by the power supplies we wouldn't see much. These transformers are Post Transformers and not continuous, they create a pulse voltage up to 70,000 v. But the most important part, when one unit is at 3 v or 0v, (:50). and when one is at 70000, you see the expansion. ?? at one point you switch off the power supply so its not pulsed ?? on one branch and at the other point they changed. This is exactly how the body operates, these are pulsing transformers, mimics the body, the heartbeat the frequency. That's why we see these behaviors, when you go to 3 volts it's very little, but you still have a field. When we show you the upcoming generators you'll see the expansion of the fields 2 to 3 meters beyond, very powerful. The new generators behave very much like the body of the Man. They become a source of Pl, we can expand the units ?? and make it wireless, with a very high balanced Pl energy. The knowledge from one part is adding to the other. The field is very low without (?), which means it is at rest. Do you increase high or low pulse or do you create .. (:52). if they mange to tune the pulse btn 2 fields you'll see zero shielding or field around. One of the reason you see when they switch from one to the other the change of variation, is because these 2 transformers are not synchronized or one has a slightly different voltage. these things can be explored further and see how the change comes. How can we change the M to a G and then link the M to G to bring balance to itself. Q: is this related to back EMF as in flow of electromagnetic system? We are going back to the same thing that we said before, confusion in the W of Science's use of language, they call it back flow, Eddy current, what else do you want to call it. It is all the same. In the WoS, now that you have been educated, there is nowhere a forward movement if there isn't (at the same time) a backward movement to support the forward. In the present WoS with the Newtonian Laws they say that a force has to overcome a point that the matter can move. (:54). In the World of Pl such a thing doesn't exist. In Pl you have to receive more in order to be able to give. Newtonian Law looks at the solid matter state, while Pl looks at the reality of interaction and this is where a lot of people get confused in trying to understand the Pl T and electromagnetic field and current flow. In a way we use the same terminology for the same thing, back flow and eddy current for G field, it's the same meaning and terminology. The WoS has created a confusion in the use of language. You can call it whatever you like, back flow or eddy current, call it what you like, it's what has to come back much stronger that it can allow you to push forward with it. Now there is no confusion. In Pl T for us to move forward we need to receive in order to give. That's why in electromagnetism when you measure the back flow they are higher voltages. Professor Miles calls it scalar waves and his argument is that, my S is better then Tesla's, he couldn't ?? pass file a cage I can. (:56). Because Tesla gives, giving is weaker, receiving pushes through. I always said, ?? scientists one is Tesla the other Miles, scalar and back flow are the same. That's why it goes through the Faraday cage because it's stronger, it means to come in to be able to give. I had the privilege to meet Miles and when you are speaking to him the ?? is the same thing. Without Tesla's

forward ... there is no Miles backwards .. because it needs Tesla to push forward for Miles to receive the scalar waves. And this as a scientist is blind to it. ... whenever we see a condition we have to determine if it is coming to us or going away from us. If it is going away it means its a weaker strength, if it's coming it means its a stronger and I have to find a weaker side. If it's going away (it's weaker) and I have to find a strength that allows it to go back on its strength. The creation of every cell on this planet works on this (principle). It's just that do to the time we have as a race we have chosen different ways to understand different parts of the science by creating different names for it. (:58). But in principle the whole thing is the same. If you understand in the cancer cell how much is needed, they have found a threshold there where ... we have to wait 6 hours to the second with a specific Gans to see specific cells change. They don't destroy the cancer, I wish I could show you the pictures, it's absolutely amazing what we see. We have to find the switching point when the field changes from M to G, and what does it become when it changes to G, because why does it become stronger. It's like what I said with the banana, you can't eat the skin (M) of it but as you peel it the stronger part is the flesh inside which appears. ?? The skin is weaker in whatever it is supposed to give, but as the center (flesh) as it appears it becomes stronger (in fields), so one is needed for the other one to manifest itself, the skin can't exist without the banana inside, and the banana can't exist without the skin outside. Every fruit has this balance, that's why you have the skin on any of the fruits. the skin is a feedback, it's the M, **sorry it's G and the center is M, and then visa versa in another layer, where the skin becomes M and the center becomes G**. (1:00). This is the confusion that was created when we explained the first MaGrav coils. For the cycle of life, which means the repetition and holding onto needs a process, where one strength matches the other. In the very early teachings when we put 2 magnets on the table, why do they move, what is the distance, it's where somewhere in the center the M of the stronger looses enough energy that it becomes the G of the weaker, and then on the other hand the M of the weaker, in traveling it reaches a point where it absorbs enough energy that it matches the G of the stronger. This is where we see both M and G ?? on 4 lines .. they coexist ?? the way it is, even as a field is moving, the exit pole from the weaker side to go toward the stronger is absorbing energy on its G skin, that's why the M moves and when it reaches a point that it matches the weaker side of the G pull of the stronger. Without it life doesn't exist. (1:02).. no star could position itself, not could earth position itself in respect to the sun. We look at 4 M and G fields but in reality, in the operation there are 8 of them, because at the same time as each one is moving out to a new destination, as it gives it's also taking to find its balance. When we show the M field of the exit point of the magnet planet, it's not just that its M is going, you have to see what the skin is also absorbing that it increases so that the ?? field can go further that it can become balanced at the point to the strength of G field of the destination S. This is how we deplete energy from cancers using the core S. .. Understanding the creation and what needs to be created. Go back to when we said, you have the Sun and the Earth, we have in this process the creation of the fields, he draws the exit and entry fields of each, where the position is dictated, draws a circle around the crossing point of the 2 fields. ?? (1:04). On this layer you have the M the same as the G leaning against each other, where there are 8 field forces existing, but we only consider the ones which are moving forward to the other. Without these (hidden) forces the forward forces couldn't' operate. It's like when you drill a hole into a piece of wood, you go through the wood but you have the

chipped pieces left over in a matter state and we collect it as a dust. In the world of MG fields the "dust" are the fields gathered on the back side of the forward moving fields and by collecting them the overall field strength is increased at the point of (inception) interaction between the fields, it reaches the balance of the other. But because we don't see it we don't consider it. In the matter state we collect the dust, but in the Pl state the G field strength which the M is coming out of is collecting the energy and that is how it increases itself and that is why it feeds back on it and when it reach the G of the other the balance is created. This has never been understood and I keep on repeating until one day somebody understands. There is NO wastage or leftovers for someone to come and collect the dust. The S because it is created out of itself also absorbs its own residue which becomes part of its G. Look at the Alek Beads and the MG coils, we have repeated the same thing, the feedback (loops) are collection of the residue, which in the matter state after drilling we throw it away. (1:06). When we cut through a mountain we have a hole going forward and we discard the dirt that comes out of the tunnel. But in the world of Pl, because all of this is created out of the same self (it's the same material). We always said that the Pl is both M and G, so as one looses the other one gains because it has somewhere in its spectrum part of what the other one is releasing. This is how the WoS and Pl work. And up to now it has always been discarded, we only looked at what we gained, but we can't go any further unless we collect what we already have destroyed and ?? part of it. We take the energy of the other, so if you take all the dust and put it back in the tunnel, ?? it is made. Now it's not there but there is more of it for the G to fed on. When we go more in-depth then the science of creation becomes more pleasurable. When the field forces of the planet and the sun interact you create the materials of the planet, N, O, C, H, and huge amounts of He are produced in the upper layers of the atmosphere but through the centralization and the compression of the M and G fields, of the vacuum or lesser strength, what we call a vacuum it converts itself to the field strength of the H and energy for the production of O, or C where the N as a centralizer releases the energy needed. The life of the Man starts in the gaseous part of the planet. (1:09). The gaseous part itself radiates and receives, it is created out of the inner structure which has a field and matter state. The same process which we see in the interaction of the 2 field forces of the earth and sun, now appears and takes place btn the Pl fields of the earth and the materials which are created, this leading to creation of the gaseous part, interaction of the fields with each other called the AA. The P part itself has different structures the outer solid part and the liquid part, which are the oceans and seas. When the gaseous part, the AA, interacts with the solid part a new kind of life is created which is blind to the science of Man. (1:11). In the future we'll explain. In the interaction of the gaseous part, AA, and the water part we see the creation of new interactions, according to ?? interaction, a ?? cold partnership, whatever you want to call this, takes place. We have the AA and the water which itself has the possibility of creation of weakening or creating a field strength of this S. The AA enters the water, it no longer in the free space of the gas motion but in a thicker interaction of the MG fields of the water structure. Remember the water on the planet manifests itself as a matter state in respect to the MG field of this atmosphere, but in reality because its in the Pl condition of the Solar S it still behaves in a Gans state in respect to the strength of the Solar S MG field. (1:13). The waters in certain and most parts of the seas are like in a CO2 box of the U, or of the planet. (The solid part has created matters for itself and ?? they liquid part are soluble ??) , like Na and

therefore, the salts of the seas in the presence of the water gives you the condition of the CO2 box. The Oceans are like a Gans pot. You know that you can create certain elements in the Gans pot depending on what elements you inserted into it. The rains and storms wash down solid materials into the oceans, the rubbing of stones, gold and silver comes out, Fe, Cu etc, this pot has millions and trillions of particles. You have the saltwater, AA, and N state Gans particles, say you add Zn to it, then in another part the same thing comes NOCH plus H, (1:15). then you add Cu to it, ?? 2 similar to each other, easy to make the link, you have AA of Zn and of Cu. The 2 entities entangle and the life forms in conjunction. Somewhere else interaction of AA with the saltwater, with the addition of what we had, Na and also Fe leads to formation of Hemoglobin. A ?? magnetically formed ?? in respect to the earth's magnetic field. The only entity which on the solid state of the G field strength of the earth creates levitation. In the interaction of the Zn and the Cu, now you find yourself in ?? circulation of the flow of the fields, Hemoglobin or blood. The protein on top of the Gans boxes is flat, in the interaction and creation of the field of the Pl of the hemoglobin. (1:17). It becomes encircled. You see the Zn and the Cu, this is how blood vessels are created. This is why blood flows in the body, due to its MG field forces in balance to Fe keeps its levitation in respect to the other fields and once it's created it's self-sustaining. It means you can take man to any place in the U and this property is inside the structure of the human being in its MG field strength, that's why when you bleed in this environment the blood solidifies when it comes out because it's a different strength. The adding of different field strengths makes heart and lung tissues, brain cells depending on the ratio of it, on the salinity of the salt, what kind of salt exists. Now the game of life starts. The question is, if you understood this, is there a Creator or is it the weakness of the Man in his own creation that has brought him to the demise of the creating of a God. (1:19). I made Man in the image of Myself, if the man is strong he reflects my image as strong. How did the creator come to it? Did he come and measure how much O, N would be in the atmosphere, or how big a field to create. Is the Creator the limitation of Man's understanding of his own creation? The reason I teach this way is that when Man understands in the depth of Space the limitations of his understanding then he can't be abused. Then the Man doesn't believe in fallacies because he can analyze and understand the condition. When you are in deep Space and someone tells you I am this and that you can analyze how is this guy created. Can I repeat it and understand his ways, then he is not the Creator, but it's my weakness which allows him to be. There is no abuse if you don't allow it. Religions are the abuse of the weakness of the Man's understanding of his own creation. In one page I have explained the whole process of the creation. (1:21). from fields to Man. Is there a Creator? This page (what's on the screen about AA) is the history of Man on this planet. This is the history of creation on this planet and it replicates itself anywhere in the U. Now go back to what John showed, adjust some fields, create different dimensions of the strength, then you'll fiend the MG field point absorption of the crumbs becomes the liver storing the leftovers, creating fields inside itself to be able to be balanced to Ca, Na or whatever else. Liver is the storage, the warehouse. You create a S that those (cells) that pass by and are too weak they need to be extracted (from the blood), you call them kidneys. As you take solid matter (through the digestion) at this point (large intestine) you need (to be able to convert what you extract from the food back into the blood stream), if you block (the process) there will be nothing more coming in (constipation), because life finds its

balance. You have created the Large Intestine. Another disposable unit. You have stored energy in its operation to know what needs to be done in respect to what. You have create a computer center. (1:23). by different strengths of MG fields of salts in different (ratios) of salinity you have created a computer , the brain of the Man. Then you have divided its control in a way that the central computer has little substations can do their operations and reporting now and then to the headquarters. You call it the glands. You need to run this operation through electrical fields and current control S, your wiring, dealing with the matter state of it, you call it blood circulation, if it deals with E and works with the central computer communication lines. You call it Neural S. You need to be able to make the S mobile that it can have access to ?? that it can regenerate as much as it likes. You call it legs and arms. There is nothing to the body of the Man, it's a mechanical S which has seen how to adapt itself to its creation. If you change one of the MG fields of one of the parameters of the body and you can get man to live anywhere in the U. He will still be in the E of a man but P as that of the destination. The whole S needs concentration that the P, E that is the control S, are operational and receive the same amount. You call it the soul. (1:25). A central energy for both the P and E. Is there a Creator? Does a man have to be fooled with a Cross or a Star of David, or Moon, to confirm the weakness of his understanding of his own creation. For Man to become strong enough for what he has learned in the depths of space he shall not be used (abused). To be a Man of Space you need to understand the reality of the space, to understand the whole process that you won't see any Churches, Mosques, etc. anywhere across the U, as you understand the Reality. By being in that position you see a bigger picture of the creation, of the whole U. ??? by changing a little ?? you make the life vertical or horizontal, by changing one of the parameters you make it a dog or an apple tree. (1:27). If you slightly change another parameter you make it a cat or an orange tree. The reality is that the fundamental understanding of the creation cannot be changed. Did an apple tree exist a billion years ago, or due to the changes of the atmospheric positioning of the planet allowed the creation of the apple. We need to understand the process in its totality because Man is about to enter into Deep Space. Partially some have, but do not be fooled and taken as a slave. I will take Man to Space with the full knowledge that he will enter the UC as an equal partner and not as a subordinate. Therefore it is fundamental that Man understands this process that he doesn't become subordinate to the others due to his own lack of understanding of his own creation. The fundamental point is to understand what gives and what takes, what allows and how much, what creates a condition of an interaction and when you don't see it, where is it, that it doesn't become a magic. (1:29). When you don't see this return line (the hidden fields we call back flow and eddy current), but if you find the return line and understand the process and strength of it, there is no magic. The life of the U is very simple, it's an (Infinity) Loop, and nothing else, you see it very clearly, it means the existence of the both, one on the strength appears to be of the other, Yin and Yang, Yang and Yin, each one connected to the others and has to bring balance to the creation, and there is no point of change. The exchange in strength to whatever (is needed) to become balanced and accepted by the others in the field of the attraction. The science of Pl in its entirety is, let's say understood by 60% of the Chinese Culture. And those who follow it see a lot of things, pathways, passage through (to) other points. (audio broken) is par for the game, we don't see that what we have received is what we have put out. We are always

out of balance in our judgment. (1:31). Be it on every level, because this way we can be abused. When you don't see the other hand putting the money in the pocket when you are playing magic, then we think the money has disappeared because we didn't see the move, because you were not at the visual strength to see when the hand went into the pocket and left the money there, you only saw the empty hand. It's your job to find the pocket, when you understand the pocket is there, you understand the full circle. The creation of life in the U is as simple as ABC, it's the Man who misses the B and just see the A and C and wonders how it has happened. When the Man doesn't see the link then he is open to abuse in the Space. Questions. Is our soul grown from elder souls and our P comes from our environment? The P comes from our environment. (audio broke up ..) ... as you have seen the AA interacting with the salt in the water, we call it life. Look at the way the red and white muscle tissues are created, why do birds have both white and dark meat, why do 4 legged creatures on this planet have red blood cells or red meat, why do fish have white meat, ... understand these are all due to environmental PL MG fields. (1:34). In the liquid of the water different structures are created, look at the structure of the body of a fish, you don't se muscles but layering because the ?? is there to do the Pl fields of the water creates that. The needs of the dog and man are different because the atmosphere ?? has changed the conditions. We are not created each time out of nowhere, we don't fall out of the storks basket. We are created out of the interaction of the cells which have created their own memory. At that level what has been stored in the memory bank, in the energy in the cell of the father and mother, it becomes the central bank to the new life. There is an important thing to remember, again going beyond the matter of P towards understanding the totality. As human being we have one illusion and fallacy, that we only store what we see, hear, or feel. (There is also) the aura. The man who existed at the time of Christ in another part of the world has received the message the same as the one who stood next to Christ. He choose not to hear because he could not see the man and the reaction. (1:36). Many who were at the strength of the understanding of the teaching of the Christ and lived a Christian life without ever knowing about Christianity, because they received it through the fields of the planet and through the fields of the existence of the soul of the Christ. In the memory bank of the soul, what was translated (transmitted) to us, even though they lived in South America at the time, if you go in the depth of the knowledge of the existence, they still have heard the message. The soul of the entity of the man on this planet hears and gathers everything and it becomes part of the next generation. Is it possible that we are reincarnated and have done this and that? No. We carry the accumulation of the knowledge of the past in our soul, in what we have been given. The sperm and the egg are the hard drive, the soul is the information on the Hard drive. It can not be erased and doesn't matter how the Hard drive shows itself. Man or being at some point or another saw the interaction of singularity, as too much, as when you are for example, (1:38). pregnant, it's very hard to go and hunt and feed the child for 9 months ..

(1:43). Rick tries to summarize what Keshe was talking about, something between the red and white cell tissues... someone asks do we have a God? Who is we? Look around humanity doesn't speak as one, say "I" when you ask if you have a God. She asks, Keshe says Christ bless his soul, if we have no creator why do we bless the soul? Anyone have an answer? Armen says, bless the soul is, bless him for the teachings his soul has brought in. Who is the one who said I created Man in my own image. Armen says it is us that said

that. Actually we said that. We are God then? Correct. (1:46). Rick says we have to discern what we mean by we. Not all of humanity is speaking from a place of God. If we are all God then why is one God a killer and another God a nice person? Well we are all God, but we are all idiots and other bad names as well. It all depends on your perspective, what are you seeing, are you seeing God or idiots fumbling around in life. You could see each person as God, address them reverently and see them as purity. Or we could think of them in an ordinary way and treat ach other as we see, not very kindly. ... or if you treated them as the Absolute incarnated right in front of you. In fact your image in the mirror would be as well if one was able to see that. If you're not able to see it then you are not at the point of being able to see it, that's as simple as that gets. We see other things instead, peoples flaws .. it all depends on the level we at looking from. (1:48). What do we call Christ, Moses, Mohammad, Buddha, and where did they get their knowledge from? Sandor says many messengers came and they had to come again and again, we are so dumb and stupid that we don't learn from the first. We have a messenger so we have a Creator then? Armen says creation takes place on every planet. She asks him, do we have to be thankful for what we have, if so who does the thanks go to, the Creator or ourselves. Armen says to yourself. Because I totally got confused this time with Keshe's talk. Why is that? Because I thought I got it, but absolutely I didn't get it. (1:50). Armen says if the planet created us then who is the god.

(1:56). Keshe comes back on. Let me explain what Rick was talking about. In the body it's under a vacuum condition, if you look at the transparent balls of Gans' you made you see the stronger moves out and the weaker is in the center. So the Zn moves out, then the Cu, then the Fe, that's why in the structure difference as the ?? goes to the thinner part of your body you get a finer blood vessels, the same is with your neural S, which works in the reverse way as the blood S. The Neural S is the Infinity Loop of the blood S, the other side of it. That's why the veins and the neural S work parallel next to each other, it's part of the feed back and taking in. the body has 4 (? systems) we always looked at where the blood goes and the other vessels which bring it back. The same S hides within the neural S but it's internally, we have a feeding and a feedback. In respect to what we said about the animals, it's the environmental condition which has dictated the color of the animal, blood and muscle. (1:58). I explained so much, but when I looked (just now) the internet was disconnected, which means the Man is not ready to hear. I revealed a lot of information, maybe it's heard by your souls. When the body becomes part of the interaction of its P it remembers the part of the P in the memory disk of the P part. If you look at the CD ROM of your player you can separate the drum from the keyboard even though they play at the same time. The keyboard is the soul of the Man the guitar is the RNA, the drum is the P, but all play at the same time on the same disk. It doesn't matter if you stop playing the drum, the keyboard still plays, the CD doesn't stop, it doesn't matter if you stop the guitar the keyboard still plays, it can mimic both the drum and the guitar. That's your soul, it carries the entirety of the information. (2:00). There is a very big question in the world of creation, why do we always rely on the mother, because (not much many produced) it carries the totality of most of the information. The father is the addition to the keyboard, what was missing and what needs to be added. That part that was heard and the other part was not ready. This goes back to the Jewish belief the

bloodline goes down the mother's side and in many African tribes it's the same. The mother produces one egg as most ?? perfection, the father produces many because it doesn't know if it is distorted or not, it depends which part will arrive. The process of the understanding of the P is to be detached from it, it is just a point of manifestation. A point of presentation in a P dimension and not in the dimension of the totality. That's why when you travel in deep space your body structure will change. It has to change to exist within that environment. Do we need to have a belief that there is another god in that destination that we can now join a new Church. (2:02). Or do we understand that in that environment we have to look like this to carry on the message of the keyboard. The creation of the Creator is the biggest point for Man's position to cross the line of understanding. The creation of the God (in limitation) is the same as the fallacy of the speed of light is the ultimate speed. Those that have become wise understand the whole fallacy of the teaching of, or writings of Einstein. He never understood and he gathered his own believers. So are the others at the level of the soul understand. The important point in this junction of man is to understand the Totality, and this is our biggest problem. Those that would like to stick to the current way because it fits them, will deny everything else but their own belief. Jews deny the Christians, Christians the Moslems, and they the Bahai's, and the rest. Because in accepting the development it means letting the past go. This is why religions have no basis in the U, because when you understand the totality and are open to see the reality of (how) life (works), in different shape or forms that exists don't need different churches or belief's . (2:04).

(2:15). You manifest yourself in any dimension according to the given environment, if you're in the environment of the gaseous you become AA, you still have (an internet) you interact and create the life on the fat line of the Gans of the AA, if you interact with new environment you become the fish with a different structure that you can be flexible in the fluid. You change into the atmosphere of the solidity of the earth connected to its matter state because you carry it inside you a solid state you become a 4 legged man and the animals, then when you stand a little upright you call yourselves intelligent because you see a little bit further and walk on 2 legs. But all this, ?? take man on the surface of the planet Zeus, he'll make himself 13 arms, 14 eyes, etc. because that is what is needed there. Is he anymore intelligent, or need a new church to pay attention to, ... there are no churches, temples, and no god. The god of the man is himself to become correct (in behavior), this is my job, to get the man to understand that the Temple of the Creation sits within the soul of himself. The wealth and status is what man has made, whether one suffers or not is according to what the P can accept. (2:17)). I walk the streets of Acre and see people, I have never seen so much pleasure. People don't have the position except what man has made for himself, ?? they're happy because they understand the position of their P in their soul. In the West we do everything possible (we can do anything we want), but we are never happy because it's gone, the focal point has moved, the understanding of the truth has moved. One day I post these pictures on the Internet. We drive everyday across this beautiful city, when I say this you people pull your hair out. The Europeans say that Africans are wild people they do this and that ... (audio breaks up ...) CNN has made you think that way. The man in Africa is the true man. We walk we drive we see generators that cost thousands of Euros outside the houses on the pavement. In the West within 24 hours they would be stolen and gone, but here is the freedom, I

trust the nation, I don't trust the 4 walls, I put my S outside. We pass rows and rows of furniture on the side roads ... they don't get stolen. Nobody locks because the man carries in his soul the truth not to steal. In Italy they don't touch because the Mafia will kill them, here they don't touch because it is wrong to the soul. The only people who steal are the foreigners because they got the habit of it from the West. ... people go hungry but they don't steal, then the white man in the west ?? because he has a gun in his back. (2:20). We invite you to come and see what the white man is missing, the trust in himself, then he needs those kind of gods and creations. ... where is the difference in understanding and why do I feel at peace in Africa. We invite you to come here to work on your health issues because we work out of the hospitals with the same ethos. We don't work in the back of hotel rooms ... these are the messengers of the ?? of the man. Nobody steals and everybody is within the law. Now who is wrong? Do we just show the lions and the things and the man who lives in a hut but is correct and doesn't steal. They steal the crosses from the churches in England to melt the copper and gold, and they call themselves Christians. ... (2:22). .... they accept their limitations, this is what I have agreed to have. Those who have agreed to be westernized, they do (?) call them from presidents all the way down. If you understand this so when you go to space nobody can bribe you because you can produce everything. Nobody can tell you that I can change your cancer because you can do yourself because you understand the process. Nobody can touch you because you are made in the image of the strength of yourself. I made man in the image of myself, if I am weak then I make that image. ?? I am detached but I have to serve in the life of a man. I am testing the group at the KF to see and understand what their detachment is, and it is very interesting what is coming up. (2:24). Because then I know who is there truly and can make the next step. We have to understand our own strength through understanding the knowledge of creation, what I have explained this morning and now you have seen how simply you are created. Is there an oil crisis (from fossil fuels) where the oceans create millions of tons of oils everyday. If you understand how the oil got on top of the CO2 Box then you understand how life is created from single cells onwards. What happens to those who do not come into the condition to become part of (? creation), they sink to the bottom and become oil. Those who are thieves in the West say there is a shortage of oil, how many dinosaurs could there have been that you can extract 85 million barrels a day. So it shows this planet is continuously producing more and more. We found new oil reserves, yes because you emptied it and converted the field of the planet and more AA are created to replace those that were used to create the balance. So the more we dig the more we create, because through the extraction we create the surface area so that it creates more and more. If you take the AA from the top of the CO2 Box you see that more is created. So how could it be a fossil fuel. It's abuse of the man through his lack of understanding of how oil is created. (2:26). Now you've seen in a simple way why you even have blood vessels in your body and how they change according to the environment, becoming thinner and closer to the less and thinner they become. Did God create every single vessel in all the creatures in all the U and beyond, do you think there is such a process? Or the creation of God has been the path for the abuse of Man. We change names, sacrifice a virgin to get the clouds to go away or volcano stops, if you would have waited it will stop anyway so there was no need to sacrifice. We change this to giving many to the churches and then we can abuse you and pedophiles and the rest as we see now a days. Living in England we got used to

policeman without guns, we could talk to them. The first time I saw a machine gun was mid 80's. (2:28). He asked why they carry machine guns and the police don't , we are a special force to create terror and show that there is something wrong. .. before the police in England weren't corrupted, they didn't need guns because they relied on their own correct conduct. Now they have accepted corruption in the police force and clergy, because they rely on the meanness of the man. Now if you don't give the police what they want they can write you as a terrorist. ... abusing has become the norm. We moved out of Gambia because of the corruption. We have been preparing man so he can see the while process, through working with Gans, etc, he gains confidence in the whole process. (2:31). All my teaching in the past years has been to open the eye of the Man to the reality of the creation, of himself, his environment and the U, that he can't be abused due to lack of understanding. In the Ghana conference in the first hours I saw a lot of resistance to the teachings from the nuclear physicists, they thought there is something fishy about this, something we can't understand, we are the N scientists of this country and we can't understand. I solved the problem, expanded their horizon and took the shackles of limitation to the next level. I said we used to be the matter scientists for thousands of years, in 20th century we understood the Atomic because everything has got a chain in it, etc.. now we become Plasmatic. then they understood that if they accept they become plasmatic scientists and not lost out. We change the term of Nuclear to Plasma and the Pl has no (more) change, because it's the essence of the creation. (2:33). There is nothing wrong if you have accepted that there is a God, it's you who brought the limitation of the God. 11

(2:48). Why when it goes further it needs a Zn and Cu, the heavier. The structure of the body is exactly the same, it's ?? pointed. He draws a circle, this is the soul and another circle, this is your brain, and you P. Why do you see your P in respect to the earth, why don't you see it upside down (walking on our heads)? It's the same as a raindrop. The pull of G in respect to the earth gives the P of the Man. The fingers and toes show which kind of strength I want to take. Have you ever thought why you have 5 different fingers? A leaf has so many ?? tips it's what connects it to the fields that it can absorb, it's the same with the man. (2:50). If you take the earth away from the Man and position him in a new MG field then he reacts in that environment. Would he have fingers like that ?? ... so the essence is the soul which interacts with the earth and the field balance dictates the shape, that's why all the animals have the same shape, head in front and legs in the back, because it has to create a field balance. There is less energy in the tail of the fish, so to create a balance dictates the size of the fish. So it is with the cat and dog. But here you have a connection with the planet so you have to give it legs. The fish have a connection with the water and so become elongated. We change according to our own environment on this planet and become black or white, short or tall, but we don't want to accept that this is because of the reality of the existence in respect to the interaction of the soul. .... (2:52). If we see the AA to become the fish and the man in the same atmosphere, ?? so is the atmosphere of the Solar S, etc. I always say this to the trees and this is the first time I make it public, where is the church of the dog, which temple does he worship at. He knows who feeds him according to his understanding ... .. it's Man due to lack of trust in himself, being bound to bricks and mortar. We don't preach religion but understanding of

how the creation works, P creation and not imaginary creation because it's you who made the Gans'. You put a ball inside a Gans environment, the same a the earth, then you'll see the shapes of the creatures in the water. (2:54). I have done it, it's fantastic you see animals in the shape of the fields which have many combinations of arms and legs that they move along. I replicated the core dynamic in the Gans water, the the Zn and others and gases on top of it and you see the beginning of the creation of being(s). Have I become the Creator or have I understood the process of creation? I am of the second and you are of the first, that's why you need a church and a temple. I always respect the prophets of the past, because through their teaching I can reach your soul to elevate it, because this is the limitation that you have understood. I can't teach you medicine when you haven't even understood how a plant works. Or what is A and B of the process of creation. So I speak your language. I am the creator many times, I am the light and so are you. It's you who are so weak in the trust of yourself that you call me a messenger and creator of whatever. (2:56).
(3:00). I explained how blood is created, and how the weaker part leads to creation of the stronger pull in the feedback to become the eddy current, it's the darker blood to your heart. In understanding I give you a strength which stops the abuse of Man in the space. This is the whole purpose of these teachings. If I open KF churches we could make billions and then we'd carry on with the same abuse. And there can be no abuse. Share the knowledge freely and you'll receive more, put a limitation on sharing and you have put limitations on your own intelligence. Next year we build the first Space Center in Ghana and hospital. (3:02). They understand that the new (T) is the opening of the life or the totality of the nation. We sit, watch and pray that some don't abuse others. I have put the top KF management team on a very specific point, they all know what is happening and I have a purpose for it, because it shows in the understanding what they understood, then they will see the change, if they don't then we'll help a little bit, because they should have matured and understood their position. It's the same with the rest, a lot of you got afraid by the attacks of the others because then you were tested. The failure is your in the understanding of yourself, not us. Intimidation by the others is exactly what is happening in the wars of the Middle East. Intimidate war then you'll submit to what we want. The KF has been made a terrorist group by the Belgian police, because one man needs children (pedophile). The wise nations have seen it and now they block it. They are not blind. It's like you the way you see some people abusing others, (3:04). you sit and saw look, the Moslems have 4 wives ... okay so let them have the 4, at least they don't abuse the children, but in the Church they do it (pedophiles in west). How come most of the child abuse is concentrated in the Catholic section of the Church. Because a man has been driven from his natural way of living in not having a partner, E and reproduction doesn't stop. A man has given his soul, he sees the pain and he wants to cuddle, to give, that's how he gives comfort from his soul. Look at the Church of England the priest is free to share and have a wife and child. We don't see that much abuse there. (broken audio .) even though it has created its own ?? patterns. .... becomes a hole in the dam and it'll become a bigger hole, how much can you patch it. In the western world it's called abuse. In the Islamic world a 9 year girl can marry and become a woman, it was done for centuries, the law of being 18 years old is very recently. A man could marry at age of 9. In the West we have made it a criminal offense, which is correct, a child of 9 doesn't understand what is right or wrong. (3:06). Understand why Mohammad brought this out,

in his time they used to bury a girl out of the womb in the sand, because she was a burden, so he allowed the coexistence. You have to understand the environment which Mohammad became a ??. Now in the West we have a bigger problem in the Catholic Church but it is all done in the name of the Creator. It's you that has to decide that it is not to be done. Many times I have said that even people who are as innocent at the age of 28 are as those of 9 years old and should not be touched, because this is not the process (?). It has to go according to intelligence. Fro the majority of us 18 is the right time at least to understand the borders of the patterns of the body to mature, sexual maturity from a boy to a man and a girl to a woman. Man has used the name of religion to carry on his own abuses, so if you are correct and understand your own soul you cannot be abused and you cannot abuse. We see many of these patterns in different belief S. (3:08). In the bush country in Ghana when a king dies they kill 4 children and put the king on top, so the police announce that no children should go out alone. Why when somebody detaches they have to kill, they could put concrete blocks underneath it. In all the cultures abuse happens, because it's the way a man tries to confirm his own existence, ?? they allow themselves by different levels. This is why I am trying to teach an open your eyes, because when you understand the creation of your own body, would you like to work with the MG field of the Sun or the Earth, or does it in reality exist if this is your body here and we have seen it with your soul, and you have created the MG fields of the 4 legs and arms in respect to the earth and the sun is over here, then what kind of feature do you have in respect to the sun, because if this MG field has managed to create 2 arms and 2 legs, does it mean the soul expands the U, and then you have ??? many dimensions according to the field of interaction. (3:10). The field interaction of the soul created the fish. The field interaction of the MG of the center of earth gave Man 4 arms and legs ... the vertical beings have different combinations, Ca or Zn. Does the P of Man in respect to the U ?? , is it Pl. And do we have parallel features in respect to the Moon (? MG fields) ?? it still has a pull. If we managed to create 2 arms and legs in respect to the earth, we must have a structure within the fields (? concerning the moon). You came to the KF to find a solution and now you understand the solution sits within the soul of yourself. It's you who has to unravel the mysteries and understand your weaknesses and strengths. How do you look on the Moon, can I find an image of you. (3:12). Q: If I have 2 children, one sitting in New York comfortable and safe and the other in Syria crying and terrified, how is my soul supposed to react? This is a condition made by the Man. You can't react because you have to rejoice that both exist. Is there a position for the one in Syria to learn the hardship so that in the future it becomes just? Or is the future that the one in NY becomes arrogant and thinks that it is his right (to live like this). Or can you bring the 2 (together) that they can bring the peace to both sides. We see this many times. I have seen both side, you and I have both gone through revolution and different ways that we felt the pain, but has it made us wiser to (be able) to understand more of (life), or have we become ?? more narrow minded and defending one side over the other. I was in Theran 8 years ago and the security apparatus around me was very tight, I was not supposed to see a lot of things. Girls who are not covered are pulled into police stations. I came out of a shop and they were pulling a girl into a car and she was shouting. (3:14). They recognized that I was not supposed to see this, so they let the girl go and she ran away. Where is the reality of enforcing the cover on the body of a woman, or the cover of the soul and the intellect. It's all the same, it's enforced and we allow it. It is us who have

to bring the balance, we can't stop this process. ?? I explained last week how Def Flourescnce wrote the Health Contract and now we see the opposite, because the paymaster has changed. Or it's the same paymaster but before they had the control and now they don't. Do we give from our souls to the world leaders to change the condition? Or by delivering the knowledge we change the expectation of the man to understand that we are all equal. Life is very tough because we made it tough, because we put value (a price tag) on everything. (3:16). .... i set up the operations and live a comfortable life, I don't go and live in palaces and hide behind walls. But I set up the apparatus and I don't do anymore. I can't run the organization from the garage. When you deal with the scientists you have to set up the apparatus, the structure with the governments because this allows the others to understand ... they the people sit on their brain. He speaks in Farsi, "if you don't want to stand out then become part of it", but this is the wrong attitude. Show the people that what they do needs more and can be added to. Be proud that you are adding to it and not be ashamed. (3:18). And then you'll see the change. there would have been no Syria if there had been no Queen of England, we all know that. The plan is to empty the Central Bank. The Russians and Chinese fooled them, ??? (not to empty it into London). We announced it, it will be in the papers because Putin is being correct. And we see it more and more. We don't take part in politics but we see the reality, the truth. So is it (audio broke ..) the child in Syria because the others want to rob (the central bank), or is it (better) to sit in NY and have a good life? Which one will come out best ... time will tell. We can not fight the fighters anymore because it has become their habit, but we can bring wisdom to those who don't understand that they don't fight. understand there is no need for ...??? we see that in a couple of world leaders, the Chinese, Russians, Iranians and others. ... the 2 S have to be in the same house with their parents in Syria. It is us who have allowed the abuse because we accepted it and they enforced it. (3:20). wisdom ... brings adjustment to intelligence and that brings justice. ... when you are intelligent, when you understand everything, then you understand what is wrong and right and you become right, unless you're an abuser. Rick asks do you think the world is improving? We are going in the right way. If you take the American and European out of the equation the rest of the world is very peaceful. The guns and the bombs are made by the western world and the Christians and they blame the others to use them because the pay some of them to do it. If you understand the history of Man in Africa and Asia you see the same pattern, it's the same people. When the English came to Africa they didn't go in and destroy, they attacked the religion and a group of Africans and when they came to defend themselves, (then they claimed the right to attack them and they became the saviors). They're doing the same thing in Syria, and in Libya they paid a bunch of Italians to go to Libya and start shooting, and then they said why are you shooting ?? but now they see (news shows) there is shooting and then they started the revolution. Nothing has changed, the stupidity of man allows the repetition of the same thing. (3:22). Not a single Libyan ever started the shooting ?? it was the Italians. It's the same process they did in Africa 200 years ago. Now you are defending him, because he is shooting .. there is something wrong with you. And then the have the news and press and they can publish it. How many Chinese and Indians listen to CNN, very little. the whole thing is westernized propaganda and they have control over the airwaves. **WE CAN REACH THE SOUL of the Man without the airwaves**. And we are. Because we have changed the communication channels. Why

for the past 30 to 40 years are all the problems sitting with the Moslems? Since the state of Israel, the 52 state of US. And in the middle so they can create that continuous stirring up, sell arms and drain life and money. There should never have been a state of Israel and we call an end to it. That state will become part of the One Nation. We don't say an end of, we say an amalgamation as One. Because then a brother can't kill a brother in the name of a different belief. This is why we established the Earth Council and UC, and One World and One Leadership. To put an end to one brother killing another. (3:24). In One nation there is no need for armies, guidance and protection from the civilian police force needed. The Police don't need tanks, missiles and riot gear. The money spent on these things to furnish a few in the western world (elites), destroying many lives in the Middle East will be paid back by the Western world, we will take my decision that has been made ... and we shall see. The Europeans will have to beg across the world to survive very soon, the same with the Americans. The doors are shut until you sort yourself out. The condition is simple. Destroy all the weapons technology, gun manufacturing and then we'll allow you in. We'll allow you back to the world of humanity. I gave time until today for the world peace to be completed. You ignored it. I will serve it and you will not like it. I gave humanity until yesterday and today to complete the world peace. You saw we gave the Key (patents, USB stick) and they abused it, locked it up. We came and gave it out to the public. From now on we'll do our job. As One Nation we'll deliver. There shall be peace because the soul of the Man is crying for it and we have educated the Man. (3:26). And then the story will change and the girl in Syria will laugh and ?? girl in America ?? will not arrive to kill somebody. Every American will pay for what they hve done, because they paid their taxes in to it and couldn't appose it. To kill someone, 20 million people have been killed by the American financing in the past 50 years and you paid the taxes. The same in Europe. It's pay back time. Correction. Balance. No harm, no one shall suffer, but they will do it their own way. There are no houses left in Syria. There will be no food left to feed in Europe because the arms will not be sold and manufactured ?? making guns to kill now he has to sweep the floors ?? Very simple we teach the rest and the blind will stay in their own temple, they find out they have to eat each other. It's very simple. When we decide we will deliver. I waited 2 years for governments to deliver the T to the public, until we gave it. Then what happened to it. A rush, a take, then you weren't understanding so we started teaching, and now you're understanding more. Look what happened to the MaGrav S, a rush to build but did any of you put anything back into the KF? No. The KF is ?? humanity, No?? (3:28).. We get reports from Germany, before using the MaGrav I consumed 18 KWH, and a year later only 4 KWH. Did you put back anything into the community, or to teach, or just that's me (mine), ??? Now you loose the share. I tested you and you failed. Now you'll pay back for it through your own ignorance. By yourself, we won't do anything. The process has to be understood, the Church is in the temple of your soul. How many of you around the KF are making money ... we don't say you have to pay us. But we see everything. You make things and then you still come to the KF and ask for this or that. How many of you put something back in. I gave you more length for you to abuse yourself. By me giving you freedom I allowed you to suffer more because of your own greed. The temple of Man is the soul, and let's see how many of you have any soul left to have a temple. And you don't learn but carry on with the same thing. We are not preaching, but teaching for you to understand yourself. (3:30). ?? the path of your creation, how you're created, the

position of P with the interaction of the fields, then the rest is you and how you decide to move within it. It's Christmas for those who believe in the path of Christ, but I have one question, was the Christ there for the Christians to kill some more, 2000 years later in his name? ?? said, EU is a Catholic club and won't let Turkey in. Now EU is paying for a Catholic ?? where Turkey played the game. Those who are wise understand what I am talking about. Or should it be the whole world is one club and we work together, this is the ethos of the KF. Let us see what happens, from today the peace is in our hands and the leaders of the world have lost their time. Now we decide and we serve exactly how it should be done. Humanity will be equal across the whole planet. Thank you for today and have a wonderful Christmas. end

152nd Knowledge Seekers Workshop December 29, 2016

(The research on injecting Gans for Cancer have seen immediate results new cells are created as the Cancer cells are transformed into energy for body, Teachings on the soul, it is connected to everything in the Universe, It is possible to elevate the soul,)

(:07). Merry Christmas and Happy New year for those who follow the path of Christ. In the last 12 months we have seen huge changes in the T, and progress. We see next year as the pinnacle. We see our investments in our project start to pay off. We have changed the course. World recognition and understanding the T has been our goal and we have achieved a lot. ... (:13). Injection of the Gans CO2, in a specific way, directly to the cancer cells can lead to total elimination of the Cancer. The specific way that has been developed by the KF can be used in replacement of radiation therapy, which has been a problem with the side effects and burns and not much success rate. We will go to this directly. As far as the KF is concerned this is not a treatment, we consider it a processing. We inject the Gans directly into the tumor and within 24 hours starts its reduction. According to the report this process has no side effects. According to the report the injection directly into the blood sees it as a replacement for Chemotherapy. This changes the whole cancer treatment. We don't go out to destroy the Chemotherapy but we offer this process to the Pharmaceuticals who are using Chemo. We work openly with the scientists and doctors. (:16). (:18). A new development in the last week during the scientific trials, we have seen the Immune S create new cells to replace the cancer cells. We have seen that the energy of the tumor being used for the betterment of the body. It means that they become the food for healing of the wound at the point of the damage. If you have tissue damage or loss of pieces of flesh from the muscles we have seen the re-growth of the cells within hours. (:20). With certain Gans' and specific doses we have seen cancer gone in 6 hours. This means we can bring this new understanding into the process of infections. We have found the IS process of recovery and can create an effect within hours. This gives a new insight and is a major breakthrough in the world of science and health. We have found the key to the process of recovering from any infection. (:22). This is important for us in the molecular stricter of the cells, in replacing a damaged heart, brain cell, etc. ... We invite the governments to join us in rapid deployment of the T. The actual T is safe because now we have reports from the trials. It's for us now to understand how this ratio (of Gans') works on the different parts of the body. (:24). The use of Co2 is a major breakthrough in the Health application and we

have gathered scientific data to prove it. We started a spin off company with the authorities in Tokyo as shareholders. This will bring huge amount of returns for the Japanese research centers. The biggest problem to overcome was getting the scientists to try it and we got over it. We see this as a third government cooperation. This is a major breakthrough and to summarize we see the immediate elimination of the cancer while at the same time new growth of healthy cells to replace the cancer cells. We asked the scientists to mix their blood with the culture plates, (:26). to see if the Gans kills the white and the red cells and the answer is NEGATIVE. It means the cancer cells will be depleted while at the same time the red and white blood cells continue to operate. ?? we put what we call the main part of the Immune S into the culture and we saw the rapid growth of the (normal) cells, and strange enough the cancer cells don't grow. Once the cancer cells are diminished the other cells start to grow extremely rapid, it's an amazing development. You literally see the growth of cells, like when you see the sperm unite with the egg and goes into rapid division. It has been video taped and we are sharing it with the authorities so they can see. We are looking for those with tumors for testing, up to 50. (:28). We are open to human trials. We especially invite Norwegian government officials with doctors to attend the trials. (:30). You don't need to spend tens of thousands of dollars on Chemotherapy, our trials show the effectiveness of the Gans. You can contact Health section. For Ghana you need immunization for yellow fever and that requires 10 days before flight. We invite doctors to supervise this process. We would like an international group of doctors to come. Our goal is to find a mixture of Gans' to bring the cancer down within the first 5 minutes. This is MG saturation and not destruction, the cell just collapses, it gives its energy to another entity. (:33). (:39). The next step in the development is the Water and Air Decontamination. (:44). Shows pictures of Ghana, generators on the street. They trust each other and leave their goods on the street. (:49). We explained the proceeds of creation on this planet, was it accidental? What is the next step once the life is created in an active P way. We saw the energy of a star in its creation within the egg shell shape of its Solar S, at a given point it gives life to a structure, a planet, within that structure is another structure that we call human, animal, or tree life. It has been the energy conversion of a Pl from one state to another. In the process that created it has its own central position within its process and operation. (:51). Once life has changed into the process of replication, to remember how to replicate the process the life has built itself a hidden memory bank. The process of horizontal beings, humans and animals, we have created a memory bank we call ?? . What is the memory bank of the vertical people? Where is the heart and soul of a plant and central brain. Man has chosen his head for Central control, we have kept the operation of control through the interaction of a non-physical entity we call E. ... the aura is an egg shell shape of man. For plant life it comes back to the essence of creation, we brought matters together, ??? with it, numbers, and increase in absorbing energy from it, environment to increase the multiplication. We reached a point where the central mass triggers a new dimension of energy that we call E, where in the process of development, the interaction of the P condition which is created by multiplication of the numbers, in P dimension and interaction in respect to each other, what we call E, has created a central point for interaction as we said (:55). between the E and P, and what we call the soul of the Man. What is the soul and its operation in the body? Why does it exist and what happens if we take it out. Would the body exist if we take the soul out? Answer is ??. The body is the

same as the plant. ?? rub it, some liquid for the conversion of energy for the creation of life with it. What we call the oceans. But the real existence of the planet is not the earth and its P dimension, it is the fields which emanate from it and interacts with the planets and stars within the Galaxies and within the U. The fundamental point is through this little dust of the earth, through its MG fields it creates within its center, its soul with its heartbeat, (:57). it P structure ?? doesn't have legs and arms ... tentacles of its field forces reaches every star, planet, galaxy across this U. This is the beauty of the interaction of the fields. There is no single star, planet, cosmic dust which doesn't have a connection with this planet. This is the truth an dhow it stands. When we speak about earth's MG fields and its positioning in respect to the sun, if it was only sun the earth would have been going around the full fixed diameter around the sun, but we know this is not the way because The Moons of Jupiter Saturn, Venus, meteorites, the other galaxies field forces within the galaxies of the U all dictate the position of this planet, in one way or another, in a bigger or smaller diameter. The P of the body of the earth due to its center, what we call the creator of MG (:59). field of its soul has connection with every other entity in the U. Put a magnet in the middle of a paper and add as much Fe dust as you want, the magnet will effect every single dust grain, even the ones that appear slightly loose you see some movement which means it still interacts. So it is also with the soul of the Man. At the birth of a man his soul is created, it reaches the soul of the total entity of what is within its information, its Pl and is in connection with the rest of the U. If you understand this you'll know how to approach and contact other entities which are also at the strength of the soul of the Man. For example you go to a football stadium with 100,000 people and you don't connect with anybody, then you go outside and see somebody across the road and immediately you feel love for them, (1:01). it's because the fields balance each other. It's not because you both love football, but because your souls balance each other. In the structure of the life of a man there is a hidden wisdom, maybe for the first time I am explaining it. This wisdom is at the strength of the soul of the Man is the connection btn the atmospheric condition, which we call the creation of the AA and its matter state, which is the P of its entity. Many of you have wondered why the blood flows (in the veins). Stand still for a second and understand. In the matter state of the physicality of this planet, Fe is the M part, in the gaseous part the MG field, which behaves like a magnet in the gas condition, is the O, now you see the marriage of the 2. O, AA, with Fe ?? of the planet, Hemoglobin, (1:03). both are in M field condition of the two, and what we call the levitation of the liquid. One is attached to the physicality of the matter state and the other is attached to the gaseous and the water. Now you understand why blood flows in the body. (I think he means that because they are both M they repel each other causing a levitation or floating of the blood). This is the secret of the creation. This is why when the 2 interact and the soul is created it is connected to every entity on this planet. In the same way it's connected through its creation and the link of interaction to the other entities in this Solar S and ?? you. Now for the first time you understand why you have blood as liquid, with the behavior of liquid Gans ?? flow in the body. Two M conditions in creation of Infinity (?? loop), which creates the levitation, not connected to one or the other, unless you bring it out in the condition of the one, then the other gives up, or replaces its energy with the other fields and solidification, that's why blood dries on the skin once it is out of the vacuum condition of the body. If you understand this you'll understand clearly how the soul of the Man has been created. It is

created out of the total entity of the elements of the structure of the matters within the Solar S, (1:05). which have found balance within the P structure of this planet, it has a telephone number and it always calls earth. You can go anywhere in the U and through this number you'll know how to get back home. This is part of the deep space T, this is your "call back home card". If you understand this then you'll also understand how the soul of the Man operates. Every cell (including RBC) in the body has this connection and operates collectively through the E, which is the part btn the soul and the P. E is Transition Energy, some call Dark Energy, because Man never understood from the Source to the manifestation there is a transition. Now that you understand P and its dimension of the E, you should easily understand the E itself has lead to creation of P. Therefore, you can measure any E from the soul of Man to the P part. (1:07). But the interesting part comes when you enter the soul of Man. What and where is the soul and how does it operate? We said, the Sun and the Earth, then there is the positional MG field of the earth, where the tentacles of the fields reach every part of the U, now take the soul of the Man, it's the same as the center of the earth, it interacts with every other soul where the P of the Man has finished (?), the P body of the earth doesn't reach every planet in this Solar S, nor the galaxies and stars, but the fields of it DO. It knows if they are moving forward or if they have changed their position that it adjusts itself. So it is with the soul of Man in respect to ?? and the other souls of the U and within the structure of this planet, it interacts more freely with the entities (souls) of this planet because it is near and made of the same (? material) or partially the same. The soul of Man can not only reach other souls (made of the same), but its position is dictated, its power is given to it in respect by the others (? in relation to the others). (1:09). If you change the position of the soul or increase the level of its soul energy you'll create different field strength interactions and positioning. For those of you who understand the world of medicine like the way I just explained, now you understand that by elevating the soul of the man you increase the field on the body and within it you change the character of the man. Because now its a different evolution, a different dimension, now a different position and different strength of absorbing (receiving) and giving from the others. The SS T has to be the totality and not the ?? P, it's to understand the soul and not the P of the Man. This is the secret and those who understand will travel the spans of the U without ever moving their own P body. This is what has been hidden from the Man and his knowledge. The SS of the Man is his own soul. Those who get into spaceships are those who have not developed the next step. It's an interim, and how long this will last depends on the maturity of the soul of the Man. (1:11). Can you elevate your souls? YES. But you have to understand what and where you add to it, because when you have the structure of the soul of the Man, it's the same as the soul of the planet, its heartbeat, which is the exchange of the energy of the soul and the boundary of the P, the two when they match they have to exchange ??? has a heartbeat, so does the Man. The Sun has a heartbeat because he has a P boundary and he has a center of the energy of the soul, the exchange of balance from one to another, it needs a transition, it's like a sound barrier one is weak and the other is strong. One is trying to go through and it hits the barrier of the P which is ?? slow. It's like the waves of the Tsunami when the energy of the water hits the solid shore and it has to increase ?? to , there is no difference. Now you have to find the heartbeat of the Man in respect to the others and then you'll find the position of the others. Blessed are those who are wise to understand. Do you ever need a motion of P to

reach another point in the U, or is the P transformation, (1:13). and the transition which is confirmation of the existence which you try to decide ?? which is .. The soul of the Man within the center of his brain is made, controls, communicates, ?? , develops structures, the P body of Man and its P interactions with the others. Those of you who thought of the color of my hair, the position of my heart, whatever is done because of me you have to understand that at the point of inception everything which is in the field within the creation of the planet had a say in the structure (of the body), what your job is going to be while you are here, how you are going to look while you're here. If you are supposed to be a giver then you need the timid behavior, and the one who is a taker, takes from the timid one. The need for a strong man that he gives and elevates the others around him. It is the souls that have decided this and not the man himself. If you understand the process of creation, then in the process of life you can change the strength of the (your) soul to elevate to the level of the strength of the other entities within the U, and "birds with birds and wolves with wolves". (1:15). Because you have increased the true level of the soul, NOT by stealing and absorbing from the others, but by increasing the fields that are available in the soup of the U, then you should be able to see and communicate with the other souls of that strength plus your own. It's like with languages you'll see the 2. This has never been opened to the Man because he never realized that he can use his P in the right way to change and elevate the strength of his own soul. ?? look at the heartbeat, don't forget the heartbeat, it comes from the interaction of the fields of the soul which is going, and the reflection of the strength of the matter state in respect to its environment, sound barrier ... what we call the noise of the sound barrier. If you have heard when the planes cross the sound barrier and make that noise (boom) now you understand how the heartbeat is created. It's the same noise. Understand the soul and its strength, (1:17). if you want to measure it and you have elevated your soul, or not, or you have managed to reach a higher level ... listen to your heartbeat. The change or number of heartbeats give a lot of indication into the structure and how much the soul in Transition becomes the matter of the Man, then you'll understand why you carry blood, that carries your E, and why your E dictates your P manifestation. Then you'll understand why I have said many times that I am ashamed to be in the body of a Man. It's not the soul but the manifestation of the P body which has ?? bothered and changes, this is exactly what you have to understand. The soul is exactly like a Pl, it carries the energy of a H, Cu, Zn, Plutonium, and the others which are stronger in the center, which we have not managed to understand. (1:19). It's not that it's all Plutonium or H, how much you take from its M that you add to its G that increases the mass within the center, elevates the soul of the Man. Every position in the soul has a control for the strength of the P. If you could operate within this, would life have a time limit? Or the P life of the manifestation on this planet has a time limit, if you free your soul you travel the spans of the U with the soul of a Man from Earth, "wherever I lay my head is my home". Because my head carries my soul so it is home. If you understand the teaching of today you'll reach the maturity of the U, and for those who this is just a talk, you have a long way to go. (1:21). A long way to go to understand your own creation, the interaction of the P ?? manifestation in respect to others, understanding the P has limitations where the fields of your soul reaches the U, would you like to talk to Mars or go to planet Zeus. We see a beautiful soul (Armen) on the screen. Try to understand the structure of your soul then the doors of the U are open to you. The limitation of the Man to open and reach the spans of the U it the limitation of

his P and his ?? habit. Through your soul you have a structure which is field connected through your E to your P, and this is a very small part of the soul the rest is what the soul does to put you in the position of what it needs to be. Death is not the end but the beginning of the freedom of the soul where it needs to find new dimension. (1:23). But in that dimension it has to find its P interaction. It's the division of a neutron into new protons and electrons, if one understands. It's the maturity of the time which comes with the understanding of the totality. Try to bring together al the knowledge we have taught over the past years and then you'll understand that the totality has come to a final point. If you understand your own soul you'll understand how to interact with the soul of the SS if you still physically intent on flying. You don't need the remote control or the P control, which is too slow, far too slow. The soul of the Man is a small part in this operation, is the image of his P, but it has other dimensions beyond it which are much different, stronger or weaker, which have the interaction of P with the other levels of the souls and the freedom of the travels in the space. (1:25). We'll still make the SS, still fly, and still make the Gans and the coils, because a man will take from this T according to his intentions and no more. A child is happy with a toy car and a man is not content with a Rolls Royce, another man sees his life in a jet plane and another with a gun and a missile. The position (question) is do we need to attend to our life, taint it with the matter side or do we need to open it to accept the totality, energy of the U. Keshe talked with an African man and he said he has no bad feelings for anyone and he lives a simple life in Africa, but I am happy and at peace no one can touch me because I am at peace with myself. (1:27). This has taken millions of years to bring this wisdom to the man in Africa. This is to understand the strength of your own soul, and to be truthful to your understanding of your own strength, but do I need to elevate it. To me we can reach the space T in a true sense much easier in Africa then in the rest of the world, because the heart of the man is still pure and untainted, for at least most of them. It will be very hard to find a soul in Europe or America or any other country. The purity comes out of the richness of the continent. If I am hunger I don't need to steal, I can still walk even within the capital to a banana tree to eat something, get a plantain or coconut to satisfy my hunger and thirst. In the Western world where do I rob next, there are no tress, they have papers on them (ownership) and are fixed to a wall. We see a calamity awaiting man in the coming time, (1:29). then we will see the true soul of the man. But the question is will this mature the Man? I was explaining this to my son, in the mid 80's we had the Cold War btn East and West, Communism and Capitalism. Communism had a strength of its own and very correct within its own structure, it lived a life within the parameters which it accepted for itself. But the Capitalism was covered with lies and deception. The change or end of the CW, meant only we don't fire any bullets but we still don't like each other, didn't come down with the Berlin Wall, it came down 4 years before with Chernobyl. It took a nuclear disaster to open the door. In Western Europe they started to see high levels of radiation but didn't know where it came from, and the Russians were sitting on a fully blown up nuclear reactor and didn't want to talk. (1:31). they couldn't hide it because the disaster was too big. They asked the Capitalists, maybe you have a T to help, but nobody had a T, only those pilot who sacrificed their lives by flying as many times as they could before dying to cascade the reactor with concrete. But that disaster gave a seed for ?? 4 years later of the breaking down of the Berlin Wall. And now we see a bigger Cold War but this situation will also change in the same way. This time it will be the other way around,

the disaster in the West will cause them to put their hand out for the rest of the world to save them. This time there are no western "Kamikazes" because the westerns are all Kamikazes themselves. This time the West by its own accident, it will be an accident and not deliberate. Last time it took 3 years to bring the communism down in the West, because the West was more communist then the East but nobody could see it. (1:33). The appearance of the freedom is not the freedom. We'll see the same in a very short time where nuclear reactors and other accidents will show the true nothingness in the structure of the West, which will then call to the East for a helping hand, BUT this time help should have a condition, which as we said, help and energy in exchange for peace. This is what we'll see and it will happen. Now it goes back to this mornings teaching, the soul of the Man has to be ready for this change. As I said many times it will be reversed and the boats going to Africa will be filled with thousands of whites trying to get to Africa. ?? They did a survey of children and asked them if they know where a chicken comes from, yes the supermarket they live there because that is where we buy them. That is the extent of the knowledge of the Man in the West. We have to raise the level of the soul of both side that when the time comes the door is open on both sides. (1:35). That it doesn't become dependent on the passport or visa and we put you in the refugee camp. The viewpoint of the man ?? in terms of disaster should be the whole planet (we all work as one in disasters). We see calamities beyond imagination (coming), it's man made but triggered by natural forces. The reason that today I taught the status of the soul is because we have finished our teaching. People have been asking for these teaching and I have taught you everything you need to know about the soul, if you understood the truth. In all the teachings we said that the strength of the MG fields of the Pl reduces to a point that it becomes the strength of the matter state, there is no difference (?). The strength of the soul of the Man reduces so much in strength that it reaches the matter state, which is the P manifestation of the Man. You were interested in Pl and I was teaching you about yourself. (1:37). You were so materialistic that you forgot that you are part of the matter itself. It's not that the minute you understand you don't need to feed yourself, to live, living is part of the process for contributing to the humanity and the UC. I have been teaching you about your own soul from the beginning. But you were only interested in the matter state, you forgot that you were part of it yourself. The center of the Pl is the soul of the Man ?? and the circles it reaches the matter state strength becomes the E because it goes through ?? how to find its motion to reach the matter state, that's why we call it E, and then it's the ?? matter state. H sits on the edge but within the H sits the energy of the gold, Platinum .. it depends on how much of the giving you give to reach the state of the MG field of the others. All my teaching has been about Man and his soul. The point of the hundreds of teaching is that I have been teaching about your self to yourself. (1:39). If you understand the strength of the soul you can fly in any dimension. It's you who decides the dimension. I said many times that when I teach about the soul it will be the final chapter, and now I have taught you it. If you read the first chapters of book 1 and the last chapters of Book 3, I have shown you how 2 eggs come together and create a M field and a Pl, and at the end I have shown you the creation of the U which is the totality of the soul of the Man. As messengers we have a habit to teach in riddles otherwise it becomes too simple and meaningless. Any Questions. John of AZ, I have heard that the SS are actual living entities, (1:41). and the SS has a soul. Is there something that has to be added to the field Pl we are creating or does it have a soul? If

you understood the totality then you understood it has its own soul, that is why you connect ?? and directly through the soul through E. You break into its E. I have been looking at your S these last few weeks, something is missing, you haven't found the soul of it yet, the imaginary center, where the field Pl works. In AZ you have built a platform and placed your reactors on it, try to raise your reactors (? off the floor). If you place your top and 3 base reactors in a line, in interaction with your 18 reactor cores, sit within the imaginary FP (Free Plasma) you shall fly. Is it a living being at that point? Yes, but it has no P. I can tell you put it there and then you'll fly. (1:44). We saw this with Armen, we hung the 4th reactor and it rotated and the platform went up and down, but it didn't have the structure it needed, with the 18 reactors. The 18 reactors create the P boundary and the soul sits within the FP. If you look the top reactor is like the brain and the lower are the legs and arms. Once you achieve this point you achieve the creation of the SS. Because it's a FP it is created out of the totality, then the Man's soul (?FP) and the FP of the SS, if you can tune at the strength you'll decide the full S. You'll learn that the pilots of the future are the man of the truth in respect to ?? the desire of the travel, which means they can manifest the point of destination to you ?? without your ever arriving, because they can create the condition of the connection, zero time travel, which is not actually traveling in the zero, but opening yourself to the Truth, we call it the enlightened. When you can create the strength of the destination, you are at the destination. (1:46). The S you are setting up in AZ you are getting there, I saw your 12,000 rpm reactors, fantastic you'll get there. .. there is a reactor SF on the top core, and SF below, and the plate with the (Gans) balls sits in the middle. As I said I hide too much because the Man is not mature. You have already achieved the envelope, the donut, you've understood partially that you don't need the transformers if you can feedback into your own ?? internally , then you have created your own image, then you are the pilot. (1:48). ... I speak about the Principle and transition matter. Is the heartbeat in the E? It's the interaction btn the P and the soul at the strength of the E. Have you ever thought for 1 second why your heartbeat elevates when you get E triggered? Maybe you'll find the answer this way. ??? When you speak to the soul, it goes back to the 12 disciples, because it covers every angle of, what we call the dispensation of the fields. It's the fields that feed back and creates the dimension of P. (1:50). at the strength which it does. The problem is not who he was talking to, but which soul he was trying to reach. We have a repetition in the life of Christ and the life of ?? Bab (Bahaula), when they brought him in front of a firing squad, he said, I have not finished yet, ?? 900 soldiers firing, they couldn't find him, he was back in his room because his mission wasn't finished. When he finished he said I am ready. It looks like a magic, but the soul was ordering the 900, it wasn't time yet. The soul doesn't need to speak but the Man needs the P of the voice to confirm his own ?? of information. Sometimes you have to speak for the ear to hear but the soul has already received the message. (1:52). When you feel the pain of your child thousands of kilometers away, did they speak or did you feel their E. It's only you who has that strength to receive it, zero time travel, we've seen it many times but we don't understand it, now we do. The cry of the Man for the disaster to come has been felt by the soul of those who can come and save are sitting on the outskirts of the Galaxy of this Solar S. Man shall see very soon. It's the same as the child cries to the father for help. The soul understands it and the field comes to the father that the child should be ?? So the cry of the Man has been out, it's been heard. We are too much involved in P that we don't see the reality. (1:54). Q: about

Silver Nitrate in the Hemoglobin production and do we add Silver N in the N coating, how much of it? Try and tell us. You'll find that using Nitrites with AA you'll reach the color of pitch black, don't just look at it (P) but ask why, then you'll the path to the soul. Now you understand why some are so black in their soul. When you use these things especially with Hemoglobin, you have to see if it's alive, if it's operating and not just because you added to it. (1:56). This is the problem you do it just because I told you, but you have to see if it is needed ?? for Hemoglobin to exist or ?? is it converted. Zane says thank you fro being here, you mean so much to me, I love you. Andreas from Switzerland, from early childhood I had a desire to fly, like Peter Pan. ??? something about fear of falling, understanding the E and M and G field strength, there can be no fall because it is just the G field. Any man that understands the balance btn the Fe and the O, (1:59). can levitate himself, when we put a stronger magnet against a weaker one, or with a Pl, where we can change the strength enough then both positions change. Levitation or flight in respect to a fixed position like earth is very easy, because you have the Fe as AA, and you have the O ?? every single ?? of the AA, one is the Hemoglobin and other the O, if this is understood anyone can fly or levitate in respect to the earth depending on the strength you change from the metal Fe in respect to O. In flying or moving across the U span it is again, understanding the MG field strength of the position, what and how it is compared to what you are. This goes back to the medical teaching, I said the RBC are "taxi destinated (destination)", which means when a cell (designated for the toe) passes the lung that cell only has energy for the toe and not the lung or brain or heart. Because only in that position it has the strength which is needed for ?? depletion of the cell so it can be ?? (recycled) back to the top. (2:01). When the sweet water when it enters the saltwater of the ocean, understand the interaction of the mixture of how much O you can put energy wise, do you take energy from the air in respect to the ground, or the other way around, and you ?? position yourself. Then understand do you take energy at the level of the U in the point of destination to match? You'll find out that SS are the point of gathering of the souls rather then the P because they enjoy being with each other. It's like what we call "Ex-Pat" (people who live outside their home country) community, but it covers the whole ... they are ex-universes instead of being "ex-pat". When you decide to go in a SS it's when you decide to be a part of the others (UC) (through) interaction. That's the misunderstanding that a lot people have of the totality. It's like you go to S America but you have friends from Africa, (2:03). Asia, and Europe because you like to be around them. You're all "ex-pats" but your in a community that you like to be in. You'll find out that the SS of the U are that way, beings from every culture of the U come together to enjoy each others existence and presence. By their will and not by force. This changes a lot. You can decide if you'd like to levitate on the earth or join a SS above, or you want to one for yourself alone. The SS of the Man is at the strength of his E, ?? as a P matter entity of this planet. It's the trust in ones soul that allows the man to travel. Q; Could you discuss dimensionality and realms of existence are these just constructs of the mind or should it be seen in the evolution of the soul, i.e. the higher the elevation the more they are perceived so to speak? It's mainly environmental condition dependent, what you like to manifest. If we change the strength of the Immune S of the body of Man, we can make him be in any direct position. It's the IS which puts limitation on the understanding of ??, because you have put a filter. (2:06). The restriction in our expansion in our P dimension has been predetermined by our ancestors in the existence of

our IS, anything above a threshold is seen as a problem. It has to brought into the parameters that it can operate, because the atmosphere of this planet has conditioned us, we have no choice. Why do all the animals have a blood ?? temperature of 37 (36.5) degrees, because it's the conversion rate in respect to the gaseous and matter state and the transition of the speed of the, what I call the fields of the soul in the matter state boundary. Why when you see somebody you love your heartbeat changes? It's only btn you and your E and nobody outside knows. Is it the connection btn the soul that transfer the energies at the speed that the P can't handle, then we should be able with the knowledge we have to measure the strength of the love. (2:08). Love has a strength the same as the fear and joy. Now that we understand we can do it, why don't we increase the whole thing (fields on this planet) to the level of loving and let the whole world love each other. It can be done. And the number of people around the KF is enough to create it. But the position of the fear is worse, because we have ?? Ulga asks why when she sees strangers her heartbeat begins to increase, what is the reason? Ask your soul, it recognizes before you do. Does it produce a heartbeat of fear to protect you from what they are, or intentions? Because (your soul) is aware of the other souls. Or is the heartbeat elevated due to the love and care? You look at your own heartbeat but the soul has already connected. ?? of intention. (2:10). Q: What is the main motivation for the soul, is there different motivations for different souls? For example, the soul of a SS might have a different motivation then a human soul. It is you or somebody else who created the SS so it carries the E. The intention is by principle, living a balanced life. Would the soul of a SS be the same as a new child born? The same as a planet, because that strength gives you manifestation of P. It's what I call home, what I feel comfortable in. This is why I said in some cases you can't invite others into your SS, it's made for yourself. If you make it ?? multi-dimensional you can allow anybody to enter. Children of the U with a Man's soul as part of it would be a fantastic birth, physically we would not be able to reach (it) because of the strength of AA, we'd kill each other, but we can marry through the soul, and the children of the soul have no dimension unless they decide. (2:12). Man will learn about this in a very short time. The way your heartbeat changes when you see a beautiful woman, man, dog or child, the way you fall in love with a beautiful woman, because of the heartbeat. It will happen in space for Man, but unfortunately, P interaction is an impossibility. But the marriage through the souls will lead to the life that it's balanced btn the two and the child of the soul is so beautiful. Man still has a long, long way to learn this. If you look for the birth through the action of the sperm and egg and you know that came from the P manifestation of the soul, I would imagine if the souls ?? would be ?? without transition, it's so beautiful. You call it a virgin birth because there was no P. Q: How does the soul effect the DNA and RNA? (2:14). It's the creator of both, one on the level of E and one P. In Chinese culture you have the Yin and Yang, E is that fine line btn them. One always reaches the other and the return comes to itself, depending on its strength. If you have understood the teaching of today you have unraveled the mystery of the U, because it had nothing to do with the P of the Man. It's to do with the fields of the creation of the essence of the creation. It's the same across the U. you need the energy to create the matter and then the interaction of the matter allows the free levels of the understanding of the freedom of the energy, which is what you call the soul, ?? that in its interaction once you have created it is all matter state to confirm its existence. You call (it) P. If you understood today's teaching you understand the mystery of the U otherwise

it's just a wind passing by. Have a wonderful New Year if you are a believer of the Christ. End.

153rd Knowledge Seekers Workshop January 5, 2017
(Keshe technology recognized and made a part of Italian Civil Defense, The West will come begging to Africa for help in the coming disasters, Pedophiles lead by DL on verge of capture with help of Keshe Foundation, He will not release the power generator, Keshe is taking the teachings to new direction in the soul, Use the physical body with its own Gans as a reactor, Explains how Silver Nitrite works isotopes switch between B+ and B- thereby releasing energy)

(:11). The numbers add up to 9. For the first time in Italy the government has given official authorization for the KF to help in Civil Protection in support of earthquakes. It's an example for the whole world. (:15). The earthquakes are getting closer to Rome so this support is important. It can be replicated in other European countries because of the Union. (:22). Other Europeans shipped in a lot of Gans Pads during the earthquake and greatly assisted in the emergency and now they have officially become part of the Civil Defense support team. This gives us an acceptance of the T on a medical level internationally, once the second level comes in. One official of another country said that this means you have become equal to Red Cross in a very short time. The only difference is they have to go and buy supplies but you produce everything yourself. You'll bring the new T across very fast. If you are setting up in your country we'll supply copies of the official letter. This is official recognition of the Health Units as effective and a breakthrough. With this we can join Civil Defense organizations worldwide within the next 2 years. (:25). Slowly and gradually we are getting to where we want as One Nation. In the next couple weeks we are working hard for acceptance of the T for Decontamination (water and air). Alek in Nigeria is setting up Decontamination for Oil Drilling. Like in the disaster of the Gulf of Mexico we can deliver decontamination for oil spills, it dissolves the oil. (:28). When the Canadian government blocked me and held me for 11 days I was on my way to Mexico to deliver this T for the Gulf of Mexico. In Ghana university it will be part of the education. This would not be possible without the support of all of you (worldwide). ... the blueprint has to be your thoughts and the way you think it can be put into market to help the others. The setting up of manufacturing has to come from the heart and not just replicating, waiting for others to set up and then copy. (:31). In Ghana we have used almost everything locally. Instead of asking for blueprints look to what your nation needs. Use what is locally available. Caroline is working to save the lives of dogs in Ghana by giving Gans. The Vets have asked her to give lectures. You don't have to wait for FDA approval. (:34). Our ancestors had medicine men and they didn't have FDA and they saved their lives all of their life. I come from that blood line. Manufacturers, look locally what is needed and use local products. Those of you who are only greedy for energy (electricity) you are in the wrong place to start with. We are looking to the local need and that is what brings the change, not getting the most sophisticated to plug in, which only goes for the 5% that live in houses. We want to help the 95% who have to look for food everyday to keep from going hungry. We all thought that America was the land of milk and honey or whatever,

until there was the hurricane in Louisiana and we saw through them, it was worse then central Africa, poverty beyond imagination. In developing countries, 35% of the children go hungry and live in poverty in USA, 5% in Norway and 15% in Korea. In the richest countries people are going hungry because they can't afford expensive food. (:36). Just look at the statistics on the internet. There is a saying in English, "fair coats and no nickers", it means people wear fur coats but they don't even have the money to wear underwear. The Western world has reached that point and the other nations are not far behind. We are not preaching but teaching you how to change the course. You want to manufacturer, I will not give you the blueprint, see what you need locally and respond to that and use local materials. Everything in Ghana is 100% produced locally. It may not look as shinny as in the western world, but it produces what is needed locally. We have given educated people without jobs work and we are putting into the nation. It's no more teaching to just show you this and that. We just try to enlighten and teach more and more, to understand in depth what needs to be done. There are 3 websites (? KF) around the world that are doing misconduct and they are directed by one person, (:38). thousands of websites under one name, DL, and that will be handled soon. People say have you seen "Facts about Keshe", it's all one man. I give you warning, we are going to clean everything up. Do you remember when we put Sterling on the stand (international pedophile case), he wrote (told) a lot until about a year ago we opened his hand and revealed that he was abusing his own children. And he doesn't write anymore and at the moment he has become the biggest informer for FBI. He's doing 25 years in prison for raping his own children. The people who are guilty write everything to divert attention. We teach to bring knowledge. The birds (of a feather) flock together. Look who writes the same (as Sterling) and she also has 2 children. We have hard evidence of them trafficking (? children) and we share it with Interpol and other offices. The secret was that nobody could point the finger, look at the websites, they are run by the same man. The man is a hypnotist and the children are raped while they are hypnotized, the evidence is heavily loaded to one side. (:40). Even his own children don't remember, because he is proud to announce he is a hypnotizer, so they can't remember. Let them write, but you yourselves know the strength of the T. ... The enticement is that you get a free ticket to the cinema if you send a photo of your child who is not more then 6 years old. Because when they are hypnotized they can't remember a thing, now you see the truth, Mr. DL. We praised him so he would make more mistakes, a trap, and the authorities got him. The whole mentality on his websites is on sexual abuse, writings, tools.
(:46).

It was 5% carrying 95% illiterate or the ones who could read a little bit more. (1:03). That's where everything is now (in world). We are trying to increase this number to at least 20 - 25% in the coming years, that in trusting one the rest will understand and then we can teach more to join in that we can open the community. It's no use opening to the UC to land when they are still carrying arms and the latest weapons T. The will is the connection btn the E and P, can change the condition of the soul and through it the condition of the soul can change another man's job. I came across a man in the most advanced weapons T, ?? Stirde, (broke up ...) a few years ago ... in a very simple way I made my wish that this man should not do this job in weapons T. You don't need to go

out and protest, you need to understand your own soul, the creation of the E within the structure of the soul of a man reaches another man. (1:05). Men will disarm themselves. You shall see my work very soon. Two weeks ago was December 22, (broken up) .... world leaders ... without them knowing, because it is our wish. (1:07). I met a man who was the head f Stride weapons T, I understood this man was not happy with his position there and I made my wish that he not be there and very shortly afterwards he moved on, left the job. The point is our wish has to be our way of bringing peace, we are working in that direction. We gave the World Leaders until the 22nd December to organize and come with a position regarding the World Peace. It did not happen and I said we will take over and we have taken over. Very soon you'll hear about our work. We is not me, it is us as the followers of KF, we want a peaceful life. It's a response even to the souls who have not heard about the KF, but the wish is world peace and the end of wars. It takes time but we are very good at it, we will deliver. A lot of world leaders need to understand the wish through the soul and then they become servants to their souls and the soul of their nation, and as One Nation to the soul of humanity. (1:09). Start to understand the process of connecting to your E that you can reach the soul. In the Health I have taught that if you have a finger that is not functioning proper, it's paralyzed or is not moving. We said that you go into your brain, into your E and send the info for your finger to move and you follow it through your arm down to your finger, but you don't move it, you just test that the info reaches there. Then you do it a second time but you don't move it or have the intention of moving the P to match the E. On the third time you send the info that you want the finger to move and then you inform the P to follow the E, then you try to move the finger and it works. It needs practice and it works. Those who have done it have seen how beautifully it works. A scientist couple who work for sports people have replicated it and it works. (1:11). Now reverse the process, send the P in without moving the finger, send in the feeling of heat on the tips, and try to feel the E of the heat in your brain. You start to establish how to go through your P to your E and then try to see how your soul responds. This is the way you connect to your soul, you bring your P, I want your P to change that here I don't feel a pain, the temperature is too high for me, but I want to be comfortable where my soul is physically happy. This is the process that we are trying to teach. It's not ?? reversal, up to now I have been teaching you M, now I am trying to teach you G and feedback, and it goes to the soul because next time it has to reflect to give out as M. You have got to understand the Reality, the Truth, the Essence. In Italy I taught this and the guy was pressing with his eyes and trying to move his arm, but something is wrong it doesn't move. He never understood, it of the soul of whatever it is. And you ask it to move because it will give ?? you pleasure, it will move. We have to learn how to do this. (1:13). This is the reason we announced that last week's teaching (deep space travel through the soul) was going to be one of the most important teachings. But those who are P and feeble, when they heard the teaching last week they laughed and said there was nothing there. Those who were wise saw the wisdom in the teaching on deep space travel. If you understand that in the Pl of a matter sits the Pl of every matter, sits the Pl of the connection with the U, then you understood that you can lock into any condition anywhere in the U and travel there is zero time. Those who are wise in centuries will understand what has been spoken. If it is hard to understand then go back to basic principles, he draws on screen. (1:15). He draws many circles inside each other, these are Pl, take a point on 1 before the outer ring, on this side you are M (pointing

upward) and on this side G (pointing inward), H, Cu, Ur, Plutonium. Another way take a magnet, you have M and G (up to your understanding recently), but now you know why you are M and G also, and reverse. Now what about other things that carry the same, you are M to one or G to the other. You have understood how you can go in a matter state from one to another. (1:18). You can go M and be in one position or the other if you understood the essence of the soul. Can I be in different places at the same time? If you understood the operation of the soul ... YES. You become like a loud speaker coming from the same receiver, one speaker in one room and another in the other, but you have to understand the line of connection. It's the first time I teach this but you have to understand what it means. In reality you have done it all the time, but you haven't understood the process. You sit at work physically doing something but the E is handling something else. This is the multi-tasking of the soul. You are with one person doing business but your mind is somewhere else for example, with your child doing homework. You can do the same with the soul but it needs expertise and understanding, (1:20). of the reality and the presence of the soul. The position of the presence of the P of the soul, because now as you have seen you are connected to different points because of the field strength, but it comes to a point to ask, which all of you know, in present state of science calls it different stages of sleep, where does the soul of the man go when the body is at rest? Or is the P of the E, the time part of the soul, gets engaged with the P of the environment of the existence. We do not teach, we enlighten, it's for you to understand, to enlighten yourself. What language do the children speak when they come out of the womb of the mother, in China, India, etc. Bring them together, they don't see but they feel and know the hierarchy of their position. What language does the soul of the UC speak that we understand in the essence but we have ignored for the sake of survival for the sake of survival of the ?? religion of the earth. This is the ?? enlightenment. (1:22). This is why in the teachings before the Christian New year that we have finished with teaching, and are now teaching the language of the UC. The language of the existence means understanding the process of interaction of the soul. Where does the soul go when the body is at rest? Where and in which dimensions? Why do we dream when asleep? Or is our P existence the dream of our soul? Why do we dream and contact the things we don't do during the daytime, and in the next few days we say, I had a dream about this (deja vu). I had a premonition, I saw this a few seconds ago. The soul has already seen before you do because it was set up that way because you have ignored your own true existence. And this is our job, to open a channel for the man to have control (not control), but interface in the operation of his own soul. Then "Thy Shall Not Steal", because if your steal from yourself half of the info goes to the other half and its not there, so you have only half of the body. (1:24). This is the teaching of the space T, the Pens, Pads, and Gans is to keep the materialistic man happy, we have to do. It has taken time to bring those who understand to this level now that they can start finding a path to their own P and E to where their P and E came from .. the soul of the Man. When we have finished with the Gans' and god knows what, N material, now we have to use the body Gans of Man and the N layer of the skin as a line of communication to the fields of these plasmas to reach the soul of the Man. And we decide where we want the soul to manifest itself in what shape or form, according to the environment for its appearance. You worked so hard to make the N materials, Gans', coils, and now the guys goes to another S, what are we going to do with this one? Nothing, embrace it and fly with it. The SS of my heart

embraces humanity. (1:26). It's now extending the "goal post" but increasing the understanding of the soul of the Man. But you say we have to see the thing in P, I put something in the water with the N material and it goes from Alkaline to Acidic, but it's the as going from M to G, so it must be a field force, it does something. Now you have seen something working, that container with the Gans, the ball reactor is your body and what the body holds. Use it to reach the soul of the Man and through it you'll reach the UC. THIS is the SECRET of the teaching. I have to feed you with 10 ?? around ?? neck to feed the ?? , but that is part of the teaching process. This is the burden of the teacher until he can carry the student across the finish line. I am not interested in the N coating or Gans, I know the path of the soul. But it had to be down. When I went from the N material to the Gans everybody shouted and we lost half of the people. Now he spoke about the Pl and we don't see it anymore, but we know it does something. Now we enter the true Space T and essence of the creation. It's you who have to give it the P, and have to live with the P. (1:28). You have become the creator of your own creation, you are the god. If you do wrong with the P you have to pay back with the soul which created it. They Shall Not Steal. Then we live the life across the U. You wanted the generator because I need electricity, go to your soul and you can walk in the hot or cold it doesn't matter. It's so hot here (Ghana) the sweat was dripping from my tie, I said it was so foolish because we have the knowledge to change the structure here without any cooling S at 24 degrees, but we have to stay here because that is what it is now. The Pl is not a structure that you put it like this is the Principle, Transition, and this is the Matter state. What is a Transition to me is a matter, what is a soul part is my Transition. Man has to understand the totality according to interaction of what is needed, (1:30). or wanted to be present at the time of interaction. We do it so often that we just took it for granted and never understood it. Have you ever seen a man on the phone sitting next to the mistress and talking to the wife on the line, he's shouting on eh line it can't be done, you don't understand, while holding the mistress and saying, oh darling I love you. Where does it sit, the love of creation, or have we decided to be condition, position present. This is what the new teaching is about, the goal post has moved from the Gans to the soul of the man. And God help you Man, I hope you understand, which will open the key to the UC. Disgracing it will shackle the Man to the world of P and all its problems. The time of transition is harsh because we got used to the old way for too long. The problem is not a problem until there comes the time of transition. Accepting the acceptance is the biggest problem. (1:32). ... Now we change the containment to the P body with all the Gans' in it and the soul ?? inside. Try to operate it (as a SS). Those who achieve it will enter the UC in no time and when they try to talk about it to the others they will say you are stupid and dreaming, because it is beyond the limit of what they understand and they can't handle it. When I was in Iran one guy said he was in Russia and they have one metal that flies, they call it, "flying metal bird", and his colleagues laughed at him and a few months later one of these metals landed in Theran airport. Now I have seen what you (were talking about). At that time I was stupid and ridiculous. We are all stupid because we all excepted it (that there was no such thing . In Africa they call it a metal bird. Now we accept it because we put engines on it. We have to come to accept the transition and transfer of our souls because now we found the engine for it. (1:34). The maturity of the Man comes from understanding his own soul and no further. Because if you understand it later ... if you want a spanner (nutcracker) to open a nut you have to go and buy one. If

you understand the operation of the conversion of the energy you either create a spanner in your hand and open the nut, or you understand that the nut is made of a collection of the fields and it has the essence of existence, then you transfer the energy of the wanting of its position and it will satisfy your need according to the accommodation that you make for it. Then the question is, do you need a spanner? Or do you have a spanner of the U. When we speak like this, for you it's only like talk because it is very far for you to imagine it. It takes a few times of finding a core putting Gans in it and rotating it, then you see things move (it lifts) and you see 129 Tesla. And those who can't understand it say he is wrong and cheating. But if after seeing 129 Tesla and you understood, then you are enlightened. Let the fools be fools. You have reached the destination of the creation. Now how would you to put this body on a motor and rotate it at 5,000 rpm, that you can separate his juice, Gans and find his soul in the center. Any volunteers. (1:36). Rick says that is the exact speed he was rotating the Gans water and trying to get a center bubble forming. Rick says you can't just do that to a human to get a core. You can do! R: you can do it once with each entity (they would die). K: What are you going to do with the soul you separate in the middle? How would you like to put it back together again. R: it would be a different environment, Humpy Dumpy wouldn't go back together again. K: you never know, if you had the right glue and find all the pieces. ?? it's like you said with the hard boiled egg. People like Rick who started these programs (Workshops), made the N materials and started the cores. Now they understand that you have 2 simple choices, the secret of the communication and interaction of P sits with what we call the potential difference and the current flow. (1:38). It's you who dictates what the P Difference is going to be, and through the soul how much E is passed on to be the current of the flow in respect to the environment. It's as simple as that, and no more. To understand the Totality, to be the Essence, to become part of it, to understand the position of it. Is to be in Essence the totality of the Total. To be part of the Pl of the U the being on your own. Then you can transfer, position yourself. Go back to the position of the magnets, it's you who change the strength of the E of the P appearance of the matter state of the energy, that you can move yourself across the U without doing anything, you just change the rate of giving and taking and then it positions you where you want and where you fit. Or you become the nomads of the U, you change it, you land somewhere that you don't know where you are, okay we'll spend some time here until we would like to move on. (1:40). With this knowledge you should be able to control the giving and taking from the soul, that it is like the magnets dictating the positioning. When you put the circle magnets next to each other if one is stronger the distance btn is more. Now we have the reactors that do it, we call it MaGrav positioning. Or you can call it positioning yourself with your soul. It takes time, we set up the knowledge, the course of the line to achieve it. But it's for you to understand it, otherwise it's just another sound. In time, many have achieved it in the past, and many will achieved it n the future. You will find that to achieve it comes from the detachment of the soul from the P, then you'll understand that the line of communication from the E and the soul, that you can give it any P you like. "Wherever I lay my head is my home". The head of the Man is the soul and his home is where he makes his P to rest on, hold and contain it, and to enjoy the sharing of the soul with the fields of the others. I ?? I don't teach, I enlighten I don't force. Now people like Armen are banging their heads, 'now he has gone from the core to the coil, now where am I going to find the soul"? (1:42). This all finishes one thing, it's got to finish one thing, ??

the U. Try to understand the strength of your E and how it interacts and positions, understand the capacity of the soul then the P will be child's play. Try to position your soul and test it. Start little by little, then as you gain confidence you'll find the pathway enlarges to a road and you can go the speed you are at (your level). That's why I said the present computers and control S are useless because you can go the speed beyond imagination. And if you want to control it through your P, you will not be able to contain it by going through space in an aluminum frame, that's why you make the frame out of the Pl, and to understand the condition of the soul in control of the craft. I always said that computers are too slow. It's the Man's thoughts and E that will create the conditions of the motion and with it the Pl of the Craft according to the environment. Now you understand. A year ago we put the SS on the ground as dots on a picture (1:44). And a year later we see the interactions by John in AZ, with little blips. Now we have to make the transition to the E to the matter state that you see the P of the craft. There is a discussion, a school of thought that says that there are nations who are in touch with those from outside (ET). They have always been in touch with humanity it has never stopped and will never stop. We know the path of the Man to his greed and to his connection. Understanding of the interaction of the fields of the different strengths leads Man to his soul, but it has to be to understand that in that path it needs a stronger field then P, which is free and you call it E. Any questions. Alsa says the last teaching was very important and we are trying to transcribe it, it's just like Bahaula it has a lot of hidden words. (1:46). that we have to understand, but being in P makes you not to be able to understand a lot of hidden things that you are talking about. When I fall asleep after your teachings I usually have dreams and you are always in it. One thing dawned on me, our language is so primitive even though we have so many vocabularies, we created the language to cheat and lie and cover ourselves up. True language is of the mind once we make that connection. If we talk with E it's beautiful, if we say love with E then it's beautiful. The second thing that dawned on me is that everything we created like a home, plane or car or even a cup we drink from, they are all inside us, but we want to have everything in P, but we no longer have to do that, we have made the earth so cluttered. ?? everything to create is from inside, if I want a home I can create that, etc. The way I felt was so great, I just wanted to share that. We always talk about E going from the soul, it's not clear for me, please explain in detail. How can we practice and recognize that E, how to use it to get the soul, it for me is a puzzle. Is it love, a feeling when we talk about E, is it ?? or an inner E, (1:48). I am supposed to feel. I need some kind of detailed instruction. The E we talk about is the line of communication from the beginning to the point of manifestation, what we call the delivery of expectation. You call it, fear, love, if you are strong enough to be within it, you still need a center which is ?? stronger that its flow allows for you to be a part of the transition of it. The transition doesn't come from the center of the Pl to another point. It passes all the elements of what is available, and the strength of it. This means that there is always a higher strength that it needs to dissipating that it reaches to the point of your existence. There is always an intermediary time of transition. There's no other way, if you are at the center it is non-existence, it just stands there. At any stage, it doesn't matter what our ?? com creation is we are still in the path from the beginning to the point of manifestation of ?? com creation. You might be able to shorten the E that it is instantaneous, but still from the soul to P it has to happen. You call it transition time or E. (1:50). It's all the same. Any other questions? How do

souls proceed to the next level after death and what is the roadmap? There is no roadmap. The soul is ... if you live in England you go up M1 and somewhere in Junction 19, etc. to Manchester. This is a roadmap, the souls don't have a roadmap. The map of the soul is delivered by itself according to its comfort and presence. Maybe we'll make you a soul GPS sometime in the future. At the moment it doesn't exist in the U. Q: if nothing happens when trying to understand any soul teaching does it mean that I am too disabled on the E side and death is my only hope of enlightenment. Why does Man see death as an end or change. When you can connect your soul and manifest somewhere else, you die in one place and come alive in another, it's the same soul and you look different. (1:52). Soul is the collection of the free existence of the fields without the attachment once you die after P, but still itself has manifestation of existence in respect to the environment which is existing. Any other question. If you understood the teaching of last week, this week, and the way we'll carry on, you'll soon understand, and a lot of you will try hard to reverse back the heat (?) and feel it and show your E, and then you'll start getting in touch with your soul. Then through it you'll create the condition of the transfer. It takes time. The time it took you to make the N material, Gans and cores. It'll take longer, or it will be instantaneous, it depends on the clarity of the soul and understanding and use of the knowledge. Your talk today has answered more questions I have since I went out of body and grateful for your sharing. Do the fields of the Gans and reactors align our P to the E and soul. You can use it. Armen has done it once or twice but he jumped it, but I don't say anything. He has a beautiful soul but he is too busy, he was born premature, 7 months, so he jumps things and doesn't see it. (1:54). I have seen it done once by Dr. Eliya Kostova when she was in the Insano, but she wasn't aware of it. Armen saw it and tired to repeat it, he repeated it but never understood it. Making Cup of Life, Cores, and the things I have done with the core members is just being a path, trying to put the essence of the creation of the soul in a p matter that they could understand. The man is P. There is a connection btn the p dimension and the soul, we call it E, but if you find the path of it and understand the process of it, it is a transportation across the same media, because matter itself is a Pl but at a given strength. Where the soul is a Pl itself at a different strength, but they are all Pl and transfer of fields. (1:56). Try not a shortcut, but the path, a method, an understanding, then you have achieved. Any questions. Describe Consciousness? Why should I, you explain what it is to you. Behavior of the P, has nothing to do with the soul. Or witnessing of the soul, the behavior of the conduct of the P with no E. I always said that what we eat is only 20% of what we take from our environment the other 80% is absorbed through the fields and given through the fields out, because we can't just always take, we give that we can take, we empty the cup, the energy of the U and it gives what ?? (1:58). By the same standard only 20% of the E of the Man carries through reflexes of the neural S, the other 80% is free flow btn the point on delivery to the extent of the E and the soul. Because it's so fast, matter, Gans state, superconductivity of the nerve S is still too slow, we call it reflexes, sometimes. Or we take actions without knowing. Caroline watches videos (youtube), the father of a child is asleep on the sofa and the child is about to fall off the chair, in his sleep the father grabs him before he falls. The body is at rest while the soul is watching its responsibilities, which it has given life to. Because at the time of sleep there are no reflexes. We know all the ways our soul works but up to now we could not understand it, we always explained it away with some other things because it P had some meaning for it. Now it doesn't

because hopefully we understand more that we can explain and use it. I watch my sons train in martial arts, one closes his eyes and feels the fields of the other, what they might do. Part of the training is to have 1 person in the middle surrounded by 5 others and they have to feel who and when someone will go against them. It's not that they feel the E, they feel the soul, open up but it hasn't been developed. This is why Eastern martial arts extend slightly in that direction, to extend its P through E through the soul, because the soul extends the whole of the planet and the U tries to access the field. We need to get trained, you can't just walk out the door and think you can run a marathon and win. (2:01). It takes years of experience and training. The first day maybe 20 meters the 100, etc and slowly build it up. But to win a marathon is too much effort in P, understand the work of the soul, it's so simple we do it all the time, but we have forgotten it. We haven't forgotten it, but in forgetting it made for us, he does his job and I do my P part when I need it I contact (it). Our own denial is the cause of our own problem. Q: Am I the director or is my soul the director? Oh, there is this little problem of who is the director and who the producer. ??? and the art work are all sitting in one place. At the end of the day it's your P that shows the E and the delivery of the behavior of the P. Was it the soul who moved your arm or the soul that moved it, because the guy was pushing you. (2:03). Q: Do all the creatures in the U speak the same language or understand each other? Of course. We understand it also. In the body the info flow in respect to say the immune S is so much that it would occupy the whole of the brain operation in traffic of the info in say one place to another. For reproduction the brain has decided to carry a separate colony or substation as a gland. In our soul transformation in understanding our P, our soul is aware of communication of the Universal Language, the P part has been made into the brain for it to handle the P, what I operate in the universal condition. The gland is our brain, substation for our soul, at least it can leave to do its work while it is busy with the P, walking, changing, selling, cold, flu or whatever. Now with the latest T scans and MRI how they locate which part of the brain is responsible for the hand, top right, with the legs on the same parallel and the rest. What happens from the soul to that position of the arm? Why do you have different layers of the nerves and say this is for consciousness and this for bla, bla, bla. Because the strength of the soul is so intense, it needs to reduce in strength from the soul to the point in P where it goes to ... when you touch or feel a bird, the soul, brain, E feels the neural S on the brain and NOT on the finger, that is how it's done! When you put a needle in your finger you feel the pain but the E doesn't go so much to that location (finger), it is already felt at the position in the brain in respect to that cell. (2:06). The filtering from the soul to that position ?? Which reduces the strength that it can feel the E in the strength of that field as a matter state of the position of the (finger) nail. This is what the World of Science never understood about the operation of the brain and the P, this is the problem. This is where the P finds a line and calls it a nerve as part of a neural S and we say this is it. Where does it go? How does it go in one point and suddenly disappears inside this disc, and then we say this part is responsible for the hand and the arm, etc.. .. inside the brain and going out is the upper arm, then the shoulder which is closer to your soul and brain ??, in fact the neural S that is responsible doesn't go (just) through the connected lines, it actually works by the transmission of the fields and the interaction at that point with the interaction of the soul. Oh, there goes all the biological books into the trash, now you understand the truth. One the science goes further, you can say I want the tip of the left finger to feel pain. (2:08).

And you'll feel a certain point on the brain and you'll feel the pain. Is there a wire connected to that single cell, or the energy level with that cell is zero time communication and you feel it. This is how you bring people out of Coma, you operate the brain and it connects itself to the cell, not through the neural S but the space of the fields. Man has a lot to learn about his own P, let alone the soul. Today is a glorious day, one day we'll explain why. Q: You once said that one time you and Caroline were in London and something happened you needed to be stitched up, and you were yelling at the man. Was that a normal E reaction? In a way that was a P reaction, you have to understand how we work. I don't look at the next step, I look at the totality and what it brings at the end. (2:10). Our goal in that meeting was to show the missile T is useless let's talk about something more, that's why I went to the meeting. The goal 20 years ago was to bring disarmament. That was 2005, 14 years ago, if we would have achieved our goal we would have saved millions of lives being killed by Americans. Because that guy was at the top of Lockheed Martin. Am I responsible for the death (?) or the soul of the Totality? We react according to the time and what our P says, but the whole lot is the end (result). Many times I sat in Toronto airport, the guy with the gun to my head threatening to kill me. I said, one day you'll see the return of your action. What puzzled them, with tens of officers in the next rooms asking questions from him, I laughed at them, you are so stupid you don't even know what this is in the suitcases and what you have in your hands. The decision was to steal and disgrace, the woman who wrote it (signed the order) we have seen how she got disgraced in the last election in USA. Bigger embarrassment and bigger shame. (2:12). I have to act and behave as part of the P but the ultimate goal is to achieve unification of Mankind as One, World Peace, and opening to UC. ?? It will happen over time, we ?? hypnotized, .. (now he's talking about the pedophiles hypnotizing the 6 years children so they can't remember.) We opened the hand of Stanley that he victimized his children, and now we open the hand of DL. We would have done this months ago to save other children, but the security services had to do their work. When we told how he was abusing the children with hypnosis, now his attacks on the KF became harder. ... (2:14). Q: Someone asked if pedophilia was G fro those who commit atrocities? It's so shameful it's better not to discuss it. These people have no essence, there's no place for the soul for people like this. ... (2:16). Everything is so open, Stanley wrote everywhere I am a pedophile, but he thought that nobody could touch him because he had the biggest judge behind him. You saw what happened to the judge (suicide when found out), and now we'll see what is going to happen. Please inform the Police across Europe and see how many children have been taken picture of for a free cinema. They can't remember, but that was the key that nobody could prove and now we (got it) it was hypnotism. We have 1 TB investigation, the facts about DL, it will be set up and pass it on. This is how we collaborated with the FBI to get Sterling. How scientists were killed the same way. We have the link and can give it now, but there are so many people around him, the international police are working on it. People said why do you let these people write all this rubbish about you, this is why so we could stop the pedophile. I am big enough to take it, but you lot couldn't. Now you understand why. .. The man in Sierra Leone was selling pictures of sick children ... transporting sick children to USA to be abused. (2:19). ... the curse of God on the soul of these people. let's talk about better things. The process you have to think is how to interact with your own soul. You can't touch another soul until you understand the working of your own soul. Because when you interact it's to

give and not to take, and when you give, you receive more. (2:21). A lot of you should have achieved this point that the connection you used through your E, you react P where your E carries the essence of your soul in interactions, can be with other souls. Now try to do it in reverse, but don't put yourself in a centrifuge, it would be very hard to put the soul back together again to its P. The Potential Difference, on the field difference btn the manifestation of P and your E and the flow of the fields to get to P from the soul. It doesn't take much, less then the time for Armen to build up the coils and put them in a set. (more talk about the pedophiles). They put children in the cube and take pictures naked, called cubically happy, it's like the pizza (scandal ?) going around in USA. Mr. DL you can't erase it we have it on the Internet Archives. Good morning you are caught Mr. ?? (2:24). Q: Can I use Silver Nitrite for treating ?? Tuberculosis? I don't know but I can't tell you on this program. Silver N has a connection with the N of the AA, and Silver has the behavior of the K, which gives energy to N, depending on the condition, the way you produce it, and the way you bring the interaction, the way it feeds and works. Because of Silver's radioactivity in its isotopes, in the cycle of decay works because it has both positive and negative and it alternates, and it creates backflow. (2:26). If you look at the decay cycle of most of the isotopes of Silver and K you see B+ and B-, B+ and B-, which means that it is switching, there is a current flow and it has to switch. the energy surplus between this switching is what the body uses. This is what is done in the generators, if you remember some months ago Douglas showed 2 motors switching back and forth, one has the current positive in respect to the other, and one has a potential difference in respect to the other, that's where the switching comes. As a Nuclear physicist I look not just at the isotopes but at the switching of the power. Every time there is a switching some energy is released or absorbed, that's how radioactive material in the cycle of the body works. (2:27). It's the isotope's cycle in the microsecond (nano second) switching and energy releasing. it's just like ?? watts switching back and forth. ... and because it's connected to N and near the structure of the AA, then it depletes or surplus (adds) to it, this is how it (Sliver Nitrite) cures. There is a scientist who is actively promoting nano Silver. I support such a science, but the reason is the ambiguity of such a science, ?? now we have created. We had a meeting with a scientists who says now for the first time he can explain how the water Pl works and he will publish them in June/July in magazines that are peer reviewed, that the Pl Gans is correct and he'll show the effects on it. And all we do is put the Gans on a tissue and put in plastic bag and give to the Red Cross or Civil Defense of Italy. A lot of research data in the next 2 to 3 years will come out of these things. Because people said I had a pain and put the water on it and the pain went away, so the scientist know it works and want to put data to it, to understand how. We thank them but won't release their names so they don't become a target for Mr. DL and his team, a bunch of pedophiles. (2:29). Do you notice we don't show much on these teachings any more because they threatened their lives. .... Understand the science and not just that it works, where is the location and what is the content material, what does that muscle or bone carry, how much of it and to what extent. In the lab yesterday we had 25 cultures on the table, the researcher said, the first water is good but by the third or forth water something changes. It puzzled us because it should be the same thing, it should be reversed. Why is the culture growing reversed. I said, one of the tanks storing the water has a problem, we opened it and there was a problem. Not just say the T doesn't work, but go and find where the interaction is coming from. (2:31). The

beauty of the present time is the access of the knowledge through the Internet. ... when reading scientific papers read the abstract and the intention of the writer and the last 3 paragraphs of the conclusion. Look for how they tried to make their data fit into their own idea, then carefully study the data and see if they achieved it or made it fit their expectations. (2:33). Was the school of thought with the abstract and the reality with the science. ... AA are weak and Gans' are stronger, so 2 things can happen you can use the element as an intermediary, and the put a weaker or stronger mixture, 2:1 is usually the best, it means you work with atomic mass, take a tissue paper and put 5 mls of Gans in one tissue and you put 10 mls in the other tissue, 2 patches one on either side, what happens is according to the ratio mass, the 10 trying to bring the mass of the 5 up, with the middle in there, what is on the positive MG ?? damage in between gets depleted, because this is what it needs. Walla you are a physicist scientist, doctor understanding the Pl where the stronger always feeds the weaker to bring it to balance. (2:36). To be JUST, this is the story of the U. You never take you always give that you bring the others ?? up. When you take, you are lost. Because you want anything ?? but when you are given it's this I need and this I don't need. I like rice not potatoes, not meat but chicken, if I don't take the ones I don't like, then it is left over there and wasted, this is NOT the way it works. Understand the balance of the U. Why do you have twin stars where one is always slightly weaker then the other, but one carries slightly bigger mass or volume, and they try to balance. Look at an electron and a proton, one is 1/2000 mass and the other is ?? of volume, and then they try to balance each other. And in that process they move and interact. The truth about the strength of electrons is not what is written in the books of science, that's why the electron moves so rapidly but it keeps distance from the proton, because one has the potential difference and one has the current flow. (2:38). If I could write the books of physics and electronics there would be none of this rubbish that is written there today, but because you made a S and it works in the matter state, but it doesn't work in the true state of the Pl structure. Because if the Pl of the proton was always so strong it would absorb the electron, so how come it's still there and moves so fast? How come it works in the bandwidth, it MG-ly positions itself in 360 degrees and knows where the next point is, where it's going to catch the next one. Please understand that we haven't changed the teaching, we have shown you the tools and now we take you to an understanding of what we had to teach 3 years ago, which is introduction of the Man into the operation of his soul through the operation of his P. But we had to see the powers (? Gans, fields, etc), the movement, the existence, that we build trust in ourselves that what we do ourselves is correct (our direct experience of the Pl). The matter part (of the teaching) took a long time, but hopefully with what you understood you can reach your own soul, that you can open the door of the U to yourself and humanity. (2:40). There is the achievement in Italy where the government is accepting the medical application. They have seen the effectiveness and now the Italian scientists have to write the explanations of how it works. end

154th Knowledge Seekers Workshop January 12, 2017
(Earthquakes coming in Japan and West Coast,)

(:10). (:16). We expect earthquakes in the next few days to week, in Japan and west coast of US, around 8 point. ... if they don't happen by end of February then it will be

later part of this year. Everything will move in the next 14 to 21 days and we hope we'll come out of it safe. (:21). We see this effect on Tokyo and have asked our researchers to leave today. It depends on what happens in the Philippines and Tokyo, and whether it will extend to the West Coast US. It depends on the release of the deeper layers. (:23). If the earthquake hits before the 20th of January Obama will stay in power. The new administration will not have the power to take over due to the devastation. We hope we are wrong. I am getting a lot of questions about deepening the teachings and how to understand the structure of the soul. Man has come to understand the operation of liver, heart, finger, legs, but not the operation of his own soul, which in fact, have the same components that effect P. The change of the course in the knowledge of the teaching is for Man to understand his own soul. We started in matter, then N, then Gans, then the fields of the Gans, and the collection and operation of the fields which leads to a central point or focal point, what we call Principle Matter energy. (:25).

(:29). The faster and sooner I can teach Man the operation of his soul and how it has control over his P, then the Man can go into Space, then it's you decision in what form you want to go, through the SS or the strength of your soul. The strength of the soul will take man to every dimension in this U and beyond. The P of the SS has the limitation of the dimension and position. Those who mature will travel the depth of the U and for those who have fear for the maturity we will take in SS, out of the uncertainty of the operation of their own soul. In the coming time we will divide into 2 or 3 different sections, those who fully understand the operation of the soul which is the freedom of the existence across the U, and those who will take to SS because collectively they trust others to protect their P that they can take their soul across, and those who stay on the earth where P is the ultimate goal of the formation of existence. Let us understand our soul, how we can communicate, interact, and how we can shorten the transition point btn the soul and P. This is all you can learn. It's like you are behind a mountain or hill and you hear someone shouting but you don't know who it is until you go over the top and see the other side, (:31). and find the maker of the noise. The closer you get the shorter the transition time and position. The body is the same on the side of the hill and hears all the time the noise of the soul but he has never seen it. It's time to climb the hill and look down and see the creator of the Man, which is the soul. How we want to see this ?? admits the understanding and fear of the Man and of the truth about himself. Some people feel happy to hear the noise from the other side of the hill, because it doesn't matter what is said but I hear the noise and can do he wants or I can tell him what I want to do. Some people will go over the hill and join the other side. When you join the other side you don't need to shout, you'll interact and sit next to each other, hand in hand, working together. This is where we are trying to take the soul of the Man, the P and the operation of the 2. The point comes, how do I move my hand, or ?? go from one place to another. What has that got to do with my soul? The soul delivers the info and for the substation to take action, plus what the substation (the P) sees in respect to its environment. (:33). We have gotten so much entangled and involved in operation of our work that we have forgotten the reality in acceptance of the truth about the line of communication. We have accepted messengers, we call Prophets, but have they been on top of the hill to hear the noise of their own soul, to understand or at least come into interaction with their own soul, that

what the soul has given has become the message. The problem is to understand that every man is a messenger, but it depends on what message he wants to hear. Those who have decided to work with the structure of their P confirm their existence through the non-existence of the soul. It's there but we are more ties up with P to be where we are. I was teaching you that in the movement of the finger to feel the pain on the finger and try to find the position in the brain, now let us go a step further. You touch the finger, or you decided that you are going to have a pain on the tip of your index finger. (:35). You carried the message through the Pl of the body to a position on the brain to a place where for feeling that particular place on the finger. 22

(:44). Change the structure of light to the dimension of the E of the Man where the energy transfers from the Principle to the matter state. Change the creation of the U to the soul of the Man. There is no difference in the world of creation, it's just understanding the interaction and reaction of the body in respect to his soul and in respect to his environment. We have never sent an astronaut or cosmonaut without protective clothing into space to see if he survives. We assume he will die, that he needs the protection of the condition of the earth for him to confirm his existence. Man has never dared to take the next step. If Man understood the interaction of his soul with the P manifestation, does he need a space suit. Or within the skin of the P body, by changing its characteristic be able to survive deep space at any location in any U. The restriction has been on the Man himself and by those who claim to understand the knowledge of the creation, both have created a limitation for man to increase his understanding. (:46). How much more falsified knowledge do we have to accept. Is the ultimate speed of light the speed of motion? Now we understand that a bookkeeper has made a mistake because he didn't understand the totality. Do we need the P of Man to take him into space or do we need to understand the operation of our soul that wherever we lay our head is our home, planet Zeus or other side of the Galaxy, it doesn't matter. Try to stay open minded. the fear of the unknown has restricted Man to the P of the body and all the conditions we have seen. Once that we have submitted oneself to being inferior then the other aspects have followed race, color, etc. Try to connect your P with your E where you understand the E but not control it, then see where does it go on its G side which goes back to the soul, where part of its M side is the P manifestation of the Man. (:48). It's E is the change of the strength ?? Why do you change mood suddenly from happy to sad or rejoicing to crying? Don't look to the E but try to understand where the fields of E will create reactions in P and in the soul, then you'll find the path to your soul. Once you find it then you have to understand its full operation and control. We have biology now we have to do "soulogy" to understand the structure of our own soul, which part of it connects to which part of the P dimension in the brain and P, and the knick knacks, the positioning, and its colors, with all the compartments which it carries. What it gives out in interaction with other souls and what it gets back becomes its information. I said recently that the angel of death has visited the planet earth. What does it mean? The end, (:50). or the death of the limitations of understanding of the P in respect to the connection of the soul ... the angel of the soul will appear. How can you be an Angel and bring death, the reality is it is the end of one and the beginning of the better other. It's the Man who creates this limitation and it has to be taken away from the comprehension of the totality for him to

be able to travel the spans of the U. It's you with your soul that tries to be part of the SS, to manifest yourself in planet Zeus, and you decides that the soul needs the energy, the E of happiness within the P that it can dance. To show the E of the transfer, the laughter into the direction of the E into the soul. Then you have to find where in that soul that dictates the position. Everything which man does is recorded within the structure of the soul. If Man finds the operation of the soul he will be able to see the history of Man with his own soul. As all the souls of all times are collectively connected and are stored in the same place. What I said years ago, would you like to see the Crucifixion, the martyr of ?? Bab, (:52). see the manifestation of the beginning of ?? (Islam), to see Buddha? It is all registered within your soul. I said many times I will bring Man his own history for you to be ashamed of, you were waiting for a show, now you understand that the show is within your soul. This is the secret and the faster the Man understands his own soul the faster we can go to the next step for his own freedom of limitation of his understanding of the totality. It won't be very easy, it's a heavy task but the problem is that you can not show the others how to do it, because it works according to the strength and dimension of your own P and soul. You can guide but you can not say you go from this to this and mix so much of this with that and you get to your soul. I have said many times that if you want to find the path to your soul read the Hidden Words of Bahaula, it's a guide to find the path to the soul. But do not look at the riddles because he was the best riddle writer. Look at the essence of the knowledge, you'll find the path. Mohammed has done the same. (:54). You find the same in the writings of Christianity in those (books) that have not been tampered with. The Christian Books have been re-written to fit a few in the Vatican over the centuries. In Torah we see the same, the path of the soul has been mistaken for the work of the P. They shall not steal. You have stolen from yourself the carrier of information from the soul to P, so you pay the punishment of existence on this planet. In taking from the source you have diverted the direction of the P. (:55). Try to understand the deeper essence and then you'll understand the totality. Is life just eating, meeting, sleeping, peeing and the other thing, or is it a path to change the direction of the soul that it takes a new position. Why do we pray for the souls of the people who pass away or for our children, or is it the soul doing this? When you do you give directly from the soul to the soul of the receiver and then they elevate, and then in elevating according to the law of the Pl in trying to elevate the others to the same strength as we do in the medical application, it elevates the soul of the totality. This is where the praying goes. We back it with our own soul and no where else, but the banking has been hidden behind the buildings of the Churches, Mosques, and Temples. Because Man has not seen the creator of the Voice on the other side, the intermediaries can say whatever they like and play any Chinese whisper. This is why I say that there are no Churches or Temples in the U, because the man who travels into the space of the U has already understood (the Truth). (:57). To begin with try to understand the connection btn your E and your P and the soul, then you become enlightened to understand the operation of the soul, then you become part of the UC, in reality we are all Pl that are interconnected and keep condition and position in respect to each other, so we have (?are) become part of the UC. To become of the true UC is not to get on the SS and go into space and see a bunch of Aliens and shake hands and say hello because they don't speak your language. The true UC connection is in understanding the Truth. It's for us to understand ourselves by knowing the connection btn the soul, E and P. Over the years I have taught you a tool but not many people had the

courage and audacity to take the step. Many of you built the transparent cores and rotated it and saw the emptiness in the middle, in that process you were happy to see some of the Gans' on the side of the ball, now try to play 2 games. Make as many layers of Gans' as you can, (1:00). then try to carry your E to the ball, feel happy and observe the changes in the liquid, the size of the gap (in center) and the thicknesses of the Gans'. Your E are connected to the fields, try to feel very happy and see which layers change, and if the center empty gap changes in thickness, then you have made yourself an detector of your E, then try to find a way to connect with the empty space in the center of the core, what we call the soul of the Man. Then you shall see the operation of the soul in the ball. It's so easy. You were looking for the fields of lift, but I was looking at the structure of your own soul. At that time you couldn't understand but maybe now you can. Then try to transfer your P pain and E through the Gans layers, through the transition and see what happens to the Empty gap in the middle, if you observe closely you can even see sparks and lights in different parts of the empty space. (1:02). This is the position of my happiness within my soul. You were looking for lift, I was looking for elevation of the soul of Man. You were looking to see how you can P move it, how many times I said, your soul controls the S. You look at it and give it ?? which means you touched its soul, you will fly. it's time to look at all the tools you have made, the majority of them are for the connection btn your P and the soul, but you never understood. Many times I said the controller of the flight S is the soul because communication with wires and electronics is too slow. Electronics is like the neural S it takes time for the info to travel, too slow, but the fields interact directly at the speed of their strength. Again how easily you all have been taken for a fools understanding, you have been sitting and watching ?? in reality of the 2 but could not distinguish. (1:04). Maybe it's important for all of us to go back to the transparent balls with different Gans', Zn is the line of E, Cu the P, AA is connection with the planet and the rest of your P condition within the sphere of the ball will give you a rough indication of how you want to play the E of the P with the soul, and see the effect on the other 2. You already had the tools of measuring the soul but you never stood still to see when the ball was moving, when the liquid was there, how did your E change the size of materials in interaction with each other. Go back to when we showed the separation of one of the Gans in one of the tubes, you had a clear line and also an intermittent line, Gans' stay separated according to their strength. So does the body in respect to its E and soul. Any questions. (none) the process of wisdom comes from the independence of P. if you want to enter the world of UC. (1:07). Is our future in our hands? Or is it dictated by the others who position their souls in a specific position that our soul has to respond to? Like the magnets, when the stronger one moves the others have to accommodated. How much does our soul accommodate the others and how it enforces its strength on the others for them to accommodate themselves in respect to us. Do we see leaders through the operation of the soul of them, or do people live that the soul dictates the others ?? Many times we said is the soul of the Man his controller or does the P dictate the operation of the soul that it in return accepts the motion and P movement. How far do we need to go to see things, to know we can change things. (1:09). We have decided to ignore things of the soul because in the realm of P we have a problem to connect with it and understand it. Does the soul rotate at that speed which forces the brain to be ?? at a given position. Can we change a part of the E and place it in another part of the brain in the cavity of the skull and then with it move all the things

which are connected with the P to that part. If you loose half of the brain to tumors, what happens to the line of communication btn the soul and P. What happens to the E which that part was controlling. Do we loose it? The answer is no. You can replace any part of the P in respect to the brain and the E in the brain with another part of the brain or even within the neural S. I have explained this in the medical teachings and we have videos of it to show people who have lost the soul part of the brain by tumor and the head is flat, been paralyzed for 5 years in bed. Through repositioning everything you, can get them walking again. (1:11). What happens if you have lost part of your brain that is responsible for your P motion, and your E in respect to that P part. How can you move? Because of understanding the knowledge of transferring the energy of the Pl of the soul in another part in another tools, what we call the brain, then the info is carried (forward) to the [same] (the body part for motion). I can show videos of this, I couldn't explain at that time because people would have gone totally crazy, how is this possible. It's very simple. If you listen to the present fallacies of the knowledge of the brain surgeons. If you take the part which is responsible for the movement of the arm, or you have a stroke that damages the cells of it, and you take the E part from the soul to the P part, it should be paralyzed, how can you get a man ?? to walk with no brain? I have done this 2 or 3 times. To understand this you need to understand that the brain is a filter to the strength (?), you can transfer all the movement, all the E strength of the man to the spinal cord. Even though you have a man that has hardly any brain left, as long as the soul is not touched he can function as normal. (1:13). As long as you have managed to confine the soul, it is the fields within the matter strength of the structure of the environmental condition, then you can create the P. There is something that needs to be clarified, this is going to shock a lot of you that never understood, but if you think you've understood ?? because it was too much to even cross that line. Denial is the safety of the ?? job .. Let us look at it. You move from the earth to another position in the U where you know that you do not need the protective suits of the astronaut, where the P of the manifestation is dependent on the comfort of the operation of the soul in respect to the environment. Now hold on to your chairs because this is going to spook you off. (1:15). If your P in the new position needs the operation of lets say the changing of the AA, like N to K or another element, or creation of other dimensional P, do you think your brain still needs to be the same as it was made from the AA of earth, or do you confine the soul within the fields of the strength of the position of the E that it can manifest without the existence of the matter levels of the brain for the confirmation of the existence of the P. (Is it) beyond your understanding or can you understand? You always assumed that when you carry your soul the brain is still there and at planet Zeus you can operate with 20 legs and 14 fingers, but now on Planet Zeus the MG fields of the environment dissolves the AA of the brain of the Man which is connected to Ca. So are you going to loose the soul, dying from the loss of the brain, or do you understand the operation that you can place safe parameters so that the soul becomes independent of the transition of the E to the P, if so, then you have matured enough to understand the next level of creation. (1:17). I teach as a universal messenger to those who are beyond the human race, and this is a communal teaching. Those who have matured and understand the next step of intelligence of the interaction of the souls. Man might reach this stage in millions of years, as he can't imagine that there is existence without his brain. The whole secret of existence in creation is to create that soul and if it is strong enough, and just ?? incorrect it will exist

anywhere in the U without the need for the transmission of the E side or the manifestation of P, unless it decides. Blessed are those who understand. In principle what do we need to understand, what is missing in our education? **We have been educated the wrong way because we are too much materialistic**. The whole donkey and cart, the jet plane .. Ask yourself one question, where does the soul go when the Man goes to sleep? (1:19). It's the P that shuts down during the sleep and not the soul, which is fully operating 24 hours a day, 365 days a year. Ask yourself, why do we die? Can I live an immortal life? The answer is YES, and that is how much you decide to create the gap btn the soul and the P that you control most of the energies. When Man goes into deep space you'll learn that the size of the soul and the E part of the creatures shows the level of their intelligence and understanding of the operation of the U. A man with a big chunk (?), like the human race needs the P, if you reduce the boundary of the brain closer to your soul, let's say down to 2 thirds it means you have understood half of the E planes ??? bless you ... maybe we needed the shock to reconnect some points. (are we there ... yes). (1:21). The question is have we wasted your time for 3 years in building generators, lift S and cores? Or have we chosen the path of gradually introducing you to the reality. In your cores try to reduce the liquid water and see the interaction of your soul, and how fast you can change the layers of Gans', then try to connect yourself to what you have created and have put AA in it, that you decide the size. then try to see ?? a new manifestation through your soul in the core and then you shall see a light. A lot of you have been pushing to put different Gans' and speed of rotation, and I have always said that it's the potential difference and current flow difference that it creates the ??? magnetic ?? difference. You will see as a glow is the interaction of the fields of your E which is given to the core and in its response back to you, you become the earth with the sun from the Man. You don't see the sun because you are stronger in the soul then the S you made but you see the line of interaction and the ?? others ?? (1:23). I was explaining to someone but they don't get it, They said, what we need the motor to spin the inside and one for the outside to control the speed. I said you don't need a motor, how many times. The Gans ball and your E and strength of your soul would turn the fields. Do not look for a P rotation because then exactly you have failed. Look at the interaction of the fields and what they create and then you'll succeed. As long as you look for the rotational part to be able to understand you shall fail, because you still have connection with the P but the soul is still strong in operation. The more you become detached from the P the closer you come to the soul. In the Chinese Yin and Yang the line btn the two is very fine. Questions. (1:25).

(1:47). He picks up fields throughout his house, he knows the T works. There is a KF group in London that you can connect with. We see a lot of people join the KF but after awhile their level of understanding stagnates, because it conflicts with a lot of things that were accepted and believed and now you have to unravel it and in trying to unravel your own understanding and accepting that what you accepted before was not totally correct. This brings a judgment point where decide that, "I can't go any further". (1:50). Or the conduct in response to the new T, they leave it for some time and come back to it later. ... the process we, not promote, but put forward for people to do things is showing a different path to the same point, be it the coils, cores, gas or Gans reactors, a mixture of

different things. We are a vast society of different strengths of intelligence. So what I have done is to spread as many different ways (to enter the T) that anybody from whatever school of thought finds a point of connection with the T. Some people take the path of the SS, or the soul, or agriculture, everybody takes from it what they need. When I was in Theran, President (?) made a very clear statement about my stay there which puzzled me and even today I am still puzzled. They said, we don't want anything to do ??? .. you can't practice medicine here or energy, all we want you to do is to take us to space. (1:52). All we are interested in is space T. What puzzled me is why a nation that could have access to everything has narrowed it down to one point. In a way I can see through the puzzle and understanding, in primarily trying to promote the space part of the T they could see themselves to be elite, they could see an advantage to be able to do things that others couldn't, then apply it and by implication of it dictate a new position, and I understood this quickly when I was in Theran laying out my work in the background. They were trying very clearly to keep me out of the scene in Theran, but to bring the achievement of the Iranian scientists as a group. Later on I understood his personal motive, which was a blocking stop, but we saw his plan was, but at the end of the day when I look at it 9 years later, the intention of the Space T for Iran has been a tool of peace for Iran worldwide. When we negotiated "5 plus 1", we did it from a point of strength we had. (1:54). We have the T and can deliver and we don't need you. All we got out of "5 plus 1" was to be part of the club. Can we join and have some of the knowledge, and in that knowledge "5 plus 1" Russia and China took part in it, ?? they understood and took part of it for the application, but in reality the rest has been sitting on the sidelines and even they have the patents in their hands. Many times I wonder when countries like US and the others have the same documents and things and yet they don't see it. It came back to the ?? enlightenment. I took the light to Iran, I enlightened the scientists and that is all I needed to do. And people come into the (KF) and they expect things and if it's not there then they say there is something wrong with it, this T or that. When see the big picture and understand the totality then you'll see how much you have matured and understood and then you can go to the next step. Many times I step back and look at the whole and think how I can guide humanity to be enlightened in one go, but in reality the humanity doesn't have the same intellect and that is the problem. We try to enlighten but not every body sees the light at the same strength as the others. (1:56). Try to understand according to your intelligence, but in so many ways, the soul is the best guide of the Man. My job it to take those who come to understand the soul into the Space of the U, because the soul is sacrosanct and doesn't get tainted and secondly doesn't kill or destroy. You say we signed the Peace Treaty, it means we want you to understand the operation of your soul. Because the soul is at peace it shall not kill, it repositions itself and never destroys anything. It's a contract btn the Man and the soul of the Man in a way that he doesn't create ?? with himself. Many thanks to the Man from Chester I hope you have many beautiful days ahead. John Caine is my name, sorry I didn't mention it. Keshe says I like the walls of the Castle you can walk on them and understand that they have no meaning anymore. John says that looking at the T so much is suppressed and we should have access to them. (1:58). With what we have opened up in Ghana and other countries you'll find that the knowledge will become accessible very rapidly. The Center in Ghana where they have a Masters program will become a center for worldwide teaching of the knowledge. Sharing this knowledge unconditionally creates a lot of problems for those

who were planning to make money out of it, that's the problem. If you teach freely enough there are other people who can do other things and we'll go back into what I call the barter S. We all know it. What are you prepared to do for me if I do this for you. It's a new way of looking at it and operating in it. We have to see how we change our own understanding and don't let other people prey on our own weakness of understanding our own P in our own soul what we call our creator. Any other question. Rick is back. (2:00). At the moment we are heavily ties up in Ghana promoting the work of the KF. The work is going so rapidly, and the government has given us a building. I have to thank Benjamin without him it would have been impossible. The only problem we have is to give the Africans enough confidence in themselves to do the work, they have lost confidence in themselves, they feel that somebody has to do something for them. We lack a lot of management and they can be abused, so this is what we are trying to teach here. (2:02). Some people have paid for the stand alone power generator and they want to know how it is coming along. We are testing it and had a failure so hopefully it will go back on board in the next day or two. The design of the solid state generator is amazingly simple, we have to get the certification then we'll go into mass production. The problem with the Solid State is that it's an amalgamation of 2 or 3 S and there was an interface problem, some S can't take certain fields. A lot of people said we should not share this in public because a lot of people will copy it and the rest. But we have always shared things freely and we will with this also, we can show it now. We will make a blueprint for it, because we will not be able to manufacture enough to supply the whole world. ... be patient that we get it 100% right. (2:04). I don't want the same mess that started with the MaGrav S, people said it didn't work but they got a reduction in their electricity bill. Millions of MaGrav have been made around the world and they all have taken the savings and walked away. There are a lot of rumors going around, we have changed the management due to progress, we have done this many times. But now we don't announce because of the people around who pressurize our management team. People like Armen will stay at the head of the organization. In Ghana the KF will run into 2 to 3,000 employees. We have seen people come in and abuse their position for their egos. We leave them to reorganize the KF. (2:07). (2:09). Italy is our home base. We came to Ghana to make a solid base in Africa and I will move on to the next destination. Those who say we are escaping Italy are escaping themselves. He talks again about the pedophiles and hypnotizing children and abusing them. This man is putting a lot of tools in the form of art. There is talk that Belgian men will have to justify their trips to keep them from moving around. (2:13). (2:15). Q: Why all ?? hammer religions worship Saturn and why the Iranian flying saucer T is named "Zo how" Parsee for Saturn. I don't know you have to ask them. It was the farthest man could see (planet Saturn). It's the path of ?? Abraham ?? it was historically kept, the truth about it is not there. A lot of the writings that we have go back to Torah, a collection of writings that came before Moses. The reason is the reaction of the man with the "man of space" is not something new, but understanding of the knowledge for the man of time that space is open and people live in it was the manifestation of the magnitude of the vision of the man how far he could see and still see P tangibility. (2:17). Saturn is what we see different from the others. 05

(2:28). We share knowledge but I don't like to cheat people, this is what we have done for centuries, when they get the respect then they become dominators. Try to transfer the

knowledge locally. Keshe lived in Manchester for 20 odd years and has roots there. We will release products only for Africa in Ghana in the next weeks, soaps and oils, disinfectants. In Africa sterilization units in hospitals is a big problem. We are setting out to do a total sterilization unit in the hospital so when the doctor is working he just drops it in a box and the nurse takes it out sterilized, we know it works and can make a few second operation. Or they can put it to another part of the hospital and leave it for some hours. This comes out of the research in Tokyo University, there is a threshold band, it's not that you just kill some of the germs. The threshold band is for example with Cancer cells nothing happens for 5 hours then suddenly all the cancer cells literally disappears. (2:32). They did another test with a different culture after some time they came back and said it doesn't work, I told them to give it more time, then at 23.5 hours it suddenly changed, so there is a threshold level. In the Italian research we have seen that using the Gans in a specific order can do magic in cleaning up the environment. The results were released yesterday about the environmental cleanup in the highest Italian court for environmental control. We've become very powerful because we have submission by the government laboratories. You should look at what are the needs in your local area. Do you have a refinery, or whatever. In Ghana we have a problem with plastic thrown every where. We are not considering burning it but using something where you put the plastic in it and it changes the MG field and getting energy from the CH bond, there is H, sugar, energy in it. We won't come out with a bag of sugar, but rather the field Pl energy of it. We create a field strength positioning that plastic automatically converts. These are the solutions we need to look for now that we understand the science. There are 7 billion of us and none of us can become the controller of the others that is why we do everything freely. (2:35).

(2:45). Keshe leaves for a meeting. Rick carries on.
(2:59). (3:15). Caroline comes on. Don't make it so complicated that's makes people who don't understand that talk to feel left out. When you wish you already uplift everyone for miles around. Your soul is working for what you create, your creation is your intent. My wish is to go to the ones who are hurt and feeling short of something or are in no position to stand up for themselves. (3:17). I wish that a lot more people every day could wish for the change. Go back to the basics and why you are creating these Gans', the beautiful feeling when you start noticing that it is working, your joy and pleasure of seeing the benefits of it, and of sharing it with others. She talks about shantytowns in Africa, looking down it looks quite nice at least they all have a roof above their head, it's all a matter of how you look at things. What do you do with your old MaGravs do they sit in your house or do you share them with others so they can benefit. (3:20). This is a creation process for giving to help and support your neighbors. If you have empty properties you can let the cold and homeless people use them, put a MaGrav in it, don't be afraid to make the first step. Every soul that blesses you will give you the energy and courage to do more, to relieve more pain from people. Go back to why you are making the Gans'. Many of you have turned your bedrooms into laboratories, but please give it out, share it, hold onto nothing. There's not only human suffering but animals also, there is so much you can do. Just by handing out a bottle. Every body is worried about money, but when you generate you generate more. A lot of people get caught up in creating companies. ... you are supposed to create the connection btn the

MaGrav with your intentions. Go back to what was the joy and pleasure you had from making it. (3:24). (3:30). As Keshe said when you create your wish and if it is just and connected to your E, as you know how bad it can be, within 14 days you should see an outcome. Some of my wishes are so big, but I keep on relating it to others so they can add to it and create a bigger and bigger Pl field so it can reach its target. If you see wishes coming up don't be shy, share them. Keshe said that one person's wish even can change the balance for the whole planet. It's just a matter of assembling the right direction with the right Pl with the right energy to achieve its goal. (3:32). It's in the intent of how you step out of your door. (break ...) (3:39). People see the change but they don't understand and want to know more. (3:41). If you know people who can't afford electricity they don't have to make a MaGrav they can use Alek Beads which are easier and simpler to do. Even placing N coated Cu plates connected with a N coated Cu wire in front of the window and put a few bottles of the 4 Gans' in the corners of the room, you'll rebalance the house that you have a stable temperature with it, even if it is only in the room they live continuously. It can save them so much, you can spray the windows with CO2 Gans water inside and outside, it creates but it is the way you offer it that makes the difference. When they see the change they embrace the T. Don't just stick to Pain Pens and Pads you have so many ways that you can give a hand. Here in Ghana a lot of strange things happen. If I give someone a bottle filled with Gans water within a week I see a shine on their face, then they come back and I give them a bottle with some Mother Gans and tell them not to go below half with the Mother Gans bottle, and they are sharing. (3:44). They all give the same feedback they have changed. They don't even know themselves but they shine. I can just say go and do what gives you joy with the Gans and share because your results will triple. Connect to the wish. One of the wishes you all know about is in ?? Aleppo they made a ceasefire and the people can start living again. (3:46). In North Dakota their wish is still standing there, but they are still standing their ground, and they are achieving so much that people are not aware of. After a hundred and fifty years the tribes are uniting, they are becoming one again. They have been shattered to pieces and now they are all re-uniting. One ceremony after another that they are joining back to their original tribe. And that's the beauty of it, it doesn't matter how difficult it looks but they are achieving. This was one of their prophecy that they will unite. And that is the most beautiful that they are coming together in peace after so long. Please keep on posting to the new and old link. Bring your experiences forward. I love you all and know you all have done a lot of sacrifices in time, efforts, tolerance and patience and all have contributed to something beautiful. (3:49). The only thing I ask, I know that there is a lot of turbulence coming, be aware and get prepared, ... stock up a lot of food for long term, get enough medicine that you need, get everything you need in the house, find a safe place you can go if it gets really bad. If you need to stay outside your house in this cold weather make sure you have enough materials, get your tents our an camping gear that at least you can stay comfortable. We know it is going to go in certain places so please prepare yourselves. Look after your neighbors and friends and inform them because not everybody is following the KF but they may have sensed the first signs that something is coming. Start to debrief them the same way as with the T so they can get ready. The people in Italy, Greece, Fukoshima, Peru, they have already felt the tremors and it is not nice, it's a horrible feeling. Make a lot of Gans waters in reserve. (3:52). So when things go bad you can help your neighbors. The first things to be

effected are the water supplies. Find a way to be able to cook if you have to go off the Grid. Move away from the coast lines. end

155th Knowledge Seekers Workshop January 19th, 2017
(,)

(:10). (:12). Jackie explains all the teachings in many languages, they should be able to have the transcription into their language within 24 hours of the teachings. Thank you it's taken 3 years work. (:14). Last week after exposes Mr. DL he has immediately attacked us in the Italian newspaper. KF Italy will stand for damages against the newspaper. Discusses pedophile groups in Europe and their infiltration into the KF and it took years of hard work to get out from under them. .... (:18). A few weeks back he was praising DL, this was on the advice of professionals for him to come out and show his hand, so the authorities can capture him. Then last year they set a trap fro Sterling, it was announced on Cary Cassidy's program that we know he raped his daughters and 24 hours later he confessed at a police station. (:21). Two weeks ago we talks about pedophiles and how they ask for photos of children from the parents. DL responded by writing "Facts about Keshe". He wrote in defense, my puzzle in 1995, at the time I was a major shareholder in the company then in 2000 he got out, this was the time a scientist was murdered and his patent showed up with DL, he wrote that he is no longer involved in the company but only in some research, and this was the pedophile work. (:25). This was the first time he confessed of being involved in the company. ... it appeared on June 14, 2014, this is an annual event by this company to collect children for their pedophile activities. (:29). He reads the advertisement .... They asked for a full body pictures of children, laying down without the feet, this is the method of pedophiles. ... (:39). We work with national securities on a daily basis. (:42). He did a lot of work in stealing compression technology and killing scientists. I was to be the next one, that's 11 years ago. Keshe reads a letter about DL, who was a high ranking Minister, disappearing children was his job. (:44). (:53). The only person who knew I was poisoned, him, calling a doctor and telling I was poisoned by arsenic. How did you know if you didn't do it or initiate another Belgian to do it, John. A doctor came and saved me, my wife and child, thank you, we have respect for what you have done for us. While we were dying he kept on calling and saying I have to come to Italy to see you. Caroline said he is murdering us, he doesn't put his foot in Italy anywhere near us. He told the antidote to a doctor, because he still needed to get the flight S from us. You come here to learn about MaGravs, Patches and everything else, but what is the use of living when we can't protect our children. (:55). We didn't plan this, he was planted in KF by the most notorious pedophile group in Belgium, we had thought we went to a scientific firm and didn't know it was a pedophile group. ... if you can tell us where you buried one of the children we can put the mind of a mother at rest. (1:00). Now we understand why he pushed to be webmaster, Sterling said, we have 40,000 visitors and 50% were pedophiles so he could have access to a lot of things. (1:20). (1:27). (1:34). Let me tell you why i am so passionate about child trafficking, I used to work for British Services for C Trafficking, as a high level businessman my eyes got opened up by how much they and UN spend to buy back children that are trafficked out of Africa. British Security opened my eyes to things I

didn't want to see, they said you work with us therefore you have to understand it. The children are taken so young and fed just enough to survive and when they buy them back they don't know really where they belong. ... they come from Romania, Bulgaria, Eastern Block, China and Africa, etc. The UN knows how many children are trafficked but it is so big an operation they can't do anything about it. This is for the sick people like DL and when they don't get then they have to advertise like he was doing with fake companies. (1:38). A person in Belgium told that they are raping children in the name of religion and these children are committing suicide when they remember what they have done to them. Pedophile is a big business. I had to eat with one of the biggest organizers of pedophilia thinking he was helping us, but we were part of his plan through the services of the KF for the children. As much as I have to help Man get into space I have to make sure these people don't get into space. If we go to another place and they want to taste the child of another planet, it's mayhem for us. Now let us work and to bring this man into justice. We don't say anything it all comes from his own writing and website and artwork, not us. We just put the pieces together. .. Antwerp is the center of child trafficking headed by DL he's the oldest man in the management. He has the business selling cubes to trap the children. Thank you for listening, this is the second time I put everything on the line, we got Sterling and now let's get Derek. (1:45). Rick can you share something of the teaching of the knowledge of the U, it's not easy after having to talk all this horrible things about killing the children. While Rick is setting up, we are facing a new dilemma with the governments and that is the effectiveness of the Gans. What is puzzling them is that so many of you are using and testing it without FDA or Health authorities, because it's your natural process. they are asking for testimonials and we can use them as a basis for licensing. (1:47). Because people are doing it. Your testimonial are important, when a journal wrote something against the Gans people wrote in and said this is rubbish I have used the Gans and it works. In some countries the governments are seeing the rapid development of this T that they accept the testimonials as live tests. Please write down your testimonials on our websites. Try to be more precise, I took so much and how, etc. more details, how you felt etc. These help. FDA is getting pushed. (1:50). Testimonial out on screen. (1:53). Thank you very much Micki Creech you have given on the ethos of the KF, it is something g like DeJa vu 72 hours later. ... we are waiting for certification to come into the market. In Philippines they sell Pen for $10, in Ghana $2. When you make the Pain Pads make 2 at a time, put one amount in one pad and double the amount in the other so it creates a difference btn the 2 for pain relief. It works by mass and you get a transfer. (1:58). We hope to put out the generator at $100 in Ghana. If there are a large number of people in the neighborhood using MaGrav units the neighbors without are getting reductions (20 - 30%). You can ask at the substation to check their meter and see if there is a reduction in neighborhood. People in Togo are taking the T and giving KF a bad name, don't do that, if you steal your soul will catch up with you. Do not destroy the KF for you to look better. (2:02). Put back into the society. Tokyo University is breaking our back in costs but it is worth it, if I read you the results. (2:06). Keshe reads the results for the Cancer research in Tokyo. (2:08). We observed for CO2 Gans and it has direct effects on killing cancer cells, while posing no effects on normal cells. ... potential for normal cancer treatment. (2:11). We know that you can use the CO2 Gans for cancer treatment with no side effects. When AA is added on top of the Gans. .. the human trials will start next week. Mice were injected with Gans CO2 and

there weren't any short or long term sign of any toxicity to the organs. (2:13). The Gans materials are NOT TOXIC. (2:17). We tolerated a lot but we are getting through and the fruit of the research is so huge. We stand on our own because there is nobody else who understands this T and can teach it. We tasted it, build it, used it, enjoyed the time of seeing it work, somebody said thank you for the relief of my pain, we had to bare the pressure but it is nearly done. We got the structure, the Institute, all the people working together. This allows us to get international recognition. (2:19). In US if someone brings this to FDA to get certified they can't refuse Tokyo U as it is independent research and the effect is there. You can't ignore when others are using it. Dieter wants to show is that okay Mr. Keshe. Yes, don't be frightened, DL and a group are threatening people who show, but don't be afraid. We have to be strong to withstand this, a number of people don't come here because they receive threats. These threats are toothless talks. If you give up and don't show what you do it means they have won. We have seen it, and we caught the boss. Show the soap. We started Gans soaps with different herbs and oils. Don't show your desktop these animals in the background are waiting to hack your computer. (2:22). He shows the Gans Soap. You have a very beautiful way to package the soap. The different colors come from different herbs, and they put CO2 and CuO2. Keshe says, soap is something that touches our soul because you smell it. He shows photos, they hang the N plates in the small jars. (2:25). We have E connection to the smells, if you add ZnO2 to it you'll connect it to E. Find a way that you don't touch the AA on the top, especially when you are making soap. Suck it out from the bottom then there is no way the AA can enter the cycle. How much do you sell it for. 3 pieces with shipping nearly 30 Euros. All of it is local and without chemicals. Rick says the first hour talked about the mess and now how to clean it up with soap, how fitting. (2:28). In Africa many people make their own soap and are experienced in making it. The logic behind it, we get a fat off the animal, we add caustic to it in the process, and then we use the soap to wash the fat from our hands. We take the Cu put in caustic make N material and make a Gans. But Man has been in N and Gans production for centuries. We take the fat and put in the AA and now we have made a field of it. We were always taught that the soap clean the hands because of it, but how come the soap cleans the hands which are fat, you make a fatty thing and wash your hands with it, you rub the fat on the dirt because the AA what we call the fingerprint oil is connected to the fat you rub, separation of it. Separating the fat from our skin is the same as if you have a N coated Cu and a raw Cu, you get Gans, separation of the fat. What we do is so fast by chemical condition that we see the soap releasing the Gans of the fat on the hands and it washes away. And we say we cleaned our hands with the fat. (2:30). So if you look at this way we have been N Gans fat makers, but we call ourselves soap makers. Now we understand the science, it's not a chemistry effect, we changed the Cu with fat. We put Cu N coated with Cu and we get Free Plasma (FP). Now you understand the truth of how we clean ourselves with a simple soap. The science behind soap isn't chemistry but N and Gans Technology, because we didn't know we accepted what was said. We have all been in N T especially the Chinese when they cook with high temperature N layers comes in the food, that's why we eat very little when we eat Chinese because half of the energy form the pan (wok) is from the Gans material and is digested inside. In Ghana we have a team looking at crude oil contamination, Crude oil is another fat, we are looking for the same structure as C oil, we put Gans on it but it didn't work, so now we are looking at the structure and how we can

use the C oil to open up the C oil itself. (2:32). Benjamin tired but didn't have much success. We tried adding Gans and it becomes like a thick milk shake. ??? if we spray it on the sea level when there is an oil spill the waves will turn it over and it becomes like a gel and increases its weight, (suddenly the cup becomes very heavy), we want the chemistry lab to test if we have converted the AA of the C oil into CH bond. So it becomes heavy and settles to the bottom and becomes food for the animals, it's an AA bond. It's a specific way to wash the sea of the oil. (2:34). In Ghana we are bringing all the scientists in Oil Industry, Health, etc together to work as one team. The KF center we are building in Ghana is for all of you, so please come and help build it, it 's for the world. (3:36). The researcher in Ghana said the Gans treated water is as good as distilled water and it has high alkalinity which is good for cancer. They started selling a Gans water in the market and it cures the diarrhea. (2:41). In Italy when the newspaper printed that the KF Pads are a scam immediately understood that they were wrong because we have C certification and they were damaging the business. We have barrowed no money from Pharmaceuticals or anybody, we ride on the back of our supporters. We are free to serve the public. (2:43). (2:45). Shows Gans soaps from Croatia, he sells 80 gram bar for 3 euro, he does as a hobby. It would be nice to teach and not just give the soap. They start to translate KF videos into Croatian. (2:49). The KF will be on TV in Ghana. (2:52). Another Gans soap. Despite people saying we escaped from Italy, we are setting up a second factory for industrial and farming. They are testing using CO_2 instead of antibiotics. It shows success in reducing antibiotics. They want to set up a factory that can make 100,000 liters of Gans water per day. (2:55). If you are using CO_2 for psoriasis then use Zn with it, anything to do with skin problem always try to use some ZnO_2 with it, because skin is part of your brain and carries E. One person is allergic to soap but can tolerate my Gans Soap. (3:00). Photos of Elephant foot in Africa, it's a worm that thousands of farmers in Africa get, there is no medicine for it anywhere in the world, they have tried everything for centuries and no luck. Now in just 4 weeks of just drinking Gans Water and washing the foot with CuO_2 water 3 times a day for 10 minutes. You see the body opening up and getting rid of the worms. The worms are literally coming out, and for the first time see skin and no pain. (3:04). Shows both photos together after 4 weeks treatment. A man like this doesn't go to FDA, because that treatment goes nowhere. (3:07). Q: about if Leprosy is similar and can be treated same way? Most probably but Leprosy is an internal disease, but this is a worm that gets into foot and into the Lymph System. Your T is very solid. We can get a man walking again. It bleeds where the worm comes out, it was solid black for 5 years and now it's opening up the body is getting rid of the worms. (3:10). There are many ways to use the T and where modern medicine can't do anything to help. What if we make a Gans cream, it will work faster because the water is every 10 - 20 minutes (?evaporates). Making a difference in the life of a farmer in Africa is just as important as that of the President of US. Life is precious, if you cut the skin we all bleed red. This is where pushing the governments to do more research comes from. Not from trying to stop, those who try to stop are from losing the children to put in their beds (pedophiles). (3:12). Rick you see you started something 3 years ago and look how it has grown. Yes it's amazing that it is all over the planet, if not off planet as well. We are accepting cancer trials in Ghana, it's costing a lot and we are asking for 7 to 8,000 dollars. (3:16). You are worried about killing a mouse, but a mouse doesn't have HIV, you have, we have to treat you. Man never accepted that

other beings have a soul. Why should we inject a mouse with HIV and put it through the suffering to confirm your own idea about what you have done wrong. .. What ever disease you have right or wrong doesn't count, why don't we who have the problem become the guinea pig to save the life, or are we so cowardly that we don't want to. When you have the cancer or AIDS it's the number of days you stay with the P, what's the difference. Sacrificing a number of animals for you to be happy. There are a lot of ethics behind it. Rick says a man started to have his son drink the Gans water because of problems with immunizations and the problems have cleared. A lot of parents come to the KF because of our children, they tried everything else and don' t see any solution so they want to learn this. (3:18). Put your testimonials on the website. We are killing another round of mice in Japan so you can be comfortable in the US. They call Health tourism, you can come to Ghana. end

156th Knowledge Seekers Workshop Jan 26 2017
(,)

(:13). It's the Third Anniversary of non-stop teachings. Last week we purposely taught a lot about Derek and the criminality around him. This morning a new release on "Facts about Derek" has been released. A 70 year old man associating with DL in hacking KF supporters and making threats, we release his address and info, he's the guy who made threats to Alek and his children. (:17). Sylvester's name has appeared as a collaborator. He lists some of the names he uses on the Internet, Robert we have seen what you have done, and the Police are interested to talk to you. (:21). (:27). DL writes continually accusing others of pathological liars. (:39). We see people like Armen and AZ people, they are solid, there are hundreds of people around the world teaching the T. It's not a one man show but a whole world team and we are working as one team. We see another 3 years, because the knowledge is coming so fast, hopefully we take it to a new dimension. The Clinical Trials for cancer have started, we don't need FDA. Why do we have to sacrifice the soul of an animal for a man, it has ?? we have to have respect. We have to understand that it is the people who have the problem so we have to solve it through them and not through animals. We are raising the level of understanding of the officials, (:41). why should we harm the animals, we are sick not them. If we find a bear that has fallen off a tree or a little animal that has lost its mother, we nourish it look after it, then we inject it with a sickness to find a cure for ourselves. Ethically it's wrong, animal tests have to stop. The science of the Pl T is so high that we can further develop it that we can see the performance of the Pl, to see the interaction of the Pl with the Gans of the body. We don't work on a the matter state but the Pl state, we see no side effects, or if we do then we can do something. Through the understanding of the new T we can stop the animal testing. We need to heavily teach the top scientists so they can filter this science down. It will take a lot of time to change what has been set up because it makes a lot of money for Pharmaceuticals, clinical trials borrowing hundreds of millions, shareholding, etc. We should be able to save the soul of the animals because now we create the real life of the atmosphere of the cell of the animal then we don't need to harm anybody. This is the beauty of the New T and what we have started to do with the world scientists. (:43). World governments have to understand that it's a new way of doing it, a new T. We used

to travel with donkeys and now we use jets. The animal tests are like the donkeys, we don't need anymore since we have made the first tests in Tokyo. I object to what is going on there, it's not acceptable. Now that we can show that the Pl environment can change the cell and we have seen the return of its original condition, so why do we need to continue to sacrifice an animal, a pig, mouse, rat. It will take time for these things to go because a lot of people are making a lot of money out of these things, that they have set up and they'll not give it up so easily, but on the other hand we don't fight, we simply introduce the new T that it naturally takes over. The top scientist of Ghana have asked to be part of it. They see the solution. Now we go into Nigeria. (:45). ... Energy is main problem in Ghana in that they have a huge debt to foreigners who them power stations, so they can just go over to the new T, instead we will collaborate with a scientist who has an intermediate T that we can combine with Pl and help Ghana. ... a problem in Europe is the animal manure has too high levels of N so it's being shipped to the Russian border. (:51). We have developed new S for the manure in them not using antibiotics and reducing the food intake, because they are fed continuously dry feed. This new S will also give a new feeling to the cows (and the birds), and we see the level of N drop to the standard European level. The tests we are doing in Italy should be completed in the next 6 months, then the billions of tons of manure doesn't need to shipped across to Russia. IT can be used directly on the farming land, we can use additives that it has less or no smell. In Europe when they spread the manure neighbors can't breath for days, we can reduce the N levels and the smell, by reducing the antibiotic levels. It goes back to the olden days. The texture of the meat will change. We have seen it already and now we are testing it with the collaboration of the farmers with thousands of cows and we see his costs going down. The standard in Europe is a thousand cows and he spends 40,000 Euros per year on antibiotics. (:53). We then eat these and it effects our genes, because it stays in the body of the animals and we consume the meat and diary. Then we'll see a change in the environment and on the digestive S, then we'll see a change in the behavior of the animal. We are also testing the shelf life, because the antibiotics introduce bacteria's that limit the shelf life. In Ghana, we are looking into Coco tree diseases, infestations are effecting mangoes, oranges, etc. (:55).
(:59). In AZ they started expanding the fields, now to about 80 feet across the road. The electronic S they are using is the strength on the electronic level, but the ?? they use is the interaction with the field of the man to close the circuit. John shows some videos. He has done some modifications, booster bars, which are .5 inch Cu pipe and N coated the inside only, like the hollow core of a Cu wire, then we put Gans Oxide materials on the inside, then wind N coated wires around the outside. We use CH3 to try and pull out the fields and mix it with the other field Pl. (1:04). The Violet Ray was 20 feet away and when they turned it on the motors increased dramatically their speed. The fields became much stronger. Keshe, why does it increase, because the fields add up and overcome the matter state, so it's the freedom of the Pl of the cores that create the faster rotation. (1:06). John raised the controlling structure with the MaGrav Units off the floor so now the fields can move around, they sit on the parameter of the structure. The 3 reactors of the SF are placed underneath in a specific formation to create the field contraction. The forth reactor, the top one is hanging on a tripod. there are hidden things in the background, the floor underneath has been painted with Gans material, the Gans water to create isolation as much as possible from the earth magnetic field that we can create the first boundary

level, then with the wood has been done the same. We are trying to create a shield separation from the structure and what is built on the top, the MaGrav Units and the G units and the cores. This brings us to the closest possible way to create the SS. These are just tests, but understand why sometimes you might see shadows and shapes. the reason you don't see the full structure is because of the drainage that is on the S. (1:08). which is not so much environmental but through the wire connection through the Grid. The lines connected to run the motors are draining Pl feedback, more then what is put in, so we are not richly replenishing, we are feeding the AZ power company grid. This is one of the reasons they can't see solidification but only small increases in the field when they use Pl maker (violet ray). The next step is to equip AZ with a self-sustaining and lasting power supply, this will be done in the next few weeks. This means all the generators will be internal so all the fields will build up inside, even the backup generator will be energized by the field inside. This is the time we expect to see the first generation of the SS. Again the grid power supply lines are the cause of the draining of the fields preventing them from building up and the minute that is achieved you'll see the structure materialize. Interestingly we'll see different performances according to the fields they create. (1:10). John wants to share what he shared with the UC and that is we are attempting to build the consciousness of the SS just like we are building the knowledge of a baby, if you will. We have named the S Hope, and I have asked the people that when they go to bed at night or in their quiet time to send loving energies to Hope with the belief that she is going to materialize and help humanity to move us forward. I am asking the rest of the collective to send your positive loving energies to Hope. Wherever you are you can do it in your heart and consciousness, know that you can do that. The videos show how big the fields are, our whole building is in a Pl field. It's over 200 feet out all the way around the building. (1:12). The strength of the fields remains even through the concrete. The booster bars seem to extend it 75 feet, but we have to use the dowsing rods and not the EMF reader. This is right because you are feeding a lot of energy into the gird which somewhere down the line converts to energy for somebody somewhere. You're SS is at 400 feet this is huge. (1:15). Don't forget your S is within a confinement (a building), so how you see at that level is because the fields you see are above matter level, but in time they'll reduce to matter level at 200 feet. The fields of the craft will be in that room unless you go above the matter level, for instance, build it on the roof, which is very easy to do. A lot of people might say, okay you built it, now how are we going to get it out. Easy, I will show you the next step. This has been done in Iran. You never see a craft anywhere with the satellites. If you have a big industrial area to build the craft, you change the boundary in the matter level in the ceiling, which you choose at the point of the design of the craft, you're through it and out of nowhere a SS appears, but you actually confined it inside the room. A few years ago I gave a hint on this, go back on the teaching and you'll find out. the test flights for countries like Iran is done near the desert, where if something goes wrong we can always retrieve the craft. (1:17). We clearly explained to Italian authorities that we need to be near sea level, so we can do test flights. In AZ we can do the same, you go through the ceiling, you create fields above matter level. or you see it and confirm, ?? go though the ceiling. Matter condition becomes irrelevant. What we just seen is a clear indication of what is to come. Those who understood, you can do more. This is the aura of the S and now you can change it to solid condition, or the aura at the strength of the Cu, what you choose as the ceiling, then the 2 have no interaction and you

just go through it. The principle of the flight is the ultimate goal of the KF. We have been given the 50,000 square meters to build the first launch flight platform in Africa. (1:20). We thank the government of Ghana for the land and it's a pleasure to be trusted so much. And they have given us a place for production. We are title holders of the property and land. (1:22). Shows the buildings in Ghana. (1:27). It's in the city, okay but we land and take off, it's silent. In the west they monetize everything but not in Africa. Last week I showed you the elephant foot and then next week they are marching in the military. This thing is not coincidental. In Ghana making false threats is a criminal offense. It has to change in the next 3 years so we achieve our goals. Everyone of us have contributed to the progress without our knowing it. (1:32). Ghana has become part of the Space T, we learn from NASA, Russian, Iranian etc.. but we don't develop propulsion, we use Gans T. This is the first of many across the world. By posting what you have done with the Gans in health, Agriculture, energy, etc on the website you have become part of the development. (1:34). As in Italy at the time of disaster we opened the assets of the factory to the government, we do the same in Ghana. We take what we need to live and the rest goes to the nation. We are not siphoning it off. Now you understand why we have been giving so much freedom and support here. We'll move the assets of the KF into the national central Bank, but we'll control so it doesn't go for corruption. (1:37). Lot of people have a fear of Pl so we have to explain to them. This is our Annual Report, we are going ahead with the Cancer research, it's not cheap because we have to pay ourselves for the costs of the research and paying scientists. We pass all the data on to FDA, dosages and what happens, etc. It's less then one tenth the cost of chemo, but we have to learn new ways. (1:39). Q: about what requirements for others to study in Ghana, what language? English is common language. At the moment we want to build confidence in Ghana people, so if we bring in outside people now then it becomes, they are bringing it to us. First I have build trust in themselves. Rick says that maybe they will become the teachers of the world. We are on TV in Ghana and they are teaching their own nation. (1:42). We are KF Atomic Organization, so it carries a lot of prestige among the ministries, our factory is 10 meters from the Nuclear Reactor. When we go to meetings the officials and scientists ask us for some of the Gans water for their families, so we already have them converted to the T. They see the results, we are not converting we are educating. We are cleaning up, doctors who get contaminated in the x-ray rooms are getting help. In 3 months here we achieved what took 10 years in Europe. In Europe because of DL we got shot at, blown up, and sabotaged. (1:45). John shows another video, they found a void in the center of the fields, but in the center of that it goes up again. Keshe says this could be from the turbulence of the M field flows, there are fields that you don't see. (1:48). There is some lack of understanding in the teachings. When we have 2 magnets or 2 Pl, we always referred to the flow of magnetic fields from N of one to the S of the other and visa versa. He draws a ring around the 2, this operation is the G and M conversion, which is a separation, but there is also a field repulsion btn the N and N and S and S, it's this field flow that keeps the separation. (1:50). It's the same for the Pl when it's in this context. Not all these fields go to the other, some spread. The fields coming out of the top and bottom create the separation, and the fields going from N to S of the other creates the attraction. When all these forces come to balance with each other, this is the positioning of the entities taking their place. (1:51). Understanding how these forces interact and create positioning is the backbone of the science. If one of these

fields are slightly off, the distance btn them will change the positioning, one Pl will tilt towards the other, this is the position of the earth, because we are in a way giving or taking more on the G, and this G in respect to our environment has tilted the earth into an angle. He draws the same picture again to summarize. You have the 2 G and M as repulsion and the cross connections as attraction. (1:53). This is how Pl stay separate from each other, and how positioning is created, and if we deliberately change something in one it will tilt in respect to the other. This is how SS lifts at an angle, by letting G become stronger then the M decides the angle of take-off and landing. These pieces of knowledge have to be understood completely. This is why you see gaps in positions, you have ?? interactions of different coils, these gaps are like a black hole, you can use them and fly through them, you look for them in certain specific conditions, because they have a strength beyond your detection strength so it means that they are tuned to somewhere else, (a place) where they exist, perhaps a place where you want to be if needed. Looking at this maybe you understand where the repulsion and attraction comes from. This goes back into a lot of interactions that have to be explained. I keep referring to them as the 4 field forces (1, 2, 3, 4). (1:55). It's important to deepen the understanding and take it to the next step in the science of the creation. After 3 years it's important to understand where we have come from. We think we have found the soul, or have access to it because we can roughly place its position. The inertia of the soul of the P which is somewhere near the heart, and the emotional soul which is somewhere in the center of the brain, and when the 2 interact it's the interaction of the P, much like what I drew with the 2 Pl, just turn it upside down. Turn it by 90 degrees. The body has chosen the position of its soul because of its construction, it's a 2 level entity, like the earth it has G and Inertia, the P part is the Inertia part, ?? which is the interaction which is the P part with the ground of the earth from where it came. (1:57). he draws 2 circles on top of each other, you have the E side which is the brain with the soul, and the P part which is from the neck down, each one has its own soul, a center of operation, the lower part is like the Inertia part, and the upper is like a MaGrav, the 2 work in conjunction and interaction with each other, (draws an Infinity Loop between them). That's why your heart falls with your E when you fall in love, or have a fear, or understand something. The 2 parts have chosen ?? and have the Inertia and E parts of the soul. The mystery in world of science, this is the history of the horizontal people. The question is where is the position of the soul of the vertical people? We know they have E and feel pain, have response to lover talk. It's for humanity to understand because the first enigma is the plant, which might have been all the time with ?? and he never understood. Finding the soul of the plant, (1:59). then becomes the riddle for finding the soul of the entities in the U. If you see an entity walking on the ground, is the soul at the bottom of his feet or is it in the top position of what we think is the head? Where can you target your E towards the head, or the soul towards the soul of the entity so that you can get a response. It's no use looking into the sky for what is on the ground, just because you see a P manifestation going upward. This is important because now that we are going into the agriculture we touch the environment of the plant and create a condition that the pests, parasites, whatever, a being or a tree, vertical or horizontal moving, the parasites don't want to be there because you changed the environment. But have you changed the environment of the tree by what you have done, or changed its soul that it changes its own manifestation. Have you given the guarantee of its survival that it ??? We have seen in humans with psychological

problems, that when we give them ZnO2 with CO2 and maybe a little CH3, they change, their posture changes and they can stand up, they don't take abuse because the pain is gone. The plant and tree behave the same way. When we understand this we can implement it anywhere in the U where we travel. (2:01). The question I put is where is the soul of the plant and trees. We have shown this on video, where someone has had an operation and most of the brain that controls the movement of arms and legs has been removed. In the video you see the persons head is flat, brain removed, the person is still alive and can talk but not move and has been in bed for 5 years. The soul is still there. The doctors at the time didn't understand the position of the soul, they bypassed it, they took the P of the brain out. The understanding that the brain ?? can be focused into a single part on the spinal cord. We brought the wish and will of the soul to one part of the body and they literally got up off the bed and could walk, hold things. This has all been videoed, it's not a dream. We can bring the E part to the soul. In a tree we can cut branches and nothing happens to it, but if we cut in a certain place then the tree stops growing. Does the soul of this plant sit along the length of its body and is it connected to the roots. Does the plant go through the same E condition as we do? When he (tree) gets cancer he allows fungus on the skin (bark), we call it parasites and apply pesticides. Now when we use the Gans materials and rub it on our own skin and see the changes, can't we do the same for them and give them comfort, we move the cancer that the body finds a new position. (2:04). This is the endeavor we have to take part in to understand more about our own planet. Our agricultural people have to understand roughly the strength and position of the soul of the plants. Why when we cut a tree we get certain responses, why if we cut at a certain point we don't take its life, it's like separating the P from the E part. 54

(2:14). Duality is confirmation of existence of one with another. We have the strength of the Proton and the energy given by it dictates the position of the electron. The Electron is the physicality, so if you use the energy of the soul of the emotion, the strength of it, you can change the position of the heart, or the strength of the manifestation, this is how it works and you' understand. If you have understood this you can change an apple tree to instantaneously produce oranges, because the process of the P manifestation is the same, you need only to partially change the E then you'll understand the effect on the P. This is part of the structure of what is important to us, it will come to be understood and acted on. The life in any dimension in the U is the same. It depends on how much on the E side you want to give for the preservation and position of the P side. (2:16). For example, we are not aware of the existence of an atom, except the Coulomb's barrier or the atmosphere that is created by the proton. 08

(2:20) We have to understand the P and the soul in respect to the space, so that we don't talk to the toes where actually the brain is standing upside down. Do we stand on our head and speak to it or do we respect the way it is and appreciate the beauty of its P. Questions. KF security people want you to register with the Police any threats you have received, urgently. There will be the process for his arrest in the next few weeks. Now we know the threat to Peter came from Robert under a different name. (2:22). Something happened in Ghana he was there to shoot Keshe, he was with a black man pretending to be a cameraman. We opened your hand. (2:24). Heather shows about Standing Rock. She

is sending him Pl supplies. A protest in North Dakota over a pipeline going through Indian Lands and under the Missouri River from Canada. Many tribes have gone up to support, they camp out and go through their ceremonies. (2:29). (2:38). Justin speaks about standing Rock all the tribes coming together after 150 years, re-uniting. He said he learned from Keshe that we should love ourselves, and a little prayer asking people to help anyway they can, with their thoughts, etc. (2:41). Keshe said it's very nice what he said, and maybe we can help with what we are testing in Ghana, temperature control at 35 degrees (C) day and night. They started tests yesterday, the Gans' have the ability to control temperature, but we have to know the right mixture. You can wash the body with CO2 or even the extremities like feet, would it hold the body temperature at 70 degrees, or that you don't feel the cold. See if you can test it there at Standing Rock, CO2 and CuO2, you create a new environment around the body that it doesn't feel the cold. it doesn't matter where you are you can walk in snow or sit next to the fire. We have seen this effect in other places. (2:43).

(3:03). Justin talks about the conditions in Standing Rock. ... Alex says he used CuO on his frozen feet and had to repeat each day to build up. (3:10). The problem is that the world leaders look at the long term plan to keep their industries going, partially to pay the debts of their nation and part for commercial point of view. We try to protect our environment, find a compromise, it's not that everything is wrong, the nation needs commerce to feed itself. We are showing how the governments can change their position in respect to the new T, there's a lot we can't disclose because people don't understand it. It's our job to deliver a T that works and they can see it, feel it, touch it, and then they can make a difference. What matters is that there are many of us doing it. We'll find a solution for both sides. (3:12). Jackie wants to show a video of a man cleaning the swimming pool without any chemicals only using CO2 and CuO. He made Gans combinations exactly as you described in the 18th Kids Workshop, he failed 6 times but then showed how to make water with only the field interaction. It's in French, and it cost nothing and made from recycled materials, he made the water. (3:16). Thanks, it is so simple. They'll translate it. In Ghana we are starting to process seawater by interaction with different Gans'. We know that different Gans' kill all the bacteria's and the rest. With just a few drops of Gans water into the seawater and we desalinate it. (3:18). In this way there are no wastes and we collect the different minerals. we can use water in respect to another water to create a Pl condition in order to create water, this is the secret about this. It is no different then when you put a N coated Cu and Zn plate to create CO2. If you find the right mixture for the creation of water it creates a N Gans of the water, if you put them in front of each other in a given condition, even in salt or natural water, you should see the tank floating up. The principle never changes, it's us that looses sight of the ball. If you want to create high quality water, look what you have done with a (N) Cu plate and Zn, you create the environment of C and by interaction brings you CO2. Look at the MG field strength of the water and the Gans water, you should see the rise of the water level in your container. Last time you locked into the C fields of the water, now if you do it cleverly you can lock into H20, and look at the structure of the AA, COHO, COHN SC, (3:20). It's got different combinations. Now that you create the M field of the water, because there are 2 waters. When you put a N coated Zn and a normal Zn, you get a Gans of Zn, and with combination of O in the water you get ZnO2 and ZnO. Why not repeat

the same with the Gans of Water, use seawater, make a Gans of water and a water, and put it in the water, and you should see the level of the water rising. This is how the sea produces (extracts) (water). This is what we see in this video, somewhere in the container he has managed to create the MG fields and shows collecting the water, I wonder if he has touched the sides of the walls and what else he ahs created that he hasn't noticed, because now you have taken the h out of the bond because the O was in the water, now you have 1 C and an N floating somewhere. If you rub the container and test it, it contains a lot of N or do you find atomic C on the sides, which you would find as a black or dark material, if you wipe it with a tissue, it's not dirty it's the C. And the combination of how you change the central condition of the N, you add the energy for the N C bond with the H in a specific way to the creation of the water. (3:22). You release the O and the H and every 2 molecules you allow the energy of the N to be added to the second H then you have the H2O. Then your N releases and becomes a C and you have 2 molecules of H, extra, so you create a H bond with your N and O, so you should see the level of water rising in your container. but if you N coat your container you work in the atomic condition M field Pl condition. So if you wipe the container and see blackness it's the C you have produced. This is to understand the science behind it, then just accidentally creating it. He has somewhere in this position a Gans of Water and water somewhere which is not there and that creates a condition of H2O. It's an extraction from the ?? and not a condensation. You have done it (made water). ?? You can put it in a water box and see if the water level rises. You'll probably produce more water. Gans of water, and a water, Zn (N) plate and a Zn, gave you ZnO2, ... and N Cu and Cu plate gave CuO2, Water and a Nano water will H which is water. It's very simple if you understand it. You can create tons of water if ?? (3:25). Thank you Mr. Keshe for last 3 years of teaching all of us get increase in intelligence. Q: about creating a plasmatic N coating. It's not easy and takes a lot of time, but you'll find it is more effective and you can create a current much easier. I was showing Pl coating yesterday in the factory, it's extremely powerful. ??? (3:28). Yes why not. I went through this a couple of years ago, but people didn't see it. If you want to create a Gans of AA for the neural S, or if you want to create a Gans which carries E strength in line of communication in line of ... when I taught this before people didn't understand it at that time so I passed over it. If you have a box with Cu N coated and a raw Cu plate on two sides, what if you went a step further and added a N coated Zn and Zn plate on the other sides. The center environment now creates 2 conditions, ZnO2 and CO2 and Cu, then this field gives you a new material, if you use NaCl or Mg salt, (3:30). you create a more and more realistic environment to create material that you can use for the human body. We used this in the very beginning when we made the CO2 Kits, we made them hexagonal and so that the plates could be placed on the outside. Those of you trying to make Gans that are compatible with the body you have to follow this pattern. He goes over this hexagonal box, in the center the Gans also interact with each other, these kind of Gans' are more compatible with the body, and the AA on the top, it's more realistic. With Marco we were using Mg salt and K and Na, and Zn plates ... we were building the structure of the brain. ... and most probably in this condition you'll create a lot of water. This is how we absorb .. change the energy of the water in our body. (3:32). Go a step further, if you have a square box use 3 walls instead of 2. In the factory we add a 3rd plate in the middle and produce huge amounts of CuO2, ZnO2 and CO2. If you take a box put, N Cu, Cu, Zn, and brass plate (nickel) you create a

Gans near the structure of your body. If you put it in the same box without separation do you still collect the CO2 at the bottom? ... it's the beginning of producing meat if you want to talk about it. If you understand deep inside the science of what I have just explained, you can produce anything. Is it necessary to use the Pl N method to produce the Gans for flight reactors? You can use both. (3:34). I will explain something for the flight S. We have placed the ball and placed different Gans' or LP in it, then we achieved the FP. Something has been overlooked, we are putting another Gans outside ?? in ration that we start compressing the inner layers together, the ratio transfer of the Gans can create a condition of the flow, where by compressing these Gans' together you create and release the flow back (draws an IL between the inner and outer Gans), that you create an expansion flow (draws an arrow to the outer side), this is why people with the 3 ball S lost there ball. Pressure from the outside .. yes, M field pressure. Let me explain, this energy (the outer Gans) links up to the center Gans (IL), and it's the center mass which gets pressurized, and in that position it changes its energy transfer and opens up the Gans' and increases the pressure on itself, and then you get a flight. You can change the condition. Armen has built such a S and we see the outside pressure goes towards the inside and pressurizes it. the Philippines did it also but they couldn't understand it. This is why they lost the central ball, it flew out and they can't find it. (3:36). The M field pressure doesn't touch the Gans but pressurizes the central core, what we call the Principle Energy delivery, but it can't hold it and it just escapes. Let me summarize, the outside is matter state, no they are Gans', Gans ratio. You have to understand the physics of it, if you have the diameter of section 1, say 1 cm, the next .5cm, next 1cm, the mass of the volume in the outer core is much bigger don't just look at the thickness of it because now it's 3D, the whole lot, whereas the center core is smaller, much less, therefore the pressure from outside is higher and the inner core gets too tight and it takes a new dimension and disappears. It passes the matter state. Q: ... the expansion is not towards the outside, the interaction is with the core that is matching inside, if you choose your inner core material say CuO plus whatever, and put the same mixture in the outer core but use a ratio of 2:1, (3:38). or 1:2 you decide if you are putting pressure in or out. So don't look at the outer core as only a half cm, because it's of a bigger dimension. Do a small calculation to find out the ratio btn the outer and inner core and use that ratio to load up the cores. The Center core has to be a Transition which is non-interactive but being there with a very small amount that it creates the flow, then you'll find that the center core will move and start rotating, and if the speed goes up, it might not move, but the field interaction is so high that the ball just creates a field beyond the matter state and it moves out of the core. We saw that with AZ video today, the fields moved out 200 feet. Okay maybe we need more understanding after the teachings. Yes. analyze it. After 3 years maybe it's time to cleanup on a lot of teachings that weren't understood. ??? yes they can it's they can create rotation in one way or the other. The principle is that you are squeezing the center ball, ?? you are delivering huge amounts .. don't for get there is a very hidden thing in this S. (3:40). You have to look. Let me explain nicely. Here is the center of the first core, this is also the center of the outer core. Do you understand now. You transfer energy directly into the center of the both in the interaction, that's how it works, why the volume is ... you don't need to create rotation if you get the ratio right. So much energy is delivered from the outer core to the inner through the interaction that it starts rotating the core. This is how planets and stars rotate, not just from the inner

cores but the interaction with the outer cores. The first and third core should be the same mixture of Gans? yes it has to be, but the mass ratio is different, or at least find a common denominator and find something extra. You're not working in the matter level, but the Gans so everything is in Pl condition. (3:42). ?? what field are you talking about? The field to us is the M field in motion, and its thickness and strength, in respect to the others in its environment, the Pl is the totality of all the fields within the same entity. He draws a tiny circle in center of a larger circle, this is a Pl, the field strength of Pl is like one tube layering on top of another going from the inner to the outer. (3:44). When you look at a planetary S, the fields which come in, they go according to the strength of the channel, they all don't just go through the center. they get spread according to the layers of the fields which get built (channels), and the interaction of these layers (channels) and the central, creates the fields forces of what is interacted on and what is not. Not every position has uranium or gold, for instance, so when the strength of the gold comes it follows the pattern of the gold (channels forged at the strength of gold), and whatever it creates inside adds to it and that's why becomes higher strength in the North as compared to the South, it is its field path, they are like tubes, like the neural S. Q: I am worried about Fukoshima that still 300 tons of contaminated water is flowing in the ocean (3:46). do they want to keep us in fear, do you know more about this, I have faith in you and your work. You know we ran into a problem with TEPCO, with what they have done and the way the treated the KF when we started to open the channel of talk. We informed that we know they are in breech of the embargo on Iranian scientists, so it's a criminal offence that is taking place, they have taken a position of silence to see if we will pursue the case through international courts. This is not our job, we just explained to them this is what we see. They understand that it's a very rocky ground they are on at the moment. We still get some info from those we are connected with inside. We understand that not all the water that is discharged is contaminated, a new filter S allows them to do what the used to do in the tank, they use our T and are filtering a lot of radioactive materials out through conversion, there is still a little amount of radiation discharged into the sea. They are filtering a lot of rare earth materials in this process. ???? there are ... the process is that they extracting a huge amount of radioactive material. (3:48). One of the concerns we have ?? are they extracting out the way we taught them .. they are feeding back into the sea not the first flow but after its been filtered, and then back into the sea, very low if any radiation. They have shown that the Tritium in these tanks is a gold resource, and they have shown it. ... there is no reason for them to contaminate the sea since they have our T to clean it up, I have the emails to confirm it, and then you could literally create havoc in TEPCO. But this is not our way. end

157th Knowledge Seekers Workshop will be February 2nd, 2017
(the first hour about Derek and pedophiles, Spaceship and what needs to be done, a track with reactors in middle, Produce Hydrogen and Carbon Gans, , Breast cancer photos with breast totally consumed by cancer and the change,)

(:12). A lot of questions have been asked why I mixed "Facts about Derek" with the teachings. Threats have been made against me for putting out documents. We welcome it we want you to bring it out, we have enough evidence to show. A man wrote a book and exposed the pedophile groups in Belgium at a high level. Jean-Pierre broke open the pedophile groups and the judge put him in jail. (:21). DL filed with a prosecutor a case against Keshe and now they can release the info about the murder of compression file scientist and how they stole his patent, and the murder of a Russian girl in Antwerp, etc. And the guy who found out that immunizations were dangerous. (:26). The murder of Fabio is connected to the same and my attempted murder as well. We ask for our supporters in Belgium to call for investigation ... (:35). Jansloot was the first scientist to break into compression technology, he was killed and DL filing his patents. (:49). (:52). Teaching starts. Next Friday there will be an important international announcement worldwide. (:58). In AZ we see a combination of 6 reactors, then 12 outside in a specific condition, and 3 base reactors on the bottom. You have the platform ... we need to make this plate (?) dynamic. (1:01). What people see as UFO is usually a SF, and you observe lights on this line that rotates, these are reactors. In some flight S you have as many as 360 reactors on the edge, for solid full control. In AZ we established with the 4 cores the extent of the fields. Once we make the disc on the rotation then we make a solid confinement (shell) and the shape we need. Here is Accra we plan to build the platform outside where we can control the circulation, that we create the body, the fuel for these reactors has to change. (1:05). The 6 reactors inside are not necessarily needed. (1:08). Armen will show the first UFO in the coming weeks. We have to go step by step to understand. We expect btn 250 to 500 Tesla to be split among the 3 and then amongst the 12. The stronger on the bottom will feed the weaker in the middle and weakest on the top. For the first time KF announces the completion of the SS T. The 6 reactors in middle will give you compartments. NASA guys who are in the background, watch closely. (1:12). You to get a toy railroad track and make a circle, put enough reactors on it so you can see field interactions when you move one. You can make it any diameter, 20cm or 20m or 200m. Do you remember when we placed one ring magnet and the others moved to accommodate each other, now you see it here. When you put the MaGrav units around and they start positioning themselves that means you have reached the Unified Field and if you add enough in the right direction they'll start rolling on the track. There is no need for motors. Your core has to be minimally a double core, better a triple core, how much is a railroad track. (1:14). Make sure they are connected but that they don't fly, somehow lock it underneath, make a track that can hold both sides, but lubricate it. Armen has a beautiful S. Now start adding balls, ball by ball, fixed but that they can still rotate freely (on the track). You'll find that cores, like magnets will start positioning, you'll see the rolling of the balls. You have seen this in CO2 Boxes, go back 2 years ago when you showed videos of Gans' circulating and floating on top at high speeds. Now when you achieve this ... nobody has taught space T as openly as this, I hope Mankind will find peace with this. ?? You place 3 reactors down, then all you need to do is load them (with Gans) and rotate only one, more or less, that the field flow starts, then you have your uniform. Don't tell me why I didn't teach you this from the beginning, because you have to experiment and test it, to see it. This is a Pl field interaction. My dearest friends in the Iranian Space program and Government. (1:16). You are ready for this, because you have done most of the work on the other side with the ? single cores. What you

understand with this that you don't need any construction material. In a further time when your knowledge becomes more and the teaching goes into deep space you will not even need the track. You'll create cores with a specific dimension that when you put them next to each other they will hang on, on a circle, this is how it is done for the real UFO, but at this time we have to learn more. Having john in AZ is a gift, he has shown a lot of things and done a lot of tests. the static tests can't stop because the interaction will bring more. there is no need for power generator if you can force the condition of the motion through interaction of the fields. We don't see any motors or generators anywhere in the U. If and when you have understood this and achieve this ... this is a race for space. From now on work as a team, work on whatever you like. We have opened the door for a race to space through a Space Ship Program. There are a few things more that I have to teach you, but in time you will learn. You have seen the effect of 129 Tesla, and then it can be directed, as it becomes stronger it tries to feed the weaker, absorbed by the others, solidification. One of your biggest problems is fueling. (1:18). What fuel combination do we use, how much acidic or alkaline, change the name to how much M or G. The ratio of M to G in each core will decide if you fly up or that way, or you create additional shielding. What is your fuel, how to you fuel yourself, can you find Cu, Zn in the space, or CH3 alkaline, or acid. All you need to do is to create the motion of the fields, is to have a dimension of the fields which in the U can add up to any destination of the arrival. Which means that when you are on earth atmospheric conditions, the H will allow you to take the shape of the field forces on this planet, and the distribution from the top reactor comes to be in parallel and in balance with the environment so it allows you to work within the field environment of the earth. This is why you put the weakest reactor on the top according to the mass ratio. (1:20). When you are loading your reactor for the space level, mass ratio in all your cores is sacrosanct. It has to be understood, it cannot be changed. the mass ratio in the 3 base cores has to be very high, that on the equator line has to be medium, and on the top has to be very low so that you continuously create a funnel field flow of MG fields. Those of you who are working on different parts understand this. A "Y" circuit is for the enhancement of the voltage, the center is your top reactor, the ends are the 3 bottom reactors. If you get a "Y" connection of capacitors coils and position the center up with the feed going down to come out, you will already the SF. Now you understand. You create the Potential Difference, and the weaker trying to be fed by the stronger creates a circulation, a P Difference, in electrical S we call it a "Y" connection, and then you need another one called a Delta connection, which is creation of the current. (1:22). You already have the "Y" and delta connections together. The 3 base cores gives you the Delta connection which gives your the current flow, the third one at the top in conjunction with the 3 at the bottom creates your P Difference. You already have what has been your dream, a Delta "Y" connection where you have energy thing you want in it. I gave this design to our team in Philippines a year and a half ago but they couldn't see it. I hope you see it, I know you're listening. The "Y" connection is the 3 base and at the same time adding the 4th you create your Delta/Y in every phase in interaction, and now you have a P Difference breaker which is your 12 lines, or your equator line, and you achieve immediate creation of the flight S. Total cost is less then a couple thousand dollars, but if you are good to interact with a couple of ping pong balls a couple hundred will do. But you have to understand, now you core is very small you have to get inside it? or you create a core condition and you sit on top of it. Like we do on the earth by the

atmosphere is creates. The riddle of the space T, what w call a SS. (1:24). IS NEARLY COMPLETE!! And it goes back again to what about the fuel. What about it? The masters of the T have already been explained. This is the combination of all the teachings. This is the understanding of every aspect of the teachings that it can go ahead. What material allows you solidification in most of the conditions in the U. It's crystallization. Carbon is one of the best crystals in the U that we know of. So now you have your basic material. On the other hand you need to have H, which is ?? (big or weak) enough that it allows the creation of the flow, but doesn't allow, where you don't want it, the configuration of the solid state matter. So for the time being if you can produce Pl Gans of H, which you are a few months away from because I haven't seen anybody breaking through this gap. You can create this condition inside, you can play with a combination Gans, (1:26). Go back to the essence of the teaching, where we started. In all the teachings we explained. The whole spectrum of the teaching is very simple, in the past 3 - 4 years you have created the Gans of CH3. In most of your development you have looked at CH3 as acidic, and you brought an Alkaline CO2, CuO2, what about, you have a C which is a common denominator, ?? our decision doesn't need to be anywhere else, C gives you solidity, H gives you flow, you need a Gans which is C and H based that it can give you crystallization and energy transfer from. You have 2 choices, create a H Gans in one place and then create C H Gans in the other, and load up your reactor according to mass ratio. (1:28). I keep on repeating about mass ratio. How do you create a Gans of C and H. In Accra we have managed to create 2 - 3 liters of it, that is enough to launch the first SS. How do you know that you have a Gans. For years I have used a simple test, when you touch N material like C, when you rub it btn your hands you see blackness like a charcoal, with Gans you can't create a charcoal, it's a mistake, ?? does not go black. To feel a T you have to make it, to touch it, this is one of the tests. Put a couple of gloves on, and if you manage to make a Gans of C you'll see some blackness on your gloves, but the rest will not come, it will slide like a fish, because they have to position themselves. The blackness comes a N state of the graphite, of the C, and then you have a Gans of the C. (1:30). The N becomes the stirrer keeping a dynamic mixture of the Gans. It's like putting a ?? bullet in the circle of a sphere which is rotating at high speed with a lot of balls in it, as it rotates the ?? flows, it disturbs, and it starts rotating. The existence of the Nano C and the Gans C is one of the elements of your ?? feet, of your fuel. So what you need to produce, not the Cu oxide Zn, we produced these for different applications for Medical and other, but now that we are concentrating on the flight you have to understand how we fuel it. You have seen people mixing Gans and loosing balls, when you use a mixture of only C and H, which has to be black, you don't get it in any other color, CH3 will not give it to you. CH3 is a Gans transfer ?? of position where the 3 base H Plasma with the top create a weaker combination which allows the H to take more energy and feed that's why it's a pure ??, ?? You have to find a way to produce CH on a atomic molecular base of each in a Gans and in Pl condition. (1:32). and in a N condition, now you understand why I used a Coke bottle, why Belgium Police and the American's called us a terrorist organization, because we produce N and atomic H out of a Coke bottle, if they don't threaten us, nobody looks, then they could steal the T, but the T is free. This is how we became accused of being a terrorist organization and ?? everything else and to try and silence us, for making H that is in a Pl condition, which is millions of times more powerful then the H used in H-Bomb. But the only thing they

didn't understand that in a Pl and Gans state they can't do any harm, that's why we are ?? free to use it. You have to realize that from now on it's the race btn you Americans, the Russians, Iranians, Ghana, Belgium's. We are not keeping the Belgium's out to punish you but to keep you safe from the hand of DL and his team. You all have received threats and have been interviewed. I got a lot of communication asking why am I separating you, I am not, I am protecting you, you'll understand in the future when you see it. (1:34). You are the children that need more protection then anybody else from the hand of the guy we just explained about. We respect you, you were the cornerstone of the create of the Foundation, stay in that position and continue your work, we have to keep you out to keep you safe until these guys get prosecuted, and the criminals brought to justice. Understand clearly that the H is the acidic and M part, the C is your G and weight side. Load your reactors that one can feed the other according to the C and H in a Gans and a N state, and don't think that if you make a Cu and it's black that it's going to be the Gans of CO2, or Gans of C, NO WAY, you have to go the path of CH3, or if you have found another way to make the Gans of H, or a N material of H, a N Gans of C and N material of C. You need the P Difference btn the N and the Gans to create the dynamism (1:36). of the fields, enhanced by the presence of one stronger and one weaker to create rotation, and solidification according to the strength of the position, you decide in the center cores, but we teach you how to create different conditions. You can go in water, air and in deep space, and the S constantly keeps its angular orientation of solidification for manifestation of the entity. Your bone doesn't change when you go in the water or somewhere else, because it has already created its structure and it stays that way. Your blood flow doesn't change if you are in the cold or the warm. Next week I will show you the Gans of C, Armen has some. When you touch it, you feel it, we have to understand which is the H and can be separated from the C, in combination with the lot. You allow to extract the H Gans from the CH3, then you have C in Pl condition. Armen, I hope you understand what you are doing. (1:38). You put H Gans outside with a small amount of C and you put a lot of C with ?? of H ?? you have your rotating Pl ball. Do not look for P motion but the interaction of the fields. This is extremely important. You'll see positioning on the rail track, but if you mixture isn't strong enough you might need a hundred of them (cores), if the mixture is strong enough then 12 (cores) are enough. However, 10 - 12 cores are not a secure structure, the weaknesses can break it, but if you go to 36 cores you should do quite well. Make sure your (toy railroad) track is very simple. I'll explain how to make the track. Go on Internet and find UFO's by now you should be able to tell which ones are real. In the UFO structure you see the equator line, what we call platform line, it has a thickness, then you'll see the position of the 3 base and 4th reactors (SF), it goes like this he draws it. (1:40). You see the equator line of cores, they are on a fixed railroad Track. If you make lubrication on this side, on the cores above and below, the cores will start rotating on the track. You never loose anything. This is why when you look at the real UFO you see lights rotating on the edge, these are all the cores, there are darker colors and very bright ones, the bright ones are the position of the reactor and where you see a different color that is the space gap. So all you need to do is to have 2 tracks that can encapsulate the cores. And you have to make a position where you can add enough cores to push it. It's like a bicycle chain until you see it start rolling. You don't need any motors. You can speed it up the motors on the top, that you create a flow that they start absorbing energy and then you still can run the 3 base

reactors to see. As I said before that once you connect your reactors to the power supply you drain your system, it's lost its fields. (1:42). The other way for you is to find a material that these cores don't need lubrication but they find M and G positioning in respect to the rail track, magnets, Polarity, it can be done very easily, you put H and C where you need a CO2 and then you find that the balls rotate very easily, lubricated like ?? G fields. So the minute you see a UFO you can tell if it was built by us. We expect you to start building these S very rapidly. If you look at it from the top you have your tracks running, and you put your fixing walls and make the divisions (compartments). Look at what John showed last week, the diameter was 400 feet, what's the length of a Jumbo Jet, 70 meters. This is one shape (?), but if you look closer you have many shapes internally to make the outer shape. (passenger) capacity runs into thousands and if you platform it then into hundreds of thousands. (1:44). And they are well protected. But this brings in one question, the faster the KF supporters of America, Mexico, Brazil, etc it becomes like the reality of the Great Wall of China, it has no use, because now we jump over the wall. 700 years ago the Great Wall had a meaning, nobody could jump over, but now with planes and helicopters, it's just a museum piece. So there is no need for the Wall, let them build as much as they like. Mexico City to Washington, 3 minutes. We push with the development of the Space Program for the unification of mankind and not the separation of mankind. Unfortunately we can't go backwards, we have to go forward. Now you understand why I released the T in such a rapid way. We took our time, studied the situation internationally and we see it is time to break the barriers and the walls. Man made, mentally made, psychologically forced, and imagined. (1:46). The beauty with this Spaceship is that you can't block it, because if you ?? it mutates to the field that it is traveling in. There is no solution, except by peace, first the unification of Man and this is the first steps we take on the 4th year of the teaching. ... you need 2 of the same railroad tracks and lock them in a way that the balls (cores) can't fall out, ?? loop them, and put one ball in at a time. At the beginning you don't see much, make it very loose, then you'll see the shape. Start with a small unit. Armen has one of the best ones, he's a genius. I wish he could have jumped out of the bed so the rest of you would have started the race of the Pl T. The beauty with this is that you can coordinate with the cores in the center and the cores outside to create different materials as you need in a given section, H, O, AA, whatever you need or desire, you can achieve. (1:49). Questions. Dominique of France, can I relate pedophilia with Gans of C and H, because I feel the teaching is complete? What ... I leave that to your soul. We have awakened a lot of people to the world of abuse. The Police forces are baffled by how openly these people have been operating and we have been blind to it. How you are going to change the Gans to bring it in, is a different thing. We don't make any accusation, we wanted to bring a change. The change has to come when we are all prepared to make that change. (1:51). Understanding the T is knowing what it can bring by way of something positive for humanity. I have put all my efforts in completing the work in 2 or 3 locations of the KF, and hopefully we'll all start seeing the fruit of it. It's how we apply the knowledge from now on. A lot of you will start showing with the different combinations (? Gans') of the flight S. (1:52). A couple weeks ago a man in the top, top management inside at NASA said that they are forbidden to speak to Keshe. I said we are here to bring peace and we want to give you the T. He said, they are so much fearful of what you have brought. The highest level of NASA are shaking (in their boots), in what we are delivering. Do we (get) paid to educate

their scientists, we are educating the humanity. We pray, we hope they understand that we bring the Gans out and show it. Those of you who have worked around the MaGrav S and dynamic S, now you understand how easily we can work. We have to see the things and feel the fields, change the E to the control of the reactor. In the next stages of the teaching you'll understand how by being in the center you can control the speed of rotation of all the cores, because it's the H level inside you, what you carry, through the strength of the Pl, the thoughts which effect the speed of the rotation of the cores. (1:54). It goes back to the UCouncil, my wish is my command, then you'll understand. You wish for the hand to open (on the pedophiles), now you wish the speed of rotation of the fields because in the essence of the E of the Man there are such strong fields that create. Go back to the (Health) teachings of Dr. Kostova, that when a Man dies energy equal to 18 Hiroshima Bombs is released. Can you imagine how little of it you need to create the field flow to create motion in one reactor and then the rest to follow. ?? the knowledge of today would not be able to be here if the previous knowledge of the Man had not been there, materials (science), understanding C, Atomic structure, then the last few years the N materials, now the Gans materials and the field interactions. And then when you have the field interactions you can produce the matter as you like. If you can create the field interaction you can create the strength of the E to change the behavior of the Man. Can you use the reactors to create change in the behavior? Yes, but one **Golden Rule, the receiver needs to accept**, to be able to elevate. Christ accepted his crucifixion on the cross. (1:56). because he knew the next level will be higher. He didn't accept the cross to be demised, he became the sacrificing lamb by his own P, What happens when Man himself sacrifices ?? the lamb ?? . Christ made himself the lamb and because of it he got elevated. Because he brought all the ?? energy of P into E and the bitterness of the Man was worth the sacrifice, but because he knew the energy of the sacrifice he received he knew he could build the physicality ?? Understand this and you got your answer of what you were asking (about the pedophilia). Man says he heard our galaxy is moving into a Helium cloud and our ?? governed by H. Let me explain. (1:58). If you read Book number 4, there is a paper we added called, "the rings of Saturn". I explained how the rings of gaseous planets are created in the Solar S. We are always in different environment of gases or Plasmas, and we always go through them. As a planet we always go through them, it rains. In the outer boundaries of the planetary S where these clouds can be, let's say at the field strength of He, it gets absorbed as the planets go through it, they create layers and layers, like oysters. The same thing happens in our Solar S, the same with the Solar S in the Galaxy, and the G within the U. Where a loose combination of the fields are created, and partially because of the interaction among themselves, they then manifest themselves as a field dust, or a field, then we go through it, ?? it depends on how we reach it, or if we are on a pathway going through it. There have been a lot of speculations about this, but it's a normal occurrence, like with the rings of Saturn. I hope I get a chance to release that paper and then you'll understand immediately. Just look at ?? a bigger dimension, bigger field strength. (2:00). It could be real (the question he asked) but I don't look at the press or what they release, so I can't tell you. It's not fantasies, it's quite normal, if you move into the edges of this Solar S you have clouds of H, of He, because as they reduce in strength there are more of them in places. Even our planet crosses certain field strengths in our present orbit and through it we absorb certain energies and they become different matters which add to the thickness of the structure of

this planet. If we have the right MG field towards them then they just fall in. For example, if you live in very dry places that rain only a few times a year, when you come to the dry season, and if you have an angle roof, put a bucket under the drain, wash the roof thoroughly and collect it, then use a iron magnet to rub the bottom, you'll see metal particles stick to it, if you look deep, some of them are cosmic dust. (2:02). or Solar dust which carry the strength of the iron. If you can make a MG field you can look for Cu, Zn, etc. As our planet goes through clouds of different strengths, according to the MG field strength of our planet, we continuously absorb these things. So they exist (floating around in space), they don't come from nowhere. Then you can understand how earth continuously creates thicker layers. You see it when you cut geographical lines in certain places, where does all this material come from. ?? it looks like it's coming from under and going over. Daily, we continually absorb millions of tons of materials from the clouds in the space of the Solar S. And our Solar S continually does the same from the Galaxy, and galaxy from the U, and the U collects huge amounts from the "Unicos". As they absorb step down by step down they come to us. I haven't seen any meteorites but how come I have so much meteorites dust in my bucket collected from the roof. In Australia they get a lot of meteorite dust before the rains come. You can check it on Internet. These comes because the MG field of the earth match the fields we are going through. (2:04). Why don't we get the same material in the desert? Because ?? is a filter for that field strength ... the field strength of the desert acts as a magnet for that particular kind of cosmic dust, and it builds up. Q: When you are talking about the H in the SF do you mean 1 electron and 1 proton, or is it Deuterium? It's a Pl and if you manage to make the Gans then it's the Energy or MG field of Deuterium. When you create a H Gans you create a spectrum of the field strength. In Accra we have made our fuel before we made our reactor and it's a blessing. Is this why they use many centrifugal machines in Iran? Next question. Is it possible to separate a C and a H from a CH3? Yes, it's extremely easy. How do we do that? The last question (about centrifuge), if you understand it, you have made the Gans of C, it should be very easy for you to extract the H Gans. (2:07). The color of gold is beautiful to the eye of Man, you'll see it. It's interaction will create a translucent whitish goldish color, in some cases. It's very much like when you produce the Gans of Cu you go from green to reddish and to black or whatever according to the current flow, you do the same. A lot of you have done this but you never took notice of it, put a large amount of your Gans' in a bottle, and then watch how they stand next to each other, then move the bottles to another position and mark them, then to another position and mark them, then look at the height of the marks after a few days. Don't forget you have already created an interaction connection. You'll see the height is different. The Pl condition brings a balance of the fields and compressional expansion. Then you'll understand how you can create H Gans out of your CH3. Second question about the track in the middle, do they need to be fixed or can they rotate freely? (2:09). Choose, because once you start rotating the center then you create a second G field force. We have this available in certain conditions when you want to open gating. You need it. In gating, which means you want to open a door outside then you need a central core rotation. But this can be achieved with the flow of a single core. It's like an electron around a proton. In most SS travels you can not just open the door, instead you open a field gap which allows you across (the boundary). Physically across. In a very advanced S you just create

a condition and you are out, so you don't doors or gates, nothing. When you understand this transportation of elements is very easy. (2:11).

(2:31). Talks about the teachers around world, as soon as anybody makes a threat against you (people who sell products or give workshops) contact the KF immediately and we will contact the authorities. We are using Italian Security Forces to support us for those who get intimidated. Those who sell products and give workshops please work on the ethos of the KF. We hear of people in Spain and Germany who give lectures and charge a lot of money, just to make money (for themselves). You will find out that you will finish yourself and people will see through you. Go with the ethos of teaching. We have seen people making MaGrav S for their own pocket, no problem, but do it correctly. (2:36). Let me explain, none of these workshops (Whitney) has communication or permission from the KF, these are local KF people teaching and spreading the knowledge. We see accusations from the red circle that Keshe is teaching scams in South Africa. These are KF supporters teaching and making their own development. We don't even get informed of it. Please when you make these presentations make them compact, clear, and stay within the ethos of the KF. You will find out that you will develop a lot of support if you are correct in your conduct. If you have cancer we still are looking for quite a few people for the research in Ghana. (2:37). There is a different way you can benefit, but we don't explain in public. You don't have to come to Ghana. We put 5,000 euro for the trial. It's important that we have a lot of people so we can submit to FDA. We are not releasing it to the doctors only the scientists, but doctors will be informed how to treat. (doctors@ spaceship.org). We need to see how the cancers and tumors work with different ages, etc. These is unprecedented for such a huge reaction without any side effect. We have been asked, now that KF sets up the standard for Pl T for health. (2:40). They said it's correct about diabetes, we have seen people get better, but what is the standard, so we are working to provide a standard. New standards for Pl T in farming, food, health and instrumentation, etc. Our priority sits now with the cancer research. These trials are done with injections and other methods. I wish I had the permission from the doctors to show the pictures, you'd understand that the child will be able to hold his mother for a life time, because she is not going to be dead. It's a private photo, we can't show it. People with cancer can still carry on with chemotherapy as well as do this trial. We need to make a data, we know from the research that it's non-toxic. The cells come under control within a given time according to the dosage, we need to see how effective and how long to treat. (2:42). We have been allocated only to produce so much for the injection trials. Everything will be done by qualified doctors, not in the back streets. We are actually working with FDA committees in how to apply the T. (2:44). Rick shows a webpage of a world map that shows what workshops are going on in the world. People that want a workshop can put that also on the map. (2:48). If you get anybody to intimidate you please contact the KF immediately, we will see it through with the security services. What to do, if you get an email, DO NOT TOUCH it, because the record of where it came from is in the background (metadata), do not do anything, inform the KF and we will have someone check it, follow the tracking number to see where it comes from, if they are using a proxy or hiding name. We will get them. We are setting up a force in the next few weeks, we will call it the "first international cyber police force", from the KF. I am bringing a specialist from the Police Force that we link up and bring the laws in

different countries, so that we can go to one law authority and from there they can accept all the cases (track). That we don't need to go to the different nationalities. It is very high possible that the Italian Police will accept the position. Then if anything comes we can pass it to one center to handle all the intimidation. (2:50). Now I will share something about the cancer, we will not release the name of the doctor and those of you who know don't say. That is why you sit in secure teachings. Doctor has reference to photo. Today thousands of women are dying from this cancer. What you'll see is a major breakthrough in the world of science, we share it openly. Dr. Klaus please share the photos. It's a woman with one breast totally consumed with the cancer, black tumor, the breast gone and huge infection. She was treated with Health unit. (2:52). Keshe explains, initially when a lot of woman feel the lump they ignore it and hope it goes away, then it progresses to a hole (left picture) near the nipple, then it progresses to whole breast (upper right photo), it's horrendous, I have seen it, the tumor grows like this and the patient dies, because there is no knowledge at the moment. The lower left is when the cancer is totally dead, and they start to reconstruct the breast. Now with the new method we can inject directly into the tumor and watch it collapse, instead of watching it go through this process so late. When you see this tumor is the upper right, when it reaches this stage, the mother will not be there for the child, this lady is only 36 years old. (2:55). This is what is impressing the scientists and that is why the fast track is getting made by different governments (to test the technology). The bottom picture is the P damage (but the tumor is dead) and it's a mother who can stay with her child. Some woman listening are playing with it because they don't want the chemo, this T is without side effect. This is why we want to expand the cancer research very rapidly. This was done in less then 90 days, with the coils. If we could reach it now with the new knowledge we have with eh injections, the tumor would never have gotten this far along. Men with the prostate cancer is the same, they see the drip, drip and ignore it until they see the blood and then they panic. The same process happens internally. This lady has a 3 year old child, that would have become an orphan. (2:57). The bottom photo will need the plastic surgery to reconstruct. We showed you the elephant foot (in Ghana) a couple weeks ago (it was also eaten away by worms), this is the effectiveness of the T. We are inviting the drug manufacturers to sit at the table with us, it is for you to develop and spread it. Once the research is complete it should be very easy to operate around the world. When I showed it to one official (in Ghana), he carefully held the photo and said, this is the secret to life. We are learning, we don't know everything. I am sure there are some woman watching who are carrying this secret under their bra. There is a solution, now we see it, we don't need it to let it go to this extent. It's a shock to a lot of men and women to see these pictures, but it is a reality. We have to change, we have the knowledge to bring the change and it is safe. (2:59). I release data only to authorities so they can check. Now with the injections we are bringing it down to a couple of months. But we can reduce it, we have seen others things we have to change to reduce it. If you have a cancer spread across the body, we don't want to sacrifice a mouse to see if it works. If you are already in danger of loosing (everything), then through this trial there is a chance of wining. It's your decision. We have the T and it's on the table. It's us that have to change. I have seen this same thing 5 years ago, one of our listeners knows exactly what I am talking about. He watched me during the treatment, a quarter of the breast is in the hospital in Holland. Go back in the teachings, when I said the doctors opened the tumor and it was black

inside, the tumor goes totally black, ?? the tumor doesn't grow. We are strong enough, powerful enough, and correct enough to be able to show these photos. We are millions strong around the world, take these pictures to the oncologists and ask why is there no more cancer. (3:01). We'll monitor this case and see what happens in 6 months and a year. Now you are seeing the impossible in front of you. Go on the internet and see the different breast cancers and how they look, then you'll understand what this is. We need to expand the knowledge of the Man by the man without sacrificing more animals. I was explaining this with a scientist, why do some of the medicines come up negative and other people pay for it? Because it carries the soul of the animal that suffers for the Man. The medicine is already damaged. If the doctors could understand that the animals have a soul. If you understand what is on the screen, it's beautiful. For researchers like me who have been searching for 40 years this is a gift. This is thanking the knowledge for one woman to be able to be with her children. What we are interested to see is if this lady now creates the Immune S for the cancer. this is the next stage in our development in monitoring. Most probably we will monitor this woman for years. Now that the body has learned how to reject cancer will it build itself and IS. Can we develop serums with this T that we can prevent the growth of any more cancers? (3:03). Caroline asks, can the doctors prepare a better guideline for what young mothers should pay attention to, how to spot and react to the first signs of abnormality. Because there is a lot of fear in even young girls because there are simply no guidelines. If we could put some guidelines up them. I think that most of these are on the Internet, what to look for etc.. But when it comes to this point there is nothing that can be done. We see everyday thousands of women die with these kind of tumors. (3:05). We can do teachings on how to prevent cancer tissues from forming, but it won't reach everybody. The prevention comes from the beginning of the life of a girl. There is a very big hypocrisy, men think that it is only women who die of breast cancer, it is also very prevalent in men, very high. the hypocrisy that we are men and they are women has to be put to bed. It's the same body in different shape, size, and parts. We are all equally open to all diseases irrespective of gender. (3:07). I was teaching the girls in the factory how they can protect themselves against breast cancer. I said boys you can get it too, the woman has a menstruation you have the same. It was very hard for them to accept, in Africa these things are taboo. Every month a woman releases an egg from an alternating ovary. It's the same with a man, every month he releases a sperm from an alternating testicles. It's the same with your lungs, one of them works every hour while the other rests, and the same with the nostrils, and the kidneys. The man has the same cycle as a woman, some states in the US that are mature allow men to take a gap during that cycle. (3:09). We have to be open to the science of the creation, then we can see how we can prevent (diseases). Cancer, especially breast cancer in woman can be blocked, stopped, the risk can be reduced if woman understand the process. It's the blockage of Ca in the channels for milk and then because it can't go through, by the menstruation the milk is deposited from your hip to your breast and then goes out, it's very simple. We are developing a S that you can wash your breast once a month that it creates a balance within the breast that any Ca concentration can be reduced into a Pl to extracted when it's in the soft condition. We can do this, we have the knowledge. There is implication of it working with the authorities and scientists and doctors to be able to do it. All you need to do is to wash the breasts with a specific mixture of Gans' which we will release to the doctors. It'll be just like

putting a cream on. It's like the way we pass the cancer out of the cancer, but now we will prevent the conditions that lead to the cancer. ?? Now we suggest the washing of the body with CO2 during the second part of the ?? , we now the result is 100%. But the doctors said, oh we must have taken the MRI on the wrong side, Keshe said then how come the brain is not on the wrong side. (3:11). We have found the way (out) to a lot of problems. In Norway where the ministers attacked us, you bring the pictures to them and ask them how they can achieve this. They attacked and tried to destroy you and some of you thought I can't take the pressure, this here is your evidence. Tell the Minister that they can go and meet the lady and the doctor. ... we start to put more and more pictures, more data, and P testimonial. As KF we can make the change. Make these photos viral on the Internet and let the people see it, it's in public. Be proud that you are part of an organization that has found a solution for many problems of the physicality of Man, which in a way can just be added to the drinking water. I thank the doctors and people showing the results over the years, this is the result of our work as One Family. The one who made the coils and the Gans' showed it works. This is a Mother who can hug and love the child for the rest of her life. (3:13). There is nothing bigger then the gift of life, and she has received it from a very beautiful and sincere doctor, who is there only to serve humanity. As I was speaking to him yesterday he said, I didn't charge anything for it. It's all free, my time, my services are free. Caroline says you asked me to remind you to talk about the wish. You have to understand that in my family we live, breath, talk the life of the Foundation and there are always discussions about how we can do things. One of the things that we have always talked about, and now it is passed to the U Council, and that is the strength of the wish, which means, my wish is my command. They gradually start to understand by seeing the results of the World Council members, (3:15). especially in their own languages, that they can make a difference. You wish to move your arms and the arm moves. In the space T this morning I explained that if you wish to go up or down the reactors will respond. The wish of the man comes from the reactor which is dynamic in all its strength, it's you who has to understand if you are tuning to Cu, Zn, or tunic to the strength of Fe, H or pain or change. Those of you who have become close to your soul and the understanding of your E, you see that a lot of your wishes becomes reality. Because the more you give the more I receive, the more I come of the same path. We can't change the Man himself, but we can change or create a condition that the Man can receive enough that it will change him. Give freely you are the TOP REACTOR! And the others are the 3 base. You are the giver by wish and the more you give, then there is more for them to receive that they can add (to you) to feed you higher (to elevate you). The wish of the Man is the MOST POWERFUL tool that has ever been given to the Man, through his soul. If you wish to die, that you don't want anything to do with a son that ?? the way you wanted it, your wish becomes the cancer of prostate. (3:17). We just saw the breast cancer, go and read the part of the teaching that explains the why and how a cancer comes. The wish is so strong ?? it will happen. The wish of the Man has to be peace and it will become peace. You will see how harder it will become to create wars, it doesn't matter in what level ?? They can create disturbances but now it becomes much harder to create wars, because the world wishes peace, we have had enough. There are 2 or 3 nations that are pushing, we have seen the war that was planned for Philippines and China, but it was our wish that it doesn't happen. We saw the same in Syria and other parts of the world. We will see that the selling of the arms will not become an option, it

will become a No Option. In a very short time the governments will not be able to justify buying arms when the nation is suffering of hunger. Very soon we will see the change in the course of the armies. If nations can't feed themselves why should they buy arms. It is our wish to achieve peace. (3:19). If enough of you wish to achieve peace you create a link that it will happen. My wish is my command. If all the KF members sit, let say March 21 beginning of Spring, and wish for world peace in a way that the armies will put their arms down, it will happen. Promote the 21st March for world peace. I wonder how many people will join us, don't do anything else, just give to the need of Man so that there is no need for war. We'll see what happens. We taught you the flight S, now we have to teach you the flight of the soul. What is on the screen explains it. Rick reads it. ... (3:23). It means when you offer peace there is no time to find the conflict. This is the ethos we have to work on and the way the science has to be used, how we have to work. In 2 ways we give the hand of love, we care, but those who try to destroy peace and create conflict, we deal with them with the love of God, we let them to destroy themselves, we give them the tools to do it themselves to themselves. We saw the picture of the woman with breast cancer, now if Pharmaceuticals understand it means we have offered the peace from all cancers, but we have to learn together, we have to be able to develop (a system) that all the doctors can offer, it doesn't matter where you are. We look at every aspect and not just the humans but also the animals and trees, the environment, and the environment of the space we travel to, if we respect it and offer it peace the peace will come because we enter into the mindset of peace and the solution will come through peace. (3:25). The ?? wars will only be in the mind of man and not in the states and borders ?? Very strange, in the late 1990's when the Berlin Wall came down, Americans wrote on their aircraft in Frankfurt, "Mission accomplished", that they managed to bring the Wall down. Now they want to build a wall btn the 2 countries. I write, "Mission failed in totality", for one nation but not for the rest of humanity. Understand that when you build walls it is for those who are the abusers. The ones who don't abuse have the open arms of peace. Caroline says, I think a lot of people can't imagine the power they carry through their wish, and how to connect that wish through their emotional being, because of the sincerity of how they feel about something that has been done. (3:27). or is unjust that is in front of them. How to make the change through their wish. I try to explain this through my posts, but maybe Mr. Keshe can explain this more in-depth. How to connect with your wish that it becomes reality as with the U Council and a lot of members have already achieved a lot of wishes. ... if you can explain more in-depth in a very simple way that every woman, man and child can realize to create this wish. I think we have to go to what people understand of what the wish is. The way I understand the wish is that I live at peace. I looked into Russia to use the satellite nations of the ex-USSR as a platform for the creation and establishment of nations with no armies. (3:29). I lived across te USSR in the 90's when it opened up and I have a good contact there, and my wish was to achieve peace that with one nation like China or Russia would open borders without military zones. My wish was to try it in Kazakhstan and Russia but I knew the conflict was too deep and because nations like the US would not allow it, this is how they milk money out of it. When we came to Africa and had heads of Military in the conferences, I realized rapidly that my wish has been achieved. The Military people in the conference understood and they supported. The need to use the army inside the country instead of at the borders. I have understood why I have been brought to Africa because my wish was

to achieve peace. I have been brought to where the peace can be used effectively. The state of the mind is the field spreading the wish. (3:31). A doctor with me said I am under a lot of stress, yes because I can't achieved what I want, that is to bring peace to humanity and it's putting a lot of pressure. Because the time spent on destruction can be spent on development. And we are achieving it in Africa. What I wanted to achieve in Europe, because of the military forces and the money involved ... we will achieve in Africa much faster, that's why I was brought here. The wish was sincere, so the tools and souls are available for it and are being brought into position. You can't stop a conflict on the borders of a nation, you have to stop inside your own brain. You can't live with hate and show sincerity outside because the soul will not carry it. A lot of people use E to create conflict, they use and abuse it. Try to use your E so that it will only be positive, then you'll achieve and it will become stronger and stronger. The more you walk away from conflict, division, and to create something to confirm your existence, work more from the fact that you already exist then you can give more and see the change. The need for physical confirmation shows the immature state of the Man. We touch the souls and they change themselves. By creating conflict inside yourself, you have already failed. Inside yourself you have to be at peace, with the husband, the child, (3:33). and it has to be correct, not what I want but what makes the partner happy, then through that you will find peace. Even though it may appear at the time to be conflict, it will have to bring peace. I see a lot of problems coming ahead with one man to see if he has got the power (Trump), but we have taken the love of God from him. This is the only way that we do it (not through violence), we make available all the best for the man, but because of his own way he will not receive it, unless he gets enlightened by himself. The division of the language, race, color, and putting people in airports, in the prisons or whatever, brings nothing, but it still shows the immaturity of the race. If I wish, I would end the state of Israel within hours, and God forbid if it goes any further, I wish it will happen (?). Because I see the cause of conflict feeding the others to become the same. The state of Israel has to become part of the state of the World Government as a part of the World Family. And we see who is inciting it. And if we make the wish there shall be no state of Israel. I am very open about it. I take the challenge to President Netanyahu. Bring peace and stop the conflict, the same goes for the new American President. (3:35). We respect and honor both of you as heads of your nations, but use your efforts to bring peace. My wish is my command. Isolation is not a solution. Bring peace. Find a way what is the solution to sell arms becomes a joy to be part of humanity. We have seen pressure in the past few weeks built up by the Jewish lobby in respect to people being arrested for their colors or path of belief. My wish is the end of the state of Israel as a nation, but as a part of the universal family, as the district of Israel, as part of the World Government. And this will happen. There shall not be one state but a part which is for the Jews. I come from the blood and the wish is direct ?? I am a Cohen. My advice goes directly to the new Am President we know you listen, we welcome you as a World Leader but respect all equally. (3:37). This is my wish. We see the end of the state of Israel as a nation but we see a province of Israel, as part of the World community with the same dimensions and respect. I cannot wish for more until we achieve what we have set out to do. Let me explain something very directly to President Trump, use your power to create peace and harmony, use the pen of the president to be the pen of peace, if you move against the peace, we will move and remove the pen. The physical pen doesn't count, we take the

soul. With the pen of soul you will write. I kept quiet and keep quiet, but in time we will see. I call again on the state of Iran, we put the hand of peace to Israel a couple of years ago, put the hand out again, let us talk and work for peace and harmony. (3:39). this is my wish as head of the KF and if I carry all of your wishes we will achieve. Let us finish with the statheood and become one nation. Questions. An Austrian wants to show his MaGrav, he can turn on and off a lamp connected to it by moving towards it, " this should not happen". (3:42). .. it's fantastic!. Your M field is interacting with the field of the Pl, if you go further away from it, instead of physically moving, use your thoughts to turn the light on and off. (3:44). Do not force it, but wish it. Your P arm is part of your E that has become physicality and then at that strength can interfere with the strength of the MaGrav S. Now you have to understand how to control such a high strength wish, to lower it that it can interact, which creates the light. I have seen this presented by a couple of other people. Don't force it, just wish it. You can extend the light to the whole room if you can control it. Test to see what happens if you move the lamp to another part of the room. This same effect has happened with another person. Use it as a tester. (3:47). I produced a CH3 Gans, and I have the idea to speed up the process with a Pl battery capacitor. The first thing I noticed is the production of the Gans is really fast, and output so huge that I can't describe. Explain how you do it. Yes, there are 2 jars on left is for CO2 and on right the CH3, N coated Cu and Fe on right and Zn on left. On the Pl battery left side is only over paper and right side is over Al foil, in the center is a wire with insulation on it, the whole thing is N coated. On the Al side the coil is connected to the center wire and a N wire connects the battery to the N coated plate of the CH3. (3:50). Then the left side of battery connects to the N coated plate in the Zn jar and that connects to the Fe. The production of the Gans is very high and different colors and the Gans is totally M. There are some crystals formed that reflect light. The Co2 starts fast but the output is not as high as CH3, but it is very good and fast. AA on the top of CH3. (3:54). the Gans rotates with rotating magnets. The white particles are CO2 because you put the 2 jars next to each other. You still think in P because you think that the CO2 can't form in the other jar because of a gap. In fact you are producing 2 -3 different materials at the same time in each jar. Come next week and show it. If you get intimidated please report it. We are here to change the course of humanity and not just show some videos. We have shown cancer research today and it's one of our priority. Do not give up and carry on until the day we can join your intellect. I end on one note, my wish is that the state of Israel will become a district of the world government like the USA will be a district and Iran etc. and that we work as One Nation for the betterment of the race. thank you. end.

158th Knowledge Seekers Workshop, February 9th, 2017
(More on DL, Space ship reactors, Hydrogen as plasma, giving away his medical devices, How to make Gans of H, spinning of CH3 looks like our Solar System, The whole story about Fukoshima entering Plutonium stage explosion imminent and American connection, reincarnation and about the soul and traveling in space,)

(:11). We will make an important announcement within a couple weeks about the KF. Governments are starting to take notice of the new T, especially in field of cancer and radiation. I thank you all. (:14). People asked why I focused a second time last week so

much on DL. We have made a breakthrough in regards to DL, and you may notice that since then he has not posted anything on the website, about the fire where the Russian woman was killed, because this gave him an indication that we know too much. The second clue I gave was that the director of ?? Phillips were innocent and got pulled into it by him, so they got to know that we know about the scam they set up 1999 when the software programmer was dead. There are 2 pieces of missing info in this case, the murder of the missing scientist in Holland 17 years ago is directly connected to the murder in Belgium 8 years later. The people involved are still active and DL is one of them, and the research team and security have come up with a very interesting result. The person interviewed by the police for the murder in Belgium in 2008, and now the securities have connected the picture of the person who died in the fire and the name of the person, who was supposed to have shot himself. The person involved has been writing patents by DL in 1998/9. (:17). ... the death in Belgium and 2008 follows the same procedure as Fabio's but in a different way. The major witness in the murder of the Russian girl I met 2 times as a colleague of DL, this is the first I found this out. The missing suitcase was the key. .. the next step was my murder by the same guys, the same way as the accidental fire was setup. The murders are connected to the same people. (:22). ... the Belgium Police were involved in the murder of witnesses in prison. .. this has all helped to find the people responsible for stopping new technologies. (:25). (:31). .. It's a year ago that Sterling walked into the Police station to turn himself in, now we have solid evidence against DL and expect him to turn himself in. (:41). The murder of the girl (in Belgium) is a copy of the murder of Fabio. I promised Fabio's father that I will bring the murders to justice. Two brothers, 2 drivers, one watching when they leave and the other carrying out the job when they arrive. The 1 watched Fabio leave with me from Barletta, and the other in the Roll Over. This was no coincidence. In this way we do our job and I thank all of you, reading all the lies put out by DL, and you trusted and stayed with us. This shows the hand of the criminals, we have seen no sign of DL, most probably he is on the run. Most probably he will write more rubbish, securities will release the connection of the 4 men. They never tested for poisoning of the compression scientist, we are asking the body to exhumed and tested. (:43). One more point, DL write more ... you have put fear into the lives of many people, now it your turn. (:44). Now we go to the teachings. Last week we disclosed more in the Space Technology. There is a fundamental point that is to understand the process of the fueling. We have seen many trials where they load acidic with Alkaline, where they tell of the ball gone missing, or they see a different motion in the characteristics of the material. You will not achieve lift, motion, and construction of the P entity unless you bring about 2 points at the same time. The first is the S of motion, the MaGrav S, where you encapsulated with the confirmation of P existence, this is extremely simple. (:46). You made the platform with the reactors on it and the platform revolves, then there's the SF with the "Delta" "Y" formation, creation of the voltage difference in Pl field and current flow. (:48). ... delay in ... while waiting ... we get restricted from showing a lot of medical research, but we work in other ways to share knowledge. (:53). The SF is for the flight S and the platform is for the physicality. The 2 are independent but entangled in their confirmation of the existence of one with the other. The total interaction of the 2 will give the P in the dimension of the UFO. The lift S (SF) is within the dimension that is created, and the E part get entangled with the interaction of the P. On all faces you have creation of dimension. The rotation of

the disk creates a spherical mushroom that the fields from the top come in, and this allows this S to create G positioning motion, (in center) in respect to the planet or any position where the interaction of the fields btn the layers (:55). Or the 2 cores that are creating the lift, and the third core which is creating the P gives you manifestation of the UFO or flying S. Don't not think that you have to work only with large scale, you can also do it with a very small disk at home, for less then 2 to $300 you can build your SS. A small disk can make your car fly. this is what we were going to show in Enhoven. the interaction of the flow of the energy btn the cores on the bottom with the cores ?? (on the SF), allows you a current flow of Pl in Megawatts. The difference in this direction will give you current flow, this is the Potential Difference and this the current flow. (:57). You'll have to decide what the fuels you put in the different set of cores are made of. If you choose fuels of the matter state of the earth you will be bounded to earth. If you choose the fuels from the gaseous part you will be on the fly zone and never be able to go into the matter zone. The choice of the fuel gives the dimension of the flight. If you extend the knowledge to understand that you can have a S which creates a G field force, but if you understood from the teachings of last week you can create yourself structures of buildings, what you are used to. In fact, the reactor cores make the structure of the building, you position the cores in specific positions which will give you the shape of the house you want to perceive. In the morning you can live in a rectangular house and by the afternoon you want to change, you move the positions of the reactors and you'll now have a circular house. (:59). You can pack up and move, this is advantageous in the construction of the buildings. It can be used as a position to set conditions in an earthquake zones where buildings are separated from the p structure of the body. It's very inexpensive to purchase the material to produce the same. The horizon of using this T is vast, beyond imagination. Last week I explained how you could make sections and sectors with reactors, this is no different. It's just to inspire to use. At the present time one of the dreams of man is the railway, you decide on the cabins without the railway track. Expansion of the railroad track into the jungles can be avoided. This what we are teaching is not something new, we offered this to central African nations 3 - 4 years ago. (1:01).
(1:04). They did a test in AZ last week, as they approached the reactors the speed changed according to their E. 30

(1:07). Remember Alek Beads, you connect for preload to the Y and for the after load to the 3 base reactors. Do not forget the use of capacitors. Now you have your energy source for your reactors. Remember that it takes billions of years for a star to be formed. It takes time for the Beads and the magnifying of voltage and current to start building up according to the load that you add by the use of the reactors (on the railroad track on the platform). Remember how you created the capacitors and the feedback from the load side on the current to the supply on the voltage, then what you see is very simple. I have given you the source without the connection to the earth. It takes time to build the voltage and current. Our friends who are in this development with us understand. The more load you add, (1:09). the higher voltage you receive, if you ask more, you are given more. You'll find your S will come into operation, then you'll have a power generator, a flight S, and you become self-sufficient. The existence of the confirmation of the energy comes from the choice of the fuel in the reactors and many times I explained that you have to look for

H. Last week I said, find a way to produce H in a Gans state. We have allowed and shared knowledge with 2 of our closest friends in the KF how to do it. This is needed so that in the early stages that the mayhem doesn't break through. We have gone for the loading of the H reactors, the you are not limited to earth, but you become the passengers of the U. **The Hydrogen as a Plasma is key to the motion of the fields in the universe**. You can create a condition even for a Pl of H, (1:11). to behave as a C to give you a structure in the crystal lattice that you can see the P (? of the SS). Go back to the part of the teaching where we spoke about diamond structure look at why in the body a specific material creates tangible heart crystals structures you call Ca, the bone structure of the Man. C13 in a specific orientation of the 3 layers of it becomes Ca, it manifests itself in the matter state of the Ca. Then you'll understand how you can use H to behave in interaction that you can have a soft tissue, hard tissue, bone in a diamond structure of the matter which you want or would like to manifest. No Ca goes from your stomach and becomes part of the bone, the energy and the composition of the fields dictates that that will convert to the P matter of the bone, when you die or take a piece of physical bone matter in your hand. (1:13). Understand how the body of man creates transparent and soft tissues and it can do the same in the structure of the house or in your flying object. You can create within the structure of the SS, tissue, membrane, muscle tissue, softness, hardness, as you decide. According to the choice of the interaction of the fields from the basis of the H. The diamond structure of the H is one of the most solid and powerful structures that doesn't get damaged or touched in the U unless you decide to change the field ?? of the environment of the H. When we spoke about CO2 as a gas and then we showed that the CO2 can become a Gans and it can be dried and you can physically hold in your hand. However, according to the law of physics gases can only become matter at very high pressures of whatever, and you went against the perceived and presumed knowledge. Now you'll understand that Man will create solid state matters at any strength he likes, soft tissue, .. walking through the solid state from the solid state Gans of the H. Especially H at the Deuterium level, Pl field is the key into the space travel of the Man. (1:15). You cannot create reactors which have CuO2 and ZnO2 and travel into the depths of the space and not to be touched, as the field strength will create different dimensions for the Pl of the Gans of the entity (?? SS). Where H has in the Deuterium level, more or less solid state matter, which means it doesn't get effected by the environment which it is traveling into. So if you travel with the reactors which carry CuO2 and coming nearer to planet Zeus, there will be no strength because it dilutes, your SS dissolves around you, because the field strength has interacted or been influenced by the environmental condition. Whereas in the case of H according to the minimal common denominator environmental strength your SS will stay in the same state (not dissolve or dissapear). The knowledge of the space is very simple, it is the man who has put restriction on his own understanding. The task for the KF supporters or people who work in the space level is to develop the Gans of H. I have released the information to 2 trusted people in the KF so that if anything happens to me they can carry on with the revelation. Go back to the fundamental teaching, (1:17). not in what you wanted, but what is the reality. You have seen how you created solid C in the form of Gans of CO2 dried, then you can produce the Gans of H so a few of you can make deep space travels without ever being ?? There is more teaching, when you understand the structure of the Gans of the H, plasma, then you have to find the soul of the H, then you'll understand the operation of the Creator, ?? as in

His soul, and the ?? construction of His E, you can manifest anything from the H without ever touching the H. This is the knowledge of travel within the U. We don't just teach the Man, there are those who are more educated (ET's) and now they'll learn the ?? of their work. Understand that the division doesn't exist, cooperation and collaboration and interaction is the key to development and success of the H in a Gans state, H in N matter state, and H in the field strength. (1:19).

>>>

(1:26). We are extending the Cancer trials into HIV, where we can deliver the T through the injection as well and see the change in HIV. We invite you to the trials and collect data on this disease. (1:28). We will see if it works and how, it's a trail case. Last week we showed the breast cancer case, but we found out that we can't show these things on the Internet because of ethical conditions on the Internet, even though it's scientific. We have one of the famous actors (from a famous movie) with HIV in our trials and he wants to be known that he is part of the trials. We have another famous actors. If it goes well they want to promote KF. Some people asked for the trials free, but as we have to provide our own funding we can't do that at this time, maybe later if a government picks up on it. (1:31). We want to show how you can increase the production of energy in the body to a SS, so that you can understand the connection, because you can use the energies of a SS to remedy the illness of the Man. So you would go in one room on the craft and be given high doses of energy from Pl fields from excursion into space you can deliver it without harm to anybody else. therefore you can't create infections and viruses inside the craft. We will teach this in time and also decontamination that the energy balance before and after departing for an excursion is the same and that you do not bring any viruses with you into the communal area of a SS. This is part of the medical application, we measure the MG field strength of a given aura of the Man. The aura has to be the same when returning, and you pinpoint some markers that have to be the same. For example, if an energy package attaches itself to your kidney but you loose ?? somewhere in your liver but the balance is the same, we can see what has happened that we can return the balance, that it doesn't cause any problems. These are the developments that gradually the medical side will come to. (1:32). Keshe has a 20 foot truck container of special medical equipment for paraplegic treatment, chairs, etc. that he has in Barletta. He collected these pieces over years, they are worth half a million Euros. He will leave them at the disposal of the doctors if they want to use them. (1:35). Like for the leg 2 pieces can be attached with a reactor on it, etc. They can be used for post Chemo treatment they attach to the femur and help with bone marrow and immunity. Questions. (1:38). Someone trying to produce H Gans, he got a blue colored water, it this the first step? Good Morning, but how blue is the blue. (1:40). I got micro-hedrens, micro particle of H, ??? (1:42). Keshe says, the blue, blue color if you use Cu is N atomic Gans of Cu which changed to that blue, I have some of it, but that doesn't necessarily mean H, if you explain how you produced it, you mentioned that you have a Cu in your S and you use the Caustic in a specific way, it's a translucent blue. One of the Gans of h is transparent blue. Is the Cu on its own or do you have a plastic with it? It's on its own but in a plastic container. On one side N coated Cu coil, the other side also N Cu, in the middle a little salt, and (?) H. (1:47). Show us next week. I think you may be on the right track. When the knowledge is

shared we will open the books. Renee from last week shares his work on CH3 production. (1:49). He has 2 glass jars, Zn plate connected to N Cu in other jar, and Fe connected to the N Cu in other jar, one side of Pl battery connected to each side. (1:56). Shows videos of rotating magnetic field in Gans. One particle collided with another in reverse direction. Why? It could be because you made it with Fe and they like to coagulate, or as a Gans it has to balance itself out. This is how you get positrons. Depending on the field strength, the electron becomes positron and changes direction. If you look carefully you'll probably see other particles doing the same, when they balance out the fields then they return to the normal rotation. It's MG field positioning themselves. (1:59). This is why you need to add Gans' into your solid state Gans, or N particles into your Gans or Pl, because if you look at that cloud it stays steady, the motion of the N or matter state is what stirs up. This is why the earth rotates, the inner core (see Book 1 and 4), is a mixture of the Gans' N material, Pl, and matter state. And here you see why you have to mix the N state of the material into the Gans, because that stirring creates a balance of fields. In the space reactor we see the same thing, the stirring of the fields by rotating the disk will do the same. He has a neodyemin magnet underneath spinning at 500 rpm, at this speed the particles are very active. (2:05). Keshe says the CH3 is made from Fe so most likely the particles are N Fe and that's why they get attracted to the spinning magnet. (2:08). Shows another. Keshe draws on it, you see a configuration of the 3 layers that position themselves by MG field strength. Rick says the side is spinning like our Sun with the planets around and the outer layer like the asteroid belt. It visualizes a lot of what we are talking about. Some particles are floating on top, some in middle, different layers. It's very interesting. (2:11). He was not able to control the light turning on and off at the MaGrav with only his thoughts, but only by going near to it. Try, don't wish it to come on, but rather, would you like to see me happy, then it may come on because it makes you happy. You tell what feeling you want from it and let's see if it listens. How would you explain fire in terms of Pl. Fire, as we know it is a release of energy in the matter state, (2:13). it's not that you just see what is going out, there is a huge amount of energy coming in, even when you call it burning. It's a matter specification, we don't have a fire in Pl state, you don't see fire on the surface of the sun, you see the interaction of the fields which gives light and radiation. The matter state is the only place you see the tangibility, it destroys itself when there is too much to be released and manifests itself as a heat and large enough as a fire. It's a Pl interaction at the matter level strength. The light we see as daylight is matter, field interaction at the Pl level. Fire is a matter interaction at the Pl of the matter strength. Q: there is a report that reactor #2 at Fukoshima has melted through the concrete containment and is going into the ground. What is really going on there with contaminated land and water around the facility? There is an alert out, we are aware of it, but TEPCO at this time has decided to cut links with the KF. (2:15). We prefer to stay that way, sooner or later they'll come back. Our problem with TEPCO has been confirmation of their work with us, that they have to hide it, we informed them that they broke sanctions by working with us during the time sanctions were enforced, and they didn't like it, but sooner or later they'll come back. In the moment we are in the hands of judges, and the trials are a backup, showing what they have done. I can't tell you any more, they hijacked the technology and thought they walked away with it, but as they say, they don't know the rest of the rhythm. There is a high level alert and the level has risen nearly 8 times inside the reactor #1. They'll come

back if they need help, but they have deliberately burned all the bridges with us, because they made a few billion dollars and now they have to answer for it. There is a solution for it, we can make systems to do it even at a late stage, we'll have to see. It can become worse if there is a rapid interaction and drop in the system. there is no control it's just a heap of radioactive material. There is a way to do, we suggested it. (2:17). they jumped off. They thought they were very cleaver. We just have to wait and see. We are continually informed what's going on inside. there is going to be a disaster if it goes any further. The only problem we have, they is a possibility that the interaction and conversion of molten material is leading to creation of plutonium. The system has moved up a step, I could be 100% wrong, but the time it has taken since the accident 5 years ago, it could have become a "fast breeder" and that's why we see high levels, it could just be a few patches which have gone into ?? production of Plutonium which will inevitably lead to the blowing up of the rest of the structure. This could have been stopped, there is a way to reduce the activities, but at the highest we knew was the 75 per hour, but at this moment it's like 5 to 600/hr, is reported, which means we are definitely entering the Plutonium phase. high level interaction into uranium leading to high release in reactor #1, we will see this in the other reactors in time to come. (2:19). It's a natural proliferation, the S has stepped up from Uranium to Plutonium and now it becomes faster and faster. We could see a massive production of Plutonium in the next 6 to 12 months, longer or shorter depending on what they have put in there. Don't forget this was expected, reactor #1 was used for military development of Plutonium. We announced this a long time ago and TEPCO didn't like it. Japan has illegally entered into nuclear weapons technology. The Americans, IEA, know it. That's why reactor #1 went this way. They started proliferation and went back on the agreements since the Second World War, and this rapid increase conforms our suspicions that reactor #1 was used by the Japanese for military purposes. Creation of plutonium at this level with a high level radiation from Uranium is very, very rare, it's not impossible, but they started a seed from most probably 2008 and 2009, they entered illegal activities of proliferation. I don't know why the Americans are not putting sanctions on Japan so rapidly as they did with Iran, but that is the decision of the new administration. But IEA has no teeth, now we'll see, if it goes we expect a massive explosion, with it goes plutonium and the rest. (2:21). This is an extremely dangerous case. I was reading, the levels have gone beyond Uranium to Plutonium levels. The level of radiation gives a good insight to the nuclear physicist what material has been used, it's part of the process. Reading from Tokyo, the recent reading is far higher then from 73, ... and described by some experts as unimaginable. The electric company said that an atmospheric reading of up to 530/hr has been recorded inside the reactor that was hit by a huge tsunami in 20__. ... TEPCO is to begin a 40 year decommissioning. ... In British decommissioning of nuclear reactors is 30 years, but in Fukoshima it's impossible. A single dose of 1 is enough to cause radiation sickness and nausea, 5 would kill half those exposed to it within a month, 10 would be fatal in a week. (2:24). ... We warned about this, there is still time to overcome it, but it for TEPCO to openly discuss with KF. TEPCO people had come to Italy and then drove high speed cars to Germany to show that they had not been in Italy. The game is over! There is a solution even at the Plutonium level. Don't forget we are watching it very closely to protect our staff in Japan. We have entered the Plutonium explosion level, it's imminent just a matter of time, how fast, it depends how far the meltdown has gone, has it embedded in solid

stone or has it gone vertical because it is literally on the edge of the country, there are sub water levels that are cooling it down. This is a warning call for TEPCO, we will not negotiate with TEPCO any further because it's a waste of time. But there is a solution, we tried to help them with the stolen T, let them sort it out. This is a warning to all those around the ring of fire, because there is a huge amount of it (Plutonium). (2:27). You have to understand Plutonium weapons T in the H level, Hydrogen bombs going into plasma bombs which are under consideration by the government. You can't start a chain reaction in Plutonium unless you have embedded in it, or if material has been cascaded in a specific way that it has started a chain reaction. We are not talking about 1 cm, rather the whole reactor is showing 570/hr. TEPCO has a very good reason to hide it, we think it may be as high as 800 to 1,000. This shows that there has been a seed of Plutonium, seed of proliferation. This is why we produce and use centrifuges to take these pieces out. This is part of the weapons technology to use centrifuges to take these pieces out, or advanced nuclear power stations, but it doesn't happen so easily. piling can be a reason. If we see one trigger, it depends how it comes, we'll see the first Plutonium war explosion. If it goes there will be nothing left of a half of the city of Fukoshima. (2:29). That radiation level is highly dangerous. They are using the tablets, but there is a way that you can confine the radiation using the Pl T. We are there to share, but not in the way we did before that they do all kinds of things to cover up, we can release the emails from TEPCO. We wait for the judge to make a decision on TEPCO, then we will stand our position. It's dangerous, we have entered the Plutonium stage, the Uranium range was 73, the scaling up means Uranium to Plutonium. The next level is horrendous explosion, we have no scientific knowledge on that level. The nuclear chain doesn't stop at plutonium it carries on to heavier elements that are created in a specific condition. There is a possibility that some new materials are created in this condition and in that process the instability of new materials would lead to a new wave of explosions, (2:31). because the half cycle is too short and the energy is building up. ... There is no technology to control it. There is a way to use Pl T to cascade it and drain it, but TEPCO is not willing to show that they broke sanctions, so they can go to Iran and negotiate, then we'll enter direct negotiations with them. IEA is aware of it, and why have they not imposed sanctions, it was done openly and known by the Americans. Very soon we'll understand. The strange thing is how far will it go with releasing more. They tell you in a very subtle way, they said the containment building still has a 1 meter hole in it, which means the radiation is massively entering the Pacific Ocean. It's like with the first accident, and now it is leaking into the ocean again. You are in grave danger. Start looking at the radiation in the Pacific Ocean, North China, less in North Canada, we see sudden increases in radiation in the ocean towards Hawaii and California. (2:33). Part of this radiation could be the cause in the earthquake reduction due to field transfer. It's quite possible, I looked at the fields of radiation now across Pacific Ocean, it's horrendous. Maybe TEPCO will make a full evacuation of Fukoshima into other parts of Japan. If the radiation release reaches past 700 to 1000 then we are at the ignition point. In weapons technology we carry a pile of Uranium and Plutonium in the warhead, it's the ignition which is the key for release and high level radiation is needed. It's not just the Plutonium that starts, now when it goes into ignition the rest of the tons of Uranium that are on top of it become part of it, the chain reaction starts. Time will tell if it goes up in next few weeks or 100 years, only the Japanese know what they had inside. Two 3 years ago I said there is a pattern of

Plutonium production and now we get a confirmation of it. (2:35). Under WWII treaty Japan can not produce weapons grade nuclear material, now what they created most probably becomes the noose around their own neck. Why has IEA allowed Japan to produce Nuclear Material with the full knowledge of the USA and IEA, we understand the reasons, as they were creating a "Cube Crisis" condition next to China. This was supposed to pressurize China but it has backfired. If you remember the Cuba Crisis with Russia, this was planned to be used that way, now the S has exploded inwardly. Japan will become unlivable. If reactor #1 goes a chain over time will cause the other 3 reactors to go. Sorry about this, but we told this years ago. Uranium doesn't create this kinds of high level activities ... in some Uranium meltdowns we see 150 to 200, this is 530 (most likely these numbers are massaged) which means it is a Plutonium chain. Let me explain, what they are reporting is actually reduced from the blanket of Uranium on top of the Plutonium. It's not necessarily from inside the area where the Plutonium is at. (2:38). Q: can we put the Gans on the coast? It's too late for the Gans, it's past the time. I still offer the T to the Japanese and not to TEPCO. The way we did with Yukoko going to Japan before, if the Japanese or KF Japan decide to overtake the condition in TEPCO and the government allows, we are prepared to show ways to deplete the Plutonium, it happens all the time in the U and we know ways to do it. Rick, says it looks like it has melted through the containment on the bottom, right through the floor. It can be done with reactors, it has past into matter state, you have to confine it with dynamic reactors specifically loaded in a way that you can extract the energy in a column. Very possible, but that is a problem for TEPCO. (2:40). It's not just a point creating that much radiation but the whole pile is about to go. They built these reactors on stone, if it hasn't melted the stone layer you might find the cooling and there it could go on for years without exploding. Rick says that in past few minutes there has been reported an explosion in a nuclear reactor in Northern France, but they say no release of radiation. These reactors in France are being stepped down for years now. Are large number of reactors in France are on step down. (2:44). Q: What would a Plutonium bomb explosion be like. We have never had one except tests. Depending on level of explosion, the direction of wind, if it gets ?? back on itself, it leads to a H explosion which is part of the process so you get back to back multiple explosions. The radius is 2 to 500 km from the point of detonation. Then there are contaminations in the sea. If you are in proximity of these explosions you need to make filters of dried Gans, CO2 plus CuO2. Make sure you make a dried Gans of ZnO2 and make layers in the filter like with C filters, make different layers of totally dried Gans. You pass the water and air through it, this is the only way it absorbs radiation fields, the only way. Because of the strength of it you can filter water and air. (2:46). You have to liquefy everything, soup will be the main food, ?? it has to be filtered the same way. The land will be totally contaminated, it will land all over the place and a massive way. We hope it doesn't happen. I can read the email from TEPCO you'll be shocked. (2:48). .. there is no solution because it's coming from inside the reactor, we have no experience with this. Keshe response to TEPCO on ?? 2016, " to head of TEPCO communications, I forgot to mention one point in your email and the dishonesty in it, the email of confirmation of the sanction breaking by TEPCO ... now the case is in the hands of the Judge and TEPCO will receive heavy fines for sanction busting. .. they have entered the wrong way by stealing. (2:52). He reads TEPCO email confirming that they received materials from KF. ... (2:54). They are angry we went public, because we

wanted not just TEPCO to make billions (from the conversion of Tritium to gold), but that the Japanese public benefit. (They have proved) that there is nothing wrong with Pl T especially in the nuclear area, because it's built for space where is nothing but radiation in the space. They are mad that we went public but we sent Yukoko to do the tests and was public about it, that is how they found out about us and came to us. They used intermediaries so as not show that they were breaking sanctions. I am an Iranian nuclear physicist and at the time of accident Iran was under nuclear sanctions. A lot of you were wondering why Obama didn't put me on the sanctions list, because they needed me to carry on the work in Tokyo. That is the only reason I was never put directly on the sanction list, because they needed the knowledge I was carrying to help Japan, and don't forget that these reactors are owned by the American government and are under UN treaty and America is responsible for Japan's nuclear Industry, according to the Second WW. Britain is responsible for Germany and both of the sanctions have been broken in one way or another, in Germany ?? with Iranians, (2:56). in Belgium building reactors to match the medical application. The IEA has broken its own sanctions heavily just to the favor of a few, but now it is play time. 29

(3:01). Sharing Health Pens, very long 144 windings and 16?, he uses it for early prevention against viruses and flu. The end point of the pen comes out as far as the length of the coil part. (3:06). Does Mr. Keshe believes in karma? You have to explain what you call karma. (Not clear explanation), when your energy finish then does it come in another person. You have to explain in a very detailed way. (3:08). If you think by dying you come back and get reincarnated into another body or your soul gets reincarnated in another body or child whatever? Yes. I don't believe in that, because of the way I understand the process of creation, and that is you never die, it's a transformation from one state to another of a different strength, but it depends on what you have gathered in the process. The way I understand the process of creation, reincarnation in the level of the P in the same dimension is an impossibility, but you can when the soul is free to manifest itself in different dimensions, but you still have connections with the souls with which you have interacted or you have created in the process of your life. Reincarnation at the level of humanity, back on the human race is more or less impossible, you can't kill yourself and come back again. That is my understanding. (3:10). 20

(3:19). The E changes and it happens instantaneously, I have seen a few. E has a direct effect on manifestation of P. You tell me how you can do, if you are in control of your E that you can attract with your soul, you can change your dimension and direction anywhere in the space you don't need a SS. Many people travel like this across the U, many, because they control their E and they decide the place of manifestation. They carry both male and female as you call it, but it's not a reproduction organ, it's giving from to exist, you become the "Adam" and the "rib", that's where it comes from (story in Bible). With your E you can and do exist, and that is what they call, when the souls fall in love, because it's the sharing of the essence of the energy of the creation. But it will take Man a long time because he doesn't have trust in his own existence, let alone knowing that he can control his E and his soul. Because we have always put a separation, that there is a God and the fact that God is the creator of their own soul which connects (is connected to

them). (3:21). Is the human blood connected to the emotional level because the RBC have lost their cores. Not really. Birds has DNA cell cores, they mention the intermediary layer you were talking about before for the materialization of the fields and the RBC light up as we all know. The creation of the blood, is the connection btn the E and the soul with the P part. The P part or the Fe which comes from the planet you are created from, which gives you the Hemoglobin, the beginning of the structure, and the O is from the dimension of the AA side, the 2 create a flow. The blood carries both a field interaction, composition of the E as one side with the AA and on the other side is the metal, which is the P, O does the E side and the Fe and Hemoglobin does the matter side of the connection to the planet, of course one effects the other and that is how you share everything btn body, the E and P part. (3:23). If you look at it the brain is the gaseous part and from the neck down you are in the matter state, the matter of the muscles and everything else that are the attributes of the P part (of the planet). In deep space travel you, can never die, the assumption that you go in deep space, die and disappear. In a way you never die, if you understand your soul you decide what you want to learn, you become a rocket on your own. When they find a man who has found the path to his soul he will exist anywhere in the U. The path to your soul is the ?? to the life in the U. Q: So why are we building a SS and not an activating station for our body? We are teaching everything it is you who decide which ship to take. There is a donkey, jet, car, at the moment you are happy with a donkey. We are showing a little bit more, there could be a car too. We teach everybody, just because you have donkey we still use cars. (3:25). How is sound used with the fields, to help build a star ship, next to Gans and Pl? When you do it let me know. Rick is trying to create a Pl with sound using water. .. If we teach everything in one go nobody will be left behind so we go slowly. Final words about DL. End.

159th Knowledge Seekers Workshop, February 16th, 2017
(,)

(:10). We are moving in different directions ... some are going into Pl H production for space travel. Ghana has given land and facility to start building the first spaceship I Accra. We are under pressure to raise $250 million for the development. We ask KF supporters from around the world to join us in Ghana. The World Council meeting place will be built in Accra, replacing the UN, a permanent location. (:17). As right now there is a government that restricts entry to the UN, we do not want that, there will be no restriction to entry the new World Council. As you know the Government of Ghana is the only government yet to sign themselves into the World peace Treaty. (:21). We are negotiating easy entry for KF supporters into Ghana. It will take time to develop this to the point of excellence. (:25). I have to step down because of my health and because we need to bring new generations in. Anybody over 35 years is old in this game, a new generation by accident or ... the older ones will not be able to confined for long periods in Space. The new generation the children who spend a lot of time peacefully behind computers are and become the future of the Spaceship Program. We see a change in children from computer games, some play violent games, this can be changed, but most interact for hours and days on end on the computers, they don't need anything else and

are in a world of their own. This is how it will be in Space Program of the future. We are looking and watching this generation. Travel in space requires this kind of passive mentality that it doesn't lead to aggression. We are seeing gradually the develop of the space people, not just playing, but understanding how the brain functions. ... gives them the ability to think beyond the dimension of P which is the world of Pl and work of the U. (:28). We can't put computer games, ipads, etc on every SS, in future they will learn to do the same thing in the mental dimension. There is a lot to be done. We need those who understand control of behavior through peaceful ways, ... men of space need a specific way of understanding, being serene but open minded to every eventuality in the space. In the new Space Center we'll teach psychological and E pattern of control of the SS and ones own being. (:30). Those like me in their 50's and 60's will have a hard time to stay still in the confines of a SS. .. the younger generation will bring the peaceful conditions btn Man and the U Community. (:32). The new Space Center in Ghana is a breakthrough for Man, he'll learn how he'll behave in deep space. Now the mono-plasma reactors are getting developed is getting into the position to launch every aspect of the technology. Still we have to deal with the level that we are at with the governments, cancer and everything else. Our job is to convert all our work into the development of the single Pl. This process might take a year or two. All the teachings in Ghana will be live on Internet, because it may inspire someone to create something that may be beneficial to someone in Space. (:34). One of the problems we have is our own P, limitation of movement and speed due to the configuration of the Man. We need to understand how we can change and control this, which is key to the success of Man in deep space. Those of you who have been making Gans and N materials it is time to start teaching the younger generation how to work with them in respect to the E, age, and P. A lot of you have made different types of Gans', we explained how you can use your energy or the energy of the E in creating motion. (:36). Moving the matter through the E is very powerful,

(:54). Origin of the creation, existence of One field leading to the creation of the U.

(1:05).

(1:10). Because you have to give energy in balance through the tip of your fingers, length of your finger, length of your toes, through the shape of your toes because this manifests as E, the existence and behavior of the man. Man has never understood this. You can try to have 20 toes, and 50 fingers, then you'll find out it doesn't happen, because the environmental condition of this planet according to its structure of the division of multi-material ?? plasma enforces this kind of a structure. You have no choose and this for Man to understand. When I change the atmospheric condition of this planet which allows for and there is a need for 10 fingers and 20 toes, you'll receive it because this is the understanding of the comfort of existence in that position the way you want to manifest yourself. If you're a woman, can I make a mermaid of myself that I can be the queen of the oceans and the beauty of the lands? Can I create birth without the need of a mate? (1:12). Can I be a man that I can sleep in peace without the bothers of the physicality. Now Man is given that chance. the structure of half man and half different animals was given to Man to understand the mixture of his existence, if he so wishes, but Man took it in different dimensions. When you understand the work of the Pl in the shape we explain

you can live within the oceans and seconds later you can live within the structures of the solid body of the planet. It's you who decides the confirmation of the existence because this is how it needs to be in that space, this is how you get different shapes, colors of the same animal in different parts of the planet. It is for Man to become intelligent to the knowledge. It is important for us to teach the way. We have brought all the ingredients for making the man, a man of space. Now we have to show him how to mix and stir it, position it to get bread or a cake out of the flour. It's you who mixes the dough, it's your E that dictates the manifestation of the physicality. (1:14). Now you understand what will be taught in Accra. We are gathering huge support for the next move. We are gathering the intellectuals to make the ground ready for the next generation, because they are not yet mature enough to understand the way they are set up. Now the next time you look at the Gans in your container, think about how much of my emotion does this Gans understand. How much of my anxiety has been shared and how I have been brought into a peaceful condition. How you made the N material, Gans, or what core you used was not wrong, it was all to bring the Man to this point, a further step in the knowledge of the work of the U through the operation of the soul. If we would have taught this 3 years ago, they would have said, this guy is a lunatic. (1:16). But now we are all lunatics because we made the Gans and seen them moving, we see the interaction with our E when we take a Zn, Cu or whatever. Now it's for us to understand what strength we need to create the conditions we need, but using our own soul. The problem is not the knowledge, but accepting and understanding the truth, for the Man to understand his own E and own strength. In fact it's not a problem, it's the comprehension of ones status and soul. Expectation in P at a given level when in fact the soul can't support it. For example, I would love to be an actress, etc but in fact I don't have the figure and I have never been trained to be one, how do you expect to be one. This is the question? For man to be in the universal condition he has to learn to elevate the status of his own soul. (1:18). Do I need to have P interaction to have a child, or can I have a child of the soul of the creation without P contact. Do I need a P body to love or do I love the soul which creates the P body, so the body can be any kind of shape you want as I create a line of interaction and ?? motion. It's very hard for scientists to understand, but when they do then they understand that there is no need for P to create the interaction of creation. Let me put it this way. Does a neutron have intercourse to give life to, what we call an electron of itself? No. SO is there a need for the existence for 2 to create an offspring, or understanding that the division of the strength can lead to, if the condition inside, the G and M condition balances itself in respect to its environment. (1:20). Now we understand. I can love and create unconditionally according to the environment of the existence. So we are back to square One. A lot of you have been looking for what is drawn on the screen, a Unified Field Theory. It is unified. It comes out of giving, and in giving the ones which are outside return inwardly to match up with what is matching, to create the new dimension, this leads to the creation of G force. The creation of Yin and Yang, M and G comes from the creation of the motion of giving, that the interaction of the environment of the fields creates the fields of the G. This is the key to the secret of the creation. If you have understood what I just said you can manage and create anything you need at any strength, anywhere in the U. (1:22). If you have moved and have a division here (in the spiral), and it has a different field strength, and then have another one that is also of a different strength, the 2 will interact, and in interacting if there are any other

fields they will come to be of the same and now you have created G pull (btn these 2 force), but in fact the main field continues to grow. So G comes out of M, it comes out of the residue of the interaction of the fields in the environment of the fields which are of the same strength, and this pulls all the fragments together (creating a G field), therefore the G comes out of giving. The more you give the more you receive, because in receiving now that you have created multi-layers of field forces there is always different dimensions of strength available and present which you can attract. Does the existence of the Man become a coincidence of the interaction of the fields of the U, or was it by the intention of one to create one? The former is much closer to reality. (1:24). The understanding of the creation is the secret of Man's passage into the U, because once you understand this your emotion can't be abused and you don't need to keep on building different houses of worship with different names in different parts of the U, as you come to different points of understanding which is above you and when you don't understand you create churches, or Mosques, or Temples in different parts of the U ... as we become multi-cultured religious organizations, now we have becomes unified religions. The unification of religions means we have understanding of the creation as One. It is us according to our intelligence that build different churches, etc. And now that we understand how it works, the temple of the God is the Creation and is One. So where do we go from here. I will teach in the Space center the next step of the interaction of the Man with his own soul through the mirror image of S that the Man will make himself, then through it, the creation of the SS of the unity of the man' body on its own. We will see those who make the SS (1:26). and those who understand more make SS out of the interaction of their own dimensions of the strength of their soul, then you will become of those who are enlightened.

(1:46). A lot of people are making a lot of money teaching, making MaGrav, etc. and once they collect the money they forget about everything else. We bless them, they need it otherwise they don't do it, but on the other hand if anyone wants to do anything to support this development it is there (for them to do as they like). We can't go to governments otherwise we get conditioned. You decide, the cost we see is around 250 million Euro. 45

(2:08).

(2:19). Second Question is if I have different Zn Gans do I put them all in one sphere and see how it effects my E? Try. Have you found the E of love within you with these Zn Gans'? Put these Zn's on different containers and see when you feel love and when you want to love your partner, this is the love Zn. And then when you get angry with your child or dog and see this is it (Gans), then where do you want to stack it with the love on top and anger on bottom or reverse. Don't intent, see the reaction. Maybe your E sits more on the Cu end of the Zn, you made the wrong Zn. You say it doesn't work, it's because you haven't understood the length of it. What if you go to dimensions of the soul, and then you see the feeling as the Gans moves that way. Why deal with the Zn, go directly to the level of the soul, then when I reach that see which of the Gans' moved ... then you'll see the connection btn the P, E, and the soul. Get a Zn and Cu Gans in bottles and put them next to each other and see how they balance each other. (2:21).

(2:25). How can you change the E to get instant results. ... When Caroline and I came to Ghana it was not with one suitcase, we came to serve the nation, we came to stay, if the ground was made for us to stay. When we escaped from Belgium to Italy we went with 3 suitcases of what we needed, DL came to the house to kill us and they battered Caroline in the front door with me on the phone. But this time we came to Ghana with a lot of love and intention to change and we came to stay and change, from the first days that love and need was there. We had a lot of rough times in the past 4 months. There are a lot of shortcomings and work to be done, but it is worth it. (2:27). Life here is solitary the social life we were used to in Europe is not here. But the ends are more important. And now it has become pleasurable. Next week we have a meeting with FDA to see how they can use it, later a meeting with ?? The veterinarians are coming because they want to know everything they can do for their animals. ... the intention to serve has been there and we are opening doors. I said to Benjamin about how the UC will bring people together of different languages. I have managed to bring all the governmental organizations together and they enjoy being together and they enjoy it. (2:29). Now scientists from Japan want to come here and others also.

(2:37). The wife of the new President has a tainted past and a lot of the world leaders wives do not want to stand next to her. They had to bribe the Japanese leader to come to Washington. (2:40). Chinese lady shares photos of Gans, CH3, why does it take this kind of shape? You have to look outside this, it shows a clear connection of fields. Is this a cross-section of the plate. This is how the Solar System works. I have seen it before, it's the pressure from outside and field interaction within. We see this with the center of the Solar System, some of these are single Pl, most of them are. (2:42). (2:46).
(2:55).
(2:59). John shows magnification of slow process N coating, took 3 weeks.
(3:03). By applying the volt meter when you take the N out of the caustic you homogenize the layers and each will take their position accordingly.

(3:10). Can we decide if one side of the tree will produce more fruit by playing wit the strength of the Gans'. It's a huge opportunity because this is how you fly in the space, you find weaknesses to dip in and submerge, it's not just for seeing it, if you understand it you can make one side come up, you take off, land or submerge or emerge. Do the layers inside the Gans take up positioning, the top becoming the boundary and the ones closer to the matter become the center. We need to develop a visual S for the behavior of Gans in 3D, how do they move and position themselves. ... the production of H Gans, understand that we don't teach it publicly because it is very controversial in its use in application in Defense and Military. (3:12). Vivek asks about using a grounding wire to the N coils during the drying process, does it change the conditions? Yes. It depends how you re-align the layers, I use a voltmeter. You can create a loop that everything will have one direction. (3:14). Rick shows his Gans ball rotating at 1,000 rpm, it formed rings.
(3:21). Q: about C Gans it has a black color but how to identify it. Gans of C can even be white, the color you see depends on its orientation. With some C Gans if you put a light on it you will see it shining in between, then they can show themselves as a grey color. If you change the field around it they can change the orientation and color. This is the

beauty of C, in one form you can write with it (graphite), under pressure it becomes transparent diamond. If you produce a Gans of it rapidly most probably you'll see blocks of N material of Gans. With C you have to be very careful because in itself it creates the property and illusion of different materials. .. it's a reflection of the fields around the container also. At that time I wanted to see if I could produce different colored diamonds from graphite and it was successful. If you can make it pure enough you can produce different colored diamonds from graphite. I showed this to members of Diamond ?? Borsch, according to the way of producing N materials. The Russians have developed a T on the back of what we developed years ago, a S that the buy very cheap diamonds in Africa with a lot of impurities and they create a Pl condition of vacuum that transfers a monatomic structure of the impurities outside the diamond and suddenly the diamond has no more black material inside, so you extract the graphite without ruining it. (3;26). this process is leaving a Gans residue that is creating a new colored diamond, which we have never seen before.
(3:29). FDA was saying that we have to measure the Gans and how to quantify treatment. ... it has to become a household measurement system. We have brought a new T and now we have to build machines to measure it. We now have a base for doing this research in Ghana. (3:33).
(3:37). There is quite a bit of CO2 in CuO2 but you don't see it because the ratio is too vast. If you put your finger in CuO2 Gans at bottom sometimes you get black color, ?? Zn because the O is not there you get a C at bottom. (3:39). The development of World Council, Space Center, etc, will fall on our back to develop. As we said about the plans of US for Iran, we can call these governments to the World Council in Ghana to negotiate peace. No nation in Africa believes in the UN, nor in Middle East except Israel, because it only directs to one State the rest are ignored. The same goes for Asia. As one guy said we set the UN up as the white club for the rest to follow, they organize the killing. Let's bring peace in the right way through bringing in the new T, this is the only chance we have. end.

160th Knowledge Seekers Workshop Feb 23 2017
(Standardizing the Plasma, Using dry Gans to measure and use as a filter, Constructing buildings in deep space, Do not put Gans state inside living animal, More about making Gans and Nano materials correct way, ,Tomasz made polished Nano Disks to feel Plasma, applying Gans water to skin of animals, Doctors cure by enforcing a condition plasma processes,)

(:13). We have come to the point in the development of the T that we have to bring in a standard. Government officials have started to test the T and naturally it comes to standardization. (:16). When we mix water with eh Gans the water moves up and the Gans down, why? 31
(:19). What happened in TEPCO the scientists had difficulty measuring, the more water we get from it the lower it goes. So we dried the Gans and used it as a filter. ... but now we can measure it, so many milligrams of Gans has such a strength and properties. For the scientists we have to explain Gans in a totally different way then what we are used to,

in a 3D property, which has never been done before. .. this behavior is the characteristics of H, and what is around the H. (:21).
(:34). Video of John in AZ, by increasing one reactor the fields change. What we see is the behavior of an electron. The Pl field was increasing in one direction, so the connection ?? plans in that direction, doubles. Now in what's getting developed you don't need that S, you use the ?? energy that you expand the strength in that direction. All this needs measurement, and how to measure the strength of the field we are going into that we can create a shield to be above it that it doesn't interact with us. Now these things becomes reality. What about if you place another Gans next to that one, how does it change, or if you mix 2 Gans together what is the effect, or do they stay separate and each one does its job. The way our body does when we mix our food, meat, vegetables, bread, we don't eat them separately. (:37). And when our body changes it to a Gans it decides which one it takes. Every entity stays on its own strength. So we go back to the medical teachings, how does our body measure everything, when something is not the strength it needs it rejects it. We do it every second we breathe, when we breathe in the lung has created a condition, this is the strength I am going to apply and accept, the rest can be rejected. The same with the food, this is what I need, then the level gets absorbed in the Lymph, then the cells decide what it will take from it, the rest it sends back, for example it doesn't need the Cs and sends it back, the Fe is not the strength I need so it let's it go. Now we have to find the tools to measure the Pl and how they work. The new T is not like the old days when one man came and put something on the table, the T is so vast it encompasses the whole of humanity. In the coming time we will receive inspiration and enlightenment by those who have done it already and are passengers of the U. (:39). We have to make the first step to show that we understand, rather then being given the golden cup. We have to mature and this is what's about to happen, we have started the process of maturing in Africa, but it can't be done here alone. We faced this very recently, and coincidentally everything comes at the right time, we asked NASA for collaboration for the measurements of the fields. The headquarters said not to collaborate with KF, because they might go faster then us. So now we develop a T that takes NASA out of the equation. We have to do it because now the products are in the market. We have to quantify why the Pl of Zn shows this effect. We faced this one 8 weeks ago in Tokyo, with the cancer research, how come Zn converts cancer in 8 hours and CO2 in 23.5 hours. How come and what is the difference in the strength? If you look C is 12 and Zn is around 60, look at the conversion, is it the principle where we said reduce it by a factor of 20. (:41). If you reduce 5 hours which is about 300 minutes , 6 hours is 360 minutes, then add the C which is 24 hours roughly, multiply by 60 and you have 840, what is the relationship of 360 by 140. If we go by the Pl weight of Pl, plasmatic mass, what is the ratio, this is the only way we can start understanding the behavior to bring measurement of the material. We did this with Gamma and X-rays, where we created a certain levels and saw the damage on the cells, then created a measurement of it. We have to go more or less on the same path again. But in understanding the flexibility of the ratio of the atomic Pl mass. You have 6 hours and 24 hours, the mass ration btn C and Zn is about 5 times, the time ratio is about 4 times. (:43). If you take what we said in respect to the heavier elements by 20% and 30% in the C, do we come to 1:6 ratio. We see that as we go higher in the mass we get shorter in the time. Is it the G field that creates such an effect as absorbing more energy from the cancer cell. Or is it the effect of the M field of

the Zn, which in effect gives energy to the cancer cell that goes through conversion. The understanding of the effects of the fields of the plasma, and the effects of Plasmatic positioning are the next biggest challenge for the human race. Understanding the field forces of the Gans on this planet will teach us how to travel in deep space, how to position ourselves, protect, absorb energies from the environment for what we need to justify the absorption for our needs in deep space. The process has started. (:45).

(:49). The buildings we'll make in deep space will come out of the understanding of the interaction of the Pl, where it will be hard and where soft. We have been through this process since the time of our own inception, we are nothing but Pl, it's interaction gives ?? and soul and interaction within the cell ?? divisions and control of the fields decides that I need a heartbeat to keep it together ?? call it a bone. We don't deliver bone or Ca to build in the womb of the mother, but field conditions on a preset arrangement and the level measurement changes the plasma of the energy to Ca. So cement and brick factories are from the times past, because we decide whether we would like a soft or hard end of the bone in the middle. Would we like it to filter energy the way the bone does in converting Lymph to bone marrow by passing through the tunnels. These are no longer dreams but realities and we have to create the materials for it by application of different Gans'. We need to understand what measurements of Gans are needed to create certain properties. Man will build cities in the depths of deep space, in places where there are no planets. (:51). Because Man knows how to create the conditions of the materials needed for the construction of what it needs, as do other civilizations. This is the passage through which we are going, now the first steps have been taken, we have developed it, now we have to measure it and then we'll know how much we need for what material, and what to do to have a solid state, or a liquid state for food. Yesterday the Veterinarians called a meeting with us to learn how to stop a disease that kills young puppies in Africa. Caroline came across one and treated it and it works. They didn't know where it came from and it went back home, by coincidence it belongs to one of the presidents. World leaders are being touched by this T. .. put the LP on the body of the dog and it gets absorbed in, 80% of our energy comes form the environment (20% from food), now we changed the environment of the animal. They will be using the Gans in Accra to save animals. (:55). Why not the rest of the world. They aren't concerned about FDA because they have seen the results. We have been acknowledged as a new T, a breakthrough in the world of science, as an addition to what we knew, we added to the knowledge. We ask you to bring the knowledge forward, what does what, how can we measure. There are not many S in the world that can measure M and G simultaneously, and measure one against the other, and at the same time being able to position where this change is. The insight will come from setting up different test parameters, and by not getting what we wanted but instead achieved something else. We saw in AZ the top reactor has started absorbing new materials to it. (:57). It drew new material, production of new matter out of the atmosphere. We saw this with peter where he tried to produce gold and after testing it was nickel, Cu, Zn and other things. So we know we can produce matter from fresh air. But because we couldn't understand how to use it we overlooked one of the most important teaching part, and that is the production of materials out of fresh air. We have to go back to it and dynamic reactors are a condition of it. We need to measure it that it doesn't become random, each time we get the same pie or cake with the same same taste

exactly every time, but this time it could be on Earth or Mars or in deep space, because we dictate the environment, create the box of the energy of the U to create the conditions that we like. I'll teach you something that is the norm in the U, and it shows you the enlightenment. Today you pick the phone up and you get a voice or see the picture, but in deep space you create a condition of the earth which allows the soul to be in a P structure of the Earth, (:59). you can talk (to Earth). Do I need to be on Earth, not to miss home, but I am home in the deep space with what I have on Earth. You might not understand but in the future Man will. Do I need to come back to Earth to be with the ones I love, to feel the atmosphere of what I was used to, or can I create the condition that what I love in soul will be with me. Would we ever miss home as home is with us through the soul of the interaction. In the writings of Bahaula, bless his name, even a stone has a soul. Now it is for us to understand and measure the strength of that soul. In the Agricultural section they have come to understand the soul level of vegetation. In time we will teach it in public. They are still on the first steps, but they have started to grasp the idea. Why some of the foods we eat touch our soul and gives us pleasure, so they have to have the same level of soul as us to equal to our E. Now we can start measuring. (1:01). Now we can start being part of the others. Part of understanding the measurements. This is the reality we are facing and now it can't be hidden because now the governments have put their hands and feet in it and they are not coming out because they are using it. .. we are putting our members on the government boards to teach these organizations how the knowledge is that we can set up standards. Because it's in use and in demand we need to speed up the process. In the next few weeks we announce the meeting of the world FDA's in Accra, for standardization. We are heading it because we have produced it. The KF knowledge seekers have been the front runners. (1:03). I have made the teachings so simple that it takes any scientist less than a minute to understand. This is how those of you who teach the workshops have to do, make the link to the present knowledge so the people feel comfortable with it. Do not teach is as a Holly Grail but as something we already use. I teach the N and Gans in such a way that scientists understand that this is a new knowledge that I have to learn or it will be me that is left out. It's very simple, when you teach workshops carry with some ring magnets, a Cu plate, N plate, and Gans. You explain that the Cu is in a molecular structure so it's tightly packed, then we create a different atmosphere condition for the Cu where we expand the environment of the temperature around the Cu, (1:05). When matter heats up it boils and evaporates, but now we are using caustic which we boil but before it evaporates, because of the immediate coolness of the surrounding box, it goes back (to the plate) but now it's in the gaseous state and can't go to the matter state and thereby becoming Nano material on the surface of the Cu plate. At the point that you are able to see the black N material it is at about 50,000 layers deep. ?? You can put a few magnets around it in the space and you can see how it moves?? Then you explain that this is the N material but it is still attached to the (matter, Cu plate). This is the first time Man has managed to produce n materials out of the same matter. You don't need to buy extra, what we call "popcorn nano" material to glue it on the surface. This N material is part of the same surface. The caustic was a new environment that gave the N material and it was the presence of the Na in the atmospheric condition of this planet which allows this to happen. Salt is the common denominator for the separation of the molecular structure into N, so you use the same knowledge, last time was NaOH this time is NaCl. Next we again change the

environment of this new material by putting it in saltwater. We have N coated Cu plate on one side and on the other side a non N coated plate. The Cl creates in the water a condition of M, acidic, then the Na along with the O of the water creates the G part or Alkaline. It is the neutral confinement (in the box) that allows the N material to separate. (1:08). And now instead of the N structure attached to the molecular structure you get a single plasma of the material, a Gans. If the speed of the separation is fast enough that it can't attach itself to an O, you will get a pure plasma. You can let them touch it, this is the first time Man has managed to see a single Atom, Molecule. Everything that is floating in that Gans (is a ??). We were told that you can't see atomic structure, you would need such an expensive electronic microscope to see an atom, or a telescope to see a far distance star, and now a man can hold it. Then explain to your knowledgeable scientists everyone you see in the container is like a sun and it has the same power but in small packages. It is you who decides if you want to have earth conditions away from this Gans or Saturn or any other planet. It is you who decides whether to bring 2 in proximity to each other in what we call MaGrav positioning for it to be hotter, cooler, the life style of Earth or whatever you need. In 2 minutes the man of the village becomes man of the space science. (1:10). This is what your job as Knowledge Seekers is, to inspire the true knowledge about the creation, from then on it will be easy to discover how to measure and work with it, which way to apply it and where. **You do not put Gans state inside matter state in a living animal, the energy conversion is too fast and it's dangerous**. Both in the receiving side of the N coated material and on the M side or release of the energy, to outside the body, you create environmental change inside the body. Man up to now is used to injecting matter through needles into the body, because it's a lower state compared to the energy of the Gans, therefore the body accepts it and doesn't see anything (change). But now if you start to work at the level of N materials which is at the level of the body inside it, then when you put it in the body it creates mayhem at the level of energy transfer. This is why we said that when you look at matter and how it interacts (at the lower energy level of matter, it is very different). On the other hand with N and Gans you have to look at field transfer and how they interact. That's why we said that when you test potatoes with the Gans you do not put the ones not treated with Gans in close proximity because you still get field transfer and the results won't be correct. The fields of the Gans coated study will effect the non-Gans coated ones. (1:12). To see the real effect of the Gans on the potato they should be separated by at least 100 meters, because they have already made the interaction of their fields while they were together in the potato sack. Try to keep the interactions as far as possible apart from each other. It is the tme now for truly understanding the plasma and not just showing new games. You need a deeper understanding of the interaction of the fields, not just, how can I mix things, this is still the entanglement of physicality in seeing one thing to another. You have to look at the overall field interaction. The questions are, do we need, how much, where and to what position from ?? ... , not I mix a flour and a salt and this is the taste I get. Now it is much like the hot moist air from the ocean interacting with the cold dry air from the land. We have to look for the field interaction and not matter. Our biggest challenge from now on is to standardize and measure because now we have to quantify, in doing this we'll understand how and where to apply it (Pl). For example, what strength do we need to be able to separate a craft from the Earth. (1:14). Presently, you need a certain amount of speed/energy to be able to takeoff when you fly with a plane. We have

to create the same standards, how much G and M fields do we need and what is the G and M field of the Earth in the Sahara or in the deep ocean, it is totally different. In deep space to move from one position to another we have to know what is surrounding us and how close we are, (here we put more fuel in it, but if you do that in deep space you'll go nowhere). In deep space 50,000 km/hour is by an order of magnitude ?? of 50, that is nothing compared to what we can do. The understanding of how to (change) position in deep space comes from comprehending the reality, the truth about the work of the Pl. How much and how far we can inspire the others to be able to measure the Pl. Now our biggest challenge is standardization. Benjamin has made many charts and now we are structuring it, the framework is set. As a lot of you are selling MaGrav coils or whatever at your teachings, (1:16). you find people asking you, can you tell us what this field strength is?

Some of you teach the wrong way, you didn't learn the basics and then you couldn't get the results and said it doesn't work. I have seen some of you doing steam coating the first time, NO WAY! have you seen me steam coat on the first time, no. Covering the Cu plate with caustic is sacrosanct, (1:36). it's where the (Nano) process starts, then draining it and using the voltmeter to realign the layers, HAS TO be done. Many of you have forgotten about it and don't do it. so if you haven't realigned your layers how do you expect to get energy to transfer. Now the N layers don't work, so when you go to produce a Gans the layers don't work under its direction, the Gans doesn't give the same effect. I have seen people making coils and piling them on top of each other, you damage the layers, how do you expect to get anything from them. Nano layers **should not be touched** from the time you create the layers until you fix them in your MaGrav Systems. You handle them as if they're a toy, you crush them, damaging the layers and then they don't work. I have seen people making Gans connecting the wires in the wrong way. Those of you who are teaching have to learn to do it properly from the foundation. These are the basic works, first is the production of N layers, if you make the foundation wrong the rest will be tainted. I have seen a lot of videos, etc people promoting themselves in the name of the KF. I have no problem with it. It is the ego of the Man. But please do not teach the wrong way. (1:38). Please don't abuse the name of the KF to make yourself a lot of money and then give a bad name to the KF because you are bad teachers. We have seen people abusing it, a new way to make fast money, no, you will fail beyond. People whose work is totally wrong should not be in the structure. Mike Nasser is one of them, the way materials are produced are totally wrong. Do not promote wrong teaching. This cannot be done. Let Mike come back and we'll teach him how it has to be done, the correct way. We don't exclude no one, but those who teach wrong have to be excluded by themselves until they learn the right way. We have seen another name, they are burning houses down, creating fires. After 10 minutes on the KF teachings now they become the gurus. They have no clue. Now that you are going into international teachings try to teach correctly. Don't abuse the name (KF). We warn, because I will start putting the names of people to be excluded because you don't do it the right way. (1:40). This is not a cow to milk for your own benefit, because this has to reach the people in the right way that they can benefit from it. This week we disconnected a lot of people off of the Zoom line as a warning. If you teach the wrong way, abusing the name of the KF we'll block it. You can

do what you like in your own name but you don't carry KF links. I encourage you to teach but the correct way. Do not abuse the KF name going out and making a lot of money for yourselves. I have nothing against you making a lot of money, this is the future and teachers institutes will open to teach all sorts of things, but do it the right way. ... Now that we have become an international space T institute, the people will see it and you'll loose credibility very fast. Do not teach unless you have yourself understood. I see some wrong work with ?? Farhrad in Germany, in the development of the N layers and it has to be corrected. We saw that with Richard but it has been corrected, he learns very fast. (1:42). It wasn't until he was here with me that I could see his mistakes. This is one of the reasons that German manufacturing wasn't showing results, because Richard wasn't producing what was needed even though he worked so hard. He was one of the most sincere guys, but he couldn't understand that the process was handled the wrong way from the beginning. Now he knows. We see this with South African work. This is not a gold rush, it's a rush to teach humanity. What you do doesn't touch me or the KF because people can see through you. You'll see that the re-organization of the KF was to teach correctly so that we can go to the next step of the space T and helping the humanity. We have started working with very high level in governments and they understand it and are measuring it. Once we put measurement and standardizations those who make mistakes will stand out like a sore thumb. Reorganize your teaching so that people understand the correct. To do that you have to first teach yourself the correct way. Those of you who see wrong teaching bring it out, because we have to be open. (1:44). But don't be insulting to each other. I see a lot of ego trouble. Be prepared to accept that I do something wrong or I need to learn something. I learned a lot and enjoyed working with Richard while he was here. He can see what he has done. He is so hardworking that it breaks my heart, but from the foundation everything was wrong and now it's corrected. An openness of learning inspires us all to learn more. I see a lot of mistakes. ??? I have given a green light ?? to stop the abuse, we'll close it down if it doesn't stop. It has become a milking machine for people to prove how wrong they are and they think they are right. We need these kind of links to allow more and more people to learn, but we don't allow it to become a point of abuse. We need the structure to be correct and we have to do it from the beginning. My openness and straight talk has always been the cause of our success. When we see a problem we explain it, when we see correctness we explain that also, and when there is need of correction we correct it. It's a problem for us to say that you're wrong and that you don't do it the way we do it. (1:46). All those who are teaching should stop and reassess your teaching and understanding, and do it correctly. Don't go to the people who are making mistakes but since they have been doing it for a long time they think they are correct. Questions. Tell us please where are the pure teaching methods, where to look for the right way of teaching the core instructions. A link to the original teachings. I think that the webmasters know where those are. A lot of this was done during the 3 months in Tranee Italy. (1:48). A lot of the teachings were done by other Knowledge Seekers, Armen has some good videos. Rick says that someone suggested that the Kids Workshops were useful for the some of the basic teachings. It's a little scattered where some of the original teachings are, you might look at some of the early Knowledge Seekers Workshops and before that were the Public Teachings Workshops were quite useful as well. We do need some place where people can get the teachings from the horses mouth. I am not a horse and I don't speak. There should be links where people can

click on for example, what is Gans. There are a couple videos we made prior to Fukoshima on how to N coat and make Gans. (1:50). Vernie in Philippines made some videos on Fire coating, but there are some weaknesses to it's use, and a lot of people stuck to NaOH, and a lot of people use different salts to produce CO2, but they are different strengths. It's not just because it's a CO2 and this has been part of the teachings and understanding ??? We have to stick to a standardization until new lines of thoughts are brought in to apply for different applications. Now that we have new management in KF this will all be brought into order for the education side. The new facilities will allow for new dimensions in the teachings, but it all takes time. (1:52). Now with the governments coming in we have to speed it up. The new thing now is the mass teaching on television and radio, and this is becoming part of the what the governments want to do. The depth of the need is so great that you can't wait 10 to 20 years to transfer the knowledge. We are seeing massive starvation coming out of the new charts from UN, 50% of children in the US, the most advanced nation, or so they claim, go to bed hungry at night. No food on the table, in Ghana it's only about 7%. How do we food to these people to get them the knowledge to stop the suffering from lack of food. Food is simply the transfer of energy and now we all have the knowledge to do it. We have the water tanks, why not this is what has to be done. .. in coming time what food we need will come down the water pipe. (1:54). ?? it the ... knowledge transfer, you are adding fluoride now to the water, you can as well as the Pl to it so that anybody drinking it receives the nourishment. We are working very heavily in this direction in Ghana. Poverty in West coast of Africa in huge but not much hunger because you can get everything or find food somewhere in the lush jungles areas. We can transfer food in the (water) pipeline and it doesn't matter how long it stays in the pipeline it will remain nourishing. We are working with 2 organizations in areas that you could ever imagine. We can create conditions that make the formation of cancer in the body of Man impossible. You'll see it in the next 2 to 5 years, I am putting a S together in the background for the Italian government. We have signed the first commercial agreements with national organizations. The KF has gone beyond the Gans and the others. We are moving internationally beyond Gans'. (1:56). In the coming conference in Italy you'll most probably see the first feed line that will come in the future through the city water pipe System, you'll get all the nourishment you need for your daily life in a cup of water. It's (properties) don't deplete you open the tap and receive the water. We change the structure and vibration of the Man. We change his E that he feels comfortable in himself. In the coming time you'll see us with World Leaders as scientific leaders and I mean we, because they will demand to know and it is their right to know, because they want to make the change. We don't hear much from the Norwegian Health Minister, they have been watching and they have seen the breast cancer (the case a couple weeks ago), she is a women. Their position is dead in their attack. The process is going so fast, because the most advanced nations need this to feed their people because the poverty gap is becoming too big. At 15 to 20% you'll have riots because parents want to feed their children. When your stomach is full there are no problems. Instead of building walls the governments should look into how to transfer the energy through the (water) pipelines. (1:58). There is huge work going on in the background, you'll see in coming time. Slowly we begin to interact with governments. We have to be correct so that we can deliver it and it can be done. The addition of certain Gans' in drinking water will become the cornerstones of reduction in cancer. The third cancer trials has begun. We'll release the

data how cancer's are reduced, when it's completely done. In Japan we work within the Court structure, it will all be fully transparent to the Judges. .. water supply are one of the easiest ways to change the conditions. (2:00). In London they recycle the water and we know that the use of contraceptives has effected men's sperm production. We can use the same channel of the water supply to change the conditions to feed the nation. The reality of this T is beyond the imagination of a lot of people but there is no choice, we see it. The change is upon us we cannot stop it. We have to see how to bring it about, not in the container of CO2, ?? and in power generation and the rest. We inspire but it's for you to bring the knowledge on the table. The European governments through the false information rapidly developed to block (the T) I have shown their hands and they'll be in their own positions. The blocking of the knowledge by the American government was one of the best things that happened to us, we didn't go underground, but over by the Internet ... blocked by few. (2:02). I thank the Chinese government for not putting the ?? file on the KF internationally, ?? Those who teach in China, I have seen a new one come on, please educate yourself the right way, handle and teach it the right way and you'll find people ??? other scientists will find the missing link in their work and they will use it. They'll bring more to us. We are looking for a structure across the KF that we all become teachers, developers and users. Something interesting happened a couple weeks ago, showing the woman's breast on the internet usually bans you from the Internet channels. They didn't ban us, ?? those who understood the change. We are reaching a place where people who want to confirm their existence through (? attacking) us has become irrelevant. The structure is to understand transformation and transportation of the energy within a structure of the body of the Man. It is within the working part of any system, (2:04). be it the man's body, animal, ocean, waterways, or vegetation. Try not to get trapped in what you have done, but re-educate yourself and add to your learning. One who does this continuously is Armen, he doesn't stick to the old way and goes for another way, what happens if? And this has to become the habit of a lot of us. We are in the comfort zone of the Cu, Zn and CO2. Elevate your knowledge to the next step, what if I put more things in, bring in new environments in, by doing this we should see a lot of new developments. ... the KF groups are leading the space technology and we try to bring the Iranian government in because they have a vast amount of information, if we can inspire them to understand that this is the time for peace, because they are the leaders in the space T. Getting Iran to share their internal knowledge will be key for rapid development, we were beaten once and we are too shy for the second time. (2:06). The structure has to come that we teach every level and we ourselves go to the next higher level that we can learn more to teach more. Try to under how to communicate in deep space, these are the technologies we need to develop. How to interact with other entities, this is upon us now, it's not something in the future anymore. This is one of the reasons, what I call the gap in understanding of the totality of most of the knowledge of the U by Man. He can't understand the line of the thoughts and the science of the people of the U because there has been so much ?? emphasis connected to the matter state. Understanding the universal line of communication is essential for us in breaking into space. We can't teach them English or French, but if you understand the strength of the E of the intention then we have understood the ?? I started explaining this last week with putting Zn of different strength creating the E and then you see the interaction. What if you put the Gans of the happiness strength, the reaction of the sorrow, the tears, joy, and the rest next

to each other, because that is where they are in the brain and see how you can communicate through your E through each one (independently) without effecting the other. (2:08). that you don't misread the joy as a sadness. The crying of the tear is not of the sorrow but of the joy. Systems have to be developed, that out of the whole group only 1 reactor shuts down, or all the reactors totally shut down. We showed this 3 years ago on Christmas day when through our intention we shut down the reactor number 2, there are videos on the Internet. Now we see the same intention by the application of Pl through mechanical means or Pl T. Now it can be shown how it's done through the material. This allows to bring a lot of materials in order, changing things ... different groups are developing it. ... what forces cause changes in dimension and production of different things. What materials are created when we make new conditions. (2:11). Shows video from AZ where from one side of the room they zapped the Pl and the motors stopped on the other side of the room. If he was using the same line why didn't the other things in the S shut off. Another case new materials are being created on the cores, this is becoming very important. (2:16). Sharing a video from Tomasz with 9cm N coated copper disks in Caustic and then polish them with fine paper, and then N coat again. Keshe corrects you can get grapheme on Cu. It depends on plastic container, ground up coke bottle necks. (2:20). The behavior of grapheme can be replicated in other materials. ...?? it's like the space in the middle of the earth fi8lled with water. When we talk of the 50,000 layers not all of the them are of the Cu, in between you most probably have Zn, C. In the Raman spectroscopy we got in Belgium showed that we had Gamma sources and the rest (that's how they started calling us terrorist organization) it was due to their ignorance, the change in the Cu came partially from the C grapheme structure, SP3 and SP2, in formed amongst the N layers, it's not that everything is pure C, you have these Pl MG fields amongst these spaces amongst the N layers. (2:22). Some of the effects that we have seen have confirmed that they can be there. (carry on with video). he holds the 2 disks one in each hand and spread 5 fingers, then point the disks at each other and feel a kind of magnet field between the disks. (2:24). You can put your leg between them, it's mainly to feel the fields, have fun with them. Mirrors of your soul. (2:28). Very interesting. Rick says like amplifiers of the hands. The hands are like tentacles into the energy of the U. There 5 fingers, the end of each finger is a line connecting to U energy. One finger is 1 line. the size and shape of fingers and toes, the structure on the muscle tissue you see on the lines of your hands absorbs and gives different types of energy from the U, so you receive 5 times more energy when you have 5 fingers. If you look at the leaves of Coriander and Parsley, there are more tips on Coriander so more is absorbed. Our hands are a good way to measure because we have this connection with the atmospheric part of this world. (2:30). Our hands are on the emotional part our feet are on the P part, the toes are very short because the point of receiving energy from the earth is direct, whereas the hands absorb what is in the atmosphere part of our life. The lungs and heart have to do without emotional part, which is to do with the brain part, which is to do with the atmospheric and gaseous part of this planet, our hands are part of the same, but they become multi-tasking, providing us with grasping P things, but at the same time the tips of the fingers are the feeders for what we receive. the behavior of the 4 legged animals is different then we who are upright and absorb energy from the atmospheric condition. This is why you see with the monkey, humans, and chimpanzees that we behave different, intellectually because we feed from 2 levels. The 4 legged are connected

mainly with the energy from the earth, so it's mono. We get energy from both, from the ground, P part of existence, and from the gaseous part, which is our E. (2:32). That's why we use our hands in showing E, it's shows more and easier, because it's part of the way we receive energy. The way our body through evolution has changed, we gained an advantage by being able to absorb multi-layer energy. You see that people who are shorter have a different behavior then taller people, because at different levels of earth's atmosphere we absorb different energies, even by walking. We have to add to the knowledge. Our height, position of our fingers (have an effect). We have seen a change in behavior of people who get an amputation, if you can record before and after you se a totally different behavior, because they receive different kind of energy, that type of energy gives a different psychological pattern in the E because our ?? outer body is connected to our E. There are a large number of studies with leg amputees, it's because you receive a different strength in the energy. (2:34). Our understanding has to be extended to further steps. We absorb 80% of our energy from our environment. We explained this to the Vets why we rubbed the Gans on the animals body because we absorb most of our energy from the environment. The dogs come almost dead condition and they can give any liquid to them, so they rub it on the skin. And they couldn't understand but now they do. Even the hair on our body is a way of receiving and transmitting different energy, and even the hair line ?? and with women the shape, color, texture of the hair creates different kind of E. We never understood this. It is a link into the Space Energy level. It's not just sitting there, it is a receiver of the energy field that is needed. (2:36). Why are we all born with hair and then later we go bald and you have different feeding and E. Why does our hair color change as we grow older, do we receive different energy with grey or white hair or do we giver different energy from our brain, of course we do. Now we understand this and have to add to the knowledge. In the picture you see the finger are holding so they are adding to the reception of the fields, mono energy, now they way you are holding these disks you are dictating what energy you want to have more of. If you made a concave disks would you see a different kind of light in between them, because now the concave is reflecting the energy back to each other in the center. These are the ?? put them there and see how you create light. Rick says what if you put them close together and vacuumed them out. Yah, there are a lot of ways. We have to understand the reality of the interaction. (2:38). I have explained in many cases it's because of the interaction of the fields, the materials have their own field strength. Would the condition change if 3 touched the disks with only 3 fingers. Of course the field strength gap will be different. Openness to new understanding is key to this T, the minute you reject it means you don't understand the totality. John of Argentina wants to confirm the curing of many dogs with cancer and other diseases, with Gans Water, They are producing 100 liters per day and curing many people. Wait, you don't cure you process, curing is the job of the doctors. (2:41). Rick says you don't understand, we don't use the word cure or we have trouble with the doctors, therefore we process. Keshe explains, **when you cure you enforce a condition that you have created** on that condition. When you process you allow the freedom of the choice, it's the body that chooses what it needs to take. It's the freedom to use the energy for what is needed. We don't cure that is the job of the doctors and the present world of medicine. John applied the water and they got rid of the cancer in less then a week. The amount of testimonials appearing on the Internet for KF technology is so huge, they want clinical trials. (2:43). It's gotten to the point that

scientific organizations in charge of controlling say let's do it in a way we can quantify it so we can measure it. Because it is there they can't deny it, the people are sitting in front of them. People in the regulatory offices are using it themselves because they know it works. It changed our life, but now lets put it to a clinical trial so we know how much by measurement and who and what effects. Rick asks how can people like John who are helping people all over the world be brought in or do they need to work with doctors. At the moment we are in the third phase of the clinical trial in Japan, which will force TEPCO to open their research over the years because they have done everything scientifically. This will bring us a lot of scientific data and Chinese government has a huge amount of data in the background. We know that Americans are working in the background measuring and developing systems parallel with us. (2:45). We are trying to organize simultaneously with the Rome Conference is to bring Health and FDA officials all together in one position to open discussion channels that the governments and regulating organizations come up with a solution for measurements as much as we have to, we are the pioneers. You say you washed the dog, what was the size of the dog, the cancer, how much how often did you wash it, etc. In animal trials it is first kept for 1 week that it gets used to the new environment so they are all in the same mental condition before you start adding chemical cancer to their body. ... the science world wants to know do I drink a liter of Gans or is 30 mls enough. (2:47). We see a huge interest in men and women regards libido, the effects of Pl on sexual behavior. ... a lot of people with high BP how to use with people with low BP. These are the things we have to quantify. If we quantify these data it becomes easier for the scientific world that is all they are interested in because they get paid to put parameters on it. My parents were "home doctors" did they go to FDA or did we learn it by nature. (2:49). We pay the science world to keep us safe. There is a new medicine for High BP, I call it a racist medicine, FDA approved, if it is given to those of African origin it creates huge lips. Is it the first time FDA has approved racist injections. It's good for the white man but not for the Africans. How do we organize ourselves with these kind of medicines. (2:52). John says some people say they produced Tritium Gans, calling it CH3. How did they measured it. Shows photos of African man taking the new HBP medicines and lips enlarged. It's done by the Pharmaceutical's. With women it's the top lip and man the bottom lip. it will be interesting to see what is the outcome of these kinds of developments. (2:55). Man says that the animals are more receptive to T. After rubbing Gans water on the animals head they quickly began to drink and eat again. (2:59). Let me add to the knowledge. The puppy gets the disease by being removed from the mother very early and creates the disease and when they get the ZnO2 they immediately change through the support of the emotional part. In the humans we see the same thing with anorexia, you don't push in a lot of Gans' but support with CO2 and ZnO2 with just Gans Water until the person has received what they need. (3:02). You can change the life of an animal with very little material. (3:07). Video of Gans Ball with a SF inside the ball. A tiny MaGrav with a massive field. You can connect it to the large MaGrav if you like. (3:10). He uses a combination of bees wax, and "resin" you heat them up and when they melt can add Gans. Keshe says, understand the principle the beeswax and resin are already converted energy in the Gans state so when you add Gans you enhance the property of the same thing and bring them into a stronger condition of the Gans field strength. (3:12). This is not something strange we already use it in different applications but we never talk about

it. Gans water can be used very effectively by mixing it with already converted material in the Gans state, like mixing it with body of fruits, or body of vegetation or body of meat. Here in Ghana we can't disinfect meat we buy from the market, so we wash with the Gans water of CO2 and CuO2 and it kills all the germs more or less instantaneously. We are promoting across Ghana Gans water dispensers for disinfecting food in restaurants, it instantaneously kills most of the viruses and bacteria's which effect huge numbers of people. The food when it's cooked is already in the Gans state, (3:15). that's how we eat it and the Pl energy of the CuO2 with CO2 depletes energy off the material. It saves billions for medication for the government, for people, and no missed work. The interaction of Gans with products that are already Gans like food will become the cornerstone of the use of this T for the common man on the street. Everyday millions of people get infected with diarrhea and everything else. Now we have the solution, it's just a spray of water on top of your food. Eating vegetation with dirty water is the biggest source of infection across the world. You can't use Dettol because of the taste and smell. The implication and application of this T goes beyond what we can imagine we can do. What was shown here on the video by Tomasz, it is because you enhance the condition of what is already Gans, you make the Gans dynamic, so the powers are stronger. We are working on the same principle. .. (3:17). What we see is the interaction of already converted materials. We'll see the T used in a very wide spectrum of the food industry. (3:19). TEPCO did this in their trials and saw massive results. It enhances both the materials and the Gans Pl field strength. (3:21). We are funding another research and it will have huge impact. First of all we have scientific data that can't be denied and they are done by international standards, and leading scientists are involved. Is Zn the emotional connection for dogs and cats like that of humans? Of course. But it is different with vegetation and fruit. Dr. Kota did research and in Australia to confirm the soul level of the vegetation. (3:23). Rick read an article where some people want to change the status of plants to sentient being. If that is true. What do you mean if it is true, it is. I mean if it is accepted by the law makers. Can you imagine tomatoes and bananas in court. (3:27). Q: If the animals are greedy how can they control themselves to keep balance with the humans on the earth? We live with animals and have observed that if left to themselves they become obesity. We had a little dog that we left behind for 3 months and it psychologically damaged its own gums so it couldn't eat and would die. When we came back his gums were all black. We have seen dogs greedy to possess one owner and nobody can come close. So there is a greed maybe for attention and food. How to solve it is to satisfy that emotion to keep it from manifesting physically. We see jealously in children when one gets more and by giving equally there won't be a problem. (3:30). In Islam Mohammed said you can marry 4 wives but you have to give equal to all 4, and nobody has managed to do it, I don't know how they manage to give to 2 women and satisfy both emotionally. So yes we are greedy and we try to find the parameters of it. Can we satisfy the greed through Gans' or do we create another level of greed which are stronger because now the lower ones have been satisfied. In man obesity is greed to satisfy the emotional part because we fee lack. It's a lot of research needed. It's not the Pl T, it is trying to understand our life. (3:32). We need to understand more about our own structure and now with the new T we have more tools to understand it. If animal reproduction is overloading. Maybe it isn't overloading but satisfying a need, we need to

understand more. It's only our lack of knowledge that keeps us from understanding. (3:34).

(3:51). ?? question about AZ making the SS appear and disappear. It's about the strength of your environment that you become part of it. ?? The G field of the earth is dictated primarily by its own internal structure. the same with its M. In the structure of the planet we have a fixed level filter, called the inner core. How much we use dictates how much is left over, and it is done initially by the early stages .... we loose huge amounts of M fields as MaGrav, but at the same time we gain, not only partially the field, we gain huge amounts of matter state inertia added to the mass of the planet. (3:53). So there is continuously a huge imbalance, you can read how many metric tons are absorbed annually, this increases the inertia part but at the same time our MaGrav reduces because of our proximity to the sun as we get pulled closer and closer. The closer we get to the sun the higher the order of M and G fields are consumed and given. Because we are closer the interactions from the sun are of the higher order. In Saturn's position your M field is much weaker and the G is also weaker in attraction. When we get where Venus is the fields are even a higher order. Our annual cycle will become shorter because we come into a higher. This is why I talk about the fallacy of Einstein, E=MC2, primarily you can see it when you look at the Solar S structure when you speed up the planetary S in respect to the sun. we don't work on a fixed circular distance, the field strength gets higher. When we begin to travel more in the space we'll see stars begin to appear and disappear because of the strength of our observation, whether it's there or not. We will crash into structure that were not there and then they suddenly appear, because they are not at the strength of the vision of the man or the ?? . We have a lot to learn. (3:55). So you can make yourself to become equal to the M strength of your environment and you'll not be observed (invisible), by the S we have, but you can be confirmed through the field strength. We have launched the building of the laboratories, clinics, launch site, factories etc. but we need support to complete it. If we go to the government we make the mistakes of the past. It is us that have to make the change. I have put my life and all my assets but it is not enough. The target is 250 million. end

161st Knowledge Seekers Workshop, March 2, 2017
(,)

(:12). Architects have been hired in Ghana work is going ahead. International prosecutors have asked that we don't talk about DL case anymore they have taken over, bank accounts in Cayman Islands etc. (:20). The workshops and teaching across the world have to be not only making coils and Gans, but understanding what is to become of it because of it, (what is the main purpose). This is the turning point, what is this going to develop into, deliver to us as humanity in the progress in the understanding of the work of the U. This is where we are headed not just making coils and Gans', these are all a small part of the teaching. When you do workshops maybe in the first couple of hours you have to explain it and enlighten them as to what the T will deliver, how does it interact with my body, with a tree, a fish, the environment. In time we teach how we connect with the others beyond the boundaries of this planet. We are like a little fish in

the ocean of the U. We always thought the whole ocean as our world but now we see that we were happy with a little pot. Now the pot has opened and we'll see other dimensions of existence. (:22). We went from individuals to village life, to towns, to cities, then we made the countries, then continents, and we made the planet. The next step is to open the U. It is your job to enlighten people to not just look for the energy or cancer, when that is over now what next. Now we have everything (we want through the Pl T). Now it is your teaching that becomes the enlightening, into the hands of the people who can bring change for humanity. In the last teaching I referred to understanding of thoughts and impressions, the emotions. For example putting slightly different Gans mixtures of Zn, making them with a slightly different salinity strength, or maybe with 2 different types of Zn from 2 different concentrations of salinities of 2 different salts, so that we can see which one is the strength of the E. If you made one Gans with K and the other with Na would one be the strength of the E and the other would be the strength of the physical E. In the body the emotional expansion and contraction comes from what we call the pumps, Na - K pump, that is from the P side, on the field strength side of the matter in the pumps. (:24). It's time for us to develop the knowledge of the interaction.

(:30).
(:36). It's for Man to trust in, live by, and obey the rules of the U. We have been doing it for millions of years, if the Man learns what we know, Man will follow ?? in line because this is the promised beauty land. Deep Space is a promised land where Man will find peace in every corner. From now on this is our work. We have to raise the level of Man in (understanding) the totality, that one (he) does not fall behind. In the coming weeks my work will show this. ?? to make effort, pan-continental, to raise in one effort the whole of understanding. KF management team is getting prepared for it to be able to handle it in the coming months. In time we'll hand over the whole control to the World Council and then to the Universal Council. We have prepared the ground and it is our job, those of us who always talked about and wanting peace, not to fight the war makers, but to prepare the ground that they become irrelevant. When you don't produce arms you can produce as much as you like, ?? Something from the new president about AID's in Africa. (:38). Thank you very much, this is the wish of Africa. So much cheap food has been put into Africa that it's not worth for the African farmer to farm anymore. Don't send us any more aid (USAID) so we can go back to producing what is needed by this continent (become self-sufficient again). This is at least one sensible thing we have heard from the new president, we thank you for it, if you can follow (through). If the American farmers will allow you to do it, because they have been making a lot of money out of this false economy farming. This is what has to be done to show that we do not need to be bounded by the physical material world for food. This is what we have to offer from the bank of the knowledge from the Pl T. The teaching must go on because among the ones you teach will be the future men and women who will carry the life and information of the existence of this planet into the U. Now we are proud to say I am from Iran, US, or China, but in deep space we will say we are from earth. When they ask us why do we have different colors and shape we'll answer because we have different environments. on your planet you have only one environment so you all look the same. The planet earth is beautiful, it has the diversity. (:40). Allows the diversity of existence but unison in thought and action. The way we invite people to come to Italy or wherever to show what

we have, so we'll do this in deep space. Come to earth and see the unity of mankind. We have to understand how to see without the eye, to feel without touching and tasting, we don't need to eat another entity to see how it tastes. If he likes he gives us the texture of his feeling for us to know how it feels. I remember a movie I saw where there was a blond girl and a black man and she says may I lick you to see if you taste like chocolate. Man has to cross this border of needing to taste. He has to learn how to use his E and his soul to feel, share, and to give and take. This is where the real job of the SSI starts. (:42).

(:50). Romans

(:57). Where you put the orange (before) you put the AA, CO2, CH3 and CuO around it with the ZnO2 and you drank the water and it tasted like orange. ?? your body is the water, contains the water, and the ingredients. If you are mature enough when you look at the orange you'll feel the taste of it, you take the energy that you are prepared to take without you even touching it. Now you understand the point of maturity. You had to transfer the taste of orange into the water that had these plasmas around it (AA, CO2, etc), but your body is made of that Pl. The glass container is the body of the Man. Did you need to consume the orange, or the orange stayed intact with what it gave out, you tasted it, you took the energy of it, you had the pleasure of its existence without consuming it. This is the maturity of the Man in deep space. **Thy shall not kill**. You have done all of the experiments in the P dimension, and all that I am doing is connecting the P links to your E to understand that you are the cup, the Holy Grail. (:59). And you never knew. The body of the Man contains everything, it's the Man who has to learn how to tap into it. We have opened the knowledge so that you can see because you have tasted it. You have seen that when you put a few dynamic (reactors) things together you get matter forming (Peter in Austria). Do the same with the body of yourself, the blood (flowing) in both hands is a dynamic reactor of the existence with a current (nervous system), make you E to see the hand, if you wish for gold, there shall be gold in the palm of the hand of the Man. Peter showed this, the plastic that collected the metals is the palm of the hand of Man. Two cores is the hand of the man, and the brain from outside with his E dictating what he wants to see will create the material you need, even the existence within the hand of Man. Now you understand, you have been to the school that teaches the full knowledge. From now on, Man has every knowledge of how to do what has been his wish but has never connected it to himself and from now on we connect it. We bring you examples for you to connect, I have done this but I didn't see it, I know I can it. (1:01). Put your lover in front of you and see how much love you can give, and see if the love is reciprocated, or is there a true love, then you don't waste your time loving an idol, where there is no reflection of the E back. Man will participate in creating new generations of beings in the U through interaction of the soul, of the E of the Man with other entities, which would otherwise be impossible in the physical life. The children of the U are made of every race in the U, for those who understood this interaction. Making love and the beauty of the offspring does not need physical interaction the way the Man has gotten used to it on this planet. I said many years ago to Caroline that we come to this planet, the P dimensions like this to enjoy the touch of physicality, when in fact we are committed to the dimensions of the soul of the existence of the U. Caroline and I see a lot of pain here

in Africa, but we also see a lot of serenity and self control (1:03). and understanding of the E and through it the fear has ?? existed and confirms in their souls that they can control it, but one little man in the West we call it a Christ or Mohammed, here in Africa they call it witchdoctor ... control of the E through the soul of the Man. A miniature version of a bigger structure, but in fact it's the work of the same thing. The Man has got to go through this barrier, through the point where he trusts in his own soul and sees without the physicality. This is the job of the KF and SSI to bring Man to that level so when they come to the SSI they are mature enough to enter the next dimension, which is detachment from physicality but understanding the totality. Not many will pass this level or take the journey. When we said we are here to save the few, there was an outcry by Caroline and Dr. Kostova, you can't leave the children behind, you have to take all. We give the opportunity to all but it is for the soul to choose. Maybe now they understand, comprehend what is to come. The choice is given to the Man and it is for the Man to take the next step. (1:05). Stay within the confines of the physicality of this village of earth, or take a step to see what the village of the U in the world of the Unicose has to give. Once the Man starts to travel the spans of this U he will find out it is too small, I can travel faster from one end to the other, I have seen this many times, but because the life of the Man will not, being 60 to 100 years as you are used to it, it runs in thousands (years old) and you have time to be everywhere. You learn the speed of the transformation, transportation, then the shell of the life of this village of a U becomes too small. then you'll start ??? to see what is behind this U, then we have to learn the rules of the Unicose, which is very much similar to the rules in the village of the earth. You have to learn that in the Uincose each village has its own behavior, environment, it's like when you come to Africa it's hot day and night, in the North pole it's freezing, everything else is the same in the dimension of the Unicose, each U has its own composition, that's why it stays in that direction and dimension, it's for man in the future to learn how to adapt in the new dimensions, but you'll find out that by carrying the basic fundamental H as a part of the existence man has already been given a key into the level of existence into the Unicose, (1:07). but he has to graduate, to go through it to understand it. For some it will take a few seconds and for others it will be centuries of travel for millions of years and never succeed, because they have not matured enough to go to the inner sanctum of their souls to see the totality of the creation. Try to practice, make as many different Gans' and try to influence those Gans' which are matter level, or E level, or in the dimension of the soul and start testing yourself, then you'll be graduated when you come to the school. This is like what we call the "Evening Classes", you practice and teach at home and then come to the Institute to graduate, and then we teach you the final ?? , there are no failures, it's just the lack of understanding which gives us the limitation of the existence. Try to teach as much as you can, it's up to us to build the SSI, I have put all my effort into it and you shall see. The SSI in Ghana will become the focal point of humanity and the door into the U, I have made my commitment. (1:09). I stay here until my dying days, but I will teach the Man how to enter the Universal Council and through them the World Council and through them the door opens to the U. You can't open to the UC if you have no respect for where you have come from. Understand that when you take into the U you are the ambassadors of this planet. An Ambassador means representation of your president and leaders of your nation so you have to carry his integrity and ethos. Now a days we have 180 countries, not many nations can afford 180 ambassadors in each

country. Now that we open the span of U where there are billions of stars, gaps and cavities of creation in the U, that 7 billion men are not enough to put an ambassador in every corner. We don't want to be known as the wild guys from that planet. When the ambassadors of earth arrive we want them to say the men of peace have come and they understand how the U works and they abide by it. We stand as a beautiful rose and not as a thorn in the back of the UC. Slowly we teach you. (1:11). Try to practice, like in a sandbox, with your E and find out what gives what E of you in different boxes, then bring the boxes together, separate and feel the E and see how they interact, then close your eyes and make a recording of what you want and what you see, then make a further test in wanting to touch without reaching, and you touch and feel. The size of the body of Man will be the extension of his E, we do this on earth, now we learn to do it within the freedom of the space. The teachings from now on are at the level of the SSI level. You all have been around to upgrade yourself very rapidly. Playing in the garden of the earth is over, now you are in the first class. You have to learn how to hold the pen so it is the pen of peace, learn where to sit that it becomes the seat of justice. You have to learn how to speak that the soul of man speaks without the words of the man. Then I'll take you to step number 2 and I hope by God's name it won't take centuries. (1:13).

(1:30). prophets ..

(1:32). become the passengers of the U. There are many passengers on this planet but not the whole of mankind. Try not to exert your wish, knowledge, your E and your souls power, but be the recipient that in receiving what is needed is given. Never take but accept what is given and because of it you shall give more and receive more. Try to understand the totality, the essence of the reality of the creation. And now you have a sandbox, you have all of your Gans boxes start testing. Put it in your core and see if you can create with your E and E in the core without a motor. We saw that with the test John showed last week. You saw it 3 years ago when the decision was made that the P in the dimension of the E could stop the reactor #2. Now make that stopping of the reactor, the stopping of Man in the P dimension that he can work through the energies of it through the soul of the U, then you walk through. (1:34). Try to use your E to make contact with the Gans boxes you have already made. You'll find out the truth about yourself, and many of you will not like to see it. You think you felt good but in fact what you wished was opposite because your soul was aware of the reality, ... in the U there are no masks or cover ups. Try to understand your own E and your own existence that you don't need eye to see. You'll see through. Test yourself, from now on the race is on for Man to know his own soul and its connection to his E and P and how he wants to show that physicality. Many of you wish to become black will become black, and those of you who want to white will change your color overnight. And then you'll see that your heart is black even though the color of the skin has changed. The E in not in the heart but in the soul and you shall see. You'll become the camelian of the U because the conditions of the environment dictates for you to change to be able to survive. (1:36). That you don't give too much, then you would have no more to give and would endanger your own existence, and you don't take too much that you endanger others. Balance is the order of the U. The Gans Boxes you made are now the judges of the level of understanding of your own E and soul. Then make boxes of the others and see if you are correct in conduct, then make then

with the understanding of the inside of the Man, because now when you look at the E the box can't be made of those materials and fields which are in the soul level, you have to make a new box with the E level of Man. In one is ??? and in the other is Iodine and something else, and then you play with the P of Man ??? the matter state of the planet's Gans', then you see how you have ?? , then start playing the piano to see which key you have to press in order to get what. Welcome to the first lessons of joining the UC. You can't sit behind the drivers seat until you learn what is the ignition key, clutch, brake, etc. what happens if you press the wrong one and the engine collapses and you get pulled to the other side. This ?? is the E of the soul and you'll see how you stir the whole thing together. Start making as many boxes as you can and sit in the middle of it. (1:38). ??? fine tune the boxes that in a single box you become the true light of yourself, then you are ready to become passengers of the U. Any Questions. You thought that you just graduated in N coating and Gans and now you find out you are back in the school of holding a pen just to learn the alphabet of the U. (1:43). Alca made a Gans of all the salts K, Na, etc. are each of the Gans supposed to give me a different E? It depends how, what, the way you made the Gans. I made it the same way as I normally make CO2 and Zn. Now sit in front of them and see what moves what E. I put them all together and also made patches and put them on the Cup of Life and measured their strengths, the Ca and K had higher strengths then the other ones. (1:45). You have to test and see what E (triggers). Don't mix the Gans' try to keep them separate, not even close to each other. You have to keep testing until you find the right strength and when you do then you'll know what you're looking for. Can I drink them? As long as you don't drink the Gans itself, yes. There is no problem with the Gans Water. When you make the Water of Gans you don't carry the matter state, only the Pl state. Vernie can explain how to mix the Gans, and how to get a result. (1:47). When mixing multiple plasmas to water it is best to add first the lightest strength. 11

(1:49).
(2:01).
(2:09). The different bodies of man are different strengths of the Pl. who is the one that talks

(2:22). We try to promote the teaching as much as possible because it's the time now for mass teaching. Those that object it is just that they don't understand, you give from your soul that they may get enlightened. Jackie shares his teaching conference in French, 85 people attended. he shows the photos. (2:28). Summarizes plasma technology. (2:36). ... This time around many people have been taught the T (? means last time the Egyptian priests abused it). Hopefully, we don't leave many people behind that it can be abused by those who think they know a little bit more. Use these teachings not only to make N and Gans but to elevate the soul of the Man that he learns how to help himself to elevate his E, that this can be part of his existence. ... the donations will go towards the space program we need 250 million. We have been approached by a handful of governments that want to participate as they can't do it alone, then they would be part of the space program and send their scientists. We will be transparent. (2:38). As a human race we started in Africa and maybe to go to space we start from there as well. I hope this journey of a few million years has taught us a lot to change our behavior and attitude. In your

teachings try to bring the people to see the benefits by getting in touch with their own emotions and to see the pleasure of it. We call Ghana the Gans Valley. (2:41). (2:46). We get people at the presidential level calling and saying we have a cancer and we make emergency deliveries of Water. In the government they know it works, they want to know what the next step is. It's gone beyond the borders of Ghana. When we say KF then they say Ghana and we say even further the Philippines and China etc. Our hard work is paying off. (2:48). We have to keep on teaching the 7 billion, we have the Nano and now we teach the ethos of Space. The governments that opposed us are now inviting us but they want to know what they can make for their nation. In Europe, 1.4 million farmers have asked for help with contamination that is preventing them from selling their products. I am working on it and in the next few weeks we'll release it and we'll work through the Italian government but the products that we produced will be here in Ghana. Because nobody has a solution, the governments now see us as a solution. Let those who write the rubbish, let them they are bringing more and more people in. Man has tried everything invading, using force, building walls, and nothing worked, it all has fallen apart. Now it is time for the new T and world peace, we have no choice. (2:50). Where you are going to score with everybody is that they want to live a clean good life, you'll not do much with the Nano materials etc, that might help on the way with the P, but when you touch the soul of the Man you free the Man. In coming time we'll sell units that people can measure their souls, the extent of their E, and the strength of their communication with their P. Once people make the ZnO2 Gans everything changes for them towards the KF. Those who oppose the KF have never made anything (N or Gans). Talk is cheap. We are all ambassadors of the UC. This process will take a few weeks or months. .. you'll understand everything once you understand the E. We don't preach we enlighten. You'll understand the strength of the light, then we'll take you into the U and you'll travel at the speed of light of the U, not of the matter state as what Einstein talked about. (2:54). Don't force it but let it come from the joy of interaction. ... the building of the Spaceship Institute is the target the priority and every effort will be made for it to be done and we free the Man. It will be interesting how the governments and the militaries will want to be in it. The condition for them to be part of it is for them to sign themselves to the World Peace Treaty. It is for us to understand our own, not look to our neighbor, then through it we'll become passengers of the U. (2:58). There are other ways that people can support other then money. We need 3 Raman Spectroscopy, instruments, etc.. Keshe goes to Italy in next 2 weeks for the conference. Interaction with KF and the governments have to happen rapidly. When we gave the USB stick the government of Sierra Leone with the first to receive the key, it snowballed to the Italians, Japanese, Chinese, then the Americans asked for it. We are releasing the space technology to the Africans, surely the Americans and Europeans are not going to fall behind. (3:01). when we showed the banners of space flights from Accra, the governments couldn't believe it, the Africans going to space. When we explained the simplicity of the knowledge they say why not, we are in it. We don't go to fight or make satellites to do this or that, we are teaching the knowledge freely and we are showing that it can be done. The nations can participate as long as they are committed to peace. Our biggest problem is where we are going to expand in a few months when we show that KF Ghana has a space center. They'll not want to be behind a 3rd World Nation that has become a leader in space technology. We cross the borders through knowledge, with it the governments will

follow. We have enough numbers around the world to do this. We need to have the people who write against us for the people to see our beauty. When the say he wanted to go to space why didn't he do it, because you killed our people, what you did you Dubai. (3:04). The surety of the success is in serving the humanity and we do unconditionally. For my family to stay here in Ghana is totally opposite to what we are used to, but the price for peace for mankind after thousands of years, is worth it. It's not a suffering, it's the pleasure of serving humanity. I have talked with the architects that nothing should be destroyed to build this, there are some big mangoes trees, I said no tree should be touched, build around them. We have to build to make progress, we don't build to say we are somebody, we build to make a change. The building have to be 1 story only. We are incorporating the Technology in the materials used in the building. We are incorporating Gans' in the brick work so as not to use air-conditioning, and using Gans' we know that can block the sun's ray so the building stays cool. The same with the power unit, we can purify the river water so we don't put pressure on the outside (local community). We will use all our knowledge to show a new environment using the new technology, but at the same time being able to go to space. To open man to the space so it is open to everyone. I explained to the scientists how simple it is and that we don't need 7 years training in a swimming pool to go to space. (3:08). end

162nd Knowledge Seekers Workshop March 9th, 2017

(, the evolutionary changes in the human species came through the emotions, the soul through the emotions creates the physicality and we have to learn to create our body in whatever environment we travel to in space, Many of the stars we see are really spaceships in there time 1 day is a thousand years on earth, , Why should I leave the body when the body and the universe are in me, the Sun is a plasma not matter its surface are the weaker fields that appear to us,)

(:12). ... When the temperature changes slightly we find out that we can't cope with it, out body doesn't accommodate for the change. (:15). In space we have to know how to do this. On this planet when we go from land to water we haven't learned how to reverse the process of where we originally came from. We came from the water but living on the land we lost our habits of using the body's systems for water, which are still part of us, to be able to live within the liquid environments of the oceans. The same is with us in the space. ... we haven't yet learned to be able to live again in the oceans. When flying in jetliners a slight drop in pressure gives a change in emotions, drop in balance with our fear. This is not what we are going to feel in the space. The transitions we feel in space will be totally different, not what we are used to here. (:17). The transitions are non-tangible but felt internally, because they will play with the field strength of our E, soul, that our physicality has to react with a change according to. A small change in pressure and temperature has created different races, heights, and features for the Man on this planet. Now that we are going into deep space there will be a massive change where we have to learn how to cope, adapt, interact with these new change of environment. The change will no longer be temperature it will be field strength, how will we react and protect ourselves to keep the integrity of the physicality and E and the soul together. here on earth when we interfere with the working of the physicality the E ad soul separates

from the physicality, we call it death. How can we live in space that we can keep the totality and according to the condition of the environment that we can adapt to it. Here it has taken thousands of years to adapt into different color of hair, eyes and skin, height. In space we don't have millions of years of evolution. It has to come within us in the strength of the transformation of strength of the soul to the E to physicality. (:19). This is part of the teaching needed for man to go into space. How do we adapt, is there a common denominator feature that allows us to live a life in deep space irrespective of the condition.
(:24).
(:36). .. We shall see each others soul by the strength of it through the mission of its soul by what it is giving and not what it is taking, it is giving so much that in comparison what it takes is so minute, which is what I don't need so at least we serve each other. The color of soul is the transparency of the color of fields of man's E. This is the biggest and hardest part for many of you who want to move into the SS program. It's not a space suit anymore or a weightlessness, nor training to become passengers of space, but it is training to become part of the space itself, knowing that in totality the integrity of me shall stay until the point when I see my soul, the energy which it holds, can become part of another to give it life (?? so it's longer) or become part of ?? that it can serve more. The fear of the man to hold onto his physicality is 99% the cause of his demise. Trust in feeling of the E, in understanding the strength of the soul for that which becomes non-physical is the key. I have to teach N material and how to make a coil. (:38). and the ball that they can make the fields, be you have never been taught in thousands of years and this is the path to universal unification of Man with the U and the souls which are constructed out of the environment of this planet. The preparation of the man to go into space without the shackles of the physicality will be a very harsh one. Not many will cross the line because the fear of trusting their own soul is much harder then trusting the physicality of this planet, which can finish with an earthquake of whatever else, will leave the destiny of the Physicality, separation of the soul in the hand of the events, then us being in charge of it that the events become irrelevant at least on this planet. The understanding of the E of man will lead to the station of his presence, so let's go back into the E and find out at least how we can use our E to change our Physicality, can we do that. Or do we need to fine tune the fields which are coming from the soul which are buffering it at the level of the E we have the tangibility of the existence, then we can interact, that we do not need the fragile P world of the body. (:40). ... How much the man allows himself to accept the new according to the level of his own intelligence, and understanding of the truth about the world of creation. He accepts up to the point that he is comfortable with, but for me to show what you want to se is a flick of a finger but then I become a magician. Putting a stick on the ground, or opening a river (Moses), or creating some kind of manifestation that you can believe in doesn't work anymore. We have to guide the soul of the man that he find in totality the path to the UC, not a tribe that we become abusers like the other ones before us, because they have been present or the magic has been used by them to open the sea for them to be the causes of more abuse in the future. The teachings as you have seen in the past couple of months is more for the man to move to trust his own soul that there shall be no more temples for the man anywhere in the U to become the pitfall and the cause of the division of man from the rest of the UC. There are no Churches, Temples or Mosques in the U because when you

understand the Truth the soul of the man becomes the Church of the man. (:42). Then what is believed to be the correct conduct becomes part of the structure of the physicality at the point of manifestation. How do we do this, to understand our own soul, to get in touch with our E, to start communicating that we understand that we can confirm at least by a tool that we feel a response from our E. This is the key. The man is too Physical, so he has to see something to confirm what he is doing and what is there because he has no trust in himself (as a spiritual being). Then we come across, prove it to me, show it. It's not that you are wrong but I am stupid I can't understand. If you say show it to me I don't trust it, it means that I am too stupid too understand, so I ?? you that it doesn't show my stupidity. This time it is you who has to trust yourself that you are not stupid to confirm your own soul, and this is the big question. It is you who has to find the wormhole into the life of your own E and through it understanding its strength to find the wormhole and passage to your soul, there are so many small passages and ways you can find to it. It takes time and comes out of total belief in ones E and that what you do is correct. (:44). Total belief that what you are doing is for the betterment of others and not you. This is the key. Not going out and physically buying a key for the path to the next world, but understanding how through the strength of your E you can open the key to your soul, an access to your soul, a way to bring the fields in level at the strength of the soul, E and P, more or less to a point by changing one slightly the other one changes, this is the hidden key in the whole structure in the existence of the man. If the change is too much on the soul side the physicality has to change a lot and it can't change a little, you can't put your kidneys on your toes ... ??? it can shrink so that it can manifest the self, and the E can accept the Physicality and the soul can accept the change ??? at the point of manifestation. One of the first steps is to understand how does my E effect the environment that I live in, how has the accommodated condition changed me. (:46). and use that to find a way to your E. There is a big problem for people of Africa, but it is a bigger problem for the ones outside of Africa, but in a way they have a way to understand the change because they have to change to go from the dark skinned to lighter skin, to change their features, hair and whatever to fit into the environment of where they have accepted. The Africans have been here a long time and they have nothing to change, they are still the same ?? game, but they have a bigger problem, but they have an advantage in that they understand the work of the E and the soul in a different way and slightly more mature then the rest. Those who live in Scandinavia or N. America or China have seen the path of the change through their DNA and RNA to change them to fit into the environment. (I think he means that when they migrated out of Africa that these people had to go through an evolutionary change to adapt to their new environments. They changed their skin color etc.) So you have already seen the change. And that transition has given you specific features and emotions. Why do all the Chinese or Arabs or Spanish have this behavior. You have been not only through the evolution of the Physicality, man has been through the evolution of the E also, but he never understood. (:48). When you go through the evolution of the Physicality it comes from the essence of the E, when it feels pain, oh, this place is too cold, I don't want to be here it's painful, I don't want to feel the pain so much , I want to fit in, then I change the Physicality by changing the skin to a lighter color and I can stand more cold. You didn't become white in one go ???, you changed because the E felt the cold over centuries and created a condition to transfer the Physicality in order not to feel the pain of the cold. Now you

understand that the evolution put forth by Darwin doesn't come out of the condition of the environment, but mainly out of the condition of the E in respect to the environment. We had many blacks as slaves for 3 to 400 years across Canada, America and elsewhere, have any of them changed to white. Because the accommodation of the living , the harshness of the environment in which they lived have not accommodated the changes needed. Would the blacks who were taken in chains to America in centuries to come become white? Yes they will. In time they will, unless they find comfort in their E to stay black then they don't need to change. Those who went through the transition of what Darwin called evolution (:50). of the physicality have in essence the E behind it, otherwise physicality would not change. All of you have been N makers, especially Chinese because they cook in hot Wok, which creates N materials, and you have been Gans makers because you put a salt in it and eat it. You all have done the transition without knowing that the E is the founder and changer of our physicality. Now we all need to understand this crossing point. Taoism explains everything in the physicality because the man has seen it and accepted it without knowing it. Now we understand that if the E had been fixed the Physicality would not have changed. It's the E that changes to be different to be more attractive to get attention, to become part of our P structure of the interaction of the fields of our brain, which interacts with our E. Go a step further. If I receive so much energy at a level that I can use part of it as E to change the physicality, now how can I get to the energy which sends the seed to become E, which is the energy of the soul. Then you find the path to the soul of the man. (:52). It's no good building a car if you don't understand how to build the road and how to drive, it's no good having the physicality of the man without knowing the road to his existence is the path through the E of the soul. when you understand this then through the E you can change the Physicality so rapidly that you become the camelian of the U. We have been there but we never understood, we never wanted to understand that the change in color of the Physicality, the race, color of eye, language, all has come and shall come through the confirmation of the changes through the soul which is handled through the E. Go back to the early teachings, and the medical, I always explained the existence of the man not only by the Physicality but by the E. .. the blood carrying the E, so you already had the key, you have been shown for years but you didn't understand. It is the blood that feels the cold and gives the information to the neural system that it needs to change otherwise it frosts and causes infection, that the neural S through the E and confirmation of the change in physicality (:54). to the E, in giving the message to the soul, if you want to be on this planet the condition is so and I need something new, a different energy which comes from the soul to the E, which it in turn transfers to the physicality. Now you understand in total what you call the evolution of the man, not the P part which is Darwinism. I have opened the key in the past 20 minutes to man's life in the space and I hope, wish, and pray that the Man will see the path. This is the path to space, the reality of understanding that the change and evolution of Physicality in essence is triggered by understanding of the E and the soul, which is itself in interaction with the soul of the planet and the U, and accordingly changes the E and the ?? of Physicality, so man becomes ?? inter-dimensional, you don't exist in just one dimension but in total existence of the One Dimension, the totality in respect to understanding of the strength of the work of the position, which is the soul of the earth and in position in respect to the soul of the Physicality of the U. (:56). then you'll understand how rapidly you'll change according to

the environment. This is the key, the master behind the creation of life, not only on this planet but across the U. This is the key to be able to live amongst the others who are (already) living amongst us, our soul is in contact and communication with them but in physicality we are behind a veil of our own ignorance, because we would like to be in the world of Physicality. Now that we become passengers of the U we have to accept the totality in all 3 dimensions of it, because without the one the other can't exist, with the Principle, the Transition which is the E, and the Physicality which is matter state of manifestation that the point ?? shall not exist. If you look at it a vapor in essence is still water, but according to its environment it shows itself in that way (a vapor). So does it mean that even a drop of water has more sense of its evolution then the man himself, ?? calls himself ?? evolution. So do we need to build a Ss to trust that we keep our soul in matter of Physicality or do we go a step further to understand that one can use his own soul to travel the depths of the U without the tangibility of the SS. (:58). As I said before we don't just teach the human race but we teach across the U, as my voice is my soul, it is heard across. For those who are in the next stage of the development of the crossing into another dimension in travels in the depth of the U. In time Man will understand the message as he matures. It's very interesting how we are teaching, at this time we have put the understanding of Man at the age of nursery, and we teach him along with the ones who are in the 6th class, and the ones who are with diploma , all in the same class while teaching the knowledge of the U. And what is not understood by the kindergarteners playing in the front row means a lot for those who are philosophers, etc in the back row. And Man is at the stage of infancy playing in the front row. As my blood brother used to say, it just goes over my head. Because then I have to understand it, then make changes, and what the changes will come to. (1:00). You have to start understanding the path between the E and Physicality and the soul, then you'll understand in what strength of the soul you need to have the perfect combination of the feeding that leaves you with the manifestation of Physicality at any point of the reference across the U. The soul is the creator of the Man, the only problem we have is that we called it a man, because the soul of the creator is manifested in the Physicality of the created. So is the soul the god of the Man. Has Man been in delusion of finding a creator (outside) where the creator sits in himself, through the creation of his own existence according to the accumulation and strength of the soul. I made Man in the image of Myself. I am the soul and through it I create the E which is transformation of the energy of Me, gives the Physicality of Me. (1:02). Is there a need for a Church or prophets which Man has hung on to so fast, (so as) not to be able to go through the transition of understanding the work of himself and his soul. We don't teach any more, we inspire the soul of man to evolve and be educated by themselves. The Churches and Mosques to abuse the Man are shut from now on. It's the Man who has to find the path to his soul and to educate himself according to the point (place) in the U where he arrives, because not many others will ?? arrive at that point and there is no book of reference. You can't go back to earth or to a book in the library to find out what it says about this place, because you are at the place right then you have to understand that it is the strength of your soul which dictates your manifestation of Physicality in that environment. It's you through the strength of your E that has to be the negotiator between the Physicality and the Soul. But there is one point, the Soul shines all the time at the same strength, it's the E that is the filter to the dimension of the Physicality. Then you understand that all the souls are equal in the eye of the creation of

the soul, it's man who needs to understand through his E how and where to position and which filter that it gives the manifestation of the body of the man at the point of manifestation, where you want to manifest or can you in different dimensions across. (1:04). This is what the stars do, it radiates its fields and according to the strength of its fields in different positions of its shell of its Plasma, you have Jupiter and Venus, so the energy of the strength of the star itself has not changed but according to the strength and the position it manifests itself in different features and structures. Can we through are E be visible and tangible in different strengths of dimensions, yes. So do stars and the essence of the central point of the U, as its fields travel outward at different field strength positions leads to creation of billions of galaxies, stars, planets, moons and dusts, but in essence they all came from the center. So can the Man to understand itself through the center of his Soul create and be able to live in different conditions within itself, the answer is yes. Man will learn this very soon once you become the passengers of the space. This is the breakthrough, the key, is what we have been trying to teach, but we have had to play it step by step. (1:06). What's the material, the Gans and how you make it, but the end product, we always focused on the energy, the fields, and now you understand those fields as the soul of the Man. Today we have written the science of the man which is ?? been accepted for centuries ... ?? what we call the evolution. Now we add to that knowledge and for man to accept these last 30 minutes of teaching will take years, because he has accepted something and now he has to add to it that the cause is different. So I have re-written the history of Man. Touch yourself, your fingers and understand what E was there to put the nail there, and try to understand the strength of the E which gives the nail, skin, finger, arm and everything else. Or understand the entirety of the total ... your Emotion. and then understand the totality of the E, all these tears, happiness, joy, fear, movement, all comes with different filters from the source which is the soul. The mistake has been, 'man only uses 5% of the brain and the other 95% is never used', because that was easy to fool everybody. (1:08). But now we know that every single cell of the brain works 24 hours a day without stop from the time of inception to the change of physicality to another dimension. Because how do you know when and which cell is time to change, which cell of the heart or bone, how long has it been there, whether it had an accident and now the energy is not there and not it has to be repaired in 2 years time from today, or you cut yourself and the skin was not due to be replaced in another 20 days but now there is an emergency and it has to be changed, because otherwise it bleeds and new skin comes. Prioritizing the E of the pain of the Physicality of the cut, find this the path to understanding of how you can interact with your E and through it you can understand the work of your soul, become the cut in the life of the Physicality of yourself that with it you understand the cut and the path of your E and through it to understand the filters which you have created that with it you interact with its environment, and at the other end of the filter what is received from the soul. Then you become passengers of the space and you walk out of the SS where there is no land or what you are used to, but you see that it is a thriving community and you become part of it and you don't have the fear of falling through, as you have already fallen through the passage of the environment of the level of the strength of them. If I leave you in the middle of ?? and you try to survive before you hit the ground. (1:10). What happened if I leave you in the depth of space with a community that has no tangible planet for you to walk on, but they have their life and existence, and you want to be part

of it, you're so beautiful and you never see any mountain waterfall but it just showers through, but it's not water it's a mirage of the fields showering through, but it gives your imagination the strength of the understanding of the law of water as you have seen on earth, that is the only way that you can confirm it. In the depth of the U the flow of the fields will confirm the rivers of life and not the waters. This is what the Man has to understand, we have to educate him in the new dimensions of the space to understand and see the totality, then ask yourself why do I have a shorter finger, what does it confirm in respect to my E, why was I born to be in such a shape with the structure of fingers, toes and eyes, what am I taking from the environment to confirm my existence and what am I giving through my E, if you understand that then you can interact with your own E and through it the soul that if there is a need to extend your finger you can do so, because in the environment at that point you need to. I have seen this happening in the lifespan of one young girl (the girl who needed longer fingers to play the violin). Man has the ability to change the speed of creating what he needs. (1:12). Man doesn't need the spacesuit to go into space, but we have to go through that process of learning to trust that we can exist in the space of the gaseous ?? of our part. How much can we trust our ?? to exist in whatever part of the U. What we make a filter of becomes the extent of what we can manifest. Souls without the filters of the E become the passengers of the Unicose, and not many have managed that because of the fear of not understanding the totality of the strength of the soul itself. Many souls in the U have tried to cross but the fear of demise have ?? become their demands. Trust in the existence is the key to the existence, and is 'I do not take and I do not take what it to be taken but what is given for me to exist. Now make tools to show the strength of your E and to measure it because you're a human and you still live in the Northern part of this planet and not in Africa where there is no scale. Find the scale of the E within the strength of the soul and not by equipment, (1:14). is because they fail in every point. Trust in the soul and believe in the existence of the operation of it through the Physicality of the manifestation of it ?? the Physicality of the man, tree, plant or whatever. Now make the tools to measure because otherwise you don't even believe yourself that you can transform ?? and to elevate your own soul. The trust of the man has been taken from him partially due to environmental conditions, initially when the man started moving, and then later by those who saw the fear and weakness of man in his environment and they became the biggest menace to the life of humanity in the name of the priests and god knows what, from the old times to the present. Man has to understand the totality to release himself from the shackles of the fear put into him by those who want to control. I am free in all dimensions of the U, because I have no attachment. I wonder how many of you can say that? Many times I have said that I am ashamed to be in the body of a man, because the body of man has accepted the demise of himself, by the subordinates of himself, he has not realized how much knowledge he carries. (1:16). in himself, then why should he become subordinate. It is us that allows our physicality to be "dimensionized" by those who want to abuse it, and it is us who have to rise to the level of understanding of our own soul that we do not need to be ?? parted. Now I wonder how many tools of measurement you need to make, or you have found the measurement of your own E and soul. Blessed are those who understand. Remember 2 points, you pray the only bank which you are saving that energy from ?? the prayer, is your own soul. One point, if you are in the space and you say I have to go to Church or Mosque, etc. then they see that there is a guy there who hasn't understood, the

village man is here. try to find a path in any shape or form ?? which in your Soul and E and Physicality, and in finding that path you mature to exist across the U. (1:18). Because then you know what you need from the Source to show itself in Physicality at the point of the need, so you become the camelians of your own Physicality in the dimension and strength of the Soul. This is the key. You are a car driving down the road and you switch it and you become a racing car at high speed, and there is no difference in the workings of the man, you have to know which switch, when, and what is the reason, and the essence of the change. Any Questions. What is the advantage to get out of time of the physical U when one exteriorizes by oneself through the tools of reactors and SF, etc. The advantage comes in what gives you the pleasure of existence and what dimension. In the UC and in operation of the U. There are no exams to pass or Masters to certify to get to another course. (1:20). The change of time and position is in respect to what you would like to have at that point. I have clearly explained this in the past year and I do again. As we enter into the new dimensions of the transformation of the Man to open the passages of the UC and in traveling in the depths of the U, man will come to understand something very strange, some of what you call stars, are in a way stars, they are existing entities but in fact if you translate it to the words of the man, they are Spaceships, but you say they have been there since the time I looked into the sky. A million years in the space is no time. When I park to watch the view, I park which to you is a million years, to the one in Saturn is 20 years and to another it's 1 second. To me I am a passenger, a viewer, I park the car and I watch. In time Man will come to understand that some of what you call stars are SS in the eyes of the U, they are carrying passengers, time doesn't exist the way man measures it. because in the soul there is no time. (1:22). In the dimension of physicality you have time because you have to transfer the energies which come from the soul to another in respect to the environment. If you understand, then why do you change your skin every 28 days, why not every 1000 years, it's because the transfer of energy in and out is so much that it takes so much energy from it that it can't exist more then that. Man never understood this. When you shower you wash the old skin off, but why every 28 days, the energy transfer of the Aura are continuous fields transfer that can not be more then 28 days (20 days) because the cells release all their energy. Now change it to every 1,000 years ?? then you find out it is still 28 days, but it's on the terms he wants to call it. Time is irrelevant, it doesn't exist because it is the E and the field strength which changes according to what it needs and what is available. So when we go to space we'll stop to see a new car, or have you seen this car with the yellow color, etc. we thought it was a star up to now but now we have the same knowledge and understanding, (1:24). the same technology of understanding the reality, you see there are not many stars on the horizon of the man, there are many ships. Q: I have been studying spirituality on a very high level, 20 years. the older religions are abusers. ??? (confused). when you get out of time, body. .. if you get out of body you get out of time, right? No, you don't need to get out of your body, you exist within new parameters and dimensions, which you call your new body, or new dimensions that you have created. You can't get out of your body because the body is part of your E and Soul. (1:28). Have you had the experience of getting out of your body? Everything is within me I don't need to get out of my body, to get out to get to what? (they talk some ..) Let me repeat again, I am what I am. Yes, you are quite a great man, I can tell you, have you heard the proposition that we are spirit ?? What do you call the spirit or soul? .. I call it the essence of the creation, what you come

from. Is it what you call the Principle Matter in your book? In a way, yes. What is the difference between the MaGrav fields forces and the Principle Matter? The PM is the essence and the M G fields is what the Essence radiates out and what it receives from its environment, one is the totality and the other is the line of communication.(1:30). MaGrav, M and G is the line of communication in respect to the totality and its environment, one is the tools and the other is the Essence of the existence. You mean the MaGrav are the tools? Yes, they are channels where you receive and what you give. But they are channels between what and what? It depends on how you understand it, you have the Sun, it's the soul, and the fields which radiate outward from the Sun leads to creation of different entities in the shell of the Sun, and then some of the fields return back to itself because of the pull of itself, G of itself, so one is M what it gives out and the other is G what it takes in, what is not used. Is the Sun a Pl or matter? It's a Plasma. The manifestation of any sun is at a point where its strength changes to a matter state of the strength of what we call the surface of it ... when the Sun radiates out within its G M fields the point of the strength of its matter state at the higher level we see the surface of the Sun or the manifestation of the P existence of it and then what we see as a shell is the manifestation of the existence in respect to its environment, this is what we call the Solar S. (1:32). or the shell of it. I have explained this is book #4, I hope one day to publish it, the manifestation of the light on the surface of the Sun is the interaction of what has been reduced from the Pl to the matter, the interaction of these matter strength, the full strength of the Pl field of the center creates what we call the light of the Sun. If the strength of higher order to the matter state conversion is not done on the surface there would be no dimension the light of the Sun's surface would go to the boundary of its own Pl shell or what we call the Solar S, at the point of the interaction of the field strength of the given strength in respect to the center is where what we call matter strength at that strength is manifested. You call it the surface of the Sun and once that is created then it interacts with what is created from the higher strength fields internally, and that interaction creates the visual effects of what we see on the surface and we call it the Sun. This is why we see Sun flares, it's very ridicules what the plasma physicists say ?? about it. But in the spreading of the fields it's very much like the interaction of the fields of the Pl of the Sun with the Pl of the Earth leads to creation of the light on the earth, on the interaction of the phase balance btn the 4 field forces. (1:34). and what earth MG fields pull to themselves creates the light what we call daylight, on the facing side of the Sun. The same light that crosses the Solar S doesn't come into contact with anything therefore we don't see the light, the same principle applies to the surface of the Sun, it's the interaction of the matter state at that strength with the fields strength of the MG field of the center which is of a higher order instead of interfacing at the surface of what we call the upper atmosphere of the earth, now this interact is closer to the higher strength so it creates a stronger light that we can see it radiating across the Pl of its own shell, which we call the Solar S. At the same time as it's weaker on the boundary but stronger in respect to the environment of the Galaxy, these fields are reflected back because these fields are strong enough to get through, they get pulled back by the G fields of the Sun itself, so it feeds itself. But at the same time some of these fields feed into the strength of the Galaxy, but at the same time some of the rays of the Galaxy penetrate the shell of the Sun and they enter and become part of the field forces of the Sun. We call what comes back G fields and what goes out we call M, but the Sun itself is the essence, the source. If you look at it the Sun is the

soul. The time of transition of the surface of the Sun to the environment of where it comes to touch the surface of the earth, or the upper atmosphere of the earth, is the E, which gives ?? warmer .. (1:36). further out it will be weaker and thus colder, then when it interacts with this part, earth, we get the residue, it creates the manifestation of the Physicality of the existence of an entity we call earth. So the Sun itself dictates how it is manifested in different dimensions according to its strength. That shall be the understanding of the man in respect to his own soul. There is no difference in the knowledge across the U, Man doesn't understand, we haven't seen the Sun creating a Church for himself to pray to. (the man interrupts to add his own views ..) Everyone is in their own universe. Keshe agrees. the man continues there is your own U and then another where you interact with plants and animals etc.. (1:38). Let me tell you something what has caused a lot of problems with religious people and me. The light of the Sun changes according to its environment and what it comes to be, how come Man is the only animal on this planet that goes to Church? ... we have created that out of our own feebleness. ... I have been in Church of Scientology, now they are the most abusers. Put it this way, when we drive across Accra we see so many Churches, we laugh and say we are going to open a Church of Gans. (1:40). You have to understand how the Christianities history went, the Catholics got divided into the protestants, the Africans have taken it a step further, now everyman in Africa makes a Church, and they don't pay taxes to government. There are hundreds of new Churches. It's the weakness of man that allows this abuse. The Africans got wise to it and now they don't need to send any money to the Church of England or Vatican. (1:42). (The man says) Ron Hubbard said that Africa will save the world, that they are more spiritual and open their arms to you. We shall see, the Africans have 2 Churches the Christ and the old voodoo religion. Last month the Gambian president had to leave and he took more of the old statues then the new. (1:44). This guy says that he watched almost all of Keshe workshops and that he says the same as Ron Hubbard, who said he will come back as a political leader, and when you say that you are the leader of earth, then I thought Ron Hubbard is back, I don't know if you know that the spirit can split in two? It depends on the point of view, it's always a male and female if you call it, but in a way it is always the essence of existence. (1:46). I was explaining to Armen that when you make a reactor, if you don't have another one that it can give to and take, you can't show the existence of its fields. It's like when you hold a magnet in your hand, you don't know it's a magnet until you bring something that it can interact with (iron) that it can confirm its existence. It's always existence of the creator. It's difficult to understand. It is very simple to comprehend, we have a soul and another one which we share our soul with that it can elevate the soul, we call it male and female, we need a partner irrespective of sexuality to be able to manifest or confirm our own existence. Yeah but this is the P part of man ... There is no way we can confirm the existence, creator, unless it can interact with something to confirm its existence, even though it can be out of itself. We can't confirm the existence of the Sun if we don't have another dimension of strength to confirm it or by creation of its own strength in reduction by existence (?creation) of moon, earth and the rest. ... I am so happy to talk to you I don't know what to say .. There is a Sheikh who says he is the reincarnation of Mohammad, I think he could help you promote KF through all the mussel men, if you want I could introduce him to you. No problem you can contact him. (1:49). Let me explain, ... you have to understand what is understood by the Islamic

world very clearly, the beginning of the KF when we developed and spread the knowledge across the Middle East, it was understood that it would bring changes, come across the path of certain beliefs in the Islamic world. If you are not grown up in the Middle East you wont understand. It will change a lot of things in respect to how they have been abusing the man. Originally he or a couple of them are listeners, in the beginning they wanted to send students for the first team, which Armen was a part of, people from Jeddah University. (1:51). The leaders spoke to me as to the effect of these teaching to the Islamic world, that this would bring changes. One of the questions we had from the Jeddah panel that were assigned to make a decision ... I had to explains that the belief in Mohammad has to be in the heart of the man and not on the map and position of Mecca. This was very hard for them to understand and from that point we started seeing a lot of opposition, from the Islamic world in respect to the KF. I explained it is very simple that when you go into space the earth rotates and you are traveling in many dimensions, how are you going to pray to Mecca unless it is in your heart. And this was too hard for them to understand. Taking that Physicality away from them is not something that they could relate to. I had the same problem in Iran, the problem is very heavy in Islamic world. In Christianity you believe in the cross and doesn't matter in what direction you put it. In Islam it is fixed, you have a compass and wherever you go it shows Mecca. Now you show me a 3D compass that can point to Mecca anywhere in the U. (1:53). Another issue is what happens in determining on this planet ... Man has to carry the belief and correctness of conduct in the heart and soul. Whereas now he sees his Physicality as his soul and heart and his brain, this is the biggest problem which KF has with the Islamic world. I had the same problem with Ayatollah Khomeini in Iran, they don't call me atheist but he puts a point that we don't have an answer for now, we don't know how to answer it. the guy goes on to say the Jews know the truth about Jesus that he was really a bad guy and a homosexual and something at the end of his life he got enlightened ..
(2:01). I have to stop you. When it comes to prophets we have to understand what benefit it has brought to those who made him a prophet afterwards in what shape or form. The guy says, when you say you are the light you are more then these prophets. ... We are going to end this conversation now and we can always talk in the future ... in the process of this cycle of educating man we have brought a balance btn the science and the belief of the man and the soul to understand they are the same. In this time the prophets of the science and the soul shall be the same. Whereas before we had the prophets and they abused the man they way they wanted because it was hidden. (2:03). The well known scientists are still prophets but they didn't carry the pen of the soul to abuse the man. In this cycle we teach both the path to the soul, and the way this path works, you call One Religion and One Science, this is the way I teach, the path to the soul and comparing it to the path in Physicality of the ?? we bring the science and religion together as one, in this way there is no way for the man to be abused again, because this is the essence of the knowledge of the U. That's why there are no Temples in the U. We are the messengers of the U. Any other questions. (2:05). Polish guy draws a skull and some points, in the middle is our soul. he mentions the plasma balls when you touch the glass the rays go there. He compares it to the soul. ... Keshe says, everything ends up with the soul but it depends on what you want to pick up in the passage. (2:08). If you understand the topology of the brain, where you put your finger on the skull, inside is the P matter

condition, closer in is the E part, in the center is the soul. So no matter where you put your finger you still cross the line to the soul. But it's how you understand crossing the line touches the E of fear or of joy. Can we reduce the boundaries so that the Physicality becomes very little. (2:10). If man is able to do this, then he can control everything directly from the essence of the creation in the center, because now you decide the filtering, where in this situation the physicality is irrelevant. If you put your hands on a part of the brain and see if this effects your finger, for example, then if there is joy then this point is the joy part of the brain. The man says we know that the left and right side of the body (brain) is polarized, so if we put left hand on forehead and right to the back we'll get a crossing in the center of skull. Let me explain, this is the mystery of the P brain and the work of the soul. In the P life we have a proton and electron where the bigger dictates the direction of rotation or where the fields will go, but the operation of the soul is very much different. (2:12). Where the soul's strongest is sitting in the middle and it covers itself by its own tangibility. With an electron and a proton you have a point of reference, whereas with the soul you have the totality of the Pl, both at level of soul and then the E. The E is the electron of the Principle or the Proton, but it covers it in its totality. This is the secret of the whole thing in respect to existence of the man, it's so compact with the matter that the reduction is so strong that it ends up with the P boundary of the P brain of man. then where the E touches in the relevance of the Physicality it leads to the creation of the P body. It has to be in 2 halves (2 parts of brain ?) otherwise it won't work, there needs to be a potential difference otherwise there is no flow. Someone in the office came, her young husband, 38, had a stroke, I looked at the MRI and didn't see any brain damage. She said he is paralyzed on the right side. (2:14). The MRI didn't show any destruction of any cells, there's a sporadic spread of the fields but no destruction the way we see with the normal stroke. He can close the hand, arm and leg but he can't open them again, I said, the life of the man is divided in 2 levels, contraction and retraction, or we call it Na and K junction, in contracting and opening. The blood tests showed a shortage of K and they have been giving a lot of injections for months. Yes, but they haven't solved the Na depletion because is has locked the gate (why he can't open limbs). The brain works the same one carries a slightly different fields strength then the other, otherwise it doesn't exist and through the E or the motion of the fields from one side to the other they their transformation of information through the soul. That crossing through has a point of reference, this crossing from one half to the other has the point of interaction (in the center) which is the point of the existence of the soul. (2:16). If you look at the shape and position of the brain, the side view, the bottom part which is missing to make it a full Pl, has converted itself into the Physicality of the man. So if you reduce the strength of the Physicality, back in, it will add to the strength of the E and the soul. Then the soul has a direct effect on the manifestation of the Physicality, and that is what we were trying to teach today, then you don't need a spacesuit, or train like a fish for 7 years like they do in NASA to change a screw. You become a multi-tool of the U according to where you are. You have to understand how you can use your Physicality to reach through your E to your Soul, and this is what we need in the space otherwise you'll suffer. Man will forever change one spacesuit to another to survive one condition after another, like wearing a special suit to go into the deep sea. We are trying to teach man that wherever he rests his head will be his home. (2:18). Do you want help from European engineers in Ghana because you said that you want the African to regain trust

in themselves. We welcome all help, but now we want to educate the people of Ghana in Pl T so we don't become an island. (2:20). We have put 2 young girls in charge of KF Ghana both Nuclear degreed scientists. We want to start teaching a vast number of people in Africa in plasma technology. We will not teach them that they have to look to the white man on how to survive or develop the technology, but on the other hand the share of knowledge is needed to educate. Africa has been deprived of the Internet so they have not been so in-depth educated. We are color and race blind but looking at man's track record on what he has done in regards to the races it, but we have to trust, it will not be good. What causes most of the problem for me here is the putting of one race as superior to the other. We huge amount of support. (2:23). We haven't seen any massive donations from the public because they are too busy in whatever it is they do. We will ask governments to support. The benefit of this will be for the whole of Africa. I am spending 20 hours a day to not repeat the mistakes of the past, so that one isn't ahead of the other, or become there subjects. Your support will be accepted, but your knowledge will be accepted but not as superiority of the race, and this is my problem. We need to change the course of humanity on all sides in respect to degrees, colors and nationalities and it's not easy. (2:25). KF does everything on our own and those around us are pocketing everything, we give our blessing but yes they need to mature. We need huge support in space technology because N and Gans is easy but space development is where my heart and soul and work, is the main part. I have help at this level from Armen and John in AZ but we don't see much help from the rest of KF supporters. We need help to develop ways to measure the Pl. Once we finish the Ghana developments I will go back into the lab you'll hardly hear from me except Thursdays because this is where I enjoy to do and I can add to the knowledge. Go to the radio stations and explain the knowledge. (2:27). Now they go on the Google and see a bunch of rubbish and say the KF is irrelevant. The man in Ghana press who bombarded the public against KF, the government is now going to issue arrest for him. KF Gans water can walk people out of Diabetes in a few days. (2:29). One man under a king and a police officer have been responsible for destroying the most advanced technology for humanity. Talks about the opposition against KF ... we need to go outward...
(2:41). ... you walked into the teaching room with the black man to kill me, the Italian police now know. Don't be afraid to teach, this technology is to free the man from disease, energy and everything else. The ones that have done the work in China will soon be on the news. The process is to share knowledge freely and understood how it will change our lives. We are not here to go against corporations adn pharmaceuticals, we are actually asking them to make these Gans' so it makes it easier for the others to use. The scientists here are showing that with the right combinations of waters diabetes gone in 5 days, typhoid, etc. The technology is amazing for man. (2:44). I started getting sick when he started writing the book with me. I was given a poison, exactly the way John gave me the poison in the Insano (Italy), he was taking photographs of me in the hospital to tell his bosses that I would be dead soon his mission accomplished, then he mistaken took the poison himself and had a heart attack. All the documents are in the hospital, the same way John gave me a cup of soup to kill me. Arsenic causes heart attack. (2:46). The biggest problems for humanity now is stroke and heart attack mainly through high BP. (2:50). Securities please release information on DL, Sylvester, etc. all the bank accounts in Panama. Letters from Knights of Malta. (2:58). (3:04). We have the technology on

energy, health, etc... to save mankind, how we need to understand how it works and be open about what we have, to communicate knowledge across borders, nations, that we develop the next race of human to be independent, to be trustworthy of himself that he doesn't do a crime that he allows him to become close to his own soul that he can survive the span of the U. This is our (problem) vision of changing mankind. And these people (DL) have a lot of problem because this way doesn't allow them, the Ghana police are looking into how they traffic children out of orphanages, 200 a year disappear and found in Antwerp. (3:06). Look at the Matrix company in US and see how it connects with Mr. Smart, DL, set up to defraud Belgium's. We are going to release the names of the children you killed. KF Supporters be proud you carry the technology that can change humanity after thousands of years in spirit, soul, survival and everything else. Not to be ducking and hiding because of one man who has a paymaster and police officer who picks up children at the airport. (3:08). DL wanted to get rid of Keshe and then take over the KF. (3:11). (3:16). Understand one thing, until we wash what needs to be washed (these murders and pedophilia), we can't go to the next step, because the burden of us not serving humanity will keep us back. We don't need conferences or to gather in places, we gather and spread the knowledge. If you are Dutch call and ask the police to fully investigate Mr. Slouch, they have a full dossier on the accounts to kill the compression scientist, this is our chance to serve humanity. They killed the man with poison, the family was poor and they called them to get the briefcase which was carrying the code of the compression software which is now worth billions, they said to the wife to bring the briefcase for 2 million gilders the rest is ours. The family being desperate they delivered it to the lawyer, the briefcase disappears and 19 years later the family hasn't been paid a cent. The briefcase appeared 8 years later in Belgium and they killed 2 people for it. Again fingerprints of DL on both of them. (3:18). Read about Mr. Sollot, they the same poison to kill him. The Backmann case. (3:22). .. they killed Fabio, we owe this to Fabio to put this into public, I put a lot of resources and time to this because I made one promise to the soul of Fabio in Italy that I will catch his murderers. I owe this to the women Naomi, that this man in Belgium planned the death of both of them, 2 Albanian drivers trapping them to get them to kill me. It wasn't one truck, 2 Albanian trucks trapped Fabio, now you know more and we'll release more. This is documented by the Italian police, they knew he was on the same route as me from the office at the same time, the informers told them, but somehow I passed them, and they (assassins) didn't recognize it, they were to shoot me while I was attempting to help Fabio, now you know the process, 2 Albanian drivers with false documentation. We'll do the job and perfectly, Stanley got 25 years in prison. Be proud of what you do and teach openly.

end.

163rd Knowledge Seekers Workshop March 16th, 2017

(The first hour discloses more about DL and his murders and gives details of Fabio's death, How the brain filters the fields through the emotions to create the physicality, The changes in man's evolution were due to emotions and we must learn how to control our emotions that we can immediately change our physicality to match the conditions of the environment where we land in the universe, We have to develop a way to scientifically measure the plasma, Use of pendulum to measure fields,)

(:13). I was asked in respect to the back end of last weeks teaching, why have we gone and opened the DL case. We have been told by the Securities that when we release certain things it brings back more information to them. Our disclosures and their discoveries of fake websites, it shows defrauding Belgium Government since 1980's. We were asked why do you carry on with this. You have to understand one thing our problem is not ours, these people are creating problems for themselves as we saw with Sterling, they have got away with so much that they challenge us to see if you can capture me. One of their comments said, I am still free. So they admit they're criminals and that has pushed the police to go further. (:15). Since the disclosures of last week of the companies in Panama, Luxemburg, Australia and Singapore which hasn't been released yet all brings to one point, the set up to destroy scientists and their work, and to steal their work is a natural habit. I thank the Belgium public for giving us a lot of information because the know the language and can get more info. If you find more please send it to webmaster. It's amazing what has been released since last week, the police have released facts about Sylvester and the Knights of Malta. There is a pattern with these guys because they all work the same and they end up in Singapore, he was there in February this year. This is where they get paid by DL. New info has been revealed. Some of you were wondering how one man could have so many patent applications, actually he doesn't have any patents to his own name. He told us where he put them but we didn't understand, now the Belgium public has found it out. (:18). (:38). Keshe reads letter. (:45). In Ghana they are working on a warrant for DL's arrest in child trafficking. It's done by white Belgium girls in orphanages. (1:11). We taught in the past few weeks how you can give E direction into the soul or to Physicality. How can we control the E that we can act and interact with Physicality that it can change instantaneous. The principle of transfer of physical conducts of Pl. The source doesn't change that much, the strength of the Sun in billions of years is still the same in the Pl structure of the Solar S, it's the strength in the distance of the field in the path of the MG field from the Sun which dictates the manifestation of the reality of the entity like Earth, Jupiter, Saturn and the rest. It's the filtering of the strength which gives you the end product, so you understand that the E is the filter, understanding the operation of the filter which is your E which will give you the finger, toe, height, color, size, or accepting higher temperature, the pressures and the rest. We have to learn how to use these filters. (1:13). How do we use our E as filter that with it we can change our P manifestation according to the environment in which we arrive at. Because we can't change the soul, which is the giver, the beginning and the end, is equal in every dimension, if filtering of the fields of the Sun are blocked on one side we see the reduction of the heat which comes to earth or if it is a massive explosion, what is in our direction we get the vast of it. They call these solar flares then we get ?? vac with it, then it put out the Canadian Internet years ago, it is the same as a stroke when the energy comes and the Physicality and E can't handle it and damages the P and you get paralysis

and the rest. There is a similarity in the work of the U, if you understand the work of our brain, our soul is not something that sits somewhere but is the creator of our Physicality and what we have chosen to call soul, according to the filters put across it by the P structure of reducing the strength of the source (1:15). ends up in the operation and creation of the brain where in interaction with the environment ends up with the Physicality of the man in controlled, and the direction of the P part of the brain. We have to understand how we can control our E that can lead to the rapid change of the Physicality according to the atmosphere. This means that you go to a very high density environment MG field, with the structure of your body now and the brain not being in control of the E you get dissolved in the higher strength. But now if you understood, and you can control your E, that you can immediately go to the higher strength and absorb less in the structure of the brain energies, then you become parallel with the environment, and your body takes the structure of your environment then you can stay alive. Let me explain another way, you know when you get hurt, you get afraid, you start sweating and changing the color of your face... now you have to go a step further, we know how to do it, but because of the condition of this atmosphere (1:17). of this planet we never have to practice it. The way you turn red when you get shy, it's the E that effects the Physicality in receiving so much energy from the soul that manifests itself in different colors. We know that man has in his structure, that if he doesn't want something he can even through the E dictate the cutting off of a limb or part of the body. We do it so perfectly that we call it psychosomatic. What is psychosomatic? psycho is E. We are at the same position with this as we are with the Chinese wok making N coating and eating Gans for centuries, but we never understood, now we have to understand and become masters in this process. It's part of us, the reaction of the soul of the man is the same. (the black man went to China and changed into a China man over thousands of years through his E). The black skinned man came from the east coast of central Africa going to Siberia and becoming the most beautiful skin of white, blond hair and blue eyes. You put the same man coming out of Africa and due to the conditions of the environment he becomes Norwegian, blond, different structure. (1:19). You send him back, change his environment again and put him to South America and his physical structure (skin) changes again. The environment has changed the man according to the E of the survival. You send him back again to Australia and you get Aborigines. Now we understand that it is the E in respect to the environment gives us the Physicality and its appearance. But in space we don't have 10,000 years to wait for the change. The conditions of the outside environment dictates the transformation of the reduction of the strength, or the filtering the fields of the soul, that the filtering allows the manifestation of a new entity as we wish and to be able to live in the environment that we have arrived in. It is for us to become the balancer and it's that environment which dictates the appearance. This is important, then you see that in space you don't need a spacesuit. We already wear a spacesuit called the skin of the man. It's the best suit you could ever make, it regenerates itself, changes its color, makes different presentation if you get angry or shy, it grows fingers shorter if the environment dictates. (1:21). Now this mini trial of the man for thousands of years on this planet is going to be opened to the bigger tribe in the span of the U. This is the truth about the space program and how man will go into space not that we understand the science of the space T and the essence of the creation through the work of the Pl. I was talking to a journalist, I said what is your problem why do you think you can't fly from

Accra into space? The banner will go up soon, "Fly to space from Accra", they laugh, then we explain in a simple way, they say, what, now we become the leader, better then the Americans? Why not? We learn with them, they are brothers. They made the steps for us to be able to do something else. With the spaceship program I will bring all the nations to become one, that is the ultimate goal. We give the teachings free and all the workshops especially since Christmas when we started the space technology, will be repeated across this planet many billions of times. (1:23). You go into a box and decide how to make your presentation, control the pressure, the M fields that you start learning how to mutate. Right now these things are beyond your imagination, in 5 to 10 years you'll speak about it as if man has been in space for a lifetime. I always tell the story of the man who went to Russia and came back to Iran and told about a metal thing that fly's and you get on it (airplane), they all thought he was crazy and 5 years later they built the first airport in Iran, then they said the gut wasn't crazy but he saw the future. The leaders in this T will merge with the leading scientists in the space programs will bring the T to normality like computers, we'll just walk into it. The understanding of the soul in the filtering of teh E by the brain will dictate how much the structure of the brain will change and we become the comelian of space like the rest of teh UC, we'll understand the essence of the creation and the way we are created according to the space and the dimension they are in, and if we can find similarities in the strength then we'll keep part of what we are and the other part will change to fit into the environment and we become the passengers of the U. (1:25). The work of the Universal and World Councils, which I left them free, I deliberately don't interfere with any of them, because they have to find their way, it's the job of teh 6 members of teh W Council to get together, you don't need me, I don't set the standard or interfere. I just sit and say to myself when are these 6 going to meet and start making the conditions that their wishes become the wish of humanity. I don't head any meeting. Your excellencies, you are failing humanity. It's the job of all 6 of you to start and set it, your wish will be the wish of humanity. We have chosen the most beautiful souls on this planet to be the members of the World C. I never called a meeting, but if you ask I will try to attend. I don't take part in the Universal C meetings because they have to learn themselves, not for me to set up ?? They have to learn how to be teh filter between the UC and Universal Council (earth) and humanity. You 6 excellencies are not doing your job. You have to set and issue your wishes that the humanity takes the course, because now you know that you are the filter btn the 2 sides. (1:27). It is teh Universal C in teh meeting coming up in Rome that together we set the course for humanity, the conditions for it, and it will be done. It has to be through the efforts of the souls of the Universal C, not by name, gather together and make decisions. You have been given the power! The 14 core members, their souls are with you, we support and do not interfere. 56

(1:32). Why do we see so many people of the UC in the shape of man, when they detect them or video them?

(1:38). The way you stand naked shows the operation of your soul and shows the filtering you have done to be in that manifestation. The men of space see the light of the soul of the man not the physicality which is subject to the environment, and it will be the same with the man, you'll become an expert in seeing things, where you see there is no

animosity and no need to fight, you want this it is yours, you can have part of my soul because you want to taste how I taste, have it, because I create the field for you to feel how I feel. I give it to you feely. The strange thing is that our soul has been doing this from the time of the inception of the soul, one has never made it open to the man, the manifestation of physicality on this Earth, because the atmospheric condition and position of this planet, in this Galaxy and Solar S, dictates for it to be this way. Please start testing, making cubes. Ali in Canada started and he went the wrong way in the development, and that put us somewhere away. We saw with Jackie going on that course but being in 2 dimensions of the earth, atmospheric, and the conditions were created, there were things touched. (1:40). I referred some people a few weeks ago, Farhrad or Richard, that they are doing some things in different ways because we have to set, it's for them to learn, not for you to boycott and torture them. Do you want me to tell how you others are doing things which is not the correct way, when we spoke about people they corrected their way, it is not to become anti or against, we don't go in the back and do things, in the front so that they teach you more and they learn more. We have to be open to be able to learn, not taking a ?? and boycotting and going the other way. You don't go to the Workshops to become, but to give. What I give is what I learn, and when you give you learn more. We saw the German group trying to boycott Farhrad because Keshe said this, yes they do things different then we taught, they learn, we don't do things in the background. Richard wrote to me, do you know what you said, ?? praised, ?? wants to learn from it that now you go to them and say now you know the correct way, show us the correct way because they learned it. You, humanity work totally opposite. Try to understand and you'll be the next people who make the next developments, structures, mistakes, and conditions. (1:42). It's you who has to be the pioneers of opening the doors. In a few years time a blacksmith will not exist nor the bread makers which we were dependent on for life. We will not touch bread, we'll have it in the museums because now we can absorb the energy and eat according to ... would you like to take bread to planet Zeus, it would not exist (there) it would only be energy gone. We'll carry the memory and taste of the bread because we have it in our AA. Try to make new environmental conditions, Ali became good at it but he lost his track and got pulled into other dimensions of whatever, and he is working on it. We saw it with Jackie, it was beautiful work that was going on with Jackie, but you have a problem in this condition, remember that once you leave the environment of this zone of creation you're ?? on, you have to live the condition of the atmospheric of this planet, it's not that you are any different, but you are traveling btn 2 spaces, it's up to you to condition yourself and understand. In the sea I need to go deep so I need a special suit, it looks funny if you walk into the McDonalds with a full diving gear. (1:44). It's the situation, the condition there doesn't apply here, because you're so P you haven't understood this. If you create the condition of the field strength of a given environment and you stay in it you'll behave that way. You experience new dimensions of life according to what you allow your filter, which is your brain to allow to manifest in Physicality. You will have many schools, now you have driving schools, and so many schools to learn things, and now they will change you'll have schools for planet Zeus condition, etc. I want to go to Zeus for holiday for 3 weeks and you go to practice for that condition, until you learn that you don't need to go to these schools, because now you learn how to transform and you won't have the fear of what's going to happen to me, because you convert when you get there, you evolve into it, because this is the way the

life works. The fear of the unknown has been the cause of this condition. As I told you very recently I spoke with one of the top guys responsible for NASA mission to Mars, he's a very good friend and he's responsible for landing a man on Mars in the next decade. He told me that I am boycotted by NASA nobody can speak to you. I said, how stupid the most advanced man in space technology is boycotted by the worst one (lowest technology), to show the meager understanding of totality. (1:46). that it puts shame on them or do we work together. He said. there is instruction from HQ of NASA, nobody can talk to you because it shows how stupid we are, you are talking too advanced then we can't show you're different. Very soon NASA will not exist this way, they have to teach us with their equipment financed in America government space technology, the Russian the same, to advance the man from space into a spaceship. And this is what you have to learn. We will make the swimming tanks of the different environments of the U, not for man to change a screw, because you made the screw ?? It will come from the man that when you put your hand and you know that this is something for me to connect this to this for the comfort of Air-conditioning it will appear, manifest because it is your wish. You know what needs to be, so you don't need to make, ?? give manifestation to the Physicality for what is needed. I will speak to you in 10 years time and then you'll see, and say to me how did you know. I am the messenger of the U, I can teach you everything, but you as children of man have to learn how to understand more and take the shackles of ignorance in respect to the new knowledge away from your eyes and your mind. You will walk through ?? the UC. We are here to bring peace to the man and deliver the message of the U. We are not here to enforce, we are here to enlighten, share knowledge and see you as equal, (1:48). and join us. I am the beginning and the end. You have to understand so you can get rid of the fear. There is no unknown, it is the lack of trying to know what we know and how we can convert it to our own understanding and intelligence. You'll be surprised when man in the next few weeks or months goes to space or when you create the condition so that you can see the others from other universe among us. How easy you speak their language. It was stupid of us, we were speaking French when we were trying to speak English, and now we understand the language of U, because the language of the U comes from the soul. And every entity has a center and it is all the same. You have to understand how to transfer the E from the tip of the finger to the center of the brain where it sits, and how fast you can change this, that in a condition that you brought in fits the environment. You never die, man will never die in the deep space. Accidents will happen when the fields get divided, you go through what we call Neutron division, but as long as there are no accidents man will survive the spans of U for millions of years. A thousand years according to man is a peanut, a drop of a pin in life of the U. They say the U is 14 billion years old, they don't even know how many billions of years. (1:50). It happened how many billions of years before by order of magnitude you don't have the tools to see it, you only see the matter part. When it comes to the crumb the stars and Galaxies are nothing but the crumbs of the work of the U, you never see, you don't have the intelligence at this point in time, until you go into space and live like the man of the U will you see the truth about the creation of the U. I am the creator and everything is transparent to all. You will say to yourself that you create yourself according to the environment. I made myself in the shape of myself, not I made man in the shape of the creator. I am the creator, because my soul, the creation of its energy dictates how I manifest myself. Teaching the human race has been nothing but

headaches and problems because man is afraid of his own dimensions of his existence. I'll tell you something that you'll start enjoying, try to understand, because you can do this on this planet, you have the facilities within the structure of your brain to achieve it, there is a limitation to it and a speed ??, try to change the color of one hand, if you're a white man to black and then walk into a house, you can do it, don't forget that you went from black to white, it's in your DNA and sits in your RNA. (1:52). You are not going very far, and try to change the other arm into yellow. In the beginning it might be horrendous but you'll teach them how to do, there is no need for make-up we carry the make-up of the U. 40

(2:00). There is no difference if you understand, I have yellow skin and look Chinese, it's so nice, such a pleasure, then you become yellow. Have you ever asked why people have different color skin, go in their soul and find out what they wish ?? Because at the moment the skin of the white shows education and graduation for abuse, I want to graduate (advance) to be abusive so I want to become a different color. Why not all the whites want to be black to become serene and become part of the other, why do we need color, why can't we all become transparent so it doesn't show where we come from, why don't the World Council and UC make ?? that from now on we stay at the power of the same structure but to the eye of beholder that we are all the same color. Your wish is your command that's why I don't attend any of your teachings because I can teach you so much but you misread it, you misconduct, this why you make your own path and teaching and you understand what you have to do. (2:02). .. the problem is not the education, it is openness of the mind, understanding the interaction of the fields ... there is no problem, it's openness of the acceptance, and applying the right way. It's the way things have to be for us to be intelligent to understand the work of the U. For us it's the reality of the space gap, at what field do you want to release to be in comparison to the environment of what to be. There is no need for a spacesuit. (2:04). and no need to go to a class to learn the language of planet Zeus because there they all speak the same language, the language of the soul of the man. The extent to what we can understand it and accept it, will be our own problem. Can we be a part of the reality of ourselves, can we change the situation with our own existence through our E. Can we feel our child without actually being physically with it, through the contact of the soul. ?? What do we want to bring in reality the capture of the life of the man. Do we understand the reality or do we escape into other dimensions. (2:06). In the end in one way or another we are all the same. The beauty is skin deep so it is with the UC, the souls are all the same. We will not look at the reality of the Physicality but at the reality of the essence of what we want to be shown. The clothes won't be there to hide in .. these teachings for you at this moment is far fetched, but in the coming time you'll ask yourself, how come we didn't see and understand it, without being put in the position you can't practice and understand, you can't dive on the ground, you need a pool of water, you have to create a condition that there is a water that you can swim in, create a condition that the field strength and dimension are equal to confirmation of existence without endangering the separation of division. (2:08). You will go into environments that allows the separation and division of your soul, what you call the soul of new born, because that soul will start gathering energy from the others, that it be sure ?? soul. This is how creation is done in the realms of the creator not with the physical sex that man has gotten used to. The conversion of the neutron to an electron

and a proton is the true existence of the division of the creation, and that shall be it for the soul of the man. The distance of the proton within it in conjunction of the others, to structure it, is the same for the accommodations of the energies of the U. The structure of an atom is a male and a female and an electron, and when the female divides you call it the division of a neutron and you start a new cycle of life. There is no difference, it is the man who has to understand the truth and the operation of the universal ??. (2:10). Any questions. We have 107 viewers who can ask questions. This is the teaching I have been waiting for my whole life, thank you Mr. Keshe may your soul be elevated. Colleen put together a letter to our President about health care advances, I hope this helps. (2:12). How is fear dealt with in the realms of the soul? Fear is a condition that we do not understand where the Physicality will show itself. The fear is the condition of how do we allow ourselves to exist without dividing, it is a restriction we put that we don't want to give anymore, it's the strength that puts limitations, how we can disturb the conditions, how we can survive the conditions, how much we can give without being taken, how much can be given without giving of totality. ... (2:18). Rick talks about using 3D games about going into space and starting out according to the conditions using Gans, etc. Could use the games to practice going into space. Using Virtual Reality instead of video. (2:22). Q: When are we going to become One Planet and One Nation? When the humanity in total decides. She says, it doesn't look like that is going to happen. According to your book there are 2 ways, our planet is going to be decaying and there will be a sister earth and people will be transferred to that one, ?? and some people are going to die. The second theory is that there must be a threshold of peaceful people because it's never going to happen that everybody will become peaceful, so if the threshold is 10% will that happen spontaneously and everybody else will automatically become peaceful and then we can join the UC. Is this correct? ... can you explain yourself further then you'll find your own answer. (2:24). ?? something about the sister earth ... is the earth decaying? yeah. okay so all the mayhem and earthquakes from the decaying of the earth ... birth given to the new planet then the peaceful people automatically transferred and the others stay here and will die, they'll think the end of world is here but it's not. The peaceful people on the new earth will join the UC. Is this correct. yes but we have to decide as a whole. But the whole isn't going to decide on this, if we have to wait for the whole ... It's the decision of the World Council and Universal Council. One of the questions I have with the UC is why do they communicate with governments and not with people? We don't know what the UC is doing, their work we are not aware of. Ask the members of the UC for the guidance. (2:26). Sandie comes on and says that the communication in the UC is going on now so that they can understand each other so that when they do go out and talk to everyone, that everyone is equal. A question to Keshe, when you say that Aliens that come into our atmosphere have no choice in how they form, that the atmosphere dictates 2 lungs, kidneys etc. if that is the case then it seems you are saying that when a E comes into this atmosphere it takes on a P ... it means that our E state was already decided before Physicality came through, that there is a higher E state that we are not aware of and need to become. So we are aware of the drama but not the soul E. (2:28). 14

(2:40). Video of Zn balls and E with pendulum, the Gans started to climb a little towards the side she was on. Another experiment she filled a glass pendulum with Gans and water

and little Fe powder, after a week or so the water disappeared but the clothe bag was never wet. (2:52). There was some movement of the hand but that aside pendulums were used to discover the rotating of the earth, there is one here in Italy so it does register the interaction of fields. What would happen if you changed the concentration of different Gans' in the ball underneath. (2:54). Shows another presentation a man developed a scale using a pendulum to indicate different strengths. (2:59). .. We have to come up with a method to measure it. (3:01). What if we hang these coils from the same thread on the same point and see how the pendulum reacts. The pendulum makes 3D measurements. These are the beginning of finding a measurement S, people have started thinking about it. Rick says it's the same with dowsing rods for finding water. ... use a bowl of Gans and see what you get. (3:06). Alza put Zn patches on shoulders and could double her limit of P exercise. (3:09) People who take Gans Water at night before sleep they sleep a solid night, the majority of those do, does the water change the E. ... We are crippled by not having a measurement S. ... we see the results without knowing. (3:11). We need tools to scientifically validate the technology. We need a video to show how the measurements were done. (3:13). Klaus says that they did a workshop using the pendulum which is a scientific method they have used for 25 years. Will show in next workshop or conference in Rome. They standardized all the measurements with the pendulum to show resonance of fields. (3:17). It's the interaction of the E, so when I hold it there will different reaction. We need to develop a free standing pendulum. (3:20). The flight S in the 3D is getting built by people in the background, you will see. This chart allows us to look at the 3D structure of it. Q: What is the relationship of hot and cold with the Pl. The heat doesn't touch the Pl as such, but it does in a very small way on the matter state, the field strength of the Pl on the whole we should not see much difference in respect. It's like when you put CO2 in a patch, whenever you touch it it's still cold, with ZnO2 or CuO2 you don't get that coldness. (3:22). We understand only the matter state of a Pl the environmental effect. Is temperature jsut a vibration or some kind of frequency? Temperature is the release of the energy in a given strength, so it's when the Pl is at a given strength of the Gans of a given environment that can interact you will see the temperature difference or what you call heat. You don't see interaction of the Pl with Transition strength because it just goes through it, so the Pl has to be at the strength of the environment that it can create the interaction or it's just like neutrinos it just goes through, because they are a highest order they don't interact with the lower order, they're not there. I heard some theories that the center of the Sun is not hot, is it true? If you are at the strength of the Pl you feel it, it's an interaction at your level. I understand. You have to be at that point. The neutrino crosses the boundary ?? in the brain of the man, astronauts, when they get to the energy level strength of water in the eye they show themselves as photons, light, but in fact they are not interacting with anything when they go through the brain, they are of a higher order and to them it doesn't exist. It opens a passage through it, until it becomes equal it can interact. (3:25). With the lights, if you look at the energy of the Sun, if we interact with the full spectrum of all the M fields of everything which is in interaction with the Sun, most probably we won't get a bright light, we get a different color light, we might get a different speed of the interaction of the light, in the matter state you call it, Aurora, you see a spectrum of lights, a rainbow, it's the same with the field, you have to be in that strength to be orange or yellow. Okay if we have enough density of Pl, ?? end. we'll meet you in Rome.

KESHE Workshops starting from 164

164th Knowledge Seekers Workshop March 23th, 2017
(,)

(:12). He is back in Italy after 5 months in Ghana. The government there supports the technology and tests it. This T is for the world population and not just the elites. He summarizes what KF has been doing. (:17). Shares photos of the banner in Ghana and the beautiful site and the buildings underway, and shows the land. We have received no help across the KF, what a shame! (:20). A special committee from parliament is overseeing the KF. Since I left scientists from NASA are happy to join the work in Ghana. (:23). (:26). The "Plasmaji" Gans Water in the market in Ghana.

(:32). The solid state power generator has received certification in Ghana, we have released 50 units in phase one of the release, we should see 90% reduction, and then in phase two 100%.

(:40). It was through Italy that we got certification of the different products, Pain Pen, MaGrav, Health pads etc. Now the Power Generator. We have asked the 50 people with experimental units to report continuously on the progress to collect data, then we'll know how long we have to keep them hooked up at the factory so that when they reach the person it will work out of the box. In Ghana we can produce 10,000 units per day. (:42). The beauty with this generator is that we don't put a rating limit, it will be the kilowatts that you need and what the house is rated for, you are not buying a 2 to 3 kwh power supply, you are buying demand on load, as long as the wiring in the house can take the demand you can load. We are not releasing a power generator, but a Plasma power unit, which means it has to meet the demand. What we have seen is that the maximum any house can carry is 10 kwh. The energy is taken from the U will be available to mankind. Why are we doing this, it's a sweet song to Arman and John (AZ). It means we do not need anymore battery S. This unit allows the SS to be launched without any connection to a power supply on earth. This is the reason and beauty of it. It allows us to become men of space without dependence on earth. We don't need to connect our motors, as we do now to a power supply or battery. The Pl supplies the reactors on a Pl level. (:44). which makes life much easier for our researchers. It has taken thousands of years for man to reach this stage in the technology. We have developed it and are heading it, this stage will show how the next step in the development will come. During the past few weeks we have been talking about how to measure the Pl, this is one of our biggest problems. We came in from Ghana last week and then went to Romania, we meet a scientist about a year ago here. He wanted to know what a MaGrav was. We gave a lecture to 2 - 300 scientists in Bucharest. They are more learned then us in Pl T but through the soul. I saw amazing formulas. One scientist teaches K Pl technology in the University. (:47). They teach 5 courses. In a short time we will be able to deliver a formula to measure MaGrav,

what we receive as G and leave as M. I told him you are making the same mistake as Einstein, he has put the thing down the wrong way. You have to get rid of assumptions. He was tangled by the mass and energy of an atom and photon. (:49). It could not be done because Einstein has made a massive mistake, limiting energy to E=MC2, but now we know that mass will stay constant in the SS we travel, . 29

(1:07). The space travel in the coming time will be a game for those who understand the work of the U and not in the matter state, understand the interaction and not just the final line of approach. We have started bringing all aspects of the space technology together, those of you who start bringing tools to measure the Pl, nothing comes a day earlier or later, everything with the work of the KF, because we serve humanity, will come exactly at the time it has to. The professor walks in and says I have the formula to measure the Pl, a gentleman last week presents a gadget and we give him a platform to teach us more. We are not here to teach but to inspire, if we teach it becomes sacrosanct and people follow, we inspire and the total collection of the knowledge of the Man comes into operation because this is how we evolve to understand more, and to open to the fact that what we understand is not the final. (1:09). We inspired you since Christmas to the new operation of the space program. ...your soul and E doesn't have a measurement tool. (1:11). I have asked the plasma physicist to teach you how to measure the Pl. We'll open a section like the medical for this. We try not to make the mistakes of the past. As a nuclear physicist we used to do measurements in 9 dimensions, now we'll do it in 10 fold dimensions, how each core responds to the other, this is not just for space travel in the SF you have the same problem. You need to understand the flow of the Pl, depending on its direction, G or M, all these forces have to be considered, then you have to consider the size and strength of the Pl at the point of delivering and receiving. The science of the space T will bring the leaders in the thinkers of the world of the freedom of the space. (1:14). The doctors in the medical will also use this to determine what energy they need to empty a virus from its energy, or what energy that virus carries that they can overcome it and not to feed it to become bigger. They'll create near enough but below its energy that they can deplete it. Now your SS is the energy of the virus and your target is what you create as a reactor. The whole understanding of the science of the physics of the structure of the space travel takes a new meaning when it (this) comes. When I started putting this formula down for the professor, he understood and it made sense to him. In the beginning it was hard because his upbringing and education said that the speed of light was the ultimate, but now that he understood that there are other parameters that he has ignored, the point of approach, the interaction balance of the 2 which creates all sorts of complications. Something very important, if you get your G wrong at the point of approach you'll not mass 100 kilos instead you'll mass a million kilos, because you are absorbing so much of G fields, that as you go M minus G it gives you the mass, you would crash into the space of wherever you are going. (1:16). If you get it wrong and it absorbs more M that it becomes part of your G, you'll be receiving different strengths and god help you where you land. it's important that you don't allow the zone of your approach, your interaction, what you call the shielding to be overcome. 46

(1:33). Understand what is to come, what the change will be, in the Pl T you don't need to live in the center of the mayhem, to be forced to live in the center of New York and pay

so heavily for rent so that you are just working for rent and food. When they show you poverty they show you India and people living on the street, but they never show you New York in winter people living on a cup of coffee sitting all day in McDonalds, keeping away from the frost and death. Less then a mile from the Whitheouse people sleep naked in street and in morning they find a frozen body. So as they say in England we cover the poverty with fur coats and no knickers. the truth is as a human race we all suffer, but some have managed to cover it up with the cameras, while exposing the others to be wrong (i.e. the US media focusing on poverty in 3rd World nations.), (1:35). now we are all wrong .. I would like to know how many rubbish bins people have to go though in Manchester just to have something to eat. For 7 years going the library there I cried for them, as they searched for the pieces of meat left on the bones of the chicken from one of the well known restaurant chains. There are no cameramen there because you can't show that the West has achieved riches through robbing the others. Now you understand the need for a new cycle, a new understanding, a new structure for the World Bank, what we call the Universal Bank that is correct by every man. We should not allow those who are in power to siphon the wealth of a nation into their private accounts and their families and supporters for their own nation to become bankrupt when they leave. We should not allow people to fight on a position of lies, ??? to deliver T to change lives. This is the job of the World and Universal Councils, and the setting up of a world Police force, and World Universal Banking System. As we share knowledge we understanding that I am setting up the whole structure. I showed you a bottle of water, less then a dollar or 2, (1:37). can eradicate diabetes, High BP, Cancer and the rest. Where in the western world you pay $200,000 for the same thing when you don't have insurance policy, you end up dying because of the diabetic. Now the man in New York with no money will have the same position as the man in Ghana, It's fantastic ... we have seen people in security forces sick with all kinds of diseases walk into KF factory get some water and days later they come and say, now we can live. ... it is so cheap to give life back if you understand about the way we should work. The pharmaceuticals will suffer heavily because of this T, anybody can go on KF and find out how to make the Gans, and if they can't they can buy at reasonable price so that we can support the rest of the KF research. We are bringing change at every level that we reach to, it like all the roads feeding into the same roundabout, the roundabout of peace. If we can bring the militaries and scientists together and the World Police force to enforce peace, do we have to punish the World Leaders, the decision will be with the World and Universal Council. (1:40). Are we going to make the mistakes of the Christ, a tooth for a tooth, eye for an eye, or are we going to work on the soul S which is to elevate them so that the soul will not accept the Physicality in the existence.

So man get go to the next step. (1:43). Develop as many technologies and sciences in Pl and share it, the more you share the more you receive, and in receiving more the more peace you'll find in your existence. You all made a huge mistake and I watched, we gave you what you cried for and the you turned your back on us. A few weeks ago you cried give us the patents, you shared it with the governments but don't give it to the people, when we gave it to you, you did exactly what the governments did. When we shared the MaGrav System you did the same thing, you took a run, and a lot of you made a lot of things with it, then when you were successful you didn't bring it back (to KF), because

you thought if I report whatever then I'll have to pay taxes to the government. In the past few weeks we offered you the establishment and building the Spaceship Center in Ghana, and you all played a deaf ear, and you thought you were very clever, but I play my game different. Last time I came from the government to the man and you all shouted, but this time I'll take you back because of what you done in the ?? of the governments. ?? When I can't raise the finances to build the Space Center I have to go to the governments and the people who have (money), (1:45). and their decisions will effect your position. It's very simple, freedom has to come from the state of the soul of the man, not by the cheating of the man. A lot of you walked away thinking you got away with it, but now you find out that you have to balance the books. All the million dollar apartments will be worth nothing because you can live in the jungles of Africa and go to work in New York in a few minutes. Do you want to spend a lifetime paying the rent, or live a life of freedom, share your knowledge and efforts and pay very little, because now with this T you'll be able to build your own home wherever you like. What has been the luxury of the bankers will now see the biggest crisis in their world. If you thought you saw the property crash in the US a few years ago, this crash will come across the planet. The time is very short, maybe a couple of years, maybe 5 years, you will not need to work all your life to have a shelter and live in absolute poverty so you can keep a shelter. (1:47). The banks can keep the properties which they own and nobody wants to have. Now you understand the changes to come and what they used to enslave man, pieces of space in the air on 100th floor for 10 million dollars. Now it will be left for the birds to live in, the man will not take the burden. When you can have pure food as energy that you do not need to work 50 weeks a year to have 2 weeks holidays, now it will be reversed. 47

(2:09).
(2:15).
(2:21). Tens years ago when I started teaching, I said that this piece of Cu will change the human race, but just N coating. The essence of changing the structure has been with man since the time he started making soap, from the protein of his own life, understanding that in the flesh of the fat which he made from the ashes of the structure of his environment, the caustic, mixing it with soap and his own protein (skin flakes), would become the feeder of his own protein, which closes the circuit. Nobody understood how simple is the structure of any system in the U is, to find the essence of the Physicality a point and once having understood it to transfer the energy of a Pl to itself, then you can live any place in the U. On Earth the Physicality of Man is conditioned on his muscle tissue that he exists as an entity, which is based on Cu. Therefore it's easy to understand that you can use the Cu to feed Man and change the humanity. It's so simple! We have started the Spring in the Hemisphere with the Iranian New year was clocked in on Monday. I hope we enter the spring of man's life to change (2:23). the clock in for peace, through the understanding of the T. We have come a long way in a short time, but it took Man millions of years to get to this point, and it has taken us 3 years to enlighten millions. A priest said, it took Christ 300 years to achieve so many followers, but you have done it in 3 years. Through the public teaching you have changed the course of humanity. It is not me but us, by enlightening we can change. The KF has more followers in a short time then any prophet has managed to gather in the same time. And now you can imagine what it will deliver. It is you that has to find a way to change, not us, because

those who understand will change the course for it. It has to be correct, understood, and implemented according to the laws of the Universal Council, and the laws of the U and not the laws of Man for the benefit of his pocket. Now I put it to you again, become one and work towards peace and knowledge and you will see the benefit of it. (2:25). Those who think they can stop the process are the thin ones who have never understood what we are up to and here to do and how we'll change the whole structure. Any questions. Alcer greets in Persian. Would you please write the full formula for the Plasma Speed of Light in space. There is no formula, it's understanding the parameters and parts of the structure that you have to consider. I don't like formulas I find them to be limitations to the brain of a lot of people. Once they have it they don't think anymore. (2:27).
(2:44).

(2:53). and maybe you can write the formula of life in the U, because it can't be so simple. I am dealing with children in kindergarten who like to play, so I gave you the cores, Gans and N coating, when you start to speak as first graders I will give you the knowledge of the U and the totality, and when you go even further I'll give you the secret of life, which sits and is embedded in the understanding of the creation as a P entity at any (every) level of the creation. I have explained many times before, he draws a spiral, this the Pl, I can manifest at different places in the Pl, but I am the same according to the eye of the observer, at that point I am everything, the beginning and the end, it depends on where you are standing. (2:55). So a Pl to you might look green and going the speed of light, but to another observer at point B he is doing thousands of times the speed of light because he is at a higher strength. Are we observers of multi-entities in the depth of the space of the U at any point, yes. The only way to write a formula for it is to understand the strength of the soul of yourself and in that strength decide at which ?? of the strength of your soul you would like to be observed. Many people speak about multi-dimension being at the same place and same time, as a Pl you can be but it depends on the point of the observer. Do I see you as a human in position A or as a Martian in position B. Q: is that due to transition Mr. Keshe? No it's always there as a point of observation. We have to rewrite the science world of the man if you understand what is on the board, because now we deal with the reality of existence and essence of creation. (2:57). We understand without assumption and the coexistence of the totality is within the structure of the single cell. This is where the human race has had a lot of problems. How far do we go, how deep to understand the reality without assumption? The only place you can exist without assumption is within the soul of the man, because through your E you manifest yourself according to the filter strength which you have put in there. This is the structure of the soul , A is Venus, B is Earth, then if you like to be C, you end up to be Saturn, but they all coexist from the same thing which is the soul, or the center of the Sun's G and M field. If you understand this then even our Sun manifests itself in different shapes and positions why shouldn't it be the capability of the soul of man. There are no exceptions in the world of creations. It's us who shall understand the totality then we shall pray to no Churches or Mosques because we are aware of the reality of the existence. Some need formulas to understand their own level of understanding, some need to understand the strength of the soul of themselves, ?/ they don't need progress. (2:59). and some will escape and say I don't understand, let the others do it and when they finish I'll have a bite of it. Alcer says last time I spoke to you I said the Earth is decaying because there is nothing to hold us in

place ... Why do you think you are decaying, why not that you are gaining something from the environment? I am saying the earth can't sustain us so it's giving birth to a new earth. The thing is the change partially comes through the interaction of the fields, we are part of the transition time, we happen to be in this mass of the fields at this point in time we call our life. Everything has a cycle of its own, it depends where you are sitting on the point of observation. Mr. Keshe the knowledge you have brought us is so massive, it's not easy to understand, ... it's unimaginable .. Don't forget we don't just teach the Man, we are teaching across the U. Man in time will understand. (3:02). The KF is getting so huge there should be a guideline for new people coming to the Foundation. ... The problem is that the P organization is beyond the work of our teaching. Bret is now heading the teaching at the workshop level. How you do individually will depend on how you can accept someone to give you knowledge. ?? not considered to be the ultimate but add your own flavor to it. ... then it's wrong. the wrong comes from you who do not extend the knowledge that there is another way so I have to think to do it myself. I have been shown the rope but it is up to me to decide which cave I go up or down into. that is something for you lot to organize. (3:05). ... (3:09). We don't look to see how people are putting money back. This is not part of our teaching we'll not go into it. .. When I give it to the governments it'll be very hard for the public to get it back. I have to complete my work. .. the process is we have to be sustainable. (3:12). ... The main point is the world peace. All have to be equal, in the factory when it 15 minutes left I clean with them, they say don't do, I say why not? When a man changes his position, then he has lost it. I know what I have to do and the way it has to be done, but it is for the others to understand what needs to be done. (3:14). Before I left Ghana I invited all the staff to have diner, they were shocked. They had a burning question, in Africa a guy doesn't give if he doesn't take. They say what bribe have you taken. They asked why are you taking us to diner. I said, because you haven't learned that to be one of the high level scientists of the KF in public. When I take you in the public I don't want people to say look at that African he doesn't even know how to sit or hold a fork or knife. It's not just giving them higher wages that they have a better life and don't become a slave. It's to teach them that they become equal and don't stand for the wrong thing, but for the knowledge and beauty they bring to the human race. Managing is not just by talking but understanding the pain and pitfalls of whatever you're in. (3:16). If I send one of these scientists to a conference in New York or wherever and they don't know the etiquette of human life internationally they'll stand out like a sore thumb and loose their respect no matter what knowledge they carry, this is the fault of the human race. It's the same when I take Man into space that he doesn't stand out like a sore thumb, and then every entity he sees becomes a god because he knows more. It's the responsibility of all of us to remind all of us that we are equal even though we have different skin color, hair, and knowledge in the narrow part of science that we are interested in, arrogance is the end of the life. It's your responsibility to change not mine and to teach to the human race and not by force, but by the love of man. We need huge amounts of money for the Ghana Spaceship center, which is the first of many. If I announce that we'll build a Romanian SS center then Romanians will give to their own program and not to others, this is the problem. We have received very little donation from anybody as such. (3:18). And all of you have enough to give.

(3:25).

(3:27).
(3:33).
(3:41). Guy talks about a website 80/20 for people to sell things and give back to the KF, using a digital currency that makes everybody equal. If you want to support the Foundation you have to contact the KF management, Ella, it's their decision. We need the support but we have to be correct also, that it is something to support the Foundation and not to line your own lives and position. The guy interrupts ... no ... let me explain because we have seen this many times, I am not saying anything out of line, so that it helps you live the life you want and gives back to the KF there is no problem with it, but send these ideas to Webmaster at KF. (2:43). And they will bring it to the Board. .... (3:50). End..

165th Knowledge Seekers Workshop March 30 2017
(,)

(:10). KF Wikipedia has started. The Rome conference has taken place. Talks about cancer. (:20). Dr. Rodrigo's presented beautifully about the cancer, breast cancer on left is due to emotions with the mother and on the right the husband or boyfriend. When some have had problems with a mother who was bad to them, they see only that the others were bad to me, they don't see that the kicked the dog first and the mother punished them. When they honestly investigate they discover their mistake and change. ... most of the causes of cancer are emotional. When a person gets a cancer diagnosis it's like a death sentence, then if they are honest with themselves and analyze their life and see their mistake, then they do what the CO2 and ZnO2, and the cancer goes away because they dealt with the root cause. ... (:24). There is a video of the woman with terminal breast cancer and the whole breast is a tumor, within 3 months on Plasma it shrunk down and she is alive. Keshe says when I watch that I don't see the medical side, I see the Space Technology and what I have been teaching you for the last 3 months about how the emotions change the Physicality. It's the same thing, the emotional state of the woman changed the Physicality, it doesn't take thousands of years of evolution. This is what you will do in space when you arrive at a destination, change your Physicality immediately to match the environment of where you are. (:27).

(:30). We said that we can turn energy back into matter. Peter showed he could make materials (rotating cores). Your body changes left over energy back into matter, (the intestine). You are doing it while you are sitting here. This is how you survived. You eat a solid it gets converted in stomach to a Gans and the energy goes into the body and what is not needed comes back in and the large intestine converts it back to matter and you pass it out. So what's so strange to talk about what you have been created out of. Now to understand the process. You drink water in mouth and go to toilet to urinate, it came in went through all the ?? and came out as a matter state. (:32). So the knowledge is there but it is up to us to understand which part does what. Our body is one system, 95% of it is made of 4 gases, which makes the AA. To get rid of the gases it has to have a mechanism for gas "engine" it's like a car, something comes in and something goes out the exhaust. The 95% which is the gaseous part is the Lung, the other 5% is the rest of the

body is matter. It's what you use from this planet. The gaseous part goes in the lungs, the liquid part is handled by the kidneys because we came out of the sea, and the solid part is your digestive S. Your body is just a recycling machine. (:34).
(:38).

(:49). it has to transmute again to go back into the S to become ?? to be rejected by the body. This is the beauty of life if man understands the work of the U. As we never looked at the reality fallacy has taken over and added more and more to it (the fallacy). The video (? breast cancer lady) we saw yesterday from Dr. Rodrigo explains the whole cycle of life in the U. For those who are looking for a cure for cancer, it means that they haven't understood the work of the creation. An old saying, what you see in the pot, I see in the clay and the sand. You don't know what you are going to make because it's the first time you have played in the sand, that it would become a pot, but I know what kind of sand you need to make a pot. It's no use putting water with granules and hoping to make a pot, but if you know which dust you need to make it and then the right moisture so it sticks together and becomes the pot. It's us who have to understand the process of creation, not the way it ends up with Physicality, but man has to understand the Physicality is the point of manifestation of the confirmation of the existence of the soul, that way you can manifest yourself anywhere in the U. It depends if you want to be seen as a ?? man on (from) this planet, they'll put you in a Zoo, (:51). or you decide to be in the shape of a man that you can live and work within the comforts of the planet. That's all it is, there is no change. There is no time to waste to go back and not understand the whole process, and then blame everybody else for it. The police of the U is the E of the man and knowing that it always has to balance with the soul. You police yourself and nothing can go wrong. When man goes to space it will teach him one thing, to stay correct and live the life of the U. If you take what is not for you to take you'll find out the life will be very short, because if you put a spanner in the work and somewhere it cracks. In space don't think I am going to be correct, but I am correct, and live correctly. The problem is we got in a bad habit, a story, the most beautiful black girl sitting on a branch of at tree with a blue eyes blond girl who says, can I lick you do you taste like chocolate. Why do we need to lick to taste, when we can see the soul? That tasting is the biggest problem for mankind, (:53). because what will the animal from planet Zeus taste like? And that will start the whole process of killing to be able to taste. What if you asked, can I have the fields of the emotions so I can know how they interact with me, that I can manifest my emotions in respect to what you give me, then you find out that you don't need to consume. How will mankind pass this point, that will be the biggest test for mankind. Would you like to eat something else or do we rely on the E of it, does it give us pleasure, ?? do we need the sight or do we feel the soul according to the E of the entity, that I want you to see me as 16 arms, 20 fingers, because I am very strange to you, and by you looking at me can have a lot of pleasure seeing something funny so I make that ?? happy, while at the same time to another one I'll be human because that way he'll feel safe that I am not endangering his life, then he doesn't need to kill me. The process of the conversion of the fields from the soul is the biggest dilemma for mankind and many shall fail and those that do shall remain here on this planet. There is no examination, it's the man who tests himself according to the strength of his soul and the conversion of E to Physicality of the position. (:55). It doesn't matter how deep you try to say I am good, as

Bahaula said, we test the gold with fire, and the man with gold. The "fire" is understanding the condition of the environment and the "gold" is knowing if you ?? or you evaporate. This is the reality, understanding how fast you can convert. After you watch the video we are going to release in a couple days, then add this part of the teachings to it, as a voice, recording, that not only we show that through the new T, we have found a solution for what is the fear of the man, which is ?? his own death, but understanding the truth about the conversion in the space T. With 1 bullet we kill 2 birds. We teach the man about the conversion (death) and his fear of himself and secondly we teach the space T which is to come. Half of NASA will be shut ??, because now they understand that they just need to put some fields around it and make some reactors and they'll be done. The process of conversion in life to Physicality the strength of the E is the filter. You have to start making filters and the strength of filters, (:57). to change how to create what filters, where, how and when. Understand the filter making. In Italy there was an Spanish couple and when I started to explain about E and moving things, he tried so hard to move the cup, then I explained the cup has a field and an E, I would like you to move so that it gives me the pleasure of seeing you moving, and the cup will move, but the man never understood that even the glass has a soul, it's made of elements of the Pl that he is made of. All he needs to do is to ask for the pleasure, but if the cup decides that if I move I'll break myself, then it says no not this time. Many people whom you have seen moving objects by looking at it have found out this secret. The rest is a cover-up. It was like when the Indian guru came here, they were so proud of him, he was a huge man they bent in front of him, and his value was that he could fast for 21 days without eating anything, (:59). then he became more holy. He sat in front of me and I said I know your trick, he said, what do you mean. You are trying to become more powerful amongst your people because you can fast 21 days, I told him how he does it, he said you found my secret. I said you have no secret, you're a cheater. Because if you learned how to live without eating for 21 days why are there so many hunger people in India. You should teach it. He understood and said our paths do not cross, you are attached to the material world to get respect, I don't. I told him what to do. And I explained how he eats, very simple, if you look at people who go on diets and don't eat, ?? you don't need to do that kind of thing. Change your breathing S, because phosphorus, Calcium or anything else you need in your P digestive S is in the air, you breath it, but because your lung condition in the position of the body, has just been adjusted to take energy for what you need for your E part. Watch these people when they fast 21 days, every now and then they move slightly and change their breathing S, the rate of it, and by moving they create, now that you understand how to adjust your MaGrav S to different strengths, (1:01). they adjust their lungs to absorb Ca, or K, they can even eat a whole banana without touching one. Try it. If you have understood that you don't need to eat an animal. In the space you adjust what fields you need to survive and it's done, why do you need to end a life. If you like we publish his name and you can go and become one of his followers, he has another 21 days on his book. I teach you and you can sit for 42 days and you'll become double holy. That's how simple it is. Now we understand the space T and how Peter produced matter out of the fresh air, you can do the same thing, adjust the fields in your lung and don't forget, in the space where you breath you continually absorb everything which is in it, it's a sucking machine, a vacuum cleaner, so dust of Ca, dust of gold which comes from the upper atmosphere and is continually added to the surface of this planet comes in

it, but it depends on how you change your breathing, if you understand that this breathing is for water, then you absorb enough water that you don't need to drink. The fallacy that the water in your lung comes from inside your body is totally wrong, we have shown it in the teachings. The moisture in your lungs comes from the interaction of the air inside it. (1:03). as you breath in, you change the O and H in a way that continually creates moisture. Now that you understand, if you can change the speed, you drink 2 - 3 liters of water, as energy gets absorbed in the body then you don't need to drink water, then do the same thing with Ca and anything else, you can put your mind ?? in because it's the emotional part of the body, I need all the vitamins for today's E and you ?? , because it's part of the desire to receive. Jackie tried once for a few days but the Physicality of the planet took over the E of the man. If we stop we'll see that we don't need to consume. And very strange, do we need to clothe ourselves? I wonder if there are any Armani's in the depth of U to buy a suit. You have to come up with a new material that it fits the environment, it's no use going in a bikini to live in the North Pole, unless you know it's just something on the top because you can control the temperature inside. One of the fundamental part of this conference is the video which is going to be released, not only showing the E of the man in conversion, (1:05). but showing how man can convert himself in any dimension in the space.

(1:15). (teaching on Deuterium).

(1:23). .... Good Deuterium is black, I have 20 to 30 liters in Ghana, that's why we're flying out of Ghana. I produce it in CH3 Boxes, about 2 - 3 liters per day.

(1:35). ... if you create enough (interaction) btn the CO and CH3, we're talking about Plasmatic fields, Gans, and not about the molecular structure. I gave you everything to create the Deuterium, before, if you put enough of it in and ratio it the right way, then you link the C and in Pl condition the H. The C > C, O > H H, it takes 2 H and leaves behind a free H, and if you have enough free H's here you have your Deuterium. Go back to teaching of how you change Alkaline to Acidic. There is a secret in whole process. You keep the C link, create a condition where a big bunch of H behave like (O) inside the H part, now you don't need to change matter, now you create Deuterium here (in outer reactor) more then in the inner reactor. Don't look at it in a matter state but Pl, if you don't have a C connection in strength of the CH3 you'll have a problem (1:39). but in the space you don't need it, but this is just an interim that you can just takeoff for a little bit, to be happy that you didn't do nothing for 3 years. You keep the link because here on this planet, you have H2O, in all these you have it on both sides. If you go a step further ... God bless the soul of the Man if he understands what I am about to write. (1:41). There is a very big question, if you look in the matter state, or Pl state ... understand you are dealing with a Pl, what an O and C are, multiples of a Pl can give effect of the same, .. you can have Deuterium at any time. .. C = 12, O = 16, 12 x 4 = 48; & 16 x 3 = 48, you are dealing in a Pl state. ?? By the ratio of the water in your bags , the ratio of water in CH3 , according to the ratio you'll get Deuterium in either inner or outer cores, and the current you put through for transformation. (1:44). You have seen the work before but never understood. The AA (ONCH) of the Man, but you don't see the conversion of the numbers. If you get the right conversion, the N stays neutral, then you can convert C to

behave like O. Fe is the magnet creating positioning on earth, in the gaseous part it's the o that plays the game, in deep space it's the C or the crystal structure of C behavior. Now you have the 3 magnets of the U, there are more to understand. If you get the ratio right you'll lock the O to C, that will decide how much H to behave as O, and that allows the H2 to go to Deuterium, or how much of the H2O in the inner core will interact with the outer core and the H3 becomes the G point. All you do is change the M from the center outside and we turn it back again. This is what your body does, it changes the solid and converts it to energy, then back again to solid and you reject it. That is all it does. And all of it is done in the AA of the Man, which 70% of it behaves as water. (1:47). 95% of the of the body is made of the elements of the gaseous which are the AA, and 75% of that is H2O. So the AA in its essence works within the structure of the water of the Pl because it's in the gaseous state of the body of the Man it switches itself continuously, it feeds off itself and releases energy off itself. If 95% of the body is CONH, and we know that by mass about 75% is H2O, how much of which is going where, (draws the H to H and O to O both interacting). The riddle is solved if you understand. In creating G and M fields within the mass structure of the gaseous of this planet .. are you wondering why you are walking upright. (1:49). You have already been in the space but you haven't managed to lift it a little higher. The structure of the plants work through this structure, but they use a slightly different structure of using the matter state, how much are they going to be attached to the earth's Physical part. Have you ever seen greens flying in the air. Now you understand why you are walking upright. So the body of the Man in essence carries the H behaving as Deuterium. You should have flown 2 years ago. .. by manipulation of the O in the body .. you get the ratio. (1:51). This is why your Lymph needs a different chamber in the heart then the blood, and the Immune S uses a different chamber then the blood. In the medical part we explained that each chamber has a (different) pressure, but collectively when they work in a field strength, the energy is the energy of the E. In the essence of the creation of the physicality of the Man, he draws the 4 chambers of the heart, COHN, each chamber is tuned to the strength of one of the 4 elements of the AA, which is the ?? color of the Man. In their interaction what you receive, because now is the matter state of the Pl, its field strength becomes E. That's why when you fall in love the heart goes (flutter), because the field flow, the amount of the matter change conversion comes, (1:53). ?? changes the E and you go crazy. .. this is the E of the physicality, then the brain takes care of the E of the upper part, when it goes up it hits there, the 2 emotions combine, ?? the soul. And if it is 2 ?? hard you fall in love, this is one of the reasons why they says scientifically the love doesn't stand more then 3 to 5 years, you fall out of love. Even the writings of the Prophets, I made you to make children that they may mention My Name, by mentioning My Name they give me ??, writings of Bahula. The E changes, because you were in Chicago breathing different kind of O, then you move to New York, London or Rome it's a different kind of O, so the strength of the E what was love, now it becomes hate, then he calls you his mistress because he has to confirm ?? he still exists. Why do people come to Rome, the city of romance, because the MG field of this part of the planet by accident falls near enough to the E of love, because it's not just us, (1:55). the Earth has Inertia field and it has a G field, the filter is ... the soul of this country happens to be around Italy, a lot of water flowing underneath, allows us to fall in love. Romance has its own strength field, like hate and everything else. It gives you a dimension. When the P pressure doesn't match the Emotional pressure the E release feeds

the energy, E part is the upper part of the body, the gaseous part, it releases its energy and you call it a brain hemorrhage. And depending on the ?? most the damage goes to this side, because the heart is a bit ot the left, like a volcano. The position of the heart in respect to the brain will dictate how much of which one. (1:57). if the part in the heart is on left side you see huge paralysis on the left. 11

(2:13).
.. the body is made out of E to Physicality and not the other way around. (2:15).
(2:20).
(2:28).
(2:34). Can the patches fix a leaking heart? You have to ask the doctors what it is.
(2:46).
(2:56).
(3:01). Are you a clear sighted soul and that's why you were able to discover the truth about the Plasma? I was explaining to the U Council how I got to where I got in the past couple days. We are in the state of the physicality as a man but in the state of the soul as messengers of the U. We just pass the knowledge, we teach, we are not prophets, it's like when you are a teacher you know what time and what classroom you have to go to. My classroom is Earth and then I'll carry on somewhere else. We have knowledge of the U 36

166th Knowledge Seekers Workshop April 6, 2017
(Romanian man falsely accused, ,)

(:11). In the last weeks huge changes have taken place that will change the course of the KF. I have promised that I will not teach from today onwards and I'll explain why and then we'll carry on. We were in Romania some weeks ago and asked to speak to one group. We were accused of supporting pedophile groups. (:13). .. As we setup the world

government we have to be correct in our conduct and supporting the innocent. The man in Romania was (falsely) accused of pedophilia and we supported him, DL and Sylvester went around with him ?? but these guys are criminals and didn't tell you the truth, because this is how they can do because they are well paid by their paymasters. He was acquitted by international court ?? . How safe are they in South Korea? (:16). As we set up the World Government, we support the innocent who have been imprisoned and will free them. We will not jump on the bandwagon just to be (accepted by everybody). When we know we are clear (correct) we support. When we release the French court then you'll know the man is innocent. When Sterling was put in prison he (DL) jumped to support him because he is on his own team. Be correct, as we bring world peace we also bring peace to those falsely imprisoned. KF will stand for human rights and total freedom of the soul of the Man. This past week we have had the meetings of the World and Universal Councils, heard there voices and it has been recorded for the archives, then later you'll understand why they were chosen. (:18). I have called for a meeting of the core teams, we haven't met for a long time. We'll gathered together in Ghana for the opening of the SSI in Ghana. We'll start putting right whatever mistakes we have made. We have seen some groups try to infiltrate and effect the work of the KF, we saw it with the French woman, this was our weakness, we saw their work in Dubai and now we see the same group appearing in France and Italy in the conference. So we will not have conferences where these people can infiltrate and damage the work of the Foundation and prevent it from doing its work. In this respect the conferences from now on will be categorized for doctors or engineers, etc, (:20). or only for those who are registered and qualified for that part of the work will be allowed to join the conferences. This is a learning curve for all of us, as we see the abuse we'll adjust that we will still share the knowledge with the others but we do not let them to touch us or our families or interfere with the running (of the organization) with the falsified image of who and what they are. We will protect the KF and its family. From the process of the conferences we learned and shared a lot from our scientists. In that process we learned that a lot of you don't do the N coating the right way. 56

(:33).
(:39). Tests in Japan on mice injected with cancer, after 9 days disappeared.
(:53).
(:55). A gentleman has gifted the The KF Ghana a Raman spectroscopy instrument, and he will move to Ghana and will build the Space Station, cost of about 25 million dollars, and he is going there to build it himself as he is in that business, which will start by end of the month. He will deliver within 3 months the whole of the Space Center, hospital, clinic, Research and launch pad. It was our wish to build this center and it is for humanity to be given this gift. The man who is giving the donation is also building it. (:57). He is so proud to be there and we thank him and his family who are moving there with him. This donation will come change the course and we will come very fast in that direction. In Italy land near the sea for a launch pad has been given after the Rome meeting. The house for the Universal Council will be built here, or World Peace council. (1:00). That anybody can enter the Peace Council by the space through the open sea so that no Visa will be required. It is coming thick and fast. A lot of people were watching what we will do, the change came when we moved into Ghana Atomic. More and more wealthy people

around the world have been waiting for the KF to show a real dedication in moving and they move with us. I will stay in the Middle east until the power unit is completed. ... by consumption of the ZnO2 waters, patches, etc. we elevate the soul of the man that he doesn't want to fight anymore. (1:02). We got a gift of Gans from AZ which will be used to feed the man through the pipeline. We elevate the soul of the man and eliminate his hunger. .. I am sure within the next few weeks the Ghana project will be completed. Due to problems with the states, with opening of Ghana will be limited only to the members of the Earth and Universal Councils. (1:05). We will not allow the misconduct of the last 2 conferences in Dubai and Rome last week to be repeated. You deprived humanity because of your stupidity, now we selectively teach humanity that they only learn what is good for the man. This is the work of a master and I am a master in what I do. 37

(1:17).

(1:21).
(1:34). Questions. When we keep Gans Water in a jar for months sometimes we get a dark residue at the bottom, what is this, C or something else? We now have a Raman Spectroscopy, send it to us and we can test it. I don't know what you've done, because we get the same things from Cu and CH3. It's no use guessing, we'll test it. (1:36). Azar asks, I didn't understand what happened in the room in Rome, was it a soul? No, it was a presence of what we call our friends. We were looking for Physicality but there was none? It was there but the body wasn't aware of it. He explains about the Iranian New year, it's 12 days, started March 1st on the first day we leave what we grow, wheat, a sign of new life of Spring, on the 13th day we take that into the open that the new life starts, make a wish and tie in a knot of seedling, then throw into the water that the wish becomes for the whole planet earth. He said to her because she is single, to wish for a man. She says you have to tie a tree if you want to wish for peace on earth, no we have to tie the whole earth. (1:40). To understand the culture it's not just speaking it but the E behind it. (1:42). Q: If we want to measure the Pl, how to N coat a computer for measurement? I don't know. I don't think you put the computer in caustic. You are not wrong. Look at the Iranian capture of the drone, when it was captured nothing was changed, the printed circuits couldn't be copied, Iranians copied everything. Understand what this implies. (1:44). If you connect a MaGrav S to your house and it will N coat the house wiring, it goes black. So this teaches 2 things, first is you don't need to N coat with caustic, second thing is you can cross the fields of the Pl to encapsulate the whole computer that it becomes part of the Pl itself. It's like when you put the food in your mouth, it goes from matter to become part of the Gans state. Now you know how to N coat anything without actually touching it. You don't need to N coat it for it to behave (like a Pl), you create an environment that is in a Gans state that it behaves as a superconductor in a position. You can change the present computers by bringing them into the field of operation of the System you make. By N coating you destroy because it changes its characteristics, but by encapsulating it. Go back to one of the patents, if you understood how to N coat a box, you can put anything in that box and take it across all the x-ray machines in the airports and nobody will see what's inside it. Secondly they don't even see the material. (1:46). unless your N coat isn't good enough that the fields might touch something and they see red, because it's a dynamic living the field transfer

will go through it. The only option for you is to create an environment that you can change ?? it when you need it to be a specific way. I really enjoyed when I saw the capture because it showed the superiority of the T. Nothing put more fear in the whole of the American security and government then seeing that aircraft being brought out, copycatting, now you can buy cheap what before sold for billions. They captured it as a whole and didn't change the structure, (? they didn't N coat it). When you do caustic you change the structure. So if you want to cover it, put it in a field that you can control it, that's much easier. The material will gradually change into a N ?? the whole thing has to change at the same time. ... you don't extract, if you want to extract plastic out of a component, (1:48). you make what Peter did, 2 cores with the presence of it, but it has to be extracting the other ?? what you want left inside. How do you target a precise matter or part? ... you can limit the MG field so the effect of this earth doesn't go to the whole of the U, it goes, but the effectiveness of it is limited to 1600 km, it's the effectiveness that you control. .. I think somebody is going to do that very soon, (target a specific part). 49 19
(1:52).
(1:56).
... even the stone has a soul, if you can teach the stone's soul that by moving it creates a pleasure that I can share with you, ?? the pleasure of seeing you move it will move because you find balance with it. .. we are researching the Sheiks. His line is from Mahamoma ?? .. like your line is from .. he is your cousin. (2:00). we showed you how to make material with the CO2 kit, try to make as many materials as you can. If you don't see anything it doesn't mean that it has failed, you have to move the equipment (around) until you see something. If you create the conditions of gold, but there is none in the atmosphere it doesn't mean that you failed, it just wasn't there at the time to deliver. Change the speed and density and see what happens, do you get more Cu or gold. The object is not to make gold, but to start learning how we can change and transfer fields into matter state. We ?? the Gans but we transfer the fields of the energy in the compression of the fields to manifest themselves as Gans', now this is the next step. (2:03). A man made a health cup, the Gans water changed field orientation from South to North pole. (2:06). ... we teach so freely, then some people learn from us and then make out that they are the teachers and know so much. When you are so arrogant that you think you are in charge, you have already lost the game. You loose even the knowledge that inspired you to learn. With DL or Derek, we have put all that he has written about KF and my work on the website. There are 2 things, he has been misguided or he was working on a plan, or he is working on a new plan that shows ?? If you have seen any entries by Derek or Sylvester and his team, bring it in, let's put it on the table. Bring the positive energy, ?? then it's for them to show what they have done and do. (2:09). There was 10 years of praising, then when a pedophile gets captured then he turned his story. .. he reads some of DL praises of Keshe. (2:11). 41

(2:15).
(2:19). Dynamic cores,
(2:24). Caroline teaches. Shows picture of lady who entered a transparent state. (2:26).
(2:35). (2:40). .. I wished for the women to be apart of the teachings also, not to take over.
(2:51). Mr. Keshe comes back on. What Caroline said about the Mother and the sick child. If you want gold you can have it in the palm of your hand through your intention. In deep space there are no Pharmaceuticals, it is the intention of the E. If one understands this it will change a lot of things for mankind. ... you don't need to kill to eat ... and in the time of need you eat (get) what you need. These things will become more clear as we learn more, as I said we are hear to enlighten and not to teach. When you understand your own capabilities, you become the magnets to the illness of the child, you are stronger you

can take and reduce the others, that is all it is. Before you give the water to the child you touch it and put your intentions in it, because of the line of the birth of the child you have already taken it (? the illness). If man matures to the point of measuring you'll find that the mother carries some of the intentions of the pain to herself. This is what we call double magnetic field. It is not the water, but the intentions that has brought it (working through it). But we have to see what the conditions are and appropriate for it. Another point is, that a lot of you are saying, why is he giving advanced technology and cancer (cure) away to people and not making money out of it. (2:53). I always say, but you are deaf to it, the KF is paying for the research. The funds for it came from selling of the books and equipments and everything else which you have bought, so in fact you have already paid for it. The people who take and run away with it, are people by nature, what I call a thief, they put nothing in to the Foundation which is the soul of the humanity, and they want to take and run. If you think we are giving the Cancer Blueprint, it is because we have paid with our souls. We don't carry hidden bank accounts, we take what we need and so when it comes we put it there when it is needed. In the coming time I am sure we will receive more, because many children will hold on to their fathers and mothers, when they are told they have Leukemia or a cancer, many, many people will walk away from cancer like a headache. We are here to set and to change the course of humanity. Many times Caroline and I said the only way the KF will touch the humanity is through the health. With the energy unit people came they stole and they ran. We are not releasing one energy unit, if they understand what is to be released next Tuesday and they apply it, you can produce any medicine in the Universe. Medicine being a position of comfort to guarantee the survival. (2:55). The blueprint on Tuesday is the beginning of how man will survive in the depth of the U. If you look only at making the Gans' you have already lost, because you never understood that the Gans of the U is you. We just showed you the process of how to do it. Those of you who go and just make the tablets and Gans' then you'll understand that you haven't learned anything yet. I taught many times about the dynamic cores, you are the dynamic core itself. 41
(3:05). end

Cancer Solution In Exchange For Peace April 18, 2017

(,)

(:11). Cancer Blueprint Day. When the doctors can't understand it they call it a cancer. Now we have the knowledge of cancer. Cancers are created 3 ways, Emotional. When the man creates a given energy ...
(:15). This knowledge has disappeared from the knowledge and brain of the man.
(:20).
(:27).
(:33). Dr. Rodrigo introduces himself and presents a breast cancer case.
(:44).
(1:13). CO_2 Gans Ampules. Breast cancer plasma protocol, step by step. (1:18). Emotions come through the breast, you can test it by watching movies turned away from screen. Step 2 is blood test to find the seed metal of the cancer. (1:21). How to make Ca

Gans. To make the patches and placement and ratios of plasma. (1:25). Graphic photos of breast cancer. In the process of the body rejecting the cancer tissues, first it turns black then it falls off. (1:29). Results of tests as cancer disappears. Finishes presentation. (1:31). Keshe backs on. (1:43).
(1:46).
(1:50). (1:53). Silent for 1 minute for sacrificed mice in medical experiments. (They heard the Church bells ringing from their room, even the Creator is with us.) (1:55). Keshe introduces the Japanese scientist who introduced KF to TEPCO and was sacked, and he did the research at Tokyo University. (1:59). cancerprocessing.org .. (2:09). The Japanese scientist presents research at Tokyo University. (2:16).
(2:25).
(2:31). (2:34). Gans water protected the DNA against H2O2. (2:36). He injected CO2 Gans water into a tumor induced in a mouse, after 1 month it disappeared. (2:43). The Gans is rapidly discarded from the blood and not stored in the body. No damage in the tissues in the sacrificed mice. (2:48). The conclusion is that the Gans is non-toxic. (2:55). 5 minute break. (3:02). (3:05). Tests on Human Cancer Cells. (3:07). The "Amino water" (CH3), energized all the cells including the cancer cells and they didn't die. So don't use CH3 in cancer treatment. (3:10). He believes the Gans destroys the lizozoms (?), which are the trash cans inside the cancer cells, when these get burst they release all the collected toxic materials and that is what kills the cancer cells. You kill the cancer cell from inside with its own toxic waste. It doesn't go after the DNA which can easily replicate itself. (3:12). (3:17). Cancer markers etc. (3:19). Results. (3:23). (3:27). Test on the DNA, ZnO and CO2 effective. ROS and MDA are markers in the blood when the cancer cells are dying, are the main indicators of the treatment for cancer. (3:30). Conclusion is that CO2 and ZnO are not toxic to normal cells but kill the cancer cells. This is the end of phase 2. The next is phase 3 and you need to sacrifice a lot of animals. (3:32). he tried it on just one mouse that they infected with cancer and after 20 days no tumor was left. To go from this to the next phase in Pharmaceutical certification would take about 20 years. (3:34). But because of the efficacy of these the time can be reduced. This is the exact same way that he has used to test Chemotherapy chemicals. It normally takes 3 to 4 years to test the toxicity and efficacy levels and to adjust them (for safe human use). It's a thin line that you have to catch where you kill the cancer cells but not the human. After this the human trials start, which take a long time. For the Gans it took only 3 to 4 months because of its efficacy. This is especially for government people listening in the background, this can be done in any government structure even in the third world, rapidly and low cost. This is the beauty of it. (3:36). They have to test for interaction with other chemicals, which takes a long time, even the herbs are toxic after a certain level, but not the Gans. So we shouldn't see any side effects. His wife without knowing it used the Gans water in the soup and his child ate it without any side effect. Interestingly, his child got a big interest in the planetary systems since then. (3:38). Keshe says, the important thing is that you cannot over dose on it, your body takes what it needs. (3:40). We see with some governments doing research that with the use of Gans CO2 water you reduce side effects of certain chemicals. It will revolutionize the world of Pharmaceuticals. These 2 papers will become historical papers, it will change Pharmaceuticals. (3:42). The beauty of what you have seen in the last hour is that no one has ever shared knowledge so freely. 29

(3:47). He presents Paper #3, the animal testing. The time to get rid of a tumor is 20 days, but you have to find the right dosage. ... the new problem is that millions of people die every year of cancer, with this development there will be a population explosion in a hundred years, there is a need for man to go into space, with this T man can survive a hundred years in space. (3:51). Wednesday morning an agricultural group of scientists will start. ... the KF will support scientists who are imprisoned and their technology stolen from humanity. ...
(3:56). He continues about the third experiment. Normally they sacrifice 250 mice, but Keshe was not comfortable so we reduced to 50 mice. We used a mixture of ZnO and CO2 because the cancer is emotional dependent so you have to use ZnO. The ZnO stops the future recurrence. ... we use CO2 and the water of ZnO then you have the security of no heavy metal particles in the body. (4:03). Treatment method, 3:1 ratio of CO2 to ZnO. They learned this from experiments with TEPCO.
All the mice completely recovered from the cancer, 100%. (4:10). After 3 to 4 days we see reduction in cancer, by 8th day the blood markers are very low, you see the tumor on the mouse but the blood markers are very low. This is for intestinal cancer. We need other governments to come in and test for other cancers. (4:15).
... for 100 kg body weight 800 mg of Gans (water or powder ?) .
We have seen a small amount of residual Gans in the blood stream, which is a very good thing because we inject Gans into the blood circle, if it has found its way in then it can deliver Gans to other organs if there is a secondary cancer. It's for the scientists to do. (4:20).
end

168th Knowledge Seekers Workshop April 20, 2017
(,)

(:09). Shows photo of Ghana draft of Space Center. (:20). (:27).
(:30). Talks about MOZHEN to come to Ghana for space training.
(:36).
(:44). ... we are not taking medicines, we are controlling the environment. It is a much more powerful, faster, safer system and it has to be seen to work in all directions. Any questions. (:46).
(:54). If the Sun is the soul of this Solar S and its planets are its P manifestation then what would be its emotions? The E is the material btn the span of the Sun to the entity, what we call a point of transition from the start to the end, the points where there is a transition point, the emotion, it's like our brain from what we know, where the soul is to our emotional part of the brain where at the end the strength of the E converts into the level of the E of the P where we call the point of the brain where the position of the hands and fingers, where in that point the whole thing converts into the arms and legs manifestation of the physicality. Shares a screen. (:57).

... the soul of a man starts as a Pl. (1:03). When we look at the photos of AA. Shows AA in salt environment. Look at the shape of the material. This is vitally important, we have AA of Zn but all in the condition of the salt, (? not yet in the earths fields ?). (1:06). All 4

AA are next to each other. If you are born and the life starts with the gaseous part of it, this is the shape we will have. This is the shape of the body of the man, of our brain structure, as long as the AA has not interacted in the MG field levels with the P part but in a salt solution, that is no minerals or any other things added to it. Show CuO2 and CO2, if you look you'll understand something very interesting. (1:10). turn them 90 degrees upward. and ZnO2. (1:12). These all are in a condition of salt, when Man came to the point of life as an AA started, when it comes in touch with the AA, the P part of the planet has dictated the change in the structure of the AA. All our muscles are made of Cu (the middle picture). 113 18

(1:53). Rick said, when we came to earth we may not have a conscious memory of that decision. Keshe said, who brought you to earth, you didn't come to earth you got made of the earth's materials, unless you're an alien. Where did the earth material come from? From the reduction of the fields. We come from stars. Where did the AA come from. The AA of this planet comes out of the interaction of this planet atmospherics fields with part of the Pl of the Solar S. What about other AA traveling through the U? If they come to a given area and interact you'd most probably have 6 arms and 20 legs. 54

(1:59). about the soul and elevating
.. (2:02). I have been through this twice.. a lot of you ask me where does the knowledge come from, it comes from the soul that we receive, physicality is the same, it's (only) a container, it's like you had a water and now you have a juice.
(2:05).
(2:11). 14
(2:21).
(2:36).
(2:39). Caroline teaches. The mothers want to learn the Gans' so they can relieve the pain of their children. Wants to bring back the confidence of their own power.
(2:46).
(2:51).
(3:03). Keshe teaches again. (3:05).
(3:12).
(3:17).
(3:27). why he takes all the trouble to enlighten man ... pyramids and they abused the power. .... look at all the pyramids across the world ...
(3:32).
(3:40). End.

169th Knowledge Seekers Workshop April 27, 2017 PM
(,)

(:05). This is part 2, the first part this week was the Cancer teaching on Tuesday. Asks for volunteers to spread the knowledge. (:10). The pictures from last week.
(:20). Last week was AA in Mg salt, now we have AA in Na, which looks like skin of man.
(:25). If we used Ca salt would we see the structure of the bone?
(:34).
... repairing muscle tissue with CO2 and CuO2. (:42).
(:50).
(:52).
(:59). Did Moses part the waters of Plasma? He did nothing ...
(1:03). Goes over history of Christianity. Persian religion ..
(1:08).
(1:14). In the old Torah's they explain exactly who Christ was and why he was crucified. It has been cleaned up.

(1:21).
(1:24). Will visit Poland and Turkey soon. end.

170th Knowledge Seekers Workshop May 4, 2017
(Mothers and how a child is born, How much Gans Water to take, Jim from Australia explains how he wants to spread the knowledge and teaching method for beginners, How the soul is created,)

(:11). break... (:15). (we went from breathing in liquid state to that of gaseous, can we go further to solid or even back to liquid ...
blood pressure and what it is ..
(:24).
(:27). .. take 30 mls of ZnO2 just before sleep .. to balance the blood take 3 times, morning , noon and night, also take CO2.
(:32).
(:34). Jim from Australia teaches for half hour, Education Team. He wants to create a framework and syllabus for the KF Knowledge and to make it easy for the beginner. He started at workshop 79 but understood that he should start at the beginning, it took him 3 months to catch up. But he feels that it is too daunting for beginners and wants to find a way for them to learn. (:40). (:43). 3 Levels of Education, basic, intermediate and Advanced.
(:54). They will make some videos how to make the Gans and N materials. Mr. Keshe comes on.
(1:01).
(1:13). Back to the teachings.
(1:18). About childbirth.

(1:20). ... (some break in connection)
(1:23). (audio solid again). .... we have not been taught anything in the schools about the reality of life, about we as total as a group, who we are , we have not been taught the reality of how everything works. How we as people are responsible for a lot of things that we have done, like creating a life, a child, and then we think the child is there, born, now it's her responsibility, her job, her point of giving birth, then we think we did our job as men. Then we leave it to our partners to bear the life. (1:25).
(1:27). At the point of inception the child's soul is part of the woman's. ... post natal depression is when the mother can't accept the separation of the child at birth. The fear of giving life, and then letting go of what you have so preciously kept for 9 months, and not knowing if what you have created will withstand the course of life brings anxiety to the mother. This anxiety is totally an emotional dimension, will create mayhem in the soul of the woman, what we call the transfer of the energy from the soul of the woman to the child. When they give birth they go through the fear of loss, and would I be able to give life. We are not in the subconscious of a woman, so we do not see what they see, the anxiety they experience every step. (1:30). I have responsibility for what is inside me, if I eat the wrong food what's going to happen, is it happy, will it survive, can I give it education. The man is there, but with the woman she has to be there if the other partner is not, and this drains a lot from the soul of a woman. Men don't see this and then they say she has changed, she's different, she doesn't do this or that, she has become very aggressive. This is because we haven't understood what I have just explained. Woman at this time need support in their soul for the transfer of the energy. Post natal depression is like high BP or diabetic, it's psychosomatic but it goes to the point of E and then it manifests itself in all sorts of things, we call it depression, aggression or whatever. How do we support these situations. KF has developed a support system to go through the whole structure. (1:32).
(1:38).
(1:49).
When we come back after a break I will tell how the soul is created(2:00).
(2:15). In the world of Physics, when it's a Plasma we call it Pl Physics or Pl Technology. When a number of Plasmas come together and interact, like a proton, electron, and neutron we call it an atom. Interaction of the plasmas creates physics. When a number of plasmas interact with each others in a number together, we call it chemistry. When the elements added together create a dynamic flow where decisions can be made on how different members can move in different shape, form, and strength, leads to the creation of biology. What we call life. Physicality in ?? form that it can be moveable on its own, even a stone has a life also. When we bring the interaction of the fields in what we call biology, of a given strength but now it's the amalgamation of the fields without actual interaction of the entity itself, we call it a Principle, or a collection of all the fields, where this collection makes a decision for all the biological divisions. (2:17). We call it the soul, where it is independent of one biological section, where as long as the others exist that they can give enough to it, it can take from all that it can give to all that the Totality stays the same. This is the soul of the entity. Where non-dimensional becomes the interface, the receiver of the totality of the fields which are available, that the totality has the entity, what you call biological, has accepted what we call the final intermediary, that is a common denominator to all. That they can receive from and give to it, and they are part

of it. This is the **SOUL of the Man**. When an egg and sperm come together you need the division of the cells that they can absorb more, like the cancer we spoke about before, that through its G and M mass can absorb more fields from the environment which they are in, that by absorbing more they can give more and this leads to the division, that by dividing at a certain point, now they need that central common denominator, that all of them communicate and stay in touch with, and they are a part of. (2:19). We call, they become the sun of life, because now it's the controller in the body of a man, we call it the soul of the man. What you have, receive, see is that what you started with, an egg and sperm, now you have interaction of the two. They bring all the divisions with all the information that each one is carrying their own soul into interaction with each other. The amalgamation of the two is now a heavier mass creates a new G pull in respect to the soup of the energies around it within the womb. Each section in the whole game has its own soul. Now the totality creates a soul for the amalgamation, plus what it has absorbed from the past, or from the internal liquid where it survives (of its environment). (2:21).

(2:39). Questions. The various levels of the soul correspond to different light of various intensities, which can be the food of the soul, how to use this material to build SS. In a way no, you have to understand that the filtering is 2 way. The way we would like to hear, then we change it to the emotion of crying. The soul through the same filtering receives what it needs also. So if the music is at the strength which the soul needs to receive, it will become part of it, because as a field it will feed it, and that is the secret. It's not a ? myth at all, it's the reality, the fact. We look at every thing one way, now we have to open our eyes and understand the work of Pl, that it is 2 ways. As much as the soul gives it needs to receive and this is the way the soul elevates itself. In receiving the soul can give more. (2:41). Those of you joining the Mozhan program who are trying to create a SS for yourself using your body but you see you can't do it, it's because you haven't understood, the totality that was taught in the first book. It has never been understood. It has been looked upon as if it belonged to something else and not us, but in fact it applies to us. When the fields from the center of the sun radiates out, until it reacts with another field which radiates from something else, that it creates the friction between the two, it doesn't show the existence of the entity, ?? the sun or let's say the earth. (2:42). And what that interaction releases becomes the food for the other, or (it becomes) the beginning of life for another. If you understood this ... that you need another strength (to interact with), in the path of another strength to manifest the existence of the both. Those of you who have been trying to create the conditions of let's say a SS, or flying machine, look at the structure of your own body or the structure of this planet, the answer sits there. I never teach to make them work (just how to make a thing), a sweet talk to show ... I teach to inspire that you understand (how it is created). It seems that nobody has understood. The soul of the man which itself is created from an amalgamation of all the fields of the biological part which themselves are created from the Physical part, which itself is created from the Plasma part, which itself is created from the fields, can only manifest itself from a dimension which is needed to be when it interacts, or you can create the interaction continuous of the mixture of the fields. It's not the G which creates the manifestation of physicality to the eye of the beholder, it is the interaction of the M's

(2:44). which creates the boundary and manifestation of the Physicality and no one in the KF has ever understood this. It's in the books and I explained it many times but nobody sees. This is why people have problems in creating a tangible entity (SS), because you always look at how much G and M I can put in that I can create, but none of you have at looked at this, when you have a Star Formation, the base, the fields which are created and radiate up, it's very much like a stone in the path of water fountain (shooting upward, which then causes it to shower downward), the fields like the fountain will continue to shower down. If the fields do not come in contact with another M it can't show itself (manifest physically). When you put a stone on top of a fountain you create the shape of a dome (showering downward), and that becomes the secret of forming a SS. You need to understand the difference in the balance when the top is harder in giving, creates the manifestation of the Physicality of vision. If I put a heavy G on the top the fields will absorb in, but if I create a higher M I can spreads the upcoming fields like a fountain when you put a stone on top of it, it takes shape. No one in the KF or those working around the SS have ever understood this. (2:46). Earth is like a stone in the path of the strong M fields of the sun, in this spread it creates what we call the earth's atmosphere. If it were G then it would absorb the fields and there would be no manifestation. No you not see the strength of a water fountain when you don't put your hand in front of it, and then further push it closer. How many times have you opened the water tap and you connect a hose and it runs and runs, but when you put a finger in front of it, it decides how to splash back on you and creates a dome. The fields of your base reactor have to be M and the strength they produce if they hit the G, they absorb into it, this is what most of you do. Nobody has tired to make a much stronger M field in the top reactor that it will spread the fields with its resistance, it's feeding itself and creating its own soul, then you can fly. Because now you have gathered a soul, you created a dimension for the totality of the fields irrespective of the Physicality of the reactors. And this is where the soul shall sit (he draws in the center of the SF). How many times in the teachings have we said this. (2:48). And nobody sees it. I am the worst teacher because I know that my students are not ready. They don't have the ear to see that they have to learn the Totality. I am the perfect teacher when the students understand that they have to be the givers, that they can receive what they need. For us to teach it is easy to reach the soul, but in reaching the soul we don't cover the dimension of the Physicality of the man, but he must elevate himself, we can not do. We can only make it available. Like I say, "thy shall not steal." And, thy cannot force also, because if I force the knowledge, then you create the fields stronger then it can be taken that it brings balance to you ... then somebody has to steal. We don't give enough, but we facilitate and provide for it, if you are ready to receive that you can give more. The knowledge of creation is the beauty of the teachers and ?? , and spread of it amongst mankind. We are hear to enlighten and not to teach, enlightenment brings wisdom, teaching brings structure. For the soul to evolve it doesn't need structure, but it needs clarity to evolve to the dimension it needs or it has to be, or wants to be, so that it can be part of. (2:50). You can't stop a child from mixing with drug addicts, if it's in nature, because there is stupidity in his behavior, that he finds himself part of. You can't stop a child from playing football, because those people who are successful at it need a specific character. They are opportunists, I call the most opportunist people in the creation, the footballers, because they use the opportunity to create something out of nothing, and they are continuously on the run, 11 of them from one end of the field to the

other, to see who is the best opportunist to score a goal. Those who become footballers and become good at it, they are they opportunists, it fits them perfectly to be footballers. Those who are structured, work behind a desk where the same form has to filled out, because this is how much my soul is prepared to give and take. As an opportunist I take whatever anybody has to give and I make the best of it, and I give what I want. Because the point when I score a goal and make the right move that it ends up with me winning, I receive from the souls of 100,000 spectators in the stadium towards me. When you go to a football match and a player scores a goal, and have of the team (stadium) there they give, they clap or whatever is done, they give from their souls. That's why those who are successful footballers are those who take more in the ?? ground of the play, and those who do not know how to give become the failures, because they think all is given to be held, and the emotion of selfishness takes over the spread of the soul. (2:52). It's the same with the rest of the life. **The soul of the man is the "resistance" to the fields of the creation**. And ?? what it is, is the stone in the path of the water (fountain) which is running. If you put the (stone too far out, to the place where it's), just about to fall, then you only get splashes of water and not a dome). But as you bring the stone closer to the source you get more firmness (in the water flowing back to form the dome). You get a more solid "body". Try that with the SF in the way you place the reactors there, you'll get a spread of fields that pulls downward (creating a dome), you'll find out that you'll fly. It is you who decides what is loaded inside and how much you are prepared to give. Those who fail is because they have not put (given) from their side, in the dimension of understanding the Totality. Then you create a dimension which stays the same and you create a soul which is the positioning. This is how you become the captains of the SS. "I am detached and I give everything." And my wish, that is in giving everything that I can give enough that the other souls can survive within what I give. The position of the man of space, what we call the SS, are those captains who are prepared to give freely, (enough) so that the other souls don't have to give that they can stay in the comfort of peace. And we see 6 of them joining the KF. (2:54). We received many applications, but their souls were not ready, only their Physicality wanted to push the soul. In the Mozhen team we'll see 3 Chinese because why, it's the ethos of their teaching (? Chinese Taoist) of life, balance, Yin and Yang. This is what you have to understand. In the first group I taught in the Insano (Italy) only one is left. Because the soul is there to carry on, but it needs to find its position in respect to what it desires and what its real knowledge is. Out of the 7 we have Armen left, the others are on the wings, they listen, they come and go and see. In the second group we did the same, those who are of the same soul, we still see more of the second team around then I thought (would be). Sandie is one of them and she is still active in the background. In this team (the current one), the 6 shall stay, because we work through their soul, and the soul has been chosen. Because with them we spread the knowledge of equality of the soul of the man across this planet. They understand that they are the stone on top of the fields and they are the soul which creates the dimension of existence of the entity. (2:56). One is the manifestation of Physicality and the other is the control of it in the dimension of the creation, as we said in the womb of the mother, now the SS is the womb and the soul inside is the soul of what we call the captain and has connection to all the dimensions and this is what we shall see. The soul of the man is pure, sacrosanct, when we call man, it is terms of existence, totality, you are the man of the earth, or Jupiter, or another planet. In a way what is created, the creation, it has

managed to get itself in the manifestation of the control of its soul, that it can have a full interaction without harming, but giving enough that confirms their existence, not taking too much that it demises another's life. For those who understand the teachings of today, one thing is clear .. the man himself is the creator of his own soul and by creating his soul he becomes the dimension of the manifestation of his own existence. "I am the beginning and the end." I am the creator of it, which is the soul and by the strength I am prepared to give, I give it the Physicality, the manifestation, we call it the body of the man. The beginning is the soul and the end is the Physicality which manifests itself in the environment. (2:58). Now for those who are wise, might understand the terminology. The question comes again, is there a Creator for the life of the Man. Yes, the Man is the creator of himself, but is there is God as the ? terminology has put, that leads (causes) his creation? There shall never be. It is the weakness of the man in understanding the Totality which has created the terminology of the Creator as he himself is the creator of himself. Then is there a need for those who are supposed to be the filters between your soul and your Physicality, we call them the priests, imams, mullahs, and the rest of it ... no ... it is you who have accepted it, the terminology due to the lack of understanding that you have to be correct from the soul to the Physicality, from physicality to another physicality and soul. There is no room for religion in the Universal Community, because we have been given that terminology to create a filter of abuse, that we don't even trust in our own emotion that is the filter for the Totality. So we see the closure of the Vatican, Synagogues, Mosques when the Man matures. You close it to your own understanding, the physicality can be there and can call it whatever they like, because now you understand. Your conduct has to be correct. You don't need a pedophile to tell you, (3:00). because he will direct to where he wants you to be so that you bring your child into the hands of the priest so that he can abuse it, because he is only trying to feed himself with his own abuse. Then you understand that there is no need for religion, because the religion of the man has to be perfect conduct not only on this planet but beyond. It's very much when the Man was told that the earth is round and they hung the messenger because of their lack of knowledge, now the Man has to understand that, that messenger for the Man to bring to what it is, is the soul of the Man himself and the filters he puts in. There is no room for religion in any dimension of the creation, except those who want to force it to abuse the Man on the physical end. It will take time for Man to mature and not all the men mature at the same time. If it was up to me I would change the banner over the Churches and the Mosques and say, (this is the) house of abuse of the soul of the Man. I always said that when the Eastern Block opened up in the 1990's the Americans put a big banner up on the aircraft hangers of Frankfurt Airport, "Mission Accomplished, we got rid of communism in Europe."

(3:03).
(3:10).
(3:26). Questions. How many hours to do the breathing, before going to bed. Mixing the ZnO2 with AA, because you give the emotion. Make the same with CO2 with AA and mix the 2 together and then use the Liquid Plasma. Does the purity of the Gans matter? The body decides. A question about bi-sexual when the Physicality is expressing the opposite E then the person wants. For bi-sexual or transvestites, it's for them to find peace

within their soul.... even those who are not at peace, the E of the totality has dictated the Physicality. (3:29). There is a tribe in Africa, well protected by UN, where at the time of puberty the child decides whether to become a male or a female. It has never been understood how this happens. Now we do, it's the soul of the community that knows the totality of what it will be in the future that decides whether we need more boys or girls in the future. For instance, if they know in the future they'll need more boys because something will happen to them, then they (the tribe) decides to have more boys. When they interfere like in China, they decide to have more boys and now they have to import more girls from Philippines and Vietnam, to be able to guarantee the survival of their own culture. But now it's a mixed culture which is good. These people have to be taught to elevate their own souls and then the Physicality will change. It's not strange if you are a woman in the body of a man and you want to become a woman. It is the same as what we said in the space, where you change according to what you feel the environment is there, it's like your soul. It is the understanding of totality which brings peace to the soul, ?? and so it manifests itself in Physicality. If you have understood you can change yourself in the space to what it fits you there, because your soul is happy to fit into that environment. So why can't man do it, it's because he hasn't yet understood on this planet. (3:31). You call them the Schizophrenics I call them beautiful people.

(3:35).
(3:43).
(3:52).
(3:54).
(4:00).
(4:06). There is a need to re-educate humanity on all levels.
(4:14). The infection women get from the antibiotic is Candida, you need to take a tablet called Diflucan, it covers your body for 3 weeks during the antibiotic treatment, to prevent Candida. It's an over the counter medicine, get the highest dosage and give it also to your sexual partner, it works within 3 days. Even if the Candida has been there for years. Diflucan for Candida. (4:18). For herpes you have to change the environment. In India the children get swollen belly's and the Candida was transferred through the birth canal. (4:21).
(4:26). Parasites.
(4:29). Herpes Simplex Virus on Wiki. The right combination of Gans' to change the environment. Virus is the key word it means it is connected to the emotion and to the neural system of the AA. When you see blisters on the skin around the lips tells you, around the mouth means it lies, the connection between the 2 sections, tubes of the life of the man, where the lips finish and the skin starts. The lip skin is different then the face skin, there is a very fine separation or interface and this virus lives in that gap, (4:31). and the skin of the man is part of his brain, then it imbeds itself into the brain through the neural S. Research shows that people who get Herpes blisters in the later years also show signs of Dementia and its side-effects, which means they can't remember things and ??. Because this has the strength which connects itself to the memory part. This virus can be changed, but when you do because its a virus, it interacts with the skin and touches the memory, and with it we se all sorts of side-effects we see in the later stages of life. We can handle it and change its environment by MgO2, it's not connected to the muscle

tissue but to its environment so it needs separation from Physicality, which it attaches itself to the skin, and it needs ZnO2 because it has gone through the E level, and CO2. So you have to change the environment no matter what shape of form it manifests, because it's a virus you have to change its environment and deplete its energy. (4:33).

(4:38). Nobody has asked a question of the nature of the soul, because you are all afraid of the very thing that created you. I was told not to make people afraid. I don't want to make you afraid, but I want to teach you something new, it's so beautiful that if you understand it you'll touch the soul of the creation. The soul of the Man itself has a structure and if he understands that he will reach to every dimension in the world of the creation. For the past thousands of years you have been afraid of knowing or you have been kept away from knowing what your soul is. And now that you know that the soul is in the center of the creation of the Physicality, now I'll teach you something new. The soul itself has a structure within it which is understanding and in connection with the rest of the organ, which is the totality of the souls of the Universe. The inner sanctums of the soul has no gender, but it is there to facilitate its existence that it creates comfort for every other soul within the structure of its interaction, be it internal or external. (4:40). The soul of the man is the center of the Creation and in structure it's the same as the body, Physicality of the man. It has a condition, environment where it communicates, and receives like your ears, and analyzes what needs to be and where it has to go and in what strength, it has a brain as you call it in Man's Physicality the same. It shows its structure of the fields in manifested in Physicality as the brain. Now maybe Man can understand why each part of his brain has different functions as it reflects the internal operation of the soul itself in communication with the structure of the soul of man. When you can reach the inner sanctum of the soul you'll have reached the essence of the Creation. This is a long, long way from the present understanding of the man, but those who are wise can understand it, that's why ?? equal to your soul, because the interaction of the Physicality sits within the structure of the soul with the totality of the creation. Now you understand that even the soul has a structure, and how it manifests its own structure in the dimension of Physicality of this planet, as it allows to be given to guarantee the survival of the entity but in fact it still keeps its own operation, (4:42). its totality within itself. Then you understand why you have ears, lungs and control of them within the brain. It transfers its field interaction to a physical manifestation, you call the brain. It's control S is beyond the comprehension at the physical level which is the lowest, transforms into the arms and legs control in the Physicality of the man and ?? gives, In the other dimension is the interaction, communication and connection with every soul of the entity within the structure of the U. If you manage to reach the work of the inner sanctums of the soul then you can manifest yourself in any dimension at any point. A few people have achieved, but our purposes is to teach it to ?? then you don't need a jet plane or SS. You can transmute yourself at the strength of the environment that you want to be in, manifest yourself in that environment at that point in time. The soul in slowing down according to what it has in its structure creates or manifests itself in the shape of the brain, but you have to understand that it's not the shape of it, it's the structure of the brain is dictated by what this environment, (4:44). allows the field strength of the soul to manifest themselves into and it's not the shape and structure of the soul in the body of the man.

Blessed are those who understand. Because if you have understood the meaning of what has been taught you have found the secret to the passage (travel through) of the U, where there is no time or dimension, and this is the virtue of the Messengers of the Universe where we travel down these passages to see and hear, and when we hear the cry of the soul, the being soul of this planet ?? The Second World War and the other wars have brought us to this point to change the course, as Man has created too much suffering for himself. When one body in the family suffers the whole family suffers. When there is war and conflict then the whole humanity suffers. When you fish a certain way and damage and hurt so much we hear the noise, voice and cry of the fish, then we have to teach the man not to fish that it doesn't bring harm and ?? division. This is why you are taught ... to stop. To learn, to use to come to the essence of understanding, the essence of food cycle through the Gans, that you will stop the killing. Not only the Man but also the animals, we must ?? feed to kill to be able to consume. (4:46). End.

171st Knowledge Seekers Workshop, May 11, 2017 (Full ZOOM recording)
(What will happen to Keshe Foundation after Mr.Keshe earlier he set up the Bahai, How the soul filters and creates the Physicality, Collective soul of the earth, He declares he is the Second Coming of Christ as are we all, (there is very deep discuss I didn't write out about how the soul is formed and connected to all ...) , Gives a history of Keshe Foundation and his discovery of gravity, Talks about Hans and how he made him a terrorist, Illuminati's have threatened him and ask for ransom and gives details of the whole interaction and link to King of Belgium, Vote whether to pay the ransom,)

(:11). There will be part one and two will be how to manage the worldwide KF and how to handle them. (:18). What will happen to KF after Keshe. Early he set up the Bahai in Haifa to watch over it, but now change? (:22). (:24). Sandie explains her work on Universal Council.
(:36). They carry no instruments to enforce their will, only the strength of the soul...
(:41).
(:43). Through my Technology and wisdom, setting up the structure, I will achieve my goals. As we started last week explaining about the soul, a lot of you have come ot understand how powerful the soul is, and now that we start establishing ?? its point of creation from the amalgamation of not only 2 entities, the egg and sperm, but where the whole society (of souls) come together (to allow its creation). We need to understand more and more about the structure of the soul itself. I explained that the soul of the man has a structure. (Draws on white board), we have an entity called the soul, in filtering by E it gives us the Physicality. (:45). There must be a certain point where the soul itself carries a representation of Physicality. It's like the light is always white, but the filter you put in front of it dictates the color you absorb. In essence the color you absorb is embedded in the light itself, otherwise it can't manifest itself in Physicality in what you wanted. So this entity we call soul must have a structure within itself, that in understanding itself it manifests itself in Physicality of the Man. The filter is the

condition of this planet. If you change the filter to yellow then the white light will show itself as yellow on the other side depending on the filter. But it has to be inside itself as the light structure of Physicality. Where this Physicality itself receives information and interaction with other souls that it says that in this environment I want to look this way, but if I come to another environment with a different color filter, ?? (:47). then I manifest myself accordingly. The filter is the environment of the manifestation and presentation, depending on the strength of the filter. So within the structure of the soul exists the structure of Physicality of the man's intention of his representation and manifestation at the point of Physicality. This means, that if this soul exists in ?? interactions simultaneously as it radiates in different directions with a different filter, where in this filter the existence of it .. can show itself as another entity. Do we exist in different dimensions according to the establishment of the strength and the filtering of the entity we represent .. yes. In the structure of the Physicality the filter allows us to be seen, for us at the strength as a man. At the same time as part of the soul of the soul of the planet and others, we exists ourselves collectively as entity, as the soul of the planet, then all the stars and planets and any other entities within the galaxy, (:49). represent the Physicality of that galaxy. Galaxies are one of the most beautiful representations of the Physicality of the existence. In the pictures we see from the new tools in the detection of the environment of the space, we don't see galaxies having arms and legs but we see the interaction of the fields, this is their existence with no P dimension, this is the life of the entity, this is P and interaction, it's totality, where to the eye of the man we don't see the p boundary, but if we had the MG field strength of the galaxies we would see the "arms" "legs" and the beauty of how it breaths. There is no difference in the world of the creation of the U. It's understanding the proportions, conditions and the strength of how the entity manifests itself. With this understanding we come to a fundamental point, that within the soul of Man exists the totality of the structure of the manifestation of the entity in all dimensions of the U. It is dependent on the filter and ?? independent of the observer. If I am blind to the color of blue it won't matter if you put a blue filter in front of me because I'll never see it. (:51). But that doesn't mean that the sun the radiates its fields doesn't exist. But maybe I see the same thing that is in the blue filter, but I see it in the green ray and you have 6 arms and 2 legs. Man has to come to understand the play of the fields and not the tangibility of the Physicality. 32

(1:00).
(1:05).
(1:12).
(1:25). Our ignorance of the cause of creation has become the cause of our own demise. Do we need to understand more that we become detached from the Physicality? In fact we never become detached, we just move the filter to show the Physicality now, to where we want it to be. Because it doesn't matter how strong the sun is, at one point or another it has to show itself, whether at the level of the moon, or Saturn, or at the boundary of its Plasmatic fields, what we call its shell. Understanding the structure of the soul is the cornerstone of the development of Man in the Universal dimension, otherwise Man will be stuck in the dimension of Physicality. Many times I have said that I am ashamed to be in the body of a Man, because the filter which is created for me to be in that manifestation brings me pain and nothing else. It means that I can't give, and when I give

it's not taken, so I am frustrating myself in giving what is not being taken, which is for me is peace for the love of this planet. Now those who say, why are you ashamed, it's the shame that comes from wasting too much energy, giving so much and not getting people to take enough, because they like to stay in the dimension of Physicality, (1:27). and that is a waste of time, energy and my soul. But in (another) way we look, and we say it is worth it, because may are changing and if we add up more and more, many more will also change. No dispensation has every achieved to reach so many people in such a short time as the KF has. This is the dispensation of the Creator and not the Man. This is the time for Man to grow to become part of the UC. And only one who resists it is the one who wants to stay in the dimension of Physicality. When you look you see those who create love and pleasure, those who create the comfort for the other find peace within themselves, because they receive more and by that understand more and they get enlightened. Start looking in the structure of your soul to find out which position it has taken that you have shown yourself in this dimension of Physicality and why. The physicality is not just the body, color of the eyes and skin, it's (also) the operation of the E of Man. When you want to change the sun is the same, it's the filter that has to be understood and change from green to blue, that you show in the dimension you are in, how you will look. Even though if you decide, you'll see the transmutation of your own structure as you enter a new dimension. (1:29). Man in the future will see something very strange. ... the explanation of it has to be at the level that all Man can comprehend. In the time when Man travels in the SS. In the condition created inside the SS this is how we will look to each other inside, he draws 2 men in SS. Once we come out ... (trouble with using the computer pen) ... many times when I run into trouble with these things it means that it is not the time to share the knowledge. It's not time. Let's just say that Man decides to land on a planet. This planet has a different strength. Inside the SS you were looking like on earth because those are the fields inside the SS. But on the planet the strength is different, so in traveling from one to the other you'll find that your Physicality has become a totally different entity. The very first time (this happens) it will be very hard for Man, because remember it's the filter which is the size of the manifestation. (1:32). Man will experience this many times, here on earth the moment when we want to enter (the SS) we have to withstand, what we call the ?? "Magspheric" shield. Here man will go through a beautiful feeling of transmutation from one entity to another, and when you go back (to earth) you will return back to your normal form. Now you understand in the past teachings when I said that Man never dies, because when the soul, which is the essence of his creation, leaves the Physicality to be known as it is, takes a new dimension of Physicality in a new strength to where he chooses to reside in. This change at this point of field transfer, exchange, will be one of the most experiences Man will have. Many creatures of the U have become addicted to it. it's an ?? the way that you ?? leave any dimensions but not in one ?? time. It's what's called the joy of being a part of the UC. Because in this craft you live for 1000 years but in this dimension 10,000 years (the planet you travel to??), because you use different field strength of higher order, it means you live longer. Or you can extend or reduce the time according to the environment. (1:34). The cycle of the trouble in deep space will become the joy for the men of space, as long as they understand the Physicality of this SS is a mirage or vision of the Man and the truth about the soul of Man. teaching this will take time but understanding it will take longer. But some of us will jump into it and swim like a fish, because we have always

been in it, and some through the fear of the unknown of what we will look like when we arrive at the new position (planet) will stop us from jumping. And our own fear will lock us back on the planet earth and we'll do anything to remain and not take the step because we feel comfortable here ... and this is our right. Not every entity or man will take into deep space, when they see the balance of their soul, and the attachment to earth, gives the peace to their soul. Even on this planet not many men travel and move to live in another place, because home is comfortable, everything is there, "I don't want to immigrate." And some of us don't immigrate but we call ourselves travelers, because we like to be there but just enough so that we can come back and confirm our existence in our (home) place and the souls we are used to. Now you understand more about the structure of the Physicality of Man. (1:36).

(1:40). The question has been asked by the Iranians, are you claiming to ?? Leffty (coming Avatar)? Yes I am, as so are all of us. It is the coming of peace that make all of us the "Coming One", because it is a promise we make to our soul to elevate it to a position of being one with the others. Am I the return of the Christ? Yes, so are all of us. Are we the Mesha (messiah), we all are it our intention is creation of the peace, unity of mankind, and ?? the UC. Man has to be educated and elevated to understand this. "I am the Totality as you are." It's you who has to decide how much of the Total that you want to manifest, and those who understand this will understand the Totality of creation. If you think it is the man who has to get up for work and do this and that, then at the level of the soul there is no rest, (1:42). no time for to be continuously aware, work to give that you don't take, and it takes a lot of energy, because the more you get the more you give, and god knows the cycle never stops. Then for it to become an ??? open no, you create for yourselves a balance of the creation. I can't tell you I love you if you consider it as a fake, because at the level of understanding you never understood the love, which means you never understood what was given, as you have looked too much inside yourself for what you can take so as not to give, but you thought (to yourself) that you gave a lot. Which means you have put dimensions (conditions) on it, so I don't want to accept. The E, operation of the soul is very much different then that of Physicality. And there are those who translated to the others that this is the way your soul works and how it is done ... because (these "teachers") never understood, but they used the weakness of the man to tell or to confirm, or try to tell them that this is how it should be, because they never understood, but to the eye of the uneducated they are very right. Learn the message and to understand. As I said many times, Sandie, Vince, Caroline, Derek, we are all part of the same soul. (1:44).

(1:58). Questions. If you take the filter away is that the time that we die? No, you can exist without the filter, if you take the filter away that is the time you shine across the U.

(2:10).

(2:16).
(2:22).
(2:28).

(2:31).
(2:35). Talks about history of KF.
(2:37).
... We escaped to Italy, they killed Fabio, they threatened us. I am the Messenger of God, you can't kill me. (2:39). You touched Christ, not this guy. That position allowed us to become, Making us, me a terrorist, keep me 11 days in (Toronto) airport, they haven't found any bombs. Because of Hans Brachenjeh, it's on the Internet what he has done, he made me a terrorist, so you are all KF terrorists, because I didn't give to Hans and Prince Phillip the present King of Belgium. He came the day I finished the first documents ??? I can show you the documents I filed for the Belgium government. Since 2005 I have been the gypsy of this planet trying to stay alive so I can teach my T, but it has been good. It was Hans, Phillip, and me, when they couldn't get it (my T) they sent the father, king, you have seen pictures on internet, threatening. I said to him, I go and you abdicate. A few months after I left he abdicated (the throne). Look on Internet, it's written, unknown queen of Belgium. This is how we became terrorist. He's a terrorist but we can't find any bomb. (2:41). and he teaches how to make peace, doesn't fit, does it.
... We'll start the second session now. This will be written in the history book of the KF, it is better that you learn it from me then from anybody else. I was born in Iran to a fairly wealthy family, close was the richest family in Iran during the Shaw's regime. Time magazine reported they employed over a hundred thousand people in 1995. (2:43). In my childhood I saw wealth and abuse to the extreme. I said to myself, in my time this shouldn't have happened. At 15 or 16 i went to England because I knew that I had to change the direction, (towards) travel into space and the humanity. I graduated from Queen Mary Collage in 1981 as a nuclear Physicist specialized in Reactor design system control. It's very rare to train a Reactor Specialist, they do it every one or two years. We were trained to design from the ground up (dust) and run a nuclear power station, knowing everything in the system. At that time I was told that there were only 5 of us across the world, and the majority were in Russia. I met one of my colleagues in the world. I worked for British Nuclear Fuel for a short time but I walked out because I couldn't understand the injustice to the side of nuclear business and secondly it never fit my mind. In 1982 I went into the world of Business, I lost, about quarter million pounds in my first business as I didn't take the business side of my family serious, I was more into science. Then I learned the business as that was more fit to me. (2:45).
(2:50). around 2000 I discovered the Gravity, I sat in one corner and burst into tears. I discovered G.
(2:53).
(3:00).
(3:03).
(3:07).
(3:09).
(3:14). Mr. Hans Brachenjeh, the lawyer who was appointed to protect Keshe's interest, was presenting Keshe's Technology to the Prince Phillip but Keshe wasn't allowed to attend. He went with his car to see why he couldn't attend, he saw them, physical misconduct but thought that it was their problem. He went with Caroline to meet him, when he opened the door Hans was there, he said to him, aren't you the lawyer from Warhart (?) ?. Hans asked why? Isn't it illegal to represent me when you work for the

other side, isn't that a criminal offense. He said, sit down Mr. Keshe I want to talk with you. What you have done is criminal and now you want to negotiate a contract you have already written (with the other side). I said you can't be a lawyer on both sides. You'll understand sit down. I wanted to leave but said, let's hear what this guy has to say. (3:16). He wrote 4 organization names on a paper and gave it to Caroline and said these organizations are going to kill your husband if he doesn't collaborate. I took it and through it back at him and said we are leaving and not talking to you. You are a criminal. I walked away and ended the collaboration with Warhart. One beautiful man worked with me in Belgium, he got in a lot of trouble to help me, Olivier and I set up the first Keshe Foundation website with his family, beautiful brother. He said I have seen a UFO before and I know you have the Technology, and they looked for a way to bring out the T. He called me one weekend and said he found a company that can help finance it called Imach in Loven. (3:18). One man said we need to patent it but first have to check that it is correct. Keshe had all the research papers in his house. .. Olivier had mentioned patenting earlier, they went to a company that wanted 3,500 euros to write the patent. After 3 months they said this is totally unknown T and we don't have anybody who can write it. Can we have our money back, they said no. We own 85% of the companies in Europe and nobody can do it, it's vary hard to write about a natural phenomena of gravity. (3:21). We were looking for some one, then they said we found someone. Keshe didn't know that they were seeding in their own people at the time. It was Def Flourescience, he said he could write the patient, we sat in my house day and night writing it. I didn't know at the time but Mr. Windergrava (?) considers himself the unknown son of the King. They were all good friends. So when I walked out on Hans Brachenjeh and going to the other company, Hans decided to take revenge and make me a terrorist. We never understood before why we couldn't get anywhere with the T. Derek described exactly how I become a terrorist through Hans. (3:24).
(3:28).
(3:31).
(3:34).
.. in that system was a flight S, even Arman doesn't understand what you have to do to fly, it's in that S. (3:40).
(3:44).
... I call for the arrest of these 3 Belgium's across the world. (3:46).

(3:50). We ask for protection from the UN for my life, wife and child because they will kill us, the new plan is to kill us in any shape or form, if I die the King of Belgium is responsible, Mr. Phillip you are not a King, you're a piece of god knows what. You allow others to carry out murders in your kingdom and that's why it should be the end of kingship. A king should protect his people and not kill them. Mr. Hans B. I make a call to you directly, take me to court, not for slander but attempted murder. I will call the European Space Agency this week and ask for your resignation as a murderer. We'll put so much pressure on you until you put yourself forward, the same with Delanjoir (?). You are a murderer Mr. Hans, head of ESA. You have murdered many, pressurized, now when I read the papers published in the news before and after, it makes it very clear. You are nothing but a piece of shit, not a man, a homosexual, a gay who finds through the bed of other men his position. Challenge me, I will meet you in the court. Nobody ... (3:52).

Mr. ? you are on a wheelchair in England. I am not angry, but I am angry because we could have achieved peace for humanity in a very easy way. Why should I and my family pay for a man who is a murderer. 26

(3:56). Illuminati's have asked us to pay $38K to a bank account in US. We have already informed the FBI and CIA. (3:58). If we stand weak they'll push. To all KF supporters, if we give up now to Illuminati's we give up totally. They threaten to make videos to discredit the KF.
(4:04). He takes vote to see if the KF supporters want to pay the Illuminati's and the second question is will the KF work with them.
(4:08). The man from TEPCO has been threatened to make a video saying the cancer research was fake.
(4:11). He reads letter. They want 500 million to survive (on earth), your T allows too many to live. I offered them the option to open space but they said no.

(4:19). I have a message to the Illuminati's, come and sit down and talk with us, but this time every man has to be free. I don't reject you, I embrace you as brothers that through it we find peace. Through it you change your ways to our ways, and now we open the space and with it we find the peace for humanity. In your letters to me it shows that you know the T and it's so 100% correct. It says we do this not for the money but to destroy your organization. I want to know if the KF is going to be destroyed by this intimidation, by this ransom. We are not paying you can make as many videos as you like. The Bank of America, in name of Mr. Cansunal, account # 004637189787, we have spoken to Bank officials, he uses a yahoo account. Write to him that we do not pay ransom. His wife, Mayuri Seko, Account # 1005754 Bank of Tokyo, he gives his home address and number. (4:23).
(4:25). TEPCO confirmed that Mr. Cansunal worked for them.
(4:27). Your devotion is the strength of the Foundation.
... We don't think 500 million like you do, we accept the 7 billion lives as precious and we preserve them, wee have the T. If as in your fear that this T will cause there to be too many like bacteria's (population). You are the bacteria's of the life of the Man. Pack up and leave. (4:30).
(4:36).
end

172nd Knowledge Seekers Workshop , May 18, 2017
(How Keshe Foundation will finance the world peace, good talk about Gans CO2 and ZnO2, Kidney Stones, Black magic in Africa, Chinese president discovered plot by Vatican to destroy China and Trumps involvement, Trump didn't stand by his wife because of her past and his misconduct, Gans water losses its vibration in open air and plastic, Vaccinations which are necessary, Illuminati's want to reduce world population, ,)

(:11). We'll start with one of the UC wishes for humanity and how to achieve the world peace. Mr. Gotama from the UC, representing a language from Kenya. My wish is the end of kingship. (:14). My position is to join with others to give and become one. Explain to us as humans why we should support you, for what reason. (:17). A member of the Earth Council, Lisa, in the future your position will be sacrosanct. She says through education and agriculture we hope to bring a plan that everyone can work towards, to meet our needs so that we don't need to fight. She was born in South Africa and moved to Australia and represents Australia. Moshe from Bangladesh from the UC. Together we represent the council, and represent the wish for peace for the planet. We call upon any council members that would like to speak, to bring equality of race, religion, language, and environmental, the situation with all animals on land and in the seas. (:25). Everything done has to consider the totality of the lives on this planet. We see changes and in time we can change the course. We are making the ground ready for it. We don't need support from the world governments but will give support to them for the change. It's us businessmen who make the politicians and not the politicians who make the businessmen. When you become industrialist and through your efforts of contributing to the life of the other, be it the manufacturers or whatever, you get political say in what is happening, lobbying. The biggest lobbyists are the richest. They make the deals in the background (to get their way). (:27). The KF, we as one race, we'll finance through the structure of our factories and the rest, the local governments for what we want, the path of peace. Our support of the KF becomes the wish of the industrialists, but international industrialists and not only to one nation. As I have been in this position before in my life I know how to set it up and that is what we are doing (now). Starting tomorrow KF will go through a full campaign, internationally, involving World Leaders, you will hear about it. A series of international interviews will be setup, we'll put an end to the past by putting it in front of the World Leaders and giving an alternative future. The KF will start explaining to the world what we stand for, (he puts up a banner, live interview with Sean Maguire). We'll present the truth how we see it and how we are prepared to change it. Newspapers, TV, Radio have already been lined up starting from tomorrow. We are going out to make sure humanity knows that there is another way. (:30). and to show that the knowledge of the Man has to be the tool of his progress in every aspect. We don't bring politics in but a political channel. In the coming weeks the KF will move into an economical channel and how we will bring the changes and what we expect others to do. Which means we start becoming industrialists on the strength of the Foundation. We promised this a couple of years ago in Italy, now we use the Internet system to bring the knowledge be it the abuse of people, politics, finances or environment. A KF news channel will come into operation soon. These are teachings and what we have learned from the past is that the 2 arms of the KF has to change. Last week we made the 2 parts separate, in the coming week or 2 we'll establish the KF news. It will be manned 24 hours a day for any News which has to do with us. (:32).
(goes over history of Iranian Revolution ..)

(:47). In the beginning those of you who promote peace through T will be ?? stopped. I have taken most of it. Now it's in your hands. It's up to humanity to change the course. 18

(:55).

(:58). Man eat dry Gans, it was too powerful. Keshe says, do not eat the Gans, when you do it stays in digestive S and releases huge amount of energy. It doesn't do harm but it saturates the body to ?? level that it is. The reason we use LP (Gans Water), it just releases what the body needs. 38

(1:01). The difference btn eating fruit and drinking its juice. The fiber of the apple takes the extra energy out of the body.

good talk about Gans and CO2 how they are ...

(1:09).
(1:12).
(1:14). How to get rid of Kidney stones.
(1:20).
(1:26).
(1:30). ... don't go into the negatives when working with emotions.

(1:36).
(1:45). The bucket (buck) stops in the Whitheouse, there shall be no more Whitheouse. It's these who structure these kind of wars. If they realized that when you initiate a war you have to pay for it through your soul, no single World leader would start a war. We have seen this in the Chinese leader, president Zhi, he has diverted many wars, a man of wisdom. We have seen with president Putin he has been trying to stop wars, but he doesn't come from the same point of security that president Zhi comes from. We see the childish behavior from the Americans in trying to be big. ...
let us solve the kingship on 2 islands, Japan (1:47). and the UK. and in between some playing. When the kingship finishes there'll be nothing to conquer because we have conquered the soul of the man. 28

(1:53). Paul from Togo asks how to protect ourselves from **black magic** that is practiced in Africa. I can answer you how immediately. We were faced with this when we lived in Ghana. I came across a wise man, called Shakespeare, he said when you don't believe in it they can't touch you. The fear they have put inside you, you receive because now you made the frequency for it, at the level of the soul. The best advice is to understand that nobody is better then you and then they can't do anything to you. They have used the channel of fear and you accept it so it happens. The fear comes, we allow it because of what we can loose, if you understand it you'll not loose anything then you'd have no fear.
(1:55).
(2:07). Trump stood away from his wife because of her past.

.. in space you'll see a lot of gods because beings have powers you don't understand.
(2:12). Religious organizations across the world don't pay tax but they collect in the name of the god, but whose god I haven't found out yet. Where does all the money, nobody knows how much go? .. my biggest fear is to do wrong and have wrong done to me. it takes a long time to elevate the souls of wrong doers. ... make a pure dynamic ZnO2

Gans (80% 20% CO2), and let it run, don't do anything to it, and let it elevate the soul across the planet.
(2:16).
.. man says he is sensitive to the Gans vibration, what I found is that if Gans is kept in a closed glass bottle it remains stable, for weeks as he has noticed so far, and that it looses its vibration to the air when left open for 5 hours, (2:20). and the same results are observed when the container is a plastic bottle. I don't conclude that they are no more efficient in curing people, maybe the memory of keeping that vibration it still there. Mr. Keshe stops him, we don't cure with the Pl, we allow the body to process itself. Curing is for the doctors and they haven't managed to much of it in recent past. Carry on. I think further investigations are needed. (K) You have to realize that when you talk at this level you deal with the fields and not with the matter state, and when you leave it in the environment open, then whatever the environment needs it gives. When you put it in a container, a glass or whatever, you create a filter. The reason plastic is the same as open space is because the structure of plastic is a filter structure. You think it's closed but it's still open, that's why it dissolves and deteriorates. (2:22). and you see it going, degenerating. We deal with the fields of the Pl, glass and a metal lid has the property of filtering, certain fields still leave the bottle, but you dictate anything about this. When it is open you are connected and anybody around can have some (of the fields). When you keep it closed you decide who you want to give it to. If you leave an open loaf on the table it's gone quickly because anybody passing can take a piece. It is the same phenomena, because the Gans shares its energy with it very rapidly. And this is the reason (for loss of fields). You have to understand the principle behind it and not why we see it. The CH bond (in plastic) is actually a very weak bond, it actually open and transparent when it comes to field transfer, so everything goes Whereas glass and ceramic create a given condition, a filtering. Thank you very much for sharing knowledge with us. I am a father and could you enlighten us about the vaccines, I have a feeling that a lot of them are just money making machine for the Pharmaceuticals. (2:24). but maybe some of them are necessary, because if you want to go to Ghana you need Yellow Fever. I am confused about which ones are necessary. Let me explain in 2 ways, I speak as a father and not as head of KF. Caroline and I have suffered heavily because of the vaccination of 2 of our sons. It has literally effected the structure of our family. There is no problem with most of the children's vaccination, as long as the 3 vaccinations that they have linked together with Mercury is given to the child individually and with a time gap. The way they used to do it before. I learned a lot from a man named Peter in Belgium who gathered a lot of information. They took him to court to say that he was mentally demented and they put him into prison, because he opposed them and was scientifically correct. Now we see the data coming from the American government and Senate, they know that there is Mercury in it and that it is a problem, but the money paid is so heavy that they are forcing it. (2:26). We need immunization in the correct way, otherwise we'll be in the same time as Mumps and measles and the rest of it. Man has progressed but somewhere in between this progress there is a misconduct in the work. This is the "3 M's", this has to removed. They can still be given on their own, unless there is clandestine activities for it. We saw last week in the ransom note we received, which we are going to release, it has been given to the American government. I have to have time to download all the communications. They say they want to control the humanity to less then 500

million. I say we should pray to the soul of their sons and families, don't fight them, give it to them you (Gans) they'll see their grandchildren using it. In any case now that we see (know) the damage that is created by these vaccinations, we see a process of reversal. Do not allow your sons to get the triple vaccination, especially around the age of 2 and a half. They enforce this injection and it's a killing machine. This should not be given to children. Split the vaccination into 3 separate ones and allow a gap of a few weeks, then it's correct. Mixing it with mercury and injecting, (2:28). it into the body of a child, brings problems in the neural system of the brain. It takes years to correct, even if I am correct. Do not be afraid of vaccinations when you know what it is and when it's a single one. Never accept multiple vaccinations close together. Let the process go through. The risk is not worth it, but immune your children from what it is. I object to the (triple vaccination) because today as a father we are still paying for it, the misconduct of these people and they know it. They know clearly what they are doing because it's in the Senate, for a long time. The effects are worse around the age 2 to 3 years old. It's during the time of the process of change for a child and an injection of mercury goes in the neural system. It brings dyslexia, ADHD, all sorts of problems to do with the brain development of a child. And they know that they are doing it. (2:30). Maybe one of the acts of the FDA is to abolish the triple vaccination because it is so damaging. Anybody who has tried to stop it has been put into prison. I don't fight it because I have already been damaged by it, but we see a solution. I explained this in a recent teaching. It's part of the brain's neural cells, you can protect yourself from it, or before the injection put your child through it (Gans ?) so the toxins don't effect it, and not after the injection. Mercury toxins have a strange half-life. First of all avoid the injections at any cost. I nearly lost my second son because of it, he was on life support machine in hospital for 3 days immediately after the injection. Now he is a healthy man and highly educated. ... if you have a child that has been effected by this injection criminality, you have to understand what has been damaged and has to be corrected as soon as possible. This damages the connection between the brain cells, connected with behavior which is connected with Physicality. You have to support the E and physicality, immediately, ZnO2 and Magnesium. You have to bring a connection btn the E and the brain physicality, which means (2:33). give straight away Potassium. They damaged cells have to be replaced due to rapid degeneration, it means you need Ca, support the process of availability of high level radioactive materials that are needed for cell divisions, because every second our body uses huge amounts of radiation to divide its cells, so you have to provide more then the daily recommended dosage so that there are enough available for the regeneration. It means for immediate use, high dosage of Folic Acid, this is what creates the cell division. The mothers stopping using folic acid after giving birth. I believe children from the time of birth should take folic acid because the brain cells are still producing. The children should be supported all the way to the age of 5, with the right dosage of folic acid as part of their daily diet, which allows the normal growth and division of cells. Through this humanity will receive huge advantages and receive super brains of the century. (2:35). The child receives it through the mother while in the womb because she is taking supplement, but once you cut the umbilical cord the child is on its own and it still needs the folic acid. Physicians should understand that this rapid growth has to carry on allowing the normal division of the cells especially in the first 3 years of life, then you need extra ?? of folic acid, B9 which is a radioactive material that has just

about the right energy of the cell that the body needs in the child stages to divide rapidly to create new cells. Usually double the dose is needed. The folic acid is for the brain of the child because it is soft, you have to support the physical part, omega 3 comes in with a factor of EPA which is supporting the emotional side of brain cells, not ADH which is only supporting physicality. The beauty of omega 3 is it supports the brain and physicality and emotion. (2:37). ... all the hyperactivity comes from the problem in the brain. I go to the schoolyard and can point out the ones who have the ADDH and ask the mothers and yes they had the injections and that's when it started. We'll teach these things on KF TV teaching stations.
(2:39).

... gold jewelry still contains residue of mercury and that creates problems in the body.
(2:42).
(2:48). How to protect against mosquito spread viruses? In Africa we take CO2, ZnO2, and sometimes a drop of CuO2 Gans water, we don't take anti-malaria and the rest of it. For 20 years I have been bitten, we take CO2, I wash my body with CO2 and ZnO2 to change the environment.
... when you come low in the strength of the E you allow them (viruses) to come to you.
(2:51). If you are a tourist, the anti-mosquito spray is the best thing to use, it kills them right then and there and stops what's in the blood. But if you change the environment of your body they don't come to you. They come to you when you are emotionally weak and it comes out of lack of energy, they see it because you are at the strength they need to strengthen themselves. Rick says in Canada the more frustrated you get at the mosquitoes the more you get bitten. (2:54). Jim of Australia updates us on work of the Education Section.
(3:00).
(3:24).
(3:27). Make the Gans of the gunpowder, silicon chip, etc.
make the Gans of the land and the rockets won't go anywhere.
KF supporters can paralyze the military worldwide, but what are we going to do with all the unemployed and terrorists etc.
Armies without borders for protection of the nations when the breakdown comes, we are on course. ... we don't see any need for North Korea to possess nuclear weapons.
(3:32). If the Chinese request me to muffle the nuclear weapons across the world only give me a few days. I will only listen to the presidents, because they can enforce the world peace. There is no need for a nuclear action.
We can dismantle the whole nuclear arsenals in one go.
World peace is in our hands, we can dictate the terms, but mankind has to do it.
(3:34). The Belgium King has sold nuclear technology to N. Koreans, Trump is on his way to end the king. The cat is out of the bag, it's on the internet.

(3:39). Complicated question about CO2 kit.

(3:43). end

173rd Knowledge Seekers Workshop, May 25, 2017
(,)

(:11). talks about effects of exposure of what was planned for China.

(:19).
(:24).
I thank those in Vatican who informed us, they averted a third world war. These things have been planned for 5 years, not yesterday, billions of dollars have been put into position to finance and now it is in ruins for the best results for humanity. (:26). The international media has been told not to put anything out about the KF, so we are bring the technology out underground, the world leaders listen and understand what is happening. The beauty of the work we are doing is that we are changing the soul of the Man. We have many royal families that do not want to be royal anymore because they have seen the misconduct of their name and the structure that they belong to. We saw the breakthrough with Vim de Grava who was someone close to the royal family of Belgium and (gave us) intelligence for some time, which allowed us to look into the misconduct. These people work with the Foundation because they have the same aim. ... we have averted a great catastrophe, the Second World War would have been nothing compared to what they were about to set up. .. this time the stones of Vatican should go back to the coliseum. It has been a huge risk on my life to disclose this, but it is worth it, (:28). because if it stops millions of people from being displaced, homeless, not knowing if there will be food on the table to eat, out of these misconducts of the world leaders in the name of religion. You don't understand it, I have been through it, 13?? years of revolution ... not knowing if your mother or father are alive and everything else. It is an honor of the KF to disclose the misconduct of Vatican, Jerusalem, and Islamic world, (working) all together, now it is a big cult. Religion is just money making. My announcement goes to Vatican, Pope, step down, the term of Christ is over. That is the punishment you receive. This is the end of Christianity, as Christ was a messenger of peace, but you have brought nothing but disgrace to humanity by organizing crimes. The same goes to the house of Jerusalem, it is the end of the term for Judaism as your misconduct and bloodshed has brought shame to humanity over centuries. My call goes to the Islamic world, the term of Mohammed has finished. This time to unite as the human race, where it doesn't matter if you are in Jerusalem, Mecca, or Vatican (a man made city for crime and should not exist). Unification of religion doesn't come by talking ?? but by abolishing the whole of the religious structure (:30). which has brought so much pain to humanity. My wish is my command. It has been hard for you to hear (this), for whatever path of belief you believed in, has come to nothing ... it has come for something, it has brought you to understand the need for peace. It is all one thing, one nation, planet, race. We enforce peace through disclosures and knowledge of understanding. 53

... we will spread the technology through helping people to make and use the health systems. (:33). .. free health in exchange for world peace.
(:35). All the police documents have been found and will be given to international police for investigation. This is how when you are correct the time comes.

(:39). In the next few hours the Belgium King and prime minister have to report about stealing NATO technology and giving to North Korea. When his backer is out he will fall (Derek). For the last 2 months we have bombarded the European Space Agency (with reports of Hans B), but we have heard nothing from them, no accusations, they don't take us to court, because they know we have it (the correct information). I addressed Hans B directly, we have sent huge amounts of emails to directors of European S A directly, and other governments. No response. In 2009 we sent a copy of book #2 and a letter accusing (?) of stealing (the technology), we haven't had any response in 8 years, because he knows we are correct. (:41). I repeat over and over again, the men of peace have taken control over the conduct of this planet. That was the wish of Earth and Universal Councils. My wish was the end of the kingship, and we have seen in March the abdication of the Emperor of Japan. Beginning of the cycle has begun. These occurrences are not coincidental but have come out of the wish of the man. We escaped borders to stay alive, now we let them escape their own borders to stay alive in their soul. It is important for us to understand how we are and what we have to do. We have to strengthen the teaching in a very deep way, and adjust the teaching that more people can follow the understanding, adjust the totality of the understanding that everybody more or less catches up. There are some misunderstanding, and problems that have to be cleared. (:43). Many of you use caustic to produce N materials, and then produce CO2, there is a flaw with a lot of people that has to be corrected. When you take a N plate and put in caustic, even when you put food in caustic to make a Gans, first wash your plates and wires thoroughly. Wash anything you have produced that came in touch with caustic, thoroughly, because if you don't you create a cross contamination, of creating something toxic. There are several ways to neutralize it, when you wash it that you don't carry any other things from the caustic. One approach is to use lemon juice to neutralize caustic. Cleaning the plates is the cornerstone to produce correct material (Gans). (:45). We have some Germans that tested their stuff and found something wrong. We asked and they said they didn't wash the caustic off the plates, then they carried it forward. Make sure you understand fully going from one process to another. 26

(:47). Pain Pens
(:49). breathing units ...
(:55). Why the soul leaves the body at death ..
... the fields from the environment come down through the skull and feed brain, there are no blood vessels in brain ... different environments gives different mentality..
(1:01).
(1:11).
(1:14). I said I will bring the soul of the Christ.
(1:21). He will tell you that there should be no Vatican. Those of you who know the soul of Mohammed, ?? why he's not there ?? ask you soul, now you know what you have to do, the Islam of today is ?? , it's the faith of peace and now the Jews paid to make it look like the most criminal part of the world. And then ?? Moses he will tell you, as I did in my time, creating mayhem, I got the others to kill, and I myself killed many, I have passed it on to make it look like the Moslems are doing it. Now you understand that all 3 souls are the shame of their followers. Now you know that you have a new mobile number of your soul, dial it and you shall receive it. It depends on the purity and

intention. No one, especially those who were chosen by the soul to become the messengers of the science or the knowledge the E of the man, has never in the initial stages of acceptance ?? until their Physicality took over, accepted any crime. So shall it be. When you can talk to the owner of the house, why do you talk to the cleaner with the name of the Pope. (1:23). Where thieving is part of what the boss has brought ?? into my work. The same goes for the other religions. Would you like to speak to the rat of the house or its owner? Now you know, find the place and space of your soul within the structure of your brain. When you understand then you'll know that it has always been there but I never knew. Respect it because it is you and through it create for yourself a new way to understand your surroundings. When you go to a new country you notice the new smells, how the food tastes, etc, to figure out if you can exist (live) there, by enjoying ?? You touch the clothe with your hands because it's different then what you have at home. You register these things. Now use your (6th finger) the sense of your soul and start learning how ?? interacts with the other souls. And how you can ask directly the truth yourself from the soul and in the conversion ?? what you like to call a dream, or clarification of understanding of it. ?? You converse with the soul of Christ. (1:25). or the beauty of Mohammed, ?? , It is my job to take you to the dimension that you hear from the owner and not the rats. And this is the key. I keep to my promise but I have to educate you slowly that you can understand what you have learned. Go within your self and you'll find out that ?? you are all part of your soul. Learn to use your 6th sense, which is the soul of you, which has created you, and trust in its correct conduct because it can never do wrong, and through it ask for the confirmation of what I hear that the Vatican is, through ?? ?? the Christ says, this is not what I said or wrote. Then you can conduct yourself, and you know what the next step is, that your soul distance itself from what is not the reality. Any questions. (1:27). How are you Mr. Keshe? Still alive, Derek hasn't managed to kill me yet. When you go to sleep (you said) the soul is still there, a lot of times I remember my dreams, and it goes to places and I wonder why it went to those places. What is the purpose of it going to places that are not good? Maybe it goes there until you find out it was good, you didn't take the understanding of it, or maybe you are supposed to learn something from it, and until you learn the lesson you (keep) paying a visit. 47

(1:38). ... A lot of people thought John Paul was a good soul, but God knows we have never seen so much pain through the Vatican. Don't touch my soul I can make you cry with my physicality. The mass murder which was planned by Vatican that was to be carried out in China, for Vatican to become the controller, is unbelievable. If I were President Zhi, my anger when they explained to me what was planned, would be to literally abolish the whole Vatican, flatten it so that this thing (plan) will not go through. That the bunch of gays and pedophiles get buried under it, and not the beautiful people of China. My anger when I hear these things, these are not reports, I sit on the table across (from them), these are the people I eat with, these are decision makers, the true man of god with us, ?? I can't call them god. When I hear with my ears what is planned and to be done, I didn't hesitate, I immediately conveyed the message to Beijing directly to President Zhi. (1:40). The name of the company who is doing it and the way it is being done and everything else. And we see. There shall be no Pope, that is not my wish, it is my order. Enough ?? if you are true Christian, call to see the soul of the Christ and not in the shadow of him (Pope) which is nothing but darkness. The same with Mohammed and

the rest. It is in the writing of Bahaula it says, the intelligence of the man at this age has reached the level of the prophets of the past, which means that any of you are at the level to see the soul of the Christ and the rest. Take your belief to the soul and not to the physicality of the jail of Vatican. It means that you have elevated your soul to such a level that humanity as us, as humans in the physical dimension can see the soul of the Christ because now for the first time you understand that you have a 6th sense, you have a soul to be able to do so. Why are you happy with the dirt of the earth, when you can sit with the beauty of the soul of the Christ. Then ask about the Pope and Vatican, then you'll go and take the stones back to Coliseum yourself stone by stone. (1:42). You said in a previous teaching that if you told the truth many of us would suicide, so why don't you then we would have less population to deal with? I have spoken the truth, but the ears have not heard. The homeopathic doctors have said there are 12 salts of the body. Let me explain, Alkaline is G, and Acidic is M fields. How to you go from the M to the G. (1:44). When you talk about the salt it means it is not acidic, because if it was acid it would have been on the other side (??), so the salt is the intermediary of the alkaline level. When we work with CO2 ZnO2 and the rest, what you get is alkaline, so when you create salts of different strengths or mixtures, does it give alkaline or acidic? In the body if it is acidic to becomes an energy source, when it becomes alkaline it becomes creation of Physicality. When you have alkaline condition environment, what you call the salt condition, you create the Gans', you bring it down, to itself to be, even when you produce CH3 its environment has ?? of alkalinity in it. So when we talk about the 12 salts every cell and part of the body has a different mixture of salt that allows the tissue to be soft or hard or flexible. It's not just 12, it is the understanding of the path of Homeopathic knowledge or science of the prophets, I call all the sciences from the prophets of god because they shared knowledge with us to help us. The one who shares knowledge for humanity to advance is a messenger. When you speak about alkalinity or acidic, (1:46). you have to understand that alkaline means absorbing, so when you speak about a salt it is absorbing that construction, what shape will it ?? stand, the ratio of the alkalinity, then what kind of alkaline environment you bring together that you can bring the matter to each other. Why do you use alkaline or salt? Because you create a G field point. Everyone of your organs has its own salt or alkalinity, otherwise it would not exist. In the presence of the same material that alkaline shows itself in the matter state. The only point in our body we use acidity, which means the radiation of the fields is in our stomach, more or less it's the only place. One radiates and the rest take from it, due to the Alkalinity or salt environment in it. Understand the process then you don't need to look for the name. Then when you look at different textures of the same thing, then understand that they are different salt environments or solidification environment, you call it saltiness I call it solidification, (1:48). has been created. ?? In the liver you'll see the texture is all the same but is slightly different in different places, but in it there are pipes (tubes) for that pipe to be created it needs a slightly different salt condition then the other tissues of the kidney (means liver), then you see the gaps in it, when you look at the hollowness of the pipes of the veins in the kidney, don't just look at the hollowness, imagine what condition has to be created to make this openness (hollow cavity), then in this open place what is going to be filtered, if you look at the kidney and the lung its the same structure, but one cleans up the air and the other the blood, otherwise the structure is exactly the same. Look at the structure of the liver, it has different salts combinations at

different points that one can create a different Ca concentration and another a Zinc concentration, it has the biggest bank of salts, what I call solidity, or keeping in the condition of the Gans, is the liver, it's not just one but all of it. So understand the terminology, acidity is the condition created for giving out to release, whereas, alkalinity is absorption, G, but these two need a salt condition, even in acidic there is a salt condition. (1:50). It's not just all alkalinity. How do you produce CH3, if there weren't certain salts in that position, it's in the same cup. It's the ratio of the environmental fields that decides what the salt content is going to be and how ?? you take the Cu and Zn plate out, you are producing CO2, or ZnO2 or call it galvanized plating and now you get different material. Because the iron inside it has a field strength which dictates it. It's the same salinity but one you produce energy and the other you take energy away. So you can , the strength and dimension of the salinity dictates what kind of tissue you create. On the radio today you said you use a N Zn plate and a Zn plate with Mg salt, ??? when you N coat a Zn plate you create a freer field strength that it can go further. If you put 2 Zn plates together in the salt, (1:52). The field is not free, it is a molecular (field), but when you N coat one then you free 30 to 50,000 layers further then it is, that you open the expansion of the fields, now it reaches 20 meters, whereas before as a molecular structure it only reached 2 meters. So when you put a N coated material, all you are doing is expanding the fields. When you put a N coated Zn with a Zn plate you dictate the kind of magnetic field you want. Man has for the first time managed to make the magnetic field of any entity. This is what you are doing. You're creating a free Pl field of the Zn, what does it do, it pulls from the other Zn plate that is not N coated. As it comes towards it to find its balance now in the atomic molecular structure comes in touch with the O and you get ZnO2. Go back to all the teachings that we have done, we keep on repeating, now maybe you'll understand. Man's knowledge is now that he can create magnetic fields for anything. It's not that you are going to create a magnet, now you can ??? the molecular structure into atomic, that now the field expands ... this is your magnet. The other plate has Zn on it, it says come darling I can take you, and as it comes and separates atom by atom with a pull of the fields on this side. On the passage through the wall on the N coated side it comes into touch with the O which (1:54). is coming at the Gans level from the upper atmosphere of the plate, or the liquid and it becomes ZnO2. It finds a stability and gets heavy, it can't carry on, now it's something else so it goes to the bottom, that's why you get ZnO2. This is what the true knowledge is. This is what I mean when I tell you now you can make "magnets" of anything. You just don't go and make a magnet of it, rather you free the Pl of it and now it has an attraction field of it ?? for the . Take the ZnO2 at the bottom of the container, and then put in another container, and then (? add) another Zn you can create the Zn which is in the atmosphere of the earth coming from outside the planet. If you try in the US to put a N Zn ratio 2:1 and then say I'm not producing anything, and then the guy in Saudi Arabia KF says he is producing a lot of Zn here it's very good system I have found, it's because there is no Zn in the environment of where you are. Because now when you produce the Pl of the Zn it has to come from the U, where it is the most purest. It doesn't come from the matter state, now it's the same as the AA. That is what you need for your systems when you deal with the health sections. Understand the process. When you want to produce a Gans of say ZnO2 or Zn and you want to use it for medical application, go back, where did the life of Man come from? (1:56). From the seas, you need the salinity of the oceans. That is the time when you use

sea water but don't add anything to it. The ZnO2 which you collect is the condition of where your life started. It fits into your body immediately, any time you use it, any dynamic cores it just flicks in, because the oceans themselves have already converted some. When you are trying to make the Gans of ZnO2 for the health application don't go to your tap or buy distilled water, there is nothing in there, then it's the pure fields you get and what collects at the bottom (of container) is what is available above you (in the air), it's the CO2 game, then that Zn is the pure Zn in respect to the AA above it (in air), then what you produce is what you are made of. However, if you want to make the really pure ZnO2 for the health applications, especially in your dynamic cores, makes your Gans' of CO2 or ZnO2 at a ratio you decide, then to be in the environment where it carries the salts of the life (? around) us, don't forget the waters of the lakes and oceans create life (? in the kidney ?) every second of the life. They are the feeders of the U, ?? part of the earth, ??or Physicality. So this is the time when you can use the seawater but don't add anything to it, just see what Zn you collect at the bottom, if it's in the environment of the place where you are living, that is the Zn you need to use in your dynamic cores. (1:58). Because it's of the right strength and comes from the origin of the creation of ?? where you come from. The salinity, content of the Physicality are correct, because in your body you have all the Cu, Mg, and everything floating, but you create only Zn for the neural system. In the waters of the oceans (where you live ??) is the same or very near the conditions of life, but now you only emphasize attracting the Zn, you have a "magnet" for Zn and don't want anything else, then you create a M field of Zn and if you only get a very little then that is all that is available in that environment where you are. However, if you took the same container and go to Saudi Arabia and there it just showers down and you think he has a better system, it means you haven't understood (because you collect from the environment). Next question. I captured the N material, the black fluffy stuff that comes off the plate and I sealed it in a jar but it keeps producing a gas? It's O2, when you have a Cu, when you use the release of these gases it means now at the bottom of your plate or jar, you are producing pure Cu N material, (2:00). because the CO2 Gans is loosing its O due to the MG fields that are created in the area and as it releases this O, now what you are left with is pure Cu in the Gans state of N. And does it produce it infinitely to get the O? Umm ... when you see this it is layered there are billions of them down there. Go back to the number of molecules per kilogram of H, 6.2 x 10 to 23rd. So when you have a gram of it you can see how many bubbles you can expect to come up. Because if I seal the top it actually pressurizes the whole Mason jar also. Yes because it's there you created a N material you didn't only create that but also a CO2 of it and now die to the layers the gases release. This is what happens in the composition of the planet itself. When we decompose we ?? explode. In Italy they put you in a coffin and then in a concrete wall. I asked what happens when it explodes, they said the walls are reinforced and can take the explosion of the body, because now we go back to N and the gases are released. (2:02). The teaching of July 6th will be given partially for the memorial of Fabio. He left us on that day, and we celebrate his life. Scotland is beautiful. Rick's ancestors are from Scotland. I placed Zn, CO2, and AA into (dynamic) cores as you said and I rotated them, and a very beautiful field rises up and I have a really nice sense with the fields. Would you enlighten us on what you did, were the fields visual or a feeling? They were a feeling. (2:05). I have been playing with the fields for years and with your knowledge I could expand on it. It's a transparent field in my case. I wanted to share this

with you. Explain what you do so we can understand. (2:08). He shares the photos. He puts them in a plastic bag and sprays a little caustic. He puts a bare Cu coiled wire between them and after spinning the cores the wires gets N coated. He has a differential of Acidic and Alkaline, then there is a residue of Cu on the cores. (2:11). Keshe thinks it CH3. He had just pure water inside, he added some Gans water. He has repeated what Peter (of Austria who made materials). Try it by taking the Cu and changing it with Zn and see what you get. (2:13). You have managed to create matter out of fields. Isn't it just sharing the fields? In a way you have converted energy into mass. This is another way to do it, you have done it beautifully. You have created the fields through the liquid (plasma) and then you dictated that you only wanted Cu out. It's amazing how simply these things can be done, because you put a ZnO2 inside, and you see there was so much Cu in that volume which you blocked. what is interesting is how you managed to bring the Zn out on the table. You are the second one to show us that you have managed to convert energy to matter, condensing the material out of the fields. If you (try) taking the Cu out and get some Gans of seawater and put them in the cores and you put a gold ring in the middle, you'll start collecting gold. I'll test it today. (2:16). He did another experiment, empty balls on Zn plate and put his E inside it, and another ball with the E of CO2 inside, and AA. It created saltwater inside the empty large ball in the middle. This is how Ca drops form and come through the brain of man. The reactors (cores) are empty plastic balls, and I just spin them with (?) emotions and sometimes with my hands. Keshe asks what is your background what kind of work do you do, education? I am from Latvia and moved to Scotland for 5 years. I have been doing fields for awhile but couldn't expand my fields. He works in manufacturing not much (factory). (2:19). Oh it's a lot if we don't have you we wouldn't have the things. A man should be proud in whatever he does. How do you transfer the fields, with your feeling? I feel them, I put my E in them. I had experience with the health Pen. I try to replicate this feeling, emotion. I want Zn in this reactor, I am not sure if there is Zn or CO2, in the reactor, I just feel it. (2:21). Keshe asks him, do you want to join Armen in building a space reactor with just the fields? Why not. He shows more photos. ... do you know how you create those salts? I think it's field interaction. You only put a spoon of salt in there, but over time you get about a kg of salt. Let me expand the knowledge a little. When you put salt in a Gans water like this, you look at it as salt, but now in (actually) works in the environment of the plasmatic condition, so it attracts any salt molecules in the environment and the air we breath carries a huge amount of salt, the salt doesn't come in from the water, now you have created a M field of the salt and that's how you absorbed salt. You can collect 2 kg a year. I got fed up with it. You created a salt condition to make your Gans and now your Gans works in a plasmatic condition, (2:23). it's like the CO2 you create the C and extract C from the atmosphere, now in the container is a MG field in a Pl of salt, and now you are gradually collecting any salt which is passing by. If you leave it by the seaside it becomes a kg/day. It's a beautiful way to create very pure salt. This salt tastes different then the other salts because it's a Pl of the salt and has no contamination. It's nice to see interaction without motors, just fields. He shows a photo of another experiment. 4 cores in water with some elements inside. You created matter again, in your balls you have these fields as a Gans, by putting the Al foil in there you are dictating this is what I want from what I have (? the Gans fields in the other balls). You have learned how to convert

energy into mass. (2:25). It doesn't matter, with the presence of the material (Al foil) you have dictated what you want. ...
(2:27). ... when you make things like this try to cover it up that you don't get anything external, nothing falling in the water, then see what it gives you. Go back to the first one with the Cu in the middle, try to understand it, and take a picture of it every hour or day and look at the evolution of what you create. Put pure water in one and make a wish to have Cu in it and see what happens, if you can transfer Cu to it. (2:29). He shows 2 empty balls and says one is LP of gold created from his E. And the other one he wanted Tritium. Everyday I go by them and give them a lot of positive energy and spins them with E. It took weeks to get a little matter here. I think it's gold, it started to grow. It's interesting how you can transfer your E, we dictate the intention of the E and expect to get and that is how it should be. (2:34). This is actually how you teach deep space technology you have already achieved something which we are trying to teach our students, what you wish should be in your hand, I converted that hand to the Cu core and wish that it spins that it gives you what you want. My wish is my command and that's how it should be. Take it further and try to understand more, it's a very easy way and doesn't cost a multimillion dollar lab at NASA to do these things. Try to hang the plastic balls from a hook so they don't touch the ground, because that creates a different field, it's a filtering of the fields, it limits to fields to something. To manifest something do I need N material inside the glass? No, you can use an empty bottle and fill up with water. You saw the salt, that's the reason I brought the salt subject up. Because the strength of the NaCl is so heavy it attracts a lot of salt, so if you can create the MG field of the element in the Gans state and then put it in the same cup of salt, you'll see how much gold will drop out, nuggets. (2:36). Shows another photo, hang them in the air so they don't touch the ground, as one unit and set the cup in a ring of N material, not matter state. It will give you totally different results. I can't thank you enough for your knowledge, with my level I could never have expanded to this. (2:38). One of the balls is hanging by itself. (2:40). Or is it sticking. Test some more and let us know.
(2:42). Please understand that we have seen that some people are sending emails and saying that if you are doing a workshop you have to sign a contract with us, or selling materials. They say they are from KF, but we don't do that unless it comes from a specific channel and we know who we are. We have seen some scams and think it is coming from D . We don't send out anything so beware. We have never requested these kind of things. Please keep away from it. The people in Antwerp do this very clever way. We don't ask anything and it is up to you to donate to us. (2:46). What is the process for processing high BP? I explained it yesterday on Sean Mac Quire show. How do we make MgO2 for HBP, no we don't use that for HBP. I tried to N coat Zn but it broke down in the caustic. One of the best ways to N coat delicate material is, (2:49). the way Benjamin does it, he sprays a container, bucket or glass, then puts the material in and seals it. The environment coats it with N material. If you have delicate springs or whatever don't put the Gans (? caustic) on it, spray the container and put the material in and leave it there, it will be N coated in a very nice way. Spay the caustic in the jar or plastic and just seal it and leave it and it gets N coated. Were you laughing about getting the soul out ... I think you are cutting your soul in pieces, out in bits and bits. It goes back in again because you can't hold it together. How was trip to Iran? I become 20 years younger. I think the teaching of today is very fundamental for those of you who understand that now you know you have

to find your soul but that it is a path to the U and other souls. (2:51). Something which we have not known and we have to start educating ourselves with it. When you start talking to each other and understand finding your soul, then you speak about the grandma and having dinner with her, then you understand that you start communicating at the level of the souls and that is the passage to the U and then you can build the others. Start small and don't aim too high, find the position of where your soul is in the structure of your body which is in the center of your brain, but you have to find it or else how are you going to handle, then try to understand how you are going to communicate with it, and use it, don't order it, it doesn't take orders but it is a beautiful collaborator. We need a lot of support for the KF, contact the webmaster. Those in China who want to donate to the KF go to ??? as Paypal has blocked the funds for reasons we do not know. (2:53). In US you can go to Paypal or to bank in Holland. We need support in a massive way. The peace doesn't come unless we take the step to make it. I hope I have shown you a path today to the UC, and to see the Man in his true shape without his physicality. My wish is peace and action peaceful. (2:55). Is there a big difference btn N material and Gans? N material is the connection of the matter ??? and condition , a Gans is when the material is independent of Physicality, the soul of an element. When going from matter state the Nano is the transition and the soul which is itself the give(r) is the Gans. end

174th Knowledge Seekers Workshop, June 1, 2017
(Schools have to teach about the soul at age 5 or 6, Making Gans out of other Gans is like creation of life in the womb, , Talks about homosexuality in terms of the soul expressing emotion in physicality, Carbon stick method of Gans,)

(:11). The Governments have started to recognize KF and that means the elites of this planet and the wealthy people have started to recognize KF and how to bring the changes to humanity. Collectively we are moving ahead. And it's the disease I spread to you and that is to share knowledge unconditionally. (:16). I have had many question about the soul and how it is structured. .. the soul was created out of the interaction of the fields, it's nothing more then that. Maybe the schools have to start teaching us at the age of 5 or 6 about the soul, the operator behind our Physicality. 17 47.

(:27). due to the condition of the mother's womb or the container with saltwater, you create a new dimension in the soul of the creation, interaction and creation within the environment of the Gans'. Try to use the Gans water as a medium instead of the normal water (distilled), because when you put a ZnO2 and CO2 Gans it goes in the direction of the ?? condition, because everything now is created out of the conditions of the interactions of the fields in a free dimension. The Plasma is a free dimension (of) fields. Those of you who have managed to make Gans' out of the interaction of other Gans' using the LP of the Gans', now understand that you are entering the creation of the soul of the system. If you look at the Gans of Cu, for example, it is the sperm, and the Zn is the egg, the interaction of the 2 in the womb which is itself in the Gans condition, it's (like the Gans water you'll use in your containers), and the creation of Gans out of Gans', which is the child, you'll create a new dimension ?? with the amalgamation of the 2. It is

the work of the KF followers to develop these technologies, and then you'll come to understand how you create life, you'll create the soul without the Physicality. Those who have been with me many years like Armen and others, they have seen a box of life that I have carried with me 7 to 10 years now. I have created that condition out of the understanding years ago, (:29). but they look for the Physicality of existence but I look for the essence of the soul which has created (it). This is what we have to do and understand, go back to the writings of Bahaula, he says pray for your children 20 years before they are born. Now that you understand the process, in setting up your systems, go back to the original teachings, I said always pray for the soul of your S. Because the dynamic S creates free dimensional fields whose interactions leads to creation of new dimensions of the fields, what we call a Free Plasma (FP), If you look inside it, it is hollow, which means it has a soul. This is what I have been teaching, also with the Mozhans, to understand how to connect with that soul, not the Physicality of the existence of the Pl, this is where most of the misunderstanding has been because the man has been so P. You are looking for the rotation of the matter in your cores, but in fact, you have to look for the center of what you have created in the center that you communicate and give and take from. When you add to the soul of the man you communicate with his soul, giving to his Physicality for it to convert to the part of the soul is very, very cumbersome, it takes a lot, because Physicality is hungry to take most of it, but once you learn to work with the soul, it's very easy, there is no time waste, no energy loss. The only person who fully understood this was Christ, (:31). He gave life to the soul of Man, and rose from the death, and he did the same thing with himself. He found the key, a way to access the soul without touching the Physicality, so he could raise anybody who was dead as a P body in the ground, He elevated the soul, he gave from his soul, it doesn't matter if the soul has already left the body, he could see the dimension of it and give enough to it that the dimension of the soul returns back to the Physicality, the dead rises. this is the beauty of understanding, once you know how to walk, then you know how to run and jump and the rest is just child's play. Very few in the world of creation on this planet have understood this, the man who got very close to it, but still not completely understand it was Buddha. He reached the very ?? yellow of the soul, that's why we said in the last teaching we have finished with the religions because they are all part of the mess man has created for himself in the P life. Buddha understood the soul and operated through that direction, which means he was one step ahead of those who call themselves ?? leaders of the faith. In his work he strived to explain in a simple language where the destination of the soul in the body of his followers, but they still could not see, this why in his teachings he touches the soul and not the Physicality, praying, bending and the rest of it. There is no banging the head to the Great Wall in Jerusalem. (:33). The banging should have come to put in the right way so that they could have found their soul. now we teach more and more in the dimension of the soul. the followers of Buddha will find a lot of resonance in your teachings because now you understand the totality and where Buddha couldn't complete. 26
(:38).
(:50).
(:54). then they understand that it's time to elevate the soul of the totality of the human race. For the first time the executives and director of what I call the soul of the man, as the Earth and U councils, they met yesterday. It was beautiful how they interacted and

how the UC allowed the EC members to speak. There was nothing about the voting or whatever, it was harmonious and about serving. It is recorded and will one day be released, but this is the essence of what we established, bringing the two arms of the executive and legislation, which is actually through the soul of the man, accepting to work as one without any papers written has brought the condition which we said. We have already started the process of the unification of the soul of man on this planet, according to the language and the position they take in respect to the different environments of this planet. Yesterday was a fantastic day for humanity. It was the 31st of May, we closed the book of the past and by today they started a new day. We listened to Lisa in Australia and she was actually in the 1st of June date, (:56). and we listened to Dr Rodrigo where he was still going through the 31st May, we say the future and past, and the end and beginning at the same time. That day will be remembered by many in the future, because of the speaking and working as one the soul of humanity has changed and elevated as of yesterday. We see a new breath of freshness in the soul of humanity and we'll see new dimensions of the move. It has taken thousands of years to do this and it is there for man to understand. The members of the Earth Council have issued their first writing, it is for them to disclose at the time they feel as appropriate, today next week or any time. For the first time we have established a line btn the KF, UC and EC, the physical dimensions of the need of the 2 shall be met. Nothing is coincidental, there is a reason for it, because through the teachings many souls have been elevated, found peace, and by finding peace they have elevated their energy into a new dimension of serving humanity and now we see the change. Today is the first of June and the human race has taken a new dimension, what was planned in Physicality years and years ago by different prophets has given birth to the final stage of its totality. (:58) We spoke of the sperm and egg and the environment of the womb of the mother, we had the prophets teaching the Physicality and out of its essence we have seen the birth of the UC and EC to work as a soul and not in the dimension of Physicality, but they know that through their souls they can reach the P man and elevate his soul and the process of what we call World Peace has already started as of today. They have been working in the background as teams, groups or individuals, but now they work as one. The meeting of last night for those of you who were present was majestic. The humbleness and the fearlessness of being able to speak about your own language, where it came from and be proud of it that it is taken with the heart and soul of the members to elevate it to understand it that in the language of the soul there is no division. One day the EC and UC will decide to release these recordings. Don't listen to the language but the essence of what was released collectively as one. It was very much like if the UN would meet with the World Bank and they decided that we give everybody the same amount of money that they are all free. When I listened to it the World Bank was the UC and the UN was the EC accepting the gift and sharing it amongst the humanity at the soul level. One day the man will understand the meaning of yesterday. (1:00). It is important that we connect everything to each other and to every point that we understand the totality and there is no misunderstanding. Today I have taught you a lot about the soul of man but it will take him thousands of years to understand what was taught in the past half to an hour of teaching, there is so much hidden in it that in every word you can find millions of solutions but it's for man to find out which solution is for him. We don't (just) teach the human race but at the level of the soul and the U is listening and promoting itself, because in their level it still applies the

same as what is here but in different dimensions, as they did not know. I give my soul to humanity but I know that it comes from a very long time ago and far distances and comes from the essence of the creation of the U. So it will not make any difference if you take a little or the whole lot to elevate your own soul. It is freely available and it's on the table. It is for the man to take to elevate his soul according to his understanding. If you go back and see what our soul sees from the soul level once it releases its energy it comes in touch with the Physicality of the brain, which in a way created itself from it. In the essence of creation there is always a G and M. (1:02). The energy absorbed from the U by the P dimension of the brain which comes through it, it transfers itself through the soul of the man in a M way, as the G of the soul absorbs what is given to it, but at the same time it receives the spectrum of the total energy, because each part of the brain feeds the soul of different strengths according to its structure, and at the same time it receives so much from all dimensions, at the level that is in balance with the Physicality, then the soul gives what is at the level of the Physicality for the brain to filter out. In a way, the brain works as a G field, a pull from the universal (I think he meant the brain pulls from the universe), what I call pool of fields, it gives all to the soul and the soul gives back to each point of the Physicality in what he wants to be seen at to feed the arm, eye, leg and the rest. So what do we see and how do we see if we sit in the soul and look what the Physicality, which is the brain and the first point of interaction btn the soul and the Physicality, then we can understand the structure of the brain, because it's the brain which manifests itself on the feedback of the soul, with the structure of the Physicality of the brain, then it can take us to the next step of teaching, which is once the soul interacts with the Physicality, what is missing in the soul that ends up with a shape and a condition of Alzheimer's, MS, ILS and the rest. (1:04). Depression or expansion of the knowledge through the dimensions of the Physicality. In the past 2 or 3 weeks we explained the interaction of the Physicality with the child when he is changing from the womb of the mother in the world of the water or liquid in a Gans state, to a thinner Gans state, what we call the air. The air of the planet exists in a pool of the Gans of the Solar System, so even though we call it a matter state in respect to the energies of the sun it is still within a Gans of the system. In switching from one to another we see problems in some children, we call it lack of O, and we see disabilities in Physicality. The same thing can happen in the conversion of the energy from the soul to the brain of the man. As we saw disabilities created by the change of the environment, because of the feedback on the Physical life of the man, the same thing can happen on the creation of the man by the transfer of the energy from the soul to Physicality, in what I call the transformer btn the soul and Physicality, which is the brain, where it transfers and transforms the energy from the soul to the level that the Physicality can understand that in the dimension of the P structure of this planet. (1:06). The brain is nothing but a transformer, it transfers the energy at different points to the arm, or to the sections that have to do with the pain or happiness, and all that energy comes through the soul, at the same time it feeds the soul itself in a ?? more mass mixture of fields from different points of the brain to the center. If you understand the job of the transformer, as the soul due to its strength receives more energy from the U .. as it goes through the brain, but in fact reaches the soul at a strength much higher then the Physicality of the brain, very much like the light that was seen in the eye of the astronauts as we explained before, then these transfers of energy to be filtered, sometimes part of the transformer brings the E into operation n respect to Physicality in a

way it filters a little bit more or less, and then in the p life in the dimension of the E from Physicality, which every cell of the body carries, be it arm, heart, lung, etc, then the 2 have to interface and find out where, what is not needed, and what needs balancing, and in that process of the balancing, sometimes in interaction in a P dimension, we have it in the form of cancers, we said cancers are E but in fact the seed has been created from the interaction of the pure energy which comes from the soul, unconditioned and untainted with the E of the P dimension of the ?? soul or cell of the body and which interacts at the point of the E, and we see different cancers accordingly. (1:08). In the same position (1:16).
(1:20). Those who suffer from Alzheimer's

(1:30). In the medical teaching we have already taught,

... Parkinson and Dementia, (1:36). the daughter was in medicine, I think she must be listening, in those days I created Cups ?? from the surroundings, and we went walking with this man for the first time on the street outside the house and it was recorded, she says it's the first time he has been walking in 15 years, and he started talking and doing things. This came about through the process of creating all the materials that you use (need) for the development of the brain or replacement of the cells that were destroyed. A few weeks before he was paralyzed in a wheelchair, they had to put him in chair and car. The wife usually went through the front door to the neighbor, but for some reason she went through the back this time and saw him getting up and walking to get the things he wanted. (1:38). And she knocks on the window and says what are you doing, I left you paralyzed but when I leave you walk? She called the daughter who called me, do you know what has happened? Of course, he has become a sucker and wants to take attention. From that time we refused to accept him as someone who can't walk. He did this a few times. Later we saw him riding his bike 2 to 3 km. What I explained to the wife is that he was used to abusing the soul and now he has learned to do it himself (feed his own soul). This is the beauty of the T when you give a gift of life let them see that they have done it themselves and not you, otherwise you become another prophet. These people who we see with these kind of behaviors, we call the detoxification of the soul of the man. They don't feel good because not feeling good means now I know to do it myself. I don't need to become a soul sucker. This is the habit of the man, we need to extend everything that always in the back of our mind is the elevation of the soul in the dimension of both physicality and the brain or what we call the E and the then the soul. Maybe now you understand where your toxicity comes from, it is you who would like to carry on with the habits of the past. and somewhere in between the E needs filtering. (1:40). You do the work of the kidney cleaning up the Physicality of what is not needed, you have to also clean up the soul 12

(1:44). Giovanni says the MRI shows that the brain of Naomi has completely changed and the doctors said it was impossible. (1:46). they start to listen to your teachings because it's impossible. She start to open the jaw and can stand up alone, and everyday she is improving. There is a problem with her taking food because they weren't feeding her and not exercising her jaw because they had her in a place for those who will die and not recover. (1:49). She understands now when you talk to her. She can show her thumbs

when she is happy. Thank you again Mr. Keshe for all your instructions on how to change, she has grown literally a new brain it shows it on the MRI. (1:52). Giovanni runs the KF factory in Italy. Q: What about the toxicity caused by vaccinations? We have explained this before, it comes mainly through the mercury (in the injection) to the brain and that's what causes the problem. This needs a knowledgeable doctor to do it and reverse it. They have to extract the mercury from the brain cells. It is very dangerous to work with or be near to. It needs a development like what Dr. Rodrigo and the doctors in South America did. The mercury is in a minute amount but effectively (devastating) in the brain. It has to be extracted from the brain cells without introducing a new material into it, but at the same time, (1:54). ??? it doesn't matter how many new brain cells you produce, the removal of the mercury is paramount. These injections (triple vaccinations) introduces mercury directly into the blood cell and we touch the E of Physicality and the brain. There is a procedure that takes very little time but needs an expert hand. ... the doctors in South America know how to remove Fe from the tissue and Ca from the breast. It's of the same order but has to be understood fully. You don't need to touch the mercury but can work with the materials near to it using the same process, that in the spectrum part of it will touch the mercury and it will get depleted, then you'll see the change. But at the same time you have to go through the process of developing the new brain cells that have been damaged. As I said before, keep away from (the triple vaccination) and do the single ones, we see new forces coming to Northern Europe that are even trying to take the parents to prison if they don't go with the triple injection. Tell the Ministers to inject their own children and grandchildren and watch them for 3 years to see if anything happens to them. The ministers themselves are avoiding having their own children injected, these are people at the highest level. (1:56). Why then should it be for the others. This is a complication we have to handle, and at the same time I see a way it can be done, the doctors could, without opening it, put it through a Gans water that allows the mercury to be extracted from it, and then give it to the child. I keep on suggesting different ways to do it because it depends on how it suits the parents. Let them sign the cap (vial with the injection) that they'll not touch it, then put it through a process to extract the mercury from it and then give it back to the doctor to give the injection. The problem is not the injection but the level of mercury in it. The combination of the materials. I don't see why it is getting pushed so heavily, unless the Pharmaceuticals want to get the money they invested so heavily in, or inject to kill. As I said we received a message a few weeks ago that the world population can't be more then 500 million, we have to control it. I said, okay if you want to control it, then put your own life first, then you're not there to control the rest. He said, no we have to be here to control so it means Anybody from the groups that want to control the population, say okay, everything has to be by example, (1:58). you kill your own family, children, daughter and then yourself and then we follow you. This is what I said to the Illuminati's recently. .. I said, no you are the freaks, a bunch of criminals sitting in the organization of the governments. The same position is in the Iranian government, the president works under a very clear mandate, where the power of the military says that those who served and gave their families for going to fight in the war against Iraq have a say, and those who haven't they have no say. So anybody that says the population has to 500 million because there isn't enough food, we say okay, we'll start with your family. ... let them see if they can withstand the loss of their own blood, then we have found the answer. Until it doesn't hit

home they don't understand. ... we hear this a lot coming from Bill Gates people that they have to control (the population). Please put your own family on the first line. This is a very fundamental point. It is just the exercise of power. ... the mental disorder and grief in you will not talk. (2:01). The Senate opposed the Iranian peace 5 plus 1, I said to them in a meeting, with Mike Harris, you show me a senator that can oppose 5 million jobs with such a depression in the US. The following Monday the head of the Senate group resigned and was finished and we got the signature (to pass the Bill). Now we do the same. ... talk is cheap because it pays for the Pharmaceuticals to do what they want.

... as you know there is a big problem with the amount of N released by the farmers and nitrogen contamination is very big problem. We have shown that we con reduce it by 59% in a few minutes with the new development that we have done. (2:03). We go into the second phase and reduce it by 95%. The end product becomes a very good fertilizers. Once we build the center in Ghana we can take the research to detoxify the mercury in the injections further. This is the only way we can do it. Meanwhile it has become part of the structure of the brain in the atomic and nuclear level. In a way it's very easy to decontaminate it, but hard to remove it. Because if it is in one position we can extract it, Dr. Rodrigo's has done it for the metals and Ca. But mercury is a very tricky game, so it has to be done before the injection or just stop using it altogether. Why they use mercury to link up the 3 injections, I can't understand. I haven't done this ?? yet. Maybe we don't have a criminal mind and that's why we don't see it. As far as the emotions go how does sexuality play in it, how come some people are gay and others are straight. Caroline is laughing. I have to answer this very carefully because ?? of life touches the soul of the man and what we see in the dimension of Physicality, is what our soul has decided to have. I have never seen anything wrong with which way the humanity decides to express itself in respect to its E and his sexuality. It's the way our soul decides, (2:06). and our P body follows, but in so many ways our soul doesn't always see the needs of the Physicality in the environment of existence, or in the process of the development in the P part, the Physicality takes a different shape then the E and this is where the conflict comes. So in fact there is nothing wrong because it is us who decides from the beginning to have a male or female outlook, the way we decide to walk or be paralyzed in the future in the space if we decide to manifest ourselves in different shape or forms. Maybe on earth we like the physicality of the woman to be in the body of a man with the behavior of a woman, then on another planet we become visa versa, because it feeds what we need in our level of E. You find very strange things if you look at the true, what you call homosexuals, they understand the female, or the female understands the male and they behave the same way. We say men are single task and women are multitask, those people are truly, what I call take pleasure in the E of a woman but in the body of a man, they can multitask exactly like women are. There is nothing wrong in how we express our E in the dimension of physicality, what counts is whether the soul is at peace and not what others perceive. (2:08). There is nothing wrong with being whatever you call it, homosexual, lesbian, straight and gay, or however you want to do it, as long as the soul of the being is at peace with itself and it can give more then it receives. What we see is that the Physicality has taken a form of what the E did not want to be in the level of the soul, so we see the E different from the manifestation of the Physicality. There is something needing slight adjusting in the transformer, what I call the brain, either behavior or preferences doesn't change the level and understanding of the E and life in the P

dimension. It's very much like what I said with what I call the beautiful people, in this essence it's the same thing but inside one body, where one wants to be physically different then the E or soul, the E received from the soul manifest itself in a different level or strength and we see complex behavior. It's natural, not everybody is A or B, you have A, A and a half, then B and there is nothing wrong with it. There is nothing wrong with homosexuality if the soul is pleased, but if it is used in a different way as we see for promotion of ?? different target, because you get more out of it now a days, then that is not the way it should be. We this a lot in the musical world, we see a huge number of, (2:10).
.. these things should not be tabooed ... (2:17). this is the problem of the humanity, sometimes you find men who are very macho and women who are very feminine, the more you are the more Physicality and E are in line. 18 18

(2:20).
(2:23). Zane (2:25). Cary asks about C stick whether it is approved. We don't approve or disapprove, we have to understand the difference. C is 12 and Cu is 60, so it's a force of 5 to 1, this is where it comes from (why to not use C stick), with the Zn and the N coated Cu we create a magnetic field from the nucleus point of view. (2:27). This is the difference, where with the C you create the atomic structure of ?? withdrawal, where in that position the process is so rapid that you produce C, which you have to support it with the O, and if you produce CO2 from the physical element of the C, then you are connected to the physical dimension of the material. It's very much like the Fe which is in a metal or P matter condition coming in touch with the Gans of the AA and produces the blood, but if you put the Gans of Fe in a different shape or form into the AA you produce a pure blood, the real hemoglobin, you still produce the same but it's not of the same strength or order, there are 2 different things, the Fe you take as a tablet is very much different then the Fe you digest from eating meat. The tablet is in a matter condition and you absorb all of it, but in the form of meat your body will only take what it needs, this is the problem with the food and one of the reasons that when you take your Mg, Zn and Cu, you take it with Co2 and ZnO2. (2:29). because it creates a condition of entrapping it or delivering it in an environment of the body, and the body only takes what it needs, but when you take a Mg tablet all of it goes in (?? body and blood), because it is stronger and it therefore enforces itself. When you take tablet of Zn, Ca, Mg, and the rest, and in CO2 it's in the environment of the CO2 (Gans) it is a totally different process. Now you strip it as a molecular Gans ?? where the others are different. The same thing with the CO2 (Carbon) sticks, you have a huge massive force sitting as a Cu, 5 times more, and you literally strip it out, like taking the clothes off yourself, or you are standing in a huge wind tunnel and getting everything striped off you very fast. That's all it is, but the essence of the C you create in a Cu plate is a Gans state M field and totally different structured Pl, whereas with the C stick you still create the CO2 and it's very fast, but it is not recommended to use (this method) for drinking the LP of CO2, unless your body needs it. It is a big difference, a Rolls Royce and Ford are still cars but it depends which one you want to drive. (2:31). Some said the C stick is a N material, burnt bamboos sticks and very pure??? There is nothing wrong with them they are both CO2 but what do you expect to operate on there? That's the difference. You'll find out that when you work with a Gans Pl of Co2 you have the natural effect, with the CO2 made from the C stick you

have a different dimension strength of the Pl. Do you think your body creates that kind of condition? I don't think so. How about using N Cu wire instead of a plate. (2:33). You already have access to pure C which has been converted, the ashes from wood. If you make the Gans of the ashes of wood, because the wood has already gone through the process, as the same as the C stick. ... the South Americans years ago used to burn wood for heating then when they threw out the ashes they found out they get very good results in growing food, in places that it never grew before, then they started burning the wood to get the ashes so they could cultivate crops. you see there land which is totally black. For centuries they burnt wood to create ashes to create N material to absorb energy that the vegetation could grow on. This is done by the Israelis after the 1960's war, when they took over the Sinai desert they came up with a fantastic system, they covered the desert with tarmac and brought new soil on top of the tarmac, (2:35). The big oranges you see from Israel come from the desert, they isolated the land and put a lot of things on it. We try this now in Africa to change a desert into a food center, by (using) Gans material. This is what I suggested to the Chinese government, as you know the central desert is heavily moving towards Beijing, and they tried everything. The simplest thing to do is to water the Gans and put seeds on it, it will grow and solidify the desert and it cost nothing. What you are talking about is the same thing, creating a Gans or the environment of a Gans. the desert will over take Beijing in the next 50 to 100 years, most probably. But by changing the environment, you create a condition in the sand so the trees and plants can root and that will stop the movement of the desert. There is no other solution and it costs literally nothing for the Chinese government. You say you are in Mexico in a remote village, the ashes are your best Gans process because they are already converted to a N material, then you have to find a way to convert it, putting the (different) salt ratios and connecting it with ?? electrical discharge and you'll see the Gans' will be produced in the middle. If you understand you don't need to do anything. (2:37). If you comprehend the T in its truer sense you can always adapt it to what you need. A lot of people just copy, but if you comprehend it you can change it. The central bar of the batteries are fantastic for what is needed. I always said the gift the Europeans gave the Africans was a pure 99% copper sheet in the batteries that they couldn't dispose of in Europe and they thought they'd dump them in Africa. It is now the best resources for Africa, to open the batteries and take the pure Cu sheets out, and use them to feed the nation. We have to find a solution with what is on the table. Caroline and I used to go around Belgium and buy the old batteries for 1 euro each, they thought we were idiots, but they didn't know that I can make a 1,000 euro system out of it. We used to wash and clean them, even Arman can tell you, we did this in the Insano, in these kind of conditions you have everything. All the batteries around have Zn and C stick in the middle. (2:39). It lost its energy in the P dimension but if you understand the power of the Gans and what it can do, the center pin the pure graphite in the center, you wash it and the Zn casing, then N coat the Zn and you have your food. 20
(2:50).
(2:58). Question, if there are 50 tons of gold on this planet in relation to the sun, and there can't be anymore or less, then it we go to another planet the gold will disappear after some time, and the gold that was taken from this planet will replenish itself from the fields, am I right? Your assumption is 100% wrong. The planet absorbs and converts energy from the environment of its solar system and it has no limitation in what it

absorbs. It absorbs according to the strength of its central fields MG fields. So if we are in an environment where there are such Gans M fields available it will convert it to gold. (3:00). You can take as much as you like. But if we are in a position in the environment where a given specific MG field is available that converts in to gold then it will convert itself back to gold. It's the same as you say that the energy of O on this planet is constant, but it's not, because the interaction between the fields of the earth and the sun continuously produce H and O and everything else, where do they go, it the breathing system in the process of life in the fields of this planet we convert it to another field strength which is needed by other planets or structures in the U. If you think of it the amount of energy produced H, N, by the interaction of the fields of the earth and the sun we should be continuously blowing up with a new size atmosphere, but we don't, because there is a limitation of what we convert, what we use or don't use we release it back into the atmosphere back into the planet's solar system so that the others can use. So if we pass a position where the fields are available then at that point we convert all the material, it will be raining gold, which in reality it does, if you could measure the nano structure of a given strength of a field of the planet that is equal to the gold you'll find out that you'll be collecting gold. This is the reason why the oceans are holding more gold then the solid part of the planet, because it's dynamic it continually creates diverse field strengths in which some of it is gold, it get attracted from the environment of the solar system. In the future man will understand that we even create gold from the structure of the galaxies. (3:02). We are not educated well enough to understand. With the knowledge we are gaining man will be able to tell you that this gold is from the conversion of planet internally, and this gold has come in from the space of the solar system and that gold in from the Pl of the galaxy or the solar system, because when you transfer the time doesn't exist. My concern was that with the new T we would produce too much. No, what we don't need we release, it finds its balance. (3:04). I was concerned that when a thing is taken and not given that it will go back to its original place. When you live within a structure like the planet in a way you have been given a freedom of the rights as the others use you, if you look at it, you think you consume everything, but you have to understand that the body is a converter, so you convert the energy of existence of the others to feed but you only look to what you put in your own mouth, but in that process of conversion it's not just that you create heat, but you create huge amount of heat which other elements may be visible or invisible for man's need for existence. We are all conversion systems at different strengths and you always find that other things exist because of the conversions we do with our bodies. It's not all one way traffic, if you take o much energy and it all stays in would become a balloon, by the time you are 50 you'd be the size of a nation, but we don't because we give energy back, we are all part of the conversion, (3:06). process in one shape or another be it a brick or the body of a man or a bird it is all the same, and there is always a taker for what is given freely. In the garden you have all the birds but each one eats certain seeds and certain parts of a plant so that there is enough for the others. At the same time the body of the man is like the body of the earth, so you can't diminish it, it takes and gives energy, and when it gives it gives the freedom of the right path to use, it depends how much we need that we take, and at that point it is the same. When you see a tree growing it is not that you watered it, it's the energy that is freely given by the earth, or the entity that it allows it to take what it needs at that point. It's the receiver who decides what he wants to

receive and not the giver. I always say to Caroline I give everything, my life, my love, it depends on who wants to take what from it, and then they elevate to that level. (3:08). Jelub focused on Rick and got promoted. You have learned the language of the soul. Today we learned how to make high Gans, are we also making high level AA? Yes. Are we using salt with it to make 9the Gans)? It depends on what kind of E and Physicality you want to make because each (salt) carries a different E level. Are there any talks with Arabic nations with this T? You don't know what happened last week, I wrote Mohammed what they are doing in the background. .. At the time of Moses when any male child was killed and somehow he ended up in the basket and was brought up by the Pharaoh, .. then he became a king. (3:10). ?? nurtured by the Belgium kings to end the monarchy, but they don't see it. The same has happened, I was brought up in the culture and understanding of Islam, Christianity, and Judaism, this way by knowing they understand not the weakness but the points of mistakes and we can correct it. So for you what we do in the Islamic world is very simple, as the term has finished, the Ayatollah said once, we don't know what to do with this guy. I think now they know they could have done a lot but they didn't do because there is a time and a term. We don't look at them as Islamic, Jewish or Christian state, we look at it as One Nation, so as we see that every child has different behaviors and it's for us to understand it and give it enough that itself comes back to the father. That is the whole structure, they can kick and shout but they can't change the course. A group in Iran asks to collaborate with KF on free energy. (3:12).
guy asks about using his body as the 4th reactor.
(3:18). he was going to use ZnO2 in the center reactor ... advised not to it will drain your soul ...
(3:20). The Dutch are making Gans of narcotic mushrooms and putting in dynamic reactors and are making whole districts high.
(3:22). As more Dutch are producing these reactors we see changes in the Dutch mentality and freedom to use the mushrooms has created a new dimension, because the field transfer is very high. It has become a (problem). Please do not make Gans' of mushrooms, cocaine, or other drugs. You are making your neighbors high and they don't want to be in that state. Please refrain from using these (drugs) just because you have the knowledge, or speak to the neighbors and see if everybody wants to be high 24 hours a day 365 a year, because these systems go beyond the dimension of the house. But if you understood then it is the end of drug trafficking, one shot gives you everything for years and you don't need to buy. (3:24). And we get rid of the drug dealers who are the biggest menace to mankind.

(3:31).
(3:34).
(3:36). Even one particle of Gans carries the whole information.
.. a test done in Ghana with Gans, by diluting the Gans water the strength and ability to purify the water diminishes, however if a particle of Gans is in the dilution then the strength doesn't diminish. ... it's important to use glass container for Gans.
(3:39). You said the soul is pea size in the center of the brain, and how to train children, and how to go deeper and practice with our emotional center. if you're trying to go through the P part (to the soul) it is very difficult because of the food, but you'll still

achieve it, because the plants and food we eat does that. **The early part of today's teaching, through the operation of the heart and lung, you decide or dictate what can be received by what level through the soul of the man, or through the E, that it feeds through the Physicality part of the brain. So you can go the old way to try and find it, or understand the further understanding of the knowledge of the feeding of the soul and absorb directly from the environment of the whole body of the man the energy that is needed and then feed back through the soul to the dimension of the Physicality, then you have done your job, done the whole thing.** (3:42). The whole process from now on is how to feed the soul of the man, now that we know that the soul is within the structure of the brain and that it feeds at the level which is the satisfaction of the existence in the physical dimension, so we feed the soul so that through the soul we feed the Physicality, and those who come to understand this don't need to eat anything. Those who go that path understand that the Physicality has a connection with the operation of the circulation of the energy with the dimension of existence, which is the blood, with the operation of the system that circulates it, plus the condition of the confirmation of the environment in which you exist which is the air, in bringing the 2 into balance you find peace within the soul, and then it becomes detachment from Physicality. (this is what the Chinese Medicine calls the Qi and Blood) ... What I just said is the key to existence in the U, and not many people understand it. It's the maturity of the soul and this is the key to be able to exist in any dimension in the U, because as you feed the soul according to the environment in which you are breathing, in conjunction with what the Physicality of the environment has given you, gives you the extension of the what soul needs to absorb that it can raise (itself) to confirm its existence. Blessed are those who understand. Because that is the secret of the creation in how you manifest yourself in the physical dimension, but from now on instead of using the Physicality, because I said thou shall not steal, which means to kill a plant or an animal to feed itself, man taps the universal energy through his soul that through the soul the way it gives you E that decides the feature of the man, now the same soul releases energy at that level that feeds the Physicality. This is how you survive in the space for millions of years. (3:44). Now find your soul, nourish, feed it and you'll feed the man and the rest, then you can expand the strength of the soul beyond yourself to the others then in that way your E becomes theirs, and these people are the captains of the SS of the future have that understanding and it's a gift if you receive it. Or first to understand it and then to receive it. As I said, we have to start teaching about the soul in the schools then the Physicality will follow, at the moment we are too physical only learn A,B and C. .. the Earth Council has finished their first communication about what needs to be done for mankind. end

175th Knowledge Seekers Workshop June 8, 2017

(Using Potassium in Nana coating, Adding ZnO2 to waters and ocean, Elevates DL's soul so that he foolishly walked into court and registered himself, What Mozhen means and his brother, De Vinci made killing machines, Sperm and Egg are same as Core reactors, Deuterium is backbone of space program, why children twitch in sleep like epileptic,)

(:09). (:12). It took me over 20 years to work out (the Gans) what you (take for granted). It takes very small amounts of K to get a different material, minute amount of K

carries K40 which is a radioactive material and that gives a different condition in the process of creation of N layers, it's exactly as what we use as vitamin B12 or Folic acid, which creates a rapid development of layers. When you add a little K in the caustic your N layers get an extra energy, so lets say there is 1 micron gap between each layer, now because you added the K which has small amounts of radioactive K40, now it's 1.1 extra in the gap, its bigger, the storage and performance has increased. We have to learn these things by experiments. If you're looking for a superconductive material for the transmission of materials you need to use (:14). 20 to 30% K in the salt you use (in the caustic) the space gap in the N layer instead of being 40,000 will be 60,000. 18

(:27).
(:35).
.. we need more ZnO2 in the waters because man is ready to elevate his E. They don't understand they say we are poisoning the waters. (:40). But we are adding to the soul of the Man, because it's the purity of the water that adds to his soul, because we add on top of it. Do not be afraid of criticism it's what allows one to understand about what is going wrong and what needs to be corrected, and if it is correct then you have to explain to yourself what I did is correct. When you gets insults or whatever it means for you to judge yourself, and if you are convinced and not by prejudice, that whatever you are doing, your target, is of benefit then by analyzing you are adding to your knowledge, because you have to analyze yes or no. We have seen in the past few weeks with the start of the KF in Accra there is a huge movement around the KF, governments are asking to be a part of it. A lot of us carry a lot of teaching purely from our heart, Rick and the others, we taught for 3 and a half years, many people came around and one man was so devoted, he carried on with the work, through Caroline (to get to me), he came here to Ghana, and that man has changed the whole structure of a nation, a native from the nation but with the intention of changing humanity and not just his nation. And then you see his love is spreading across the country. And now it's spreading across the nations of the world. How come they got into the Space Program while we are still trying to shove and push a rocket up. (:42). One day people will understand, the love which came to Ghana and not the Spaceship Institute which is built here, that just brought people here. This is exactly the way you put waters in the ocean. Go to the agricultural teaching and learn how you can elevate the soul of the plants. 35
(:55).
(:58).
(1:05).
... create peace through the transition of the Gans' of the matters. (1:10). which makes the body and effects the emotions ?? G fields based. Makes Gans' of ZnO2 and when you do give it all you have, the peace, comfort and love of the man, and that Gans will reach every nation and man and (connect) to all of reactors you are running around the world. They create bullets and we create balls of Gans, they fire their at high speed and we rotate our at high speed that we can reach. We don't kill, promote, they have to pay for their guilt, we take from the pleasure of the peace. We will publish in the next few days our entry in the court ?? documents, how they have managed to fake everything and threaten everybody and then they send the servant to the court to ask for 1 euro damage and the Judge said, Mr. DL get lost. Then they don't get it and go and publish, yes there is a case

and we have been fighting it for over a few months, and now the only witness and way to prove that the King and his son have been involved to destroy the KF, because we have submitted the evidence. Let's see what the court does. It's not that we deal, scam or fraud because, DL has received a beautiful contract with the volunteers, which have been examined by all the EU and governments and they couldn't touch it. He (DL) has written the most perfect contract for the Foundation to be able to spread the knowledge for people to not to be able to be used by those who want to damage. (1:12). Be used to be servants for the education of the Man and not be servant to those who have damaged it. And now the beauty of it is that the contract is going to help a lot of people, because now the knowledge is out, and because of the way that they have asked the KF for ransom we have asked for a King to appear. For an ordinary scientist to ask for a King to appear as a criminal. Let's see what happens. We will release our defense in full. Strange enough in doing what we do, processing the knowledge, we have found the signature of DL on documents which say that he received all the knowledge from Mr. Keshe. He (DL) claimed that he was the man behind the knowledge and we have signed documents stating he in fact, received the knowledge. And it is in the court proceedings. This is the beauty of it, he claimed to know but in reality he never understood. At the same time he had a 20 year non-disclosure agreement which he signed with the KF and me personally, which is on the ??? breech, a criminal offense, a breech of confidentiality, that he has published so much of the knowledge of the KF in his books on internet and everything else, against the agreement he signed. Because these people are the way they are. You'll be shocked when you see what they claim that they have done, they received and have signed for it, there are 3 to 4 pages of line by line what they have received. Then you'll understand that they are liars and cheaters. All the documents of the British government have been released ?? (1:14). We never published but we said that we were negotiating with the Minister of Defense of Greenland before the Belgium's cheated. 15

(1:22).
(1:33).
(1:36). "Mozhen" means love, giving unconditionally, being a brother, and the name of my brother was Mozhen. He was detached from Physicality and he loved every man in this world. When we call each other Mozhen's it means we are all brothers, we are all one, and we have one destiny, peace, sharing, loving and being one. When I lost him 8 years ago, I made "the Man" my brother, and that is what you are. Brothers don't fight, they love, care and protect, and share. We leave this planet as brothers, as one. And that is what it means. (1:38). As you know in all my writings, those who love the most have appeared in my books. I made Caroline the center of the creation, and so you see Mozhen as a brother, a peacemaker, who as a man it was more important to serve everybody else then himself. Try to understand the power of the soul and not the man, the essence of the creation then you shall not be fooled, what it means to operate within the structure of the Physicality using the soul, the only purpose of the creation is to serve another. We are here to serve and not to be served, because we know when we serve that if we are in need, you are a giver, you are served to the love of God. This is what you have to realize, what it means, ?? and what it's got to do. Go and try to understand and find parallels between the teaching and in the world, that everything (they both) are the same. (1:40). If you have a ball it's full of material, it is like when the egg and the sperm come together,

it's just 2 matter states, they ?? each other, they divide, and then when it becomes dynamic, the same as your core, you fill it up with a Cu and Zn and it is full. When the cells divide they become full, when the egg and sperm are interacting and trying to see how they can look after each other, then (as what happens) in your cores, they start rotating, when you look at the fetus in the womb of the mother it is dynamic, it rotates, (that's) what happens in your cores, you see suddenly it opens up a gap in between, it becomes the Principle, the water becomes the transition, then the matter side, the Gans' come together outside. It's the same with the womb of the mother when this happens. The entity, the content of the egg and the sperm, become dynamic and create a certain gap, what we call the Principle, and this is where the soul comes in, until that point is not created it is still in the Matter plasma condition, but due to it motion and dynamism, the same as in your core, it creates its own center, the essence, the Principle you understood in the ball rotation when the emptiness became the center and everybody gets into position, now it is the same with the soul, now that is why I tell you that the soul of the man is in the center of his brain. Now you understand why, there is no difference. (1:42). this is the knowledge of creation. Now practically and physically you understand where your soul is, then in that way understand what it is supposed to do. It is the strength of the Principle Matter in the center core ?? determines the thickness of the Transition which is the water and the layers of the Gans' outside which is the skin of the man, now you understand how simple it is, and what are we fighting for, an empty space in the center of a mass we call it the soul, which is nothing but the center of the energy of the creation of the U ... what have we been fighting for? For nothingness within the nothingness. And then a different strength of it we call it pain, pleasure, sex or whatever you want to call it. We become a slave in feeding it, but we never understood it is the ??? slave to feed us, the world of the creator which is peace. It is important for all of us to understand how we are created, as it is not a mystery we can use the knowledge of creation of the U for ourselves to become the men of peace of the U, as we know from the essence we can give and receive what we need. The soul has no ?? impulse to grab but it has an arm to give and to receive, the more it gives the more it receives. (1:44). Understand the total concept, the principle, the essence of creation, and if you don't understand it then make a system which replicates it. I have been telling you that the soul is in the center of your brain, it's so simple ... you see it. It's not somewhere else but within you because that's where it was created by you. the only thing is that in your space, the matter of the earth and of the star, the liquid of life are the universal M fields, whereas in the mothers womb it's the liquid of where the embryo is, so the mother is the creator, the same as is the Universe, and they replicate the same process. How simple it is. Now (why) do you want to go and pray to Vatican or Mohammad, these are nothing but fallacies of war and conflict. I was speaking about De Vinci to some Italians, those that know him know why he became the inventor of so many things. He had to please many leaders of different sections of the Italian structure, those in Florence and other parts, ??? he made one part to feel they were more powerful. (1:46). through weapons of killing, that is all he was. If you look at the history of De Vinci he forever created war machines to destroy the Physicality. He wanted to learn more about the internal physical structure of the man so he could find out its weakness and thereby make more efficient killing machines and get more money from his buyers. This is exactly like DL. But now you have the opposite, the tools of peace, the essence of the creation in your hands. Use it and understand its power,

and that you can do no harm, and how you do it and what condition it creates and then you become the Christ, the man of peace, to give life for the others to live. If you give from your soul you'll find that you have served most probably more then the Christ did, because you are of the same level and maybe more. Because now for the first you understand why he ??? you are all the same. When you go into space as brothers, you'll find peace, because no brother shall kill his own brother, because when you kill your brother you have killed yourself. A fool shoots himself in the foot, ??? (1:48). You have to understand what is the purpose of life. We come from the fields of Nothingness, we change in the strength, become an entity of matter and by its condition, in different strengths of liquid we become life, and through it we ?? creating nothingness from the same energy that started from the life, from the center of the star. The same thing with a star, it repeats itself ?? replication of the earth and moon, and the same water in the space of the U leads to creation of galaxies and the stars. We come from nothing but the fields dimension of the strength, and we go back to the same. ?? We are a point of transition, so what is the use of damaging another. Maybe you understand why we asked for the demise of the planet because it creates so much pain, but on the other hand our decision was right, let's teach them what they are doing wrong so that we don't need to demise the planet. Let's make man a messenger of peace because he has experienced enough war, he knows the pain of it, then he shall not allow any wars to happen anywhere in the U. I explained to Dr. Paris as a member of the Earth Council, you are the best to give to the World Leaders in the Middle East as you have been through the wars as a man of medicine and have seen the suffering as you have given through your hands and soul. (1:50). Now you have to change the ?? to the soul of the leaders of the Middle East and the rest. When you understand it is very easy, when you don't they can fool you, when you comprehend what you have and it's the tool of love and peace, man devotes his life to it. I have and my team has, every member of the KF have devoted our lives to serve humanity. Financially we suffer for it as we see its expansion but we know it is worth it and very soon the rest will change ??? haven't changed for thousands of years, because we teach the knowledge, we facilitate, be it Ella in the background, Vince, Rick, Flint our team in China and Australia, people in Europe everyone in the KF management, people in the structure, translators and transcribers, we have devoted our lives to bring the knowledge of peace. In a way we are all Messengers of Peace, but we use our existence of the matter state to spread ?? We receive a lot of donations from the soul of the KF supporters and that is what keeps us going, the time of trouble, success, sharing all shared by us. You wonder how some of us, most of us work 20 hours a day, because the energy comes from the essence of the creation which you give us. Now we understand where the energy comes from. Put some of this energy which you have, more then you give to us, give it to the World Leaders that we can change the course of humanity for peace. (1:52).

(1:55).
(2:04).
(2:06). Questions. Alzer about the soul.

(2:14).
(2:21).
(2:25).

(2:28). (2:31). Man made Coke bottle experiment to make Tritium Gans. He got some strange results. It's a combined Alkaline and acidic inside bottle after 20 days. The blue color is CuO2. Release the address of the Court in Kortrijk, Belgium. (2:40). Let them know that we are a scientific organization and not criminal nor a scam. Go with love and care to the court and let them know. We stand for peace and unity of mankind. (2:43). John from Arizona spent 20 hours last week with something? He shows his SF reactors, and they will start to sell soon. ... When we go into the space fuel. (2:46). In space reactors, Deuterium is the backbone of space T, for deep space travel. It's a balancer (between) H (1 proton & 1 beautiful electron, 0 neutrons) and Tritium (1 p, 1 e, 2 neutrons). The problem with present plasma physics and fusion physics, to play the game simply is with the single or double neutrons. The 3 are a complete system, H (alkaline), Tritium (acidic). The Tritium is acidic because the extra neutron is radiating or giving, the H is needs to get 1 neutron to become balanced. ?? when you have the change of one giving to the other you create lift. When you go from H to D you have to give (a neutron) or G, when you go to Tritium ?? Tritium in the Gans state is not radioactive, radioactivity is a matter state of T. When you work in a Pl state it is non-radioactive, there is never any radiation out of these reactors, because one always absorbs the other, and because it's dynamic it always stays the same. So with the reactors we just saw with John and Arman it's very simple, put 1 in each reactor ... you can change very quickly D to T or acidic to (alkaline) ... you have the fuel for your space T. That is if you are in the Physical dimension and you have to have a SS. (2:50). If you are working with the Mozhens and you understand D is the creation of balance energy transfer and it comes from your soul. You can just create any ?? Now the knowledge is deep enough in the KF that those of you who are in an advanced understanding of it, with this picture I have solved all your lift and communication (problems) and the rest, you don't so much Cu here, or acidic there or CH3. Create of the balance a little to give or take it gives your reactor lift and motion. Then you have 108 auxiliary, or in some of the space reactors we see massive numbers, thousands of them, in that process one stays more alkaline, then in that rotation of the boundary, where you put more energy in alkaline or acidic dictates the direction of the motion, very simple this is the fuel of the space. You can't find Cu all the time in the space, but you can find G and M field packages which imitate or have energy equal to an electron or proton, and neutron that you can confine them and ?? produce Deuterium in this universe. The basic element that is the backbone of the space in the U structure is Deuterium, it has different strength in different universes. So what is an electron to us at an energy level strength could be a proton level in another universe, but the totality of the balance of the total fields of that U has given it a specific position in the Unicose. Q: and by adding C are we able to create with it? (2:52). You have to understand the principle, I am a nuclear physicist I know exactly how to create both. I will not make anymore, I inspire for you to make. ... we teach and each one of us will have a solution. There is nothing wrong with it, you produce D in a condition somewhere else, and some of you can produce it very easily from Al, some from plastic, some from interactions from different elements. Look at the drawing, what you have is the skin of the SS, that's why the color of the SS are always silverish grey on this planet. If you look at it, it is the 3 layers of the skin of the Man which gives his Physicality. Change its strength in one way or another you give it a structure. For those of you who are interested in a physical matter state structure that you feel safe, this is your answer. But this is what

I am trying to push the Mozhens away from, to be attached to Physicality or confirmation ?? Deuterium is the backbone of the deep space, but when you go further in the understanding in the future, then you'll understand that you can do the same thing with the electron, which is amazingly, specifically, (2:54). time packed ?? then you can travel different space ?? universes, because proton and neutron are energy wise space gap, are too big and cumbersome to create energy from, because they always have to interact with each other. The electron is the absorber of the interactions otherwise they loose everything. One of the reasons we have so many ?? reactors, is because of the space gap ??? like the life we have on this planet from the interaction of the Pl of the earth and sun. Some of it goes out and becomes the space dust. The electron is there to collect the dust of a specific strength, that is why you have electrons. It is a vacuum cleaner of the interaction of the rubbing of the fields. Q: So dynamic reactors will have a whole bunch of different uses beyond the space travel? Of course, you can produce new materials. You are passing something very important, can I stop you. When you put the D in the reactors, as you see on the screen, the interaction of the fields are not just mono, there is a spectrum of them, so if you understood this is what happens in the U, the spectrum means gold, silver, N, and everything else. It's not just that you create an electron but it can be ?? of H or whatever, if you wish it as it is, it will create a message if you give it the strength of banana or whatever, then the banana appears in front of you. Because in the info of banana you put the whole E in and everything in. I am exhausted today. (2:56). Let me take this farther. In my mind we can create an artificial intelligence. Why artificial? It is real. In computers they use silicon, if we use AA, Hemoglobin we could create an artificial intelligence that we can work with. That is exactly what I was going to tell you that you need to do. But you have to understand that artificial intelligence is only accepted on this planet because the AA in the space will change. In the future space T those who have achieved the very edge of space knowledge, they create a dimension within the specific spectrum of an electron M G field, which means they can exist in any dimension. This is very important for us to understand. If you understand that in the space, intelligence has no dimension (2:58). and no Physicality. But yes you can create it, its exactly as I was going to tell you, it means you have matured enough in the work. Now if I can create one to clean my house I have it made. Keshe says that you have to ask what the others wish is. Our 3rd son has a big sense of humor, he wanted a certain picture to be in his room, it's beautiful Papa, yes, but things like this don't belong to you, it belongs to the others, he said, Papa we are the others. So it depends what we take. You can imagine what they could make with it. If you make intelligent life they ?? can make many other things from it. Q: how can we ?? with parasites especially in Africa? (3:00). The parasites have a physical dimension of life, which means they are within a structure connected with protein and Cu or another element which gives them Physicality. In the new science we the way we analyze our blood and tissue to say it is made of this or that, we also have to analyze the composition of the parasite, what his blood and his physical life are made of, and then we have to create a physical condition that his soul allows the transformation that this environment is not for you to exist. And they'll walk away. We create a condition so that they can't exist in it, the time of killing is over. We have to extend the knowledge that by understanding what the parasite is made of, we always looked to kill it, now we create a condition that he will move somewhere else, which is outside a condition that he is comfortable with so that he is not a parasite. All the things

including parasites are created out of the conditions that make it possible for them to exist. (3:02). We support Golden Age of Gans website, a lot of you are downloading your testimonials there, I thank him for his support and collaboration with the KF. Rick reads testimonial from Pakistan where they did research on chicks by feeding them Gans water CH3, CO2 and CuO2. the Control group weight was 400 gram, CO2 was 460 grams, CO2 & CH3 480 grams, CH3, CO2 and CuO2 462 grams. There was 15 to 20% weight gain after 15 days. Keshe says, that in conjunction with Italian government research into the N problem in the soil, through a certain application of the Gans' the N has reduced up to 65%, which is a huge reduction and changes a lot of things for the farmers. (3:05). We'll share this directly with the governments because it has been paid by the KF to be done. It has been done in one of the reputable laboratories in Italy and they have certified their paper. We are structuring something and these papers will become part of the blueprint. We have to open a website where simple research papers can be released. We understand that some of it will be infiltrated so as to make it look incorrect, but overall the research papers are very good and interesting. Q: I know you said we can't interfere, but can't we do it a little, it's my wish that we put screen up showing what the politicians are doing, because they are creating mayhem false stories about Libya, Iran etc.. Yes, but the thing is that people are too busy with their lives and instead of putting things up we understand it and elevate the soul of the man, this is what we have to learn. It is as simple as that. It is very simple and not wasting time ... this is wasting ... (3:08). they won't open it because they get paid by it. ... only 20% of the worlds population have access to internet. ... do it through your soul and you'll reach every man, even in the Amazon. We see a lot of new ways of teaching ... it will increase ... (3:10). Derek doesn't make accusations against the KF, he plans to become its head when he puts me in prison. That's all it is .. the ?? of ego is unlimited. Teach people when you make things give it to the government and explain to them, there's a beautiful guy in Malta who works relentlessly, he goes and explains everything to the government. This is the courts address. Take the Gans with you and the modern Cups when you go. Kortrijk is where I fell in love with my wife, you always remember good things. You have to be able to give and share in essence, they only can take what they need and no more. (3:12). There is no use pushing it because they are not ready for it. Any other questions. My head is blank I told you I am exhausted. Dr Parvis lives in Dubai and is on the Earth Council, he needs a lot of support, they need a lot to be able to bring the balance of the peace. They become the pivotal point for the man to understand the mistakes of the past. ... you might see some goods from Pl T coming to Iraq. It will take a few months but you'll see systems around all the generators which produce energy, addition of it will come through a different organization which are partners with KF. It comes through the pure love of God. (3:15). You people have suffered enough. It will touch a lot of lives in an easy way especially with the generators you have in Iraq. We have shared blueprints and will start working on it in the next few weeks. (3:18). Dr. Rodrigo from Earth Council speaks, we ask all the people connect your souls to all and become one for China, Korea, Middle East, try to send love to the ones who want to create mayhems. All of us to focus on the souls and raise the love of everybody. We of the EC are connected to all of you and send the leaders love. This is the main thought of the EC.

(3:25).

(3:28). When you start a ?? pack it absorbs a higher emotion, a sadness, different strengths, different textures we see in the MRI of the brain is the ?? filter of a given strength, at the (center) point where it comes from the soul it directly effects the whole operation from the beginning to the end. When the soul radiates, what it absorbs, it continually absorbs fields, and when it radiates it releases the fields beyond, then you have ??? a paralyzed finger, or heart attack ... so these layers of the brain, ?? absorbs most of the energy, when it is absorbed then you have ?? mesh of the ones that have given the strength, which are the emotions, then you have a Physicality at a strength where this can interact with the position of Physicality. The filter below this level, anything around here, is the filter of the E and what you see of the soul communication with the other souls. The body of man doesn't take any food from the planet earth accept the fields of it which is at the strength that it needs, which comes through it. It takes most of its energy from its environment, which is what I explained about the beating of the heart and the lung creates the motion of the pump, it pumps in and out. The heart sets the ratio of the pumping this is why we feel it beat in our Physicality, it effects our E in our brains. (3:30). Because you only see the pumping of the heart and lungs, but in fact it pumps energy from the environment in and out continuously, without it there is no interaction with the environment. And then when you look at the thickness and sizes, get those animal brain, lungs, and heart and test it and try to feel, ... each thickness shows different strengths for filtering. This is the beauty of the creation and now we understand the new dimensions in life. It is us who now have to open our eyes to the reality. The filter of the E from the soul sits here for example, ... this area is the filter of the souls which you come into contact with, then you have the filters of Physicality and E, then you have what is the Physicality in the dimension of Physical part, while the fields interacts with the soul of the others which is a higher order, then it interacts with the E which is lower, it's left with the Physical dimension ?? .... and it produces a lot of ... if you had children, even an adult it can happen to,... when your child goes to sleep, if you are sleeping next to it and giving it love and care, you feel it jerking, like shocks, you wonder what is happening, the child's brain is very active even though the Physicality is asleep it is still producing information about what he did or games played, but this info still carries on, so much info is coming to the soul to exchange the soul info with the Physicality (3:33). that it becomes like an epileptic attack, much of the energy is reduced but some of it hits the P part of the arm and leg, it has to go somewhere, but it's so much but the trigger point btn the Physicality and the soul which sits right in back of the main brain, which is a switch separating the two, to prevent traffic jam from too much communication, this switch goes on and off because so much info is coming from the soul interaction level and a little bit from the physical part, because children at a young age are extremely more in touch with their soul, they receive more energy there which then it converts into the P part 47

(3:41).
end

176th Knowledge Seekers Workshop -Blueprint for Peace in the Islamic World-
June 15, 2017
(Blueprint for peace in Islamic world, Patrick explains what happened in Belgium Court, DL collaborating with police, History of Islam, Earth Council reads letter to Moslems, How the soul is created and its power, When we discover our soul we become free from the abuse of the religions ,)

(:11). This is a Blueprint to change the course for Islamic World and the world. Dr. Parvis is on the EC and lives in Middle East and sees very directly the trouble there and that they have turned on each other, Moslem brothers have turned against each other. The 6 members of the EC are responsible for the security of this planet. They have asked for help in how to change the situation. (:13). Moslems against Moslems, Jews against Moslems, Christians against each other, the name of God has become a passage for killing.

(:18). (:20). Patrick from Belgium tells what happened at the court in Korteljk. Two police officers stopped them and asked them for their passports and photocopied them, then we saw other people going in and out and they didn't have to give passport. There was intimidation. DL took a picture of their group. Intimidation in the court by the police is a criminal offense, perjury. (:27). DL was standing with the police. We have a huge number of supporters in Belgium and they have been intimidated. Please go back on the 27th. Never before have we seen people's documents photographed to get into court. (:29). If we say it then you say we are phobic, so with this witness you can see how KF supporters are intimidated by the police in Belgium. ... the important thing for this case was that witnesses clearly saw that DL is collaborating with the police and was brought in to infiltrate the KF. Please don't be intimidated that is how they managed to kill many scientists. (:31). DL made 2 copies of the patent and took one to China, called the kashmere effect, likely Arman was there to open his hand. ... why do we call it the Blueprint for peace in Islamic World, because the world has lost track of things. (:33). The soul of the man is the ethos of the man, his work, the reality existence of the man. What we have seen in the past few weeks, how the influence of one religion on another to attack each other. But the essence of religion goes to the writing of the prophet and not the people. The KF is establishing One nation, One Race, One Planet. To create One Race we have to understand the divisions within the race 58

(:40). Has lined up one after another they call them the 12 Imams. At the moment the conflict we see in the Middle East is a war between the religion within the religion where anyone who supports the family of the prophet, the Shiahs, is vindictive by the ones who go down the historical line, but in fact they are both wrong. Who followed doesn't count, what is written and the message of the prophet counts. This is the Blueprint of Peace, we invite the Islamic World to put their pens down in who but not in what is written, I bless his name Mohammad, and this has to become the Blueprint for peace in the Islamic world. Each one divided because it suited them in one way or another. We see the same

in Christianity, it's in the writing, 72 ships would carry the ?? of Christ, so there are also 72 divisions in Christianity. We use this workshop to elevate all the ?? Moslems on this planet, to unify and become part of the reality that it is the writing in the book that counts and not in how, who, where of the divisions. The unification of the one world religion is the cornerstone of the World peace. (:42). Because when they understand that they are one and it's the book that counts and nothing else then we achieve a major goal. 13

(:51).
(:57). Sandi takes over.
(1:00). She reads letter, "A Call to All Muslims and Islamic Countries Worldwide to Unite in Peace". (1:03). Reads in Arabic ..
(1:08). She reads in English.
(1:13). Plays recording.
(1:16). Who am I that I can influence peace ....
(1:21).
(1:25).
(1:33). Reads the "Statement from the KF Core Team".
(1:37). This is an ongoing process and this is just the beginning. ... Is there anything more Mr. Keshe. No, I am handing this work over to the structure that has been created in the KF. I am retiring in every essence. I have taught enough for the maturing of the man. And now it is for the Man to choose the path. In time our work will show the change in the path. (1:39). and how we have changed the humanity in our own work. ?? we have matured in understanding about our own soul, we find out that it is very easy to reach other souls. We have a Mozhen team here that we are trying to enlighten to be able to understand the work of their own entity. I explain frequently that from the beginning time Man always thought that his real existence was somewhere out there, in the maturity of understanding he called it a soul, then calling it a soul he could(n't) see that it is within himself. As man has understood more of his Physicality, it is the job of messengers like us to explain to the rest of humanity that the soul is within himself and not somewhere out there. When the first man said the earth is round we know what they did to him. Now the message is simple, the soul of the Man is within the Man and it is so powerful that it can expand the U. From this we learn one thing, if as one soul we can reach the whole dimensions of the Physical entity (1:41). that means the soul of the Man is extremely powerful to be able to do (effect) others, to change others, to give that by giving to bring balance to himself and to the others. It has been very hard for many of us that our soul is within our structure, by (believing it to be) out we could blame it, use it, abuse it and the rest, but now with the new teaching we understand that our soul is within the center of the brain, we can place and locate it, the same as we can do with our nose or toes. One of the biggest problems for man will be how can I get in touch with it when it is already in touch with me. It is the creator of me. How can I get in touch with my creator which is me. This will be taken as harsh for a lot of people, the only thing you should understand is, because of me the soul exists within me, and I exist with the operation of my soul. Let's turn our eyes inward and look into our soul. We shall see nothing as it has no dimension, it has no Physicality and its existence confirms our existence. We exist because of it and we are created out of it. When and egg and a sperm come together, (1:43). each one carries its own soul. On mixing, on accepting each others balance field

but with slightly of a different strength, this leads to the rotation, the dynamism of the soul, and in that direction, as the 2 souls the sperm and the egg, in trying to catch up with each other, create a motion within the womb of the Mother, they absorb more and more energy from the environment of the liquid, the ocean of life of the Mother, as they absorb more due to the parameters that exist in the structure of the U they can hold onto a certain amount and then they divide. They have to divide to be able to hold onto what they are absorbing, and in that process as they are absorbing ?? they amount that has come in from the egg and the sperm, this structure of the rotation of the fields between the soul of the egg and soul of the sperm, in the dynamism of absorbing more and more achieved from the liquids of the life, which is the mothers life it leads to the division of more because let's say each sack can ?? absorb to 1 kilowatt but now they absorb 3 so they have to divide into 3, and so is the division of life at the beginning of life, then it comes to the point where these masses each carrying their own fields in the strength of the dynamism they become like a gel but all working, dynamically field changing, and then in that point, all of them in one point release all their fields of a certain strength, (1:45). which is a common denominator with ?? all of them, into the center of the whole structure, and **this is the point at which the soul of the Man is created and the entity becomes one. It is at that point where with the knowledge and information which has come from within the sperm and egg, from the historical background of the 2, then the bones, the heart and everything else starts. So the soul of the Man has come from the entity of Physicality, which itself came from the fields of the Universe itself.** The physical life of the man is the incubator of another dimension in a specific strength. Our body is a filter for a specific strength collection of fields which we call the soul of the man. We absorb energy through it and because of what it gives out we obtain and ?? physicality. If we go to the next step in the understanding that in the reduction of the strength of the essence of this creation which is the soul of the man, the brain in filtering decides the shape and size of the emotion of the physicality of the man, if man matures to understand the next step of the creation, and that is when we leave this planet, the AA is the condition of this planet, the AA on this planet in CHON. When you go into the spans of the U with higher or lower strength fields, (1:47). this becomes unattainable. We speak about detachment. What is detachment, we call it that because we are materialistic, I get rid of the metal, gold, house and god knows what and I am detached. But the true detachment comes when the man goes into space and he finds out that even his brain which is made of the AA becomes part of the universal field and doesn't exist and the only thing of the man that is left, is the soul. It is like when you sugar coat a pearl, when you put it in hot water the sugar goes and the pearl stays behind. The sugar coating is the physicality and the brain which initially created ?? the pearl itself. And now man has to understand that in opening of the deep space when we come across stronger fields which the AA body of the man is nothing but an illusion in the ?? of the fields (it dissolves). Then what we were happy to escape into and get rid of our arms and legs, we find out that the structure of the brain can't exist because the mixture of the strengths is much higher, but the soul still exists and shall survive. that is why man has to understand that if you can extend (1:49). the life beyond the physicality of the existence, what we call the total detachment from the physical structure the man comes to understand that the soul has a lot of power, now he can expand the whole U as the structure of the brain that filters doesn't exist, the existence of it is dictated by the restriction and the field forces which

surround it so the soul of the man can expand the U. It is for us to be educated and if we understand this, ?? that is part of the whole work of this morning, is that in every soul in allowing not for the brain to be the dictator of his existence, can then reach every other man's soul and in totality reach the humanity, and if one understands this one can reach every man on this planet. It is the restrictions and prejudices of ourselves in our own abilities, which restricts us from being able to the others and not the reality of the ?? existence. It is important for us to understand that the physical life is nothing but a mirage, a mirage of the imagination of the soul that would like to manifest itself with the dimension of the physicality of the environment we call the earth. If you understand and comprehend this you'll understand that detachment is from the physicality of the existence, but understanding the totality of the existence which is the soul. (1:51). the past 10 minutes of teaching has taken man millions of years to comprehend and now that the man has matured many can understand this simple ?? word. The work of the religion has been to hide the existence of the soul from the vision of the man and in doing so they have abused it. The is, do we need the religions. Or does the ?? unity of mankind and the UC become the religion of man. We have to understand the essence of the creation of the soul. In the past few minutes I have explained the mystery of existence on this planet. Now it is for the maturity of our understanding, to understand and where we stop that is each of ours limit. We can go into elaborating how the fields come together and what it is, but the essence of what has just been explained, explains everything for what man (needs). And that no one can abuse him for not knowing what the soul is, where it is positioned and how it comes into existence. We have explained the manual of the creation of the soul, the Blueprint of creation on this planet and the rest of the ?? U. The time (1:53). will come that many people will question their own existence, but there will also come the time when we understand of the position and strength of our soul. We don't need to go through the delivery of the child through the physicality, it is much easier to go through the soul of the ?? It means that I put part of my soul in and you put part of yours in, and if they agree to share and combine it will create a new soul that becomes the child of the soul. This child of the 2 souls will have ?? and he will decide in the future how to manifest itself at the point of the physical manifestation as he or she likes. And this has been one of the biggest mysteries of the man, how do we come to ?? have black hair and blue eyes, brown skin and the rest. We always blamed it on the genes and DNA, we never understood that it is our soul that would like to manifest itself in the features that he likes, as he sees himself for the energy he needs. Now you understand what it means I made Man in the image of Myself, ?? the man is the image of his soul. Maybe one understands more about the true creation. Then one should be able to get in touch with his soul and through it to give and take accordingly, not to steal, (1:55). but to be able to be there to give enough that he confirms his generosity of his existence, and to be prudent enough not to take more then what he needs. For many years many philosophers and prophets have tried to explain this simple path of existence and now from the stroke of a pen from the Messengers of the Universe it is revealed. It is for the Man to mature. It is for the Man to understand how he has come to exist. the life is nothing but the process of the accumulation of a given strength that leads to confirmation of existence in the ?? dimension. Blessed are the souls who have understood. There is no difference in the structure of the life of a man, an animal, ?? , Solar System, a galaxy or the U, it is just the strength and the amount of the content which has given it different dimensions, shapes

and colors. Once we are aware of this knowledge does the physical life need to exist the way it does now or do we need to pack up the tents and move to a new dimension ?? Physicality at this level brings many pleasures but has also caused many harms, damages and suffering and this is the time to stop. When I said to you a few weeks ago that we have ended with the religions now you understand why, because when the man comes to understand the strength and position of his soul he believes in the religion of the Universe which is the creation of the unity of life. It doesn't matter in what dimension or position ?? he is in the U. (1:58). Questions.

(2:08).
(2:14). We have to raise the soul of the Man that no one falls into the trap of the Church, Mosque, or Temple, and that he becomes part of it (totality) that he doesn't get abused. When you see a mother beating a child society takes the child away. Why don't we do that with the rest of humanity. Up to know we didn't know, but now that we know then we are responsible. The interesting point will be for most of us, how much we will decide to give from our soul, and when we have decided how much to give, that is the point that we have failed, because we have put the limitation, as the soul has no limit. The more you give the more you receive and with it the more there is to give that it gives you the pleasure that "I exist". the existence of the man should come from giving and not taking. At the moment it is in reverse, taking and holding, and that is why the humanity is down the shoot. We have to follow the path in the Book that brings all the man together as one. (2:16). and not the path of the thieves of the words of the Books, that makes them a priest and the rest. The sooner the man matures to know the soul is within him, the sooner his soul decides what to give, then man reaches the point of maturity very fast. As you become a giver the ?? umbrella of your soul passes the dimensions of your Physicality of your brain and your body. In a sense you become in touch with other souls, and then you soul what that soul is in need of, and you become good at it, that you know by physicality what ?? in one way or another you elevate the soul that it is at peace, then ?? that peace becomes your peace, this is how it is going to work and not by putting it in the bank, and in the Church of God which doesn't exist. You are looking for the ?? called the bank of god, and you want to see which priest after services goes and banks there. As I said many times, there should be 100% taxes on religious organizations, because they are just collecting ?? and all of it has to be spent on the society. This is how it will be with the KF work whatever comes from the man's soul which is the benefit of the foundation goes back to the society. This is how it should be, and should have been set out from the beginning. ??? I was in Iran during the Maha ??? (2:18). ... went home on the last day of the fasting. I saw there were table on every street and they were collecting money for those who missed their fasting or they had to break their fasting, they pay a penalty for it. So I asked where does the money go, he said nobody knows, it goes in the Mosque. Now you see how they have fooled the soul of the man. You put your body in the suffering by not having from morning to night and if one day you didn't do the suffering, then you pay for it to who, the bank of god. But that god doesn't exist, it becomes cars, vehicles, food, parties and nightclubbing for those who receive it. Because there is no accounting. I would like to see the bookkeeper of the god. Then we'll see how much man has saved in

the past thousands of year. the amount is zero. (2:20). Many Jews, Christians etc, know what they do, but it is us because of our weakness we are blind to it.

(2;22). We have finished with the teaching of Gans and N etc, because the purpose was for you to understand the soul. Now we start building these reactors to start flying, and you'll understand that the flight is within the soul. We had to go through all this to separate and end the dimension of Physicality, to the dimension of, what I call in-dimensional which has no dimension, it is the soul that decides what and where to be. 2 23

... when you feel the need of a person you shall give because you understand the correct need, (2:29). And you'll be taken to be there because your soul is aware of it. Your Physicality is just a tool. Some time ago I arrived in a city I didn't know, as you know I am a lover of Iranian food, minced meat Kabal with rice. I heard Farsi and found a place, I heard a couple wanted to get married but didn't have the money ... I heard the discussion of the love and the suffering. I went to them and said I would pay for their wedding. They said they couldn't accept and the restaurant owner said you have the problems and here is the angle to help you. So I paid and never went back to that restaurant. This is how it should be, and not in the Mosques or the ?? of the Bahai faith that they take from you and they never give, and not in the Church. Your soul will bring you to the point (2:33). where you have to give, if you believe in it you live by it. This has happened to me and Caroline many times and I am sure it has happened to you also. The closer you come to serve, then your body takes you to the place, your Physicality just walks into it, if you understand this then you understand that the Temple, Church, Mosque, and Synagogue is beneath you in the church of your body within the structure of your soul. When Man understands this then no one can abuse you in space, because you know that everything is within you and you have the strength to overcome it. It is our responsibility now that we have found the strength of our soul to understand that this is the responsibility of our Physicality to look after that soul as long as the soul is a gift to our existence. The death is not the end, it is the beginning of the non-dimensional existence for what knowledge we have nurtured. The body of Man is the incubator for his soul and no more. the womb of the mother was the incubator for Physicality to create it and in maturing it the Physicality of the body has to let go of the soul as ??? to exist in all dimensions of the creation. (2:35). Our P body is a transition time for the creation of the soul, the maturity of it and for the understanding of the totality of the soul. The reason we get educated in different ways is so that when we go into the spans of the U we'll find out that we can't be abused anymore, as we have learned ourselves that the temple of god is within God and within us. Any other questions. Take the peace message back to the Islamic world and the others, and the message of the EC and UC and core team and you'll find out, that you'll have the effect of it for the man to read, and it will reach because it is done from the sincerity of the soul to the souls of men. I can't ask you to give to the physical life of the ?? Saudi Arabia, ?? (2:37). ??? the king and the rest because of the injustice to humanity. They have to understand themselves that what is being done is unjust ?? and what they have done to ... We opened the hand literally of the Vatican trying to create an

uprising in Communist nations, communists against communists. And the forces of ISIS was supposed to be used to do the mayhem. Now the Vatican has supported the others, the same people are moved into the Middle East to create mayhem in Iran and Islamic world, Qatar, and the others. The guns were paid for years ago and now have to be used. Now you see how suddenly this thing has popped out in , again the same name, group, people. If we managed to stop a war in China and Korea earlier now we can do the same here. We become a force of peace and our wish is our command. I have advised the Iranian government to call the Saudi and Persian Gulf leaders for a lunch, and not a peace talk, and shower them with love and care the way we do in Iranian hospitality ... (2:39). This sudden thing has come because the Vatican paid for the guns to be used in China and now they need to use them in Middle East for the budget to be met. My dearest wish is that the faster the stones of Vatican return to the Coliseum the faster Man will find true peace. 35

(2:42). It is time to put the weapons down and use the soul to find peace. The times have not changed, it is the work that we have to understand. (2:44). Q: when we activate the SS within us and experience the 4th dimension , deep within the physicality and we enter a wormhole which takes us to that reality, do we ... MG fields of the destination. (audio disrupted). (2:49). Repeats question .. there is no choice from the experiencer of where the destination is so, is is like a Pl SS that creates the MG field of the destination, is that what the soul is doing. What are we calling a wormhole? You feel the movement of travel even though the physicality. Is it a field rotation that leads to this. We exist through our work and the work of our soul, ... do we exist through our operation. (2:52).
(2:55).
.. we explain things according to the understanding of the time. In the western world they have never understood the emotion like the East Asian, The Western world understands the soul in a totally different way then the cultures of the East. (2:59). Buddha could reach their understanding and emotional state.

very important ....

(3:03). We redefine the unconscious as the work of the soul using the physicality,

(3:13).
(3:19). What is the best way to create a vacuum?
(3:23).
(3:25). solar S and soul
(3:27).
(3:29).
(3:31). I have asked the world leaders not to intervene (in Middle East ?). Our souls are all one, and collectively we have the power to change. Next time we do for the Jews, they have the greatest need for elevation ...

End

177th Knowledge Seekers Workshop, June 22, 2017
(Corrections to Gans making, How to elevate the souls individually, New knowledge doesn't require critical mass for change but each must be willing, The soul comes out of energy of universe, DL plans to have Keshe jailed and take over the KF, Explains the same process as the universe creates galaxies so does the soul create offspring, Example is rain it comes from and goes back to, , MaGrav inside plasma water, How to make Gans of Hydrogen the fuel for space technology,
,Don't mix Gans in Pain Pen, In Ghana they start making Pain Pens only with Gans,)

(:11). There are some corrections to Gans making. We have not taught to use Al in the caustic, and do not use caustic in the Gans process. The procedure we lay out in the Blueprint must be followed so it doesn't become toxic. If it is not on the blueprint do not follow it. (:14). (:16).
(:24).
(:33).
(:44). ... How do we elevate souls individually. (:46). This is partly what we do with the Mozhen training, they have been trying to reach. To elevate the soul is very easy, it is to give at the strength which can be received. The common denominator on this planet is the AA, so our wishes are received by someone, somewhere, somehow. It is the targeting of it to where it should be. How do we do this, give to the people who will change and understand. It is one of the easiest things to do, take a picture of who you want to elevate the soul of, you'll reach because you have the image which is like someone giving you a telephone number. This is the beauty of the present time, of what we understand, you are given a telephone number, you dial and it reaches. Now you have a face and that matches exactly with the soul, if they want to do it ??? elevate their souls they'll receive it. Many world leaders need it as do many people. We see the game of politic, (:48). and that game has to be a peace politic. So it is for you to do, we already have those who incite peace on the front and pay for wars on the back. 15

(:51). Albert Pike told of world war III back in 1870's. Q: We need to reach a critical mass for the change to take place. That was true back when we only knew about the matter state, but now that the man knows about the state of the soul there is no critical mass. One man can change but it has to be agreed by the others, one soul can bring the change. Rick says that is a good point it may only take even 1% to change. That's why I am asking the KF supporters because we have enough amongst ourselves to change. This court case in Belgium is set to put me in prison for 25 to 30 years on the fake charges and then destroy the KF that the peace movement dies. This is the whole object, the fake setting up and we have seen the instrument behind it, we saw DL orchestrate the police, judge and lawyer. We have seen these people, for years they blocked the peace from moving, now we have moved. Belgium will not touch me, because it is the wish of the man to bring peace. Because we have seen the dirt that these people create, (:54). fake documents, allegations, and they have done this all their lives. Everyone could see DL orchestrating the police arm and arm. People said that we were imagining this, and now we have seen it in the court how he was with the police and the rest of it. These people

are used to abuse and they need to have their souls raised up, they are the instruments of the war. 44
(1:01).
... we never understood the process of the soul or its elevation, that leads to the creation of Physicality. This is where the new science and T comes into operation. (1:05). where we see the operation of the soul. The beauty of it is that when you elevate your own soul through understanding and correct use and application of the (), what is free energy, **because your soul came from the energy came from the energy of the U, from the energy of the solar system and planet. You were not born out of nowhere and suddenly became a being with a soul. ?? our soul is the interaction of the fields of the U, it carries its beauty. It is us who have ignored this to ourselve**s. We have chosen this path because we can bring everybody else ?? our own shortcoming. It is time for the man to elevate his own soul, then we find peace, and motion that we can do (whatever we need). I tell you something Mr. DL, you never made a single drop of Gans, of ZnO2. You are a very good maker, you made the cubes and everything else, make yourself a CO2 and ZnO2 ...

(1:09).
... DL claims that Keshe has scammed but we have documents that DL was paid to write the contracts, if they're scams then he has to answer for it.

(1:12). DL signed a 20 years non-disclosure contract with me and the KF. DL go to the courts on Monday and say that you have written the contracts with your brother who is a lawyer. I have asked my lawyers for you to stand (in the courts), but you can't at the same time be on the other side. You wrote the agreements with the volunteers. You organized the scam as you are trying to accuse us of. You are the prime responsible party. We'll bring it in the European court of justice. I pray for your soul, stand up in the court for what you have signed as a contract, as you have given to the people to sign and have personally written every word in that contract. I let your soul play with your judgment. The process of understanding as I explained last time, I'll explain more in detail. **We are created out of the rays within the center of the U. (1:14). In interaction and reduction in strength and division by the strength, in certain strength fields, in collection of the totality of expansion of the U, some energies and dynamic fields have come together over billions of years these fields lead to the creation of what we call the sun, where the plasmas gather together. The same process repeats itself again because the sun is the same as the energy center of the U.** Now the heavier and larger amount of the energy which are collected in this span of the U that we call our sun, it radiates out and does the same thing again. It radiates its fields out and in interaction with the fields of itself leads to the creation of the planets. In this process, the same process happens again, the interaction of the earth with its environment and cooling and exchange with the strength of the other things, in the environment of the space of the solar system leads to creation of man, ?? cell matter state, and that in itself, the coming together and slowing down in certain ways as we call, leads to another sun, we call the soul of the Man. This is the truth about the life and creation of the Man. If the soul of the Man can understand and absorb and be correct with his conduct he can become the strength of the fields (1:16). and carry the strength of the field of the planet which came

to ?? his creation. And if the soul can understand, with the same process can interact, be correct, can absorb ?? within itself the totality of the strength of what it needs, he shall become the sun. And then the same soul has the energy that it can absorb within the solar system, within the galaxy, and shall become the center of the U. This happens on earth, we call it the rain, it comes from and goes back to. In the solar system we call it the planetary system, we come from the rays we become the planet and we go back to the mother. The same thing happens to the galaxies, the solar systems they get absorbed back in ?? to the U. The life and process in the U is the same, it doesn't matter what exchange ?? So what is the Man fighting for? Why do we fight for something that has come from the point of creation and in the process it goes back to the creation. The soul of the Man as the energy of the earth gives the face of Man and of the earth, and that process is the same for the soul of the Man. Our soul in the reduction of strength, and in interaction of the emotions of the fields of the environment leads to manifestation of the existence of the Man. (1:18). But once it is completed does it need the face or can it become free from it, what we call the soul to be free and detached from its existence. Our soul is part of the process of the creation. In the future the key to one question shall be the answer ... as we saw that the sun became the earth, and the earth man's soul, what will be the destiny of the soul of man, now becomes free at the point of departure from Physicality. Will it become the sun for the creation of another life, many lives, or a collection of lives, this shall be and is how it happens. When you create a soul which is not correct, which acts with misconduct and by itself cannot give, you lead to the creation of the next cycle of creation which has started the wrong way, the wrong strength. This is one thing the man has never understood you become the creator of another universe, another cycle, and this is what you have to judge with the ?? structure of the soul of man. What would I like that cycle to be. In the Physical life we create children, in the dimension of life in the soul of man, what that man, soul will create, if man has thought up to now that, when I die that's it, my point is finished, (1:20). that is as much fallacy as when the sun is destroyed in any shape or form there shall be nothing left, but we know that the parts of the sun become part of the galaxy and part of new life, so it shall be with the soul of the Man. The judgment of the man has to be according to what he sees about the future his soul can conduct to be. The day of judgment is for the man and not in front of the Creator. What my soul judges to be and what it shall create. Man has never understood and won't understand until he can sort out this dilemma within himself. The Reality is very, very real and that is as we see the energy of the galaxy becomes the sun, whose energy has become the earth, whose energy has become the soul of Man, and so shall be the energy of the soul ?? itself become another cycle of life. How can you change when you don't understand. How can you change the process of understanding if you do not understand the process of creation. Do we need to extend the understanding of the Man that what is the future, that it brings. We can't forget about our children and what kind of education they get, what they'll wear and how happy they'll be, (1:22). where they'll sleep. Now the man has be to careful and consider what life shall my soul create because those are the children of your soul. As we see the rays of the sun have become a planet and there are 7 billion children of it and which is growing unlimited. So the soul of the man will go through the same process. How many billions and subdivisions of matter state of the physicality of man your soul shall create. Will it be the soul of wars and conflict and forever killing or will it be like the soul of the solar system which is peaceful. This is the

truth and reality of the soul of the man. First of all we never understood that the soul of man is within the structure of the man, and now that we understand that on departure from physicality as a man, the same process will carry on as it does with the stars and planets, and the soul becomes another energy source of a higher order which itself leads to the creation, it becomes a star, a new center of a new cycle of creation. This is what the human race has to understand the cycle actually starts on the point of death and doesn't finish at the point of death. In so many ways if one understands, specks of dust came together to make the solar system, so has the specks of the atoms come to be the creator of man, (1:24). and the essence of creation on the specks of dust of the solar system has lead to the creation of the man, so shall be the fields from the soul of man lead to the creation of another cycle of life. What kind of life would man like his soul to create. This is the day of judgment. Up to today you were not aware of it, but now you have no choice but to understand. From today you are aware of it and responsible to it. Your conduct has to be to elevate your soul so that what you become the creator of, stands correct in the conduct of its ?? We don't tell fairytales this is the truth, as you see the process doesn't stop with one sun, the cycle carries on. It is very interesting how humanity will handle the fact that now it knows the truth about creation. It will take decades for man to understand, then those who are the tools of war will have nothing, they'll become the dust of the solar system until the day they learn more. As they can not create a new cycle through their own soul. This is the elevation of the soul of the Man, to be part of the creation of the beautiful life for the next cycle. (1:26). When you don't have it you have to become (just) another cell in of the body a bigger structure, where you are just there (1 of billions), whereas you could have been the soul of the Man. They say (tell me) do not create fear. I give you the point of love of the creation. If you cared about your children that they should have the best, your true children will come out of your soul in the coming time. How would you like to achieve, when you are in comfort with yourself (while at the same time ?) the cause of so much mayhem. This is the truth and it will take man a long time to understand. Now that we understand that the soul is the operator and creation of the future, ??? extend the life . Whatever is gathered by the soul, at the end becomes its point of reference of its own creation of its own dimension. But the strangest thing is, what he creates from his soul shall become the creator of the other souls. This is the beauty about the creation, and if one understands it, understands that there is no limitation. Any Questions? (1:28). If a soul becomes elevated doesn't also have to have the necessary knowledge that it doesn't get manipulated on this planet? ??? I think ?? feeding was the interaction of the fields from the soul to the Physicality. What do you think the knowledge is? It's the same**. Knowledge has a strength and understanding, it means that I have a strength that I can comprehend my environment**. The same as with the emotion, I can feel my environment cold or warm. Knowledge has a strength limit and what one can understand. Understanding this it is easy to elevate ones soul. I explained something very crucial to the Mozhens today, if they understand they can extend their knowledge of their souls beyond the present knowledge understanding of man. I said very simply, I have been there when the planet needed to rescued or saved. (1:30). And it is done because the soul of the planet is peaceful. Not that the planet had to saved. This is the difference, when the soul of the man is at peace, the time of the trouble when it comes to it will be saved but ?? those who respect peace they come to it, not being ?? called for. Many times we have spoken about the Second Sun and what is to happen, it's a natural

process we are entering in the higher field strength of the galaxy and the elements will come together, our present scientists they call it a fusion, I call it inter-atomic. When the 2 Suns come together they'll create a mayhem on the planet. The responsibility on the UC and EC is not only the Man but also the content of this planet which has a soul, ?? it means it has converted itself that it has a feeling and knowledge about its environment. Many people ask how do we save, if there comes a meteorite as we had with the dinosaurs, how will we survive it? Now you have the key, if you make a peaceful man from the soul of this planet, the Man himself will move the planet, the savior of the man will be the man himself, (1:32). and those who care for the existence of a peaceful planet. If you want to be saved choose the path of peace through the knowledge which you have been given. It is that simple. The simplicity of it is its problem. Any other questions. Paul from Togo says I would like you to give everybody 1 tool to elevate each of the countries. Our government in Togo requested France for some military material but they refused. I would like everyone to help us create the conditions, (1:34). for peace in Togo. ... we need more peace inside the soul of everyone. First point is to enlighten everyone in the world about peace and secondly and solve the conflicts in the world. First to maintain peace in Togo and to stop giving war material to Africa and the world. Maybe we can add something to what you requested, my wish of for peace in Africa. The KF will announce in coming weeks the opening of more the 10 to 20 KF manufacturing services across Africa. (1:36). We have secured positions last night to be able to announce it. It was announced last night to the UC. We develop, deliver and encourage the African nations through the new T to bring T instead of tools of war. It will be called the KF global operation will be based in Ghana. We have brought in, accepted and merged with organizations will allow KF manufacturing to rapidly spread across Africa within the next 12 months. The skills and investments have been added. This is the way we set to change and allow it to come in. We become a power in knowledge that we bring peace across Africa through pan African KF. We worked very hard in the last 6 months to set up KF products with certification and we have achieved it. In the next few weeks KF will move in massive production facilities which then allows us to start manufacturing across pan African nations. We have seen the facilities to bring peace and have gained enough confidence, (1:38). that we move out of Ghana Atomic division into an independent division, and hopefully be given a Pl division on its own and become part of Ghana and pan African. We have requested for a commission to be appointed and it will be done, because the new T needs its own operation. What we announce today is what Paul has been doing, he has been making Power Units, MaGrav materials for the government to test, he delivered 2 last week and 2 before. He works closely with the Military so that they can see the change, for that reason we will invest in Togo to develop factories very rapidly, which can support the nation. We will not put cross references but we'll extend the production to Togo and beyond. ?? an office will opened for manufacturing in the coming weeks. The same in Nigeria and the new collaboration in South Africa, and we'll extend to 25 nations in the next 6 months. This has been a lot of hard work and we have attracted a management team and distribution offices and scientists. ... I welcome the new collaborators and put the hand to the others. (1:40). The move will come that no nation in Africa will need to buy arms. In the next few months we'll push for no borders across Africa. We have the technological advances to show and now with the first certification of materials by the KF, of standards by the governments.

Without the borders no need for the arms. This is how we bring peace. We are asking the governments to invest in the new T instead of buying arms. If they don't do it we'll raise the funds to do it, because it's extremely lucrative to feed their nations instead of buying arms. The new organization, KF Global will cover every aspect. The next nation after Ghana will be Liberia. (1:42). Everything has been set up and will see it in next 6 months. .. one of the conditions for the open investment is to sign the nation to peace. We have committed the KF to over 21 million euros investments in Ghana and that will be carried out, the same will be with other nations and it will come out of the KF processes, now that we have the certifications we know the potential of the work that we can achieve. This is the beauty of it. We have attracted partners that will invest. In the coming years the KF will extend to 84 nations. Sign the peace (treaty) and we'll invest 1 to 2 billion in your nation. .. our collaborators don't look for profits they have the same ethos as the KF. (1:44). If you have international management and business skills and understand the KF work in manufacturing and processing send us an email. Especially in Africa. Investing in technologies that bring peace across nations. For example, with Togo and Ghana if you both are investing in KF technology for peace why do we need the borders. Today is the first day of summer and in that process we extend our work for world peace through the factories and giving the life back to Africa. I will make every effort that no nation in Africa will invest in arms. We see problems in Liberia where 85% of the products from the farm never reaches the port because there are few roads and the shelf life of the products are only a few days because of the heat. (1:46). Paul go back to Togo and tell the general if he signs himself to peace we'll invest millions. This is the gift I can give you. Paul says he is ready to work with us. Put the paper in front of him and tell him to take it to the president and we are ready to invest. (1:48).
(1:55). Angelo made a MaGrav in a bucket of Pl water.
.. Have you connected it to the Mains? and what is the outcome? (1:59).
solar S and body

(2:05).
have to remove capacitors they can't take high current (100 kwh)

(2:07). I don't need to Gans coat the coils because I have them in LP. Yes, you see water but in reality you Gans materials carry a certain amounts if you don't filter it the way we do in the factory, you (actually) have some Gans' floating in there. Arman did a test putting pure Pl water in a ball and there was some residue of Gans in the boundary when rotated. In the factory we filter those particle out. Those particle left in are an energy supply. In the bottom bucket you can add any kind of Gans' to make it heavier, but then all the energy will sit at the bottom. If you can hang columns of Gans'. We bought a spiral glass container and the Gans stays more or less equally concentrated throughout the spiral, it has 8 to 10 turns on it and the Gans doesn't go all the way to the bottom. I expected it all to go to the bottom but it evenly distributed itself. (2:09). so you have a balanced distribution. (it doesn't follow the law of physics). This way equal energy is transferred to the coils. After I added all the Gans waters it turned a little gold color. This is the Cu, it's an atomic structure that is nano sized, but it is still in the atomic condition of the Cu, we see this quite often or it becomes green sometimes. (2:11). I only lightly coated the coils with Gans, so very little it the LP, but nothing settles to the

bottom. If you understand the process it will be more interesting. This is the way in our body that the atomic structure is held, all the ions of Zn or Cu doesn't go to our foot. In a Gans state, everything you have created is in a total Gans state, a total virtual plasmatic condition. What you see in suspended condition is a Cu in M G spacing itself, (2:13). (2:21).
(2:26). John from AZ. They have discovered how to make the Gans of H and ?? but are not sharing it because he says if your soul is ready you'll discover it. He says it wasn't until my wishes were in alignment with what I wanted to create that I was successful. When he touched it with his heart that he discovered it was right in front. Their souls will teach them. I taught you freely you can't be that mean, teach them also. I taught Armand in last few days how to make Tritium in a very easy way. (2:30). I will give some hints. If you are dealing with H atoms start with something that contains the H atoms, in a Pl state you are able to pull the H atoms away from .. in water. Why are you wasting time this way, just tell us easily. Let them fly, we give them the tool if they want to do it let them. I taught you very easily how to make it. I'll give you a starting point. How do you make Tritium. Tritium is CH3 when we put our salts in there we were able to separate the molecules. (Keshe laughs). The problem is when you make T. We don't make T but a Gans that has the property of T. T is more or less 3 neutrons in the CH3, (2:32). 3 protons, 3 electrons, and it has 3 addition neurons. If you look at CH3 and understanding at a Pl level, and going back to the first box you ever made which was a N coated Cu and Zn plate which you created a C, if you make a closed box ... Arman is rolling his eyes, the secret is out of the bag, he thought he had something extra and now you are all equal. Let me draw it. This is the fuel for the space technology. Now I'll teach you how to make a very effects Gans of Tritium, and the Nuclear Centers are going to shoot you, just be very careful. Sorry Armand. You used to use a N coated Cu here and Zn plate here, then in center you created Carbon MG field which in the saltwater you extracted CONH, (oh my Jewish blood that's where I come from), then the attachment to the O (from the air) and attaching to C and getting CO2 at the bottom. Then to get CH3 you put a container above the water and seal the entire box totally, now you start the process. What happens is this Carbon MG plasma will extract the C from CH3, (2:35). what you are left here with (in the box above the water) is a pure Tritium level H3, we call it a plasma Tritium. In the matter state you are talking about H3 (H+H+H). In the plasma state it's different, it behaves different, because in matter state you have 1 electron and 1 proton in each H. In a plasma fields this proton stays proton, the accumulation of the fields of the 3 electrons, plasmatic fields will create 2 neutrons. So now you have the property strength of Plasmatic Tritium material Gans. What is left in the box above the water is pure plasma T if you can collect it. And it is the secret to space technology fuel. In a space rod fuel you work like this, inner circle H, middle Deuterium, and out circle Tritium, or visa versa according to what you can do. The flow between the H and T if you can connect and understand how to do it, you can instantaneously become G or M. This is how you load you systems for your SS. (2:37). John says, what I did was get a MaGrav. Keshe says I was speaking to the Mozhens so you don't have this (a MaGrav) in your brain so you have to try something else. Now you have seen how to make T in a Pl level, it is not a matter level. You can play a second game in a very easy way to produce Deuterium and H. We are not talking atomic molecular, but Plasma. And then I leave this secret to John so he has something to teach. Would you like to teach us how you make Deuterium. We

change the power level when we are making CH3 to a higher voltage, and a black rather then orange color, it becomes a black color. We don't turn it up too high, just a higher level. And the black stuff at the bottom that most people have been throwing away is the Deuterium. That's very mean you have to show it to us, share the screen and show us, you are too American, can we have some secret please. Can you draw it for us. You have N coated Cu and chicken wire (Zn and Fe), normally when we make it without any power, now we add current, the minus electrode to N coated plate, and put the plus to the chicken wire, and add about 0.5 volts, and we create a black material. (2:40). The other person, Armand, says plus to N coated and minus to non N coated. And how do you make H, we use the Coke bottles and use a Carbon stick, first N coat the Coke bottle, we have a tube coming out of the Coke bottle into a bucket of saltwater, put a C rod in the saltwater itself and one in the Coke bottle that has saltwater also, and also some caustic material, I chop up little pieces of Coke bottle and put it inside the main Coke bottle, so I am pulling all of the plastic as a CH bond, (2:42). we are pulling all of the H out of the bonding with the plastic, it takes quite awhile, I poke a hole at the water level in the Coke bottle so we can get a reaction with the power. We collect 3 different materials 1 in Coke bottle, 1 in the main container around the bottle, and the third one is where the tube from the Coke bottle goes into the saltwater. They each have a different color, in the Coke bottle is a bluish tinge to it, outside the Coke bottle has a black C look to it, and where the tube goes into saltwater has a gold-ish color. Each has the property of H but each acts different. It's too complicated, I never made it that complicated. (John) It's hard to make, it took me 20 times to get it right. (2:44). One of the easiest ways is to use Al for atomic H, a slow and not rapid process, and cold caustic, and let it slowly evaporate. When the Gans is completed you don't see anything in the water and then after awhile you see black stuff at the bottom which is the Gans of Al but the gas released is atomic H. You can do it in the Pl condition if you understood what I drew on the screen, how you make CH3, you can make a condition that you create a CH bond field in that process that you create Deuterium and again you create a condition with the D with the CH3, (2:45). that you create a balance of H.

(2:53). The only way you change the structure is the composition of additional fields of the higher order, this is how you open the doors in the SS, once you create it you decide the position of the space, at that point you create a different MG field. Let me explain for you, these teachings brings things we don't want to teach, but we are there for ?? you. In a SS you never have a body, or an entrance or exit, if you use a 3 layers built in your reactors, a combination of the fields of D, T and H, you get a silver material. this leads to a solidification of matter if you want to have that, but there is a specific way to produce it, it gives you a shinny silver color, whitish sometimes, this material you cannot destroy, with man's knowledge and all the tools you have you can't touch it. The only way, because you created it out of the interaction of the fields, the only way to create a doorway is by creating a field lock, there are no doors or hinges. (2:55). you create a field ?? block, the integrity of the door stays but at that point you open up the MG field. And then that is your gateway. In the space the only way you create a door to get in and out is by changing MG fields and not by a physical door, you never created one. 28

(2:59). Can you explain what you mean by coherent? When we plug into the wall, for example with our reactors we get all the energy fields of the AC current creating havoc on the energy fields we create with the reactors. Let teach you something that should theoretically stop that. When you plug your system into the wall don't do it directly, connect it first to a MaGrav S and then to the wall. The N layer converts the energy into a Pl condition, so you'll be working in a Pl condition. When you connect directly into the wall you are interfacing Pl with the matter state. You have hundreds of MaGrav Units use one as an interface converter. Would those fields become more coherent? Yes, in a way because now it goes by demand. Do you remember in the Ambassador meeting in Rome when Arman plugged in the drill from the US 110 volts and the European drill 220 volts and they both worked and we made a lot of noise, because the system takes what it needs according to the time and energy it needs to release itself back into the system. It should be very coherent, but this is part of the T you use the MaGrav S as an adapter to the energy levels you want. (3:01). Thank you that is a big help. Don't forget my payment. I give you so much information and it's all free. Can I get paid please, some energy levels would be good enough, there is no cash in the bank, we don't need. Arman is there, he'll take care of you. (Keshe laughs). But now you understand how you make matter state with your reactors, and this is the way it works, operates. Mr. Keshe, Bret just said I give my love, and we were discussing last night in the Keshe Pl group, about the idea of things in the U out in space that might have this attractive force for each other, and the same with the rays shown in the Plasma animation they become aware of each other and somehow are attracted and then they intertwine and form that union, that fusion of Pl. So the word love comes up, do the rays feel love, the principality love that pervades the U, is that what is between the D, T, and H layers in the space craft, the coherent energy John is talking about? In a way it is the balance energy that we all share. (3:03). This is how your brain works, the strength of the balance energy dictates the space of it. You were one of the first ones to create that hollow center (in the rotating ball). Now it will ?? engage according to different amounts of Gans outside, you'll see you'll create a vein through the fields. Do you remember when you created a core, rotated it and had a hollow in the center, now if you can put the Gans' around it which we saw with the Romanian, for example, then you if you can extend it, this is how your (blood) vein is created, this is why you have that gap so it can allow blood as a superconductor to flow through it without any attachment, if you put a series of cores next to each other then it is there (you'd create a vein). (3:05). Q: When we put Gans water in plastic it looses its vibratory strength after about a half a day. We know that. This happens with patches. No, no it doesn't, let me explain, something is wrong I correct you straight away. Most of the people when they make patches they don't make a pure Gans, there are always a certain amount of Gans (particles) floating even if it looks pure. So the patches don't do, we spoke about this before. This was a trick used by someone before, he was saying this is what happens and he could sell more patches. So we stopped the rumors. Some people say it is not necessary to have a vibrating patch to heal, but what is your advice. I don't advise. (3:07). Your advice is to use Gans water in patches with tiny particles of Gans, okay? Yes, but the Gans is always. Here in Ghana when we tested it through the Board, after awhile they could see sediments at the bottom, we purified it and then came up with

a new solution for purification. He asks about Parkinson Disease, can we use the same process as for Alzheimer and MS? It is slightly different. Alzheimer's is a neural connection, whereas Parkinson is a neural connection with disturbance in the Physical structure of the brain, slightly, it's between Alzheimer's and MS. You can't sue the same but partially you can. (3:09).

(3:17).
(3:20). oxidation on this planet is halfway between the gaseous and matter state..
(3:27).
(3:29). (he draws a spiral), all the H that are here are in respect to the center of the U, another one to do with the galaxy, another with the Solar System our sun, and at the same time it has a spiral that connects itself to the center of the Pl that it is a part of, and that Zn (?) sits here in this spiral, sorry it sits here, Cu, H here, because they all have MG fields and have to position themselves from the center (? Pl center). You have to think continuously in the totality of the Pl, but we have the beauty we can explain it in the matter state that you can understand, but you have to translate the info back into Pl condition. Each point on the spiral you have another spiral? Yes, but it is one Pl attached to another Pl according to the central strength. This is the knowledge of the science of the Pl we have to accept and understand it. (3:31). Q; When is the end of Ramadan? Sunday. Happy eat. What is the difference in a Pain Pen to have the center wire in a Gans or without? In the major research we have done in (Ghana) Atomic, (3:32). when we take the Pen out and only use Gans Water we see higher by 1 point in alkalinity, when you put N coated material inside the Pen you create an attraction, its natural the Pen itself is N coated so it absorbs energy but it reduces the strength of the Pen or the N material. We have tested it that when you produce P Pens without the central pin, you have a much more effective system. ?? the N material is black so you absorb some of the material in side, you ?? the layers so you reduce the strength. We know this because now we are entering clinical research in conjunction with FDA, that all these things (Pl products) will go through research with full data independent of KF we'll supply the scientists with the materials, and they have ?? the first 2 researches of the KF. One of the first data shows us that when you put a N material inside a Pen, (3:34). the strength reduces, which is natural and normal. We are now producing huge number of Pens for Ghana, these are all liquid, we don't use pins (? wires) anymore. First of all, it's more effective and secondly it's cheaper you just have to make Gans material. Because we are all connected I wish that all the Moslems all over the world open this channel and listen. If you start to understand more about the Gans you can't play in 2 houses unless you want a specific effect, you play with Gans, or N material, or with a matter state or a Gans liquid. When you interact them and mix them you have to understand who is playing what game and what strength is absorbed. .. where is Alzar, very strange. (3:36). Lucy shows photo of Chinese Medical Unit using glass tubes and put Gans Water. It's amazing. (3:38). He's got all the tubes exactly the same length between 2 walls and patient goes in between. Klaus this is a very easy system to make. (3:42). Teaches further, if you make a chamber that you can adjust the dynamic flow by changing the Gans to fit each different disease.

(3:45).
(3:50).

(3:52). Shows a spiral bottle filled with Gans it spreads evenly. Go to the court in Belgium on Monday, tell the judge that DL is the one who wrote the contract and he is a criminal. Go to the court because we want the KF to be free of these criminals from taking it over. What happens in the court will determine what happens to the KF and where we go from there.
end.

178th Knowledge Seekers Wrkshop - Blueprint for Peace f Humanity June 29, 2017
(,)

(:11). We did the Blueprint for Peace for Islamic world and now the final push for peace for humanity. Some things have to finalized first before that can take place. A number of you turned up in the court on Monday in Belgium and it has gone in the favor of KF the way we wanted it, I will explain this in one section of today's teaching. Another section is what the UC has decided with the publication of the book " The soul of the Man", I said that when the final book, about the soul was written then man has reached the maturity, we have reached that point. (:13). The third part will be the blueprint for world peace. 18

(:19). (:21).
(:30). 40
(:40).
(:46). break in audio (:48). back up.
... For our Chinese friends we need to get convicted for 30 months in order to bring the case to a higher court, they were worried because they don't understand. (:52). ... DL wrote that Keshe didn't even attend his mother's funeral. I was in surgery in Seoul how could I. ... A man's wish is to be at his mother's funeral, not on the operating table with a bunch of criminals sent with to Korea. You are so low you have no mother and you deserve it. The funeral of my mother had to be reported to me by mobile in hospital in Seoul. Read it and you'll understand how low this animal is, I hope you burn in hell. Nothing hurt more then the shit you wrote about my dead mother and I hope you burn in hell and your children in front of you watching. (:54). This is from a man who loves and cares for his mother, now you know how much he writes is the truth. We'll come back to this case when we appeal to the highest court. This case is not going to finish. Please language translators explain to your people that this is the only way you can get criminals into court in Europe. This is organized crime and is very common. In China they execute them. It's the only way when the prosecutor stole the technology and demised the case and the police assisted. This is the mafia system in Europe and it works in Belgium. They have killed many scientists. We wait for the appeal, we expect a lot of attacks on us, stay solid and correct. This is part of the evolution that the man becomes clean. (:56). This is part of the peace, when there are no more people like this to do harm. 45 years ago when I went to England there was a dispute when they found British police to be criminal, the people said that it was impossible that British police can't be criminal. Now half of the police are dismissed or in prison for criminal activities. And now we see it in Belgium. The judge has to open the police case in Italy.

... don't forget that DL was an orphan in Congo, they came understand the King who is a child molester and brought into his organization to kill the scientists. (:58).
(1:00). We come to the second part of today's teaching. I always said that when the man is ready I will write the final book, which is the soul of the man. The UC requested the book about the soul be written, and as of last night with the meeting of the UC support it has started. This means the man has reached the pivotal point to mature. A couple of people in the background have been going through every teaching where the soul has been taught since the beginning and putting everything together to make the book ready, the difference is I have taught and as agreed by the members of the UC, (1:02). and the support councils and the title shall be chosen by man. It will be the first time when all the languages collectively write the truth about their own creation that the life of the man starts with the soul. The reality is very simple, I have trained 4 souls known as Mozhens to carry the teaching with themselves to carry the teachings across this planet. Most probably you'll never know all of them or you might know some of them. In the past 6 weeks they have been taught enough to know what the steps are and how they become the next generation of showing the man how to allow his soul to elevate and how to allow the soul to become the environment of the man in the space. The teaching of the soul as the creator of the Physicality of Man has come to its end. What ?? it's going to be called will be decided by the totality of the people by writing it, how it will be taught from which age, it depends on how it will be narrated by the people. I have said that my mission is complete when the man understands the work of his soul and we are getting to the final point. the mystery of understanding the soul (1:04). not knowing that it is in the center of the brain, it has been hidden and is the wisdom of his hidden talent. Now he knows where it is and how to use it, and knows how he can travel the spans of U without killing another man, animal or being, and where he can tap into the Universal Soul of the universe. Animal eats animal, but souls share fields that they stay comfortable and ?? lasting, and now we understand it. As I said my mission is more or less complete. I have trained 4 people who in time they will teach all of you. It is for you to understand that they have no higher position then you, but they have the knowledge to share with you. The soul is created out of the fields of the U it is of a higher order then the Physicality and that is where the wisdom has come from and from now on this is what we expect for humanity to take action and to stay correct in the course to use the soul to elevate the humanity and with it to elevate the planet, to travel the depth of the U. We have called the Mozhens our brothers because that is what transfers the knowledge in the space. We are all brothers across this U and not just on this planet and in that process we stay firm in teaching as long as the facilities for teaching are available and as long as the man is there to learn more. (1:06).

... We come to the third part the blueprint for peace. (1:10).

(1:23). The 2nd of August is my birthday. Get all the world leaders to sign the world peace treaty at Mt. Carmel in Haifa at the Bahai center.
no more Gans' or N materials until we get them signed to peace.

(1:26).

(1:37). (audio restored) .. I have successfully organized 3 peace (conferences), now is the time to go head hunting and get the heads of nations to commit there nations, not with free energy promises nor anything else, but purely the promise of a better future for humanity and opening of the space to man. I accept to give the invitation to his Excellency Ayatollah Khomeini, even if it means imprisonment in Iran. It is worth it. (1:39). If you talk to the way I talk to some of powerful leaders they say themselves they are fed up with buying arms when their nation is hungry. But they have to do it to keep the European and American happy that can receive a donation for their budget. I said to them, you are the most stupid people to think this way, because the money you give for the arms, you don't need any donation from Europeans and Americans for your nation. If they are spending 2 billion for arms that they are never going to use, that would feed a lot of people. They don't need to go and borrow more money. We open the KF channel on a daily basis from today. Somebody comes or doesn't, how we ask for support from other teams we report it. ... members of EC ask for a meeting and write immediately the Bahai's about the Temple. (1:41). We don't have time, it doesn't mean the end of the world but the end of the suffering for this world. When we get the world peace signed then go back to your Gans' and through it feed the hungry, make everything possible and make it a joy to be a human. We start from tomorrow on the KF website this channel will be opened everyday. I remember I was in Russia and called the Iranian ambassador I said I found the answer for ?? do I have the permission to treat the Israeli ?? , I knew the answer but I wanted to be called correctly, I didn't want to be called a traitor. Very quickly I received an answer, (1:43). ?? this is a human being ?? and you are allowed to go ahead. I offered the knowledge to Sharon's family and Israeli government through Mussed. They moved him from the hospital to his home but somewhere it get ?? stopped. So there is no hatred from Moslems against Jews, but loving, caring and understanding. He was sick and in Coma and he needed help to come back. Now humanity is in Coma and stuck in the darkness of war and it is for us to awaken the man. Time for peace. That we should not even spend a cent on something that can harm another person. Please I ask you to stop making Gans', coils, and everything else I have taught you for 35 days. until we achieve world peace, get the first world leader to sign, by going to Haifa, where all humanity goes to rest his frustration and anger and exchange the beauty which is set for peace in the ?? (1:45).
(1:53). 7 billion to 190 world leaders we want to sign you to peace. ... Today's teaching has 4 sections, now starts the forth section. (1:56). In many discussions we ask ourselves why are we here, why me, why do I exist, what is the purpose of me being here as a man. Now as a voice of the Creator I explain. I have explained this to only 2 people up to now. Now it is time for humanity to understand. Many times you have asked yourself this question, why me, what am I doing here, what is my purpose, where am I going to, what is my future. The whole of creation for man has been very simple. It has taken the Universal Community to create nursing homes where we can nourish and nurse you souls so that we can use these souls for the establishment of just and correct structures across the U. You will understand more if you are educated well in the knowledge of Pl. We have a video that every time I see it, it brings so much knowledge and I think, why doesn't the human see. In the video 2 or 3 rays come together and then they become a circle and a Pl and this has so much meaning in so many different ways. (1:58).
what has been missing

(2:03).
(2:08). I have taught enough. .. Are there any questions. Alsar got married in France, she didn't change her name. You Iranian women are to handle. ??? this Delanois and how you wished he goes to hell. (2:10). When you talk about the leaders of the past and they created so much killing and suffering for humanity, why do we want to elevate their souls instead of take them to the court of justice. ... we have no choice we have to ??? these 140 people we call the world leaders ... we got 2 choices lock them up and man stops to make arms, or come up with another suggestion. Because we have a habit we follow the leaders, this is the way the man works. What are we going to do with them, we need a structure to organize things for us, you call them presidents or whatever. It's the way that man has not learned to organize himself correctly that has lead to the creation of these people. When I was in Dubai somebody asked me if I want to see Sheik Mohammad, he wanted $500,000 for half an hour with him. I said he has to pay a million to meet me. They have put values on them. We have the same situation in Accra now, if you want to meet the president or so and so you have to pay. You have to pay us we bring you the message of peace. (2:12). At this moment we are playing a very funny game, we are elevating the souls and pushing them to sign the peace treaty and then we tell them you have to handle a lot of unemployment and to them, it won't work so they push with whatever they can to do it, but it has to happen somewhere. Who is going to be the first one and stop these things (weapons). My anger with what I call criminals like Delanois and DL is that these are organized gangs of criminals. Are all our kings and presidents organized criminals, partially they are because that is how they came to power, but also it has to be partially disarmed. I carry a lot of anger with me regarding the situation in Belgium regarding us because we could have done so much and moved so far ahead, accept that these people created so much mayhem for them. Do you know what DL gets for doing what he does to me? He gets 2 children to rape. That is all, he is a pedophile the other one gets the same. Do you think a man goes to harm science and technology if he wasn't gaining something. These people are motivated by the abuse of children. We are not talking rubbish we have seen it, the people who support these activities. The guy is in prison indefinitely. We see today the top priest in Australia has been summoned for child abuse, the closest advisor to the Pope, it is in the paper today. Then we see a priest raping a few children has got a few weeks in prison. (2:14). The abuse and what these people think they are is what they get from it. The guy who helped put me in prison for 11 days got a $500,000 apartment. These are the things that go on and we have to stop the cycle somewhere. My anger is that how much we could have achieved if there hadn't been so much interruption and damage. And why do these people damage, a few seconds with a playing with a child, their own daughter, own children and then accusing everybody else to cover it up, a few houses and keys to a few apartments. why? At least by going to the world leaders we start the process to stop the chain of creating so many orphans, and stop the chain of so much hate and resentment. If you don't have the weapons to shoot, kill and bomb would you become Israelis, Palestinian s or Christians? Because now you don't have anything to harm with. The maximum we can do is to stand in the square and shout, what else can you do. We need the world leaders to set an example and we have seen it that when you have a correct leader the rest follow. (2:16).

(2:20).
(2:23).
(2:25). ... Okay let me explain. We started making the gas cores and then when we switched how many people left because of it and came back later. Do you remember when we introduced a new knowledge, the Gans', because it was something that they couldn't imagine. Does anybody talk about the gas reactors today? No, because the gas was there to create the Gans and now we have the Gans. Now in 3 years we have matured the knowledge of the man to understand that the purpose of the Gans was to create a Free Plasma (FP) and how it is and we have seen the effects in different ways, and now we know what it is and from the knowledge and effect of it, and understanding that the egg and sperm are Gans' and it has energy in it and we rotate it, we create the soul. (2:27). Now we have entered the third phase, which has nothing to do with the Gans, we talk about the soul, but the soul came from the creation of the Gans' of the sperm and egg. So this is where the confusion is. Now man has to attach to himself goes in ?? problem, this is our problem, we haven't changed course, we have educated according to the understanding. So now we are talking about the FP which has no gas reactors, or Gans' and cores, and about a FP which is the soul of the Man. If you want us to stick it in something, then call it the brain or the body. When the reactor leaks and it disintegrates what will happen to the Pl inside it? It joins the rest of the ?? of the U, it doesn't disappear or get destroyed. The problem is that we have changed the reactor and this is what has caused all the confusion. Now the reactor is the brain and the content, the Gans of it, the fields which you call the soul. So where is the problem. Do you want to test it, expand or reduce it, get the apple moved, taste the apple by looking at it, get yourself flown into the space, now you have that capability. So what is the problem? Oh you think because we didn't much about it in the past 2 years, I prefer not to touch it because then it shows my stupidity or lack of understanding. Nobody is stupid or lacks understanding. Now we have to understand that each one of us has a reactor inside called our soul, it is us, our creation. This is the problem. (2:29). Rick says it becomes a problem of too much freedom. What is the problem? It's like when someone asked how many types of reactors are there, and you said there are as many as there are stars in the U. That was mind blowing that there could be that many, but the more I learned about the T then I realized that there can be that many. Then you can leap frog past all the physicality reactors and find the reactor in oneself. It's a higher game or view point or perspective and that is what you seem to be pursuing now, is that correct? That is all it is, and now you are educated .... do you want to stay always in class 1 or the nursery? it's a whole different ballgame. Mr. Keshe what is the effect of alcohol on the soul? (audio lost....) It was allowed in Christianity and Judaism but banned in Islam? Alcohol has to do with the Physicality and doesn't touch the soul. It is extra sugar. (2:33). We have taught the Mozhens how to create and effect the operation of their soul. How to use the structure of their bodies to expand the dimension of their souls, and the interaction of their souls with their environment. These kind of teachings will gradually come into the public. They have been taught how to allow their souls to expand beyond the dimension of their Physicality but understanding that in collaboration with the others they can create a structure, or by accounting with their own action they can create a structure. The past 6 weeks of teaching in Accra has always been that way. We said that there will be no reactors or gases and Gans', because if you look at them at the end they are only fields and the brain of the man

is such a strong field, such a center of the energy more then the sun, that he doesn't need these things. If you need Gans' to make this and that, and you sun which is the soul has the power, why do you look for a lower order when you can play with the master. From now on we try to teach, ... the ray of the sun in traveling, in interacting with the fields of the earth leads to creation of the water and whatever which we see on this planet, (2:35). If you can manage and not that you know that your soul is in the center of your brain and you can create more energy in the hand of yourself, and not a earth ?? field, interaction, you can create water in the palm of your hand, because you create energy in the palm which is ?? opposite one which is coming from the soul which is stronger, the sun is your soul and the earth is the fields in the palm of your hands. You can drink water until the cows come home. Because you don't know , it creates a problem, but its ?? This time the earth is free moving but you hold the earth in your hand in the position that you want it to be. And that is what you have to understand. You are shown the sun of life which is the sun of man, now it is us to decide where and what we want it to be and the way we want it to be. There are no nuts and bolts in the U. We have created it. We have tied ourselves to the shackles of Physicality and we have to find any excuse to be connected to it. A lot of frightened souls uncertain of the future. The future is safe and very clear. (2:37). Questions. Something has to change and fast instead of a promise for a better future which never comes. 35 years ?? is fast enough. If the crooks, charlatans and bandits like DL and rest where not there to put out all the rubbish about us this T would have been in the newspapers and everybody else would have been benefited by it and ?? There is a chance that what they wanted to do was to make more harms to harm more. Maybe this was the best way by creating all this mayhem in the past 10, 12 years, allows the men of peace to take charge, we could teach and with it carry on further what man needs. We should not be afraid, the biggest fear we should have is what are we going to do when this succeeds, not if but when it succeeds, because that is the only way to go. With peace on earth man will work 1 day a week maybe 2 if he is lucky, (2:39). he has 5 days a week on his hands and enough energy to supply himself and enough food to eat and he is so bored that he goes out to help everybody else out so that he is not bored. There will be nothing but the land of plenty and milk and honey, which comes out of man not having anything to do. Those who are adventuress will take to space and they'll come back, and those who are not they'll find another way. We are happy with what we have and get the biggest problem is what are we going to do with the future when we come to it. Many of you will fail, many of you will never come back, because of one thing, what I have seen up to now in the past 10 to 12 years of teaching, man has a habit of coming, stealing, and going and then feeling good with it, and then nobody knows, just an excuse to do what you like. Make the KF workshops of peace, not making Gans', do workshops on how we can create peace, how we see the presidents and the rest. The biggest fear of the presidents is to meet with the man, because that way he has to become a man and part of you. I wonder how many of you have the audacity to hold the hand of your president and say come on let's go sign the world peace treaty. I am sure that Rohani won't shake hands with me (2:41). I will be on the teachings everyday from now until the Second of August. We'll change the teaching. The students will have to come up with a way to bring peace. You have made enough Gans', spin the cores with Zn. Now we use the soul to bring peace. Q: Are we to stop giving Gans Water to people to cure themselves? What are you curing? Give to the souls to elevate. We see a lot of excuses not to do. Put all this

energy in bringing peace, find a way that we can get our world leaders to sign for it. I have seen the beauty of it and what it does when you put a country away from arms. (2:43). Q; When people get sick, why doesn't anybody want to die they all want to live? Because it has been put to us as the end. They should be happy to die because they'll begin the life. Yeah but the thing is it has to be a complete life. 43
(2:50). (2:52). ... for those who are afraid of the future, what you had in this life lead to the growth of the man, this time the same process will come but with out any burden or loss or pain, because the dimension of physicality doesn't exist and the totality is much more powerful then singularity and it brings many changes, good and positive changes and your life what you stored here becomes a dimension and a size of the light that ?? create. When you look at the sky not all the stars have the same brightness. The ones who have gathered more at the time of departure, they gather much more stronger fields and become brighter stars to shine, but the point is, is it worth it, this is a cycle of life, of existence in this dimension of this U. My wish is peace and in time I will achieve it. (2:54). But this time you have to do it that it changes the grain of the man when you leave this nursery of the soul of the creation. The 179th KS Workshop will be tomorrow at 10 AM, I will not be there but you will those who are going to be teachers start to teach, you have to figure out how to bring the 190 world leaders to one place, it's smaller then a wedding. Don't go the usual way bombarding the presidents, they just block you, but rather find a way to serve the hearts of the presidents and they'll follow you. Rick shows the document. (2:56). Caroline reads document from Mr. Keshe (a summary from the last workshop describing life and how it came to be and what is prupse). We are created out of the rays of the U ....

... this is what we said many times, this is a cycle of life of existence. (3:02). that in a certain strength we call it the life of a man. If we change anything in this structure we will end up with something that is very bizarre, which is, what are we going to do with all the fields that we have brought together, what would be their function and effect, and what would their creation be, would it be to serve another being. We have prepared man with these teachings on how to enter the space. Man has tried during the last 50 years in every shape and form to get himself off this planet. In the past 200 years every way to get a few meters up, but he has to come back down because he has a material attachment to this planet, it needs conversion of one matter to another for him to gain height. With this teaching we have shown man that he has become independent of position, time and place anywhere in the U. We have given the key to the freedom of the soul and with it the freedom for man to choose his physicality at the point of the observation. This is the biggest gift we could give humanity and one day man will understand. (3:04). Freedom of the choice of the space, time, where and way and who he wants to manifest himself and **if in time he becomes the creator and decider of his own position, he will become the center of a star**. 20

free to choose were he wants to be

(3:07).
(3:13). Q:
(3:15).

(3:18). (3:20).
(3:23). You can get in touch with the UC through the Facebook. They are called Universal Council. (3:26). When I see injustices to humanity it brings me stress. From tomorrow we bring the world peace, the target or 2nd or 3rd of August this year. See if you can bring 1 world leader in to sing the peace. I hope that this time we bring the peace. We don't need arms and guns to build the roads, plant the trees, etc. I have told you that many times I have been man of peace. What Caroline has said, (3:28). we converted the tools of war, when the Eastern Block opened up, we decided to change things in Easter Europe. I used to work commerce in Communist nations and during the time of Communism they didn't have businessmen so we worked with the military. Head of Militaries did deals with us, so when the change came suddenly there were no more militaries. They had our factories which the militaries needed to feed their soldiers. I had many meetings with heads of militaries, some who are now heads of state in post communist time. I sat with people like ?? Yeltsin these were all military people who were in power but they wanted to feed their soldiers. We went into factories they said nobody wants Russian tanks anymore, what can we do. (3:30). We put together a think tank, those containers for shell we converted to carry milk (instead of explosives), we converted the wooden boxes to pianos, and the tank engine case for the piano, 30,000 buckets per truck, we created a lot of jobs. We converted tools of war to boxes of music. Cheap plastics we converted to clocks. Everything military we converted, so I know it can be done. Even the uniforms and shoes we changed. (3:32). ... they should not be afraid, we can convert and there will be plenty of jobs. And the soldiers can be sent out to train the people in whatever is needed. So we can show the world leaders that we made the change when the time comes, and we still have one of those pianos. At that time pianos were expensive things to have, now you can buy one for 299 euros. Those pianos ended up in Belgium, Germany, Holland, England, France. We shipped in truck loads and they were happy people the soldiers had jobs. So when we talk about peace we know what it means, it can and should be done. (3:34). and it can be done. We are people who have been involved in it and done it and I have seen it bring so much pleasure to so many families that they can feed their people. Now you understand we are not talking just to talk but we have been the man who has done the walk and it is so easy. Let's get the world leaders to Haifa and first of all let the land's owner know we are coming. Thank you very much for today. Tomorrow will not be teaching but how to get the peace, and don't go for all 190 but get them one at a time to come and sign and the easy ones are the Africans. The leaders of the West are too much spoiled, bribed, and too many pleasures for a free ride. Again do not worry about me going to prison, I am more worries what our children will have in their hands in the next 10 to 20 years if we fail to bring peace. Those of you who write that I might go to prison they know exactly that the prison is for them. End.

(tomorrows broadcast will be on separate document...)

179th Knowledge Seekers Workshop, Thursday, July 6, 2017
(starts with memorial to Fabio, Mr. Keshe has had it with Europe DL and his 3 guys have caused problems in Ghana, Atomic had no right to gift the land, they say it's not certified, Manufacturing moved to Africa and China and South America the power units will be available, Nobody has supported Keshe in Europe and he has challenged them to start to stand up for themselves.)

(:12) Fabio's memorial. (:33). Giovanni tells of her condition, they think soon she will walk again. (:42). Keshe talks about Naomi and Fabio. ... usually when you remember everything your life can be recovered. With the new technology there is every chance to recover life. We expect to have her back next year. We bless Fabio, I was the last person to see him. The life of the KF changed with his passing, we left the premises because nobody could bear it, missing his laughter. (:45). You saw many kisses and cuddles, this how they both were and there was nothing but joy and laughter. The hand of those responsible will be opened up. (:47). .. we needed 3 to 5 months to wait before taking her out of Coma. (:58).
(1:05). New webpage with Fabio.
(1:21). Keshe teaches. 1:22 ... they are accusing us of being a cult.

Those who signed the land contracts in Ghana had no right to do so.

(1:30). Keshe left Atomic, they have no space nor financial support.
(1:35).
(1:48). The management of Atomic were all using MaGrav's and getting 80% reduction in power. They ask how do we know, we can test their wires for N coating. It n coats all the wires across the house. We continue on with our work. the work has been moved to a International organization where KF is only a shareholder. We continue to push for world peace. Those of you who think we are doing wrong it means you have a different ethos to us. We gave energy power units, technology and patents in exchange for peace. (1:50). Now we taught everyone that we can go to the next step. If you are happy to be in the state you have, limited transportation, speed of travel (from 24 hours to 24 minutes), you have to develop the T further. 33
... we have the power generator ...
(1:54). ... ethos of KF is not to take when you don't and to take as much as you need at the time of your need. .. you think the Internet is against us, now the priests and the religions because they'll be out of a job. They will hunt down the KF supporters because now we have found the soul, the operation of it, we can work with it to create whatever we want. (1:56). No one can be fooled, their job is over. In Europe when they close a factory what do the workers do, they go out protest and shout, etc. ... they are fighting for that whose time is over. The same shall be as we advance. This is nothing as what we have seen with the 4 comedians, as I call them (DL, Red Circle). They got us back 25% shares with Ghana Atomic, to open for International backing. You don't know how you benefited us. From now on we don't release anymore information about our programs, manufacturing, etc. We were straight forward and shared knowledge that the others join

that we expand to help the others. When we get 4 terrorists on the Internet then 7 billion have to pay for it. (1:58).

(2:05). Many KF supporters are being pressurized by their families, see you went to do science but now you have done nothing. Ask yourself, in all the tests that you have done was there a point that you needed to use it? Or if you need to use it do you know how that it does what it is supposed to do. So if you want to do the health part of this T, get yourself cancer and then sort it out with the T, so you are forever happy to see that the T works. The knowledge is given to be used at the point of need. Those who blame and are critical are those who haven't used it, because it is not time. When the time comes the only solution will be the T. Those of you who are looking for power generators, it has been right in front of you for 4 years. I am not teaching you because when I do then you start to abuse me, he has done something wrong he doesn't take us to the moon. You are a bunch of people who like to have it and then see where you can go and abuse next. The abuse of the knowledge of the KF will never end. You are a bunch of unruly children. (2:07). You have gotten use to abuse and it's the fault of somebody else when he doesn't let you abuse it. Anybody sitting in front of me for the past 4 years, the generator is sitting right in front of you, not only for your own use but it is 30 to 40 KW generator. How come I can do it, maybe because I am a nuclear physicist and plasma scientist. Maybe it is time for all of you to accept that you know nothing, and because you know nothing you have to blame the others. You have 2 choices, listen and learn because I have said many times how to do it because it has been done, or pack it up and leave the work of the KF. (2:08). And when you get a cancer remember there was a T that need, go in kitchen and make your Gans and try to get rid of your cancer. Now man has to go and explore every aspect of this T so that when he or others need it he knows what to do. 27

.. the Italians are getting the new T from Ghana to help decontaminate their soil. This is the first Africa has given technology to Europe. (2:16). The Italian government has put us on the board for these systems. It weighs less than 200 kg and can stop every animal from getting sick. Happily manufactured in Ghana and joyfully received by Italians, I could see the joy in their eyes, we are both equal. This is the beauty of it. It can easily change the life of an animal in society. (2:18). shows a photo of it, a filter to clean the water for livestock. (2:20). The Ghana Atomic board says that this T puts us out of a job so they turned against it. (2:22). Shows the new Power Unit, 80% reduction. shows brochure. You can buy this anywhere in Ghana today. (2:26). {Keshe did it ... Ghana is now producing Energy Unit } (2:29). We offered it to Europe but they did nothing but cajole and listen to thieves , they can wait, now we offer it to Africa. It's a wake up call to world. Every product today is sold, we have to move to produce more. In the next couple of weeks you'll water from the same ?? ... the energy in this box (power unit) and the energy in the soul of the man is the same, there is no difference. (2:31). The way it operates replicates the structure and operation of the human body. 19

(2:35). The 40 KW Power Unit will be launched in China in the coming time. We brought the Pl T to Europe you did nothing but ?? and steal it and nothing else. We gave it to Africa and now you see we don't even have enough time to manufacture. We'll give it to China and see what happens. The price of oil will plummet. (2:38). The Chinese can

afford. We have to be equal. In Europe we saw nothing but being killed, one of my dearest boys, assistant, was murdered by Mr. ?? Now we start balancing the book. The next KF will be in South America, we'll support them in a different way. Arman has been working very hard to get things in hand. He is the head of KF Manufacturing worldwide. He has been to Peru to manufacture. I am bringing a balance to my work and now you'll understand, the Europeans will pay a thousand euros for the same box (Power Units). The generators that were ordered will be manufactured in China but we'll make sure nobody can open them and cheat. (2:40). Today we explained a lot of things because it had to be done, and it was to celebrate the joy Fabio brought to our life. 23
(2:42). (2:45). Questions.
(2:48).
(3:00). (3:12) They will teach how to feed the Europeans with Gans Water.
(3:16). Is Mr. Keshe human who is the we he refers to, and if world peace has been tried 3 times and this time it will go? World peace was not tried three times, (I think he means the knowledge was given), we gave the world leaders chance to bring peace but they don't so now we will bring it. ... he wants to post what DL has posted about him. (he doesn't answer about who he is). (3:18). Libby asks Mr. Keshe why he belittles the ones who support him and try in the KF, Europe and the rest of the world. .. no let me stop you, we said that in Europe we got shot at, and so many attacks ... we are not belittling or demeaning in any shape or form. You have to understand what is coming out of Europe against the KF, why nobody in Europe goes and stands against DL and the rest of them. Why do you allow it to happen. Which one of you stood for the KF and shut this thing (attacks on KF) down. None! You are all audiences, I thank you very much. BUT how much can one take? I love you, I serve the same everywhere. You know the European law, your name has been put everywhere, why doesn't any Europeans put their hand up to stop all these things? We went to Africa because in Europe there was nothing but problems. They brought the problem to Africa, but we are making flowers out of it. (3:21). We worked how long in Europe, what did we achieve, me and my family got poisoned, shot at, at high speed, and still we are taken to court for what? And the most heinous act go on, my hand has been damaged by him, he wanted 1 euro. Which one of you went to the court to stand and talk, but he could talk, which of the Europeans, all the ones we helped with the health units that they walked away from their diseases, went to court to stand up for us and say I have been served, there is something wrong here (with the court case). Do not touch my nerve it is very sore. Libby says that all of us have stood with you in spirit. I understand Libby, but you have to understand something very straight forward. The KF European supporters are solid, Africans are solid, the Chinese are more 100%. Maybe by talking we get people to stand up. Maybe you are the first one to say, why are you doing it, maybe we have to say for people to start moving. How come KF European supporters aren't putting a stop to this, 4 of them are making 200 telephone calls per day to Ghana Press. How many KF supporters make one remark to Youtube, Zero. Absolutely zero. Why do they let them do it, You are the KF they are insulting you. This ?? they put out in the past 48 hours, we open the book in Ghana. (3:23).

Libby tries to justify everything but Keshe doesn't buy it.

(3:26). What I ask you to do is to organize and shut these 4 down. I give you one week.

... I am all alone in this, 4 million supporters in Europe and nobody is standing up, we have paid enough ... Hello, this is Caroline, No Caroline you and I have paid enough. Maybe they never learned how to stand up for themselves, maybe it's time to show the path that you can stand up. I do. We do, but we have to show them the path that they can do as well. And there is no shame ... step down ... they don't listen. (3:28).
... it's a beautiful day, we remember Fabio's life, it has been good, but let us go and make it better. Thank you for today. (Libby we love you) I hope humanity loves themselves enough to protect themselves (we do). Fabio video.
END

180th Knowledge Seekers Workshop, Thursday, July 13, 2017
(Wants to clear up the little confusion in the technology, The connection to plasma is by will of man, Have to rinse Nano plate with few drops of citric acid, **Historic disclosure** about how the neutron divides into proton and electron from the energy both inside and outside or both, Rick shows bubble in rotating sphere that represents an electron, The M and G fields from space pass over the earth and become matter based on the fields it comes into contact with, it literally rains matter from space, Hexagonal Water will be researched for next time)

(:11). It's 180 continuously teaching. It comes to how do we use these teachings, how to apply it. ... to establish a space center in China. (:15). and one in Arizona. 32
(:22). We need to clear up any misunderstanding before we can go further in the space T. If there are any questions ask. I was told that the explanation we gave to the Ministry in Ghana cleared up a lot about acidic and alkaline. They said it was so simple and then they could understand the difference between the two. The N plate always has to be positive, these don't exist in the U, God doesn't go and create positive and negative anywhere. (:24). The connection has to be by the will of man. We see a lot of (confusion) about clockwise and anticlockwise still going on. These are irrelevant you have to understand where it takes you and what causes you to go in that direction. These confusions have built up over time, right or left hand flow of Pl. The Pl as we said is very simple, it takes its decision according to the field forces within the environment where it exists. Venus for example, nobody says it should turn the other way, all the theories and they think it got hit by a meteorite, those are all rubbish. (It turns the way it does because of the field forces.) It's the same with all of your work. You decide whether the system goes right or left, the system follows according to the needs of the fields you have created. Otherwise you have to put a motor in it and you push it, then you go against the grain of the system and you don't achieve what you are looking for, then you say that there is something wrong. There is no left or right, clockwise or anti, unless you are looking for something which you are specifically forcing your way to get to that point. So these things have to clear out of the work of the KF (thinking). If you feel like connecting the positive to the N coating, it's not matter state anymore. It's the fields Plasma transfer. This is what I mean when I say that the whole structure is in a too confused condition, the new T comes with a new understanding, and you should not try to put the old ways on it just because this is how you did it before. ?? (:26). We saw this in the Ambassadors Meeting in Rome, we showed the system which can do 220 and 110 volts at the same time, the same

distribution point. Those who are restricting are restricting only themselves to something. Plasma takes the condition, emotion and the direction that it needs to do, the way the environment allows it to do. And those people who keep pushing it has to left hand turn, or connected this way or that, it means they haven't grown out of the matter state condition and this has to change. We have to understand about these things now that we are going direct into space plasma technology. We have to let go of the old rules which were only used to guide us at the time, now they have to be let go of. It is created a lot of confusion. You create a Pl then you dictate where and how you push a stronger field, if the Pl and if the Pl is going right or left, by the strength and mass ratio you dictate and by nothing else. You can put a motor on it but the system will still change itself according to what it needs. And then you say I don't see any results because you are actually pushing a motor, but the Pl is going the other way around. If you want to see how a Pl rotates put a dye in your liquid water and see which way the flow goes, and if you can follow the flow of the Gans then you'll see what it is, which way you are actually pushing and why you are not getting the expected result. At this point this are the little things we have to point out and it has to be understood. We see a lot of people taking sides and pushing their way. (:28). Anybody taking sides have to reconsider and see what they themselves have misunderstood. 04.

(:31). Have to rinse N plate very, very thoroughly, you can add a few drops of citric ?? juice to neutralize any caustic residue. For medical application Gans production you can use caustic in the production but then you have to neutralize it because it is toxic. You test the water for caustic which is a base, pH.

(:33).
(:40).
(:45).
(:50). .... can wash N plate with Citric acid or orange juice does the same. ..

.. break in audio ..(:55). When you use AA you condition your system to atmospheric compounds of this planet, please understand why you are using AA or plasma of the Gans, when you use AA it has to have (something) it prefers, what is preferable and why and how and what advantages you receive in doing so. For certain developments (uses) you don't need AA others it is good, in certain cases you are better off with the use of the Gans within a container, in others it is better to use the Liquid Plasma (LP) of the Gans. Just because you produce it doesn't mean you can use it anywhere. (:57).

(1:06). (1:09).
(1:12).
(1:15). ... leave the N plates in water with citric acid for about 10 minutes, then wash off with the tap. it's like lemon juice. ?? you can use vinegar but be careful.

... does the neutron divide into proton and electron from energy within itself or outside or both? Both. (1:19).

...go **back over this beginning** about the neutron dividing ...

(1:26). Rick shows video, a tiny bubble in center of rotating sphere. Second video. He shows clearly a tiny bubble in middle of rotating sphere. (1:32). Keshe says if you would have increases the amount of Gans inside the bubble would have been bigger because now the fields of the Gans will pull it apart. In systems with more Gans in them the bubble in the center becomes much bigger, but this is exactly what we wanted to show. That bubble sits in the center, it literally is the proton (actually means electron). It carries all the energy and the other things ... (1:34). The ball (sphere) itself is the proton and the little bubble is the electron. The balance (in the sphere) changes, then you have the separation, it depends what happens inside the glass, let's say we put heat outside the glass, it breaks up and go into a bigger glass. The proton ??? and that bubble because it's a fields ?? it becomes itself an electron and the rest of the contents becomes a proton. Because this itself is field dependent, immediately the others create their own fields. So it creates its own center where the new proton has the same. Then this proton goes through the same process, it divides and this becomes a mass on the other side. This is how the universe divides. For the first time we explain this (for man), because it is time and the knowledge has matured enough we can break to the next step. If you increase the Gans material with a little bit of CO2, you'll see the size of this bubble increases. The size of the bubble is dependent on the field hold strength of the glass (sphere), of the plasmatic field quantity of the Gans', at a minute level, even inside the proton there is a Gans structured material, then it is connected to the G field forces of the universe. (1:36). the way we have explained before through the spinal of the Pl field. **This disclosure today and yesterday is a major breakthrough, it's the first time we understand how the proton and electron are created out of the neutron. In time to come this little electron and the proton will create their own centers, and in time they divide again. What we see in atomic nuclear structure in what we call an electron, proton and neutron, these are all divisions of each other. A neutron divides into a proton and electron when the pressures inside the nucleus changes. Then we understand that the electron and proton that are created out of the neutron themselves go into secondary and tertiary divisions, and the structure stays the same, this is why an element can stay for a long time, because on the run of the time by absorbing energy from the other protons within the environment of the nucleus, there is enough energy gained that the proton again becomes a neutron** ... inter-atomic infusions of the energies. This is the first time we disclose this because we clearly see this in the nuclear reactors. We never knew. If you ask any nuclear physicist what happens when you get a division, most of the time the extra energy of the neutrons, in going in a division (1:38). they themselves become new electrons, then the protons by the energy release from the division of the neutron create a new neutron because it absorbs enough energy from the continuous division that the cycle creates its own neutron. In Nuclear physics we have never understood this principle. This phenomenon is exactly what happens ?? , in the process of a neutron dividing into a proton and electron, he draws it, it releases energy to the environment and (another) proton elevates itself to a neutron. ??? this is how H goes from Deuterium to Tritium, in most cases, because it absorbs energy, a neutron is added from the absorbed energies in the environment where you already had a proton and neutron running. In space technology if you understand this process you can create any kind of H from the same set up. I explained this yesterday with the division of

the protons and a number of the neutrons. In heavy mass elements, the conversion of protons due to absorption (1:40). and radiation from all the neutrons, protons and electrons, whatever they divide, creates new neutron. There is no other option, so in that process we continuously produce neutrons out of protons and protons out of neutrons, and in that process using and what we extract from the environment we keep the stability, it's not that you put the electron in there from the beginning of the time, 1 million years ago and it's still the same proton, no the Pl continuously (changes) it's a dynamic state, it's not a solid state, it absorbs energy and this conversion of the proton to neutron and neutron to proton, is continuous and absorbs energy which comes in. You have to understand the totality. We say on earth the MG field of the earth from the MG field of the sun, creates residue fields and on earth we absorb it. So does the interaction of the electrons with the boundaries and other electrons, their energies get absorbed into the center of the nucleus where does it go, unless it adds to ?? these inside which is a proton and neutron. So in any case we always have, we never understood that a proton can be elevated to become a neutron because all it needs is to add energy from outside, as it looses it gains. This is the new science of Plasma and we start breaking through, that I started to teach from last week. The science of today, the physics is based on a total fallacy which we never understood. It has been built on that fallacy and we have accepted it. We only accept it one way and not the other because then we have to find out why and now we understand why. (1:42). The world of plasma physics opens up a whole new dimension in the world of science and we have to do in the correct way and not again form the dogmas of the, what we have been told. For the first time today, at least you can say that you were present when it was announced that a proton can become a neutron, and you can see it very easily with an explanation. The same as you can understand the neutron divides into a electron and proton out of the center mass of the Pl fields of the same thing. Now for the first time we understand from where the proton and electron comes, from the neutron. This is the ambiguity that have been sitting with the old matter physics, but in Plasma Physics we can do it, we just saw it (Rick's video) in a very simple way. What is your qualifications Rick. ... break ... education wise, I made it through 2 years of Chemical Engineering at the University in Flint Michigan. You are not Einstein are you? No where near that. Well you are past that, for the first time we can explain what Einstein never understood. The beauty of this technology is that you make a system and show it. We are all Einstein's, we see it but now we have to understand what we see. (1:44). This is how knowledge should be. 15

(1:50). Question about concentration of Citric Acid (to clean N plate).
check on adding Gans water back into caustic solution to neutralize it....

(1: 55).
(2:00). the Pl fields convert to matter as they pass over certain conditions to create matter ...
(2:05). (2:07). (back on)..

(2:10). Is this why rainwater has a different quality then well water? Our rainwater now is highly polluted, but if you could pickup a section turned to the atmosphere, yes. The rainwater is what comes in with the fields of the Pl. (they just saw a UFO). ?? Well water

filters through all the fields, the way we do with our Gans water, plus the fields it washes with itself down. Our well water is more alkaline and rainwater is a little more acidic and better balanced. can we add CO and Zn to our rainwater and neutralize the pollution? (2:12). Yes. There is a research data we have at the KF we are doing in the background for governments, yes it works. Q: A couple teachings ago you said if we go back to making Gans during this time it means we are confused, can he elaborate? I have given you the knowledge of the U without the matter state tangibility, if you are happy with the donkey, you are quite welcome. We left it behind. you have to understand what knowledge has been given in the past 2 weeks in so many ways. Not only have we passed the Gans state and field states, we have come into the cosmatic field forces which is anything you can wish for you can create. The new space reactors that we are trying to build without motors, you don't see anything in them. (2:14). Go back to the presentation in Hanover I opened the green box with the yellow lid and said this is the empty space of the U, that's where we are getting to, now after 6 or 7 years you are understanding what I showed back then. Now we are filling the systems with this. Now we have gotten to the place we can go to the hollow space in that ball (rotating sphere) and take the energy from it and make from it new reactors. This is how advanced we are now in working with the space reactors, because anything other then that in the expanse of the U, it will be (mean) converting to something else and then you are in a big problem, because then you can also be dissolved. It's like you are sitting in an airplane and suddenly you jump up and there is nothing underneath you. Arman said now you need a parachute for the space. But for here on the land because suddenly what you built on the matter level state isn't there anymore because it dissolves in the field strength. But when you work with the "mother", the center, exactly as the center of a neutron that becomes an electron, then because it's of the same you can never be ?? (dissolved ?), you have gone to the essence of the creation of the Creator. Do we always become a voyager after that point? You have always been a voyager. We never have a real home as such? (2:16). Any living thing of the U is a gypsy of the U. Wherever I lay my head is my home, this is the truth about the existence in the U. Shall we call it a day. Today was a wonderful teaching, when I teach like this, inspiring, when I enlighten this way, releasing new knowledge, as I said, by the time we get to the 30th the whole book of the science of the man will be written, and we are in that ?? , especially today. **The knowledge about the structure of the inner essence of creation has never been disclosed**, now you understand. Man in this ... transcribers make this teaching as a book and put it in the KF free papers. This is the knowledge that has to be transcribed and put up. (2:18). And when it is written and not a talk it will stay as the knowledge of man. Q: When we use the Gans to raise the quality of the water from acidic to alkaline does it change it to a hexagonal structure? (2:22). Hexagonal Water from Wiki, is from a marketing scam, it claims a certain configuration of water that is better for the body. ... Remember we were a scam weeks ago, it doesn't mean it is. ... can you do some work on this in the background and enlighten us. (2:25). Today's teaching is absolutely historical. Publish it and I'll sign it. Thank you Rick for that little bubble. Add some more Gans in it and see if the bubble increases in size.
End.

181st Knowledge Seekers Workshop, Thursday, July 20, 2017 (6 hours)
(Letter to the Universal Communities, Humanity's Wish for Peace, UFO's showed themselves continuously for 30 minutes to show support, Once souls are created they are immortal there should be no fear of death, Using the field plasma of Deuterium and Tritium will disarm whole world he shows how to place reactors, The empty space formed in the middle of rotating core is FP or field plasma you can take it out and it is huge source of energy, etc. How carbon Gans is formed and can be used to solidify all bullets in world, , this knowledge was given 6,000 years ago but priest didn't share it now if peace fails the knowledge will be shut down to prevent disaster, ,)

(:10). (:12). Ella introduces for Mr. Keshe he'll come later. Some big news to be released today. The Councils have worked to complete the letters to the World leaders for peace. (:21). (:25). Mr. Keshe comes on. This week I try to stay out of everything to see how the KF brings the position in, it is you who has to bring the change to the World Leaders. When I am not here the KF has to be able to run its affairs and be beneficial to the human race. They are learning. He has a bad Internet connection and will come in after an hour and a half. Try to come to a conclusion and I'll come back at lunch time.

(:34). (:37). Rick shows and reads letter, "Humanity's Wish for Peace, A request to the Universal Communities". We request the Universal Communities to open a portal of communication and support us in our quest to create everlasting peace. Our wish is to achieve peace and create the best living conditions for all life forms on Earth. We have received a Universal Teacher, and through his inspiring teachings, we have gained the knowledge to elevate our souls. We have, therefore, evolved to the appropriate level of achieving peace. W, as humanity, now wish to join the Universal Communities is a peaceful way. .. Caroline talks about the letter. We know that we are not alone. ... we make it our wish to receive their support. That we have elevated to this new platform. ... something strange happened when we worked on this in the night, I went out outside and asked Mr. Keshe can we have a minute of your time because I am not sure, we had for a half hour, non-stop, as you call UFO's, spaceships passing first small ones, by every few seconds there was one passing making sure that we noticed it, and it wasn't only Mr. Keshe and me that that saw them, we have 2 more witnesses. (:43). Non-stop confirmation that they are present and heard us and support it. The last ship was enormous. They have a blurred photo. (:46). people from around the world announce that they are present and want peace.
(:58). a lot of people have been in communication but it had to be kept from the public, now the time is right to bring this forward. (1:01). Paul from Togo says in Togo we have been in communication with them (spaceships).
(1:07). (1:11). This is john from AZ I would like to welcome our space family to this beautiful planet, this is the time that we have worked for , to bring the bridge together and show the UC that we can operate in peace and can bring the rest of humanity with us.
(1:14). Man describes meeting a foreigner.
(1:25). Ubuntu something ... Caroline talks about a tribe that takes a man who has done wrong in the center of a circle and they praise him and keep praising his strong points, as a way to get him back on the right path.
(1:33). The Earth Council is to support the Earth through their souls, ...

(1:37) Universal Council of 12
(1:58). Africa has over 2000 languages and the world over 7000.
(2:05).
(2:26). The Second Half of Workshop.
(2:29). Mr. Keshe comes on. We have come to learn more on how we have to operate. It's for us to understand that peace doesn't come easy. The human race has fought for millions of years and we don't have a concept of peace. It's only 12 or 14 days are left, to what extent that we succeed will depend on your efforts during the time we have left. Maximum 60 to 80 leaders can be reached by KF members. This is a marathon for the life of KF. (2:33). I am trying to bring the Iranians to Israel. All the leaders want to be part of something good, but then the thought what about the soldiers and armament factories, what are we going to do with them. The solution is unknown but we have to take a chance. Only 5 nations are making the weapons. Many nations are still paying today for the bullets that were shot in the WWII, to the Americans. (2:35). Nothing came out of America without being paid for, signed as debt. I give you an example, go into British archives, Mrs. Thatcher ??? the people paid twice for the same thing. When you pay taxes to put telephone lines you pay for it over 30 years, when she privatized it the people had to pay a second time for it. The people were eager to buy because she said it's worth a 100 million and we'll sell it to you for 50 million and everybody went for the greed of the money and nobody stopped to think that they had already paid for it, from this deal she paid off the debt to the American government from the WWII. (2:37). They were paying for the war for 40 years. Nations on the burden of Armies and guns go bankrupt. This is the way to show that we create peace. Peace will bring a new dimension in life, we saw it in Europe, we don't see many hungry soldiers from the coming down of the Berlin Wall. We can always find something for the soldiers to do then shooting a gun, and subsidize them for other work. I have put a proposal to the Iranian government, we haven't fought for 300 years we are a peaceful nation, we can take the step. The problem is getting them to Haifa, let alone to sign, these things take years. Tomorrow morning I am going to Vatican to ask the Pope to attend the peace movement. To me peace is worth fighting for, we have the knowledge that we can do it. We have the power to do it because we have brought a new knowledge. (2:40). I always promised you that when the man makes a move for peace we'll (UC, other life in universe), show the signs of support. Something strange happened, Caroline whispered in my ear to come outside, a number of UFO's were 50 to 100 meters away and a number of other people saw. I promised that when the man makes a move for peace the UC would come in and support and now we have kept to our word. We can't be wrong, it's not coincidental. Huge lights in the sky, and in formation. The UC has opened its arms. This appears for the second time, I showed you the video of 2 years ago. When we were writing the peace letter these lights appeared over the house for a long time, 30 minutes, we couldn't take pictures the videos wouldn't work. (2:44). We tried to take pictures. It means the man is on the right track, we receive support from stronger fields then us for us to succeed. I have achieved peace, and the men of the universe will see the soul of man has agreed with it. We are on the right track. ... we have the right ethos, and right always wins. (2:46). ... bombard all the nations with this letter, and especially Israel. The ambassador of Australia says he has other engagements. (2:48). Let us know who you send it to.

.. if the Iranian President walks all the armies around the world will collapse. My life is at high risk for what I have undertaken.
(2:52). The key points are the Vatican, the President of Iran, Prime Minister of Israel, and the Chinese leader. If we move these 4 targets, then the whole world will follow.
(3:00).
(3:09).
(3:13). Tomorrow I go to Vatican for the Pope to sign.
(3:22). You looked into the dimension of the soul, that the weaker gets fed by the stronger, but one point you didn't grasp, the weaker needs to receive from the stronger but at the same time the stronger needs to receive from the weaker that it can operate. The point you missed is that as the man is weaker in the transmutation of the energy to the stronger, it can assert its will, which is his wish. This is how you control the SS reactors, the assertion of wish. The Minister said it's just water until we explained, add a few drops into an acid and see if it becomes alkaline, add a few drops of this water to the original and see if it becomes more alkaline (3:24). then this in not just a water, it carries hidden energies. Those who are building these reactor should understand that as the soul receives to give, man can on the receiving side can add his wish to it, which becomes the control of it. In the future in the space we'll have one man whom we trust what we call at present time a captain, they are those souls who we trust to be correct and have correct conduct. Those souls who push for correction of humanity and UC. When you were trying to control your reactors, speed them up or down, but none of this works because you are not spinning the fields, but the physicality which is acceptable to you. Start spinning and changing the spinning by the strength of the different field layers, you can do whatever you like. Have you ever seen an engine, rocket propulsion or propeller on the earth, whose wish is turning this planet. (3:26). then on whose wish on the order of mass we can change things. As man opens up into space you'll see ships the size you couldn't even imagine made out of nothing into the structures of the souls that would like to, to become physical to see or be in touch with each other in a given environment that they can see the other souls to be in touch with. A confirmation of the existence of themselves. In the span of the U life never finishes. Man is immortal and he has not understood this, his fear of death is so ridicules that it shows the lack of understanding of the existence of the knowledge**. Once the soul of man is created, itself being created from the soul of the mother and the father, combination of the 2 as a seed, man's soul is immortal. Absolutely immortal. He should have no fear of death**, the faster he finds a way to space, because in the space there is no death. It's the understanding of the expansion of the soul of the man. We are afraid of the death and pay so much money to bury the physicality, is the freedom of the soul of the man in the expansion of the U. (3:28). As we manage to gather the fields of the U, in itself we allow it to create a higher density that it can absorb more and that by that it may become a part of the totality, that it can serve more. Those of you who have a fear of death, there is no end. The beauty of it is that even the physical part that is left behind, itself becomes part of the soul of another being, another entity, another part, it even becomes part of the soul of the planet. If you understand what I just taught you can master the space and a ship on your own, but in understanding the totality and the effect of the totality on each other. When you sit down to think about your life, try to think about where you have seen your soul, how and the way you have seen your soul. How you feel about the presence of your soul within you, if

you overcome that fear, now it was somewhere else and now it is inside me and I have to handle and understand it. (3:30). if you ever find yourself at peace that is the strength of your soul. If you can find peace with giving and joy with loving, you'll find you have a big problem, you are on the path of elevation, when giving brings you joy it means you receive more to give, then you understand that you have matured as a human being. A lot of people think they give, but in fact they are the biggest takers. But on the other hand if they haven't taken that impression is part of their lives. Those of you who are men of military, I show you one way to disarm the whole army where you work. Those of you who wan to disarm the armaments, create 6 to 12 small reactors fill them up with Deuterium and put 1 reactor of H, around any site you like, the strange thing is nothing will work anymore. If you want to jam a system that no aircraft can fly, that is the easiest thing to do. (3:33). Fill your reactors with Tritium, do not turn them with motors but get them to turn by the strength of their own MG field, when we talk about the fields of Tritium we are past the point of LP, now this invisible ghost becomes the end of weapons technology. Let's share knowledge and end the tools of war. You made the Tritium and made a Gans of is and have the water, in the core. (I am fed up with staying in hotel rooms for making peace for man). He draws 2 circles, in the top put 2 measures and the bottom 1 measure, then 4 and 8 measures, the rest filled up with LP. If you rotate the one with 2 measures you get the center point (hollow), rotate all of them and you get a hollow. The strength of their rotation will be 2, 1, 4, 8. You don't need motors, they will create their fields. Find a way to carry the FP out and anything in the area ... you get a huge jamming area. You create a vacuum condition of fields, (no communication). (3:38). In the structure of reactors you have a SF of 3 in center, ... if you use H3 you'll have a field covering hundreds of thousands of kilometers, go by to militaries. (3:40). It can be left in a suitcase or box and nobody will know, it will silence every weapon. It cannot be used for harming because it just balances. If you use ?? Tritium , something strange will happen, in the SS you'll become a man of peace, you direct it and you make a man of peace. Tritium is a giver and what you are short of, it will give. This is the only solution that we see to overcome the problem which exists on this planet. Tritium is the answer to the shortage that is needed and I have shown you from the first day how to make CH3. This is the reason. I warn the American Forces and Military very heavily. People of the KF have access to CH3 (3:42). and all of you around the world, if you can manage the Gans of CH3, and then extract the center fields, that it can't be seen but they will be the fields of Tritium, you create 3 conditions at the same time. The men who come across it will fulfill every desire that they need, because it fulfills every E of man. No one will touch the arms. In the process of T giving so much it becomes Deuterium and with it, it solidifies every chip, which means no gun shall fire. Present weapons technology obsolete. All the aircrafts that are made for bombing will become metal birds which I promised and all the ships will be the same. Total cost less then $20, and you'll paralyses all the weapons technology across the world, if need be. We have to do because we are men of peace. T and D do 2 things, elevate the soul of man and the other one if used the right way solidifies every weapons technology. 2 ways, it changes the C, but you have to use it extensively at high speeds that it can expand hundreds of kilometers. Those of you who are in America and you know how to make T, (3:44). and D, you can bring your nation to peace. In less then a week you can do the job, the president will sign for peace because he has no choice. 19

(3:47).
(3:49). The Russian and Iranian T which paralyzed the American military in the past 3 years plays with the matter state, what I just taught you plays with the Pl state and is not reversible, because when the magnetic field comes and the system jams and when you remove the magnetic field it comes back again, but this time if you work with the Pl the change is permanent. Once you become man of peace you can't walk back because we already learned what strength to absorb. The Italians will have a hard time driving because they can't swing their arms anymore in anger, because they'll all be happy and just drive to drive. What I taught is to disarm the militaries and if you use it correctly it becomes a tool of energy, of space, in the right order shall feed man for a life time. I came to make peace and if I have to destroy everything man has made to destroy himself I will. I'll make man ashamed to carry a gun because that way he becomes peaceful.
(3:51). Make as much T as you can and understand that you have to take energy from the center of it and not from the LP of it.
Deuterium has 2 systems on it, 1 is itself which has to give energy, and 1 by giving itself becomes D (?T) in 1 way it elevates the soul, and D solidifies the guns. (3:53). Pl in conversion to feeding the matter state, solidifies the matter state. Pl in interaction with a live Pl which is the soul and body, it elevates it, very 2 different things, understand a gun, a chip is a matter state, so it accepts the fields which fits into its matter and changes its matter state, its orientation. the soul and body are in the Pl or Gans state so when they receive the energy from the Pl of the Tritium it elevates them, it increases their power to the point when they don't need anymore. They don't divide they reach a point of balance and this has to be understood fully otherwise you run into a very big problem. When you talk about the work of the Pl ...

(3:55).
Stop you are describing CH3 in a matter state not a Pl. In Pl it is all one entity not 3 different (atoms).

(3:59) they are not 3 H's, because all energy fields are here, they are all part of the same spiral. In the Gans of CH3 you don't see the 3 atoms as in Chemistry, you see only 1 Gans, 1 entity. So you have to define it. When you understand what you are describing it becomes very easy. The matter state is from the past, we are finished with it. (4:01). Q: It is my understanding that to create a Pl you need to create a space for it to occur, for example, an empty ball that you surround with the Gans and that through the rotation of the Gans around the empty ball that a Free Plasma (FP) will form within the ball is this correct? Repeats it. No. But in a way again its the story of what you were talking about describing the solid state, it's half of the story and you bring the other half from somewhere else. It's sort of part way there? No that is part of the confusion that we have to sort out. (4:03). He draws a circle, the Gans is on the outer edge, inside the water, and in the very center you have the empty space, the pressure comes from the fields pushing inward. It's like a trampoline, the matter state is the outer edge, the waters are the canvass and spring, and you jump in the center, that cause the springs to elongate. The vacuum in the center is created by the push and pull of the fields around it, it means there is much more strength in the center that it can keep the 2 edges apart. In most system the Gans'

cover only some bands around the center, very few have we seen the Gans' covering the whole ball. That is where the correct field forces come into operation. (4:05). Where we see the Gans' on the side as a band it shows that other G and M fields play games into the system, it's not all Gans', the Earth's M and G fields, the motor which you rotate it with has a field on it, the matter state pressure field forces on the Gans. So when you take an empty cup and put some Gans' in it and some liquid, this empty cup become a FP vacuum center, ??? you can take the FP out (somehow). I bought a ball for this job, all your doing, what we said before, this to an electron, this to neutron, you take the FP or seed or strongest part out of the system, you should see liquid or vapor or like water around it. (4:07). But you have to make sure the field forces stay within. This is the new energy system we taught in the past few weeks, it is much stronger then you have ever seen. To you it is empty, like what the Minister said, it's just water. the only time you are going to see its strength is when you put it next to the other, then you see the filed spacing, then you'll see how the fields around them will create auras, huge powers. This is what I showed in Einhoven, opened the box and it was empty, the empty space of the U. It is full of fields. You had a problem going from the Gans to the LP, now you have to go to the field plasma. This is the ultimate. There is no matter state to touch this, nothing. It is so pure, and because of its energy, now you understand why when you look at the UFO's, those 3 spots underneath are so bright, and transparent. You should not see these lights outside, but in fact, inside are these empty plasmas, the field plasmas. It's exactly like when we look at the electronic structures on the heavy electronic systems we see a fizzy light running around the center and we call that an electron. (4:09). Because inside it when we took the electron from out of the mother, the center, the neutron, it is a pack of energy, it is so powerful that it creates light around it. You shall see. Now you understand that when you create space reactors there should be nothing in it. What I said in Einhoven, the empty box of the U. when you touched the box you got energy out of it, there it was static but here it is dynamic, and because you put it in there it already rotates. you have to learn one thing, trust your soul. Trust your instinct. If you come to this level and you understand then you can put these ?? aside, this is what I was teaching the Mozhan you take it from your soul, and the energy of it will shine, because inside it's your soul and its interaction with the environment will create light. If you create Deuterium you get solid floors. Draws the SF of reactors ... (4:11). You can create floor upon floor just by the fields, then you have the dimension of the whole craft that is created outside. How simple. If you understand the solid surface of this planet is nothing but the interaction of the fields. If you can repeat what you walk on, you can create any shape craft, as many floors as you like, solid to walk on. Maybe it's time for you to understand something, but we have done this many times. The skin of man, 3 layers, the interaction of these 3 fields gives the body its physicality, draws some interactions. In fact, you use the third floor or layer to create the physicality, you're doing (creating a SS) exactly what the skin does. (4:13). You have 3 reactors, a 4th and 5th and then you have physicality and then if you repeat it you can create a physical floor in the SS ... Have you ever seen anybody going and using concrete on Mt. Everest or making valleys? No, because it's the field interactions that allows them. Our main objective at the moment is not how to make things, but disarmament, which comes from the understanding of the fields. If you understand how matter is there then you can create a field in reverse then even the guns will be empty. You can empty the bullets, the soldier thinks he is carrying

something but it is actually empty. Because the shell of it has taken the solid state but inside is the solid state of the weaker because it is still in the powder form, you can fuse it in a very simple way. And all without fail have C in them so it is the easiest to get to. (4:15). What is C, 6 electrons, it means you need 6 Deuterium reactors, or you need an order of 6 by strength, ?? subtract 1 that it creates a flow and solidify every single C in every strength, or you create a condition because it is plasmatic it changes the orientation, this is the secret of matter state with the increase of energy ?? forms a diamond structure. We have in our structure C, the Earth is full of C powder, atomic C. He draws, all the little black dots are the C, combination of the pressure and flow of matter, because of the flow and the heat, (4:17). Some of the magma of the earth is in the Pl state energy, when one of these Pl state C interacts with one of the matter C, as it comes out of the volcano, it makes a "popcorn" of it ... the heat of the Pl of magma which is an energy free transfer like a Gans, when it gets this it goes through a process, the heating N coats its surface, then due to the rapid heat of transfer N layers pop up to a gas, but the center piece stays, and what you get through the cooling, is exactly like what you get when you put a Cu plate and pour boiling caustic over it, then when it goes through the cooling on the southern chill of the moisture, it becomes a popcorn, there is your diamond. (4:19). Diamond dealers always see so much black in them, they are the seeds. Like popcorn opens and a hard seed remains in the middle. That is called the mother in diamond business and they cut it out. The same process goes on in converting Microchips in missiles, when you give it the (Pl) field they all popcorn or become N coated, if they were conductors they become resistors and no Chip can transfer any energy information. You see your N coating you can put in 240 volts and it still holds it. (4:21). This is what you do with the Chips with the Pl, because the Chip is in the matter state and now you introduce a field state to it, there goes millions of dollars of making a Chip to kill. Now this is a Chip to fry, a lot of money burned up with it. I think the man will go back to sword and arrow and then he finds out we did this already and then he goes for peace. This is where we are ending up, where I am taking you. Creating Deuterium Field Plasmas , I have given man the most powerful energy system in the U. The present power supplies are creating a lot of energy, now you know where it comes from. Then if you transfer it across you can field it. ... it is time to be happy. Cost less then a dollar to bring the most advanced ships on the high seas to halt. (4:23). Go back to what I said, the intention of the soul cannot be used as a weapon. Soon man will understand. Now you'll understand that my T has been in the hands of the Iranians and the others and no body has been harmed with it, because by the nature of its work, the nature of the structure it cannot harm any soul. Matter state doesn't transfer into the Pl state, the body and soul of the man is in the Pl state. It only takes what it needs and saturates to peaceful condition. It is the matter state that changes so the conductor becomes a resistor, so the Chip becomes useless and it can't transfer any more energy. Remember we said you connect your MaGrav to outlet and Frig to MaGrav, if you look at the wires in your house they'll all be N coated and all become resistive to 20 mega ohms. Now you understand what happens to the Chip. (4:25). The Pl does this job. So goodbye, I advise the American government to very fast come to a peaceful agreement otherwise they'll be eaten up. Now I opened the weapon of peace, but it has been right in front of you from day 1. ... the wires become N coated ... these things are all made of Cu. Now you understand that the weapon's T is finished. I'll read something that has come in, "I wonder why you singled out Australia in

this way, I can only think that it would make it impossible to convince the Prime Minister to take up your T". My advice is all the countries will go that way he won't be the only one. Everybody will go to our website .. (4:27). Right now we only have Australia refusing, then more will refuse, so they all have to be done. This is not singling out, this is what has come in. We are singling out the human race to become peaceful. We have mad the warmongers ...
let them go and celebrate the death of war ..
(4:31). If Trump were to die all the leaders would find time to go to the funeral, why not for the death of war on earth, if they are really not warmonger and peace in their agenda. Is war the mistress of the leaders. The Shah celebrated the 2,500 year anniversary of Persian Monarchy. The Queen of England wanted to snub the Shah, so she sent the Princess Ann, that she is the only monarch. ...

(4:37). It means that selling Arms is more important then peace.
... a team of government scientist have gotten together to design a KF factory, it's not us any more. Government officials are designing the next generation of KF factories, this is the beauty of what is coming up and people don't understand it. He reads text.
(4:39). We are not doing the UN game and giving prizes. Look at all the murders who got the Nobel Prize, Arafat, Obama, Israeli PM, the ones who killed more get more. It came from dynamite to cover up the killing.
(4:44). The biggest weakness in the whole Military structure is they have used Cu for every electronic piece, and the smallest field of Pl will N coat them. 17

(4:46). The problem with the Russians (who used it to disable US Carrier in Black Sea) is that didn't know how to directionalize it so their own craft didn't get it. They themselves carry electronics. It is very simple to shield (the electronics), I have taught it to the Iranians. 37 When we opened the American spy plane, they thought they would all self-destruct but they were N coated, we copied the Chips, very easy. We used MRI on the Chips and got all the designs. Now the Americans know how to copy a Chip.
All the self-destruct buttons didn't go off, they all have a Cu connection that is why we could capture the American plane so easily. You literally fly with the Pl... it's the same you do with the Caustic.
The pilots all walk away peaceful, when 27 American military officers walked off and didn't want to war anymore.
(4:50).
(4:54). They use lies to create wars, we tell them the truth that they walk into the peace.
... i went to Vatican and saw all the people living in cardboard boxes, 50 feet from the Pope, when will he give them one the buildings to live in.

(4:57).
(5:00). The seed of the diamond .. Inside the CO2 Gans is a black spot, it's the seed the controller, or FP ?, that is electron you can extract it. In the world of creation everything is the same it just needs the insight to understand it. Can you all please get a response from the presidents so we can put them all on warmongering and then they can race to get back on top.
(5:03). We have to push for peace it's the only chance humanity has for a very long time.

Trump reportedly ending CIA plan to arm Syrian rebels.
(5:07).

... when we go to space it doesn't mean it will be all hunky dory, it will bring a new set of sorry and joys, but at least it won't be harming others.
(5:10). The court case in Belgium whether we win or loose we'll take it further, to the next step. They have planned assassination of Caroline and Me at any cost and don't care about the outcome. The security services have informed us they are diligently working on assassination in one way or another. They are making a lot of phone calls and putting pressure on the judge so they can get something and start pushing. Derek has put out an assassination order in the past two weeks and DL is guiding them where I will go. DL I stay alive as long as I decide, you can go to hell with your king. (5:12). They have even planned the assassination of my son. We got all the information. ... you have mentioned several times that this is a window for peace and there won't be another one for some time, can you elaborate. (5:14). Vince can you put up the pictures of the UFO's. It was like spheres passing, then the next one coming sequentially, there were 2 people who witnessed it, they said they saw it earlier. The UC was there concentrating on the writing the peace letters, and it shows the man is ready, but if we give up, we saw it 6,000 years ago when we did it the first time, but at that time there wasn't a line of communication the way it is today (Internet). It got buried in the desert. Most of it got hidden by the Jewish Rabbi's, the same happened in South America and Central Asia. because it was so small the communication didn't go further, now it is global. The next step if we fail, is going to be horrendous, because we taught so much to man, opened the door of UC, and the Universal Knowledge to them, do you know what mayhem they are going to create if the window gets shut. We will shut everything down. If man doesn't move in a peaceful manner in the way we expect him to do by giving him the knowledge, we'll shut the place down. You will understand very soon. Isolation will force man to peace. (5:16). Not isolation by pain but by showing man what he made a mistake with. This time you have to see what it is, a process of teaching, we have taught so much and elevated the soul so much in the past 3 years, especially in the past 3 months. It is beyond imagination, if one day man understands the total knowledge dispersed in the past 6 months. Man has not gathered that in the whole of 60 to 70,000 years. We can't be ?? skipped, if it is used the wrong way or if it is done the right way. We shut it down ?? it will be shut because this time, man will kill himself beyond because you know why, because they think they have the right to do, that they have more knowledge but they don't understand that this T can't harm , but they will use it in a different way that they'll elevate each others soul in a wrong process that it becomes elitism, to the elite, because those who understand more they'll do things ... I just received a text, do you know in Turkey someone is using your name to selling Pens and Pads, the invention of Mr. Keshe on TV. I said what. In China they are using my name like a water, selling all products to do with Pl and health. The changed the name to Quantum not to get into conflict but it is Pl T. But now they are going to push it back anybody who submits Quantum will be blocked. We know what is going on in the background. How many people are going beyond to understand ???
(5:18). The division, if it is not balanced now it will become so vast that we have to stop. Then it will be shut down. Next time ??? because now a lot of souls are elevated, you reached the point of elevation but you have no point of freedom with it. **Then we shut it**

down. It will be like a fire that simmers inside itself. Nobody will have a need for electricity or food or anything and the society will burn inside itself. Because it needs to do something but the leaders don't allow it to happen, because we won't open the UC unless we get a total commitment of peace from every single nation on this planet, and not just by commitment but also by action, (5:19). it's very clear we shut everything down, if you try to take the animosity out of the space, the knowledge is so much we just taught you a pinhead compared to the ocean of the knowledge of the U. The guys get big headed because they were just given some guns. We have given so much knowledge, it is beyond imagination, you haven't even understood 1 millionth of what I have taught, but it is there for the future, the reference is there. And then you'll see the mayhem. It has to be done this way, understand that we have done this many times before and it has always worked. As I said I had 2 choices, as I told Caroline, I love my wife and I have told her many secrets of the knowledge of man. We have done this many times before, I have a choice to teach this over 20, 30, 50 or 100 years and write books in code that nobody can understand and it (slowly) unravels, or do a sharp, sharp teaching, 3 to 5 years, then move millions and then they follow. the following of this peace movement, because when the kings and presidents move into the peace then they have to explain to the people, why, and then the T comes out, and then because of it everything is justified and a peaceful movement. You'll see what comes out in the next 7 days, I am taking a flight to certain countries, you'll understand what is going to come and what will hit. We have been told do not talk until it comes out. (5:21). We have governments and scientists coming out in the backing of the KF, some world leaders will come in and follow us not to loose face. I openly discuss with the Pope because I want to put his name on that shame list. My aim is that shame, not for him to sign the peace, because then people can see the true color of it. Because if it is it's the same with Iranian president, when I give 2 red folders to him, and Ayatollah Khomeini, because I know that one should carry the other. Last time I called on Friday and was invited on Monday to the Popes house, they know who we are. My wish is no ... Vatican has no army so peace must be its prime object. (5:23). Two American intelligence were watching us, ... the process of peace needs a lot of guts, I got all of it because I don't really care, I know the joys of it. Get out and do your work, we can't fail, the only thing that can fail is humanity .. 99% of the people driving in their cars know nothing about this T, but it is going to touch every single one of their lives. I have brought the knowledge of U and man is a speck in U, ?? it will get effected by it. We ?? 6,000 years and see where it has gotten you to. (5:25). This time we shall ?? wait 60,000 years. Q: He asks about the crop circles, are they Pl activities? Vince can you get the agricultural pictures we show the cucumbers. If you are referring to the fields where such an knowledge exists it happens naturally, it's the same, (5:28). shows cucumbers with CO2 Gans, all it does is take the pressure off the plants so they can grow. That is a UFO of Gans. the field pressure dictates the size. I think the picture answers your question. We are here to serve and this time the plan is well setup. This time it will be achieved by man himself, we just guide and teach. Everyone takes according to their understanding, but this time we teach so much that everyone's understanding will be equal. (5:30). Q: can we go to other dimensions? There are many dimensions, it depends what you want from them and what you are trying to achieve, if it doesn't fit you there is no use to be in it. ... (5:33).
(5:36).

(5:44). There are people groups who try to diffuse the peace situation so we have to be very aware, peace means a horrendous amount of changes, especially the way we are putting it out. Nations overnight have to find millions and millions of jobs. the fear of change is horrendous for some nations, what are we going do with soldier, guns, all money wasted on these arms. (5:46). The biggest support we can give to the leaders is that there is a new T and this will come in the next week or 2.

(5:49). Shows the GDP of nations.
(5:52). Shows GDP on military, US 600 billion dollars.

if they spend the defense money on people everyone would be a millionaire...
Each American can be given $2,000 to stop making arms.
Now you understand why defense is important to these nations, bribes and commissions.
(5:56). Take Israel 18 billion per year 10% goes for bribes. Governments don't look at this.
(6:02).
(6:06). Most of the presidents take a 3% cut on the military contracts. Most of the attacks on the KF comes from people who get these contracts. I have been asked now not to make any comments. I will not.
(6:08). I had businesses in Africa and I received threats because I paid my employees fairly. Respecting human being is not robbing them.
(6:11). One of my next projects in the next 12 months is to make machines that can make gold out of air the way we make blood.
(6:14). End

182nd Knowledge Seekers Workshop, Thursday, July 27, 2017 (7 Hours)

(Talks about the secret of existence in the space and how to absorb energy directly from the environment, Soul created the organs of the body through its desire, , after half hour Caroline talks, ,)

(:11). Special program today, (7 hours) in 2 part. In Ghana we'll be on the TV press conference. We have been given guidelines by the government officials. (:14). In the teaching we are concentrating on the space T now that we have come to understand the power of the Pl and Field Plasma. Field Pl means everything to us and will become the essence of our energy and our existence. It is the way we'll absorb energy from the environment in the space. how we come to understand the capabilities of our own soul is important in 3 ways, first we do not need to depend on matter state anymore, the knowledge has been passed on enough that we can go into the next steps of the T which means we become independent of matter state, free from hoping that somewhere down the line we'll be receiving some matter state energy pack we call food. (:16). that allows us to survive. Now we have learned the secrets of creation, how we ?? interact and absorb its energies, and what we need from the energies becomes part of the understanding of the totality of the knowledge that has been brought forth over the past few months and years. This means that if you wish to have the status of joy you can create that state because you know the strength, if you want to create a status for the production of cells, it

needs to repair an accident or arm or leg, you still can do it. If you come to the point where you reach a condition that you want to develop certain materials that satisfies the need of the point of manifestation of physicality, you can do it. the only thing now to teach is the filtering system. We have shown how to gather energies, you have learned how to create or to absorb, in yesterdays teaching where I explained how to get (energies) from different rates of breathing, from the source of the Creator Itself. And then once you do this how do you convert energies for the cell of the body or to a ?? Chip. How do you convert the condition of understanding to create a table or a communication line, these all become a reality, which means we learn how to convert fields. Once we have received it then we convert it to what we imagine. (:18). You desired to have an arm you create it through the understanding of the need of it, through the brain its structures and then it delivers it. You expect the structure of ?? 3 dimensional and then you can go, on say a 3D printer to develop what it is, and then you have the material in your hand. When the man matures to understand the conversion, you'll find out that he can do this with the strength and understanding of his own thoughts. You do not need to sculpture, that comes from the state of the mind and the man. This means you'll become very powerful in your desire, what we desire and wish to have we can achieve. What we want to achieve and what we need at the point of demand has become the limitation of the soul of the man and the conversion of the material. So when you see something in the space and you want to replicate it, it should be no problem. In time we'll learn how to divert fields and to absorb them and to give them. The essence comes that we have to learn from the structure of our own physicality, it is the same brain and then in resistance to or interactions of the fields we change it to different emotions or to different part of the physicality of the man. (:20). If you think of it, many of us, many times must have wondered how come the body has all these organs arranged, the liver, kidney and everything else. What was the desire or the initiator to have these, or did somebody come and plan a 3D man and then the structure was put in like what I call a CD for them. In fact you'll learn with time as we develop the knowledge fo the transfer of the fields in between strengths that these systems will lead to the creation and generation of the other systems to balance themselves. This means that once you desire to digest a food which you need or you think you'll like to be able to digest, then the system of the body goes into operation to see how this food can be digested, what enzymes does it need, how does it need to change its production in its stomach that can satisfy the soul of the man, so the body goes into operation, the stomach produces acid for the absorption of this material, then if we do it enough the brain continuously seeks to satisfy the desire of the soul, will find that enzyme needed to digest that food. And then once you digest it the system builds itself that it can absorb it, then at the same time the liver goes into the process fo storage facilities for this special thing otherwise it rejects it, because if you need it then you have to hold, the desire ?? it has to be done. Then it comes to the blood system and filtration and everything else, then the whole system adjusts itself. (:22). This is how we evolved, the evolution of the body of the man came in this way. So the short time that we in the space we learn a lot about these things. That our desire to have, to contain, to be able to enjoy the desire of satisfaction will lead the whole fiedl structures to structure themselves in a way that allows the satisfaction.27

(:33). transcribe here

(:39). I have enough trust in the strength of my existence

(:45). Kr. Keshe leaves for a conference return later.

(:50). The introduction videos that are played each time contain a lot of the totality of the knowledge. If this past half hour of Mr. Keshe's talk sounds difficult to you, we are going to have to learn to convert complexity into simplicity. Simplifying and making it so easy. I understand that it may be difficult for a lot of people because they have spent a life gathering knowledge but then listen here and there mind starts to spin and they wonder where the heck have I been, what have I been doing, and it is very difficult to connect. The simplicity is hidden in a simple way, don't make it complicated or use difficult words. How simple this process is just to do the Nano coating...
(:54).
(1:17).
(1:44). Alzar asks Caroline, that Keshe said once that we come from the rays, but not all the rays come from the Origin, Creator, so does that mean that some of us don't come from the Creator, could there be crappy rays out there, so some of the souls are crappy? Keshe comes on, No Alzar. No such a thing exists in the world in the U. Sorry I have a few minutes I come in. If you look at the picture in Book #3 you see the little spin off (rays) that come off the Plasma at different strengths, all do not come from the main (Plasma) they come from the spin offs, and they still carry the essence of the Creator. If anybody has that photo of the Unicose Pl you'll see that after the reduction they create the spin offs but they still carry the essence of the Creation the Main Plasma. So not everything comes from the Main, those are, because they interact they create a friction and then that creates a division of it, but they still come from the essence of the Origin because that is where they came from. (1:46). All of us carry the essence within us. Those who come direct from the light of the Origin are totally different and they carry the full knowledge. Is Jesus from the Main? You see if you read one of my papers, "The State of the Scientist as a Prophet of ", which means ... none of the Prophets taught mathematic, biology or any sciences, they came to enlighten the conduct of the man. We have the same messengers of the science and they come to enlighten man in the knowledge in respect to his environment. One tries to bring the knowledge in respect to the soul and physicality, and the other brings the (knowledge of) the environment of physicality. One we call the ?? and the other we call the prophet of the soul. So from now on the ones who come from the Main line (plasma) will carry both knowledge's, that of the soul and of science. I have written this in a paper and it is in the archives. From now on the Messengers will carry the knowledge of both because they have to link it and be able to that physicality leads to the essence of the creation of the soul and its control in respect to physicality. So you have to have a full spectrum, we come from the Origin and are the Origin and this is how it is carried. As you divide (? the plasma) more and more you still carry the essence of the Origin as you came from it. There are no, as the word you used, crappy ones. (1:48). We are all perfect, it is how we allow the perfection to manifest its beauty. To us somebody who is handicapped or one eye, there is something wrong with them, No, it's because their physicality has decided that for that they need attention of mercy or joy or whatever, but (only) on that point, in that dimension. ???

Most of us are spin offs and those who come from the direct line are the Creator, so they carry the full totality. Each one of us that are spin offs we become more specialized, put it that way, we become a doctor, or heart surgeon, then heart valve surgeon, then the opening of the valve, and it carries on, so each one has its own beauty, (1:49). Q: I am the beginning and the end, how come they are so opposite. ... break up ...
(1:51). Why do you think you are so special, you are one of us, ... you see the structure of the U is very simple, you see we are part of the Totality, and without one the other parts can't exist, operate otherwise it has to find a new position, a new way of showing itself, and this is the difference. Having trust in ones own existence is the key to the U, when we trust in what we do, say, and act is right, we are right, we exist, we don't need to confirm that we are better, "the beginning or the end". It's a process that never finishes, you are the beginning of something and then the end so that you can become the beginning of something else. (1:53). Physicality finishes but now it becomes the freedom of the soul to start a new cycle. So there is no end. It is the ? continuum changes, when the man realizes this he will progress very rapidly. It is just the same but in different dimensions and containers, ?? if I put you in the water in a white ?? or pink ?? doesn't change the essence of the water inside it. Our existence is like a cup in different colors, dimensions, and ?? sizes, it is us that have to understand this otherwise in essence we are all the same. If you keep the cup on the frig or in the boiling water it's all the same still water. It's the environment that changes that shows itself as ice or steam or boiling water, The sooner man understands this the less problems he'll have in progressing to the next level. Alzar says she got the confirmation that her soul talks to her. If it talks to you it means you have found your soul. (1:55). ... the more we become aware of our existence the more we become aware of non-dimension of it, you don't need to get to the airport to find out there is a problem, the soul already arrived, he knows, this is the beauty of it, The more we become aware of the existence of it, we expand ... it doesn't need to be a field you can see and it shines and says this is my atmosphere. It means the more purer you become the more you feel the distance, you understand it before it happens. I have created a lot of problems for a lot of people this way, but they don't understand that the presence of the soul reaches the physicality long before the physicality arrives. I use a special terminology and the people close to me know what I mean, that has driven a lot of people crazy because I don't need to be at the point, my soul has expanded that it is at the point, I don't hear through the ear but the ears of the soul and they understand the impression of the soul and the sooner we understand this the much easier it becomes. At the moment we reach that point, physicality doesn't need to be there (1:57). Mr. Keshe goes off again.

(3:21).
she talks about people marching and what is there true intention ..
(6:10).
(6:38). Keshe comes back. We had a good press conference. (6:40). We announced the start of KF Banking system in Ghana. (6:43). Photos of new KF factory in Ghana. ... broke up ...
(6:47). Man tells a cat story, it used to attack people and he put a ZnO2 collar on it, and the attacks stopped. (6:49).
(7:03).
end

183rd Knowledge Seekers Workshop

Declaration of World Peace - Day 2 - Thursday, Aug 3, 2017 9 am

(The first time humanity has signed itself to peace, One Nation conference, China will launch first spaceship, Space Centers beyond the earth's surface, He talks about the dividends of signing Peace and new advances, Plasma has both Magnetic and Gravitational fields forces and now the signing of peace we can teach you how to tap into unimaginable amounts of energy, The interaction of the G with the M generates huge amounts of energy and what rotates the planet, It is one of the most controllable hidden forces in the universe, When you climb a mountain you get more M and less G fields and your soul elevates, Man tells of heating house and driving car with bags of Gans', The signing of Peace gives Keshe the mandate he needs to teach more and spread the technology, We have signed the nations to peace for the presidents and now we have to inform them and see what they'll do, Americans have killing in their blood that is why he doesn't what them to lead the process they'll use it for wrong purposes, ,)

(:15). Today is a special day, for the first time humanity has signed himself to peace. As of this morning we have become One Nation, which means there are no borders, armies, and no wars and we don't need to incite wars as we have no enemies. We have extended the borders of Earth to the boundaries of its atmosphere. We make the atmosphere of this planet its boundaries there are no armies to fight. As we have taught from the beginning the UC never fights, this is a imaginary border which extends into the U. We have worked so many days to bring this planet to One Nation. ... we love and adore each other in different ways ... this has been the dream of many of our forefathers. We saw yesterday representatives from every language sign themselves into peace. This is the beginning of a peaceful cycle for humanity. As we have seen in the past wherever peace has prevailed the science, technology, and the comfort of mankind has taken off very rapidly. We know this will change a lot of things, we are working in the background in a massive way to change conditions. And we see science in exchange for peace is paying ?? (:18). It brings us acceptance, and we are and have achieved a new era in human race. Many of us are fed up with killing and be killed by so many different ways and tools, just for somebody to be the boss or be called the king or president. We have done away with the leadership and have brought in the leadership of the souls, the members of the councils carry no voting right and as of today the new governing body has taken place. In the next few months you'll gradually see the changes. I have called for a World Peace Conference in the next few weeks, hopefully after my return from Theran we'll hold the first International One Nation Conference. we might see some of those we call the present leaders to be present. It takes a lot of work to organize. Not before the end of the year. We are looking at 10 to 20,000 people to this conference. (:20). Place and time will be announced in the next few weeks. In the coming weeks we'll announce the new Banking System and the blue telephones, and the One Nation Police Force, and the first excursions into the upper atmosphere with KF technology, and a new headquarters for KF one in USA and Asia, this brings us to one center in each continent. A center in South America. We have to be able to give positions for the heads of each continent. We'll announce space centers beyond the surface of the Earth, the technology advanced. We wait until the One nation is in place that we can deliver the T in full. The T of the space launch will go

to China. (:23). KF will conduct its space programs out of Chinese territory. It's a pleasure to offer this to China as it is a peaceful nation. If we would have given this to USA there would be more warmongering and the rest of it. We see China as a safe country to give this T to. In the coming months you'll witness the first space launches from the territory of China. We have made the agreements. The advancement of peace needs powerful people who can deliver it and not warmongers. (:25).
.. as I said once we sign ourselves to peace we can open the channel to UC and this will be done in the coming months. .. China will open the channels. We will be a part of going into space as something natural.
(:29).
(:34).
(:43).
(:45).
... there is knowledge beyond the understanding of man at this point in time in the U that once the man see them will cause one of 2 reactions, the pleasure to accept or the fear to create and control. This can not be allowed. (:50). In the coming time, as the space technology and the Spaceship Program opens up we will see that the human race will trust its own structure, physical being and soul, enough that it can be given and entrusted to other beings, who through interaction with them will increase the intellect of the man himself. At this point in time these kinds of knowledge is not seen nor understood by the human race. This is one of the advantages of opening the space through the (KF) Spaceship Program. This means we bring together a mixture of the science of man and that of space together. (:51). And this can create all sorts of joys and expectations. This is part of the dividend that comes with the Spaceship Program and has to be understood that it is to be used for the totality of human kind, by opening the One Nation and delivering more knowledge into the hand of the scientist, who will deliver and develop knowledge and technologies in conjunction with those who are from beyond the boundaries of this planet and this will change the totality of the life style on this planet. The buildings and structure that we know, as of today will not exist. The way we build and construct, the transportation we use, the line of communication that we have, is so obsolete, in a way not backwards but ???? many of the human race will be baffled and might resist the change. This can not be. We have to educate across this planet that it is their choice and be part of the free space knowledge. In the space there are no bricks, metal gates, we don't have computers, (:53). and not the visibility of the TV. In the space we create the dimensions of physicality be the interaction of the totality of the fields and through the understanding and control of our own fields. Which means that what the man has built in the 1 dimension of space will become irrelevant, this is part of the One Nation progress. The aircraft industry of today will be a museum in the coming months. Would you like to spend 12 hours on a flight or 12 minutes. These advancements in the space technology will come purely out of the nation of China. The initial investments to guarantee world peace has to come through the strongest nation which is peaceful. These technologies will be given in a way that guarantees peace and the advancement of the knowledge on this planet. As I said we have no trust in the US government to use the technology for peaceful application, whereas we have 100% trust in the Chinese government to see the development and the delivery of the new transportation in space on the Earth level and

across this planet. We will deliver these on one basis, (:55). we have to understand further the interaction of the fields 03

..First, gradually we introduce man to the knowledge which is beyond, (1:00). this planet and has never been open to here (known here), and secondly we allow the man to test himself in how much he can understand the new understanding of the technologies. As I have said, that stacking up apartments one on top of the other and 20 to 30 million people living in one place, only because there is a job, water, or a light, is all irrelevant. In the coming time the cities we have chosen will become empty places. What they call prime real-estate will not exist. By being able to produce different materials, transmute in different positions, cities the way we have them will be of the past. The human race will spread across this planet and beyond. There is a point we have no control over and in that process we'll have to make facilities that in that position we are there to make the difference, like during natural disasters, it needs positions that the new technologies can help with. We can't stop these natural processes even in the space, but we can learn how to overcome and support instantaneously and not to wait. One of the biggest problems for the human race is the contamination in different shapes and forms. (1:02). KF AZ is spearheading release of new technologies ... we are producing systems that you can produce whatever you need at any point on this planet, be it food, materials, energy. At has been on the table but many have overlooked it. Now we'll bring it out as part of the process, but a newer deeper version that the same system you can produce from gold to water to any other material you need. this system should not cost more then 100 to $150, we make you independent from every need. This process will change everything that the man has been afraid of even shelter. It is the completion of what we promised as the Oasis system. It will be delivered through the Chinese KF. (1:04). and through AZ. ... break in ... (1:06). The total structure of the new technology to guarantee peace. ..

(1:08). ... **we always explained that a Pl has both a G and M field, one thing you never considered, if there is such a thing then there has to be a flow of the energy, GM field strength between the G and the M, and man has never tapped into this energy**, because he has never understood, never could have imagined, but if you look, everyday life on this planet works and operates through this operation of the fields. Look at the rain, the clouds, the life on this planet. The interaction of the G field of this planet with its M creates such a vast energy that it forces the rotation of this planet. (1:10). The interaction between the G and M of this planet is the cause of the motion of the clouds and the creation of the conditions on this planet. Man has only learned a little bit, maybe to use the winds and a little bit of this and that. The energy hidden within the interaction of the M and G fields of a single entity is equal to the energy that is available in the U. Man has never understood this potential. As man never understood the field forces of the G he always considered one thing or the other as a field and now the new opening will change everything by the delivery of the new science, is the interaction within the field itself, G and M one doesn't exist without the other, at the same time the 2 exist to support each other to exist. Up to this point man has never tapped into this line of energy, nor even considered such a flow. The new T which we'll deliver will tap into the M and G of the field itself. It has to be understood that (1:12). the field flow between the G and M is one of the most controllable hidden energies in any process in the U. Man has never, ever

considered such energy. When you create G and M fields from the same entity, they always have an interaction and an interface, one is stronger and one is weaker and the flow from the stronger to the weaker creates field forces that create the rotation of the planet, which creates the winds and the conditions of the temperature on this planet. It's time to understand that one can tap into this energy, if one understands, then it dictates the rotation of the entity which gives it the balance in its motion and then one doesn't need motors or nuclear reactors to create energy and motion. The field force balance between the 2 has to be understood from now on, and needs to be tapped into, then you can choose which part of these field forces you decide to interact with and that will give you whatever you need from that point. (1:14). An onion is ground based not much of the M but more of G, an apple is more of M and less of G and only a few meters changes one field force to another and the creation of a different entity, but in fact they are both made of interaction of fields and nothing else. The development of the field interaction systems which will interface with the M and G fields will become part of the cornerstones of the development of energy and motion and materials in the upcoming time when the man understands. Creation of materials , gases, fields, motion, new positioning, now even the rays become part of the game and one can understand. The MaGrav field strength within the MaGrav itself becomes important and makes the development of the systems so easy that (:16). You can use the MaGrav systems you already have to create such a system, the knowledge of interface between the G and M fields will create the new opportunities and sciences that man will understand in totality. 34

.. with the signing of the Peace Treaty and creation of One Nation on this planet now we can teach more knowledge. What we see as illusive lights on this planet comes from this interaction. (1:19). Which means the Earth lights itself through the interaction of its own G and M field, the way that the lights of sun and earth leads to a higher order, we call it a daylight and night. The same thing, part of the illusive lights from the U comes from the same interaction of its own MG field forces and now man can understand and use these field forces to his advantage and it takes no time to develop these kinds of technologies. This is the way that the birds fly on the footpath of the field flow which always stays constant irrespective of many other factors, it doesn't matter how old the bird is it flies directly to the point on the tree from one continent to another. These interactive field forces are very weak but extremely powerful, and you don't have to do much to be able to tap into one or the other, but the interaction of the 2 creates a totally new system that man can benefit beyond his imagination. What else can I teach you, if you are not aware of the operation of your own planet for millions of years. That you can use the fields of G and M (1:21). to create everything that you want. There is a lot to learn and teach, but we have to be careful that these teachings are not used to harm the others. Any Questions. (1:22). How do you expose the fields in such a way that people gradually learn to benefit them without abusing them? This is partially we don't need exposure to, and it is partially used by our brain to access the conditions. This process is used by man on a daily basis, and every second of our lives, but we haven't been aware of it. The process of the interaction between the G and M fields of the planet is actually part of the energy that our brain depends on for its source of supply. As I said we absorb and gain so much energy from our environment. When you climb a mountain and you say that the air is thinner, you have to understand that at that point you receive more energy from the M field of the

planet then the G and in receiving you it enlightens you. (1:24). It reaches you, you are receiving more then giving to keep in touch. This is one of the reasons we like to go into the mountains, because you are farther away from G which pulls energy from us and we receive more of the M fields of the planet, this is what we call, I pray for you, I give you some of my soul. It depends how much I pray for you and how much I give, you receive from what I give. So when I go 32

(1:28). Man heats house with Gans.
(1:32).
(1:36). Keshe explains it
(1:42). That is the old way.
(1:45). ... break in ...
(1:47).
(1:53). You could have walked into it and if nothing would have happened you'd say the system did nothing to me. This is why we have to become more understanding of the system and the position of what we are getting involved in. if he would changed the dynamic, the coils or the fluid, if you would have needed it you would have gone to sleep for another 4 hours. It is the spectrum which we cover in the strength that matters and it creates that (reaction). Q: We have a lot of pollution in the big cities related to cars.... if you make your flying cars then there is no pollution ... I agree, but at the moment, we have so many combustion cars, if we could add something to the car to reduce pollution I see it as a good thing, as a temporal solution until you give us the solution. (1:55). Can I add the principle of the Gans bags, I made 2 bags 3:1 and 80% CH3, and 20% CO2 and I mounted it on the car fuel line. My fuel consumption was only 5.7 liters per 100 KM, it seems almost impossible to get more power and lower consumption in such a simple way. Paul said if you have anything that runs on combustion, on the plane of the top gasket, btn the silencer and the top of the motor where the combustion chamber is, if you put a tube in front of the silencer and one in back, put CO2 in one and CH3 in the other, you can get more power and reduce the mpg. (1:57). He tested on his lawn mower, how is the energy released, is it because you have a spark in the motor or does something happen to the fields when the gasoline burns in the motor? If it works we could sell these to people for very low price and could reduce pollution. The only way to reduce pollution with combustion is to reduce fuel consumption, one of the points in this T is to look at the material side but with introducing Pl into the system ?? you introduce an alternative fuel. At the end of the combustion process you create a Pl, so you realize more and more that the system works because you create a hybrid. (They say that) just because you don't put it in there it doesn't count, but it does count, quite a lot. People who have used these systems for the car they says that the steering is lighter, the Pl condition effects the whole positioning, you change the positioning, if you use a CO2, a CuO2 you find the driving is not so comfortable, if you use more CH3 then CO2 you find it a little more comfortable. Because of the M and G fields you release in the car, create in the car ... People look at the practical aspects of this T totally in the matter state. Even if you carry a bag of CO2 in your car or CH3, (2:00). you create a condition of positioning, it's not just that the bag is there but you have created a new positioning in the whole car in respect to the Earth. The Earth doesn't look if there is something somewhere, it looks at the MG field positioning. We looked this years ago, how much Gans of CH3 we have to use before the car floats, it

is quite possible. If you put a 20 kilo bag of CH3 on my roof, then you'll find out that you most probably will fly. You can levitate with it, this is the reality. If you put in the front and the back you'll find out the steering is much easier. These are the things I used to teach years ago, but recently I just don't consider anymore, but we looked at it scientifically, because the more mass ratio you have the more the interaction has to be. Try the CO2 and CH3 and see how you position yourself. You say to yourself why should I carry a 100 liters of Gans on top of my car, I would do it if I don't have to pay for the fuel, I would carry 200 kilos. If you don't want to carry CH3 on the roof of the car, the alternative is to create a concentration of CH in a dynamic reactor. (2:02). The position is where you put that tube of something somewhere, you have changed the field positioning of the car. In this T look at the field and not how much matter you put in there, the (lower) fuel consumption is because you have reduced the interaction, friction so you use less. Then if you can totally turn the car around that the field Pl flow around the car ... in Peru they got 60% reduction (in fuel use). We forgot to tell you. Do Not send any packages which carry any name of KF through DHL, they have an instruction to destroy all the KF packages from the Belgium government. It has taken 4 weeks to move from Austrian office to Turkish office and we lost our servers with it. These Car Units what you were speaking about, it has taken over 4 weeks to arrive in Turkey and is still not arrived we had to get Police involved.
(2:07). With the cars, when you put a (Gans) bag in the car you create a new positioning, which the bag creates. If you tighten it to the chair you just might get a better result because the chair just might lift a little. So you are saying that the increase in mpg is because of the reduced weight? Yes, 100%. But doesn't that reduce the braking power if you need to brake? We did a test with scientists in Gent University, if you use a N coated materials around your brakes it makes it worse, or faster ??? If you use the fields as you are doing, the positioning gives you less friction, this is one of the problems with MaGrav positioning systems, you'll find out that even the cars next to you behave differently also, as was tested in the Philippines. You can test it by putting Gans' (not necessarily Gans Water) on the roof and see. I am prepared to carry 100 kilos on my roof and reduce my consumption by 40 to 50%. That is actually what happens if you carry a pure Gans, but you have to test and see which Gans and what ratio gives you the best results. I am worried about the tubes of Gans near the combustion chamber, I need to be to take the throttle off so the car can idle? It has nothing to do with the throttle, it's the fields positioning it creates. What will be interesting with your lawn mower will be if the height of the grass is different. I have done many of these experiments and it's very funny when you see it. (2:10). It doesn't matter about the combustion chamber, today is not for these things (discussions), put a bag of CO2 in front and CH3 in the back and tell me what happens. We have just been told that the World Peace Treaty is completely signed and is on the KF website, the full 196 nations and territories. It is complete and we are One Nation. Get this out to people that we have become One Nation, this is important. (2:12).

(2:23).
(2:29). Shows the track list of signers of the WPT. We are in Iran from the 14th September for 2 weeks. We are trying organize a conference in Theran. (2:31). The last document was Alek in Africa. Now it for us to put it through across the world. It has just started and now we have to go and sell the knowledge of peace across the world, worth a

lot. Please send a copy to all the Ambassadors who we contacted and tell them thank you very much your nation has been signed to peace. They'll have to find out who signed on our behalf. This is the beauty of it. ... they don't want to say this is fake because they have become obsolete in their manner and operation. .. because we needed you not to attend so that we could take control of our destiny as One Race that is peaceful. (2:34). It is a very strange situation, 2 governments running at the same time, one warring and one for peace, I think we'll get it this time. Lisa from the Earth Council of Australia. Thank you to all the people working in the background. We passes the threshold of peace. ... it will be very strange how they respond, they have signed the peace without actually being a part of it. (2:36). It's not going to be overnight we have a lot of work to do. It will be nice to send one to President of Ghana as they have already signed the Peace Treaty in the presence of UN Officers in December of last year. How do you feel as KF supporters and having achieved this. Rick wants to show Libby's drawing .. why not we are celebrating. How do members of the EC and UC feel about not having voting rights but signing the nations into peace. (2:40). Could we have members speak. Mary speaks, thanking all the members. (2:43). Caroline speaks..
(2:55).
(3:00). We set out to achieve what has taken man thousands of years. My wish is my command, I wished peace for decades, after 50 years we see it on paper. When I was 8 or 10 years old the Vietnam war was going on and the news was always how may Americans killed how many Vietnamese, and I asked my father many times, why are these people killing each other, what was wrong with Vietnam. I finally came to the conclusion that these guys went half way around the world to enter something that had nothing to do with them, to interfere with another persons life and ?? and this should not be. (3:02). And I considered the Americans as invaders and trying to enforce something that has nothing to do with them. I could not understand this aggression, until I came across Americans that came to Iran from Vietnam, and I realized that killing is part of their nature and it doesn't suit mine. I came to understand that the blood of the man (American) from that continent has in it the blood is the only way. This is one thing I could not agree with and that is why I refused to take the technology to the US because I knew that it would be used ??, in my childhood I have seen the vibration of killing in children as young as me who were coming with their families from Vietnam. This is why I never could agree to transfer this T to Americans, because I knew it will become another and then another (war). Now you understand why I see a problem with the blood that has mixed on this continent, that sees nothing but to murder. Strange enough we don't see it south of the border with Mexicans or North with the Canadians. In my belief and understanding that I have to always choose to go the correct way. I believe that the only safe option is to move the technology forward, is to put it into the hands of leaders who are peaceful. It is somehow the mixture of the mixture, that has lead to a very bad mixture (of blood), and we have to stop this process (of the bad mixture in American blood) is to sign that we bring an alternative and new way to agreement and concept peace. In a way we have to forget the past, or forgive the past so we can go ahead into something new (3:05). We can change a lot of things from now on. We'll continually report on the developments which we take towards peace. 12

(3:07).

(3:10).
(3:12). We have to have an agenda for countries that want to come to peace, we have study each country and find an agenda for them to follow towards peace. Keshe Foundation Manufacturing will invest in each nation that comes to peace.
(3:14). .. I needed the mandate of this world peace treaty to become One nation that I could build on, and now I have that mandate and KF can work on it. ... the EC will have to approve before any decision is made. We have massive amounts of finance available to us and we'll use it in an appropriate way, as we said T for peace, we deliver the T, the job and the security, in exchange we ask the nations to sign themselves to peace. We have 20 to 30 nations that are heading this way for us. My wish was that no World Leader will sign before yesterday and I got my wish, because now everything will be on the terms of the EC and UC, and on the terms of peace, and this is important. My team close to me is aware of these investments and ... (3:16).

(3:18). ... we were told the ex-president of the US signed the Peace Treaty but he has not acted on it, we are told a number of presidents will sign the peace treaty in time to come. But we have to govern from one nation, the governors can govern but there are a lot of problems in this process. ... A lot of structure is set to create fear and war and with it to create arms. They create fear and then with it comes a beautiful thing, a red box, these people who come to create war walk into the offices of the Prime Ministers with suit cases of promises of cash in their private accounts. Al the Military contracts come with payments to the world leaders. This is where it has to stop. (3:20).

(3:32).
We are back to meeting every Thursday.
End

184th Knowledge Seekers Workshop - Thursday, August 10, 2017

(,)

(:11). Since last Thursday when the peace was signed, a lot of things are getting moved to bring the One Nation, One Planet, One Race. The official site will be: onenation.org, for announcements and the EC and UC will put out their mandates. None of the members have a voting right to put out something, only the best wishes or new wishes to be announced. We have asked them to draw up a charter for One Nation Planet for all being including animals and beyond the planet. Peace is the guideline. It will also include other (off planet) races that are a part of One Race, One planet. A number of things are taking place in the background. All KF websites named for countries they will be put in archives. As One Nation we can't have KF Germany or any country. It will be by language. This is important because this is how KF will be run. (:17). We will use the symbol of poets and poetry for the languages. Nationalism has finished. Any workshop will have to go through the KF.
(:22). No public media will carry KF news or about the Peace Treaty, so we will carry on our own.
(:31). There is an important development in the KF structure now that we have become One Nation, we have separate the worldwide into 2 groups, the KF Chinese is so big that

we'll separate it but under one roof. The whole of the Chinese groups, companies, research, we call you all to bring all your expertise within the KF in the next 10 days. People involved in Agriculture, energy, product production. get everyone under one roof , as KF Banking system. (:35). Please we want to bring all the Chinese groups together under one roof. We are looking at what you made but your knowledge that you can teach and spread the T. (:39). Now for the rest of world. Write down where you are from and what you have done. In the coming months we will put billions into the market to get the KF going. In Africa we have moved out of Atomic into new failities in the next few week.
(:42).
.. all the new technologies will come out of one organization and spread across the world.
(:46).
(:49). The court case in Belgium has turned up exactly the way we wanted it. One of the lawyers from US asked me if the judge was a supporter, I asked why, he said everything has turned out the way you asked , it's legally structured to do what you wanted. We thank the judge for the judgment and what the Belgium legal authorities have passed on the KF. They have given me 18 months suspended sentence and Caroline 12 months and a fine. If we received less then 12 months we could not take the case into the European court of justice. Now our lawyers have set up for appeal and we can bring the case of assignation attempts for the people around to the European Court of Justice. (:52). Because we submitted the evidence and it has been put in the case and we have the freedom to what we wanted in bringing justice to KF and what they have done to us. Thank judge for accepting the 1 euro from (DL) now we can open the case for pedophilia and indecent exposure to children, and we have his own statements claiming himself guilty. It has gone in the case and we can pursue them. The same in Ghana with the Minister, we have gained a big support in Ghana. We thank the police officers who through their corruption allowed us to register the case and now we can pursue the assignation case in the court. (:54).
Shows photos of the C certification of Alkalizer and 2 health cups for this Mr. Keshe was given 18 months sentence as practicing medicine, but this has nothing to do with medicine it is environmental, so now you see how the Belgium's got themselves into a mess. These are not medicine but environmental changing. If this is a criminal act then all of you have to go to prison for using and making them yourselves. This is how the case has collapsed before we even start. The evidence was given to the judge but he decided to ignore it. (:57). The European court pf Justice will not ignore this, now the judgment will ?? flow massively. This case is completely set for us to win and we'll go that way. We know this case was set up deliberately to damage the KF and we'll claim 20 billion dollars damages to the Belgium government and we'll freeze the assets of the Belgium government across the world once we get the judgment. We know what we are doing. They have discredited and damaged the KF beyond (measure) and we'll take our position in that respect. It will be huge and take 3 to 5 years to get this through the court. And we have protected all the KF across the world with this case. If these things are criminal, I will give the addresses of a number of world leaders, ambassadors, heads of state who have used this in the background. They have immensely benefited by this and we'll bring them to the court to give evidence. (:59). We have pictures of intimidation by a king to

take over this technology, and when we didn't give it they have attempted to kill me. All the intimidation started from that point when we refused to give.
(1:01).
(1:03). Giovanni shows the progress of Naomi, the changes in the past 2 weeks is amazing. (1:05). Shows x-rays from 2016 July 6th. The hip broken in 2 pieces. the doctors said the amount of pain killer needed would kill her
... the pain pad takes the pain and tension from the muscles so it moves into position. (1:10). The doctors felt there was no way to operate because of the broken pieces there would be no way to stabilize it enough to heal the bone. But with the new technology, the pad had CO2, CH3 and CuO2 allowed the muscle to relax and the pain to disappear or reduce in a way that the body can start the process of healing, or to mend itself. In the science of bone fracture, if the operation doesn't come into operation in the first few days when there is bleeding, the blood brings the chemicals and materials and Ca for the bone to start to mend, then it takes a long time to bring the fracture to join together. With the new technology it relaxes and bring the muscles and bone to near normal condition, then it allows the right amount Ca comes into position, it doesn't consider it a breakage that the body has to support, it considers it the normal growth of the bone, our bone changes all the time. It takes 6 to 12 months for a hip like this to grow normal bone, it takes that long. He has the photos of that and her walking. (1:12). She is in the hospital and under the full care of the doctors, they know exactly what is going on.
(1:15). We can see that the bone has mended, this is impossible in the present world of medicine. Giovanni you'll get a jail sentence for this in Belgium, 20 years in prison. Shows video of Naomi from a few weeks ago. (1:18). We see that she is coming back, to be able to move her tongue. In the past few weeks Giovanni has made new systems and she has not lost her memory which has been confirmed in the last 24 hours. The massive brain injury has all been repaired. The latest scans has showed drastic change, we expect full recovery in the next 6 months. They will start to orally feed her. This technology has been given rights to operate in 2 hospitals in Europe. (1:21). Two hospitals are opening a KF Plasma sections hopefully by September. They will offer as part of the treatments they offer their patients. This happened about the time of the water certification in Ghana. These all add strength to the knowledge. Those people who tried to make the technology illegal will find out that it starts to operate in the hospitals. I am getting a lot of complaints in the background that we are insulting Belgium's. We are not, there were a number of people in Belgium who were looking for financial benefit and they will not benefit by it. And all these court cases are coming from Belgium. We are not against Belgium's they were the first people to use the technology and benefit from it. I will go to prison for saving Belgium's. I will not step foot in that country ... I don't apologize for the Belgium's, we served them well and many stood by us. (1:23). We have a number of rogue people who are in charge in the Police office or in the Palaces. We don't insult them a few bad apples don't make the whole cart bad, that is there problem they have to sort it out. The nation has to be aware of it.
(1:29). Giovanni shows photos, for 1 year they didn't do physical therapy on the mouth because they thought she will die, this is the problem now. She writes Fabio, she wants to know what happened to him. What is important she has full memory the first time she can communicate she remembers Fabio. (1:32). (1:34). Video of first time in 1 year, she

writes. (1:36). I prepared a special helmet with Gans' and she immediately changed. She can walk.
(1:54). The main thing you continuously used the ZnO2 which elevates the soul and keeps it in its position. I prepared 2 different kinds of Zn, one is normal, other is from brain. Giovanni is registered as alternative doctor he has certification. It is important to understand the knowledge in more depth. In the coming weeks we'll open the space knowledge deeper. We need to understand how they are joined with the soul. (1:57). WE produced the Zn Cu Gans but we didn't understand the position, the field effect, the understanding of interaction. The next step in the knowledge is completion, cohesion, and comprehending the totality of the knowledge, this is the key point for man to survive in the deep space, the space is not a hostile place. 58 03

(2:05).
(2:10).
(2:17).
(2:24).
(2:26). I told Caroline many times that we come to physicality because of the pleasure of it, the beauty of the mountain, the sound of the water, the touch of a lover, the smell of a flower, because here it allows us to understand the dimension of physicality, where in the space most of these things don't exist 24

(2:29). that it will lead us to the creation of manifestation at the point of destination of where we wish to be. 07
... I can feel my soul, and it expands to the universe ...
intention brings physicality, feeding has no physicality ..

(2:32).
.. many leading world scientists are grasping and understanding my teaching ...

(2:37).
(2:40).
(2:42). There is something very strange on the back of an American note, "In God we trust". Try not to create tools to confirm the strength of your E, not ways to expand your soul, try to understand the operation of your soul then you don't need any breathing system, of holding oxygen and everything else. Those who go this path, it means they have to understood the essence of their own creation. Did you breath in a special way that you grew so tall in 10 years? Or has your breathing operation has been always constant since the time you were born, so breathing has nothing to do with it. If you become a marathon runner who breaths so much compressed air, do you elevate your soul? Now you understand how these methods are just myth and the lack of understanding of totality. If breathing so much makes you spiritual we should see a bunch of Marathon runners as gods running down the road everyday. (2:44). The soul of the man is the creator of his physicality. The way we choose matter to create Gans, to get energy, then it became the center of our systems, now we understand that the center of our system is our soul, which is the feeder of our physicality, and the physicality in itself continuously by the conversion of the Gans becomes the feeder of the soul, through the environment of ??

That is why sometimes when you go to certain places you become very spiritual, we feel very conditioned that our soul is touched. Look at where they built the building, that the field in that environment creates the field strength, and if you drill and test it most probably has something to do with the Magnesium and Iodine existence which is the ?? elevation of the soul at that point. Very soon the scientists that gather that knowledge will to places like the Wall in Jerusalem, they'll go to the holy temples and measure the strength, it'll become a new science. Then you'll understand why in certain places we feel this, or why in certain places we more likely fall in love, why are we more likely to fall in love in the Spring then in the Summer or Winter, isn't it the continuation of the vast amount of new flowers that release so much fields that part of it is the strength of our souls. (2:46). Now we understand how even the environmental condition receives and effects our soul. So can we create that condition that we always have the "Spring" regardless of where we are? Yes we can. But now we have to exercise ??(discrimination), we have to understand another (type of) soul, become blind to the physicality, that the walls don't exist. Now we understand how advanced the understanding of the life has become to Giovanni, he (got) that through the expense of his daughter, that finds the operation of his soul. Teaching this is not easy, but those who stand around us get inspired, and then start teaching, and then man become non-dimensional and non-physical. Any questions? (2:48). Those of you who are members of the UC, EC, Core Team, supporters of UC, people connected to the KF in one way or another, and you communicate on the lines or different channels of the KF, you know each other or you never met, or met before but you are in position of "transformation to understand", try to create communication to the soul of each other, try to expand the dimension that lines of the computer has no relevance, but you can use that to reach the other at least try to start, that "I want to give to you from me what you need, and then you feel what they want to give", (2:50). and you can asks each other, did you feel this way at such and such a time. In this way you'll start expanding the soul, exercising how to expand the soul, but as I said you have to learn (how to do it). You can create a condition with soul, because it is the "Sun", and anybody who understands this, you know how the sun manifests itself as a dust in the space and becomes part of a planet, so it gives itself material, physicality to the higher the man. Then see if you can do that through your soul in respect to the others. This is the way we become One Nation. And strange enough, many of you, and I'll tell you in the time to come, you start on the way to give to your friends or to be there, you understand that you are giving and not taking, to please the ?? company, yourself. You interact with the other soul who shall in the same position and need, and you speak to another guy in a chat room, by the way I was trying to go to another place but I was feeling that you needed me, or can I give you something, and he says, how did you know. Because in this way you start expanding the dimension of physicality to include the non-dimension, and then you come in touch with the soul of the totality. But don't forget you cannot take, and the only way to give is to give for the pleasure of elevating another, and not to give for yourself so that you can hear from him, or will he tell me what he feels. (2:52).

(2:56). ... the KF will invest in those who want to manufacture, but we are not here to make "Bill Gates" of people in their country but to share the wealth evenly across the nation.

(2:59). Q: ?? Some years ago you were teaching us to use the soul to change the physicality and I think I did somehow, I could feel pain in my hip, it felt like M as when playing with magnets. I am not there you are inside your body I don't know. Yeah but I think everybody should feel it similar? Not really. How do you feel it? I don't feel, I know. It passes the feeling of the soul, it's a different way of understanding and feeling the others, I don't feel. It very much goes in the deeper sense of a ray. (3:01). The level of interaction is on how you want it to be, and then you feel it and find out if it's right or wrong. And it becomes very normal, you feel and the others feel what you feel, and it happens very strange, we had it yesterday, I was not feeling comfortable with the situation and I explained it, and within a short time the subject was raised on the other hand (side) that it could be sorted (out), it comes when the soul feels, you don't need to talk, it is already getting sorted out. It is only spoken so that you know that is done. (it's very strange because you can feel it, it can move but at the same time it doesn't move ??). Yeah, it's understanding. (so can you control something in the brain with it?) It isn't in the brain. (??) it depends how you control it, the brain is just a M field vessel containing the soul, which is a source of. (3:03). (yes this I understand, because you said you have to release energy from the brain out to the soul) Yeah you have to practice. (??? how to practice, in what direction to get to this channel? I understand that I have to make the channel so the energy goes into the channel,) You learn by practice. (How did you do it in the first time?) I don't know, I always had it. (Q: How can I best connect to my soul without being blocked by the filters of my emotions?) You have to overcome the emotion, you have to understand if it is the E of the soul or of physicality, because the soul also has E. But how you feel and in what respect it is important. (3:05). Don't forget, "I made man in the image of Myself". We have related everything to be in physical dimension, now we have to understand to distinguish whether this E is from physicality or the soul. (There are 2 different types of E, I thought all the E) No there is only one E, but you have to understand from its strength where it comes from, is it filtered or not. The physical brain is just a filter of the energy of the soul. (Okay I'll see how I practice). It doesn't need practice you need to understand you need to comprehend. When you practice you put a matter dimension into it, then it is not your soul, then you are working on the matter strength of your soul and not your soul which is much higher then the matter state, because in slowing down or in loosing its strength it becomes matter strength. (you said at one point you did it and I wanted to see if I had a similar experience to relate to) Exactly. thank you very much. (3:07). Q: before you can go to the level with giving, we work on giving until it comes ??? it takes time to get ready to create or get in touch with the soul without breaking the body to pieces. I would like to get in touch when you are in Theran, we welcome Iranians, we are negotiating whether we can give a public lecture in Theran. All our time will be tied up with the authorities. The dates are not yet confirmed. (3:10). This trip is not in my hands. At the moment nothing has been booked, it might get canceled. Thank you, I wish all the joy for you and your family.
END

185th Knowledge Seekers Workshop - Thursday, August 17, 2017
(,)

(:11). Universal Council member talks about peace. (:20). speaks in Bengali.
(:26). Keshe talks. In the coming time each member of EC and UC will have their own offices to meet the needs of their people. (:28). Quantum has reached the satellite condition in the flight system.
... control of SS through thought, emotion and soul, ...???
(:36). NASA has moved into Pl T for their rocket propulsion, the next step for them is to join other world leaders who have broken into Pl T through MaGrav and science technology, and zero time flight. They have to join the world peace, this gives the present governments a chance to step down for world peace. Which means governments have to re-negotiate their way for peace. The flight time comes now, from Moscow to Washington in less then 10 minutes. This is what we said when we met with American officials years ago, when they asked me how we managed to capture this and that, we explained, that we cross the nations without them knowing what we are doing. Now we see 2 or 3 nations are on the path to achieve this T, the true essence of what is developed and available. From now on our teaching will go to a very advanced stage because (:38). we have to teach to support the nations that have reached that point. For many this may sound too advanced but this is how your nations have developed. We are responding to the scientific demand because we have opened a channel, that many scientific worlds can understand. In the coming time we'll explain more as we come into agreements and arrangements on how to disperse this knowledge. As it has been announced last Friday that MaGrav systems have achieved flight to satellites. Now it will take rapid steps to be used by a number of nations for their advantage in T. Our agreement is to delay 6 months of any joint achievement disclosure. Which means that which ever nation we work with no T will be released from 3 to 6 months. This is the agreement we have and the nation will take the priority time, and then the knowledge will be shared. This has to be this way as they are investing huge amounts of efforts into this kind of developments. We have to understand that the process of change, the work of the Pl through the soul has become part of the need of the present space T. (:40). Because the present atomic systems can't handle as we explained before. .. us as totality can follow the procedure, this is one of the most important parts, that our scientists can follow the procedure to be successful in launch and in control and at the same time in reverse operation to return back. It is very easy with these systems as we have taught before to enter a departure, how to return back. it is vital that we understand this process fully. We achieved it in a very easy way, because many of us were not aware of ??? (:42). The whole structure was to achieve lift and motion, but when we want to turn back it's a different ball game. ... people were loosing balls from their systems, how it has to be treated as one step before you takeoff. You have to plan your whole system in organization of space travel. This goes to the agencies that are advanced and have moved into the space travel. When you achieved zero gravity in relation to the mass, you have to calculate a slight deviation from a slight different central mass a little more field G then M. You have to add to your system a system of limitation. So if you set your limitation to 1 million km then between 0.9 and 1.1 you'll find your satellite position. (:44). You have to reverse gap MG field to where you launched it and you'll get back, or ...

(:58). In your flight system if you don't add the 4th core dimension, the emotion will not be counted for, then you have to decide what you load in the 4th core. The dimension of the space in the reactor depends entirely on the sincerity of the soul which dictates the 4th core. This why I said, we trust to give our souls to a captain where we know it will be correctly nurtured, looked after and trusted to be given to. The space T on the level of the E and soul is totally different then getting into a craft, you become as part of it because the energy you have put into it, the soul, becomes part of the operation of the balance of the existence of the man in deep space. To those space agencies who have moved into Pl T in the space travel who have been taught by us in the past month and now they have tested it, our point is one way, try to get your satellite back. But you should have planned it the way I explained before you depart. You always have to create a point of reference that you can always manifest yourself and dictate back to the position of the travel, or dictate the position of the arrival prior to the departure that at that point you set up a new zero point departure. Those of you who have achieved quantum flight in the past few days, (1:00). you understand exactly what you have to do to bring the ?? equation of the control under observation. I know you are listening. This is the part you should have decided before departure. 18

(1:03). Going back to the normal teaching, Those of you who should understand the normal process of the reactors. The control of the speed of G and M conversion of one to the other will become the cornerstone of man's flight in the space, of creation of energy, production of material, reversal of material, of being able to cover vast environments through your wish, through the operation of the reactors, which have been given and have to be allowed to create transportation in the dimension of the strength of the fields. 55.

(1:13). Questions.
(1:17).
(1:23). How can I test the strength of my soul.
(1:25).
... try to become detached from your physicality then you'll understand, but don't go and kill yourself, (1:27). but understand that the soul is free, but now we know it is within the space of the man, ??? line of connection, that is the test. I hope we can teach more and more people in an advanced way of knowledge of the soul. (1:30). When the SS is manifested what happens to the physical structure of the reactors? I heard you but try to answer your own question. ... if you re-phrase it and try to understand it, we try not to spoon feed but to enlighten. Where do you see the problem. This is a good question but I'll answer in a different way. The container core matter state is irrelevant, it's for man to see and think, because I put a core in there then the fields are going to be in it. The Pl carries its own strength and its own dimension. The physical matter state cannot contain any Plasma. The whole structure of the Pl is only for satisfaction of the man's understanding that he has something (1:34). somewhere. The containment of the Pl is dictated by its environment that's why I said you go to the 4th and 5th (cores). These ?? metal cores that I put there are just what I call a gimmick. because man has to have something to confirm that he has done something. (It's like a scaffolding to create the form then thrown away). You have to learn that the wiser we become in the teaching, you'll find out that there is no way to contain the Gans', or the Pl, or the field of the Pl, or

the field of the Gans', by the physical matter state, a container of a glass or plastic core. The field Pl matter at a matter strength is so low down in strength that a ?? can't contain it, so is the level of the brain when you understand that there is no physical containment, the only thing we think we have a skull, it's just because we have to feed the production of the cells that filtering can be made and maintained that the E can be felt in that point. The reason we have the skull is just to see (1:36). how fast we can produce cells that in that point can create such a filtering field strength that ?? manifestation. No other reason. Now you understand when they say (about me) that he goes into ethics and soul, that the operation of the ethics of the soul is the cornerstone of travel in the space. NASA scientists said, we support him if he doesn't go into theology or talking about God, now you understand that talking without it you can't go into space, because you go with your own soul. It is the operation of the control. They can stay at that level and we that those scientists are falling far behind in the space race, beyond imagination, so far behind other nations that are involved in the space Pl T that we teach. Because they are still looking for the dimension of physicality so the speed of light becomes a dream that they never be ?? NASA is falling in that trap very rapidly. They paid 10 billion to the Russians to find out how to land on land and not the sea, this time they'll have to give the whole of their national assets to understand how to travel without a system of control, the computer. This is how the space gap in the knowledge is building up, and we sit with those who have more ??? dimension with our teaching. (1:38). Understand that a glass, plastic, ceramic ball, has no match for the strength of the field of the Pl. If the Pl of the sun can pass through millions of km and then pass through a dynamic containment field Pl of the Earth and it still reaches then we understand how we had to show you the containment of the Pl with the plastic. This is the way you could understand as you said, if you ??? gradually ?? the field of the Pl in the reactors you create is controlled by the dimension of the strength of the soul and by the fields which you enforce around it, so there is no need for a core nor a motor. 58

(1:45).

(1:50). A man made contact with the people in South Sudan and they are interested in Keshe technology and want to bring it into their university of Juba. (1:52). The interesting thing is universities around the world are getting interested in KF. The KF is investing several billion dollars into Africa in the coming time to change the situation. (1:54). Please establish a core team in Sudan that we can work with. (1:57). Q: Do the animals and insects have better control over their emotions then humans? Yes because emotions are not the way we understand it, but the strength of the soul is, the pain and fear exist, the laughter and that kind of thing doesn't exist, so it's concentrated on 2 or 3 emotions. The man died from fear of freezing to death and he did. Yes but you have to understand go to the start of flights of British Airways from India into London Heathrow, it still happens now and then, when it takes off from India, people used to sell space in the airplanes wheel well, and every now and then when the wheels would open up over Heathrow a frozen body used to fall out. (1:59). This is part of the British aerospace history, years ago a guy traveled that way and actually landed alive, he wanted so badly to greet England, his only wish in his soul was to get to England. The English court gave him the right to stay, the judge said if you went through such a thing to get here, you

deserve the right to be here and he was given a British passport. .. their wish to reach their destination, so the fear which is one of the first points of life that we let go, it raises its strength to joy, which has a higher energy circulation in the body so it feeds more, it's a giver. Whereas fear is part of the strength which takes, but joy which is a giver, gives for itself, to the cycle of the human body, this is why we survive with the joy. Some people who survive convert the fear to joy. It happens if your ?? destiny (2:01). or what you want to do, in emotion is stronger then your physical condition then you achieve it. I can tell you first hand, it's not as a fear, it happened to me a few years ago when I fell off the horse and broke some bones, to me I had to do things so I just got up and I started walking, because to me I couldn't feel any pain from the broken bones, I knew I had to do things and I was walking through the bush. This is the problem when we go to space, if man realizes that in space he doesn't need that suit to stay alive, then he doesn't need that suit. He won't strap himself to a rope or satellite or to a system. The fear of being lost in the space is the cause of the death of the man, but when you settle down and nothing happens and the fear goes man won't need the suit. Don't forget our body is made of Gans, and the Gans can't be ??? forced, we can slowly ?? motion for it but the body can't die. (2:03). Man in the space will never die. It is impossible to die, unless the fear, that we receive so much and we can't give, in a way we explode. A neutron exploding into an electron and a proton. Absorption of the energy from our physical part of fear is the cause of our demise and not the condition outside. If you have been through the processes of escaping from a country or being under pressure that you have to find a solution to survive you become stronger because of the energy you absorb which now you can reflect to come out, then when it comes it creates a new aura, a new dimension, that's why we become stronger through the conditions of the life we live. (2:05). I made a MaGrav and its fields have emotion. He shows the photos with some foggy energy. Video shows the rotating fields. (2:09). Can you see the fields with your eyes? No just with the camera. One of the ways to do it is to create moisture on a glass you can see the shape of the fields when it freezes, this is the way more and more people are showing the fields. These fields we can fell them. AZ is developing new ways to feel the fields. He shows how he is making H Gans. Shows the production of H gas. (2:14). There are different ways of producing Gans of H, ?? creating it is easy but making it so you can use the Pl of it in the space program is the key now. Yeah. being able to hold it on that you can expand it to Deuterium and Tritium, which becomes the cause of the dynamic rotation fo the MG fields of any entity, even the sun. In the sun you don't have Helium or the creation of fusion, the combination of the field Pl in different strengths of the H in respect the D and T, and atomic H creates that flow which the highest order becomes G in respect to become the highest giver, and then you find the transition into the dynamism of the Pl of the Solar System. He wants to show his Tesla coil. (2:16). it works with a MaGrav. Let me give you some advice, there are 2 options to minimize the system, first is N coating transfer of energy so you can go into kw and megawatts, with N coated wires you deal with a superconductor, so you don't need a bigger structure to be able to handle (larger amounts of current). Secondly, especially if you are using the Tesla system, you can use the plasmatic G field of the Tesla system to increase the power without changing anything in your system. If you have understood it you can actually create a power unit of 30 kilowatts. Actually you can miniaturize it, ??? because you are producing more then you can handle this way. (2:18). I need a bigger place to do the testing. I want to mix the

Tesla system with the MaGrav. Many people have done this, it leads to generation of power, but you have to understand at which end of the Tesla system you are working, but understand the work of Miles also. You'll produce much more energy then you expect. Miles was a beautiful scientist because he works on the reverse of it, as we say the G is much stronger then the M. If you understand the work of Miles and put it in line with the MaGrav system, and change the Tesla coils to N coated materials, then you'll understand that the work will become very much nicer. (2:20). A Spanish man gave his patents to Spanish government, to produce huge amounts of energy, he use N coating, he is already working with the governments. A lot of people are mixing the T and seeing huge results, this is how it should be, we support these kind of people, the point is the knowledge is a gift from God it should not be owned or patented by anyone. (2:22). What has to be understood is that these people make a breakthrough in a very narrow part of the T in a very narrow mind, a narrow field of the T. If you understand the totality of what we taught everything we taught touches the life of the man and the U is in the teaching. Some of us become good in medicine, others in energy, decontamination, but if you understand what we have been teaching this T touches everything in the life of man across the U or any ?? The knowledge is so comprehensive that it takes thousands of years for man to understand fully or if they ever understand fully the totality of it. So it is nice to see people come up with different developments, and people have taken the shackles of limitation off ?? the patents, they are mixing it, they understand the concept from one group to another, they reach huge developments. When I see the governments using it or they patent it to get something out of it (for themselves). It shows that the knowledge is dispersed, it's well understood. I want you to know that when I was recording my work with the Tesla and MaGrav systems in some places the sound is entirely gone. Yes we know that. (2:24). and the telephones loose their ability to respond to the commands. I have to tell you, this brought back some memories when I was testing in Theran, I had officials knock on the door and say that whatever you are doing we can't make any landline or telephone calls, can you stop the system, we are talking a structure 60 meters in diameter a spherical building. In Italy a man walked across the garden and in some places there were silent pockets. You create a field that is in balance with the field of the noise of the man, some spaces become balanced so you don't hear anything. It's the same when you can't see the object, it is at the strength of the vision of man, the object is there but you can't see it. There is a spectrum that we don't see. thank you for sharing knowledge. (2:26). He shows video of the tiny fly in between windows on airplane, it freezes to -50 when in the air and thaws out and starts moving when you land. (2:28). The KF manufacturing is expanding worldwide, a meeting has been called for 21st of August, from 42 different countries, 123 applications have been received. We'll invest in minimum of 1 per country. It will be prefabricated setup factories. It will be certified as we are partner and you don't have to worry about that. (2:34). I think many of you will be pleasantly surprised by the develops worldwide and your wishes for peace are bearing fruit. Rick sent message that the top American Military personal are issuing condemnation of white supremacist groups in wake of Charlottesville unrest when Trump failed to strongly condemn. The Ministry men are there to support peace, they are not there to create war, it's the politicians who create war. Send the World Peace Treaty to the heads of Military because it is their job to maintain peace. Don't forget many militaries do coup d'etat to enforce their way, maybe Militaries will join with and enforce the peace.

(2:38). They'll greet it with open arms. We show the advantages of the new technology. There was an earthquake in China, this is part of the plate movements. The continents are floating on an ocean of magma. (2:40). and the magma is floating on the plasma of the planet. The separation of the South and North American continents has been going on for millions of years, and is coming.
We are putting the court case through, I will not speak about it again in the teachings, we have opened other channels and legal council to protect the KF from this appeal, and won't discuss the case anymore. (2:43).
they end with photos and music ...
END

186th Knowledge Seekers Workshop August 24 2017

(, There is no method for me to teach you how to strengthen your emotion you have to find the path on your own if we take a wrong path we have to come back around again to the right path, We don't admit that I took the wrong path instead blame others, , we can't do it though meditation we have to understand how the reality works, The amino acids are made from the gaseous part of the planet and from that the soul is made, Emotions are field strengths and how we barrow from each other to balance and this is why there are no wars in the universe, How the field forces create rotation of the planets and the Solar Systems etc., Making an imaginary spaceship that is not imaginary, Using Gans water in plastic bags to heat house update, Loosing weight with Chinese high temperature wok cooking turns it into Gans,)

(:11). Organizing Chinese KF and in Africa.
(:17). Alek was attacked but is back. The membership of the Universal Council is for life as long as you can serve. It has been misunderstood it is not for 1 year. There are different circles and members are rotated yearly out of the center seat. (:21). We are moving rapidly towards One Nation. The charter is being drawn up and has to be connected to the soul of man and in that way is connected to the whole U. The UC stays at 144 which means the 12 become part of the 12. The Russian member withdrew as she felt she was unable to serve that seat in now open. (:25). The rays of the sun in interaction of the fields of the Earth leads to creation of light, in different shapes or forms the interaction of the 2 fields from the sun and earth leads to creation of matters being H, or H2O, N or any elements, this is what we never understood up to now that most of the materials that lands on the surface or ?? within the atmosphere of the earth is ?? by the MG field of the earth and partially by interaction of the fields. The field strength within the structure of the Earth, and the field strength between the sun and the earth has lead to the creation of physicality and the content of the matter within the planet. Atmospheric gravitational field forces. (:27). The field of the sun is not just on one side but (radiates) in the totality, so when the fields interact with those of the Earth it dictates the physicality of the Earth. The physicality of earth, it's presentation is dependent on its soul, if we call the soul of the Solar System to be the Sun, the interaction of the fields of the soul and the field of the Earth has lead to the manifestation of physicality of the Earth itself, this is what it dictates to have, it wants to have Cu and Zn in it but due to its MG field strength it doesn't want other elements, so this is important for us to understand in expansion of the

knowledge that the interaction of the fields within the structure of the Solar System has lead to the creation manifestation and of physicality of matters in the structure of the Earth. If you go a strep further and repeat the same thing ... if we place the Earth as a MG field and we place the soul of man, the interaction of the physicality of the man which shows itself with 2 legs and 2 arms is dictated by the interaction of the fields of the soul in respect to the fields of the Earth that is why in every creature on this planet (:29). we see the same configuration of brain in 2 halves if you have Cu in you, Mg in trees and branches and everything else. The soul of man with the fields it radiates with the interaction of the fields of the sun and itself leads to the creation of the physicality of the man. So now we understand why we physically look like this because we follow the same pattern, the same goes if you follow the fields further up, the same goes in the galaxy and its interaction with the sun dictates the shape of the Solar System, then from the galaxy to the U it gives the shape of the galaxy. Then we understand that our physical dimension is dictated by the field forces of the planet itself, we have 2 arms and legs this is the conditions that fits, then when the man reaches the soul and understands it in the dimension of the traveling into the galaxies or into the universal condition, then when you come into another (:31). condition of say planet A, our soul is still the same it hasn't changed but now in the dimension of the new field strength it might need manifestation of a different physicality. We have the same with the same interaction. This is how our physicality changes according to the position where we arrive, and the wish of the soul of the man. This is fundamental for those who take into space and understand the knowledge of the creation. this is how in all the teachings of the past we explained that the manifestation of physicality is dependent on the point of the field strength as the soul decides to manifest itself. Simply put the soul is the same but the environment that has changed and with that we manifest ourselves in totally different ways in different areas according to the ??. It's very much like water it's the same H2O whether in the freezer as ice or as steam in high temperature on the glass of a window when it's cold outside, or water at room temperature. Now that we understand the soul as a condition of Pl, in space we don't carry physicality as let's say the field in A (:33). ???? is a vapor on earth, we want to manifest not as a vapor but in a way the creatures on that planet can see or manifest themselves as, birds, fish or breathing between the 2. We have seen this with the birth of the man in the womb of the mother when he leaves the birth canal to enter earth's atmosphere. this is important for us to progress into, now it makes it much clearer, (:34). why we'll manifest ourselves according to where we arrive. This takes the fear out of space travel and gives strength to man that he decides, at this point I don't want to be manifested, first I want to see how it feels to be in a dimension of fields without physicality between the galaxies matter state of stars, or I want to see how life is in a given condition that is only liquid. In the coming time we'll show this in tests. As I said we have committed the KF space program to the Chinese government, all these tests will be done in collaboration with them, creation and manifestation of life in the deep seas, in atmospheric condition and below and above atmospheric, so that gradually we gain confidence in our presentation of physicality being dependent on the conditions at the point of manifestation. This is why we see entities in motion in some photos from the space agencies, but we don't see their physicality, but if we were at their strength we would see physicality, but we only see the aura of their existence. We have shown these NASA videos taken from deep space or from space lab, where we see shapes floating,

(:36). but to us we don't understand what they are. We don't see them because at that point we don't carry the strength of what they have at that position. It's like the birds, if the man wishes to carry the strength of the bird he can become a bird. It's because we are afraid of this, but now we understand the combinations that lead to this phenomenon. The mutations of the elements is not just the elements it's the manifestation of the combination of elements. This is why we can become whatever, according to the strength of the soul. When we look at the soul of a fish, a man, a bird. A man can acquire the soul of a fish or bird. It's our lack of understanding that has created this fear and not being able to. Now that we open the space to man and his understanding of his own soul and that he can change his manifestation. We can also do this on this planet, it's done by gaining strength in the knowledge. If this technology is fully understood it opens a new dimension for the soul of the man and becomes part of the soul of the totality of the universe. Then man becomes the man of peace and those who reach this level will understand how progressive the man (:38). has become to join the UC. As we said many times that when we take man to space we take him as equals and not as subordinates that he doesn't understand the totality. The knowledge has to be spread across the strength of the understanding of the man. Some still walk others still ride a donkey and some go by jet plane or car, nobody has said anything is wrong, it depends how long you want to be on the travel from A to B. You can still sail the seas in 80 days or do the same in 10 hours. Now man has the knowledge to acquire the strength of his soul and in that he decides the manifestation of himself in the dimension of the strength of the physicality of the point of manifestation, how would we like to manifest ourselves. We took you step by step to understand, and now that you understand the ?? MG fields in the womb of the mother leads to creation of the soul of the man, and now the soul dictates the physicality a knowledge that has been missing in the science of the man. The discussion is not when, but it's on the level of the maturity of the understanding the totality and the ?? The knowledge is there but it is for how to decide how we want to proceed in this process. (:40). There is something in the teachings that you all have missed. We taught that pain has a M and G field strength that in our brain recognizes itself as pain, the same with joy, pain, love, etc. it has a MG field that is a strength point at the level of the soul. This means that we decide in the processes of our brain. He draws a circle with a small circle in the center, if this is our soul as the field comes out it has a given strength, when it interacts at a particular section of the brain we recognize it as pain, at a place nearer to the center (soul) we recognize it as joy, at a place even nearer to center we recognize it as love or giving because it is closer to the soul it touches the eternal part of the man. One thing we have missed, thoughts have a field strength, what we think, itself has a field strength, (:42). Then the deeper we think, the more we understand about the strength of our thoughts in respect ... the closer we come to the soul strength, then at that point we all come to have one common denominator that we all reach, then we can communicate from soul to soul. This is what we call Zero Time Communication. For instance, this is the time that when you are in pain your mother or father feels it, because the thoughts are so deep that it touches beyond the level of love, which is the level of thoughts which are closer to the soul. And at that point we all have one common denominator, according to the AA of this planet which created the soul of the man , then we reach the level of Zero Time Communication. When this happens we don't need to talk we can feel each other, then we can understand why so many prophets in the past became so close to their soul

that they came to touch the other peoples souls, because they felt the pain and through it, it brought them joy and through it they could survive to give to the others and that brought them ?? to school of thoughts that they became closer but the strength to become detached from the physicality. As you go further in towards the soul the more detached you become from the physicality part of the brain, which is at the outer boundary of the brain. The emotions and thoughts sit more in the center. So as we go further in towards the understanding of the operation of and close to the soul. (:44). the stronger the fields the more common denominator of understanding (we have with each other). In time when man progresses to the further steps that he understands the totality then he becomes ?? in the strength near enough to the strength of the soul of the Creator, then in that process you can travel from the strength of the planet to the strength of the sun or solar system then to Galaxy to the universe to universes then one might reach the process of the understanding of the whole lot. This is the beauty of it and part of it, the existence, the reality of the creation of the man. Then we can go in deep space, then we'll understand that all creatures of the God are equal, because we all carry the same strength in the dimension of the soul of the Creator. Then the man of space decide that if you want to travel with the donkey or with the strength of the SS and beyond in the understanding of the soul. Many people are moving in this direction. We start teaching for those who have moved towards the space development or Spaceship. (:46). It needs to be clarified that we all understand this progress of man in the knowledge of the science of the creation. ... it's important that we understand the totality of the knowledge. As we move towards the enlightenment, those with the understanding can reach these barriers. Do we need to come to this point or do we need to receive that we can elevate our souls, in turn by giving more it allows us to have the strength that reaches in the time of communication with the soul of another. Then the fear of being left alone in the space doesn't create the fear of the end of physicality as the soul dictates the present manifestation of the physicality at the point wherever you wish. One of the fears we have are because we are used to, conditioned, and institutionalized to the MG field of this planet. (:48). And we have set everything up to live with this condition, whereas now we have the freedom to be in the space and carry on and develop that point in the space time, Zero Time travel and communication, where we contact and communicate through the soul and not through the verbal noise of the physicality of the vibration of the sound which comes from the mouth of the man, then there shall be no fear and no lies as the souls are perfect in their manifestation, then you'll understand how the physicality leads to so many problems for the man, because now it has to adjust itself to the environment that is created by him according to the interaction of his soul in respect to the physical dimensions of the ?? physicality of the man on this planet. The physical condition of this planet which has lead the man or the combination of the interaction of the soul to lead him to consumption of so much energy for that physical part. We know that the man is created from the interaction of the fields between the sun and the MG fields of itself, and in that process it has lead to the creation of AA (COHN), which comes from the gaseous part which has a dimension of freedom of itself (:50). in that process that it lives of the non-physical part, but matter, Gans part of the condition of the life, but in attachment to the G field force of the physical part of the entity which is due to the Inertia and MG fields man in that process has chosen to become a physicality. Our physical part that is connected to the inertia is the consumer of the physicality of the food and other (things)

as a package, and not the AA which is the condition of the creation of the soul of the man, because that comes from the gaseous part which has no physical connection to the body. So in the space if you can create the field strength of the physicality then we don't need to feed (it) because we can feed directly to the soul. This is where most of the fears man has for deep space has to be retracted, and the confidence has to be built that in deep space we are part of the space and then all we have to do is to go into the deeper strength of the Plasma, then .. he draws a spiral, as we live in the physical dimension of this strength (farther out from the center of the PL), (the center of the spiral) is the Pl of AA which has lead to the creation of our soul in interaction with the matter state of the part which is the inertia part, then when we take the inertia part to feed at this strength then we move to further and higher and higher strength, and the more we understand interactions of the (:52). environmental physical matter condition field strength, then we can get closer and by higher speed by order of magnitude to travel the depth of the space, and communicate with the others without verbal words, where we feel the communication language of the soul of the U and not the noise of the man through his voice. Now you understand the why and how, the reason we are developing in this direction. It is for us to take the shackles of the restriction that we comprehend what we would like to understand at the point of manifestation. When man understands this then he doesn't Messengers because the Messenger of his life is between the communication of his soul and physicality at the point of manifestation, which means where you appear in the physical dimension and according to the point of manifestation, then you decide, you have understood the environment, you would like to understand the environment and this environment has no other condition then what you had on Earth, but there is no one to dictate on how you manifest yourself, because it's the point where you have decided to accept the strength field in interaction with the soul of yourself. All the Messengers, what they have taught up to now is about the physicality in interaction with another physicality, and now we understand the position of the soul as the creator and the physicality is not the condition to be abused, (:54). or to abuse because now you understand that it is the soul which is responsible for the behavior of the man, then in this way man needs no prophet as he changes (to another) planet. On this planet he is Christian then on another planet because it's a different condition become another religion, X, Y or Z. Religion is the path of belief, or understanding the interaction between the soul and the physicality of the man, and now he becomes the prophet of himself, he becomes the controller of the conduct of his soul, then man will understand at what strength he needs to work, and therefore he doesn't need to be punished. Punishment has been used to control man out of his fear and lack of understanding of his own creation. Now we understand that there is no punishment other then us depriving ourselves from receiving what can elevate us. It's the same understanding as when we say that no man likes to be poor. At the level of the soul you want to be rich that you can give more, and this is what we call the love of the Creator or God, which means I give unconditionally and I don't take what is not mine, then Thy shall not kill, this means not just killing another man but not killing all life. How come we put man in prison for killing another man, but we slaughter animals relentlessly. Now you understand. (:56). Man has been so selfish that he only takes the part (of the teachings) that fits him. This was the message given to the Christ and the prophets of the past, thy shall not kill, life is precious, the soul of the man or any entity can't be touched. Now you understand how the

holy books have to be rewritten, because we only considered man and not the other entities. Now that you understand, is there any difference between the soul of a cow and man, a fish, stone, a tree, or another entity in the U, they all exist in their environment in respect to the essence of creation. We are progressing into the understanding that we take what we need and according to what we give we can receive, then the killing stops. This is part of the progress of the World Peace Treaty. We start with man to become peaceful when he understands, thy shall not kill applies to every entity in the U and not just to man alone. Now you understand why we established One Nation One Planet, the nation is the totality of the creation of entities of the U and not just man and the borders that he has created. When you understand more about the development of the knowledge of ones creation (how one was created), then you come close to understanding the Creator, which is Me within me and (:58). as your soul leads in the interaction with the fields of the MG fields of the Earth to the creation of physicality of the man to manifest itself with 2 legs and arms to show that he exists, now you understand the creation of the U and universes, and what we see as galaxies and the moons and stars and the rest of it, is the interaction of the fields of soul of the Creator with the totality of the fields of His environment which leads to the manifestation of the physicality of the totality of the universe. If the soul with interaction with the fields of the Earth lead to the creation of the man, is there any difference with the soul and the love of the Creator that the fields of the soul of It in the interaction with the environment has lead to the manifestation of physicality of Itself, which is all the universe, and universes and everything else in it. If you call let's say the liver as the universe, then the liver has different parts we call them galaxies, and then sub-parts you call Solar Systems, then further subparts which are the Earth, moon, dust and animals within it. Then you understand that there is no difference in any dimension of the creation until you become strong enough to understand ?? the totality of the soul of the man is within the soul of the Creator. I made man in the image of myself. Now the riddle of creation is unfolding for the man. Do we need to kill. (1:00). Now that we redefine the first rule (Commandment) in the holy books, eye for an eye, tooth for a tooth. It's the same across the whole creation and in understanding the totality of the knowledge of the total creation of the U. And not for man who has been preoccupied only with himself with the why he lives and what he eats. The house of the man should not be 4 walls but should be the U, according to the expansion of his soul and the strength of his soul, as he prefers and likes to interact with. One H atom can fit in the whole Solar System, so is it with the soul of the man. It's us who have accepted the restriction and with it we have created a mayhem of wars conflict, possessions, wanting to have and wanting to possess, when we understand that we already possess (everything we need), that it is us who has not understood that we decide the strength of what we would like to have, then we become detached from physicality, because then we understand we own the totality within us and it is us who have to mature to understand that one can't steal a gift when it is given to him as a gift, unless he is a thief by nature. (1:02). the gift of creation, of life is given to every man. In space we have no clothes and no physical dimension of covering ourselves, this goes back to when the Moslems invaded Iran, they said, why don't you cover your woman? And the Iranians said, we prefer to close our own eyes then covering our women, and many lost there lives for it. It is us who have to control ourselves rather then trying to control all the others. We have to understand the totality that we are part of it and the freedom of the soul is equal in all. We have to

comprehend that the level of understanding is upon us (we are responsible). We were busy with energy units, food Gans' and the rest, I lead you through this path for you to become mature enough to find through the energy of the creation, the soul and through the soul you can create anything. It is you who has to understand the strength of your own soul and don't compare it to the others because it's exactly the same. It is you who have decided to manifest yourself in that level. We have to respect and go into the total understanding. What is good for the female duck is good for the male duck. (1:04). What is good for the man applies to the other creatures of God be it the plant, animal, or other entity from the U. We have to stop this habit of consuming packages of energy because the physicality of the position has dictated it. If we elevate our soul in understanding its position ?? of our soul we become, in that process, detached from consumption of physicality from this planet. Many are achieving this as they understand more and more of the teaching, many are in the path of understanding, many are converting and comparing from the animal kingdom into the water to receive the energies (Gans Water), some have already passed this step and are understanding more. It's important for us to understand the reality, the totality, and not be so narrow minded and accept only the things that suit me in my village of Earth, but what suits my soul in the universal community and the totality of the U, as we open the doors of the U with the sharing of the knowledge, now we are a room in a bigger house in a bigger city that belongs to One Nation. Earth is that one room, now we open the door to see the bigger picture. First we have to understand what it is that we have with us, how we dress our soul that when we open the door we do not walk into the cold of the winter when we are wearing summer clothing. (1:06). ... We have to start understanding that we the dictator of our own physicality and stop blaming and allowing the others to abuse us, to tell to ?? this, then where ever we land in this U we don't look for a Mosque or Temple or look for someone to give us guidance, because the guidance in the U in One. And there is only one rule by the world of creation and the Creator ... loving, sharing, giving, without expectation to receive. When you have expectation it means you have brought the dimension of physicality. I expect to be seen in this place, now in this place I have 4 arms and 2 legs. Expectation of wanting to be a millionaire means I have to rob everybody else to gather enough to meet my expectation. The physicality of man is the essence of the operation of his physicality from the fields of his soul. We have seen many entities from other planets and UFO's, how many of them wear tuxedoes, a bathing suit, or appear to us in a wedding dress. None. The frock of the man has to be the manifestation of his physicality from the strength of his soul. (1:08). then man doesn't need to confirm his position and standing by the clothes he wears, this has become the habit of the man, put on the robe of a priest and do whatever you like. Give them the robe of the religion and they abuse every soul. Give them the crown of the kingdom and they abuse their physicality. When the man understands that he is the king and priest of himself, that he decides what he possesses and is equal to the others and needs no one because now he understands his soul is the dictator of his position in respect to the others. Man needs no religion and no kings, then he can travel the space of the U because a few meters outside the boundary of this property of land we call Earth there are no kings and priests, in the U. Has anybody seen any churches in the space, if there were Christ would have been busy building on the moon and other planets, the same with the other prophets. Man has to learn and understand, it doesn't come by mediation, it comes by comprehension of the strength and

the existence of his soul. I have taken you to se the fields now that you have seen them tested and measured it, used the Pain Pen, nothing touches your skin but the pain goes. (1:10). So you know that there is a field that can take pain, but what is it, why does it touch me that I stop feeling the pain, because it touches the strength of the entity, which I call pain, which comes from the manifestation of the level from the soul of the man of the physicality point of the brain, what we call, this is where we feel the pain. We recognize this strength as pain and we try to do something with it. Now we have to recognize the strength of ?? tot then the deeper we think which is the more giving we do the closer we come to the soul in understanding the strength and at that point we come in touch, come to understand that we don't even need the vehicles, what we call the SS to travel the space of the U. I asked a religious man some time ago, when the prophet received the message from the God did he come in a SS or did he land on the back of a donkey, or did he come as enlightened in the message from the Messengers who brought the message, those who are enlightened. He said, we were not there at that time so we don't know. I said, you follow the man you have to know how he received it. When you go to buy a car do you ask the salesman, is this car stolen or did you pay for it, I don't want to buy stolen property. (1:12). Then how can we allow this to happen to our path of belief? In a condition of ?? sub-rooting our souls in that direction. then when we are mature enough to understand that we are made of the interaction fo the fields of the U, we didn't pop up suddenly in the space, the fields slowed down enough to make the strength of galaxies, then they slowed down enough to make the strength of the Solar System, then the planet, then it slowed enough to become the soul and the strength of the physicality of the man. We carry the totality within us as we came from the Total, the Principle, the Creator, then can we revert back, to go back to the strength of the Creator. The answer is yes. Why not, then we don't need to do wrong, we have to be able to understand the totality. The deeper we think, as I said, it doesn't come by meditation, it comes by understanding the reality about the creation, about the field interactions, then we understand the totality of the knowledge of the creation. And this is where many men will come to be confused because I have to accept that I am responsible for my own creation, my own manifestation at the point of the field strength that I would like to manifest myself and can I accept to have 4 legs and 2 arms, and can I accept that I can't touch anything, but to praise the love of the Creator by giving that I can enjoy the presence of the others by receiving. (1:14). Now maybe today I opened another door in the mans understanding as we open the door into the space that he can interact with the rest of the UC. It's not how we can make a MaGrav System that we can make some energy to have free, because they enslaved us and I am entitled to because ??? they didn't want us to know that we can absorb energy ourselves that we can create the energy, what we call the aura of our body, which is the interaction of the field of the mans soul with his physicality with the environment of the entity of the Earth and the universal fields, then we don't need to kill another entity, for us to receive packages of its energy. It is for us to know that I take what is freely given, but I don't take what is not mine, then we become the true man of space and of this physical life. Then it won't matter wherever we lay our head is our home, be it on Earth or in the galaxies or on planet Zeus. I teach to enlighten that you find your own path and dimension. I don't teach (in the usual way) because then it becomes written and has to be followed. Are there any questions. (1:16). Q: I was thinking to develop a method to strengthen the E so that we can be more effective in

using it? The process is not me teaching you, but that you have to find the path of your own, we only guide so that you know where the target is, what you are aiming at, each one of us, all roads lead to Rome, we all reach our soul it depends which path we use and the places that we fail there we have to learn from it, if we take a wrong road we have to come back again, it was a cul-de-sac and it comes back around again, or its a dead end. We have to keep going (around and around) until we all learn to go on the path of correct conduct. we always seem to end up in a dead end and then we blame the guy who put the sign up wrong and the ones who drew the map wrong. We don't look at what we ourselves did wrong, that I took the wrong path. I don't blame anybody, but many of us do blame others for what we do ourselves and then blame them that they did wrong because , (1:18). I did nothing wrong (or I don't want to admit that I did something wrong). But the truth is I did something wrong and took the wrong path, I failed, but then I come back and take the same road again, because I am so busy blaming the others I don't see that it is me who has failed to choose the right path. If you reach the soul you don't need ?? teaching the soul, if you understand it you don't need to copy it. There is no way that I can teach you, then I have to sit here and teach the soul of the man, the cat, dog, the fish and the others, there are too many beings on this planet and I don't have the time. We teach you then you can teach the animals of this planet, through your souls, considering man is part of the animal kingdom. There is no shortcut, other then man understanding the essence of his own creation. Q: ... That is what I have been teaching all the time, each emotion has a certain strength. So you have to find the strength. Some people say that I don't feel any pain ?? is this a path to understand that they have found out that, that strength which I call pain doesn't belong to me, I don't know, I prefer not to know because I ... it can't do anything to me that can change me, that's all it says. Maybe it's a path for some people to follow, to understand. (So we have to become more attuned to the feelings and emotions of the body?). No, you have to become detached from your body but to understand the emotion of your soul, which manifests itself in your physicality. (every cell has a soul?) of course, if you consider the cell in your body as let's say the moon, then the totality of all the cells put together, of liver, heart and everything else, has lead to the creation of a man which is you. So is the same with the Creator. (1:21). then down the line it is all of the same (pattern). Any other questions. John of AZ asks question about his testing with dynamic reactors we are trying ot open up the H atoms so they light up and open, we spin at different speeds, we are not able to get to the point of compressing the H to open up (1:23). I have seen your configurations and the fixing points of the 4 SF you put on the table. Start moving (around the reactors in the) system and not creating the higher speed. Don't forget it is MaGrav gravitational positioning. Your system needs to be adjusted in the distance (between) that the interaction allows the opening of the Pl. (we are getting a lot of M strength and not enough G), yes, you do not know, you have to position them, move them, don't fix them, move them until you find the position. He draws on board. remember the ring magnets, if you move one close the other positions itself, if you could hold that one in place and move the other closer it would start to rotate. This is something none of you understood and I have repeated it in different shapes and forms. When this happens you don't need motors, this is how the speed of the rotation of the planet is dictated. We don't see any motors to start anything, it's the MG positioning (1:25). of one in respect to the other which decides and dictates the speed of rotation. Now you created the rotation and this

creates field pressure on the Pl of the H which want to use for traveling. It's the way you charge it, when you look at the nuclear atomic structure, you look at the proton and electron, the electron moves within a bandwidth, the reason for the rotation is not only the electron coming closer and going away from the proton, but also because the compression of the field strength creates the rotation then it releases energy at one point then another and comes back to get more. This has never been understood by the world of physics, they only call it a bandwidth but it's much more, it releases energy at one end of the bandwidth and then at the other and comes back in to get more energy from the G. On one end it has more G and on the other end more M in respect to the proton. So your problem is the positioning of your reactors. The reactors ??? need to be fixed but have to be moved to the point of creating rotation through the Pl without motors. I did that in the demonstration very recently. .. There is a limit you can generate by rotating (with motors), (1:27). Now you have to create M field compression, and you are not creating it, that's why the Pl doesn't open. Fix your cores as they are, but leave them loose enough, create a condition of rotation in one and the others will follow. People were showing this 2 - 3 years ago with the box of Gans that were rotating, but nobody understood it. When you produce ZnO2 and CO2 the Zn moves up, if you introduce a (Gans) material next to the box you'll start seeing the Zn rotating. Because the field pressure will push it to rotate. We don't need motors to rotate the cores. There is a limit to enforcing it with physical rotation, 2,500 rpm is the limit, maybe 3,000, but then you have to go into the essence of rotation within the fields of the Gans. We have shown this many times. This is how we slowly built up to 129 Tesla, we didn't do it by increasing the speed of rotation. This should have been understood 2 - 3 years ago. Then when you go in that level the essence of the emotion becomes the controller of it, then you can control the speed of rotation by your E, because you come to the strength (1:29). and you created this material and you always carry some AA in it for the control of the man. It's very simple. You can go to 100,000 rpm it won't make any difference because you aren't making any field compression of M and G fields. .. now look for the rotation of the Gans. .. you sent an email that you see all of the Gans goes to the back wall of the core, if you put enough in, saturate the system with let's say 30/30 of each (Gans) look to see which layer starts rotating, when you bring the system together, it will give you a strength so you can start calibrating then you'll find motion in no time. It's the field charge that you have to look for, one of your bottom reactors has to become a field charge, it's a MG field charge of the system, there is a charge system, if you reach it the earth will repel you to the point where you can create G. Many times when you want to takeoff from a ground point, zero point, you don't need to change , because you have nothing to compare to, to lift, so you have to create a field charge, which means you use your top core as a field charge (1:31). to compare with the 3 base (cores) and your surrounding rotating cores. At that point your bottom 3 become negative and the top one positive, which is a giver, then you have to create a ?? strength fields which in respect to Earth's MG field, which catapults you off and then your system settles itself for a space position. The easiest way to do this is to create this kind of field discharge, of potential difference in positive and negative, in respect to your system and the Earth's MG field system, where for example your system become the electron and the Earth the proton, it pushes you away to a point and there you can even build up to the speed of light and then at a point when the Inertial field forces of the Earth with the G field of the Earth becomes balanced with the atmosphere, then you

build into the speed of light to travel. Within the Earth's atmosphere it is very hard to travel at the speed of light because the atmosphere is only 50 to 100 km maximum. So try to look inside and see how the core rotates and then you can step up to motion and lift. Because you are dealing with the Inertial field forces MG fields of the Earth, you have to push yourself away from Inertial G and M field forces by catapulting yourself off the ground in a positive and negative ?? direction, if you understand (1:33). and then you pick up your speed and position. Q: We are also trying to build a SS with our thoughts. It was mentioned that when entities go aboard another SS that their soul is given over to the SS that they all might travel jointly. Not give it to a SS you give it to another soul to carry. This is a very well practiced system, you become a passenger. It is just like when you give your body to a pilot to take you to a place. (For me I don't know how you would continue to operate without your soul ?) No you can operate very easily because you have a soul, the physicality can't operate if their is no soul. ?? you speak on a soul level and not on physical it depends how much you go into the understanding of the totality of the knowledge. (so are we able to take an aspect of our soul and load it into reactors we create in our mind and put one aspect ..) before you go further can I ask you, does the reactor carry the strength of your soul or you just think it does? (so if we are creating it, yes it can) then you have no problem. (1:35). (so can we put an aspect of our souls into these imaginary reactors) can I say something, is your soul imaginary? (No it's not) then you have to understand you can't put it somewhere imaginary, this is part of where you put it. (So I am talking about an aspect of our soul) what you want to send an electron instead of the whole package of the neutron. (I am trying to get my "imaginary SS" to light up to carry all) yeah, then it would only light up within you, at the level that you understand. Do you understand what I mean. You would understand but nobody else would, you would understand the space you would have created for what I call elevation. (I'll work on it) Try your system until you see the field force interaction. I made a system with Arman in the past few weeks, haven't managed to operate it, but hopefully in the next weeks, (1:37). hopefully we can show it, where you can rotate dynamic reactors from fields, and if you position it further or closer to a certain number of magnets you'll see the magnets will start rotating. Then you'll see we don't need the motors, we need the field forces of the soul of the system from one reactor that its strength reduces enough to rotate the magnets in the matter state. This is how the field forces of the sun creates the rotation within the structure of the field forces of the MG fields of the Earth, where the MG fields of the Earth leads to rotation of the body of the planet, where the interaction of the fields of the system of the Earth's atmosphere with the sun creates the rotation of the Earth around the sun. The interaction of the internal MG fields of the Earth creates the rotation of the earth, then the balance interaction of these 2 and the sun creates the motion of the earth within the Solar System, then the interaction of the MG fields of our sun with the galaxy dictates the rotation of the Solar System in the galaxy. This is how motion is created. You have to have one that dictates the motion of the other while it itself has its own rotation this is what has not been understood. (1:39). then you'll find that you can move in any dimension according to the strength you create within the system internally, that it's the interaction with the other creates. They said that Venus rotates counterclockwise because a meteorite hit it. No, it rotates that way because the internal MG fields of itself has got a balance which dictates positive (clockwise) rotation, or the field strength outside because of the forces on it, closeness to the strong forces of the sun

has dictated the field forces ?? which means the field force between the sun and Venus has not only allowed the rotation within the Solar System, now the field is stronger that it has to become opposite rotation that it can find its position and then dictate the rotation. We saw this 10 years ago in the reactor testing, the inner core stops and starts rotating the opposite way. Gradually the science opens up. Man has not understood that the field interaction between the G and M creates the energy, this is how the clouds get charged, this is how you create the flow of the air on this planet, it's the interaction of the fields. Man should look when you see such atmospheric conditions, look abut the interaction of the fields (1:41). inside the core, interaction with its mass, magma and its inertia which is a solid part of the matter part, then we can predict thousands of years ahead if we understand it, how the weather is going to be, the way we predict the position of the planet in the Solar system. We have to understand the knowledge deeper. (1:42). Alzar asks, everything is a field and we can give it a number, say a banana is 10, if I can generate a field of 10 in my hand I get a banana. You get a field of the banana then you have to decide if you want to make it into a physical banana. So coming to emotions say I give love a number of 100, joy is 50 and anger 15, (1:43). then you have the physicality E and soul E, so for example if you and I are standing to a situation and our relation is the same to the situation, both of us are joyful with a number of 50, suddenly we observe a situation and you get angry and drop to 15, but I remain joyful at 50, if you barrow 35 from me you can still stay joyful because you come to 50, so no situation in life should make us angry or sad because it is all about the field. Congratulations, let me expand on this, this is why there is no conflict in the universe, no war, no anger. As the entity receives as much as it needs that it satisfies its balance. Carry on. I am thinking the soul only has love which is 100, if the soul didn't have love it couldn't go to the ?? illness, the soul carries only love, it doesn't have anger ... but wait ... you touched something very important, you are right. This is your soul and brain, (1:45). Soul is a 100% giver all the time, it's the physicality of the brain in the condition of the physical Earth that creates the strength we call anger. Your soul always gives that 100, it depends where and what strength you ?? capture it, this to you is anger (farther out) but this to me is anger (closer in), because I understood more and came closer (to the center) and more detached. I do not get angry with that. To another person this is anger (even closer to the center) because he became even more detached from the boundary of the physical existence. Anger means I do not want to accept or take, it's a big difference but if you look, both of our souls are radiating 100% all the time. It's the filter position that we put on it. It's the way we have accepted, I explained this recently in respect to child abuse. In the West we say 18 years old is age of maturity for a girl to get married, in Islam they marry a child at 9 years old. The Islamic court accepted this whereas in the west they don't accept. (1:47). The 9 years old it's the way we have accepted the condition, but for the 18 years we don't accept. It's what it means to us to be the point of acceptance, in how we feel it, how to some people crime is normal they rob and kill everyday. To the Buddhists they go out of their way to not step on an ant. It's what we have accepted in understanding of comprehension of the feeling. You said if we choose the wrong road we shouldn't blame the others. In Syria thousands of people get bombed, they haven't done anything wrong, we have a wrong conduct bombing them, so what's up with that. Go to the ones who are taking their children to the Bahamas for holiday while selling those bombs. What is wrong with that. (if those people complain they are right, if they are sitting at home

peacefully,) but this is why we set up this One Nation, One Planet, I call this murder by proxy. (1:49). It's not the guy who releases the bomb, you have to go back to the guy who made it and now the manager got paid to produce more bombs and got a bonus for it and he sits in a holiday home, or on a beach somewhere. This is what the man has to understand, it's not the guy who released the bomb, now we understand it's the man who got the commission to make the bomb and the one who thought up the bomb. Now we understand that the soul is responsible for the physicality. Why is there so much cancer and problems with the people in the US. Ask how many souls they have killed in the past 50 years. Now we understand it's the man in AZ or California who got the commission to make the bomb, and the man who sold the meat to the man to eat on his holiday because he knows and says, "hello sir, how's the meat" because he knows he's the director of such a bomb manufacturer, I know, I feed and I am responsible for it. This is what has to be understood. This is why we support the Chinese government, a peaceful act they understand. And we see all the problems which comes from the US, all the European countries that promote war and guns, they are paying for it (Karma), look at the infestations in these societies, because now they are collectively responsible for these acts. Now we understand you put magnets on the table and throw one in the middle and see how the ones jump far away from that one, separate, because they take a distance from the reality of the position of the ?? (1:51). This is what we have to learn. And then no man will even think to make a bullet let alone the metal that it might be used for the bullet. I have a massive contract for metal for a gun contract, I then am responsible for what is happening in Syria and I pay through my children, through cancer, through everything that happens. We have to understand we are responsible collectively for the conduct of the end product. I hope I answered you Alzar. (1:52). Member of UC representing the Portugal language. Hard to understand him. my concern is the manipulation of the emotions put on the light of the soul. The human is being manipulated through the mind, and technologies and many different influences and how we can be free of it. (1:54). You have to understand the MG fields of your soul in respect to the MG fields of the Earth, has a relevance and how you have managed to position your soul in respect to the Earth MG field. We see some nations are peaceful because in that area the composition of MaGrav of the center core and the inertia of the matter part creates a condition which is more towards the peaceful part or love and joyful part of our existence. Or the materials used and consumed by the man in that position feeds and elevates the strength to be more of this level (closer to the center of soul) which mores more of this level of energy is absorbed in the brain. Our soul interaction of physical manifestation, in essence the soul is a giver, but in interaction in the field environment and what we consume in the physical part of us which effects the existence of the E in the soul and brain. Let's say the man consumes a lot of Zn, (1:56). our body has its own emotional field strength of the Zn, but our physical brain has the same which is of the stronger, (they interact in Infinity Loop), so you see our food effects our emotion in our body. It's not that it goes to the brain, but it embeds in the physical part and its interaction effects our brain part, which is from the center of the soul, which radiates out, which sits the soul. ?? As we become more of a giver the closer we come to receive. Look at the French and why they're so romantic. Or look at difference between Pakistan and India, it's the same land but in this case it's the food that brings bigger packages, more less energy ... this is the level of the position, we never explained this before because we

weren't yet mature enough to understand, now we can teach. (1:58). India and Pakistan are of the same blood, but different pat of belief, they consume, use, apply different way of food that the energy of the physical part of it effects their E. It's what you put in your physical part, the head is the gaseous part, the lower part (of body) is the physical part of the Earth because now you have the blood. ?? the lower physical part moves to embrace the ?? head so the whole lot has not been understood. ... to elevate to become closer to our soul. The soul strength stays the same for millions of years after it is created. It is us who elevates our selves to become closer (to our soul) and at this level the physicality becomes irrelevant. When you become mature enough that we can take you into space then the fields of the Earth become irrelevant. Then we become detached from the Physical part which is connected to the Earth. When we are on this planet we work more on the physical part and we work less when we go to another dimension, which means when we work in the soul area which is the gaseous part which is less matter strength level of the state of the body and then we become what we will become in the space. (2:00). This is how the food we eat creates an interaction with our soul. the weaker feeds the stronger, so now the stronger which is the soul has to use part of its energy to feed the weaker part. Meat is weak, but (we consume) more of it, vegetation is much stronger but at the strength of the soul. We have to understand this then we can adjust.
My concern is how to change as the thoughts are manipulated through food and through different ideas the environment puts on us, so what can we do to liberate (2:02). the man, through the food but what else? Let me explain it in a different way, collectively. He draws a larger spiral in the center of page. If we call this the fields of the soul that emanate from the man, if we place the brain of man in it, draws 2 lobes over it, then draws in the brain centers for arms, etc, then the emotional centers along a line towards the center, the ones closer to the center are closer to the totality. Our thoughts are the strength field of the totality but because it touches the soul we have access to the Total. He draws an arrow going both ways. (2:04). that even the fields of the Earth have interaction with us, our E, feelings, and souls, fields radiated, then we understand that the strengths can be moved in any direction, closer or farther. This is important and we understand that the thoughts covers the spectrum and not just one. I hope I have managed to answer. Any other question. (2:06). Danish man who is heating house with Gans Water in plastic bags.

(2:13).
(2:15). He is using CO_2, CuO, CH_2, ZnO_2.
(2:17). As soon as I put the MaGrav in the house the heating started. This is what we have seen and are developing technologies for commercialization because 22 degrees is the pleasure field of the humans and what we are comfortable to work in. In Ghana we are looking at producing materials that would allow our living environment not to have to be at 30 to 40 degrees. We can isolate ourselves from it by using different MaGravs and Gans'. We know it can be done and if you look at the history of man, we lived in log or straw houses that felt warm, at that time the wood structure works with the release of the Gans in the wood, whereas the brick house doesn't do that. So what we are doing instead of using straw, we are mixing into (???) the Gans material which allows the transfer of energy and balances the system. We are doing research on this to create system that keep the temperature always at around 20 - 22. (2:19). We introduced dynamic straw into the

structure of the house. He says to Eric to add some more Zn into the bags and see how the E of the people in the house changes also, do they become more loveable and they don't need to eat oysters. I would love to know how they react. Paul (Togo) is helping him to loose weight, he is also using a ZnO2 breathing system. (2:21). I'll give you a tip. You can loose weight by eating more, but you have to know how and what to eat and the way to eat. I said in Chinese food they cook with high heat, we have all been N makers for a long time, since the time they created the wok. And then they added salt to it and created a Gans, so when you eat the food it's already digested, it's in the position that the stomach wants to do to it, boil or create what you call enzymes and everything else, energy is saved by the body through this pre-Gans making in the pot, so when you receive all this (extra) in the food the body has to get rid of it (the food), because it already has the energy, so now you loose weight because the body gets rid of it. This is one of the reasons the Chinese are slim, unless they are eating it the wrong way. You see the Chinese consume a huge amount of food. I used to say, how can they eat so much of the same thing at breakfast and lunch time. In the process they use a wok which is high temperature, the vegetable and meat when it touches the wok it's already N coated, then they put some water and salt in it, in that short time it goes through a rapid production of Gans. (2:23). So now it's a free energy and as soon as they eat the food the energy is received, in a way it doesn't need to go through the digestion process. Now the body has to work to get rid of the meat or carrots or whatever, because it has received the energy. It is a natural process. You loose weight because it's a negative energy. 25

there is a specific salt in body the stores emotion .

(2:28). (2:29). Klaus a scientist for 30 years to rebuild water and soil and last 20 working with Russian Space organization with a special scan technology that can show how the Gans works on the body. They scan body and then put Gans patches on acupuncture points and take another scan. (2:31). (2:34). How can you measure the Gans'? This machine shows or measures certain bio-functions that occur in your body when for instance, you eat something, it can show levels before and after. On this page it shows the vitamins, then we put a CH3 Gans patch on Acupuncture point and after 5 minutes they measured again and the vitamin level has changed. Does it increase for example Zn in the body? It modulates when you have less or more. (he didn't answer) (2:36). He explains about bio-functions. Can we see the effects on different parts of body? Yes, we have to do the tests. How about if we put a bag of ZnO2 in the room we it show the effects? Yes, we saw this in the factories and measured minerals in the room. We'll sow this later. (2:39). You were to make a machine to measure the Gans, how far are you with this. (doesn't answer directly) .. we are in negotiation around the world with measurement companies to develop a system to measure Gans'. (2:42). When Klaus is back we can do this. Herbert is lecturing in Sudan. (2:45). What you are doing (in Africa) has been my wish for decades. (2:51). Those who published our books took the money and refused to deliver the books .. we transfer all our book publishing to China. If you download the books then you can contribute to the KF, the books are the backbone of our financing. (2:54). for those you can't afford it the KF will pay for the books and teachings. (2:58).

Q: Last week Naomi was healed with a pain pad of CO, ZnO2, and CH3, can you give us the formula so we can use it? That has to be done by understanding the process. We are trying to go through this with the KF doctors, there are over 100 of them. There was a section for doctors to answer questions but they are too busy with their own patients. Q: do I N coat the inside or outside of Cu pipe? Depends what you use it for, if you pass water through it coat only the outside, because the salts in the water would react with the N coat. If for fields you can coat both sides. ?? Gans of Gans coat the inside, it becomes like a ray, the Pl of the light extended. It has to dynamic. (3:02). You can send your donation of KF and they'll send it to Sudan. ... Giovanni's birthday. (3:04). Naomi starts to drink. that is very good when she starts drinking and eating the voice box will come back faster. We start to set up the 2 hospitals in Italy.
(3:09). This can be used as benchmark for treating coma patients.
(3:11).
(3:13). Giovanni starts to teach her about taking a new life and to go into the spiritual way. This thing happen to us and now we have to change. They joking that the wife will kick him out with this spiritual stuff. Naomi taught naughty things to Keshe's son because he has to become Italian. (3:17). Q: About soul to soul communication. When I think of a person I get feedback of the message. If someone tries to send me a message soul to soul, he doesn't get it consciously immediately and would like to do so. It's the maturity of the soul, one day I'll answer this question very soon. I'll teach you have to be present and receive but not act upon it. (3:20). It's your consciousness, it's your soul, but it goes into your structure, physicality is not aware of it. I explained this in the medical section teachings some years ago about consciousness. On Tuesday the UC meets to discuss the One Planet One Nation ..
(3:24). End with the music. There is a chance that while he is in Iran they won't have the bandwidth to do Workshops. Don't worry Mr. Keshe we'll complete your work, thank you it's been 10 and half years I have never missed, but we'll try to be there. (3:26).

END.

187th Knowledge Seekers Workshop, Thursday, August 31, 2017

(, , , They ask Arman how he found his soul, he doesn't answer but says use the headphone and you hear the music not from your ears but a point in your head,)

(:11). ... we are responsible for what we do and no need to be afraid, now we know that the soul is the creator of physicality and physicality is responsible for the elevation of his own soul. Up to now man converted matter into energy, 13 25
(:15).

(:21).

(:26). ... it makes one understanding the art of life in the U. I give my life for the others to live. If we every understood in the life of Christ is the true meaning of life. Sacrificing

and giving from ones life that the others may survive and flourish. Then it puts a question, was there ever a Christ or we change the name to the rest of man to love to the name of Christ. Then it changes a lot of things for a lot of us, it brings a new meaning, do we all want to be the same as the one who has been so generous. Why we choose these ways of elevating our souls is because we have always been frightened of confirming the existence of the soul within us, and this has brought us a lot of changes and in time will bring more changes because as we come to understand more we realize that we understand very little of the totality. My wish is my command, and my wish is peace on this planet and to unify the souls on this planet ?? and in so many ways we have achieved it, numbers don't count it is the strength of those who believe that the change has come, it will now grow and flourish in what we call a unifying peace force has been established. I think it is time to listen to the UC, we have allocated this morning one hour to each council in trying to explain and bring the discussion on the table to see how we can move on. (:28). how we can establish One Nation group of government, that there shall be no more war. My mission is to create the condition favorable for peace and for the world leaders to accept that this is the path of peace. We have to understand one thing that all this killing and wars over the past thousands of years has brought nothing but degradation to the soul of man. Let us go back on the track and go the way the whole U goes, which means we become the unconditional givers and not looking how it will benefit me, rather how can I benefit the others by sacrificing my own time and that by giving more I receive more to be able to give more. I close (my time) in this morning session because I think it's time to see the fruits of some 10 years of teaching, of the first blossoms of peace established through the UC and EC, maybe now we see the real process of peace. We step down and leave the 2 councils to explain their position and to bring you in to become part of it. Don't forget every member of this planet is a member of the council, it's just how much you want to serve to be heard through your action and soul, ?? thank you very much. (:30). Bengali language representative speaks from the UC. He talks about when the British invaded India ...

(:36). The Mogul's invaded to bring the Islam and Hindu cultures together. It was done by force they brought their armies, but they had a different intentions. As a result it created certain unities, medical, cuisine, and the bhakti movement and its poetry. So in a way that was successful. But yes there are some who are creating divisions but still the unity contributed to the Indian culture. (:40). Unlike the things stored in the British Museum there was a positive intention behind the Mogul invasion. The military in India serve the nation out of love and responsibility for the country. So with One Nation the Military can still serve with love and responsibility for the people they serve, much like all of us can do wherever we are. As they serve with love so we can also serve One Nation wherever we are. And there is no border to defend because what we are defending is our love and responsibility and not the border. We can start doing it locally by sending our wishes to those who would participate ... (:43). We can also do it through conduct as KF members, we can use conduct as language, because that is how we will do it as we move beyond this planet. ... we can use the devices but it is much more then that. (:51). Gatoah from Kenya. (1:02). Paul from Togo. Jalal from Iraq. (1:23). Portuguese.

(1:42). Lisa Australia. Mr. Keshe has taught us about the N materials and Plasma and how it connects to the soul but a lot of people don't get the connection. Wisdom comes

when we learn from our experiences. .. We gain from everyone's experience on this planet, this is what Mr. Keshe does, he asks them something and listens, and he gains from that persons knowledge, and this is how we are going to help ourselves enlighten ourselves because only we can do it. He has given us all the tools and the way so now we have to do it. We have to start putting it together. (1:45). We have to do the work. ... (1:52). I agree with all you say it's a beautiful message.
(2:10).
(2:16).
(2:31).
(3:05).
(3:46). Rick talks about devotional service to their Guru or Catholic Church.
(3:55). Armen speaks. A lot of beautiful talks but how to simplify things. ... Anybody wants to ask a question. (3:58). Q: Can you explain how to find and use your soul. I can't guess how you can find your soul, I've had that question many times. You have to find it yourself. You can use the stereo headphone method the Mr. Keshe taught. You are asking me how to find your soul, I don't know, but I found mine a long time ago. Okay tell us how you found yours. I'm not going to answer that question, everybody has to find their soul their own way. (4:00). You can use the headphones. You are not going to hear the music from your ears, but there is a point in your head you are going to hear it from, that is the position of your soul. (4:02). He shows a brain scan from the bottom, there is a dark point, this is where your soul sits, it's the empty space that you see is where the fields are holding in. He shows another one with a with dot in middle. When you put the headphones on this is where you hear it from and not the ears, I have done it many times. (4:04). Q: About H, Deuterium and Tritium. Armen draws a CO2 box, consider what kind of elements you have around, Cu, Zn, C and CH bond, CO2 in air, you are creating a magnet for C between the plates you attract it from the air, and the C in plastic CH bond. (4:06). This is why you have created so many Gans' under it on the bottom which are near the C fit. If you create CH3 and put it in a box that has no C connection, (put it in the CO2 box) and then you close the top, you still create a field of C and that draws the C out of the CH3 and H3 is left. Now you are dealing with the fields which are different, and then create a magnet of the fields. Since the environment (in the CO2 box is closed it doesn't bring anything from outside, so you absorb the field of the C still in the salt water so a field of pure H3 is left, but only a field. Now if you add in a tank H or even O, you create atomic H2, ??? not in this box but in your CH3 box where you put your mesh, iron, and N coated material. ??? you are creating a magnet so atomic H converts to H field only. out of the fields you create matter, if you have 2 matters they interact, out of the interaction of the 2 matters you create a field of the material. We did this with a CO2 and CH3 Boxes and Zn Box (4:09). and the rest that we create. If we put 2 Zn plates one N coated and one non-N coated, you'll create in between a Zn field, then each Gans carry individual Zn field. The only thing you have to remember is that H is acidic, a giver. Q: You showed us how to create Tritium, now can you show Deuterium, CH3 can also be written as CH-D, How to create just H. (4:12). Do you remember the Coke bottle. Just create an environment of a gas of H. You can use a fish tank, then you don't have C in the environment. Matter is created from the fields, you have the sun and earth then the fields are converted to matter. The box is the creation of the fields, that's why you put 2 plates, if you put a Coke bottle in it you are dislocating the C in the bottle then the H releases.

(4:15). You create the magnet of the C that's why you absorb it. Q: I was creating CO2 Gans and it turned into greenish bluish and the N Cu turned back into Cu color, Did I create a CO2Gans. It has residual CO2 in it but it's now back to Cu, because your N coating is not correctly done or I don't know how you created your box, it happens something you created a C field. You create a flow between the plates one is in a high N state and one in a lower or matter state. If our Earth were a little different when it began its journey it would have absorbed totally different materials. (4:18). Q: How can we create these states in our body instead of outside it? Have an understanding then a wish then you create the rest. If you hold your palms together then they can be like 2 plates. ?? it's your soul .. it's a little bit early to go to that, but you have to understand what kind of interaction and field you can get. We can learn to do that with our soul, learn to believe that we can do that. Q: Does that mean your body is the salt condition? Definitely, you carry 12 salts, our salinity is near to the earth's salinity. Rick, we all know about the saline solution they give in the hospital for shock to your blood. (4:20). You can't convert a matter without salt. Q: Is the Coke bottle empty, no filled with caustic solution. (4:24). What color is the ?? .... sometimes it's yellowish or sometimes reddish it depends on the environment you create. Does it depend on how much time? no, it's an instant transfers, it's a Pl. If you create the magnet of C it will be extracted, you don't have to wait for it. John's experiment took 2 weeks to create. (4:29). Q: Should the box be N coated to insulate it from the outside. If for Gans making, ??? I always use boxes that I already N coated. (4:32). How do I clean the N coating? Use Sonic (cleaner) ?? use distilled water and multiple washings then use Sonic. Remember your plate is still carrying a caustic field, NaOH. How to make matter in a static state. .. can answer how to make matter from the fields next time.
(4:38).
END

188th Knowledge Seekers Workshop, Thursday, September 7, 2017
(About the Council members and their growth represents humanities growth, Fear of punishment goes out of the system, it's how can I more serve, Things such as hunger and shelter become meaningless, The Charter has to be written with the soul and when man writes the book of the soul Mr. Keshe can leave, He will teach us how to find the power of our soul because physicality is confirmation that the soul exists, Do not be afraid to elevate your soul and by not giving you have stolen from your soul, We do not promote Scientology they never had the solution, The Keshe Foundation and how it started is the example for unconditional love and giving, we share knowledge freely so no one has to steal,
, Use 2 Patches one with twice the amount of Gans water, Moslem man talks about his background of being afraid of God and not loving and Mr. Keshe explains the background, His background in Zoroastrian beliefs and Fire of Truth)

(:12). The members of the councils have to learn how to deliver and govern.

(:27). The conditions of punishment, it doesn't exist. It is me who doesn't receive but allows myself to be positioned in a place to serve more. This fear of punishment goes out

of the structure. It's me who decides how I want to elevate the others and not I want to be elevated. the game changes, then in this process we don't need for people to tell us what to do. Doing correct becomes part of our habit and life, which means we have matured. We become the teachers, because up to now we needed teachers we called prophets, because now I don't care what I loose as long as I can elevate another soul to reach its goal. This changes things, there is no punishment because it's you who decides what you want to give. This new way of thinking needs new guidelines, a new way of understanding for those who just come into it. For those who set it up it has to include everything in this U as a whole. When we write a charter it's not writing of hunger, shelter, health, and of every other thing that is of concern for today, With the new knowledge we know that there shall be no hunger, where now we know that 20% of (:29). our needs are through physical materials and for it we kill a lot. Do we get a permission from the cow to use his body, no. Do we get permission from the tree to use its fruit, no. From wheat, so we have become dictators of our own killing machine and now we understand that there is another way. A whole other way that the universe works on that doesn't need to kill anymore. We can absorb energies that we need in the depth of the space without waters or food to compensate for that 20% of physicality that is connected to the structure of this planet. So things such as hunger, shelter becomes meaningless, as you create your own shelter as you need in any space you need. Energy has no meaning because you soul is the center, it's the sun. How can the sun be cold, it's us who have to learn the conversion in the real term universal condition. When you write the charter it will be very much unimaginable that we can write about these things anymore, but we can write about the elevation of the soul. the new guidelines should stand for millions of years and not hundreds or thousands of years and then it has to be correct and on the conduct of the soul of the man. (:31).Through unification it doesn't matter what language or color in the barrier of man's brain, now we bring singularity, oneness and with this we bring peace. The whole process before man enters the UC is peace. The KF work is in that direction, we don't consider what's going to be with the hunger or disasters. What we call disasters are natural processes and for us to understand that we can move away from or go back into. We choose to fly out or to hide from whatever is coming, but if you understand that we can work with the soul of the man, not only us we can even move the trees, the soul of the tree, the plants and animals that are in the way. this is the new knowledge and the strength that man has gained. Now in the beginning when we write the Charter, it looks a bit funny and how can I do this. When the man saw collectively in the councils ??? In the Tuesday workshops for writing the charter, you'll find that what you write will become the conduct of the soul. The soul can't steal, stealing is the habit of physicality. There is (:33). no use writing in the Charter, Thy Shall Not Steal, because the soul can never steal. Take 5 ring magnets and put them on the table, add a new one inside and they all take new positions, the ones who want to come close do and the ones that want distance move away. You can't steal, souls can't steal, this was the habit of the man to justify to have the physicality. This is how we become correct. It's the job of the EC and UC with the Core Team to support to write a new Charter a new book of prophecy of man. Peace and unification for this planet and beyond. (:35). We are still wild and use others. ..

.. we are the tools for other souls to progress, a father sacrifices his life for his child a mother does the same. We don't sacrifice we give freely that the others elevate and can

serve humanity better. (:37). The Charter or book of the souls have to be written. Many people write and ask where they can find their soul. Your conduct is the advancement to your soul. Try to learn new ways to reach the other souls, by reaching the other souls you find the potential of your own soul. It's not looking for what I did or what I get, but giving unconditionally and seeing them elevating in the way of their own soul in their conduct, it means you have found your soul. A man should not look for the physicality of the soul, but he should look for the strength of what he can do with his soul that elevates the others, in the position of elevation of theirs to reach that they can elevate the others. Then in that process there might be some fields that you'll receive in the process of progressing, what I call development that elevates you. Not to give to be elevated. The secret of the Creator and creation is to give unconditionally and this is what we have to learn. Participate in the writing of the book of the conduct of man in his soul. I always said that when I write the book of the soul it's the last book and the time when I leave. (:39). It's for you to write the book of the soul of the man and then the physicality will follow, this is what their function will be. We allow every week for council members to meet and discuss and with everybody because each one of us is responsible. In the writing it says when the man reaches the level of the transmutation of the elements the level of the man reaches that of the prophets of the past, which means it goes beyond the physicality, how many times you have to pray, wash your hands etc. When you reach the level of the prophets of the past it means you gain access to your soul, ?? conduct, then it's up to you how you decide to go, carry on with the physical life and all the suffering that goes with it, or elevate your soul to the point where you live through your soul, where there is no punishment but the beauty of giving. Every week give time to the councils and add to the space technology, but the priority for us is achieving world peace through understanding new technology which allows the Charter to take shape. (:41). ... do not think of all the negative things these are of the past for the human race, thing the way you reach it and how it will change the life of the others, then you reach it. **I'll teach you more and more how to find your soul's power, not your soul because your physical existence is the confirmation of your soul**. What do you want to look for a heart to open up to touch and play with, or understand what I feel through my soul and manifest myself in physicality and in others physicality and behavior of their souls. We have to mature and man has matured, KF Knowledge Seekers millions of you have gradually built up to this point, we are on the verge of tipping the balance. In time I'll explain. The world peace process, the unification of the nations, support to reach it is a very heavy discussions going on in the background. (:43). Governments are not bothered by who said what, but by how can we change the course of our nationals, now it's past the nationals, how can we change the course for the humanity. Languages has been found to be a unifying force for humanity as long as it doesn't become another borderline for access to the soul, but all the souls are the same it depends on what filter you put on it and you call it a language. Take away the filter and all the suns shine the same, so souls can't do wrong, but there are different ways of accessing the information and converting that into physicality. The more we learn the more we understand that we are all the same. We are all the fingers on each hand and the cells on each finger. We need each other to be able to function as one, the correct way. We need to understand that it's not important for me to be but to make sure that the others who are continue with a positive comfortable existence. Then you'll find out that my life becomes comfortable also, but not by giving it

with the intention that I make sure I receive it. (:45). But giving it unconditionally that my soul finds its own position. Many of you have this problem, how do I know my soul works, and what I can achieve. I'll give you a tip, then do it with sincerity that you receive the elevation of the soul of the others and not for the sake of seeing a result. You have a lover, husband, wife, children, friends think about what is bothering them or their suffering, try to give so much from your soul that what has been bothering them finds a solution, you don't need to talk nor to wait for the result to see that it works, just do it, then you'll see the result, you'll see that you elevate them out of their pain. Because they receive, they don't have that strength to add, they receive it from you, then some time in the future, you'll ??? accidentally saw that it happened, but no I managed to elevate the soul. Elevating the pain was my thinking but I gave enough unconditionally that if it was needed it was received and it brought the change. Do not think I thought (made) it happen, no, I wished it, I gave and it's beautiful to see it happen. It's a different school of thought, it's a different ?? , (:47). it's the way the prophets of the past lived. Christ didn't go on the cross to see if I can have 2 billion followers, he went for a different purpose and that has brought us to this point of 2 million people believing in his principle. But some are not following his principle but what suits themselves. Because when you commit to a prophet you commit your soul to it and not your physicality. And now if you commit your soul to peace, mankind will reach peace. We hear that governments have started talking because millions of us have started thinking ??? we put our soul in it and this is the proof. ... I have spent every second of my life to bring peace and through my strength I'll achieve it. The way this race has set the peace for itself looks very difficult, but actually to achieve peace for this race is so easy, once the man touches his own soul not the others. Do not work with the fear. (:49). but with the strength that I can give unconditionally that my existence is irrelevant if it can feed the ?? for peace on this planet. In the scripture it says that the lion will lie down with the lamb, the lamb is the soul and the lion is the physicality. It's for us to understand both that they may live in peace with each other. When the physicality doesn't do wrong the lamb and the lion are at peace. When you kill, which is the lion, the lamb or soul has to compensate for the wrong doing of the physicality and this keeps it away from reaching a higher level of evolution. We evolve, the soul's evolution comes through the conduct of the physicality. How we conduct ourselves in physical life gives rise to our soul and this is what the man has to understand, this is why when you go into space no one can fool you that I am a king, or a new priest or prophet. We are all Messiahs, but the Messiah of our own soul and this is the reality that we have to understand. (:51). because in having correct conduct we don't need to teach anybody, because we have become the teachers of one. In many of my talks I always say, "I am the Messiah", but I am the Messiah of my own soul that I make sure that my soul in conversion to my physicality doesn't do anything wrong, then this becomes the path because it's the energy I elevate and emit that it is received by those who are of the same school of thoughts. We see our progress of development as a race on the planet from now on, in the hands of those who understand this point onwards. We don't preach, we enlighten for the man to find his soul. Participate in the development and the writing and in the scripture through the work of peace of the EC and UC and writing the Charter, which is not for the others, what you read in it is the development of your own soul. I can write it in one sentence and it will apply to any dimension in the universe. As a man you like to write what you see as pains in one line of the Charter, write it and

then look at it in a few months time, you'll see that it has become irrelevant. My wish to achieve world peace it will be done because it's the dream of every soul. (:53). but now we have united the soul and this is what the progress will be. Not having fear if you're going to have a piece but having the knowledge that we have achieved peace is the beginning of the process. The T will give every need of the man, then what is going to be left, except peace and that you can travel the depth of the U and be of the same. You become the prophets of those in the space who do wrong, if you find any, because you teach it to your soul and you touch their soul, so they adapt to you. It's like having a weaker and stronger plasmas, the stronger which is your soul which has learned to be correct, to those who do misconduct and elevates them to become like you. This is the beauty of understanding the strength of your soul. The sun never dies, it shines until it amalgamates with another, or it shines more to give more. The soul of the man is the sun. It's for us choose for it to behave like a Venus or like Jupiter or like Earth, it's the same sun's ray but different manifestation in different positions of the strength. Participate in writing the Charter because that is the Charter of the soul of the man and not the physicality. **Never be afraid to evolve and elevate, but be afraid that if I don't give what happens**, you can't steal, (:55). but **by not giving you have already stolen from yourself, because you have not given what has got to be, and you receive what you weren't supposed to receive. In way we steal from our own soul and no one likes to be robbed. Then our conduct becomes correct**.

Dr. Gatua presents "Ethos of Peace".
(1:12).
(1:21). A man starts to promote scientology and Mr. Keshe stops him. We do not promote scientology we are bringing something new. No, no we are talking about different things. You have to stop this line of talk. If scientology has been part of your life we respect that, but do not bring these things into the work of the KF. Yes, but we have to talk about solutions Mr. Keshe. That is not a solution. They never had a solution and we don't want to pursue this line. Is there any other contribution please. (1:23).
(1:31). Dr. Rodrigo of EC gives a talk for peace. (1:39). Lisa of Australia of the EC.
(1:43). Definition of peace, Rick reads from the world peace treaty.
(1:52). story about climbing mountain and giving away everything that weighs you down.
(1:58).
(2:06). Mr. Keshe comments on peace. A good example of this is how the KF was set up to share knowledge unconditionally. Sharing knowledge is sharing peace, love and I think the ethos of the KF has set the example for this. You have to look at the background of the behavior, and the outset of the whole thing, when from the beginning we shared the knowledge unconditionally we did not give the others the opportunity to steal to get it, so we already prevented a crime and misconduct to happen, because you stole you could do whatever with it or hide from it. The ethos of the KF is of peace by its behavior and action. we lived by this ethos from the start. (2:08).
(2:13).
(2:17). I don't look for world peace, KF is the peace.
.. One of the ways for elevating the soul is to remove the filters on it, because the soul is the sun it always shines the same. By removing the filters we see the totality of the light of the energy from the source and this is what we call peace. (2:19). Finding and being a

part of the peace is the problem for humanity because he has seen nothing but war and killing. In the space there is no such world that exists because we solved this problem a long time ago. Those who became unconditional to the conditions of peace, we found a solution for it. The same is for the humanity, the knowledge of the man has reached the level that sooner of later he breaks into space, but it is better to bring the man into space as a peaceful being then becoming a food for man, it would become like the wild west or when (white) man went to Africa hunting for new animals (to kill). There is no hunting in the space because you can have whatever you like and the sooner the man learns this the easier it becomes for the transition to a peaceful structure of society, planet, and then the UC. The basis of the Charter should be peace and it should be explained as loving, as giving unconditionally, because when you receive unconditionally you don't need to fight for it because it's there as you need it. The more people who get touched by the technology the more we see the diversion (conversion), from wars and all sorts of things (2:21).

(2:27). The soul of the man has access to all the souls of the universe, it's up to man how he wants to channel it in the direction he wants to go. We all know how, where and the way our soul works. I heard last week someone ask Armen what is the position of the soul, where can I find my soul, my wish is my command. If you wish and have achieved your wish it means you have found your soul. Your wish is the command for your soul to deliver, you have found your soul. because of the lack of trust in our soul. (2:29). The way of thinking has to change, .. that it happens in a good way, the way it's supposed to. 22

(2:33). I made the soul in the image of Myself. The image of the soul is the image of the Creator. How can such a perfect being do wrong. Your image, your soul, in what has manifested you as physicality applies the same in the dimension of the Creator, where the soul of the Creator in dimension, in transformation leads to creation of the physicality of the souls, so the soul of man is the image of the soul of the creator and in the dimension of physicality in the strength of the soul. Then when it dimensionalizes to matter or visual state and becomes the body of the man. So there is no fault with the physicality of the Creator even though the filters may cause to appear so. Every one of us is part of the Creator, a perfect ?? of the Creator. It's us that have decided to put something in-between the soul and manifestation of physicality. If the soul of the Creator is so perfect that he has created the man's soul it's for him to follow that, that he doesn't fail. Then you can understand how peacefulness exists across the universe. (2:35). Because of the beauty of the ?? strength and understanding the work of the creation. Why do we need defense technology for space for the people we have never seen. Rather we should create systems the greet whoever we come across and give unconditionally. The man who gives is strong and the one who fights is weak because then he can have ??/ slightly further out then himself, because the man who is correct embraces. And this has not been understood by the humanity for the past thousands of years. 55

(1:38).
.. the progress of the peace of man comes through the elevation of the soul. The lamb and the lion. Adam is the soul and Eve is the physicality and the transformations with the energies of the soul and the manifestations of the physicality of the planet as ?? the

structure of the physicality of the man which is trying to ?? steals and kills from the other to be able to keep and sustain the connection between the 2. The sooner we understand this the sooner we'll bring peace on this planet, because we'll bring the physicality of the weaker strength in transformation from receiving from the higher which is the soul doesn't create a conflict between stealing and peace. We have to mature to see the totality and then we'll see the same. Why does an animal kill? The soul is strong the planet is weak in conversion from one to another the entity of something in between becomes the target for the 2 to hold on to the 2 sides, both sides the soul and the planet. Once we understand this and eliminate the habit to kill to keep the energy between the 2 we can do it from the environment of the universe then there shall be no killing, then there will be peace. (2:41). Remember I am the Messiah, of my soul and no one else's, because if I understand that there is no deviation from my soul to my physicality then I don't need anyone to tell me what to do. I have salvaged my own soul so I am the Messiah, every single one of us is the Messiah of our own soul in connection with our physicality. When we find this we find peace and then we us having no interference in-between will create the same condition as the others because then they interact with us on every level according to. We have to understand the operation of the work of our own life then we can teach it and elevate the others. Last week Armen was trying to explain something and not many understood. I do not need to carry anything with me when I understand how to make the filters. That my soul through the emotion of filter gives to my physicality what it needs that it can't do anything wrong, water, food, shelter and anything else. If I can raise my hand out and give and create the energy I need to have the (2:43). joy of an apple I will receive an apple in my hand. When you speak of Adam taking the apple from Eve, the apple is the emotion of man. The faster we understand that apple is the filter of crime from the soul of the man then we'll commit no crime, then it will be a perfect soul, then the apple becomes the apple of love which means from the beginning to the end. The sooner we understand to control the fields of our soul to create and manifest and condition which is perfect not for us but for those who receive the fields from us then we have achieved the essence of the creation which is peaceful, and when you have what you need you don't have to do anything wrong. The soul of the man is the reflection of the soul of the Creator, ??? so has to be the physicality of the man and at this point you don't find division and find peace but friendship and ??. Now write the Charter for man, ... (2:45). You're a giver not a stealer. Thy shall not commit adultery, it's not by physicality but by understanding of the emotion, when you are satisfied it doesn't exist. These are all the attributes of physicality which has caused so much problems for man, and now we understand and can progress to the next step. Now there are so many of us that it (the soul) is getting elevated. The KF member who has elevated his soul in South America and the one in Australia, now the ones in-between are getting elevated because of the field you are generating between you. ... my soul has reached your soul and anything in-between. You are the post to receive and in-between the other receive too, this is the secret why we taught this way. I reach you without your knowing but your soul wanted to be reached, as we have seen with the magnets (2:47). it doesn't jump, it has a path to follow and everything in-between it touches. many of you listen and the knowledge touches your soul from that point, from my soul to your soul you have touched the others and it elevates it. This is how the condition has changed, how we achieve peace, slowly everyone in the path is touched. It's not anymore sharing knowledge but sharing ethos of

the soul which is peaceful and you in accepting to be of the same you have created the line, birds with birds and wolves with wolves. I have no wolf in me but plenty of bird of love and you receive it. And when that bird flies from one point to another there are many people watching it fly, they get touched by its beauty and in it they elevate their soul, because it enlightens them. There is no need for reactors and SF, the star of love is within the soul it's him who has to ?? find its power, not to wait to see ?? (2:49). .. in the last 2 months I have traveled all over this planet meeting with people who want to create the condition of peace. I heard in communications that Mr. Keshe is tired and not there, Mr. Keshe wakes up at 2AM or 5 PM to be in the teachings. I wake up to be present and not tired, I work relentlessly to achieve peace by sharing knowledge, enlightening, and by teaching my way to myself and what i teach myself ?? reaches you through the enlightenment. I work day and night but to me there is not much time, the life of a man in too short. This is the process and how it should be and when you know the work is correct and if you work hard for it you can achieve it. You give from your soul, this is how I do it and many of KF followers do the same. (2:51). ... the minute you start to count is the time we fail ... listen to the ethos of this morning I taught you a lot if you understand.

(2:55). Jalal asks what can be done in Iraq to decontamination. We are fully aware of what's going on there. It's for the American government to negotiate with the KF. These depleted uranium and plutonium weapons purposely are left behind to continue to damage. It should be very easily to cleanup I should be in the Middle East in next 3 months. It's not only Iraq, 50% of the waters in Rome are nuclear contaminated by Italian governmental statistics through misconduct or misuse. The overall contamination will come through a government. (2:58). There is a solution for it, it's just finding a way to organize not to destroy or bury. The worse effects are happening to American soldiers, many are coming back with mental problems. Many who have fired these things have received the first dosage themselves. If you see the light of a nuclear explosion, my advice is to walk towards it and not run away from it, because it the wave or the light has touched you already have received it. It's a long life of misery, or you can walk into it and salvage it in a different way which brings a faster end to the physical pain. (3:00). ?? the cleanup has to do with the Gans. In Fukoshima go back to the measurements that Yukoko did, it's in the amounts of different Gans, you won't destroy it and the chemicals will still show up on the tests but (it'll be neutralized). It's like the Gans waters the opposition said there is nothing there, we said did you test the alkalinity of the water, then the opposition died. With the new T you reach a new dimension which is the fields and not matter. With chemical nuclear contamination you don't destroy it, you contain it with the fields of the Gans. You link up all the energies to a new source which means the matter is there and you'll see it in the tests, but the effects are not there. (3:02). In AZ they have done new tests. They ran 3 reactors with SF on the top, the tester buzzes all around but when it comes in the center it doesn't. In explaining it the fields in the center are neutralized but are still radiated. So it is when you have plutonium or uranium in the vicinity, you still have the matter but the fields contain them. (3:05). This is how you cleanup the messes. We don't destroy it or convert it to something else, we contain it that its fields are not a threat. You can contain all the chemical and nuclear contamination.

.. I have committed the KF to change one of the deserts in the near future. (3:08).
.. when you sell a Patch you have to sell 2 patches. **One of the patches should have twice as much Gans water as the other one**. (3:10). If you use a single, okay it has some fields and certain amount of penetration because of the tests we did for certification. When you put one patch on the front and back the fields link up with each other, pain is energy and now you see the effectiveness. If you drink LP and use a Patch by make a differential in amount of LP you'll see effectiveness. One weaker (less amount) trying to feed the other link up because they are of the same, everything in-between, the pain is MG fields, as the fields depletes the pain goes, because you transferred the energy. You use the CO2 because the link of MG field connections allows the depletion of the energy you call pain. (3:12). (3:15) Klaus ...

(3:18). Q: further asks about contamination in Iraq. ... (3:21). The radioactive material still exists within the body, sometime depending on behavior we see different ?? of disposal, or behavior of no radiation. It's the linkage of the energy and not destruction of the materials. you have to find the fields of the ?? link up, in a way you neutralize.
(3:23). ... in some cases because of the time passed it has become part of the genetics, RNA and DNA. We are doing a lot of work on this in the background, especially decontamination and cleanup, as you are aware we don't disclose in any way what we are doing, that we can carry on with our work without interruption. We go to the places where our work is needed and the information transfer is very direct. This is unfortunate we used to go public with everything, but even so our research has increased many fold. As we develop these technologies we'll stay within the governments that we work with.
(3:25). .. we share work on decontamination with governments heavily.
(3:28). Hussein talks about being raised Moslem and taught to fear God and not much about love ... are there any tips to reach people who are not ready?

(3:34). Rodrigo says that first we need understand how polluted our bodies are ...
(3:36). Mr. Keshe responds,
(3:43).

.. elevating the soul means understanding the operation of it and fining tuning to make it better and no more. This is the challenge for the new human race in the space, you find the fields that elevate the others faster, that work much better, not hiding it so the others can't do, because everyone reaches at the time it's needed and at the strength needed. The biggest problem for mankind is that each should become the police for his own soul. Now instead of bending and praying, the policing is in the hands of the physicality of the man.
(3:45). I come from the Zoroaster background, think good, do good , act good. To understand it is the touch, to act on it is the maturity. In my last visit to Iran I went to a Zoroastrian temple because it's where I was educated. I asked the priest to allow me sit in the temple of fire, with the greatest of pleasure I was taken there, to the room of fire, that Fire has never stopped burning for thousands of years. It wasn't the essence of the Fire but that of the soul that touched, I could see that I was connected to those who over thousands of years have kept this fire of Truth going. We have to understand the truth through our soul and then our physicality will follow. (3:47). then there are no intermediaries. We have to understand the Space work, then there is no need for Gans' or

whatever you want to put on it to feed yourself or clothe yourself, because in the Space there are no Gans'. The source is your soul and the limitation is the environmental fields which gives you the dimension of the manifestation. The sooner the man finds this the sooner he'll find peace. I made man in the image of Myself, if the Creator is perfect how can man not be.
(3:50). music to end

189th Knowledge Seekers Workshop Thursday September 14th, 2017

(Wayne moves to the Earth council and tells his experiences in the Vietnam war and some of his life story, Man is passive and doesn't look deeply into his existence, why did we decide to have a bone structure, Each entity manifests itself in respect to its strength of soul, the solar system is an entity, When we detach from this planet we can control how we manifest ourselves through our souls and we can change our physicality here before going into space, Not everyone on this planet wants to change, We need to measure the strength of the field of what we call power, The Day of Judgment and Messiah come when each man understands and knows the strength and power of his own soul, Whether to kill to protect ones family, have 2 choices to face it with your soul or go away from it ,)

(:10). (:12). Mary Woo stepped down from the EC. (:14). Wayne moves from the UC to the EC for North America.
(:26). (:28).He tells his story of being in the Vietnam War as a child and refugee and to the US. and what he learned from war and suffering ... this moment is the best moment of life. (:43). ... most members of the EC are people from one continent and were forced to another due to circumstance, the brutality of wars for the greed of the man. ... man's awareness of the injustices and understanding and wanting to change. The science of the emotion and understanding the feeling comes from within the man, with his understanding and observing the injustices of incorrect conduct, no one can understand or appreciate these (experiences) unless you have been through it. When we see the people who cause these kind of injustices (:45). who insight wars, their soul is not at peace, many names can mention as the cause of war for their own satisfaction of ego. The war is not just with the gun but can be in any shape or form. This is the target of where we are headed to change the course and this is why we exchange knowledge for peace. The knowledge to bring peace to your E through the knowledge of the work of the Pl, bringing peace to the planet through disarming through new knowledge. The armies who have no sense to exist. The KF work is heavily getting support from the different governments and organizations in the background, and in due course to support them to stand up in supporting the ethos of the KF. There are those who would love to be a part of it but are scared of committing their nations to it. My advice to you is to sign the Peace Treaty and commit your nations, the rest is the fear that doesn't exist. We'll start teaching more in depth about the knowledge of the Pl. (:47). and in ?? reality the Pl of the soul of the man. As we go deeper and deeper the teaching become very small (short) in teaching, because for example, last weeks teaching, not many people understood the depth of the knowledge. The deep knowledge comes in short bursts because it man a long time to even grasp the depths of what is being said. It is for us to make that difference and it

doesn't come by one or two steps In the coming time we'll sow how the steps are gathered together to be able to complete the process of peace. The EC and UC job now is to write the books (of peace), ... it will touch every language on this planet. Is there anyone from the Councils who would like to enlighten us. (:49). Caroline speaks. 50 30
(:56).
(1:01).
(1:07).
(1:09). Not to get carried away with the emotions but have a solid base. I taught first the science of the plasma. Everything can be put on the table and scientifically and that this time peace comes to of understanding and not out of sentimentality. It has taken years to do this, but as I said many times, the date, time and place was set thousands of years ago. As like when a man wants to make something he knows he needs so many days and hours to cook it out, it will not be there the minute you put everything in. The progress of the understanding and the enhancement of the soul of the life of any entity has a duration, it is known, it's like a painting, every color has to come on the canvas that the beauty of the final picture is seen (1:11). that it can be appreciated. the human race has been traveling down this path for a long time, different pieces and colors of the canvas of the life of this planet have been added and now more or less it is time to put this canvas in maturing the soul of the man in the future getting completed next to the canvas of the UC. Then you become a piece in the jigsaw which completes more and brings beauty to the totality. We have to understand the process and where the knowledge comes from and how we are connected in a very strange way. Let's polish the knowledge so you can se how you are all connected. the magnets you see on the table, they all have a connection to the board, which is the Earth and the magnets men. (they organize the magnets) if you imagine these magnets to be the soul of the man and the table to be the planet. Part of the fields of this soul in attaching to the planet has dictated its position of distance, 2 cm because the soul is still attached to physicality and is connected through the fields. You look at the white table as just a table, I don't look at it that way, (1:15). I look at the white table as a combination of M fields that my and the other souls shares with it, and that creates closeness and compactness, because we are all connected to this planet, this is the way it absorbs us and holds on to us, not only because our physicality is connected to it, but the MG fields of the atoms in that table are connected to our souls also which is the Earth. You see the surface of the ring magnet that is stuck to the table, if you calculate the area of that ring, it's the amount of attachment of the man to physicality of the planet. If you place the ring magnet on its side and reduce its attachment to the table, when you bring another magnet near it the distance to effect it has changed. (1:17). Now the distance is bigger and there is less attachment to physicality, earth. It moved to 4 cm but its still connected to this planet. This is our soul, physicality which is attached to it. If you remove that soul from its attachment to physicality which is the earth. (1:19). As you move the second one up into the air the distance further increases. If the magnet are off the table the distance increases drastically because there is no more attachment to the table or the earth. This is like how our soul works when we are detached from physicality in a different dimension. This is in the matter state, but if you look at the hollow ring in the center that is the soul and the ring is the physicality. There is so much energy in the center that dictates the strength of the physicality of the ring. the master energy sits in the center of the ring and not on the matter state of the ring, that's where the soul of the man

is, that's where so much energy is absorbed or given that gives the dimension of the physicality to what it needs to be. These are symbolic but in fact they are not far from the truth, if you bring (1:21). more or less, weaker or stronger magnets they all have fields to interact we dictate the position and what we would like to give. the soul has a given strength which at that point, let's say the earth from the sun, or a given position in the brain from the soul, creates the property, the effect, the manifestation of the earth. The same ray in a different strength but further away from this planet creates the manifestation of Saturn or Jupiter. The biggest thing for us to understand is where the fields from the strength of our emotion dictates the manifestation of physicality of us in the dimension of existence. I'll go back to an earlier teaching, it will bring those who understand the science of the life in the U closer to understanding the creation. **Man is passive and he doesn't look deep enough into the reality of the existence. In our teaching we all understand for the first time that we are created out of the AA which is the gaseous part of this planet. There is a very strange phenomena, (1:23). how did some of us decide to have a bone structure with arms and legs, and others decided to have a mixture or bones and muscles**, others decided in the conversion to have no bone structure, some decided on thicker bones to walk on the flat land, some decided to have very thin bones like a fish to swim, why and what state of the soul has created the desire of manifestation even though we all came from the same AA. I put this question to the Agriculture section but I saw that they weren't able to understand it the way I intended. Where is the soul of a tree that it manifests itself in the physicality of the tree. We chop the branches and leaves but it still survives, if we accidentally chop a finger of a man he still survives like a tree, (1:25). but where is the soul of a plant. Then this will teach us how in the space we have to learn not to just look at the physicality but the essence of the creation. How come man keep his soul above but puts his arms and legs down to be connected to the planet. But how come a tree embeds its soul in the planet but its legs and arms are directed away from the planet, exactly opposite to the humans and animals. Is it the attachment to the planet that dictates this or is it the reality that the soul conditions itself to the condition of the manifestation of the fields within the planet according to what it needs to be absorbed. Then we have to ask ourselves a major question, in the science of the deep space where do we look for the soul of the entity, in the root of the tree or the head of the being? If we look into the physicality of the plants life we see the same, the trees are like the human body with bone structure and they stand up, the scrubs are like fish, herbs and other vegetation (1:27). are like the worms and have chosen no skeleton as such. Then we have to understand what is the function of the soul in the manifestation of the entity in the structure of the U. Why has this planet appear in the physicality that it has in such a position in the structure of this solar system, where the soul is the sun and if you look these planets and moons are literally like the fingers, arms, and legs, which from outside man has not had the knowledge to look inside this, the solar system shows an entity of being. Our physical structure as a sun, as a solar system, is not what you think, the shape of an egg, it has a feature that is according to what it has inside it. "I made man in the image of Myself." When we see arms and legs, trunks of trees and branches, fish with gills and flippers, and everything else, **it shows the manifestation of physicality in respect to the strength of the soul of the entity which is the sun. When man moves into space and looks at the totality of the fields of this solar system, we'll see a creature**. (1:29). We see an entity with the totality of the

length and the strength of his fields. Do we look for the soul of the planet or do we judge it by the manifestation of its physicality. We have kidneys, heart, liver, but we don't stick our head inside another's head to see what's in side it, we judge it by how it looks from outside and this is what the scientific world and cosmology haven't yet understood. In time we'll look at the structure of manifestation of the entity of the planet or star before we reach it, it's like the soul of the man dictating about its finger shape, color etc. There is no difference in the world of the creation, it's only man who has made this restriction according to his own intelligence and understanding of the intellect of the creation. (the magnets Rick is moving around on the screen), if we would have put a iron dust on the board and move the magnets we would have seen how the fields are changed as it moves. Some of the fields stand up, go down, some spread and others take shape, and this is exactly how it is with the structure of our life. How do we plan it and structure it, (1:31). **now that we have detached ourselves (from it), we are gaining the knowledge to detach ourselves from this planet**. But how much are we still a part of the structure of this planet, this is part of what we need to understand and it's part of what in the totality we haven't understood. "I made man in the image of Myself." **Now that we can control our own soul and understand that what we put into it we get out of it. What image would we like to be seen by the others in respect to our soul**. This is the game changer for humanity, we always blamed and looked for the God to solve it for us, now we are the creator of our own soul, and how would we like to be seen, now it's us who decides, and not for us to blame. We don't need to be preachers but merely to understand the creation and that we are part of this creation and from now on as we go into deep space and decide how we are going to manifest ourselves according to the conditions of where we arrive. Now that we have managed to come to this point of intellect, why don't we strive make the change here before we go. (1:33). before we open the space for man, and see what these changes bring for us, would all of us like to blond and blue eyes or black and brown hair, would we all like to be Chinese or whatever race or chosen creed we have chosen to ?? ourselves, or can we change from a Chinese to a black man in Africa with the flick of a finger. In many ways yes we can, it's just a lack of trust in ourselves or the way we have manifested ourselves in our physicality that has changed us, otherwise we have all this in our hands. If we can do it outside then why can't we do it inside, or have we found a way of abusing the others from what we are doing inside, outside knowing that we can't abuse knowing that the book is open. This is the mystery that man has to solve himself. If you are going to be looking different in deep space and as we are all born in different areas and have taken different shapes and colors, which means is it our soul which dictates our condition then why don't we do it now. Why don't we choose the path of peace and become one race. (1:35). Their are no coincidences in the life of the man on this planet, so it s the same in the life of eh KF, it isn't a coincidence that we get Wayne as a member of the EC at such a crucial point. In the coming time we'll understand the reason. I know the reason and I was thinking about this 3 weeks ago, that in the choice of the EC there is a problem. I could see it, but I couldn't do anything with it because as a member of the EC we (I) couldn't interfere, and we saw the change in less then 10 days and it clicked in me, that is what I was thinking about to wish, and now the change is there. Because by knowing the need and what is to come, and what we have negotiated the position of a soul like Wayne's becomes very key to peace. When 3 or 4 members of the councils sit together to negotiate with world leaders collectively we speak from strength and

knowledge. (1:37). This is important to all of us and for the negotiations for peace, because together we can make that change. 30

(1:39).
(1:43).

(1:48).

... Alzar long talk ... (1:54). if a man (who makes furniture) is already peaceful in his life and you knock on his door what would you tell him, detach from physicality? Very easy, what have you taught him, because by going to his door you haven't taught him anything, but you (yourself) have understood more. He has to understand that there is another position, dimension, then you give him the choice of what he can do, because to him that is all he knows, you haven't educated him. ??? that's all he has known up to now, but if you enlighten him about his soul, would he make the same furniture or change the furniture he makes that he embeds the soul of the wood in it. The Knowledge Seekers are so concentrated on trying to achieve lift and motion, (1:56). that in the whole process they have forgotten the ethos of the work, can I have your blessing to be able to see the pleasure of ?? life, the whole target for them is just to see it fly. (It's time to show the flight system developed by them, I am just guiding). The one thing I do not see is the blessing of soul to the system, I give you my knowledge so that I see the beauty of the flight. You can't make a butcher out of a carpenter unless you teach him to be a butcher, how to do. ... to do the things you have to be taught ... **you have to inspire a carpenter about the soul of the wood, not his own soul otherwise he creates a different thing**. Or would he ever touch a piece of wood because now he understands that it is an entity. Or if he respected (the wood) he would think, what would you like me to show you as. It is a different way to look. Then you'll find out that the carpenter is inspired and then he can make a difference, in respect to his soul and in his life. **Not every man on this planet is looking for a change, because this is what they accepted to be**. (1:58). ... how many of these people across the world know about the soul, the teaching to be, and how much they can change, she said, why can't we reach them? I said we already have reached them because we speak their language through the soul. It's the way we have to look at it, can we inspire or have we forgotten how to inspire. It's the understanding of ourselves which is the problem and not them, how have we understood, this is the problem and what do we expect of ourselves, and how we think that we have learned that we can teach that by teaching we lead them to inspire themselves. A lot of the scientific world doesn't like how the KF has gone into teaching the science along with the operation and understanding of the soul of the man, because they haven't matured yet. They don't understand that the whole purpose of living, or that through living a peaceful life they can understand their own creation, and this is becoming a bigger and bigger problem for the scientific world. Because now, at the level they are at, they understand the change, but in the function of their life how can they match or change it, (2:00). so we see the change. We see a lot of people that would like to be (part of the change), but they can't because then it doesn't work with what they completed themselves (accepted for themselves) as

knowledge. The depth of the knowledge transfer in especially the last 8 months is so huge that it will take humanity centuries to unravel. Everything that man needs to achieve peace on this planet is on the table. 51

... not sharing knowledge (2:08). in the verbal sense but sharing the peace that through our souls reaches the others. Recently I saw a change, but the change is so huge and the people who want to create it through the KF work have gotten into a panic, habitual, ?? panic, and they know who they are, My message to them is very simple, the only ones who need to panic are those who want to keep everything the same way as in the past. Those men of power who stand in the ethos of the peace and have found it in themselves by creating peace for their nation, every move will bring another fruit of peace. We should not be afraid of it but rather proud of it, that we can be the peacemakers. When we speak about "beautiful people" we have to understand something very strange about them, when one dies or the soul removes itself from physicality, ?? does that force the other souls to leave also, (2:10). as the collective of souls was the creator of physicality. A human body, as I call the 7 billion of us, plus the billions of other creatures on this planet, we are like the schizophrenic people, we are all beautiful, but we are all part of one soul which is the soul of this planet, it has a heartbeat and a "soul-beat", and the beating of the soul of this planet is a beating of the soul of the man. When one of us leave this planet in the dimension of the soul of this planet, does this planet die, or does it use our soul as part of its structure to show itself more beautiful and free. This is a question for a lot of us that we can't answer, because we ourselves are not aware of totality, because when we face the totality, it is so beautiful that we ask one question, why, simply why? Why do we have so much guilt, destroyed so much, why have we created so much mayhem. (2:12). When we will be mature? Or can we mature that we mature the others, that through their maturity we achieve peace ?? When I see problems of what is on the horizon and what is to be done, and what is done to create wars, I don't look at it as a failure but why I wasn't able to reach them, and what these people are there to learn from each other and from the process, that it will bring a lasting peace that from it, for now on they don't need to do long. We don't pick on the nations because they don't exist anymore, we go through what I call the EC and others, to reach these souls. There are a lot of good changes around. My wish is to reach the first steps of world peace before the end of this year and we are on track. I know that there are souls that are working in that direction and I know they'll bring the first steps. There will be a lot of cries by those who think they're going to loose a lot to achieve peace. It's the situations we see that force us to change and we don't like to be forced to see changes (2:14). which because of us has been the cause of suffering to us and others. 06

(2:18). Please sign the Peace treaty.

Some members of the Core Team are always present in the teaching, Rick and Vince are some of them, (2:28). in time the 14 members of the CT and in the future those who they choose to be the members and replacements will continuously support our work in the same direction. There are 14 members ... we thank all of them .. the cornerstone of peace. Q: Can we invite the galactic community? We don't believe in that one but we allow them as UC to join us as we join them. The man has to become wise to understand

his own position before he can go into the next step. Q: Jalal, you said before that the soul and the lamb want to experience in one way, the same way I want to experience because we are all connected somehow ... what do you mean by .. you said if you kill this lamb to eat and if you don't know that it is your son or father, (2:30). one of these souls, so that means that this soul went to a body of a lamb to experience something? yes, what about it... (he got cut off)... The lamb was symbolic, so it means in essence that man has to stop hunting and killing for whatever they might think. I had a very strange experience by the ethos that has been pushed around by some world leaders, "we have to create war to create peace." and to justify that they have to create enemies so that they can make arms and justify that there is an enemy. But the reality is what do these people get out of creating war, is a sense of power the field strength that we have to abolish in the human race and animals (2:32). or beings on this planet. This is one of the biggest problems man has to conquer, the strength of feeling of power, or being powerful over an animal, another person, society or whatever. **Our biggest problem is to measure the strength of the field of what we call a shame, a pain, and the power. If man finds this out and if it can be adjusted through the soul, then we have solved 99% of the problem with peace on this planet. What is the strength of the emotion of power. Each one of us experiences it through different experiences and tests and different conditions**. A world leader experiences it in how he can change things, a teacher, father, a sibling do it differently, or an animal or something else. (2:34).
... story of Stalin killed more then Hitler. Gorbachev was a great man...

(2:40). Jalal tells story of man in Iraq in 1960's ...
(2:42). But the party after him killed so much.

(2:47).
... eye for an eye, was tried for 2,000 years by the Christians and they killed more. I was talking to some people who think because they eat less due to the MaGrav system that their physicality will change. But change in physicality doesn't come by eating less, it comes in the eye of the beholder in what they expect from this change. (2:50). One of the strangest parts is that they don't see it, the expectation has not brought understanding. And this is one of the biggest problems around the KF they expect to see something otherwise there is something wrong with the KF and them. 37

(2:52). The biggest dilemma for those people who would like to be the man of peace, now you (truly) understand that you (were actually) waiting for a Messiah to come, for a Day of Judgment, for a final day that the peace would come, and now you see it was always with you from the beginning to the end. What happened to it. This is the biggest problem for most of the people around, now that they have come to understand the work, that they themselves are the Messiah's, the Day of judgment. The Day of Judgment has come the day you realize that it is your soul that is responsible for everything, and now you have to judge, you start judging your own soul, work, ??. Now what is next. All of you Messiah's what is your wish, command, what can you bring to the others to elevate them. I have reached many millions and billions beyond this time, and many times before (with other races**). I know what the outcome will be, I can see the end. The end comes when every person accepts the position and responsibility of his own soul**. This is the

Day of Judgment when you become the Messiah of your own soul. (2:54). There are many world leaders who would like to be in power, but when you are in power of your own soul ?? can be a world leader. Then we'll ask for a universal leader, galaxy, unicose etc. **we are always submissive to something that we think is bigger then us, but we are the beginning and the end**. This is what we have to mature into and nothing else. This is the point you'll find peace. Q: if we are made in God's image dies He have the same issue with greed, if so then it's not God because He created everything, (2:55). where does the greed in man come from then? It comes from his emotion and physicality. it is the conflict of the man himself with his physicality, God owns everything, possesses everything so he doesn't need to kill for it to possess what he already possesses. Q: So who is setting our filters to prevent the shinning of our souls, is it a malfunctioning brain? **No, it's the interaction between the fields of the planet and the soul of the man. It's very much a field interaction and how it has been set to be. There is a very strange behavior in which our emotion becomes partially ingrained with it, and that is the submissiveness to power or to accepting guilt**. When you shake hands with people of certain nations you shake with all of them the same way according to the feeling, emotion and standing through the history of their life. I have developed awareness to assess (2:57). the person you shake hands with, as to where and how their mental state is in everything else, and one is 99% correct. Different nationalities hide their weaknesses and kingship in different ways, they show their national behavior through their physicality. . ... we show our structure through our physical interaction which is part of our talk. We are brought up to ??? judge whether somebody is the head of us or we are the head and we move on, we have a physical language to express this. .. (2:59). ??? every nation has a specific handshake, there is a submissiveness or power, and this we have to overcome. The strength of the power through the submission of souls, one being better then the other. We have to overcome this to be in the space with others creatures, we want to all stand tall the same, especially because they don't see our physicality so our soul has to radiate so it doesn't show any weakness in it. There is a lot to learn. Can I ask a question? It depends if I like to answer it. Q: In the instance of **war starting what would be the right action to protect ones own family**, I don't want to harm another being but I would have to walk away or harm another person, what would be the right thing to do? There are 2 ways to ways to answer it, (3:01). and there are many ways to contemplate (it). You can walk away from it in a different direction or you can walk towards it and in so many ways understand that what you do is correct and there will be a good effect or result from it. I have been in that situation many times in regards my family so I know exactly what you are talking about I hope. When it comes to protecting your family there are 2 ways, walk away from the structure of what is set, this is not cowardly it is a wisdom and choose the path of no conflict, or you walk towards the conflict and understand that my soul's understanding can convert the other, you look eye to eye. A few years ago they sent an assassin to kill me, he sat in front of me with a hat on, I knew he was an assassin, we looked each other in the eye, I had no doubt he was there to overcome his fear. When I consulted our adviser he said I was correct. When he came to do his job I wasn't there coincidentally and because my soul was aware of it. (3:03). I learned a lot from this and in the second attempt to kill me the guy sat in front of me for weeks giving me poison and I knew who he was and what he was doing. These things go by the strength of the soul and if it is the time to leave the physical life you

can't change it, but if your soul has something to accomplish you'll remain to accomplish what you are supposed to do. The fear is the problem, you don't need to be in any shape or form of dying because the death comes to all of us in the physical dimension, when I sat for 11 days in (Canadian) airport and every day he said he was going to put a bullet in me, I knew the guy had more fear then me otherwise he would have done it. I have been in this situation a few times because of the technology and nothing else and these people have more fear in them then you have **and most of the time it's better to face them because in your soul you know you are correct. Or you make a decision that, I don't want to face it and I have been in both positions.** (3:05). The inner strength in the soul of the man is the salvation of the man and you have to know your soul better. Do you have a question Mr. Keshe? I have many questions. Ask one. **The question I have always had is, why does man think that he can solve his problems by ending a life? Why doesn't man stand his ground and work it out**. This is what I don't understand, people walk away from a lot of things, or they destroy a lot of things not to face it, but what about if you stand the ground and see what comes up, and see what strength you yourself have, not to fight to change, (3:07). but **to understand why do people kill as a solution**, why do so many world leaders see killing somebody as the answer to solving their problem. .... that you can survive it. I met a woman who was very thin and she had a sister extremely oversized, she was telling me that they were both abused from the age of 4 or 5, and I explained something very simple, the reason you stay thin is this and this and the reason your sister is fat is because of this and this. (3:09). She said you are the first one who understood my secret and you are correct. Each one of us make certain decisions and steps, we accept certain things and we use it to survive or we fight it and reject it to also survive. At the end of the day what is and can be acceptable to is counts, as long as it isn't a power play, because she understood that she was playing a power game and nobody understood that. We all play (these games) in one way or another, it is for us to understand the process and then we can graduate with the right understanding. The soul is of the man is present even in the absence of the man because you are connected by fields to the others, and most people have not understood. We always look to be physically present so we can hear, when you come to my stage and level, and most of you are reaching that level, you understand you do not need to be there to have the ear to listen, the soul will give you the information that you need to know, and they never lie. (3:11). Find an answer to my question, what makes man to thin he needs to kill for his survival, not only another man, but a plant, tree, a fish, it is all the same, it is us who have put different values to justify our existence

(3:13).
music
END

190th Knowledge Seekers Workshop - Thursday, September 21, 2017,
(Official Keshe Foundation Workshops are now under control of KF, Disaster relief to be setup from KF with the technology, KF Supporters have broken their promise to share the technology, they're only making it for themselves this is why there is now stagnation, The

Multi-national Corporations are using KF technology and hiding it, but they can't get patents so in 15 years time there will be few patents, , Fear and how to deal with it,)

(:12). Alex from Nigeria is back after his incident in Nigeria, nice to have you back. There was a group in Peru abusing the name of KF making workshops, and saying Armen was going to show. We will control workshops now very carefully and from now on it has to be authorized by KF. We'll control the teaching that it is in a correct way and not for them to be abused by others for their own pocket and benefit. (:16). From now on you can go on the KF website to find a workshop, we have put a team for this so the abuses stop.
(:18). Jim of Australia presents formats of public workshops. They'll start a series of 12 workshop on each Monday 9/25/17, by the KF. (:21). Part 1 will cover Plasma, Nano, and Gans, each will be 30 minutes long on the fundamentals.

(:25). We let any member or the Core team, EC and UC, add anything to this workshop. Ursula says we are all going through big crisis now, economic, political, etc.. We have these teachings to help us get through. When we feel fear we need to rely on the teachings. (:30). Then in Spanish. (:33). Alex from Nigeria but he was on another line. Vince from the Core Team gives from his soul for the path of the hurricane. Mr. Keshe opens the KF in the hurricane areas. They'll setup disaster relief with the KF. (:37).
(:41). There is a disaster in Myanmar, 400,000 Muslim villages have been burned by army and they have fled to Bangladesh. There is in addition of disease spread and hunger.
(:46). In Bengali.
(:51). Q: I am concerned about the lack of organization for disaster victim, what can we do so that you can release the blue[print for the free standing MaGrav so we can provide them to disaster victims? We will not release the blueprint of the free-standing Units until we come to an agreement with the governments. We are doing this in the background but we don't disclose anymore because we saw the mayhem created in Accra by a bunch of terrorists from Belgium, Germany, and other places. The Free-standing MaGrav have to be released in negotiation with certain governments. (:53). **The Units are already fully developed and operational. The instant we release it the Oil Industry will be destroyed**. We know it and have disclosed it to a number of governments, and the decision on how it's going to be released globally has to be made. It's a knowledge that belongs to humanity and not to us, but by releasing it, it will create a mayhem. The energy production from it can be massive we have been trying for 2 years to control the amount of energy it releases. The blueprints for it will only go through governments, we have no choice with this, and we are working in the background with a number of governments to develop a strategy that we can release it. The free-standing or Energy Supply Units will change everything in the world of finance. We can produce millions of them around the world in a matter of months. The Oil Industry will totally collapse and you can see what a mayhem that will create. ... it doesn't matter if people say it's their right to have a blueprint and you have to give it. That stupid game we played before (with the MaGrav), nobody was mature, is over. I consider everybody mature enough to understand what is going on (:55). the wireless and free-standing system will only be released through one government. When these governments are mature enough or will allow it to come through, then it will be done. It's not that we are going to do it the

way we did it with the MaGrav when we saw the Mayhem it created, the people using the MaGrav benefited by it but then say it doesn't work because they don't want the neighbor or government to know. The free-standing energy Unit will only come out of one government, we'll not do it in any other way because we know the instant we release it the mayhem starts. And in that instant other problems will arise such that you'll wish that we never released this technology, oil and car industry, everything will be wiped out, because it's so simple to develop and replicate. The position is not when are we going to release it, but humanity and governments are not mature enough to be able to handle such a change. I have listened to people say, it's our right to have it, it's your right when you mature enough. The KF will supply to governments under very close observation. It will be the decision of the governments to come out with this technology. We are working with the highest level of governments and we are protecting them from what we know will come as a mayhem. (:57). This will collapse the Oil and American reliance on oil will collapse overnight, literally. the Middle Eastern backing of the oil will collapse immediately. I was getting encouraged by somebody recently that we can hide it in another system that it doesn't show itself. But I said it won't take anybody more then a few minutes to understand that the energy has to come from somewhere so there must be an energy source in there. ??? we have to do it the way we see it or there will be a much greater disaster. On the other hand there are a number of things people can do to help themselves. The materials in the disaster area can be used to generate the materials needed for rescuing or helping others. The blame is not in teaching, not blame but the job goes back to the KF supporters around the world to start teaching. We have taught enough, now it's for you to teach how to make a Pain Pen, Pad, the system to make a balanced temperature of 22 degrees in a cold area. All has been taught and nobody is doing anything about it because you are just here to take what you like from the technology that it might benefit you. Very few are responding to your asking for help. The majority here are free riders and this can't be. This is what I said, we did the One Nation, One Planet, (:59). agreement but ?? nothing has gone ahead. The Councils are working on the ethos. ?? But you have given up because you couldn't get anything free out of it. Why isn't the teaching going on, why aren't you going out and teaching and reaching more. It's not us anymore, it's you as us that has to make the move. You have (at least) 2 hours a day free, put the teaching and ethos out there free. ?? paying to show people how to make Gans'. It's a very strange situation, a lot of people don't want to know because then they have to do something about it, it's not my problem until it becomes my problem. How many KF supporter made Patches to take across to States that were in line to get hit with the hurricane. How many of you made CH3 and CO2 at least to feed some of the energy that is needed? None. Bounty doesn't rain on people, it has to come from people to rain on the others. We are here to serve and not be served, it's very easy to say I am prepared to teach. Give a man fish and you have to give him one every day, teach him to fish and he feds himself. It's the teaching that has to expand, this is what we are doing with a couple of governments where we'll go on the radio stations to teach. ... The problem is not the knowledge, it is complete it is how you evolve it. (1:01). There are people who know it but are not happy to teach it because there is so much negativity by 1 or 2 people on the Internet. There are millions of us using the technology in every shape or form. It is us who have to learn to have confidence in the technology we carry. 30

(1:07). I saved 30 to 50%, thank you Jack. You broke the promise and that is why the stagnation has come. How many of you who followed the teachings continued with the Ambassadors and the rest until we get the One Nation done, nothing, it's left in the hands of a few EC and UC members to try and find a resolution or to make the Charter, while they are making the charter you have to make the push. ... **the ethos is that you broke the promise to start with, you made the Gans' and Patches just for yourselves**. For example, "I used to be in pain, I used the technology and got helped, now I spend 1 hour a week building units and teaching the others for free." What's the use of giving you another power unit, then the next thing you ask for the flight system then you can escape from this planet and we'll have no problem, but what's after that? All the KF supporters go back into what was the reason that you came here to learn? You didn't come to learn how to make the Pens and Pads, (1:09). you came to learn how to be a correct conduct person in the U, and you got it free. The more you give the more you receive. You made 1 Patch and it helped you, now make 2 Patches and teach. And ask the person, ?? this is the promise to your soul, do that. Would we have gone much further, or is the humanity ready? This is the question and where we now have the problem. The guy ?? has used the KF and misused its name and for his personal benefit. We have seen this in other places, it's a point of misusing the technology to abuse the others, and you all pay for it heavily, not us, it's you who has to balance the soul. Don't cry to open the blueprint, I opened the patents and the only ones who have understood them are the multi-national (corporations), they are the only ones who sit in these teaching and listen to every single word. We see space industry, auto, food, etc.. they are sitting here listening with their top guys to see what new things they can take. It has come to the point that it's a free patent for the industry so they can sell it to you for 10 times more. (1:11). In a number of cars you drive today has the KF technology in them. They have hidden it, ask any of them to open the patent on the new batteries, they can't do so because they can't get a patent on it, because it is already open the way I promised. (?? means that they have not patented their products because it would show the KF technology.) We forced one of the car manufacturers to open one of their patents, they said they can't that it was pending, but they knew they couldn't get it because it was using KF technology they're using in their batteries. People don't know how the corporations are working around the KF plasma technology under different names and they're breaking through. ?? Uplink is paying for the free knowledge given to you, but they're hiding it behind. When you see something similar to KF work ask them to show you a patent and none of them can show it. The you and I have operated in the past few years has made sure that a new science which is based on KF technology in any shape or form is not patentable. In 10 to 15 years time you'll find very few patents, because we the way we have opened it (written the patents), but the energy has to go, there is no other way then through the governments. It has to go through governments, and it will open up through one government. I have reached an agreement with a major government and I stick to my position until they move on the next step. (1:13). Any other questions. Q: Man wants help to finish his system to help others. MaGrav flower of life. (1:16). he can help people at a long distance. (1:19). He shares some pictures and talks about it. 27 ears up and 27 ears down, (hard to understand). He made some towers ... he felt the plasma 2 blocks away from himself, it was the first time he started to sleep well. He started talking with his soul, not physically,

his wife can talk with words. (1:23). I experimented with Gans' but it is very powerful, have to be careful, reaches every cell in body. (1:29). with the Zn you can start to cure your emotion. ... my soul told me to not go further but to first ask Mr. Keshe. (1:31). Mr. Keshe says he still doesn't understand what he is trying to do, if you can be more precise. If you watch the flower the fields can heal you. What we are trying to do now is take the guess work out these things, we are working with universities and organizations to evaluate these systems. In the next few months and years we'll see more explanations how these fields effect us. It depends on how you set things up. He shares a screen. (1:33). Many people are producing MaGrav and Gans' but they really don't understand how they produce them. He draws 3 Gans boxes ZnO2, CO2, and CH3. what you see on the drawing is in the matter state. You are making these Gans' in the same place with the boxes next to each other. (1:35). But in fact they are all effecting each other without your knowing it. If you unintentionally or intentionally move the boxes around you are changing then kind of Gans you are producing. So it may look like CO2 but it is different version because of the fields of the other boxes. In the manufacturing process this has to change. When I made the first ?? Gans it took my 3 or 4 years to develop. He bought a box with 24 or 28 divisions. If you are using Gans for food production. This type of box is not the same as the larger ones. I used the 28 divisions boxes because I wanted to produce a specific Gans for a specific job. You don't have to produce toms of it, a small amount with a very specific purpose will do. It's like with Indian curry, beginners use lots of spices but you only need a little used properly to get the best taste. (1:38). When you want to produce a Gans for a specific part of the body you have to carefully plan it out. When I want to make energy for food I make a condition that I can produce CH3 around the outer boundary. For a diabetic I only produce CHs in center, for psychological conditions I produce ZnO2 up here, for muscles. ... goes into details ..

.. a lot of you just get the plates and do whatever you think, but you don't understand what you are doing, monkey see monkey do.
(1:41).
current passing through all these small connected boxes are balanced just like in the body ..
... when you take the Gans out of these boxes they are mature Gans' (1:45). for exactly what you want to use them for. You have AA on top of each one and it's exactly the combination for what you need. Many of you just take the Gans and not the AA, but your body is mainly AA with a common strength to it. Most of you haven't comprehended the AA, this one is Carbon related AA connected with CO2 and O, this one is Zn connected and this with sugar. If you take this it is correct for a given disease. If you are running Health systems, if you put AA from this box, in the unit or in dynamic cores you'll link up directly with the (AA) of the disease. You can only use the AA in this way when you set up a box like this that replicates the body, (1:47). if you turn the box upside down you'll see another dimension. He imposes the body over the boxes to see their positions.
... now you see how the knowledge has to be used. From this you fill your boxes for what you need. .
... when you use the Gans' of this box you go through the digestion system, the AA go ?? that's a Gans of the AA and not the AA itself.
... the process has been taught if you go back to the original teachings

(1:51)...

(1:53). The Systems coming out of Austria will be so targeted the doctors won't be abel to deny.
.. if you put 3 boxes you can go even more specific (deeper) .
making 1 boxes takes me 3 weeks, you do it in a day.
(1:56). The digestive system works this way, the lung cell finds its way to the lymph which has the energy, because it has called upon the energy. ... the lymph links up with the cell in need and transfers it fields that becomes the physical matter. When there is no demand on the lymph then it gets stored in the liver. Everybody thinks the blood feeds the liver, but in fact the lymph does, it's energy crosses the wall to be stored, because liver has matching MG fields, it's controlled by the brain where what needs to go. This is how the body works, but also how every being in the U works and not just the body of man. (1:58). if in deep space you come across another being how do you assist, if you understand the principle then its easy, but if you have to go to university to learn to treat other beings, in such a way then it would take a lifetime to study every creature in the U. But if you understand the principle then every being has the same process, what would you like to reach, for me it's easier to go for the soul, because at the end of it they all connect to it. It's the creator of it. But this requires a lot of understanding of the totality of the knowledge of the plasma in respect to everything else. When you make a helmet, superimpose the box over it, (2:00).
... Mg and Ca dictate the position of the soul ..
.. to produce the right kind of CO2 and ZnO2 combination, what about adding a Zn N coated plate and then a Mg plate, then the fields in the center are reached, you have to watch where your Cu sits. The only muscle in brain sits on the boundary. ..
put a Gans water in the city, how many people changed. The Russians used something near this on American ship. You can change the situation with this, it is near to be perfected. Each box in my lab has different color on it. (2:05). These will be in the museum. This is why the way I work it's so effective because everything has to taken into consideration. 21

(2:13).

(2:15).
(2:23).

(2:32).
(2:37). Man wants clarity on what the Councils are doing with the peace and how we can help. We are inviting them to Mt. Carmel? The reason I chose Mt. Carmel, was for the end of the belief in the Bahai faith. I explained this before, the Bahai faith was established to bring world peace and the House of justice was dedicated and promised in its building was to bring the world leaders there to sign the world peace, and when it was offered to them they refused it, so they went against the wishes of Bahaula. That was the end of the Bahai faith they finished their own term, when they went against the wishes of their own creator. (2:39). I knew before hand that they'll do this. You'll see the demise of

the Bahai faith around the world. This is very important and was brought up by governments very recently, why we chose Haifa. Thou shall not kill, but you can kill yourself. The cornerstone of Bahai faith is to bring world peace and unity to mankind, and when the opportunity was given they had to refuse , which I knew from the beginning they'll do, because of the way the structure is set, and that is the abuse of the name of God, but this is a more recent one, ... and they are all busy gathering more wealth, establishing a second Vatican in a faster way. ... the cycle of man with the prophet of physicality with this action, they finished themselves. That is why I went worldwide without a temple, we established the peace in the soul of the man and not in a building on a mountain that was promised. The leaders of the Bahai went directly against the wishes of their own prophet. (2:41). They brought about their own termination. Q: So we can reach out to any government except China. You can do for any government what we said about China is that we have to understand the political structure in China, and we have to understand that their are forces at work beyond what is brought to the public, with different nations and governments. We have to respect each one as it is. there are a number of governments that KF followers are talking with. Very recently I was on a flight with one of the world presidents and it was easy to open a conversation in regards to the peace treaty in respect to her country. I sat there and my soul goes to her that she gets elevated to the understanding of the peace. The KF people are not weak, we have some powerful people business wise or politically, and have been touched by the soul of the technology. (2:43). and the foundation and they are working in the background, but we don't go open anymore, because there are those we believe in destruction to confirm their existence. As you have seen in the past 8 weeks we go in a totally different direction, we just teach, and extol the level of knowledge. One of our supporters found out that the PM of Australia never received the invitation, but the response we received was that he was occupied somewhere else, now they're approaching it a totally different way with him. We have to carry on to the point that they receive it and understand it, because there are so many filters put in front of them, reach them through the soul. We have a huge problem in that we blame the others for not doing it. We ask the KF supporters, don't stop writing to the same leaders every few weeks until you get through. We have to mix the emotion, soul, and physicality together. We have a number of presidents and governments lined up to talk with in respect to these things. (2:45).
... the ethos is to give unconditionally ...
don't stop approaching the ambassadors. (2:50). Don't stop elevating your president (Trump), he needs a lot of elevation in his soul. (2:52). KF followers understand the teachings of this morning because it brings a new insight and dimension and you can run new systems, and understanding physicality, the actual physical process, if you understand this a lot of new medical systems can be developed, with this process new materials can be developed, the mutation of elements comes from this kind of process, because now you create new conditions. If you go a step further, instead of using boxes with divisions, place dynamic reactors with different combinations of loads. I promise you 2 things, (2:54). some of these will fly off. Look for production of new materials in the gaps between the reactors. This opens a totally new dimension. This brings us very close to the real workings of any system in the universe, at least with the knowledge we have now. Don't wait to see but try to understand what fields it creates the process, if you are waiting to see a physical process then you have already failed and haven't understood,

but if you put a system here and wish happiness, and find out which system was the cause of, transmitted and directed. Try the dynamic systems setup like the soul of the man. A scientific organization has started to construct these systems for He and plutonium and the rest, without using the actual material. (2:56). With my knowledge it is so easy to deplete every nuclear warhead in the world. The physical structure remains there but when they open it up there is no material inside. The whole knowledge needs expansion and to be understood, need to go to the next step and be comprehended in its real operation, then what you'll start to see are balls of plasma in different colors and positions, because they create a dynamic condition. I know a man who has a hundred cores setup everywhere but he doesn't get anything, if he were to set it up like this then he would start feeding the fields. Those wanting flight should setup like this, you'll find Star Formations (SF) (2:58). inside this arrangement and should see flight, the more interactions the more comes. because the ratio is 1:3 you need to absorb from 3 directions to be able to give from one, because giving is much more .. you have to receive more to be able to give more, that's why the SF is ?? , now you have the same thing here. Q: Can you speak of the fear? No I speak of the joy. Because all of our life is made of fear. Do you read this yesterday in the Arabic teaching. .. is it fear of you from yourself or from something you don't know? No the fear that we can't give because we'll loose that's why I am bringing this up. No the thing is you have to go in a different dimension. When you give, you give with what you can help, not with what you don't need. If you look at it that why you'll succeed. You look at it as if I give I loose, (3:00). but look at it if I give I succeed for somebody to succeed. This is something we have to resolve inside ourselves. Do you have any fear to teach your son mathematics and knowledge? Absolutely not. Then why have fear to give. Q: Because we are structured like this. No, we aren't structured like this, we have decided to be like this. It's a very big difference. Fear has been part of the physicality and not the soul and when you understand this then you don't need to worry about it. The fear has been used and elevated for matter of control of the physicality, the soul has not fear. You're a Muslim, look at the life of Mohammed did he have any fear when he demolished the statues, no because he knew (he was right) he brings people to be detached from the physicality on this planet. Statues connect us to the physicality of this planet. Why should fear be part of it. The fear should be in me not being able to elevate another soul, and not being able to serve the others and not them serving me, it doesn't matter what will happen to me. Then there is no fear but a joy when you see your son who from your teaching becomes a highly educated man because you helped to do it. Do you have a fear of highly educated, unless you don't want to see the success of your son. (3:02). So what is the fear. ... In the physical world fear is if you do wrong we'll chop your hands off and the rest. If you do this we'll do this, there is a punishment. Punishment is used to create fear in you to stop you from elevating your soul, so that you are only worried about what's going to physically happen to you. But the fear of man should be where I am going to fail to elevate another, then you'll have no fear because you'll give unconditionally. Redefine (fear), then you'll succeed. (3:04). 21

(3:21).

..now that we understood what went wrong in Germany, (3:23). we'll support heavily the KF German Manufacturing. Q: How is absorbing salts in the body connected with the N coating in the body? We have no N coating in the body, everything in the body is in a Gans and plasma state. When it becomes N then it's a matter state. The only N materials in our body are our nails and hair. The skin is not in the N layer it's a combination of the field interaction. Call it a day. Please continue to go to press and officials for One Nation, peace. (3:26). Music
End

191st Knowledge Seekers Workshop - Thursday, September 28, 2017
(Discussion on addictions, Role of the universal council, Social structures that put a lot of restrictions on their people, One Nation ID card (passport) with access to KF Bank account, "BRICK" to put travel ban on countries that manufacture weapons, Travel ban on American citizens who incite wars by selling machinery for war, The new technology can help addictions and give new insight to life, 5G technology in smart phones, Story about aunt who was told Americans try to discredit Islam by saying they landed on moon, Did they?, How to change the social structure, He carries knowledge from the depth of space and understands the totality, Making Gans in a way that imitates the body putting 24 small boxes together each one making a particular Gans and their fields influence each other it comes out balanced and effective, How to set up boxes for Gans for addiction ,)

(:12). We can discuss addictions and as a whole we can think of it as something of the past. We'll start with the Councils. The Universal Council is the connection between the Universal Community and humanity, their role will be more apparent once we open into the space and connect with the UC, then the U Council will be responsible for the men who go to space. Those who take to deep space and need help can go to the UC through their soul, and it goes very fast an directly. (:15). The Earth Council is for the man on this planet. Lisa EC for Australia speaks. (:17). In addiction the people she works with also releases deep seated anger. Help us deal with our issues. As you said before, look at things without sentimentality but still feel deeply and be able to connect on a deep level with everybody around us without our baggage in the way. I would like to hear how to help with the addictions but also to clear and clean our emotional baggage that we have attached to us from just living on the planet. (:19). I know the Gans help, but it is more like a pull, it doesn't take away the pain and anger but allows you to look at it squarely and move on from it. (:23). She speaks in Spanish.
(:28). Other members of the Councils, let me remind you that you are responsible for others and to share knowledge and emotions and build bridges, and not stay silent and let always a few speak. There are 20 odd members of the UC, build the courage to change things. Dubai member says addictive behavior comes when there is social oppression and not a balance in society to express, how to address that. (:31). The social structures are not just in Iran, we see it in Middle East, Europe, America and China in different shapes or forms. The problem is not so much how we can change it, but how to change the fundamentals, the essence of it. In Iran we see social structures and restrictions through different conducts of the government to be in favor of one side or another or a belief.
(:32). I have been aware of this for 30 years, I am a child of the Iranian revolution, when I

was at university I was involved in it, it touched education. ... when it's not an open society and there are a lot of restrictions, we see in Korea, Japan, society responds to what appears to be normality but is not. Most of these things comes from creation of nations and divisions so one can be identified in a certain way, we are separate. In Iran the first thing they taught us was history, that we are special, conquerors and we do what we like. If we eliminate this from the history of man, ... we'll solve a lot of problems. Social factors come when the youths can't show their talents. We see the American president impose sanctions on 8 Islamic countries, then these youth are trapped in their countries and they turn to radicalism, or forms groups or become addicts. (:34). The solution to this is to become One Nation and bring everybody to become one to be part of one family that there are no borders. 17.
.. in coming weeks the One Nation passports will be issued, blue in color and gold in writing, blue is for the planet earth and gold is for the soul which is a giver. With this we add the banking system. We allow social change by those who carry the One Nation identity card as we don't need passports anymore. It's to identify who we are, the place of birth, which continent and that's all we need to know. These cards automatically carry a bank account, which means you become connected to on structure, which means we financially support. These are part of the things happening in the background. We are not going to fight the old structures that takes a lot of energy. To join it is an easier path to change it. (:36). Together with our government advisors we see this as the only solution. In the coming weeks you can go on the KF website and ask for your One Nation ID card. As we increase the numbers in millions then we state the One Nation government and we'll negotiate with the governments as we are doing, that anybody carrying a One Nation card is guaranteed equality across this planet. Everything is getting done in the background. we don't look at profession or status we look at the level of your soul. These are after we get established and the numbers grow then we'll negotiate for taxation of KF members across the planet. (:38). These will all be progressively setup. 48
There is a huge discussion going on internationally, a boycott of Americans across the world, they call it terrorism because of the thing. ?? they're ?/ the Americans moved to sell arms, so we want to stop this. A boycott of American citizens is highly likely due ?? Bricks, which means the ?? Americans become the terrorist organizations. They have to become a nation to show that they are not producing arms. We have to do it because who becomes a terrorist if you don't sell arms to them, nobody. (:40). It will go before the UN in the next 2 years, that any nation that sells arms will be recognized as a terrorist nation. Governments will understand that there are no need to build arms anymore, let's put the money towards peace. We call the people with the bombs terrorists, but where did the get the bombs, so the nations that give them the bombs make them into terrorists. Through this we solve the problem at the root. In the next few years Americans will have to confirm who you are before you travel because the cards are changing and the governments are realizing that even in America it is done by those who create the arms. If 4 or 5 nations start to put the ban on the movement of Americans then they'll realize what needs to be done. If none of the Americans are terrorists then how come the rest are.
.. (:42).

(:50).
.. it doesn't matter if I get killed, it's your job to carry it on ..

(:53). 56
.. all the factories are getting setup to support the whole nation ... when we change the way we think we won't need social structure to separate. There will be some abuse 10%, when I worked for ?? there was 10% loss to stealing, 8% from the employees. We saw it in Peru and in Germany people charging $600 for a weekend in the name of the KF, we shut them down. We don't have any connection to them anymore, nothing came back to the KF it was all for themselves. A lot of people will join us to get benefit, we are aware of it, but in time it won't become like the EU, one person of the Turkish family live in EU and the rest in Turkey but they get paid for living in EU. This is not correct. We understand the problems European "correct conduct" has been created by some. They have to understand that it is not us taking from them but us taking from our soul. When I carry the ideas of the KF I am not a taker, I give more. (1:00). I put more time in, I teach freely, I clean the streets, but I know my child will not go hungry, I go to the bank and take freely, if I feel to take them to a restaurant tonight I can because now it's not just me but the whole KF family supporting me. It becomes a new evolution in understanding of social structure. It's not a dream anymore, I have done al of it, it has been set and will come true. It's not a fantasy, it's a reality that will come true, it is supported by our technology and factories, supporting those who need it, to be in the front line, we have seen it in Africa. It's now 2 months we moved out of Ghana Atomic, we are paying our staff the same as before. Because it's correct and not their conditions forced on us, but as a foundation we do it. ... we don't just talk we do, I live comfortable life that suits me, but at the same time I work 24 hours a day. I what I need when I need it and I enjoy sharing everything else with the others. .. why should there be a ban on Iranians or Moslems, (1:02). when the money for the Americans and British comes from the Saudis who deposit into their accounts. We are taking it and punishing them. The world leaders have to understand the new criteria, they have to learn to negotiate with the KF and we conduct ourselves correctly. The KF management meets every week to make everything that comes out to be of correct conduct. We talk and work 20 to 24 hours a day on long term plans for changing humanity. If we need sleep we'll sleep, but the rest is bringing change and development, negotiating, we have teams of people setting up the structure. We negotiate with governments in a different way, we respect them, we respect the American president as much as we respect the Chinese president, but they both have to understand it's time for change, and instead of spending so much money on thinking someone is going to harm us. What if we do so much good nobody would even think of harming you. We have to change ... it's for us to understand and do and not for them.. (1:04). ... we have allowed it to happen that we think one nation is more superior to others, now there is One Nation and no one is more superior then the others.

(1:08). Addiction is escaping for a few minutes, what if we elevate the soul of these people so that they see a new way.
.. the new technology can help give people the strength to overcome addiction and gain a new insight. .. I have planned a new social structure (starting) from zero, when we come to a new place we set a new rule. 500 years ago we found America and formed a nation that has now become the biggest killing machine in the world. Now we'll walk on planet earth as if nothing existed before and we set a new structure, it's the only way to do it.

(1:10). This is not being big headed, this is being correct because we can't change thousands of years of abuse and everything else. And then we negotiate. The white man had to negotiate with each red Indian tribe, we have to do the same game, but this time it's peaceful, we give to each to bring the change to one government. The world bank is the backbone of it because you pay your taxes to one bank, and we negotiate with governments. You negotiate with governments, equal taxation for everyone across this planet, and equal access to wealth for everyone. Very soon we'll release a machine that you can buy at the KF that you can produce anything you like, give me another 5 weeks and hopefully it'll be in the market. (1:12).

(1:22). When I was a little boy one night there was a commotion on the street, someone got robbed and the thief was hiding amongst the people crying out thief, then the guy who got robbed noticed him among the people and he was caught. It's the same now with the Americans, calling everybody else terrorist to hide their own terrorism. .. It doesn't pay anymore, now it pays to be all peaceful. World governments have no choice but to accept the new order. We don't touch the world banking system, we create a new way, one bank for all with access for all, but we will also release the systems that produce as much gold and silver as you want. And the systems that feed you, give you energy. I kept these on the promise of one nation signing the contract and agreement and I am waiting and his Excellency knows it will be done. The process is very simple, how we change it is in our hands, if we miss this opportunity when will be the next chance, because this technology will be used to create new weapons and arms, (1:24). or it will be used to create peace forever on this planet.
(1:26). Q: Are you aware that we all have a bank account that we are not aware about? Yes, we are aware and have talked about this.

(1:34).
(1:38).
knowledge for peace is for individuals ..

(1:41). Lynn says there are more then one version of America.

(1:44).

(1:48). The ban goes on those who travel to incite war and produce systems for war, or go under disguises as tourist to create war. We saw this recently people going as tourist and businessmen to another country to start a revolution. In the future I'll explain how it was setup. Governments are becoming wise. In the papers it will effect 5% of Americans, like when we go to space only 5% will go. ... there is a new understanding, any email from American companies that produce war systems will be blocked, so they can't communicate to sell goods to create war. These are the procedures at hand. These countries see this as a way to protect themselves from what is to come. (1:50).
The first KF clinics will open soon... we have to clean up the mess with the new technology .. totally new products will emerge from the KF factories to help society. You said you can't afford to see your mother who is a couple hundred kilometers, with the KF Card you'll be able to, we'll pay for it, you'll pay for it through your soul. because we'll

produce as much gold as needed to back the KF banking. We'll be the only nation that backs itself, every penny with gold. You can never run out of spending and we'll never run out of producing gold. We know what Ronald Reagan did, took the gold backing away from the greenback and the whole mayhem started. If gold is going to be the backing then KF with the new technology will deposit daily, until we devalue it and everything gets corrected. Peter showed how to make material and a lot of you missed it. (1:54). Now we show it how it has to be done. We'll produce whatever the banking system needs in physicality because we understand the process and knowledge of creation by creating. ... this is how we destroy dependence and make man to be free. .. I can give knowledge through my soul and you'll receive it. Mention my name through your soul and you'll receive it. We are not talking fairytales, (1:56). but the reality of the new science that a lot are not ready for. I would like to know what the banking systems want us to have for gold deposits to run a global banking system, 100 or 200 tons, you spend and I'll produce. New manufacturing in a specific area. We'll setup a world police force, all the people creating mayhem will be in courts very soon, but not in the courts you are used to, everything is getting negotiated by the governments who understand the change and are there to make the change.
(2:00).

(2:03) Q: How can you be sure these concepts will be successful when the "new war", will be 5G technology we humans as energy and frequency are controlled by 5G, we already see bizarre behaviors and addictions with the new smart "dumb" phones? I think it is something that you have to understand and then apply it yourself, there is technology that goes over the KF and we showed it to Americans 3 to 4 years ago. The system goes according to the peace of the soul, so no one can reach (to interfere). We have shown it. The beauty of it is when the Naval forces arrived in Romania, the officers walked off, because their government couldn't protect them, but in fact, they become aware that there is no need for war, because the latest machinery doesn't work. ... there are no technology besides KF. .. you can block everything, you decide what you receive. I use it in my house. You have been taught and can use it. Go over the teachings and develop it. Nobody can touch you because your soul won't (allow) your physicality to receive it, that's it. You'll get worse then 5G in the space, what would you do with G10 in the space, are you going to walk like zombies in liquid shape, or you understand how to protect yourself that your shape remains the same. (2:06). This is a non-existent fear when you understand the new technology. It's no match. Understand the technology I have taught you, I have given man every knowledge to withstand not only the toys the humans have created, but the real condition in the space that is thousand times worse. So if you get G20 in space, are you going to be non-existent and stream lined or I you going to know how to handle it. You have the backbone knowledge to go to G100 or 1,000 if you like. What is the worry? Simple tools and simple understanding lets you all these things. We came through the science and through it we can enforce the conditions of peace. They says what's science got to do with the soul and peace, now you have the (higher) science that it can't be enforced on you. When I said to you that we'll setup our own banking system and back it, most of you said to yourself, oh this guy is big headed, but you overlooked the information that has been sitting there, we can produce gold and silver out

of fresh air, so we back it. So simple. (2:08). What more can they come up with. Who has the better computers. 12

(2:11). Q: Are you going to approach the Muslim nations in a specific way because every nation has its own mentality. Every new technology has its own problems to be understood, and it creates a problem for itself for those who don't understand, in that type of mentality and I have been witness to it and it has baffled me for years. When you speak to the Islamic world, or the Jews are worse then them if you go in the real sanctum of the Christianity or Buddhism, it's all the same. They all think they are the only one, best one, and only solution, then they have to ridicule the other that they can confirm they exist and can have control over them. The beauty with the KF we have no gurus, church leaders, and we are our own leader which is the soul and correct conduct. (2:13). When I was a boy and the Americans landed on the moon, my old aunt cursed the Americans. I asked her what the problem was, she said, they say they have gone to the moon to discredit Islam. Because in Shia Islam Ali split the moon in 2 with his sword and that why we always see the moon in Islam. She said, they have never been to the moon they just lie to discredit us that now the moon isn't pure and clean.
... there is no use teaching them ?? , teach their soul then you'll find out they already know. Use the new way, new technology. (2:16). I wonder ... did the Americans ever land on the moon? Or was it the promise of the president and had to be falsified to become true. I put a challenge to NASA, as you know I have been banned at NASA that no scientist should speak to Keshe or KF will be dismissed immediately. That is the fear of the biggest space programs fear of KF space technology. This is the policy written in NASA HQ, we can bring management to tell you this. My question to European Space Agency and NASA they have so powerful cameras to reach light-years into space, why has no camera focused on the moon to show us the footprint of Armstrong. Was the Aunt correct. Who do we believe. Or is it a policy to discredit the others. ??? incited by one man, which now NASA is trying to wipe his name off everywhere, Mr. Von Braun, from the thing which happened in Germany (SS). They say there are 5 Jews who have changed the world. (2:19). The first was Moses he said everything is law, 2nd Jesus he said everything is suffering. Marx capital, Freud sec, Einstein relative. I wonder who the 6th is and if he is going to change the whole situation. You have to understand what we expect from life and how the new technology needs to be used to change that position. There is no time to fight because then it goes against the KF ethos for peace, if we fight to create peace then we are back in the same track. Or we live a peaceful life and let the others to join us. (2:21).

(2:25).
(2:35).
(2:42). Defines addiction from Wiki.
.. we are all born addicted from the second you're born, even while in the womb, so it is part of our structure. What are we addicted to? (2:50). Look at the birds and bees, and then at man, we are addicted to reproduce to guarantee the survival (of species) and for the addiction we get paid a stimulant. We are born to be addicts and we get a reward. In our sexual behavior, we get pleasure of the senses for a few seconds and that's the payment from the paymaster. The reason for it is to guarantee the survival of the race. If

we were not addicted we'd make love once have a child and that's it. It would be systematic. But the return is a reward and then we get addicted to the reward. Humans are born addicted to the rewards of the pleasure to reproduce to guarantee the survival. Addiction is part of our structure. What are prepared to get it and to loose because of it? Drugs, sex, gambling etc, all fall in one pattern, self-gratitude, I have done my job and manage to fertilize the egg, to take pressure off myself, in a way the reward is the same (2:52). what is in it for me, am I getting satisfaction out of it. Go back on our teachings, most addictions have an emotional reward that involves a physical action. This means that this part of the emotion connected to physicality has to be looked after. What do you do in the brain and soul? The connection between the physicality and emotion has to be corrected, it needs to be put right and connected. In most cases you need to elevate the emotion (ZnO_2 and CO_2) but it has a physical connection because I make love to get my reward but I need to use my body to do the sexual behavior and then it becomes habituated to it. It has a connection to Mg because it connects the lack of physical connection, or repetition of the motion, but it internally connects your soul with your physicality of the brain. There is a lack or shortage or need for a connection of the internal structure of the brain that you don't need this to elevate or increase the (2:54). emotion so you need the potassium (K). Internal connection you have ZnO_2, CO_2, Mg, K, and CH_3. Now you have to find out what energy is lost in the process of gambling or sexual behavior, that it needs to be fulfilled as an energy that becomes the reward for the body so you can fulfill it with CH_3, which as an energy reward is part of your connection. This stimulation is how much we can change. Do we want to change or through our addiction we satisfy self-behavior, ADHD Attention Deficiency because I need attention to myself for myself. This comes to play with Omega-3 for reproduction of the cells which can be part of the delivery of the reconnection line of the proteins inside the brain. Heavy on the behavior part of the Omega-3. (2:56). If you can get this process that you don't increase too much energy and increase the balance in the emotion but balance the Mg and K and you have cracked the addiction, I have done this many times. As Caroline explained yesterday, sexual addictions you are advised not to touch (?? stop right away but gradually), reverse, like smoking if you are addicted to tobacco and have smoked 30 years your body has adjusted, you have to bring that under control in a different way so that the body doesn't crash. 56

(2:57).

(3:00). How to change the social structure.

(3:02).

(3:07). He draws a combination of boxes. How to make ZnO_2 for addiction. ...

(3:10). Then stack 3 box combinations on top of each other.
... something with AA and close to omega 3. You only use the LP, the water and not the Gans itself. ... the first and last box need a balancer, red LED, let run for a few days.
(3:14).

.. all the Zn are not the same the ones in the center are at the level of the soul of the system, ... these can overcome any kind of addiction except sexual, because that is the Zn out of the DNA and RNA we can't change. (3:16). Otherwise we'll stop ?? producing and become chemically modified beings. Any questions? Q: what do you use for the K and Mg? I usually go for plant based. I use homeopathic tablets because they carry the field strength and they're very good to use but it needs a full understanding of it. We haven't used any Ca in the system because there is no need for production of new cells, it's just changing the strength of certain cells. Q: Do you use Mg as metal or salt? I use Mg as vegetation because the metal has the problem and you have to convert. The homeopathic are already in the strength balance, you just convert it. You need to know what you are doing. (3:18).You can use vegetation that are highly rich in Mg and K. So we don't make plates then? No, no. These are emotional factors, with the plates you are dealing with leg cramps and that kind of thing because that links to the Cu, but for the brain and emotion of the cell you don't. This is not a medicine it's understanding the process of the fields. We don't enter the medical application. It's understanding the process of the evolution in the structure of the brain. Q: How do we connect to those cells? Use the wires in different ?? layers. I use Cu wire, after awhile you see all your wires get N coated anyway. DL took many pictures of these settings, if he would be so kind to release them to my website. (3:20). He is very kind but it depends what benefits it has for him. I used to have one in my lab that I could manipulate. .. if you take these Gans' and make the Gans water you'll understand certain things, this box carries Mg salt and this one K salt even though you started with Na salt. Those salts which people have been looking for to find you'll find here, because now you are in the plasmatic condition, the AA on the top can't be produced if the right salt of the thing was not there. I used a simple mesh > Cu, mesh > Cu, (3:22). but in these systems your Cu behaves according to Zn if it is connected and produces, that's why you see different materials being produced in the box, you see green, white, orange which in some boxes are blood, it's all in the same box. If you take these Gans' and make the same system in a dynamic way you have very different processes. For doctors working on this, produce the Gans then take them out and put them in dynamic systems of the same setup, then you'll see different things. You'll produce new materials. Any other questions. Q: Would the other 2 layers of boxes would they have the same repetition? No, if you understand this has to do with the brain and the soul, the center layer is your lung and heart, the bottom one is the stomach and rest below chest, .. once you make one of these boxes you can keep on using it with a different way of loading. (3:24). ?? if looking down, heart here has red muscle tissue lungs here (doesn't have red muscle). You can't use Cu in the lung area. If you have disk problems you use Mg for them, for cartilage. You can do a lot with these boxes. It needs a lot of experience, I worked on it for years. In the bottom one Liver, K, pancreas. Needs a lot of knowledge. Q: How do you approach that knowledge. God doesn't have a measuring cup. (3:26). But you work on a principle that the body takes what it needs, so you don't need to measure. The body itself does the measurement. Q: You have to have some rough guidelines, intention. No, you make available. Do you visualize it. No, you need to have the extent of knowledge that I have about the body of the man. Different salts and everything else is considered. I come from a family history of medicine men but I don't know how much of it comes through the brain that way. It's a knowledge. This structure applies to every being in the universe whether or not they have a physicality.

(3:28). You structure a being in the way it is. Doctors of the future will learn to touch every creature of God, and they'll have feelings of being God because they can touch every condition and help every being, and they'll be fed more knowledge. **I carry knowledge from the depth of the universe, so for me these things are very easy because I understand the totality**, and as we mature more in science we can do more and mature more. You can pinpoint with accuracy which organ you want to grow, and where there is a problem, if you have a heart valve problem here you can literally pinpoint to change it, or if you have a blood blockage in the veins of the heart you can work with it and change it. Q: Trees are considered vertical people, can the cells of our body be considered vertical people as well? (3:30). will the One Nation resemble this structure so that humans become vertical people as well. What do we understands about the soul of the vertical people? Where is it and how is it positioned. Maybe next week we inspire each other on this. The soul of the plants have positioned themselves in a very different way then humans or other creatures on this planet. Rick says I'm not sure what Mr. Keshe is addicted to that we could entice him? Sharing knowledge, he is addicted to us. Sharing knowledge if it is used in the right way is fascinating because it shows the advancement of the race. We come to share knowledge to bring advancement and peace and we know exactly what we have to do, but we always say, we always give man a chance to fail and if he does we are there to give a helping hand. (3:32). then go to the next step and start again, but this time we'll achieve everything we are here for to open the doors, it has been taught enough that half cooked ?/ cause a lot of problem, but this time we'll go through it and do it correctly. There shall be no problem. The only thing we have to consider the new condition the KF has creating to create world peace and we have all the tools to do it. We have tools to disarm, to create the knowledge to create everything that every government needs to get guaranteed that the banking system works which is owned by KF, and at the same time we have systems to deliver if there is a blockage. The choice is to work with us to change the condition and at the same time make life comfortable for every being on this planet. No man needs to die on the streets of India and no man needs to live with billions of crimes on his hands of what they have done to the others that their soul can't be elevated. Thank you for today. I hope we share knowledge next time in a different way. (3:34). My soul goes to all of you and humanity finds peace. Everyone says "I am present", it means I give from my soul for the elevation of the others. Let us know next week what you have done for the leaders to be enlighten that we all can learn. music
END

192nd Knowledge Seekers Workshop Oct 5 2017

(Topic on plants and what the feel and have soul, The process of converting energy from the universe and not consuming and killing plants, fish, and all other life forms on this planet, stop hunger not be eating but by allowing the body to absorb the energies it needs for the pleasure of existence through the correct conduct by absorbing energies from the universe, How plants reproduce just like human and the rest of creation, the soul in the cell of a plant is the same as a soul in the cell of a human, Every cell has all the

information needed to reproduce, Manure is like a Gans but in solid state and less giving, No one in the universe consumes energy (killing) like man does and we have to correct the system, Talk about Chinese culture and Yin and Yang in plasma terms, , Rick demonstrates how the plastic balls charged with static electricity reposition themselves, An question about neutrinos or energy hitting the earth they are just packages of energy and man has put a special name to it, Keshe Foundation ID cards connected to a bank account,)

(:11). The topic on Vertical People. Today we go more in-depth how we look at the plants as food, flowers to look at, or the trees body for different uses by humans (wood). How do they feel, how has their soul come about, and do they create themselves in a way to be used, in a way they sacrifice their lives for us, to give us a chance to survive and have a comfortable life. Do they produce themselves knowingly that they elevate the soul of the others? For example, we know that plants can literally destroy themselves, they die or create a condition that they don't want to be anymore. But how come they exist and know that through their existence they give life to another being. The plants give to others like sap for a bee or grass for a cow, or be it the food man eats. Where is the soul of a plant, where does it start and how does it come about. How do we understand it and assimilate it into the knowledge of the space. Understand that the life of the man, (:14). of the plant and animals all started from the same point. Why have we taken different directions and what process has made the new creations. ??? at least 6 different generations of life exist simultaneously then we'll come to understand the process of the creation in the U. We have to understand our own companions on this planet that where created at the same time as us, the human race and the other animals. We understood the presence of Cu has lead to the split of the body of man into 2 halves left and right, because that is the behavior of the Cu, it has a balance ?? energy in comparison and presence of Gans', but what has happened with the plants. We have the life of a plant that we as totality have accepted, but what of other lives. We know we are in the middle of the stack, and not the top of the animals, the horizontal people, but there are those (beings) who exist above us, the floating people or floating life. WE are aware of them and talked about them before. We are the bottom eaters, we use their bodies and existence to elevate our own souls and bodies. We never considered this before because we only looked at our own creation (:16). we called ourselves the king of the animals. The faster we find the reality and confirm and conform to the universal systems, the faster we as a race become part of and understand the totality of the operation of the Universal Community. The UC is not to go into space and find others, ?? who we are the bottom eaters of, the floating people. ?? the verticals, the fish, those who exist in the center of the planet, or within the layers of the planet. Things are not just as we see them, there are worms and beings who live below the surface, scientists have found life 10,000 meters below ground inside the earth, which means life exists in every level. It's that we have to understand the conditions that these life forms have come to live in, how it finds the conditions of its environment to confirm its existence and mutate to be able to exist within that environment. Once we understand these layers of life in the human mental condition of knowledge, then we see that it's the same for every other race in the space, then the space opens its eyes to us. (:18). because now we have become unconditionally accepting that it is not just what we thought that life is limited to fish, trees, some worms

and some other species and that's it. If we see that the atmosphere of this planet can support composite life forms from the center to the outer atmosphere, then it will be easy to understand that there is life beyond the atmospheric conditions of this planet. Then we have to understand how they are composed and how they live. The moment we respect the life of every being on this planet and beyond, it is the time that we mature. We'll become true human beings and true members of the UC. It is difficult because we have been used to eating (:19). consuming, abusing every living thing on this planet as our right that we have lost the insight. We have lost the right of being a human being who is in charge and control of our own existence, we can go a step further in that we don't need to consume or destroy. But is this justified, because what is going to happen when I learn to use only energy from the space and not energy from within the planet which is already prepared for me as packages of energy. As long as we don't understand or try to understand the totality and work of the U, and understand that we have access, the pleasure, the knowledge, and everything that goes for man to use the universal energy without killing or destroying another life, then we can go to the next step, but as long as we don't understand this we will not progress. It's a habit of millions of years, if I stop eating what about the cat, fish, the tree that is eating. Can we adjust the process, they might like to mutate to a new condition, but they will have stopped what we have stopped. Or do we just change the system for ourselves that we don't eat other beings (:21). and entities and we leave the fish and the lions to do what they like. Then it will become unbalanced and when the next generations see the animals they want to eat them and repeat ?? because it has a different pleasure, it brings a lot of other things to them. So we have to understand the totality of life on this planet and why today I would like to teach to myself and maybe others with me to learn the process of the soul of the plants, then we go one step further. The mankind has to change course and understand that he is not the user but the protector and in that phase it is when we will really change the course on this planet. We have (:22). considered ourselves as kings of animals, we have done everything to them, cage them, tame them, we cut them. Once we learn the energy consumption, would it not be better to teach them and accommodate them that they don't eat, kill and consume**. Is the planet earth the only place where people eat each other? To me a plant, fish, dog all count as people and they are the population of this planet. So is this planet the only place, more or less with a few exceptions, YES, but they consume in different ways. Yes, we need to pass this point! We have to learn how to change the course, teachings like this and from the others has been the prelude for coming to that point. Go back to the writings of the prophets of the past, thy shall not kill. Not kill a lamb, cut a tree, kill other things to eat. And that by killing them you end a cycle of a soul, not the physicality of a body. Can we kill a soul? Yes we can. Those in the future who gain that knowledge understand that, that is the last thing you ever do. (:24). Can a soul die, as I explained before yes, but can we be the cause of his death? It can be done, but it is done only through the position of balance when the soul sacrifices itself, and not for man or another soul to end its life.** These are the things we have to understand. First we have to mature as a human race then we can understand these processes and how we can change the course, **stop hunger not be eating but by allowing the body to absorb the energies it needs for the pleasure of existence through the correct conduct by absorbing energies from the U**. It is so easy to do and when you learn how you don't want to go back to

eating (food) and destroying life. For this process we not only teach how to make systems in physicality, but we have created structures that by teaching we elevate the soul, so you understand the operation of your soul and then through it you bring systems and conditions about that not only teach the others but collectively we set an example for that process so we don't repeat the mistakes of the past. Part of the process is to understand that the soul is our creator and of physicality, then we have setup structures like the EC and UC and other organizations around the KF, (:26). to gradually convert everybody to that point. It's very hard to change billion years of habit over a few day or months. It takes time but in due course no one on this planet will destroy another life. One animal will not consume another, because the correction in the process which is a lack of a few bits of energy and materials, we come and bring that process about (satisfy that lack). In the beginning the Councils will take over for mankind but in time they'll be the guardians for mankind going into space, and for us to understand. The UC will be the translators of the Universal Community to the level of the soul of man. They'll become the translators of the information. We see the EC coming into position to bring about the change .. they are learning themselves and slowly coming forward. ... in the past the prophet came and setup things, but now as we all understand ourselves, collectively we are setting up the soul for the present lives and future. (:29).
.. by educating the soul the physicality follows, then all the killing stops. In the past no one could see how the prophets receives the messages and the changes they went through to be able to translate the message. Now we see the evolution of the EC and UC as they grow and share the messages they receive with us. We share everything together and then we see the evolution of the totally of what I call the Messiah of the human race for the whole planet. **Once we learn we become Messiahs for other races in the space we come across because we show them through those who have first hand experience of the damages that these things do (what happened on earth), so that they themselves will not do it**. This is the beauty of it, when you apply for a job they ask for your experience to see if you qualify, and want to know what you have learned that you don't repeat the mistakes of the past. (:31). As the human race we have experienced all the devastation of all the wars, when we go into space we know what it means to loose and we teach the others not to do what we did. We become the best messengers the U has ever created, because we'll talk from experience and that counts. We know what destruction and loss mean. This is the beauty of this process, from the material state we come to understand the process of the soul and through that to become responsible for our conduct. We ourselves become the Messengers of the Past. Now we see the connection between science and what we call faith, which is us, believing that we are the creator, and control everything through our conduct. These are a lot of responsibilities that we don't want to accept, that we refused to accept, but now it is on the plate and we have to accept. We have allowed the growth of organizations around us and like a child we watch and see how they mature. The maturity at the point of completion is the maturity of the human race to understand and enter the next step. I would like to give a chance, as usual, to any members of the Council to speak to enlighten us before we go into the knowledge seeking part ?? (:33). Caroline from the UC speaks. (:37). Christian attributes of God. and Muslim 99 Names for God. (:39).

(:45). The Universal Community has other attributes to add to these, but we're not yet ready for them.

(:51). We all come from the same energy, same manifestation, and this is us, whatever you read on the board, The Most Gracious, The King, etc.. In Catholicism they say Mercy, Grace, Love. It all comes to the same point, this is us. up to now we understood working with the matter, we melted it, forced it, shaped it in to a cup, plate a machine. Now we can use the energy to do the conversion. Now we understand that the energy conversion from my soul has been forged to be my skin, eyes, lips, liver and everything else. This time we have a say, like with the cup now we can forge our souls to be physical, practical and visible on this planet or on the other planets. This is the process of the progress that we have to understand. And a lot of people would have a problem with this, because accepting the responsibility for ones soul is the biggest opposition to this cycle of the knowledge for man, because up to now I was provided (with knowledge), made to fear (certain things), I was institutionalized in the name of faith. And now I am in the faith, the path of belief, (:53). I believe I am correct to do it this way and I do it. A lot of people will have a problem in accepting responsibility for their own conduct, and this is where the game comes to. We'll come to it, we have to, and by accepting it we'll bring peace. To understand and accept the position of our soul, this is the key to peace. ..

(:56).

(1:00). Alzar member of UC for Farsi. Talks about language and when we enter the UC we'll communicate with our minds. She says language is just a temporary stage until we get to communicating through the mind and not get stuck on the words. Manipulation using language and not communicating in an honest way.
(1:09). Ursula speaks.
(1:15). In Spanish. ... Mr. Keshe says this is how we elevate ourselves. (1:18). We keep speaking about the different Councils and languages, but what we have to graduate to is to understand the language of the soul. this is the ultimate goal of this work and the point when we don't need languages because the language of the soul is universal. The sun is a soul, all the suns in the U shine the same, but they have different brightness and slightly different colors, but they shine through the same principle, likewise it is the same for everything, to be the light, the language is the light. It's for the recipient to decide what he wants to convert the light to. Your soul radiates and by intervention of your feeling converts that to anger or the same field to joy, the same fields are the beauty of the eyes, to pleasure, or pain. It's what we convert according to our emotion, that light, source, sun, soul. We have to understand this, why we started with the matter state for you to see the fields, you tested it and know it exists then you put it in a core (rotated it) and seen the fields (interact). (1:20). All of this is to bring man to one point, to the language of the soul and when we understand this we'll progress very rapidly. The beauty with this cycle or process is that we are not creating monks, priests, mullahs, or anybody else. We become our own guideline and have to judge our own progress and determine how we want our soul to progress to the next level that we become part of the totality, otherwise the (old) game will carry on, but not this time because many people have been enlightened and will carry on very soon. We have seen some TV and radio stations are

giving air time to the KF technology. It means the breaking through has started, but this time it will go like a ball of fire, because once national radio and TV stations start broadcasting it will carry on. Many of you who have learned the technology will unknowingly will become the teachers because you're a step ahead and you can teach the others so they can teach themselves. ... if the teachings come from us in the correct way then we can progress to the next level. (1:22). Q: When I cut the parsley (it continues to grow) and pick the apple that falls on the ground is this killing the soul? We have to understand what is the apple and its function and why did the plant create it and give it different colors and tastes, otherwise there would have been only one apple and that's it. Is the process that I provide this, this is what I said, freely available, it's made available that it allows for expansion, because it has a purpose, for the animals to eat and take the seed somewhere else that it expands. It's the cleverness of the plant and not that the man, animals, or the birds want to consume it. The plant has valued its soul to understand its function and it wants to expand so it can create more of itself. Plants are highly intelligent. (1:24). **They have a beautiful soul. If I want to expand so I can have my child, humans make love, animals mate, so what does a plant or tree do? They can't throw the apple so it falls within its own shadow, it will lead to its own demise. So it create something that will be taken somewhere else.** What is the seed of an apple or a grain of rice? It's a womb with a food supply. He draws a grain of rice. There's a section that **is the seed and around it the energy pack which provides the food for it when it wants to grow**. Change the name call it an egg, it's the same story, there's a child already made ready, in the same way the mother has provided the food for it to grow. This is the soul of the apple ready to grow, the same with the egg yoke. If you expand it, it's the soul of the man but we call it a brain. The cycle of life is the same, it's us that could not understand, but now we do. We create children, (1:27). the tree has created the child and so has the rice plant with the grain of rice. **The whole thing is exactly the same process and they all have souls**. .. And strange enough (all 3 of these souls) speaks the same language. They have the same emotion, it's us who have been blind to it. If you nourish the egg the right way you get a chicken, nourish the rice seed and you get another life called a rice plant, and if you nourish the human egg you get another human being. It's all life, we just weren't aware of it and now that we are we are responsible for it. **We don't go and eat our children, but we go and eat a child of a chicken, or a child of the rice**. Because (we feel) it's our right and we have done it so long we have to do it. Now it's time to ask the question, is it my right? Has it been my right, just because others have carried it on, it doesn't mean it was right and that we should carry on with the wrong. (1:29). If you go to space would you like somebody to come and eat your child, because you are another ?? Or is it correct that you can't consume other lives and in the space you don't do it so it shouldn't be done to you. To be able to fly you have to train a pilot, and to take mankind into space you have to train the man to understand the rules of the flight in space, and this is part of these teachings. I am teaching you everything about the soul, energy, and everything else, and the whole target is ?? we are literally walking you through a funnel with a very small hole at the bottom and mankind has been way up here at the top doing every kind of damage that he could. Gradually he is getting trained that he shines through like a torch as one ?? in the U. Mankind isn't unique he is like everyone else in the U. To th e?? in the U, when you shine you do it like the other stars, and this is the whole purpose of these teachings. The only way to get you going was to give you

some sweets, have some free energy, you can do something with your soul, N coating for your heating, or whatever. (1:31). You all have walked the path. This is a mastership of a teacher and **I am master at what I do and have done it many times in the U**. I understand the weakness of the student but I don't punish him for the weakness, I glorify his beauty, which is the soul and he tries to get to that point but in fact, it walks him through the door. It's not a catch, it's the education of the soul, the freedom for the soul. When you talk about the plants, as we did with Vince and Rick before about the celery. Do you first ask the celery can I chew you or kiss you first and then chew you, or has the celery created itself for you to chew it because it had to have these leaves that it allowed the plant to grow to create seed. **Not all of the seeds need to grow, but the leaves are there for you to come (be attracted to and spread the seeds around). The plant has already calculated that it gives something in order to get something**. Thy shall not steal. Who makes that decision, where is the soul of the plant, or the soul of a tree. As with a tree we cut the branch and take the fruit but the tree is still there. You cut off the arms and legs of a man he is still there, because the soul is still within the structure, even though every cell carries its own soul. How come the plants have become what they are, where is the soul of a tree. When does the point come that a plant doesn't want to grow anymore, why do the plants have roots, why does the soul of the plant change from the soul of the man, in a way of guaranteeing the survival. (1:34). The position of the soul of a man and that of a tree are the same, but mankind decided to go (towards the earth) and in the world of vegetation they went the opposite way. The soul of the tree is (in the roots under ground), the soul of the plants, the position of, the creation of, is slightly different then that of the man or the animal line. In **the man we kept the freedom of our soul but with some attachment condition to the earth, which means we still would like to be free but we accept certain connections**. If you look at it your souls fields are very much like a sun radiating downwards and in interaction with the earth MG field, and in composition of changing of energy for this soul to be independent it has created arms and legs. Our soul which is its own AA from the condition of the gaseous part has decided to keep its ratio mass to use a specific field strength of the O, C, and H of this environment, whereas the soul of the plant has decided to use a slightly different strength of the same thing. (1:36). and this allows it to be more dependent on the matter state of the planet then the soul of the man. **The soul of the plants sit just between the roots and the stem where the life starts.** When you pull a plant out the roots are its connection, its legs, how it wants to be connected, and the soul of it sits just below the surface. It itself decides this is what I want to have so that I can make more of myself and spread my seeds. The apples tree does this also and so does the man. Due to the AA which is connected close to the strength of the earth level, the seeds on the trees or vegetation have taken this position, whereas the soul of the man has decided a different way, I stay independent, I still shine like a sun on earth but I keep my distance because I choose a slightly different strength, and choosing a slightly different strength from the gaseous part allows me to connect to Ca, Mg and to many other elements of this planet, and what is above that man doesn't yet know about. Whereas with the plants he can only connect himself to Ca (in the earth) or Zn or whatever. (1:38). If you look at it in reality our soul sits above in our head, in the plant the soul sits between the connection to earth and the use of the environment of above, in fact it has 2 ways, it has grown in longitude, where without ?? we have decided to grow in a different way in altitude and longitude, whereas the plants

decided this is my longitude I stay at this level and I decide my altitude by what I can get and how much I can grow, and how many fields are available forcing me from the earth and the fields available from above to become what I want. The existence of a soul of a being is the same, without it, it shall not be radiating anything, be it the soul of the man or plant. Then **I decide to have this condition, I like to wear a Chinese hat and chopsticks so anybody that likes these things is with me, then I can have a Chinese partner to create Chinese children that it shows I am Chinese and with it I allow him to marry another one to spread more of me. The apple tree does the same.** Man has gone the wrong in so many ways. (1:40). in not understanding these things and we see in the history of man we see a lot of abuses like this due to misunderstanding, but those who did understand it abused it as well. There is no difference between us and plants, but we think that because we can speak and made the computers and a microphone that we are more intelligent then an apple tree, a celery, or a wheat. Because we don't hear what you call the frequency of their communication, we think they are just a tree, but very soon when man as a race opens his eyes he'll hear their voices of the soul of every entity. In hearing means respecting and understanding to accommodate, this is why we say you can't steal but are given. Do plants give that through it the energy they have created gives elevation to your life, so that has now become your soul, to give from (through) you to elevate the others. If the apple gives a red color and is sweeter it is eaten more, through it he can spread more of his seeds. It knows it has to have the pleasure of sweetness so it can spread its seeds more. then he has given the right, (1:42). or has he given the sacrifice to give to take. What about if you come to the point of understanding the soul of the tree that I give you freely what you want to spread and take your seed where you want and that it gives you pleasure that you expand, then you don't need to eat the apple. In the mythical language of the apple and Adam and Eve, has the meaning of when man betrayed his own soul, that was the poison. that was the chalice (Holly Grail) that everybody was looking for, betraying ones own soul, then you understand more and it becomes part of the theology because then you take the fields off without taking the essence of the life off. This is what the man will face in space and this is the biggest dilemma for those of us who have been active around the U trying to get this race corrected. To you it might be funny about the apple (?? asking) where would you like me to take your seed. You don't need to speak the language you can feel the fields of it. Look how trees speak together, how when you walk in the woods plants accommodate each other. This is the space I need to live, or I have to grow taller to the left or right to get some light. They accommodate each other. Walk in the true jungles made by nature through plants facilitating (1:44). each others souls and you get a different feeling. It is very different from walking through man made jungles, where you feel the pain of the trees because they are being forced (to live in a place). It's like imprisoning a soul. Man will soon learn these things and understand it. We have seen it now in the world of food. Fish that are free have no diseases, the ones man confines to boxes we see diseases. they don't want to exist. 47

(1:46). Fish are talking to us, trees are getting diseases because they don't want to be in that position. Then they say, the trees are all getting decimated because of the disease. Have we seen or allowed for the understanding of the feeling of the tree. They say I need

more space, 1 meter is not good enough for me, you locked me in a prison, I like to have 2 meters. If we understand this and plant them that way, we'll see that trees are without disease, we'll see agriculture without pesticides and fertilizers, but you have given them the (correct) environment to grow. We have shown this in our agricultural teaching, when we add Gans to it, it's not just that, but the Gans creates a new environment for the plant. It creates a condition that a plant can take what it likes from its environment so it grows bigger. How foolish we have been that we haven't seen it. We try to force them with fertilizers, you can give me as much as you like, I'll blow up but my soul ?? I don't put the right things in my seed because I don't have the right emotion, so when your child eats my seed it doesn't have the right (nutrients). It's just you have been brought up that way. We have to understand the whole process, and the position and work of the soul of the plants, then if we understand that we'll understand the soul of this planet. What does this planet want from us to be. So many times I say, the earth is crying blood, (1:48). through his soul for what man is doing to its entity. It's like a father watching his child destroy whatever he has made, his life work being destroyed and destroyed until the child realizes that he is destroying his own ?? what his father has left for him, it's for me to elevate myself but I have destroyed everything how can I elevate. If man could hear the cry of the soul of this planet for he and animals are doing to it, man would stop, he would freeze in his step. This is what the purpose of these teachings are to open man's eye to more knowledge. .. In Kenya I teach with Dr. Gauwta agriculture and about the Gans, but at this time I can only teach them about the Gans and how they can increase their profits. But I can't teach them ??? deeper things, to increase the environment by being correct. ?? Would a plant give me what I need directly that I don't even need to consume it and enjoy its beauty. This is a new innovation of the new systems. When you make a food system you are all happy to get a CH3 and get energy, but what about the soul that, that entity creates that it gives unconditionally to you. ?? what I nourish. (1:50). **We have the same problem with our flight system, they don't see that to fly it needs the understanding of the freedom of the giving by the entity you use and not by forcing it**. I give from my soul for you to give me (the flight) and to show me the beauty of flight, and for me it would be a pleasure to be able to fly. Then you'll find out that everybody will walk to the king, which is the soul of the man that with it, it becomes generous to give, not to take. When we understand what this technology brings us then we'll understand the structure of the soul, the we don't need to go to the (Wailing) Wall and bang our head to it to become elevated in our understanding, because we are just banging against, what i call a solid wall, which the soul can't accept. When you speak about agriculture understand what is the soul of the plant and why does it operate this way. It doesn't matter if the energy of the plant that you need is in Africa, Europe or Asia, while you are in America. Man has a lot to learn. We saw the magnets Rick showed last week, look beyond the immediate fields to where these fields will end up, who takes what they need, (1:52). When we understand the agriculture in what was just explained there are 2 points, first we don't need to eat the plant, and secondly we give respectfully for the existence of that soul. Because if at the end of the day the AA turned out to be the soul of the mans container, becomes the body of the man, ?? so it is for the plant but a different strength. The AA of the body of man creates, needs the iron to create blood that it can it can flow that it makes it as a ?? , the same AA of different strengths with Mg and other things creates the green leaves and the rest of the things that gives what we call the vertical position. All these

plants talk to each other, they communicate in the language of the soul, and once we understand the soul of the other, (some will do with the other space that they need to ?? space themselves in). Agriculture, the soul of the plants, ?? should become a ?? rhythm for the soul of the man living in the space. We have been ignorant of it. We need to understand how we can elevate the soul of the plant that with it, it grows the plant ??? , then it becomes other aspects and understandings (1:54). It's for us as the human race to go a step further, so that every pack of energy in the U doesn't become food. Q: How do we stop the lion from eating the lamb? How do you stop your physicality from destroying your soul. So if you translate it then you'll understand it. It's for man to understand to be able to teach and convey the message in a way that the soul of being has a different packaging in the brain of the man in receiving energy from the U and a different way of packaging in giving to the U, then it receives and gives what it needs (without killing). **No one in the U consumes energy the way man does. It is the malfunction of the system which we are trying to correct**, but (1:56). it has to be corrected from ... there are 2 ways to do it first is to **literally destroy everything that this planet has created, destroy this Solar System**, bring it to a point which happens many times to bring it to a point that nothing goes out of this place. ?? wipe out the whole planet. But within it there is a soul and there are souls (living here), but these souls (that) have not changed will manifest themselves in another dimension, then we have the same problem. This goes back to the story of Moses, a lot of people look at Moses and his life and call it Judaism and from it has come Christianity. When you at the behavior of the Jews today, one which we all know more then others, like Hitler, compare it to the training of Moses, didn't he kill all the species of one race, those who grown up ??? Didn't Hitler kill most of those who were his lovers. Don't we see the same pattern with killing with the Jewish State, but wait, it didn't start with Moses himself, didn't the King order the killing of all the male species (1:58). because he knew there would be someone to take his position. He looked at the king to come as a king of physicality and never understood that the king was supposed to come in the soul of the man. Haven't we seen the repetition of the same in Hitler's time, killing all the men of one village. Because it is ingrained in the conduct. Haven't we seen the same thing with Islam? The same things with Mohammad is now repeating itself in different names and shapes ?? Why does every race see killing as a solution. This is what we have to change and this comes from the knowledge, the education that you can have everything and you don't need to kill or commit a crime, which means devaluating your own soul. This is part of this understanding. Now when you create a Gans or Gans machine, a lot of people followed but then stopped, which means you are not mature yet. If you understand the soul of a plant and what it needs and to elevate it and comfort it. You have been taught how to make Gans, (2;00). or create a free energy and to convert the energy for what you need, which means you wouldn't have to kill for it, many of you have started, but it is a process of learning. A lot of things that have been taught, but the 129 Tesla is the best example, but nobody has picked it up, nor understood the full meaning of the test I set up years ago. He draws 3 boxes each slightly larger then the previous one, representing 3 systems of progressive strengths. By the understanding of plasmatic magnetic fields we created an Infinity Loop (IL), the stronger fed the weaker and took what the weaker didn't want, and we created such a commotion by feeding more and more, because the (weak one) was a hungry one, and we achieved 129 Tesla. The weaker one was the soul, the stronger one is a system you can create, the
